1 United States of America,
Before Federal Trade Commission. } ss.

In the matter of
Standard Oil Company. } Docket No. 4389.

I, Otis B. Johnson, Secretary of the Federal Trade Commission and official custodian of its records, do hereby certify that transmitted herewith is a full, true, and complete transcript of proceedings had before the Federal Trade Commission in the above entitled matter, consisting of:

Part 1—Pleadings (11-29-40 to 10-9-45, incl.).
Part 2—Pleadings (10-10-45 to 8-9-46, incl.).
Part 3—Testimony (Pages 1 to 990, incl.).
Part 4—Testimony (Pages 991 to 1952, incl.).
Part 5—Testimony (Pages 1953 to 2972, incl.).
Part 6—Testimony (Pages 2973 to 3904, incl.).
Part 7—Testimony (Pages 3905 to 4790, incl.).
Part 8—Testimony (Pages 4791 to 5752, incl.).
Part 9—Testimony (Pages 5753 to 6494, incl.).
Part 10—Testimony (Pages 6495 to 7242, incl.).
Part 11—Testimony (Pages 7243 to 8057, incl.).
Part 12—Exhibits—Commission (original).
Part 13—Exhibits—Respondent (original).

and separate original exhibits marked:

2-1	2-2	2-3	2-4
4389-1	4389-1	4389-1	4389-1

That also transmitted herewith is a full, true, and complete copy of the Trial Examiner's Report and Exceptions related to this proceedings.

That this transcript and Trial Examiner's Report and Exceptions are certified to the United States Circuit Court of Appeals for the Seventh Circuit, pursuant to the filing in said Court of a petition for review of an Order to Cease and Desist, dated October 9, 1945, and modified August 9, 1946, entered by the Federal Trade Commission in the above indicated proceeding.

In witness whereof, I hereunto subscribe my name, and affix the seal of the said Federal Trade Commission, at its office in the City of Washington, D. C., this 5th day of November, A. D. 1946.

Otis B. Johnson,
Secretary.

(Seal)

3 UNITED STATES OF AMERICA.

BEFORE FEDERAL TRADE COMMISSION.

In the matter of
Standard Oil Company. } Docket No. 4389.

COMPLAINT.

The Federal Trade Commission, having reason to believe that Standard Oil Company, a corporation, has violated and is violating the provisions of Section 2 (a) of the Clayton Act as amended by the Robinson-Patman Act (U. S. C., Title 15, Sec. 13), hereby issues its complaint, charging as follows:

Paragraph One: The respondent, Standard Oil Company, is a corporation organized, existing and doing business under and by virtue of the laws of the State of Indiana, with principal office and place of business located at 910 South Michigan Avenue, Chicago, Illinois. Respondent is engaged in the business, among other things, of distributing and selling gasoline to and in the City of Detroit, Michigan, and adjacent territory.

Paragraph Two: Respondent sells its gasoline to about 450 retailers thereof in the Detroit area, with a large proportion of whom respondent has entered into contracts, now in force, obligating respondent to sell and deliver to such retailers all of their respective requirements of respondent's brand of gasoline during the terms of such contracts. For the purpose of supplying said customers and of making deliveries pursuant to said contracts, respondent ships its gasoline from its refinery at Whiting, Indiana, to its terminal at River Rouge, Michigan, from which point respondent transports and delivers said gasoline to said customers in tank cars or tank wagons; and there is and has been at all times herein mentioned a continuous stream of trade and commerce in said gasoline between respondent's refinery at Whiting, Indiana, and said retail dealers purchasing the same in Detroit, Michigan. All of such purchases by said retail dealers are and have been in
4 the course of such commerce. Said gasoline is sold by
respondent for resale in the Detroit area.

Paragraph Three: Since June 19, 1936, in the course and conduct of its business above described, respondent has sold, and now sells, its gasoline to four Detroit dealers engaged in reselling said gasoline at retail; at prices substantially lower than the prices charged by respondent to its other Detroit retailer purchasers for gasoline of the same grade and quality. Said four dealers are: Citrin-Kolb Oil Company; Stikeman Oil Company, Inc.; Wayne Oil Company; and Ned's Auto Supply Company. Each of said dealers owns or operates one or more gasoline stations where respondent's gasoline is sold at retail to consumers thereof, in competition with other retailers of gasoline purchasing the same from respondent or from other manufacturers. The prices at which respondent has sold its gasoline to said four dealers from time to time since June 19, 1936, have ranged from one-half cent to one and three-quarters cents per gallon lower than the prices charged by it to other Detroit retailers for the same gasoline. Under normal merchandising conditions, during the greater part of that period, respondent's price to said four dealers for its "Red Crown" gasoline (its largest selling brand) has been one and one-half cents below its price therefor to other retailers.

Paragraph Four: The effects of the discrimination in price described in the preceding paragraph hereof has been and may be to injure, destroy and prevent competition with each of the four dealers named in said paragraph, in the resale of gasoline.

Wherefore, The Premises Considered, the Federal Trade Commission on this 29th day of November, A. D. 1940, issues its complaint against said respondent.

Notice.

Notice is hereby given you, Standard Oil Company, respondent herein, that the 3rd day of Jaanuary, A. D. 1941, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said Act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The Rules of Practice adopted by the Commission with respect to answers or failure to appear or answer (Rule IX) provide as follows;

In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.

* * * *

Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.

If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on
6 the allegations of fact set forth in said complaint
and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true, and if in the judgment of the Commission such facts admitted constitute a violation of law or laws as charged in the complaint, to make and serve findings as to the facts and an order to cease and desist from such violations. Upon application in writing made contemporaneously with the filing of such answer, the respondent, in the discretion of the Commission, may be heard on brief, in oral argument, or both, solely on the question as to whether the facts so admitted constitute the violation or violations of law charged in the complaint.

In Witness Whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 29th day of November, A. D. 1940.

By the Commission.

Otis B. Johnson,
Secretary.

9 BEFORE FEDERAL TRADE COMMISSION.

(Caption—4389)

ANSWER.

Comes now Standard Oil Company (Indiana), Respondent herein, and for its Answer to the Complaint of the Federal Trade Commission dated November 29th, 1940, admits, denies and alleges as follows:

1.

Respondent denies each and every material allegation, matter and thing in said Complaint contained not hereinafter specifically admitted or explained.

Defense No. I.

2.

Respondent admits Paragraph One of Complaint.

10 3.

Respondent denies Paragraph Two of Complaint except as herein specifically admitted and explained, and alleges the facts in respect of the subject matter thereof to be as follows:

4.

Respondent alleges that it sells gasoline in intrastate commerce to several hundred retailers of gasoline in Detroit, Michigan; that with some of such retailers Respondent has entered into contracts now in force obligating Respondent to sell and deliver to such retailers their requirements of certain of Respondent's specified brands of gasoline during the terms of such contracts and that in those instances where such contracts exist they have been negotiated entirely within the State of Michigan; that with many others of such retailers Respondent has no contracts for the sale of gasoline.

5.

Respondent alleges that from time to time Respondent ships gasoline from its Whiting, Indiana, refinery to its terminal at River Rouge, Michigan, which said gasoline is unloaded into storage tanks and comes to rest in the State of Michigan and is commingled with and becomes a part of the general chattel property within said State and as such immediately becomes and is subject to the
11 jurisdiction and laws of the State of Michigan and
amenable to levy and subject to payment of State and local property taxation therein.

6.

Respondent alleges that from time to time thereafter, and as orders therefor are received at Respondent's offices within the City of Detroit, Michigan, gasoline is sold and delivered in intrastate commerce to purchasers in Detroit so ordering it, through the medium of tank cars, truck trains, and tank trucks. That the gasoline to service such orders originates in the State of Michigan at Respondent's River Rouge terminal and is withdrawn from the storage tanks thereat; that in respect of retail reseller customers referred to in Paragraph Two of Complaint such customers' orders are serviced by tank truck, and in such operation an intermediate step occurs in that gasoline originating in Respondent's storage at River Rouge, Michigan, is transported to bulk storage warehouse tanks in Detroit, Michigan, where it again comes to rest and continues in its character of commingled chattel property within the State of Michigan; that from such warehouse storage tanks said gasoline is withdrawn into tank trucks and thence delivered to Respondent's retail reseller customers in Detroit, Michigan, who have placed orders therefor in Detroit, Michigan, which orders have been accepted
12 by Respondent therein, whereupon payment for said
gasoline is made by such purchasers in Detroit, Michigan, and such payment is received by Respondent therein.

7.

Respondent alleges that upon sale and delivery of gasoline by any physical means by Respondent to any of the customers referred to in Paragraphs Two and Three of Complaint, said gasoline becomes the sole and absolute property of such customer, to dispose of by resale or otherwise in such manner as he will, and Respondent has no interest in, supervision over, or control of said gasoline thereafter; that Respondent has no pecuniary interest in, supervision over, or control of the gasoline business or other business of the customers referred to in Paragraphs Two and Three of Complaint, or any of them.

8.

Respondent denies that there is or that there has been at all times mentioned in Complaint a continuous stream of trade and commerce in gasoline between Respondent's refinery at Whiting, Indiana, and the retail and wholesale dealers purchasing gasoline from respondent in Detroit, Michigan, and avers the fact to be that the customary, ordinary and usual course of the trade, commerce and business in the sale of gasoline by and between Respondent 13 and the gasoline customers referred to in Paragraphs Two and Three of Complaint is purely intrastate in character and is not interstate in character, and that the transactions therein involved originate and are negotiated and consummated within the State of Michigan, and that said transactions, orders and sales neither directly nor indirectly influence, bear upon, burden, or affect interstate commerce in anywise whatsoever.

9.

Respondent alleges that in event there has been since June 19, 1936, or at any time, any interstate gasoline transaction between Respondent and any of the gasoline customers referred to in either Paragraphs Two or Three of the Complaint, such transaction or transactions were isolated instances and independent of and apart from the usual, ordinary, customary, intrastate course of commerce between said parties; were unusual, extraordinary, and not a customary course of commerce between said parties; have been fully consummated long prior to the issuance of the Complaint herein, and that there did not exist at that time and does not presently exist any course or ordinary flow of interstate dealings in gasoline, nor any pending uncompleted interstate transaction between Respondent and said customers, or any of them.

14 **10.**

Respondent alleges that since the gasoline sales, commerce and dealings between Respondent and the gasoline customers referred to in Complaint are solely intrastate in character, and since there did not exist at the time of the issuance of said Complaint and do not exist now any gasoline sales, dealings or commerce interstate in character between Respondent and said customers, or any of them, the Federal Trade Commission has no jurisdiction over Respondent in this action in respect of the matters alleged in the Complaint, nor over the transactions alleged in the Complaint, nor the subject matter thereof, and no jurisdiction, power or authority to maintain or proceed with this action except to dismiss the same and the Complaint herein, to which dismissal Respondent is entitled.

11.

Respondent hereby realleges by reference all of the allegations of Defenses No. II, III, IV, V and VI hereof as part of Defense No. I.

For further and additional defenses, and in event it should be determined that the Federal Trade Commission has jurisdiction to maintain this action, Respondent alleges, denies and explains as hereinafter set forth:

15 Defense No. II.

12.

Respondent hereby realleges by reference all of the matter contained in Defense No. I, III, IV, V and VI hereof, and denies Paragraph Three of Complaint except as in this Answer specifically admitted and explained and alleges the facts in respect of the subject matter thereof to be as follows:

13.

Respondent admits that since June 19, 1936, it has sold and now sells gasoline to four Detroit gasoline dealers named in Paragraph Three of Complaint, as follows:

Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., Wayne Oil Company and Ned's Auto Supply Company.

Respondent admits that said dealers own or control certain retail gasoline stations in Detroit, and have from time to time operated some of said retail stations and that such retail operations when existing are in competition with other retail stations in Detroit, or some of them,
16 supplied by Respondent or other suppliers. Respondent alleges upon information and belief that the following is a statement of the facts relative to each of said dealers in respect of the nature and extent of his business, and alleges as follows the prices at which Respondent sold and sells gasoline to each of them:

A. Citrin-Kolb Oil Company:

This business was originated in 1920 by J. A. Citrin as a retail gasoline business and continued to expand. In 1926 bulk storage was acquired and retail and wholesale operations continued and expanded until early 1936 when the company decided to withdraw from retail operations. This was increasingly accomplished until 1939 when approximately 96½% of the company's annual gasoline volume of in excess of five million gallons was disposed of at wholesale. For the first eleven months of 1940 such percentage dropped to approximately 86% of volume by reason
17 of necessity for the company to take back and temporarily operate some of its owned or leased stations. In 1940 the company operated six service stations and supplied in addition thereto fifty-one service stations in Detroit operated by others. Respondent became this company's gasoline supplier in 1924. The price to this customer was upon the regular dealer tank wagon basis from time to time in effect until bulk storage was acquired, after which time the price was and is the regular wholesale tank car price in effect from time to time.

B. Stikeman Oil Company, Inc.:

This company was originated in 1931 by E. D. Stikeman and acquired bulk storage and engaged in wholesale and retail sales of gasoline and auto accessories. Re-

spondent has been this company's gasoline supplier
18 since that time. In 1935 this company decided to withdraw from its retail operations and had completely withdrawn by early 1938 and since that time its annual volume of gasoline business has been approximately two million gallons, which in its entirety is disposed of by sale at wholesale. This company supplies eighteen retail service stations in Detroit. The price charged this customer by Respondent since inception of the business in 1931 has been and now is the regular wholesale tank car price in effect from time to time.

C. Wayne Oil Company:

This company was originated by E. B. Ledbetter in 1931 as a retail seller of gasoline and continued its expansion in that operation until July, 1935, when the company decided to withdraw from retail operations, acquired bulk storage and proceeded to convert the business into one
19 of wholesaling gasoline and auto accessories. From the fall of 1935 to the fall of 1939 all of this company's gasoline purchases were disposed of at wholesale. Since that time it has been required to take back temporarily and operate three service stations. From its annual volume of in excess of two million gallons of gasoline approximately 79% is disposed of at wholesale. It supplies twenty-four retail outlets in addition to the three it operates in Detroit. The price to this customer was upon the regular dealer tank wagon basis from time to time until bulk storage was acquired, after which time the price was and is the regular wholesale tank car price in effect from time to time.

D. Ned's Auto Supply Company:

This company was originated by Ned Gershenson and has expanded until now the company operates several combined service stations and stores in Detroit and has
20 an annual volume of approximately four million gallons of gasoline. The company's business is primarily retail. On March 7th, 1938 this company acquired bulk storage and began buying and receiving gasoline in tank car lots from which storage it supplies its own service stations in Detroit and has serviced some commercial accounts to a limited extent. The price to this customer was upon the regular dealer tank wagon basis from time to time in effect until bulk storage was acquired, after

which time the price was and is the regular wholesale tank car price in effect from time to time, except that from September, 1936 through February, 1938, this customer was on a price basis of ½¢ per gallon less than the regular dealer tank wagon price in effect at that time for the reason that it was necessary to make such price to meet equally low or lower prices being then offered to this customer by competing gasoline suppliers, and Respondent was forced to competitive compulsion and
21 pressure to make and maintain said price in order to retain its said customer until purchases by said customer began to be made upon the regular tank car basis, at which time said reduced tank wagon price was wholly eliminated and has not since been and is not now in effect.

14.

Respondent alleges that up until the time each of the four dealers named in Paragraph 13 above, or any of their predecessors, began purchasing upon a tank car basis, and while purchasing on a dealer tank wagon basis, that such tank wagon price to each of said four customers and to the retail dealers referred to in Paragraph Two of the Complaint was identical with the single exception explained in Paragraph 13 D above. That since each of said four dealers began to purchase on a tank car basis that said tank car prices have been identical to each of said four dealers.

15.

Respondent admits that the tank car prices at which it is now selling gasoline to the dealers named in Paragraph Three of Complaint is lower and different than the tank wagon dealer prices at which Respondent is selling
22 gasoline to retail dealers referred to in Paragraph Two of Complaint, but specifically denies that such lower and different price constitutes an unlawfully discriminatory price within the terms and meaning of Section 2 (A) of the Clayton Act as amended by the Robinson-Patman Act (U. S. C. Title 15, Section 13), or of any other law. Respondent alleges the fact to be that on different grades of gasoline since June 19, 1936 tank car prices have ranged from ¾¢ to 1¾¢ per gallon less than said dealer tank wagon prices in Detroit, and alleges the fact to be that the only instance of a ½¢ reduction below regular

dealer tank wagon price was the instance described in Paragraph 13 D above and was not a tank car price at all but was a reduction below dealer tank wagon price, which reduced price was eliminated on or about early March 1938 and has never since been used or in effect. Respondent admits that in Detroit the tank car price of Red Crown gasoline (Respondent's largest selling brand) has normally been 1½¢ below the regular dealer tank wagon price thereof since June 19, 1936, but alleges that at times such tank car price has been less than 1½¢ below dealer tank wagon price, and admits that at times since June 19, 1936 and since any one of said four dealers has had bulk storage and has been purchasing gasoline in tank
car quantities, that said dealers purchased the same
23 on the tank car price in effect at the time of such
purchase.

16.

Respondent alleges that since the time each of the gasoline customers named in Paragraph Three of the Complaint acquired its own bulk storage, distribution equipment and wholesale facilities, that such customer is entitled to be classified as a wholesale or jobber buyer of gasoline as distinguished from a retail reseller or service station operator who purchases gasoline on an entirely different basis of taking frequent small deliveries by tank truck from a supplier who delivers into relatively small storage tanks in or upon the service station premises, which tanks are directly connected to the retail pumps. Further, that such wholesaler or jobber buyers perform a distinctly different service and function and operate upon a different basis from retail resellers, and that such differences and distinctions in services and functions and between methods of operation have been recognized for many decades last past and are presently recognized and have been so recognized since June 19, 1936 in Detroit and elsewhere throughout the entire United States by the entire oil industry as well as by other industries dealing in substantially all kinds
of consumer goods, and that in consequence of such
24 differences and distinctions in operations, functions
and services, and the essential recognition thereof, the oil industry and other industries in Detroit and throughout the rest of the United States has and does classify and bona fidedly select customers on the basis of functional

services and of methods of operations entitling customers to be classified in distinctive and distinguishable classifications. Further, that such classifications are essential and necessary and appropriate to the existing and continuing business and commercial activity in consumer commodities, including oil products, in Detroit and throughout the United States, and that such system and practice of selection and classification of customers in the oil industry and other industries in Detroit and throughout the United States forms a necessary, indispensable and integral part of the commercial economy of this nation, and one which must be considered, recognized, met, and participated in by an operator engaged in the business of distribution and marketing of oil products if such business is to fairly and successfully survive in the market place in Detroit or elsewhere in the United States. Further, that as a result of such necessary selection and classification of customers, and as an integral and basically essential part thereof, and of the system of commercial economy which makes such classifications necessary, differences in prices of the same commodities are made to customers selected and falling within different classifications, and purchasers falling within the classification of wholesalers or jobbers of gasoline are entitled to purchase at tank car prices as distinguished from dealer tank wagon prices at which gasoline is sold to retail resellers.

17.

Respondent alleges that its general policy and practice of bona fidedly selecting and classifying gasoline customers as wholesale or jobber customers, as distinguished from retail resellers, is as follows:

That such wholesale or jobber customer so classified shall have adequate bulk storage of his own; that he be equipped to receive bulk deliveries by tank car or truck train into such storage; that he have adequate distribution and delivery facilities; that he make tank car purchases in substantial volume and do a continuing substantial volume of business as a bona fide gasoline dealer maintaining and operating an established gasoline business; that he have satisfactory credit rating; that he maintain a sufficient personnel and all requisite facilities and equipment to adequately operate his business, service his customers, and perform his functions as a wholesaler or jobber, and assume the hazard and expense of fully operating his own business.

26 Respondent alleges that each of the four customers named in Paragraph Three of the Complaint fully, fairly, and reasonably falls within not only the requirements set forth in Paragraph 17 above but within all fair, reasonable, usual and proper requirements for classification as a wholesaler or jobber, and that each maintains its own adequate bulk storage; delivery tank trucks, salesmen and operating personnel; buys in substantial tank car or truck train lots; buys commodities other than gasoline in wholesale and carload lots; bears all expense of its own operations, no part of which are borne by Respondent; becomes immediately the absolute owner of the gasoline delivered into its storage by Respondent and controls its disposition; does not depend upon or desire that its customers be serviced by Respondent's salesmen, and Respondent's salesmen do not service or solicit such customers; assumes the risk of carrying its own inventories and of extending its own credits and making collections, and assumes all the hazards of its own operations. Further, that said four customers are each bona fidedly qualified to be regarded and are regarded by the oil industry in Detroit as within the classification of wholesale or jobber customers, and they each are able to purchase as such from a great number of gasoline suppliers operating

27 in Detroit competitively with Respondent. Further, that Respondent is without power to, and is neither entitled nor required to police, control or dictate the manner or method of disposition of such gasoline as may be employed by such customers, and that such gasoline becomes the absolute property of such customers upon their purchase thereof from Respondent. Further, that said four customers and each of them are legitimately and lawfully entitled to purchase gasoline, and Respondent is entitled to sell them gasoline, within their classification as wholesalers or jobbers and at prices which are or may be at the time different and lower than prices charged by Respondent for the same product to Respondent's retail reseller customers without regard to any other consideration and without regard to any relation which such price differential may or may not bear to Respondent's differing operating costs arising from differing costs of manufacture, differing costs arising out of different methods of

sale or delivery, or otherwise, and that any such acts upon Respondent's part and the existence of any such facts have not and do not constitute a violation of the meaning and terms of Section 2 (A) of the Clayton Act as amended and are not unlawful thereunder or under any law.

28 Defense No. III.

19.

Respondent hereby alleges by reference all of the matter contained in Defenses No. I, II, IV, V and VI hereof.

20.

For further defense Respondent alleges that the differential alleged to exist from June 19, 1936 between the prices charged by Respondent for gasoline sold to the dealers described in Paragraph Two Complaint and the four dealers named in Paragraph Three Complaint, is and has been a differential which now, and at all times since June 19, 1936, made, and now makes, only due allowance for differences in the cost to Respondent of sale and delivery resulting from the differing methods and quantities in which gasoline was and is sold and delivered to dealers described in Paragraph Two Complaint on the one hand and the four dealers named in Paragraph Three Complaint on the other hand.

21.

Respondent alleges that in selling and delivering gasoline to and servicing retail resellers who received delivery by Respondent's tank trucks, which classification of dealers is referred to in Paragraph Two Complaint, that Respondent is required to and does maintain offices, 29 bulk storage plants, fleets of tank trucks, and servicing equipment and facilities in Detroit, and employs, and maintains, supervisory, clerical, real estate, sales, credit, legal, accounting and office personnel within the City of Detroit, and, in addition, employs and maintains operating personnel at various points in Detroit as well as at River Rouge, Michigan, to maintain and operate the physical equipment referred to above. Further, that in addition to the direct expense incident to the organization maintenance referred to above, there exists direct expense, allocable to said sale and delivery operation, incident to advertising, sales research and supervision, accounting, credit supervision, legal expense, general office expense, and general supervision and overhead expense arising in the general office of Respondent at Chicago, Illinois.

22.

Respondent alleges that in the type of sales and deliveries referred to in Paragraph 21 above, some of the more substantial items of cost, among others, to Respondent arise out of the necessity for maintenance of bulk plants and numerous delivery trucks and necessity for frequent small deliveries to numerous dealers who have relatively limited storage capacity; necessity for frequent sales calls requiring a large force of salesmen; and necessity for constantly servicing the accounts from the sales, credit, and maintenance standpoints, and otherwise.

23.

Respondent alleges that the four dealers named in Paragraph Three Complaint maintain, in their own business and at their own expense, their own bulk storage, delivery trucks, sales, credit and service forces, and employ personnel adequate to discharge the functions specifically set forth in Paragraph 22 above, all without cost to Respondent.

24.

Respondent alleges that in selling and delivering gasoline since June 19, 1936, and presently, to said four dealers, the items and basis for costs of sale and delivery of gasoline set forth in Paragraph 21 above are either entirely absent or relatively negligible.

25.

Respondent alleges that the marginal differences in the prices paid to Respondent for gasoline from June 19, 1936, and presently, by the dealers described in Paragraph Two Complaint, over and above the prices paid to Respondent for gasoline during and at said period by said four dealers, was and is consumed in making sales and deliveries of gasoline to the class of customers described

in Paragraph Two Complaint, by the costs of the
31 operations of Respondent referred to in Paragraphs 20, 21 and 22 above, to the extent that such costs are reasonably and fairly calculable. Further, that said additional costs to Respondent arise out of the differences resulting from differing methods of sale and delivery of gasoline to said two classes of customers as alleged in Paragraphs 20, 21 and 22 above, which costs are substantially saved by Respondent in making sales and deliveries to said four dealers, and said price differentials make only due allowance therefor. Further, that Respondent has at all times since June 19, 1936 been, and presently is, fully justified in and lawfully entitled to have made and to make the said differentials in gasoline prices as between said classes of customers, and that said acts on the part of Respondent have not and do not constitute a violation of Section 2 (A) of the Clayton Act as amended and are not unlawful thereunder or under any law.

Defense No. IV.

26.

Respondent hereby realleges by reference all of the matter contained in Defense No. I, II, III, V and VI hereof.

27.

For further defense Respondent alleges that for
32 many years last past, and since June 19, 1936, and presently, competition in all phases and branches and classifications of the gasoline marketing business in Detroit, has been, and is extremely keen, vigorous and aggressive; that many refiners, suppliers, wholesalers, jobbers and retailers of gasoline have been, and are, operating therein, and are constantly seeking new and additional outlets, markets and customers for their gasoline; that some of said marketers of gasoline continuously, and some periodically, attempt to invade, proselyte and raid the markets and customers had by other marketers; that competitive conditions and price conditions in relation to marketing of gasoline are and have been continuously chaotic, uncertain and disturbed in varying degrees for many years and are so now; that many devices, schemes, plans, concessions, premium offers, rebates, special deals,

special discounts, inducements, preferential considerations, commercial bribery, special allowances, favorable contracts, preferential offers of services and facilities, and cut prices, are constantly being used and offered by a substantial number of marketers in all branches of gasoline marketing. Further, that the State of Michigan and City of Detroit are areas high in gasoline consumption and are well supplied with water, rail and pipeline transportation; that many water terminals for the handling of gasoline exist on the boundaries of the state and more particularly on the water boundaries of the lower peninsula thereof;
33 that there exists a substantial amount of crude oil production within the state and there are numerous large and small refineries scattered through the lower peninsula thereof seeking outlets for their products; that immediately contiguous to the south of the state, and particularly in northern Ohio, Indiana and Illinois, there are many large and small refineries and crude oil and gasoline pipeline terminals which have ready and cheap means of transportation for gasoline into Michigan by means of water, rail and pipeline; that the State, and the cities within it,—particularly Detroit,—offer an attractive market to marketers of gasoline; that abundant supplies of gasoline are easily and readily available from many sources to supply that market; that all of these factors contribute to and stimulate the chaotic and disturbed competitive gasoline marketing conditions in all branches of said marketing in Detroit as referred to above.

28.

Respondent alleges that for many years last past it has operated a gasoline marketing business in Detroit under the conditions described in Paragraph 27 above; that since September, 1936 Respondent has not and does not engage in the operation of retail service stations; that Respondent's business in Detroit in gasoline marketing to resellers of gasoline is confined to (a) sales to retail resellers such as are described in Paragraph Two Complaint and who
34 are supplied and serviced directly by Respondent through its own organization and distribution system in Detroit, and (b) to wholesale and jobber dealers such as those named in Paragraph Three Complaint; that presently, and for approximately three years last past, the four dealers named in Paragraph Three Complaint are

the only wholesale or jobber customers in Detroit which Respondent has; that prior thereto Respondent had other such customers but lost them to competitive suppliers by reason of lower price offers and inducements given by Respondent's competitors, which Respondent could not meet or declined to meet.

29.

Respondent alleges that said four dealers named in Paragraph Three Complaint, or their predecessors, have been continuously, for many years last past, the gasoline customers of Respondent; that at the time each of said customers went onto a tank car basis of purchasing gasoline that it could purchase on such basis, comparable gasoline to that sold by Respondent, from a number of Respondent's competitive gasoline suppliers for an equally low or lower price than from Respondent, and upon equally or more advantageous terms and arrangements in the matter of facilities, services, inducements and benefits than it could or did receive from Respondent, and each of said customers knew of such existing and current opportunities and offers from competitors of Respondent and had from such competitors specific offers equally as low or lower in price, and equally or more favorable in terms and the furnishing of services and facilities than it had from Respondent; that Respondent knew of the existence of such competitive offers to said customers from various sources and was advised of them by said customers and advised that Respondent must meet or approach meeting such offers to retain said customers; that had not Respondent at such time given to each of said customers the tank car basis and price for purchasing gasoline, each of said customers would have been lost by Respondent to a competitive supplier.

30.

Respondent alleges that from the time each of said four customers began purchasing gasoline on a tank car basis and price there has never been a time, including the present, when each of said customers could not have purchased, and they could now purchase, comparable gasoline to that sold by Respondent at equally low or lower prices and on equally or more favorable arrangements and terms from competitors of Respondent than are granted to them from Respondent; that each of said customers have from time to time, since June 19, 1936, advised of and discussed with Respondent a number of such competitive offers; 36 that in order to have retained, and to now retain, each of said customers it has been, and is now, necessary to continue it on said tank car basis and price, and that if such price or arrangement were made any less favorable to any of said customers by Respondent at the time such price and arrangement was made, or now, that Respondent would have then, or would now, immediately have lost, or would now lose, said customer to a competitive supplier; that Respondent is informed and verily believes, and on information and belief alleges, that in the face of more favorable offers from competitive dealers to said four customers frequently being made, that Respondent could not have heretofore, or could not now, retain said customers except for the existence of a long business association with them, established good will, and the public acceptance that Respondent and said customers have built for Respondent's gasoline.

31.

Respondent alleges that in respect of the reduction of the dealer tank wagon price by ½¢ per gallon of gasoline given to Ned's Auto Supply Company in September, 1936, which continued through February, 1938, that Respondent was forced to make said reduction in price by a specific offer or offers made to said customer in August, 1936, by a supplier of gasoline competing with Respondent; 37 that said competitive offer was in connection with gasoline comparable to that supplied by Respondent and was offered to said customer at a price equally low or lower, and upon terms and arrangements with respect of facilities, services and benefits equally or more favorable to said customer, than were the said reduced price and arrangement that was offered by Respondent to meet such competitive offer; that Respondent was advised by said customer of said competitive offer and advised that said customer would accept it unless Respondent reduced its price; that Respondent agreed to make said reduction to partially meet said competitive offer and because of the compulsion of such competitive offer; that said customer advised Respondent that Respondent's reduced price was not fully competitive nor satisfactory, and did not

fully meet said competitive offer, but that it would continue purchasing from Respondent thereunder for the time being; that had not Respondent made such reduction in price in said instance, fully as great as it did, Respondent would have at that time lost said customer and was so advised by it; that if Respondent had not continued said reduction in effect until early March, 1938, when said customer qualified to purchase in tank car lots and on a wholesaler basis, Respondent would have promptly lost said customer upon withdrawing the reduced price,
38 and Respondent was constantly under pressure from said customer, induced by competitive offers to it, to make further reduction and to accord said customer more favorable purchasing arrangements, which matters were frequently discussed by said customer with Respondent; that as hereinbefore alleged said reduced price and basis has not been in effect or used since early March, 1938.

Further, that during the period said reduced price was in effect said customer took deliveries of gasoline in such relatively large quantities at such relatively few service stations compared to other retail resellers being serviced by Respondent, and such other facts and circumstances were existent, as to render such ½¢ per gallon of gasoline price reduction substantially commensurate with savings to Respondent arising from difference in the cost of sale and delivery of gasoline to said customer by Respondent resulting from the differing methods and quantities in which such gasoline was sold and delivered to said customer, and said ½¢ per gallon reduction in price to said customer made only due allowance for said savings accruing to Respondent as nearly as the same are fairly and reasonably calculable.

32.

Respondent alleges that at no time since June 19,
39 1936 has it offered or granted a preferential price below its established regular price, nor offered or granted concessions not regularly accorded all customers, to any of its customers, or classes of customers, except as the same was made necessary in order to meet an equally low or lower price offered by a competitor of Respondent, and Respondent has never made such preferential or reduced price offers to proselyte customers from other suppliers, and never have such preferential offers or

any acts in relation thereto on Respondent's part, had the effect, or tended to have the effect, or were likely to have the effect, of substantially lessening competition in any line of commerce; nor did they tend to create a monopoly in any line of commerce (specifically including gasoline commerce), nor did they injure, destroy or prevent competition, or tend to do so, with Respondent or any of its customers, or any of its customers' customers, or with any person or persons whomsoever, or at all, in Detroit or elsewhere.

33.

Respondent alleges that as particularly set forth above, that by reason of competitive compulsion and offers made by competitors of Respondent, which offers were for lower prices and more favorable sales arrangements than those being offered by Respondent, that Respondent, in good faith and because of necessity therefor to retain its customers, met, or partially met, the lower prices and more favorable terms and arrangements in respect of services, facilities and benefits offered by Respondent's competitors to the four dealers named in Paragraph Three Complaint, and Respondent alleges that all of the lower prices alleged to have been granted since June 19, 1936, and all that were granted, to said four dealers, were made to them in every instance in good faith to meet an equally low or lower price and equally or more favorable sales arrangements in respect of services, facilities or benefits made or furnished by a gasoline supplier or suppliers which were and are competitors of Respondent, all in strict accordance with law; and, hence, all of the acts of Respondent in respect of differentials in gasoline prices granted by Respondent, as between that class of dealers described in Paragraph Two Complaint and that class named in Paragraph Three Complaint, were fully and completely justified, and do not constitute a violation of Section 2 (a) of the Clayton Act as amended, and are not unlawful thereunder or under any law.

Defense No. V.

34.

Respondent hereby realleges by reference all of the matter contained in defenses numbers I, II, III, IV and VI hereof.

41 35.

Respondent specifically denies Paragraph Four of the Complaint.

Defense No. VI.

36.

Respondent hereby realleges by reference all of the matter contained in Defenses No. I, II, III, IV and V hereof.

37.

For a further defense Respondent alleges affirmatively that none of its acts as charged in the Complaint or as set forth in this Answer, and specifically that none of its acts in granting price differentials on gasoline sold by it to the customers described in Paragraph Two Complaint as contrasted with those described in Paragraph Three Complaint, have had, nor may have, the effect in Detroit or elsewhere, substantially to lessen competition or tend to create a monopoly in any line of commerce (including specifically commerce in gasoline), or to injure, destroy or prevent competition with Respondent, nor with any of the gasoline customers of Respondent, including specifically those described in Paragraph Two Complaint and those named in Paragraph Three Complaint, nor with any customers of any of the customers of Respondent including specifically gasoline customers of Respondent's cus-
42 tomers named in Paragraph Three Complaint, nor with any person or persons whomsoever in Detroit or elsewhere. Further by reference Paragraph 32 of this Answer is specifically realleged as a part of this paragraph.

38.

Respondent alleges that at all times since June 19, 1936 there have been, and now are, in Detroit many suppliers of gasoline competing with Respondent and selling gasoline comparable to that sold by Respondent, who since said time, have been, and now are, selling, and offering to sell, their gasoline to wholesale, jobber and retail dealers in Detroit at prices consistently below the prices at which Respondent has and is selling its gasoline to like customers.

Further, that collectively the suppliers competing with Respondent, sell substantially more gasoline in Detroit than does Respondent. Further, that the ratio of the volume of gasoline sold in Detroit by Respondent to the total volume sold in Detroit has for a number of years last past steadily decreased on the average. Further, that during a number of years last past the business of many suppliers of gasoline competing with Respondent has materially increased as to both volume sold and number of customers supplied.

43

39.

Respondent alleges in respect of the specific charge contained in Paragraph Four Complaint that at all times during the period since June 19, 1936, including the present, when the four dealers described therein engaged, or do engage, in retail service station operations and in selling gasoline at retail directly, that they, together with the retail reseller customers whom they have supplied and supply, all have maintained, and do maintain, at their service stations in Detroit, the currently prevalent service station price of gasoline to the consuming public.

40.

Respondent is informed and believes, and alleges on information and belief, that the margin of differential in price accorded said four dealers below the prevailing dealer tank wagon price, is consumed in a substantially greater part by the costs and expense to which said four dealers are put in maintaining and operating their respective storage and distribution facilities and their wholesale business, of which costs retail resellers are relieved, and that said four dealers could not use said substantially greater part of said margin, and in fact have not used and do not use any part thereof, for the purpose of underselling the prevailing service station prices of gasoline in Detroit in any direct retail operations and sales in which 44
they may have heretofore engaged or now engage.

41.

Respondent is informed and believes, and alleges on information and belief, that in all of the instances where said four dealers, and any of them, have heretofore supplied or now supply retail resellers who in turn sell at retail service stations, that the price charged by said four dealers to such resellers has been, and is, the regular and usual dealer tank wagon price prevalent in Detroit at the time of such sale, and is without concessions thereunder in any manner or form. Further, that said four dealers have not, and do not, exert any control over the resale price or competitive activities of their retail reseller customers. Further, that said four dealers have never, and do not now use the differential in price or any part thereof referred to in Paragraphs Three and Four Complaint, to undercut or undersell said prevailing dealer tank wagon prices, and do not in fact undersell said price, and hence have not, and do not, place their retail reseller customers in any advantageous competitive position as compared with other retail resellers in Detroit including those described in Paragraph Two Complaint who purchase at dealer tank wagon prices from Respondent, 45 as well as all retail resellers who purchase gasoline at said dealer tank wagon price in Detroit. Further, that said four dealers are confronted in the gasoline wholesale and jobbing field in Detroit with the competitive conditions described in Paragraph 27 above. Further, that none of them have or do initiate abnormal cuts in the prevailing Detroit dealer tank wagon price of gasoline, nor initiate offers of other concessions to their retail reseller customers and reduce their tank wagon price only when forced to meet, or partially meet, competitive prices in order to preserve and protect their business and retain their customers.

42.

Respondent alleges that said four dealers when engaged in any direct retail operations and sales of gasoline in which they may from time to time have engaged, or do engage, in Detroit, as well as all retail resellers to whom said four dealers may from time to time sell gasoline in Detroit, are confronted with the competitive conditions in the retail field described in Paragraph 27 above. Further, that neither said four dealers in their retail operations, nor their retail reseller customers, have ever initiated abnormal cuts in price below the prevailing service 46 station price of gasoline in Detroit, nor initiated the offer of premiums or employed other devices to give price advantages to the consuming public, but have from time to time been forced by other retail dealers to temporarily lower prices to meet, or partially meet, lower competitive prices; that as a rule such competitive prices have been only partially met in the first instance and often never completely met, and were completely met only when the force of the competitive pressure exerted by other retail resellers compelled such action as a defensive measure to preserve and retain the retail business had by said four dealers in their direct retail operations, and had by their retail reseller customers. Further, that the retail reseller customers of said four dealers always have been, and are, at liberty to exercise their own judgment and discretion as to what extent, if at all, they will meet competitive prices.

43.

Respondent alleges that the combined volume of gasoline purchased from Respondent directly by retail resellers at the prices charged by Respondent, and sold at retail, and that sold by Respondent to said four dealers at the prices charged by Respondent, and by them sold at retail or to retail reseller customers, is so small compared
47 to the total volume of gasoline sold at retail in Detroit, as to have no appreciable effect upon or substantially influence commerce and competition in gasoline in Detroit.

44.

Respondent alleges that for many years last past and since June 19, 1936, and at the present time, there have been, and are, numerous service stations scattered throughout Detroit which have and do sell gasoline of a grade and quality represented to be comparable to that sold by Respondent, at prices consistently lower, all of the time, by a range of from approximately one cent (1¢) to five cents (5c) per gallon, than the generally prevailing service station price in Detroit, and thus lower to said extent than are the prevailing service station prices maintained in Detroit by:

A. that class of retail reseller customers of Respondent described in Paragraph Two Complaint, who do in fact generally maintain the normally prevailing service station price;

B. said four dealers in their direct retail sales 48 when they are from time to time engaged therein;

C. the retail reseller customers of said four dealers.

Further, that the number of said low price service stations above referred to, and the volume of gasoline sold by them has been, and is, consistently increasing and is a substantial amount in the total volume of gasoline sold at retail in Detroit. Further, that the prices at which said low price service stations sell gasoline at retail to the consuming public is from time to time substantially below the cost of gasoline to said four dealers at the prices for which they buy the same from Respondent.

45.

Respondent alleges that neither the price differentials accorded said four dealers, nor the extent thereof, nor the use made of said differentials by said four dealers, or any of them, has been, or is, or may be, to injure, destroy or prevent competition with said four dealers nor with any of them, nor with their retail reseller customers, nor at all, in the resale of gasoline, and that neither the granting of said differentials to said four dealers, nor the effect thereof, nor the use made thereof, is in violation of Section 2 (a) of the Clayton Act as amended and is not unlawful thereunder or under any law.

49

46.

Respondent alleges by way of explanation that the term "dealer" as commonly and ordinarily used in the oil industry in Detroit and elsewhere in the United States, refers to and means a retail reseller of gasoline who retails such gasoline directly to the public from a service station or other retail gasoline outlet, and does not refer to the type of wholesale or jobber buyer of gasoline named in Paragraph Three Complaint, which latter type of buyer purchases gasoline in wholesale tank car lots and distributes the same from his bulk storage to retail resellers or commercial consumers, or to other outlets. The term "dealer" has been used interchangeably in the Complaint herein, and such terminology has been adopted in this Answer purely as a matter of convenience.

47.

Respondent asserts as its intention herein that all of the allegations of this Answer in all of its parts, shall be regarded as allegations in and respect of every defense, explanation and justification herein set forth, whether separately numbered or not, and hereby by reference re-alleges all of said allegations of this Answer as a part of, and in respect of, each of said defenses, explanations and justifications.

50

48.

Respondent specifically denies that it has violated Section 2 (a) of the Clayton Act as amended by the Robinson-Patman Act (U. S. C. Title 15, Sec. 13) or any part thereof, or any other law, by any act or acts alleged in the Complaint or set forth in this Answer.

49.

Respondent alleges that, if Section 2 (a) of the Clayton Act as amended by the Robinson-Patman Act (U. S. C. Title 15, Sec. 13), or any other law, shall be so interpreted, construed or applied by the Federal Trade Commission or any other administrative, quasijudicial or judicial tribunal, in such manner or form as to result in an order, judgment, ruling or holding that the acts of Respondent alleged in the Complaint and set forth in this Answer, are unlawful or violative of said law, or any other law, that such interpretation, construction or application renders said law, or laws, invalid, void and unconstitutional and an unwarranted and unlawful invasion and denial of the statutory and constitutional rights of this Respondent, and renders any such order, judgment, ruling, or holding void and of no force or effect.

51 Wherefore Respondent respectfully prays that this action, and the Complaint against Respondent herein, be dismissed, and that Respondent go hence.

Dated at Chicago, Illinois, this 14th day of January, 1941.

ORDER APPOINTING TRIAL EXAMINER AND FIXING TIME AND PLACE FOR TAKING TESTIMONY.

This matter being at issue and ready for the taking of testimony, and pursuant to authority vested in the Federal Trade Commission, under Acts of Congress (38 Stat. 717; 15 U. S. C. A., Section 41) and (49 Stat. 1526, U. S. C. A., Section 13, as amended).

It Is Ordered that Webster Ballinger, a trial examiner of this Commission, be and he hereby is designated and appointed to take testimony and receive evidence in this proceeding and to perform all other duties authorized by law;

It Is Further Ordered that the taking of testimony in this proceeding begin on Monday, March 10, 1941, at ten o'clock in the forenoon of that day (eastern standard time), in Room 850, Federal Building, Detroit, Michigan.

Upon completion of testimony for the Federal Trade Commission, the trial examiner is directed to proceed immediately to take testimony and evidence on behalf of the respondent. The trial examiner will then close the case and make his report upon the evidence.

By the Commission:

Otis B. Johnson,
Secretary.

53 BEFORE FEDERAL TRADE COMMISSION.

(Caption—4389).

MOTION TO AMEND COMPLAINT.

Now comes counsel for the Federal Trade Commission and moves the Commission that the complaint in the above entitled proceeding be amended to conform to the evidence heretofore adduced in the record of said proceeding, as follows:

1. By striking out all of Paragraph Three of said complaint, and inserting in place thereof the following paragraph:

Paragraph Three: Since June 19, 1936, in the course and conduct of its business above described, respondent has sold, and now sells, its gasoline to four Detroit dealers engaged in reselling said gasoline at retail, at prices substantially lower than the prices charged by respondent to its other Detroit retailer purchasers for gasoline of the same grade and quality. Said four dealers are: Citrin-Kolb Oil Company; Stikeman Oil Company, Inc.; Wayne Oil Company; and Ned's Auto Supply Company. Each of said dealers has, since said date, owned or operated in the Detroit area one or more gasoline stations where said gasoline so purchased has been resold (and, except as to Stikeman Oil Company, Inc., is now resold) at retail to consumers thereof, in competition with other retailers of gasoline purchasing the same from respondent or from other manufacturers. Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., and Wayne Oil Company, re- 54 spectively, are also engaged in the business of reselling, at wholesale, a large part of the gasoline so purchased by them from respondent, to other gasoline dealers in the Detroit area who are likewise competitively engaged in the resale thereof at retail. Said three named wholesalers have knowingly received the benefit of said lower prices. The prices at which respondent has sold its gasoline to the four dealers above named, from time to time since June 19, 1936, have ranged from one-half cent to one and three-quarters cents per gallon lower than the prices charged by it to other Detroit retailers for the same gasoline. Under normal merchandising conditions, during the greater part of that period, respondent's price to said four dealers for its "Red Crown" gasoline (its largest selling brand) has been one and one-half cents below its price therefor to other retailers.

2. By inserting in Paragraph Four of said complaint, after the comma in the third line of said paragraph, the words "and with their respective customers", so that said paragraph will read as follows:

Paragraph Four: The effect of the discrimination in price described in the preceding paragraph hereof has been and may be to injure, destroy and prevent competition with each of the four dealers named in said paragraph, and with their respective customers, in the resale of gasoline.

And counsel for the Commission further moves that the testimony heretofore taken in support of the allegations of the complaint be adopted and considered as testimony in support of the allegations of the complaint as amended upon this motion.

Respectfully submitted,

Cyrus B. Austin,
Trial Attorney.

Approved:
W. T. Kelley, *Chief Counsel.*

---

55 (Letterhead of Standard Oil Company [Indiana])
910 South Michigan Avenue,

Chicago, Ill., April 14, 1941.

Federal Trade Commission
Washington, D. C.

Attention: Mr. Cyrus B. Austin, Trial Attorney.

Dear Mr. Austin:

Re: Standard Oil Company, Docket No. 4389.

Supplementing our oral conversation of last week, relative to your letter of April 4th, 1941, enclosing copy of your motion to amend complaint, which I received April 7th just before leaving for Washington:

You expressed a wish that I write you in connection with the position which I expect to take in connection with your proposed amendment.

Upon your theory of the case, and in line with proof which you have adduced in support of that theory, it seems to me that you are technically entitled to make and have favorably regarded a motion to amend along the lines indicated by you, so I would not care to resist the motion on that score. Furthermore, there is no sufficient element of surprise in the amendment to require that I have additional time in proceeding with our case, and consequently would not care to ask for further time or create any delays by virtue of the amendment, if the Commission allows it.

I do wish to preserve the general objection which I have already made to the type of proof to which you are now seeking to conform the complaint. I rather have the impression from you and from Judge Ballinger that it is perhaps unnecessary for me to preserve my record by making any further objection to the amendment to the complaint, inasmuch as that objection repeatedly
56 appears to the evidence and Judge Ballinger has assured that it will be understood to be taken to all of the evidence so that Respondent's theory will be fully preserved.

However, I think that it is the proper procedure, in any event, to make the objection to the amendment, so that it will be a matter of record there, as well as to advise the Commission of the Respondent's position,—and I understood from you that that was one purpose you had in requesting that I write a letter.

Consequently, I wish to advise that the Respondent does object to the allowance of the motion to amend for all of the reasons set up from time to time in the various general and specific objections made by Respondent to the reception of evidence which goes to the disposition of gasoline in the hands of someone to whom Respondent may have sold gasoline and after it has been sold and has become the absolute property of the customer who purchased from Respondent. It is in connection with this subsequent disposition of the gasoline that your amendment goes exclusively, and I am sure you are well aware of the position which the Respondent has urged and will continue to urge throughout this litigation and as the Respondent has fully set up in what has been denominated Defense No. II in the Answer as well as elsewhere at various places in the answer.

I assume we may by stipulation enter on the record the fact that this objection is preserved for the Respondent and may be considered on the whole case by the Commission at the close of the case, if the Commission desires to allow the amendment.

So far as I am aware at this time, I do not think there is occasion for filing any additional answer, in event your amendment be allowed. I assume that you would be willing to stipulate that our original answer might be regarded as an answer to the amended complaint. I am not familiar with the mechanics of the procedure in that I do not know whether it is required that you file a formal amended complaint and that Respondent then file a formal answer thereto. If this is the settled procedure, of course we will conform. If it is a matter within the control of counsel, I would be perfectly willing to stipulate that you need
not formally file an amended complaint, and that our
57 answer would apply to your original complaint as
amended, in line with your motion, if the Commission allows it.

With best personal regards and good wishes, I am

Sincerely yours,

H. R. Hanley.

ORDER AMENDING COMPLAINT.

This matter coming on to be heard by the Commission upon the motion of counsel for the Commission for an order amending the complaint in the above-entitled proceeding to conform to the evidence adduced in the record of said proceeding and adopting the testimony heretofore taken in support of the allegations of said complaint as testimony in support of the complaint as so amended, and upon the testimony and other evidence heretofore taken in said proceeding before Webster Ballinger, an Examiner of the Commission duly designated by it, and upon hearing Cyrus B. Austin, Esq., counsel for the Commission, in support of said motion, and counsel for the respondent having notified the Commission, by letter of April 14, 1941, that he does not oppose said motion and that, if said motion is granted, the answer filed by respondent to the original complaint herein may be received and adopted as respondent's answer to the complaint as so amended, and the Commission having duly considered said motion and being now fully advised in the premises;

59 It Is Ordered that the complaint herein be and the same hereby is, amended:

1. By striking out all of Paragraph Three of said complaint, and inserting in place thereof the following paragraph:

Paragraph Three: Since June 19, 1936, in the course and conduct of its business above described, respondent

has sold, and now sells, its gasoline to four Detroit dealers engaged in reselling said gasoline at retail, at prices substantially lower than the prices charged by respondent to its other Detroit retailer purchasers for gasoline of the same grade and quality. Said four dealers are: Citrin-Kolb Oil Company; Stikeman Oil Company, Inc.; Wayne Oil Company; and Ned's Auto Supply Company. Each of said dealers has, since said date, owned or operated in the Detroit area one or more gasoline stations where said gasoline so purchased has been resold (and, except as to Stikeman Oil Company, Inc., is now resold) at retail to consumers thereof, in competition with other retailers of gasoline purchasing the same from respondent or from other manufacturers. Citrin-Kolb Oil Company, Stikeman Oil Company, Inc., and Wayne Oil Company, respectively, are also engaged in the business of reselling at wholesale, a large part of the gasoline so purchased by them from respondent, to other gasoline dealers in the Detroit area who are likewise competitively engaged in the resale thereof at retail. Said three named wholesalers have knowingly received the benefit of said lower prices. The prices at which respondent has sold its gasoline to the four dealers above named, from time to time since June 19, 1936, have ranged from one-half cent to one and three-quarters cents per gallon lower than the price charged by it to other Detroit retailers for the same gasoline. Under
normal merchandising conditions, during the greater
60 part of that period, respondent's price to said four
dealers for its "Red Crown" gasoline (its largest
selling brand) has been one and one-half cents below its price therefor to other retailers.

2. By inserting in Paragraph Four of said complaint, after the comma in the third line of said paragraph, the words "and with their respective customers", so that said paragraph will read as follows:

Paragraph Four: The effect of the discrimination in price described in the preceding paragraph hereof has been and may be to injure, destroy and prevent competition with each of the four dealers named in said Paragraph, and with their respective customers, in the resale of gasoline.

It Is Further Ordered that the testimony and other evidence hereinbefore taken before Webster Ballinger, an Examiner of the Commission duly designated by it, in support of the allegations of the complaint as originally drawn and in opposition thereto, be, and the same hereby is, adopted and considered as having been taken in support of the allegations of the complaint as hereby amended; and

It Is Further Ordered that the answer to the original complaint herein, heretofore filed by the respondent, be, and the same hereby is, received and adopted as respondent's answer to the complaint as hereby amended.

By the Commission.

Otis B. Johnson,
Secretary.

114 Before Federal Trade Commission.

* * (Caption—4389) * *

MOTION TO DISMISS COMPLAINT.

Comes now the Respondent, Standard Oil Company, an Indiana corporation, and moves the Honorable Federal Trade Commission to enter its order herein dismissing the complaint herein, and each and every count and paragraph thereof, on the following grounds, and for the following reasons, to-wit:

1. That, as appears from the record, the transactions
complained of in said complaint constitute trans-
115 actions in intrastate commerce and are, for that
reason, not within the jurisdiction of this Commission,
as conferred by the so-called Clayton Act (38 Stat. 730; 15 U. S. C. A. 12 to 27, inclusive) as amended by the so-called Robinson-Patman Act (49 Stat. 1526-8; 15 U. S. C. A. 13, 13a and 13b), and the so-called Federal Trade Commission Act (38 Stat. 717; 15 U. S. C. A. 41 to 58, inclusive; 52 Stat. 111 to 117, inclusive).

2. That the complaint herein, and the record made thereunder, fail to state or establish that, as a matter of law, Respondent's trade and marketing practices, as herein complained of, are contrary to the provisions of any of the Federal Statutes referred to in Paragraph 1 hereof, or otherwise, or at all.

3. That the trade and marketing practices against
which the complaint herein was issued, as appears
116 from the record, are widespread throughout the entire
petroleum industry, and, in fact, throughout all in-
dustry; wherefore, the said complaint should be dismissed

and a Trade Practice Conference instituted in lieu of this proceeding.

4. That the so-called "Emergency Price Control Act of 1942", approved by the President on January 30, 1942, and known and designated as Public Act 421, Seventy-Seventh Congress, Chapter 26 (Second Session) in Section 205 (subparagraph (d)) provides, inter alia, as follows:

"No person shall be held liable for damages or penalties in any Federal, State or Territorial Court on any grounds for or in respect of anything done or omitted to be done
in good faith pursuant to any provision of this Act, or
117 any regulation, order, price schedule, "requirement
or agreement thereunder, or under any price schedule of the Administrator of the Office of Price Administration, or of the Administration of the Office of Price Administration and Civilian Supply, notwithstanding that subsequently such provision, regulation, order, price schedule, requirement or agreement may be modified, rescinded or determined to be invalid * * *."

That, under and by virtue of said statute, which in operation and effect has superseded the statutes referred to in Paragraph 1 hereof, the prices at which Respondent may sell gasoline to Ned's Auto Supply Company, Wayne Oil Company, Stikeman Oil Company and Citrin-Kelb Oil Company in Detroit, have become fixed and unalterable
except under and by virtue of said Emergency Price
118 Control Act of 1942; and that any voluntary change
in prices upon the sale of gasoline, except a further reduction thereof, to said customers on the part of Respondent, or any change therein that might ensue as the result of any cease and desist order that might be issued by the Honorable Federal Trade Commission in this proceeding, would be in derogation of and a violation of said Emergency Price Control Act of 1942 and of the orders of Office of Price Administration promulgated thereunder; wherefore, by operation of law, this proceeding is without authority of law, has become moot and cannot lawfully be further maintained, and no orders herein can be issued nor enforced except an order dismissing the complaint.

(This is a renewal of Respondent's motion as interposed before the Trial Examiner on February 16, 1942 (Record, pp. 4792-4800, inclusive), and which the Trial Examiner
denied on the ground that the motion was one ad-
119 dressed to the sound discretion of the Commission and
one over which the Trial Examiner had no jurisdic-

tion nor power to rule upon, other than to deny. (Record, p. 4800.))

5. That, as appears from the record, this proceeding is not prosecuted in the public interest but is in furtherance of the interest of a so-called pressure group, which instigated the same, whose avowed purpose is to stifle, injure, prevent and destroy, instead of to foster and promote competition, and to increase instead of lower the selling price of gasoline to the public.

6. That, as appears from the record, said complaint should be dismissed as to any and all allegations made therein with reference to Respondent's trade practices with relation to Stikeman Oil Company, for the reason that no testimony was adduced, nor attempted to be adduced, to establish, or even tending to establish, that
120 the transactions of Respondent with Stikeman Oil
Company constitute, or ever constituted, a violation of any of the statutes referred to in Paragraph 1 hereof.

7. That, as appears from the record, said complaint should be dismissed as to any and all allegations made therein with reference to Respondent's trade practices with relation to Wayne Oil Company, for the reason that no testimony was adduced, nor attempted to be adduced, to establish, or even tending to establish, that the transactions of Respondent with Wayne Oil Company constitute, or ever constituted, a violation of any of the statutes referred to in Paragraph 1 hereof.

8. That, as appears from the record, upon the undisputed evidence, the lower prices charged by Respondent upon the sale of gasoline to Stikeman Oil Company, Wayne Oil Company, Ned's Auto Supply Company, and Citrin-Kolb Oil Company, in carload quantities, was,
121 at all times, done in good faith to meet an equally
low or lower price of a competitor.

9. That, as appears from the record, the lower prices now and at any time charged by Respondent upon the sale and delivery of gasoline to Stikeman Oil Company, Wayne Oil Company, Ned's Auto Supply Company, and Citrin-Kolb Oil Company in carload quantities, involved, at all times, differentials in prices which make only due allowance for differences in the cost of manufacture, sale and delivery resulting from the differing method and quantity in which said gasoline was and is to such purchasers sold and delivered.

10. That, as appears from the record, the effect of the differential or discrimination in price charged upon the

sale and delivery of gasoline by Respondent, as between so-called tank wagon customers and so-called tank car or truck train customers, was at all times such as not to lessen competition, substantially or at all, nor to tend to create a monopoly in the gasoline business, nor to
122 injure or destroy or prevent competition with any person, firm or corporation whatsoever, nor with customers of either such person or persons, firm or firms, corporation or corporations, or of Respondent or anyone.

11. That, as appears from the record, the testimony adduced by the Attorney for the Commission wholly failed to establish a prima facie case against Respondent; and, in particular, that such testimony did not overcome nor in any manner affect the assertion and existence of right nor the legal presumption of right in Respondent to select its own customers in bona fide transactions and not in restraint of trade, and its right to functionally classify its own customers, and to grant price differentials based upon such functional differences and classifications.

The above motion is based upon the complaint and other pleadings, records and files herein, and upon the official
123 record of proceedings and testimony, and upon the exhibits offered for and on behalf of both the Commission and Respondent, and received in evidence.

The above motion is made upon the ground that, as a matter of law, based upon such complaint, pleadings, records, files, records of proceedings, testimony and exhibits received in evidence, Respondent is entitled to the entry of an order by the Commission dismissing said complaint.

Permission is respectfully requested by Respondent for oral argument and presentation of the foregoing motion.

Respectfully submitted,

H. R. Hanley

125 BEFORE FEDERAL TRADE COMMISSION.

(Caption—4389)

MOTION TO FEDERAL TRADE COMMISSION TO STRIKE PORTIONS OF THE RECORD.

Comes now the Respondent, Standard Oil Company, an Indiana corporation, and moves the Honorable Federal Trade Commission to strike from the record in this cause the following portions thereof, to-wit:

1. The testimony of the Commission's witness, Herbert F. Taggart (Record, pp. 992-1290, inclusive); also Commission's Exhibits Nos. 75-A, 75-B, 75-C, and 76
126 offered and received in evidence in connection with the testimony of said witness.

This motion is made on all the grounds, and for all the reasons, as stated on the record. (Record, pp. 1016-1021 and 1297-1308, inclusive). (Objection Record, pp. 1016-1021 inclusive). The Trial Examiner denied the motion of Respondent to strike the Taggart testimony and Exhibits No. 75-A, 75-B, 75-C and 76. (Record, p. 1317).

2. The testimony of the Commission's witness, Charles Evan Feinberg, as the same appears at pp. 5202 to 5275, inclusive, of the Record, and also Exhibit 112-A, B, C and D offered and received in evidence in connection with said testimony.

This motion is made on all the grounds, and for all the reasons, as stated on the record at the pages thereof above referred to.

3. The offer of proof made by the Attorney for the Commission at pp. 985 and 986 of the Record.

127 In this offer, the attorney for the Commission stated, in effect, that he had talked to certain wholly unidentified persons who might be called as witnesses and who, if so called, would testify substantially the same as certain witnesses who had already testified.

The Trial Examiner denied a motion interposed by Respondent to strike said offer of proof from the record. (Record, p. 988).

4. The testimony of the Commission's witness, Irving B. Dworman, from p. 5343 to 5345, inclusive, of the record.

Objections were interposed to this testimony at the time it was offered in evidence (Record, p. 5343) (Record, p. 5435), and the objections were overruled by the Trial Examiner. This motion is made on, but not limited to, the same grounds as were stated in the objections.

5. The following statements of the Trial Examiner, wherein it was sought to comment and pass upon the 128 sufficiency of Respondent's testimony:

(a) Statements of the Trial Examiner as to competitive offer made to Citrin-Kolb Oil Company by Hickok Oil Company in 1930. (Record, pp. 2093-2102, inclusive).

(b) Statements of the Trial Examiner in referring to a competitive offer made to Citrin-Kolb Oil Company by Texas Company that the same was "nothing but a proposal". (Record, p. 2243). See also pp. 2162-2163 of the Record relative to references by Examiner to offers being "merely tentative".

The above motion is based upon the records and files herein, and upon the official record of proceedings and testimony; and is made upon the general ground (in addition to the specific grounds above stated) that the portions of the record hereby sought to be stricken are irrelevant, incompetent and immaterial, and should not be considered by the Commission as a part of the evidence.

129 Permission is respectfully requested by Respondent for oral argument and presentation of the foregoing motion.

Respectfully submitted,

131 BEFORE FEDERAL TRADE COMMISSION.

* * (Caption—4389) * *

MOTION OF RESPONDENT STANDARD OIL COMPANY (INDIANA) TO FEDERAL TRADE COMMISSION TO AMPLIFY RECORD.

Comes now the Respondent, Standard Oil Company, an Indiana corporation, and moves the Honorable Federal Trade Commission to enter its order amplifying the record in this cause, by including therein all testimony, oral and documentary, which was offered in evidence by Respondent, and which was excluded at the several hearings of this cause by Hon. Webster Ballinger, Trial Examiner, and, in particular, but not limited to, the following described
132 testimony and exhibits, to-wit:

1. The testimony of John C. Marshall, insofar as the same was excluded by the Trial Examiner, as the same appears in the Record at pages 1712 to 1840, inclusive, and excluded exhibit offered in connection with the testimony of the said John C. Marshall, as follows:

A. Exhibit 23 for Identification (Record, pp. 1783-1788 inclusive). (Copy attached)

2. The testimony of Elmer E. Ledbetter, bearing upon distribution costs of Wayne Oil Company in the sale of gasoline, insofar as the same was stricken and excluded from the Record by the Trial Examiner, as the same appears in the Record, at pages 1570 to 1616, inclusive, and pages 1841 to 2058, inclusive, and particularly as referred to in the motion of Cyrus B. Austin, Attorney for the Commission to strike the same from the Record, as appears at pages 2038 to 2050 of the Record.

3. A. The testimony of Elmer E. Ledbetter, bear-
133 ing upon the claim of competitive offers made by competitors of Respondent to Wayne Oil Company, insofar as the same was stricken and excluded from the Record by the Trial Examiner, as the same appears in the Record at pages 1570 to 1616, inclusive, and pages 1841 to 2058, inclusive, and particularly as referred to in the motion to strike the same from the Record (which motion was interposed by the Trial Examiner sua sponte), as appears at pages 2050 to 2058 of the Record.

B. Excluded testimony of Jacob A. Citrin, relating to any competitive offer received by Citrin-Kolb Oil Company from Hickok Oil Company, of Toledo, Ohio (Record, pp. 2193-2207). The testimony involved in the Trial Examiner's order of exclusion is at pages 2088 to 2102, inclusive, of the Record.

This testimony, it is respectfully submitted, was competent as evidence of a bona fide competitive offer received by Citrin-Kolb Oil Company from a competitor of Respondent, and, therefore, should not have been stricken from the Record by the Trial Examiner.

134 4. A. Excluded Respondent's Exhibit 102 for Identification (copy attached), the offer of which in evidence was rejected by the Trial Examiner. (Record, p. 4823; Record p. 5694).

B. Stricken testimony of B. S. Kott (Record, pp. 4801-4845); Elmer E. Ledbetter (Record, pp. 5398-5420); Max Biber (Record, pp. 5420-5429), and Page 34 of Respondent's Exhibit 100, commencing with the paragraph reading: "The Respondent's supplying company secures a reciprocal advertising advantage from jobbers, et cetera"; also the remainder of Page 34, and all of Page 35, all of Page 36, down to and including the first paragraph thereof, ending on that page, and all of Page 37, (copy attached); said pages as referred to above being all parts of Respondent's Exhibit 100.

(See the following parts of the record for proceedings relating to the striking of said testimony and documentary proof. (Record, pp. 5703, 5724, 5725, and 5726 to 5742, inclusive.)

135 C. Excluded Respondent's Exhibit 104-A, B, C, D, E, F, G, H for Identification (copy attached), being an itemized tabulation of advertising costs of Wayne Oil Company for the calendar year 1940, offered in evidence in connection with the testimony of Elmer E. Ledbetter (Record, pp. 5398 to 5420, inclusive), and excluded by the Trial Examiner. (Record, p. 5420). (Record, p. 5695).

D. Excluded Respondent's Exhibits 105-A, 105-B and 105-C, for Identification (copies attached), being an itemized tabulation of advertising costs of Citrin-Kolb Oil Company for the calendar year 1940, offered in evidence in connection with the testimony of Max Biber (Record, pp. 5420 to 5429, inclusive), and excluded by the Trial Examiner. (Record, p. 5428). (Record, p. 5696).

E. Excluded Respondent's Exhibits 106-A, 106-B, 107-A, 107-B and 108 for Identification (copies attached), being offers of proof as to itemized advertising costs of Ned's
136 Auto Supply Company, Wayne Oil Company and Citrin-Kolb Oil Company for the calendar year 1940, sought to be included in the Record both as oral offers of proof and as exhibits and rejected by the Trial Examiner both as exhibits and as offers of proof. (Record, p. 5702).

5. A. Respondent's Exhibits Nos. 18-A to 18-Z—51, inclusive, for Identification.

These exhibits consist of photographs or photostats, cards, advertisements, letters; literature and purchase receipts showing price signs and sale prices of gasoline at gasoline filling stations in Detroit in and about the vicinity of the five (5) Citrin-Kolb Oil Company service stations, which were referred to in the testimony of Commission's witnesses, with reference to the complaints of nearby gasoline filling station operators who testified as to the alleged price-cutting practices of these Citrin-Kolb stations,—principally in 1937 and 1938. (Record, p. 1431-A).

137 The locations of the five (5) Citrin-Kolb stations above mentioned are as follows:

(a) East Jefferson at Nottingham
(b) Dexter at West Chicago Boulevard
(c) John R at Euclid
(d) Linwood Avenue at Detroit Terminal Railroad
(e). Linwood Avenue at Pingree (Record, p. 1431-A)

The exhibits in question, consisting of the material above referred to, present a pictorial survey of the competitive situation surrounding these five (5) Citrin-Kolb service stations to the date of the examination of the witness, Max Biber. (Record, p. 1432.)

The Trial Examiner ruled that no competitive situations might be shown, to rebut the claim that the trade practices of Respondent had the effect of injuring, destroying or preventing competition, unless the evidence related to competitive situations or acts committed after a reasonable time prior to June 19, 1936 (being the effective
138 date of the Robinson-Patman Act). (Record, p. 2798.)

The Trial Examiner, while stating that he would not care to lay down any hard and fast rule as to what constitutes such "reasonable time", stated that a year before June 19, 1936 might be so considered. (Record, p. 2799.)

The photographs and photostats of gasoline filling stations included in this exhibit,—at least most of them,—contained typewritten notations and computations showing to what extent the station portrayed by the individual exhibits cut their price on gasoline below the then prevailing market price. (Record, p. 2808.) The meaning of the words "prevailing market price" appearing on these exhibits was explained by the witness, Max Biber. (Record, p. 2808.) Documentary evidence as to what actually was the prevailing market price on the various grades of gasoline at all times covered by the exhibits was introduced and received in connection with the examination of the witness, Paul A. Raupagh. (Exhibit 60-A, B, C, D.)

139 The attorney for the Commission objected to the reception of these exhibits (18-A to 18-Z-51) in evidence unless the typewritten notations and computations appearing thereon were, in all cases, deleted. This objection was sustained by the Trial Examiner, (Record, pp. 2838-2845) (Record, p. 2847), with the explanation, however, that the matter of deletion of the typewritten matter on the exhibits might be presented to the Commission for review of the Trial Examiner's ruling. (Record, p. 2845.) Counsel for Respondent expressly refused to agree to such deletions. (Record, p. 2846.) (Record, p. 2849.)

Later in the proceedings, during the testimony of Max Biber, a motion was made by the Attorney for the Commission to strike from Respondent's Exhibits 18-A to 18-Z-51, inclusive, all notations appearing thereon regarding "prevailing prices" of gasoline. (Record, p. 3061.) This motion the Trial Examiner granted in its entirety (Record, p. 3070), but, later, restricted the ruling so as not to
140 include the years 1940 and 1941. (Record, p. 3071.)

B. Testimony of Respondent's witness, Max Biber, and offers of proof made in connection therewith, excluded, stricken and rejected by the Trial Examiner.

This refers to the testimony and offers of proof appearing in the record, as follows:

Record, pp. 2881, 2882-2885, 2885-2891, 2891-2895, 2895-2896, 2896-2897, 2897-2899, 2900.

This testimony, and offers of proof made in connection therewith, referred to the competitive situations surrounding the five (5) Citrin-Kolb service stations referred to in Paragraph (8), supra, as to which stations there was testimony on the part of witnesses produced by the Commission relative to alleged price-cutting practices, principally in the years 1937 and 1938.

6. A. Excluded testimony of the witness, Charles Gershenson, as to trade practices of Ned's Auto Supply Company in the purchase in carload lots and sale of merchandise such as refrigerators, radios, washing machines, electrical stoves, bycycles, tires and the
141 existing price differentials and savings effected in quantity purchasing of such merchandise direct from the manufacturer; also rejected offer of proof made relative to such trade practices. (Record, pp. 3126 to 3130, inclusive.)

(Inasmuch as the above involves questions propounded to the witness, but not permitted to be answered, by reason of the Trial Examiner's ruling sustaining an objection thereto, it is requested that the Commission provide a means whereby the witness' answer may be taken and included in the record.)

B. Excluded testimony of the Respondent's witness, Charles Gershenson, as to the relation of the retail selling price of gasoline of Ned's Auto Supply Company, compared to the buying price; also as to the reasons for price concessions made by Ned's Auto Supply Company to the public on retail sales of gasoline. (Record, pp. 3152 to 3156, inclusive.)

7. Testimony of Respondent's witness, Jacob A. Citrin, excluded by the Trial Examiner, and appearing in
142 the Record at pp. 2178 to 2180, inclusive.

(Inasmuch as this involves questions propounded to the witness but not permitted to be answered, by reason of the Trial Examiner's ruling sustaining an objection thereto, it is requested that the Commission provide a means whereby the witness' answer may be taken and included in the record.)

8. Excluded exhibits offered in connection with the testimony of Paul A. Raupagh, as follows:

(a) Respondent's Exhibit # 77, A, B & C for Identification

(b) Respondent's Exhibit # 78, A, B & C for Identification

(c) Respondent's Exhibit # 79, A, B & C for Identification

(d) Respondent's Exhibit # 80, A, B & C for Identification

(Copies attached.)

The above mentioned exhibits are referred to in the Record at Pages 3539 to 3542, inclusive, and were rejected as exhibits, as shown on Page 3542 of the Record.

143 (e) Respondent's Exhibit # 78 D for Identification
(f) Respondent's Exhibit # 78 E for Identification
(g) Respondent's Exhibit # 79 D for Identification
(h) Respondent's Exhibit # 80 D for Identification
(Copies attached)

The above mentioned exhibits are referred to in the Record at pages 3622 and 3623 thereof, and were rejected as exhibits, as shown on page 3623.

The purpose of the offer by Respondent of these rejected exhibits in evidence was to show in evidence that this case is not prosecuted in the public interest, nor for the public benefit, and does not result therein. (See Statement accompanying offer of these exhibits in evidence at page 3541 of Record.) The rejected exhibits consist of copies of Retail Gasoline Dealers News, dated September 1940 (Exhibit 77); January 1941 (Exhibit 78); March 1941 (Exhibit 79); and April 1941 (Exhibit 80). This 144 publication is the official organ of Michigan Retail Gasoline Dealers Association. (Record, p. 3636.)

9. Excluded exhibits offered as follows:

(a) Respondent's Exhibits Nos. 81, 82 and 83 for Identification (Record, p. 3669)

(b) Respondent's Exhibits Nos. 84, 85 and 86 for Identification (Record, p. 3674)

(c) Respondent's Exhibits Nos. 87 and 88 for Identification (Record, p. 3677)

(d) Respondent's Exhibits Nos. 89, 90 and 91 for Identification (Record, p. 3678)

The purpose of the offer by Respondent of these rejected exhibits was to show in evidence:

(1) That in prior civil cases and criminal prosecutions sponsored by Michigan Retail Gasoline Dealers Association, against this Respondent, based on alleged violations by Respondent of State anti-discrimination statutes, in its dealings with Ned's Auto Supply Company, Merchants Supply Company, and Citrin-Kolb Oil Company, Re-
145 spondent has, in each of such cases, prevailed, and that such dealings, being the same as are here challenged, have been held not to be in violation of such statutes and particularly not in violation of Act 282, Public Acts of 1937, being the so-called Michigan Fair Trade Act.

(2) That Act 282, Public Acts of the State of Michigan for 1937, authorizing the making of an "Established Cost Survey" in connection with the operation of gasoline filling stations, and in pursuance of which Exhibits 75-A, 75-B, 75-C and 76 were prepared by Commission's witness, Herbert F. Taggart, and introduced and received in evidence herein, is unconstitutional and void, and that the "Established Cost Survey" authorized thereby is of no probative force nor evidential value.

(3) That the claims of Michigan Retail Gasoline Dealers Association, as set forth in its so-called "Four Point Program" in Respondent's Exhibits No. 77 A, B, C, —78 A, B, C, D, E, —79 A, B, C, D, —and 80 A, B, C and D for Identification, and particularly with reference to 146 the alleged outcome of such proceedings in the Michigan State courts, civil and criminal, is not justified by Exhibits Nos. 81 to 91, inclusive.

10. Excluded exhibit, being Commission's Exhibit No. 65 for Identification, being a printed copy of Act No. 282, Public Acts of 1937 of the State of Michigan.

This exhibit, originally offered in evidence by the attorney for the Commission and excluded on objection of Respondent, was (Record, p. 3683) offered in evidence by Respondent, and, without objection by the attorney for the Commission, the offer was rejected by the Trial Examiner. (Record, p. 3684.)

The purpose of the offer of Commission's Exhibit No. 65 for Identification by Respondent was to show in evidence the statutory basis for Exhibits 81 to 91 for Identification, inclusive.

The above motion is based upon the complaint and all other pleadings, records and files herein, and upon 147 the official record of proceedings and testimony and upon the exhibits offered in evidence for and on behalf of the Respondent.

The above motion is made upon the ground that Respondent is entitled to have the record herein amplified to include all the oral and documentary testimony referred to herein and which was excluded, stricken, rejected or otherwise eliminated from the record by the Trial Examiner, in order that Respondent may fairly and adequately present its defense on the merits.

Permission is respectfully requested by Respondent for oral argument and presentation of the foregoing motion.

Respectfully submitted,

(Letterhead Ned's Auto Supply Co., Detroit, Michigan)

October 30, 1941.

Mr. Paul Raupagh
c/o Standard Oil Company
1011 Fourth Street
Detroit, Michigan

Dear Sir:

Following is an analysis of our advertising expenditures for the calendar year 1940, showing the amount spent in the metropolitan Detroit market:

Newspaper advertising	$66,877.69
Radio	16,280.00
Outdoor Advertising	5,580.00
Magazines, Engravings, Art Work, Telephone Directory	9,208.00
Newspapers	15,903.59
Donations	1,269.00
Theatre and Club Program Advertising	1,401.25
Outdoor Sign Maintenance	617.73
Sales Promotion Material	1,263.31
Total	$118,400.57

An analysis of our sales for the year 1940, shows the following after deducting all Federal and State tax items from gasoline and oil sales:

Store Sales:	Amount	% of Total
Tires and Tubes	$612,333.04	21.1
Automotive Accessories	553,424.22	19.1
Small Home Accessories	370,140.94	12.7
Home Appliances	444,523.00	15.3
Service Station Sales:		
Gas Island	558,649.49	19.3
Lubrication	140,840.24	4.9
Brake Work	176,338.46	6.0
Other Service Items	45,669.33	1.6
Total	$2,901,918.72	100.0%

Total payments of Michigan State Sales Tax for 1940, amounted to $75,756.91, and were included in the above sales figures.

We assure you of our cooperation should you require any additional information.

Very truly yours,
Ned's Auto Supply Co.,
B. S. Kott,
Office Manager.

From Resp. Exh. #100 -

Reciprocal Advertising Benefits

In the foregoing analysis of advertising costs directed to determining the charge against direct shipment business all consumer advertising has remained wholly as a charge against tank wagon and other method business. No part of this should be considered as a charge against jobber or other direct shipment business The respondent contends that this is the only logical position that can be taken on such charges for the following reasons:

The respondent supplying company secures a reciprocal advertising advantage from jobber distribution which it does not and cannot secure from tank wagon resellers or outlets During 19[illegible]0 the four Detroit jobbers spent the following quantities on advertising.

	Wayne Oil Co	Cit-in-Ko[illegible]b Oil Co	[illegible] Auto Supply	St[illegible] Oil Co	Grand T[illegible]
Direct Mail	4[illegible]	[illegible]			$ [illegible]
Newspapers	932.35	[illegible]	7,[illegible]		[illegible]
Posters	8.24	1,290.00	[illegible]		[illegible]
Radio	90.00	-	6,[illegible]0 00	-	[illegible]
Signs	408.90	359 63	61[illegible] 75	-	[illegible]
Hand Bills	521 65	43 25	15 905 59	-	[illegible]
Novelties	903 84	325.6[illegible]	-	-	[illegible]
Donations etc	96 02	547 50	[illegible] 269 00	-	[illegible]
Paint	459 90	-	-	-	[illegible]
Miscellaneous	552 84	-	[illegible] 263 5[illegible]	-	[illegible]
Grand Total	$[illegible] 19	$3 961 39	$[illegible] 8,400 5[illegible]		$[illegible]
Gasoline					
% Realization ?	[illegible]0 %	8[illegible].06%	19 3%	-	
Cost	$[illegible],096.45	$3,2[illegible].10	$ 2[illegible],85[illegible] 3[illegible]	-	$ [illegible]
Gallons	2,[illegible]40,671	5,2[illegible],996	[illegible],310 465	-	[illegible]
¢ Gal	13¢	06¢	53¢	-	[illegible]

(Note: Portion enclosed by black lines is portion stricken -)

(Page 56)

From Resp. Exh. #90

The grand total advertising expenditure for each jobber was extended by the proportion of gasoline realization, excluding tax to total sales. This resulted in actual costing of advertising expenditure to gasoline of $29,15[illegible].86 which, when divided by total gasoline volume, results in a per gallon expenditure of .2[illegible]¢.

During this same period total advertising expenditures in the Detroit field tank wagon reseller channel by the Standard Oil Company, including sub accounts:

005 - Salaries - Advertising

033 - Traveling Expense - Advertising

048 - Operation and Maintenance of Vehicles - Advertising

075 - Advertising [illegible] Costs

103 - Depreciation Expense - Vehicles - Advertising

amounted to $131, [illegible] .19¢ per gallon. The per gallon advertising expenditures on the part of the jobbers, therefore are almost identical with advertising expenditures of the independent company, and where it is obvious that jobbers receive a benefit from our expenditures, we in turn receive a compensating benefit from expenditures by jobbers. This same reciprocal relationship does not exist between the supplying company and the tank wagon reseller outlet.

What advertising expenditure would be incurred in Detroit if it were not for the benefit of this reciprocal advertising on the part of jobbers, of course, is a matter that would have to be

(151 - p.57)

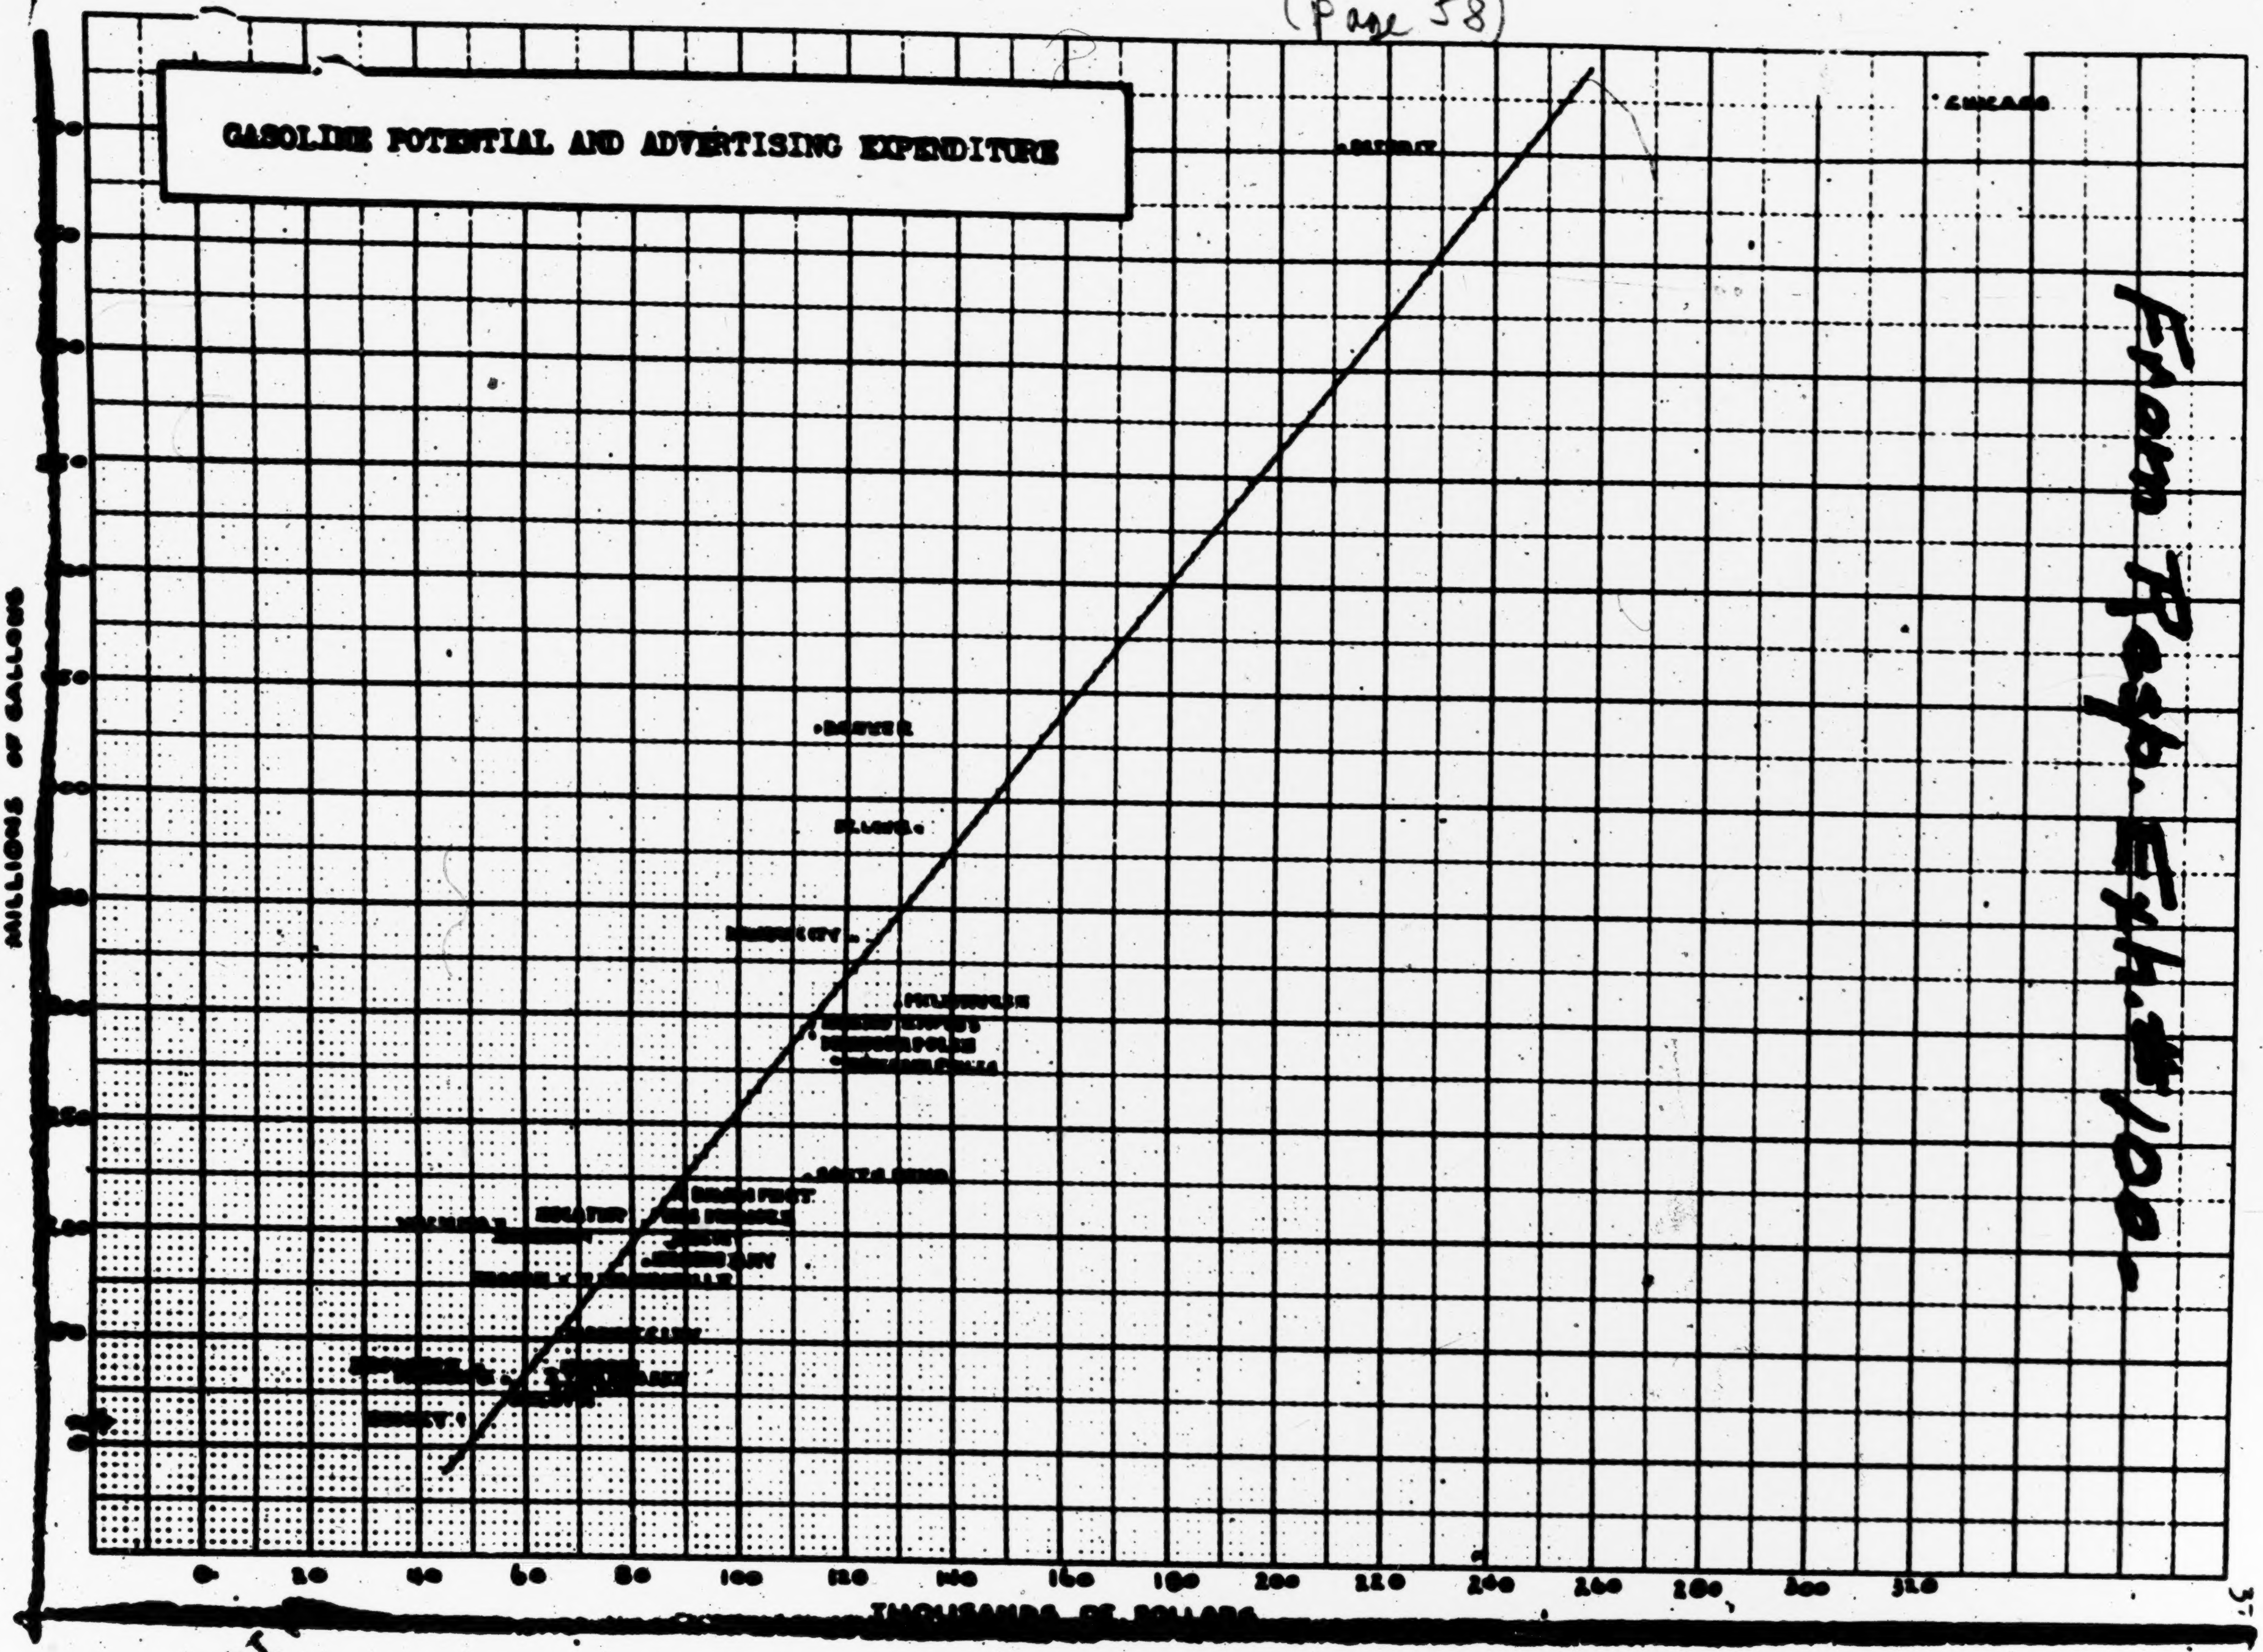
From Resp. Exh. #100

decided by management That an increase would be necessary is quite likely as is indicated by the following chart showing the relationship between advertising expenditures during 1940 and the potential market in each of our various sales fields Notice that according to the potential Detroit and Denver are the fields most under expended of our entire group of sales divisions Because of jobber expenditure and representation in these two fields it is unnecessary for the Standard Oil Company to make the advertising expenditure which otherwise would be required in this market

The Standard Oil Company does not make any advertising allowance to its jobbers Many other large suppliers recognize the advertising value of such distributors by defraying a part of the distributor s advertising expenditures This is not done by the Standard Oil Company although an advertising value is recognized

The amounts of money spent by jobbers advertising is not a matter of contract as the Standard Oil Company exercises no influence over such expenditures Such expenditures are incurred in the daily conduct of their business

(page 58)



From Resp. Exh. #100.

RESPONDENT'S EXHIBIT 106A.

No. 1.

Offer of Proof (Ned's).

Resp. Exhibit 102 having been offered in evidence and having been excluded by the examiner upon objection interposed by the attorney for the Commission, respondent, therefore, now offers to prove as follows:

(1) That the amount expended by Ned's Auto Supply Company for all classes of advertising in the calendar year 1940 was as follows:

(a) Newspaper advertising	$66,877.69
(b) Radio Advertising	16,280.00
(c) Outdoor advertising	5,580.00
(d) Magazines, Engraving, art work, and telephone directory	9,208.00
(e) Newspaper purchased and distributed to customers	15,903.59
(f) Donations	1,269.00
(g) Theatre and Club Program advertising	1,401.25
(h) Outdoor sign maintenance	617.73
(i) Sales Promotion Material	1,263.31
Total	$118,400.57

(2) That an analysis of sales of Ned's Auto Supply Company for the calendar year 1940, after deducting all Federal and State Taxes paid on gasoline and oil sales, shows as follows:

	Amount	Percentage of Total
(a) Stores Sales		
Tires & Tubes	$612,333.04	21.1%
Automobile Accessories	553,424.22	19.1%
Small home accessories	370,140.94	12.7%
Home Appliances	444,523.00	15.3%
(b) Service Station Sales		
Gas Island Sales	558,649.49	19.3%
Lubrication Sales	140,840.24	4.9%
Brake Work	176,338.46	6.0%
Miscellaneous Service	45,669.33	1.6%
	$2,901,918.72	100%

(3) That total payments of Michigan State Sales Tax for 1940 amounted to $75,756.91 and are included on the above sales figures.

166 RESPONDENT'S EXHIBIT 106B.

(4) That the items described as "Donations" represent and includes such expenditures as contributions to civic enterprises and is and was in 1940 regarded by Ned's Auto Supply Company as an advertising expense.

(5) That the item described as "newspapers purchased and distributed to customers" and amounting to $15,903.59 refers to the amount expended by Ned's Auto Supply Company in the calendar year 1940 for Detroit daily newspapers purchased from the newspaper publishers and presented to each customer of Ned's Auto Supply Company who purchased gasoline and other motor fuel on the gas island of the several service stations of Ned's Auto Supply Company at the time of each individual purchase of such gasoline and other motor fuel, during said calendar year 1940; which item of $15,903.59 was expended primarily and almost exclusively in connection with the sale of Standard Oil Co. gasoline, and which item is and was in 1940 regarded and allocated by Ned's Auto Supply Company as an advertising expense.

(6) That the amount of advertising expense of Ned's Auto Supply Co. allocated to sales of gasoline and other motor fuel is 19.3% of $118,400.57 or a total of $22,851.31 for the calendar year 1940.

(7) That the total gallonage of gasoline and other motor fuel sold by Ned's Auto Supply Company in 1940 was 4,310,465 gallons.

(8) That the advertising expense of Ned's Auto Supply Co. in the merchandising of gasoline and other motor fuel sold in the calendar year 1940 was 53¢ per gallon.

167

RESPONDENT'S EXHIBIT 107A.

No. 2.

Offer of Proof

Respondent's Exhibit 104A, 104B, 104C, 104D, 104E, 104F, 104G and 104H having been offered in evidence and having been excluded by the Examiner upon objection interposed by the Attorney for the Commission, respondent, therefore, now offers to prove as follows:

(1) That the amount expended by Wayne Oil Company for all classes of advertising in the calendar year 1940 was as follows:

(1)	Direct Mail Advertising	$443.52
(2)	Newspaper Advertising	932.38
(3)	Posters	8.24
(4)	Radio	90.00
(5)	Signs	408.80
(6)	Hand Bills	521.65
(7)	Novelty Advertising	903.84
(8)	Donations, etc.	96.02
(9)	Paint for Signs, etc.	459.90
(10)	Miscellaneous, including printing for Advertising and Advertising dealer Stations	552.84
	Total	$4,417.19

(2) That an analysis of sales of Wayne Oil Company for the calendar year 1940, after deducting all Federal and State Taxes paid on gasoline and oil sales, shows that the percentage of gasoline sales realization to total sales realization was 70.1%.

(3) That the item described as "Donations, etc." represents and includes such expenditures as contributions to civic enterprises and is and was in 1940 regarded and allocated by Wayne Oil Company as an advertising expense.

168 RESPONDENT'S EXHIBIT 107B.

(4) That the amount of advertising expense of Wayne Oil Company allocated to gasoline sales is 70.1% of $4417.19, or a total of $3,096.45, representing gasoline advertising expense for the calendar year 1940.

(5) That the total gallonage sold by Wayne Oil Company in 1940 was 2,340,671 gallons.

(6) That the advertising expense of Wayne Oil Company in the Merchandising of gasoline sold in the calendar year 1940 was .13¢ per gallon.

169 RESPONDENT'S EXHIBIT 108.

No. 3.

Offer of Proof (Citrin-Kolb).

Respondent's Exhibit 105A, 105B and 105C having been offered in evidence and having been excluded by the Examiner upon objection interposed by the attorney for the Commission. Respondent, therefore, now offers to prove as follows:

(1) What the amount expended by Citrin-Kolb Oil Company for all classes of advertising in the calendar year 1940 was as follows:

(a) Newspapers and Magazines........	$ 251.40
(b) Donations and Memberships.......	547.50
(c) Billboard Advertising	1,290.00
(d) Advertising Printing	43.25
(e) Advertising Novelties	325.61
(f) Sign Maintenance and Painting Signs	664.63
(g) Sign depreciation	610.00
(h) Telephone Directory Advertising...	144.00
(i) Advertising Sign Insurance.......	85.00
	$3,961.39

(2) That an analysis of sales of Citrin-Kolb Oil Company for the calendar year 1940, after deducting all Federal and State taxes paid on Gasoline and Oil Sales, shows

that the percentage of Gasoline sales realization to total sales realization was 81.06%.

(3) That the item described as "Donations and Memberships" represents and includes such expenditures as contributions to civic enterprises and is and was in 1940 regarded and allocated by Citrin-Kolb Oil Company as an advertising expense.

(4) What the amount of advertising expense of Citrin Kolb Oil Company allocated to gasoline sales is 81.06% of $3961.39 or a total of $3211.10, representing gasoline advertising expense, for the calendar year 1940.

(5) That the total gallonage of gasolines sold by Citrin-Kolb Oil Company in 1940 was 5,221,996 gallons.

(6) That the advertising expense of Citrin-Kolb Oil Company in the merchandising of gasoline sold in the calendar year 1940 was .06¢ per gallon.

*Another Good Reason Dealers Prefer
to Deal with Socony-Vacuum:*

You Have a Firm Foundation

FOR A SOUND, LASTING BUSINESS

There's a strong business backlog behind you when you take on a Socony-Vacuum dealership. Your trademark—the famous Sign of the Flying Red Horse—is a well-known "stop sign" with millions of discriminating motorists. Your product—Mobilgas—is America's favorite gasoline. You have every opportunity to BUILD UP your business in your area on this practical basis.

Prepare for State-Wide Stability

Federal Hearing Could 'Cinch' Fair Trade for All Michigan Gas Dealers

Resp. Exh. 77B for Iden.

"WHEN will the Federal Hearing begin?"

Michigan gasoline dealers who have been following advancement of fair trading in their industry through the legislative campaign of the Retail Gasoline Dealers Association of Michigan have been asking that question for some time, not impatiently, but anxiously.

The Federal Hearing that has been anticipated for the last few months is climax in the four point program of the Association:

1. State Fair Trade Law, prohibiting sale of gasoline below cost to injure or destroy competition.
2. Prosecutions under this Law educing sworn admissions by suppliers of subsidies.
3. Federal investigation and hearing of these admitted subsidies as violations of the Wright-Patman Act and Anti-Trust laws, to the issuing of cease and desist orders ending subsidies.
4. Policing of the market to arrest illegal, below-cost sales of gasoline.

Points 1 and 2 have been carefully and successfully executed. Point 3 has been developed through the Federal investigating stage. The Federal Hearing, cease and desist orders, ending of subsidies, these phases have been awaited anxiously. It is the impending hearing, its shadow cast before as a threat over unfair discrimination, that has enabled the Association to maintain a clean market in southeastern Michigan despite desperate conditions elsewhere in the State.

The Hearing 'Soon'

Direct answer to the question, "When?" is impossible. It is known that such governmental business proceeds unhurriedly, carefully, yet inevitably. For this reason, leaders in the southeastern Michigan gasoline field, an important arena of Michigan marketing and seat of the Association's activity, have been unwilling to predict specifically the probable date of the hearing. Yet today they admit a sense of "soon," acknowledging that it may be within 30 days—or sooner.

Although the first points of the program have been concentrated in southeastern Michigan, the ultimate result will benefit the entire State. With the proper follow-up as contemplated by the Association, all of Michigan will be rid of subsidy and chiseling and the illegitimate children of these ogres—price wars and loss sales.

State-wide policing proposes the need for the Association to assume its original purpose—to act as parent organization for all associations of gasoline dealers in Michigan. There are approximately 30 local county and community associations in the State.

Assistance to local associations has been demonstrated most recently by the Association in Ferndale, Royal Oak, Pontiac and Mt. Clemens. Clean markets were won in each from depressed margins, price wars and havoc. Appeals for this same aid have come from many other hard-pressed districts.

As parent organization, the Association would issue information bulletins to all dealers throughout Michigan through local associations' officers. It would spread its educational program through these local channels without affecting the individual identity of each existing organization.

Such expansion for the promotion of the welfare of some 20,000 gasoline dealers in Michigan has been started. A "send-off" in this program has been proposed in a State Convention of Gasoline Dealers.

1940 Convention in Detroit

Detroit officials of the Michigan Association, in conferring with other officials of local organizations, have tentatively scheduled the 1940 State Convention for October 15 and 16 in Detroit. Final resolutions will be announced in trade journals and in State local newspapers.

The 2-day Convention would be concluded with a banquet at a leading downtown hotel. Display booths for suppliers and services of dealers, in the background of this business festival, would appropriately key the attendance to the Fall-Winter season just around the corner.

Local association leaders are urged to communicate with Convention Headquarters, 131 East Adams, Detroit.

Pay Dues Annually

Looking forward to the State-wide scope of Association activity, Executive-Director Rankin Peck issued a message to southeastern dealers urging them to pay dues annually instead of monthly, declaring:

"Headquarters staff will be busier than ever . . . Our investigators even now are taxed to the limit with checking rumors of under-canopy discounting, making test purchases and so forth, along with their other operations. You will be favoring them, allowing them to do their work more thoroughly, if you reduce their number of calls by paying them for a full year . . . The saving to you is not to be overlooked, either. Dues paid monthly aggregate $18 a year, but if paid annually, only $15."

A 'Plug' for an Early Hearing

(COPY) August 13, 1940

Federal Trade Commission,
WASHINGTON, D. C.

Gentlemen:

I am writing you as Chairman of the Gasoline Station Property Owners' Protective Association of Michigan, regarding the unjustified price discrimination practices of certain of the so-called major oil companies in this area.

We know that some time ago, the Retail Gasoline Dealers Association of Michigan, Inc., complained to your Commission of these practices, and we know that the investigation by your Commission that followed that complaint, was productive of beneficial results, both to the owners of gas station properties and the operators and employees.

We understand that when your investigation had uncovered, or was about to uncover the certain evidence of price discrimination, as practiced by some of the majors, voluntary action was taken by the guilty companies which eliminated this unfair practice.

However, it is evident that in some way, such unjustifiable price discrimination has been resumed, and unless soon curbed, will likely be further extended and will result eventually in irreparable loss and damage to the operators and owners of gas station properties. We have every confidence that your Commission can establish unfair trade practice by some of the companies in the past, and can prevent a continuance of these practices.

We respectfully urge that your Commission take such early action in this matter as will eliminate the price discrimination in this area, and we assure you of our wholehearted support.

Very truly yours,
GASOLINE STATION
PROPERTY OWNERS'
PROTECTIVE ASSOCIATION
OF MICHIGAN,
B. P. Costello.

You Don't Have to Buy to Give a Salesman a Break

We ran into "Zeke" at one filling station over on the East Side, and invited him to "take a load off . . ." and sit in the car and chat a while.

Zeke slumped into the car and pushed out his legs. He was sweating—not perspiring—sweating as he sighed, grateful for the relief of rest.

"What's the matter, Zeke?" we kidded. "Trying to make us believe you work for a living? You're just a flourishing accessory salesman, living off the fat of the land." We waved our hand at the station. "Look," we chided him. "They buy 'em, sell 'em, and work like hell putting 'em on. You . . . huh! You just supply 'em!"

Zeke's eyes looked up pitying. He was too tired to move his head to complete the look of disdain. "Brother, you just don't know what you're talking about," he answered.

We could see he was serious. We changed our tone: "What's the matter? Nobody buying?"

"No. Not that. Station business is good these days. There's good selling . . . "

"Well what are you beefing about?"

"Here, friend. Here's the dope: If I see no one I get no orders. If I see four stations, I can figure on one order. In order to make a bare living I've got to take at least five average orders. That means I've got to see 20 dealers . . . Okay. That sounds easy. Without getting a traffic ticket I could scoot in and out of 400 stations in a day. But man, do you realize how long I've been right here, just at this one? I've been here since a quarter after five. That means more than an hour! At the one before, I was tied up for an hour and a half, and at the other before that I spent almost a full hour.

"Was I trying to sell all these three hours? Hell no! Most of the time I was picking my teeth or my nails—waiting. Waiting! That's the whole thing in a nutshell. It just ain't necessary. It just don't make sense. If these guys were busy all the time, that would be swell. But Cheez Christopher!

"One guy's working a crossword puzzle when I come in. Without hardly looking up he asks what's a four letter word meaning 'friend.' I tell him 'Zeke.' He shakes his head and says it begin with 'C', so I tell him 'chum.' He pops that down and is so thankful that after writing in a couple of wrong words misspelled, he lays down the sheet, takes one of my cigarettes, and starts telling me all about the war. Naturally I can't tell him right away that I want to sell him something. In due time I get to that. Just then a car pulls in. He musta known I was through listening to his unessentials, for he turns his time-wasting onto his customer who takes it for another 15 minutes. Finally he comes back, plays with some of my samples for another 15 minutes and in the end confesses that he wishes I'd been in yesterday, would I come in Thursday?

"All right, that's just one. Another one was listening so hard to the ball game I guess his ears musta heard, 'In dozen lots of Kreevich's single through the box a two per cent discount if a called third strike ending the inning and a special display for the window to substitute for Fox in right field.' He turns to me with a rapt smile and says, 'I think so too' which means he agrees with me that the Tigers will win the pennant . . . Aw NUTZ!"

He laid his hand on our arm. "Listen, pal. If you could just tell 'em that they're taking money out of our pockets when they hold us up just to kill their own time . . . If you could explain that their job is just to wait for customers to come in, while our job is to come in and wait for them . . . If you could get them to consider us as friendly business men, not just plain friends . . . If you . . . "

U. S. Cites Four Oil Firms

Price Discrimination Charged: Foreshadows End of Chiseling Through Subsidies Here

Resp Exh. 78B for Iden—

AN **ABSOLUTELY** clean market, even rid of price discrimination and resultant subsidy, appears closer and certain for Detroit and Michigan.

On December 2nd the Federal Trade Commission issued complaints against four large oil companies, charging price discrimination in the sale of gasoline in the Detroit area. Hearing of answers to these charges are expected early in January.

The Federal hearing comes as a climax in the four-point program of The Retail Gasoline Dealers Association of Michigan. Briefly, the campaign as planned by The Association's executive-director, Rankin Peck, late in 1936, outlines:

1. State Fair Trade Law prohibiting sale of gasoline below cost to injure or destroy competition.
2. Prosecutions under this Law educing sworn admissions of price discrimination by suppliers; and transmission of such testimony to the Federal Trade Commission.
3. Federal investigation and hearing of this admitted discrimination as violation of the Robinson-Patman Act and Anti-Trust laws, to the issuing of cease and desist orders, ending discrimination and subsidy.
4. Policing of the market to arrest illegal, below-cost sales of gasoline.

Successful Execution

Points 1 and 2 were carefully and successfully executed during the last four years under the guidance of Mr. Peck to the present development.

It was the impending hearing, as a threat to unfair discrimination, that enabled The Association to employ its other legal resources in its united movement that stopped price wars and established legal margins in Detroit in 1939, then in Ferndale, Royal Oak, Pontiac, Lansing, Grand Rapids, Kalamazoo, Battle Creek, and their affected areas. In each area, markets remained firm thereafter.

Named in the U. S. complaint are Michigan operating units of Standard Oil, Gulf Refining, Texas, and Shell Oil Companies.

Standard, supplying about 450 retailers in Detroit, sold to four dealers, Citrin-Kolb, Stikeman, and Wayne Oil Companies, and Ned's Auto Supply Company, at prices ranging from 0.5 to 1.75 cents per gallon lower than prices charged other retailers in this area, the Commission says in its complaint.

Others Accused

It alleges that Gulf sold gasoline to stations here owned by Firestone Tire & Rubber and B. F. Goodrich Companies at prices ranging from 1 to 2 cents lower per gallon than the cost to approximately 225 other dealers. Texas, supplying 80 retailers, sold gasoline to the same two companies at reductions of 0.5 to 2 cents per gallon the Commission charges.

[illegible] accuses Shell of selling to the Grand River Oil & Gas Company at prices substantially lower than those charged other dealers.

In a statement from Standard denying the alleged violations, Buel F. Jones, general counsel for Standard, declared:

1. The company sells in tank car quantities to the four companies involved. They have their own bulk storage and deliver to retail stations with their own trucks. In this manner they assume part of the distributing expense. (This does not reconcile a discrimination of 0.5 to 1.75 cents per gallon. It has been found that storing and hauling costs here run from about 0.2 to 0.25 cents per gallon).
2. If the four Detroit firms were not buying from Standard, they could purchase in the open market at equally low prices. (But, Mr. Jones fails to add, purchases in the open market do not carry the brand label, and must be sold to the consumer without brand name and without the sales force of the brand's powerful advertising and merchandising promotion).

Dealers are confident that such defense by statement-with-omission will be penetrated if offered in Federal Hearing.

Possible Contentions Feeble

Other arguments that may be offered in defense appear equally weak: :

3. Volume sales deserve discounts. (However, in these cases discounts were given first against anticipated sales: discounts first, volume last, is the basis of subsidy).
4. Price should be lower to wholesaler. (Certainly. But when is a wholesaler not a wholesaler? When he's a retailer).
5. That not the companies, but the jobbers are responsible for the unjust application of the wholesale discount. (It is obvious that if a supplier is prohibited by law from unjust discrimination to dealers, it still would be illegal to do it through an agent, give the agent any name you choose—jobber, drummer or master of ceremonies).

Cause of Price Wars and Loss of Property

Economic evil and disaster spring from price discrimination, it has been seen time and again in gasoline marketing.

Bernard P. Costello, president of the Gasoline Station Property Owners Protective Association, described this plainly in his remarks upon the announcement of the U. S. Trade Commission's recent action. He declared:

"Without the elimination of unfair discrimination, the full benefit of the Michigan Fair Trade Law is ineffectual. Dealers find no fault with lesser rates to wholesalers, but object to the application of wholesale prices to retail sales, especially where it is used to start price cutting wars.

"Under the Fair Trade Law a minimum operating margin is recognized. In Detroit a 3-cent margin was determined as the minimum required for the most efficiently operated station. However, because of price discrimination, it is possible for a price-favored station to sell at two cents

Hail Dealers! A Happy, Prosperous New Year to You--BY You...

As 1940 draws to a close and Michigan gasoline dealers prepare to enter a new year which promises greater prosperity and the happiness that springs from improved, stable business, it is well to remind them that they are the promoters of their own good.

We at the center of the organization appreciate the fine words of praise and thanks that have been addressed to us during the Christmas season. However, dealers must remember that they have wrought their own good fortune. They, too, must maintain it and improve it.

Therefore we are greater pleased at the pledges of continued memberships and support than at congratulations. Both are tokens of appreciation: one for work done; but the other that this work will not be UNdone.

So it is a confident wish, this message:—

A Happy, Prosperous 1941,
Michigan Gasoline Dealers!

—RANKIN PECK, Executive-Director.

NEW OPACO

Safety-Fill Nozzle

Approved by Underwriters' Laboratories, Inc.

NO GUESS!

Federal Hearing Begins March 10

Standard Ordered to Reply to U. S. Charges of Price Discriminations Here at Detroit

Resp Exh. 79 B for Iden—

ONE of four large oil companies charged with price discrimination in the sale of gasoline in the Detroit area, Standard Oil Company of Indiana, is scheduled to make its formal replies at a two-week hearing before the Federal Trade Commission at Detroit beginning Monday, March 10.

In its complaint against Standard, issued last December, the Commission charges that Standard, supplying about 450 retailers in Detroit, sold to four firms whom Standard refers to as "jobbers," namely, Citrin-Kolb, Stikeman, and Wayne Oil Companies, and Ned's Auto Supply Company, at prices ranging from 0.5 to 1.75 cents per gallon less than prices charged other retails in this area.

Hearing Is a Triumph in The Association's Fight Against Subsidy

The Federal Hearing comes as a climax in the four-point program of The Retail Gasoline Dealers Association of Michigan. Briefly, the campaign as planned by The Assocition's executive-director, Rankin Peck, late in 1936, outlines:

1. State Fair Trade Law prohibiting sale of gasoline below cost to injure or destroy competition.

2. Prosecutions under this Law educing sworn admissions of price discrimination by suppliers; and transmission of such testimony to the Federal Trade Commission.

3. Federal investigation and hearing of this admitted discrimination as violation of the Robinson-Patman Act and anti-trust laws, to the issuing of cease and desist orders, ending discrimination and subsidy.

4. Policing of the market to arrest illegal, below-cost sales of gasoline.

Points 1 and 2 were carefully and successfully executed during the last four years under the guidance of Mr. Peck to the present development.

It was the impending Hearing, as a threat to unfair discrimination that enabled The Association to employ its other legal resources in its united movement that stopped price wars and established legal margins in Detroit in 1939, then in Ferndale, Royal Oak, Pontiac, Lansing, Grand Rapids, Kalamazoo, Battle Creek, and their affected areas. In each area markets remained firm thereafter.

Similar charges of price discrimination were levelled by the Commission in December at Michigan operating units of Gulf Refining, Texas, and Shell Oil Companies.

'Yardstick' Case

According to the FTC, the Detroit hearing will concern only the complaint against Standard Oil, but that the Commission's ruling in that case probably would serve as a yardstick for disposition of the other three cases.

In their answers to the complaints, Standard and Texas contended their price differentials merely made allowances for saving permitted by the different method of sale and delivery of gasoline to certain companies.

Standard contended further that the four Detroit dealers named in the complaint were regarded as wholesale jobber customers and that the company therefore was entitled to sell them gasoline at prices lower than to retail dealer customers.

"There has been an awful lot of talk and 'smoke-screening' going on," Executive-Director Peck comments. "So just to get the record clear, I would like to explain substantially just what the complaints of the retail gasoline dealers are:

How It Works

"A company sets its price that dealers must pay for its various brands and grades of gasoline. This, then, becomes the price that the great majority of dealers must pay. Then, among other things, certain companies appoint a 'jobber agent' whom they allow to serve certain stations sprinkled among those that the company is supplying directly at the regular posted price.

"A part of the complaint is that these jobber agents have been supplying some of their station accounts at less than the company's regular posted price that the majority of its dealers are compelled to pay. Some of these jobbers are also accused of operating chains of retail stations on the side and all the rest of the dealers have to compete with them, while they, the so-called 'jobbers,' buy at a much lower price.

"There is no objection to jobbers doing a jobbing business, but

(Continued on Page 29)

Retailers Will Get First Hand Facts on Complaint While at the Convention

Use of price discrimination as plain and subtle subsidies to affect prices and control margins has been the root of business unhappiness and tragedy in gasoline retailing, The Association has contended. In this contention it has been backed solidly by the Gasoline Station Property Owners Protective Association.

Just how such manipulation and strategy has been employed will be explained clearly to Convention-attending dealers who until now have had but a hazy sense of the complications.

"The root of market upsets and wars is the subsidy," Executive-Director Peck has stated. "Price discrimination is the source of subsidy, and until we are rid of this unfair, illegal weapon, dealers are in constant danger of unfair competition, price and margin cutting wars, bankruptcy, and business failure.

"It is almost like a stroke of Providence, that the Hearing is scheduled to open just one day before the Convention begins, and to be held just a few blocks from Convention Headquarters. This makes it possible for all who come to attend the Convention to take an hour or two off to sit in on the Hearing and pick up some important facts.

"There will be plenty of facts to pick up about Discrimination and poisonous effect on gasoline markets right at the Convention. Every delegate has my personal invitation to ask direct questions on that subject particularly."

(p.83

New Fair Trade Bill Is Iron-Clad

Resp Exh. 79 C for Iden-

All Loop-Holes Closed, Association's Improved Act Is Introduced in Senate

SENATE BILL No. 186, sponsored by The Retail Gasoline Dealers Association of Michigan as the "Motor Fuel Unfair Practices Act," was introduced into the Senate at Lansing on February 20 by Senators Joseph A. Baldwin, of Albion, and Clarence A. Reid, of District 18, Detroit.

As a fair trade bill for gasoline dealers, the measure would make it unlawful for any person engaged in the manufacture, distribution, or sale of motor fuel to sell fuel of the same grade at a lower price to one purchaser than to another; to discriminate between sections, communities and locations as to prices.

SENATOR BALDWIN

It bars any scheme of special rebates, collateral contracts, or any similar device which would effect discrimination in violation of the intent of the act.

The act declares that its purpose is to safeguard the public against the creation or perpetuation of montopolies.

No Weaknesses Here

Senate Bill No. 186 is the fruit of years of special study by The Association and its legal and accounting staffs. All of the attorneys engaged in drawing the improved act have been intimately connected with the first Act, No. 282, which it will supercede.

Included among them are: Paul W. Voorhies, former prosecuting attorney, and his associate, R. Gerveys Grylls; Ralph Garber and Paul Mayrand, both former assistant prosecuting attorneys.

Necessarily attached to the soundness of the proposed Act is Professor Herbert F. Taggart, head of the Economics Department of the University of Michigan. Prof. Taggart, now working with the Defense Commission in Washington, has continued his supervision of the Cost Survey features of the bill, leaving local execution in the hands of W. G. Roost and other qualified assistants.

This new law has been drafted after careful study of any weaknesses of the present Law that might have appeared during its three years of use; and following just as careful consideration of similar acts in other States, and numerous recent decisions sustaining them.

Come On, Gasoline Dealers! Let's Put This Bill Through

Passage of Senate Bill No. 186 will mean that gasoline dealers will have the ideal, necessary protection of the Law against monopoly and unfair discrimination which have brought margin starvation and bitter business defeats.

Bill No. 186 must go through!

It has been referred to the State Affairs Committee, comprised of Senators Munshaw, Town, Howell, Burhans, Logie, Dignan, Milliken, Diggs and Brooks. If these Senators are in your district call on them to bring it out of Committee. If they're not handy, write them!

Every gasoline dealer should call or write the Senators and Representatives from their own districts and demand the passage of Senate Bill No. 186 just as it stands.

Show the men you sent to the State Legislature that Senate Bill No. 186 is of the utmost importance to you!

• • •

No special charges have been assessed dealers by The Association in drafting or executing Senate Bill No. 186. It is projected only through membership dues.

Inquiries from various parts of the State describe solicitations from dealers at their stations for funds to press dealer-legislation. The Association has authorized no such solicitation, and urges all dealers who may be so approached to insist that the caller identify himself by producing a letter, or card, bearing The Association's emblem.

SENATOR REID

Discrimination Exposed

(Continued from Page 5)

when they invade the retail field, they also become retailers. And it seems clear, that if a company does not see to it that all dealers selling under its brand in the same area do not have to pay the same price, those that are discriminated against have little chance in open competition.

"It seems that if the law prohibits a company from discriminating then they are still prohibited from employing an agent to do it for them."

• • •

The Hearing will be conducted in the Federal (Post Office) Building, Wayne at Lafayette Streets, in Room 859, under the supervision of Webster Ballinger of Washington, a FTC trial examiner. Cyrus B. Austin, FTC attorney, will represent the Commission.

R P PECK
EXEC DIRECTOR

March 26, 19[illegible]

[illegible]
the State of Michigan.

Fellow Dealers:

You want higher margins. You complain your costs of labor, etc., have made the present, old margins insufficient.

You need higher margins and you can get them by proving it. You can prove it by a Cost Survey acceptable to the courts.

You can have such an acceptable Cost Survey. The Association already has prepared the proper forms. This expensive preparation has cost you nothing but membership dues.

Now the **forms must** be printed, mailed and returned. For **this expense** THERE MUST BE ENOUGH MEMBERS AND DUES. **A few dealers** cannot assume the costs to benefit thousands. Nor **can a few** counties do it for the entire State.

You want a **Cost Survey**—the higher margins—in your County first. **Cost Surveys** will go out in the only fair order possible: **as sufficient** money in dues is received from each County, **the** Survey will be sent out to it. Many Counties are already eligible. Is yours?

Don't hedge. This is urgent. Use the membership blank on page 9.

Yours truly,

R. P. Peck

Doom at Hand for Secret Rebates

Resp Exh-80 B for Iden-

End of Subsidy Thru Discrimination Looms; Dealers Urged to Press Passage of Their Senate Bill No. 186

COMBINATION of bright prospects for gasoline dealers: a favorable verdict in the Federal Trade Commission's complaint of price discrimination in Michigan; and passage of The Association-sponsored Senate Bill No. 186, the new, improved fair trade law, lead to a general optimism within the trade of the clipping of secret rebates—last prong on the Marketing Devil's fork.

In connection with the Federal Trade Commission's hearing of answers to its charges of price discrimination against Standard Oil Company of Indiana, dealers were heartened in the trend. The hearing opened in Detroit on March 10 and adjourned to Washington after hearing local testimony.

Local testimony included declarations of Greater Detroit dealers of the effect of price cutting by stations which were supplied at lesser gasoline costs.

You Can Do It!

Not only God, but the Law, too, helps those who help themselves.

Dealers can help themselves by pushing to passage their new State fair trade law which is still in the State Affairs Committee. The improved act would permit swift and thorough arrest of illegal efforts to upset stability.

Call or write your State senator and representative. Tell them how essential to your business and well-being is—

SENATE BILL No. 186

One of the most important contributions was the testimony concerning distributing costs. Standard, like the three other companies accused of price favoritism by the FTC, contended that lesser prices to Ned's and others involved were due to the savings in bulk storage and delivery.

For this consideration Standard sold to four "jobbers" (operating retail outlets), at prices ranging from .05 to 1.75 cents less than to dealers. At the Hearing, in cross examination of P. H. Harrison, Sun's western regional manager, it was brought out that Sun's costs were .36 cents for getting a [illegible] of gasoline from Sun's bulk storage to station tanks.

This figure, identifying an inconsistency in the .05 to 1.75 cents allowed by Standard, included cost of warehousing, handling, loss, truck or delivery, office costs, and general district expenses, real estate taxes and dividends on invested capital and plant inventory, the FTC was informed.

Sun has 466 stations in metropolitan Detroit and serves these stations plus others as far away as 40 miles, with 13 trucks, Harrison stated.

Standard's is considered to be a "yardstick" case, as the decision in its case probably will be the key to the FTC's disposition of the charges against Gulf, Shell and Texas.

When the decision will be made is not certain, although it is hoped for within a month. Dealers are more hopeful of an affirmative opinion of the FTC's charges, believing that in the end there will be a cease and desist order stopping such price discriminations.

With the ending of price discriminations, leaders declare, even secret rebates will be ended. Stations giving secret rebates, appearing to sell below cost, can do so if their costs for gasoline are less than to others of the same brand.

Tank Wagon, Margin

Dealers have been expecting a tank wagon hike since the first of the year, an Association survey has shown.

Dealers, generally, are determined to increase their own margin two-tenths of a cent when the tank wagon change comes, the survey revealed.

Higher costs force such a move, they declared, stating two-tenths a minimum necessity, and pointing for the Cost Survey to show them the fully required additional margin.

Ending of unfair price discrimination will put all dealers on an equal footing, basically, for free, legitimate competition.

Of thorough aid in policing and prosecuting illegally below cost sales, will be the new fair trade act, Senate Bill No. 186, designed for speedy execution and efficiency in cleaning the market and so maintaining it.

Ed Fennert (Gulf), Cadillac and Mack, died suddenly March 19. Long a member of The Association, he was well known and liked for his kindliness. His many friends offer condolences to his family.

Ed Mattson (Hi-Speed), 14636 Charlevoix, was called to his mother's bedside in Marshfield, Wisconsin, when she was taken gravely ill on March 25.

Proof of Official Recognition and Respect for Association

The Convention was a big success, a tremendous success in every way from everyone's point of view.

Just how this success is measured may be a point of curiosity to many. Usually, on assertion of success, there is the question, "How much money did you make?"

There was no money made on the Convention. True, exhibitors point to big sales made during the event. They say they made money at the Convention; and more than that, they declare, they made many friends and prospects.

That is good. These co-sponsors of the Convention all have exclaimed upon the success of the Convention, contributing to The Association's satisfaction.

The Association's own satisfaction is in many ways.

Publicity of the event brought knowledge of The Association to many previously uninformed dealers. It was reflected at once in the membership rolls; and the wave of intelligence will spread on and on.

Dealers in attendance at the Convention became aware of a business kinship with other dealers. The sentiment of unity is a powerful force for a State organization, and this sentiment is rooted firmly now almost everywhere in the Michigan gasoline business.

Important public officials were invited to attend. Many accepted and many other responded regretfully, but as a result of these sincerely pleasant calls upon them, hundreds of administrators and executives of the law and government became aware of gasoline dealers in Michigan. They learned of their organization and of their program to win, through legal assistance, a chance to earn a decent living if they worked hard—even if they insisted on doing it honestly!

These words of Success are written from The Association's point of view. It is well to seek confirmation in the words of guests and exhibitors at the Convention. Here they are summarized:

Governor Van Wagoner: (In speech at Convention Banquet) Praised The Association for its good work in stabilizing the gasoline market in Michigan. Found The Association unselfish in its platforms . . . Said that as long as Senators Baldwin and Reid had introduced Senate Bill No. 186 he saw no reason it should not pass easily in the Senate; and that he had looked it over and if it should reach his desk he would give it very careful consideration.

Mayor Jeffries of Detroit: (In formal opening of Convention, welcoming dealers from all sections of the State) Commended The Association "for its great progress in such an essential industry."

Other guests:

State Highway Commissioner G. Donald Kennedy, Secretary of State, Harry F. Kelly (through Proxy Hagan), State Senator Clarence Reid, Mayors John Cassin of Port Huron and James P. Dunnigan of West Branch, Prosecuting Attorneys William E. Dowling of Wayne, and Dunn of Calhoun, Detroit Councilmen Eugene I. Van Antwerp and Henry S. Sweeney . . .

Circuit Court Judges Vincent M. Brennan, James A. Chenot, Ira W. Jayne, Adolph F. Marschner, DeWitt H. Merriam, Guy A. Miller, Lester Moll, Joseph A. Moynihan and Robert Toms . . .

Recorder's Court Judges John V. Brennan, Joseph A. Gillis, George T. Murphy, W. McKay Skillman, and Donald Van Zile . . .

Common Pleas Court Judge Charles E. Merrill . . .

Former Circuit Judge Frank Day Smith (so well-known to gasoline dealers for his just treatment of a prosecution under the Fair Trade Law) . . . and Raymond J. Kelly, past National Commander of the American Legion . . .

All of above: CONGRATULATIONS!

Exhibitors: "No question about it . . . it was a real success"—Cy Fleming, Versnick Brothers Co. " . . . I regard this Convention highly successful . . . you should all be congratulated on its good attendance and support of your members . . . put us down for an advance reservation for a much larger space for next year's Convention"—G. M. Pratt, Buhl Sons Co. " . . . we enjoyed the Convention. We had a good time, made a lot of friends, and got a lot of business. As far as we are concerned it was a great success."—Storm Vanderzee, U. S. Automotive Corp. " . . . It was very well handled and not attended by just sight-seers, but by dealers who showed a keen interest in the various exhibitors' displays . . . "—M. E. Gardner, Automobile Equipment Co.

• • •

Convention Impression Brings Special Notices to Dealers

The great numbers of dealers who attended the Convention were impressive of the growth of The Association. This impression is demonstrated in the reaction of five gentlemen who have been friendly sympathizers with the principles of Fair Trade which underlie the program of the Association.

They had been familiar with The Association, it would appear, when its membership was but a handful. Now, realizing its great numbers, they have found it worthy of direct messages through its magazine.

Dealers Acclaim U. S. Action

Michigan Retailers at Detroit Meeting Hear Judges Laud Peck, Association

SIMULTANEOUS with the Federal Trade Commission's announcement came the news that the Battle Creek-Kalamazoo area had responded to Association efforts. Market stability had been attained, and with it a general recovery of operating margins.

Among Battle Creek and Kalamazoo retailers who were prominent in the campaign for legal operation were:

G. W. Bunce (White Rose), Nate Claypool (Texaco), Andy Foster (Standard), of Parchment, Harry Gildea (Texaco), Matt Hoebecke (Sun), W. B. Johnson (Phillips 66), Neil Lemmer (Mobilgas), Irving Penney (Sinclair), Maynard Pierce (Standard), William M. Rowe (Cities Service), Larry Ulrey (Pure), and Walt Upson.

A really State-wide representation of dealers appeared at the December 9 meeting of The Association at Headquarters in Detroit. Members from Mt. Clemens clear over to Grand Rapids answered the invitation to attend the discussion of the latest brilliant achievement of The Association—the winning of official U. S. recognition of price discrimination here.

Earl Coller, representing Lansing, in describing The Association's accomplishment there, said: "We were all on a pretty lean diet before The Association came up to help us . . . But for the first time in several months I've had steak—TWICE IN ONE WEEK!"

Similarly, the gratitude of Grand Rapids-Western Michigan was expressed good-humoredly by Clair Reynolds and was received with great applause by the big assembly:

Business Life Threatened

"We were so sick we didn't even know if we were going to live or not. But as a business doctor, The Association pulled us through . . . Our dues now are like hospital insurance . . . It'll all be fine and we'll stay well if we don't forget just how sick we were. That's the trouble. When a man is well, it's too easy for him to forget how sick he was. We've got to stay in The Association if we want to avoid the big expense of sickness."

Growing memberships in several of the improved markets have contributed sufficient revenue in dues to maintain regional investigators. Policing of the market to obtain proof of illegal chiseling and to report violations of the law, is the work of Association investigators.

Assurance of maintenance of stability depends upon sufficient revenue from dues to keep an investigator in the local market.

Three prominent judges were honored guests at the State meeting. All commended highly the ingenuity of Rankin Peck in designing a program to win business justice by legal methods, and The Association for following this course zealously.

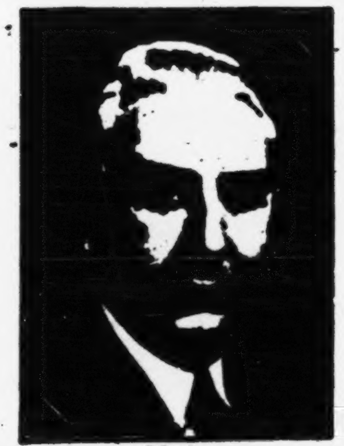
Judge Ralph Liddy, of Common Pleas Court, stressed the need for continued Faith. "Loss of Faith," he asserted, "is loss of fundamentals. Every division and department of life is based on Faith." He commented, "We forget how hungry we have been when we are well fed."

Liddy

Judge Frank Day Smith, of Circuit Court, is well-known and respected by the trade for his patient study of the oil industry which enabled him to reach an informed opinion in an important prosecution under the Fair Trade Law last year. Judge Smith declared: "I foresaw Federal Trade Commission action when sound allegations of discrimination were presented to me." He spoke in recommendation of benefits derived under the Michigan Fair Trade Law: "The 'slavery to oil barons' of which the public has heard, cannot be present in this State if the Law is observed . . . "

Smith

Recorder's Court Judge John J. Maher likewise recommended The Association to its members. "You must maintain your Association by constant membership," he advised.



Maher

Cry for More Margin Rises

Higher Costs, Especially Labor, Point To Insufficiency of Present Margins

MICHIGAN gasoline dealers need a new cost survey.

During the last two months Michigan gasoline dealers, especially in metropolitan markets, have raised a stronger and stronger demand for additional margins.

Rising costs, especially of labor, suggest strongly that the 3-cent margin, legally established as a minimum operating figure in a cost survey conducted by The Association early in 1938, is now inadequate. It may be that even dealers operating at 3.3 cents margin and greater are pumping liquid losses.

Michigan is in the best position of any State to meet the changing conditions. In other States the same sentiment may drive station postings up to cover increased costs, but just a favored or foolish few may upset the structure by chiseling.

Michigan Can Be Firm

In Michigan, however, the State Fair Trade Law recognizes minimum operating margins and prohibits selling below cost to injure or destroy competition. A cost survey establishes this minimum to the satisfaction of the court.

It is necessary now that a new cost survey be made. The new survey should cover the entire State by marketing districts. This sounds like a big, long job. Dealers throughout the State must be given form sheets to fill out enumerating necessary details of business operation. They must send them in to The Association to be compiled.

It is a big job and may take more than a month to complete despite the system that has been established for The Association in its two previous surveys. Professor H. F. Taggart, head of the Economics Department of U. of M., in charge of the cost survey division of The Association, designed the forms and procedure that found court acceptance.

"Certainly if costs have increased the survey will show it," Executive-Director Peck explained. "If dealers are to meet greater costs with greater margin, the cost survey must begin at once. Dr. Taggart is preparing the required survey sheets. But for his services, for the printing and distributing of these forms, for their collection and compilation, and for their introduction and acceptance by legal action, a large expense is required.

"It's quite plain. Dealers must show even greater effort and support to meet this Association expense to win them greater margin. They must join The Association if they do not already so that their dues will help fill the survey chest.

"Members themselves should pay annual dues at the $15 a year rate . . . or pay at least two to six months dues at once."

In sympathy with the financial needs of their Association to win them firmer business footing, 32 more members have paid annual dues in the last two months. They are:

They Like Your Business, Yes, But They Like YOU Too!

Responding to suggestions of gasoline dealers throughout Michigan who are their customers, important suppliers of retailers have seized the Convention as an opportunity to show that their "sympathy" with dealers' problems has been more than just "talk" and slick salesmanship.

They have recognized the Convention as a force to promote the good of Michigan dealers, and to aid this force as well as to show dealers "what they've got," they have taken exhibit booth spaces and declared the charges involved proper and fair. No haggling and bickering. Just plan active sympathy and co-operation.

This kind of co-operation is going to be rewarded in more than one way. "One way" is in the reflection of improved gasoline retailing on them, bringing improved business for those who sell to retailers.

There's something that's even more direct than that. Many dealers have promised to bring check books to match exhibitors' sales-books. They're out to show exhibitors that they "appreciate appreciation." One important dealer, respresenting a buying group of more than a score of dealers, has been drawing up a schedule of purchases to be made at exhibit booths. His expressed intentions only suggest the many others that reside in bosoms until March 11 and 12.

Further proof of suppliers' sincerity is seen in the generous prizes that have been bestowed. Even at magazine deadline, February 24, several hundreds of dollars of fat prizes to be won by All-Privileges ticket holders had started the list. The Prize Committee has declared "at least $1,000" in merchandise prizes as more a certainty than probability.

Year-'round profits with the new NOR'WAY SELF-SELLER

The new NOR'WAY Self-Seller, heavy metal, double side display stand, three colors FREE with initial order of six cans each of the new NOR'WAY Matched Cooling System Chemicals:

NOR'WAY CLEANER
Improves circulation; relieves overheating. Removes rust, grease, scale. Cleans without reverse flushing. For cooling systems up to 30 quarts.

NOR'WAY QUICK FLUSH
Cleans while car is in service. For cooling systems up to 30 quarts.

NOR'WAY STOP LEAK
Will quickly stop leaks. Flows freely through system. Works with stock anti-freezes.

NOR'WAY ANTI-RUST
Prevents corrosion and rust. Protects all metals, including aluminum. For cooling systems up to 30 quarts.

A FULL-CASE PRICE FOR A SPLIT-CASE DEAL

LIMITED TIME ONLY

Launch Campaign for New Members

Retailers in Districts Captain Drives to Win Full Support for Higher Margins

"MORE MEMBERS—More Margin" is the Spring slogan of scores of key dealers in the State of Michigan these days. The cry for more margin was sounded several months ago as dealers, especially in metroplitan areas, began to squirm uncomfortably under a growing weight of operating costs.

Labor, a key to costs of station operation, transportation and materials, was the first index. As the defense program warmed up, the appeal of higher wages in factories began to show in difficulty of holding attendants.

Oil suppliers themselves began to feel the strain of operator-scarcity. Burton Business Brokers, specializing in Detroit and outstate gas station leases and sales, more than two months ago reported some leased stations closed, unable to open for lack of demand.

This labor effect was direct and first, but it has followed with inevitable indirect force in higher costs outside the station, reflecting on the station's costs.

In the present difficult business siuation, prevalent throughout U. S. gasoline markets, Michigan stands out more fortunate than others. Through the Retail Gasoline Dealers Association of Michigan's program, gasoline margins have been sufficient for operation in stabilized markets everywhere within the sphere of influence of The Association. This has established a greater appeal for gas station business here in Michigan, and less chance of abandonment by dealers and attendants.

It is the same pattern of The Association that permits easy "catching up" of the margin to meet greater costs. In other States movement of margin is uneasy, each operator fearing the next as a chiseler of gallonage, and so all may continue to sell at loss.

In Michigan, the law prohibits sales below cost to injure or destory competition. It accepts a Cost Survey as evidence of Cost. Present minimum margins were established by a Cost Survey taken long before the present upturn of costs. A new Cost Survey is required. It will discover minimum operating margains and become the basis for margin improvements.

How will the Cost Survey be obtained? The Association Cost Survey Commission, aided by Prof. H. F. Taggart, has prepared the acceptable forms already. Prof. Taggart, formerly head of the Accounting school of U. of M., and now in Washington employed in the Defense Commission, prepared the last successful survey for The Association. It is necessary now only to print and mail the forms.

How soon this will be done depends on gasoline dealers themselves. The expense of personnel, printing, mailing, compiling, filing, etc., is tremendous. Funds available to The Association to meet this expense are obtained only from membership dues. As dues sufficient to meet Cost Survey expenses are received from each County, the Cost Survey will be effected in that County.

It is this: the need for higher margin, the Cost Survey to prove it, and The Association needing funds to get the Survey, which has inspired the slogan—"More Members--More Margin!" It has brought appointments and volunteers among dealers in Michigan to act as District Captains in a thorough membership campaign to raise the necessary funds by dues.

Dealers in every city and township in Michigan are urged to volunteer in this campaign.

"If you believe you can get even only five new members in your vicinity, even if you're not a member yourself, please write us for an appointment as District Captain," urges President Ed Pratt.

Detroit Off to Flying Start

Detroit-Wayne County gasoline dealers scheduled a meeting for Monday, April 7, at State Headquarters, 131 East Adams, Detroit, where they could organize thoroughly their regional membership campaign. District Captains will cover every section of the region in the drive for members-for Cost Survey-for improved margins.

Wayne County is off to a flying start with the greatest number of members per County in the State Association. However, the same reason which accounts for highest membership—greatest [illegible] of gas stations per county in the State—also accounts for greatest expense in issuing the Cost Survey in Wayne. Funds through dues must be increased to meet this urgent need.

Kent County, too, is in a similar position. In proportion to number of stations per County, Kent leads in membership in The Association, topping even Wayne County. Kent will have the same advantage as Wayne in meeting its membership quota to win quick issuing of its Cost Survey.

• • •

Yearly Dues Can Do It

It's not only quantity, but quality that counts. "More Members—More Margin" is a good slogan to lead to quantity of dues, but it doesn't suggest the other part of the story: Payments of yearly dues, instead of parts-of-year dues, can do as much to win sufficient funds for the Cost Survey.

For instance, during the last two months 31 members have paid their dues at the $15 yearly rate. In this they tabulate a score card reading:

(Street Address Only Identifies Detroit City)

R. L. Adams, 7143 Puritan	$15.00
Victor Almas, [illegible] W. Jefferson	15.00
American Oil Co., Plainwell	15.00
Wm. Bedford, [illegible] Joy Road	15.00
Henry Bjorke, 16851 Oakland	15.00
Chum's Super Service, Wyandotte	15.00
W. W. Coit, [illegible] E. Jefferson	15.00
W. J. Durham, [illegible] Grand River	15.00
Ernst Super Service, Mt. Clemens	15.00
Gaeth Service, Bach	15.00
Roy Gartung, 1776 Randolph	15.00
Gehrl's Service, Fairgrove	15.00
Sam Gerber, [illegible] Gratiot	15.00
Al Haigh, [illegible] Gratiot	15.00
C. H. Haines, Vassar	15.00
Art Hall, 6621 W. Lafayette	15.00
Hamilton Auto Service, 13001 Hamilton	15.00
Hall & Dean Service, Millington	15.00
Hanson Super Service, [illegible] Livernois	15.00
Herb's Auto Supply, 1470 16th	15.00
Gordon Hunter's No. 2, Ann Arbor	15.00
A. B. Johnson, Grand Rapids	15.00
R. J. McIntosh, [illegible] E. Jefferson	15.00
Medland's Service, [illegible] Dix Ave.	15.00
Mullins Service, [illegible] Puritan	15.00
Bud Price, Riverview	15.00
School's Service, St. Clair Shores	15.00
Sebewaing Oil Co., Sebewaing	15.00
Swanson Motor Sales, Plymouth	15.00
Turner Service, [illegible] W. Vernor	15.00
Whipple Service, Benton Harbor	15.00
Total	$465.00

These 31 equal in value of contribution to the Cost Survey more than 300 new members joining at the monthly rate.

District Captains and Investigators engaged in the Spring Membership Campaign are pointing for bulk payments of dues in their drive for volume Cost Survey funds, figuring Volume equals Quantity times Quality.

130 More Dealers Join—Membership Surges Through State on Association-Whipped Waves of Stability

ANOTHER 130 gasoline dealers in Michigan acknowledged their recognition of the construction and improvements wrought by The Retail Gasoline Dealers Association of Michigan by joining in the last two months. Principal cities in point of number of new members were Benton Harbor, Kalamazoo, and Detroit.

ORDER DIRECTING INCLUSION OF CERTAIN DOCUMENTS IN THE RECORD.

Counsel for the Commission during the hearings before the Examiner having offered in evidence a document previously marked "Commission's Exhibit 65 for identification", to the introduction of which counsel for the respondent objected, which objection was sustained by the Examiner; and thereafter the same document was offered in evidence by counsel for the respondent without having first been given a respondent's identification number, and the Examiner of his own motion having excluded the exhibits; and thereafter the respondent having appealed from the Examiner's ruling to the Commission and the Commission having reversed the Examiner and directed that the document marked "Commission's Exhibit No. 65 for identification" be included in the record; and the Commission also having directed that Respondent's Exhibit No. 23 for identification be included in the record; now,

In obedience to said order the Record Division of said Commission is this 17th day of March, 1943, directed by the Trial Examiner to physically mark the document previously marked "Commission's Exhibit No. 65 for identification" as "Respondent's Exhibit No. 111", and to include in the respondent's exhibit said documents numbered 23 and 111, respectively, as exhibits offered by respondent.

Room 859, Federal Building,
Detroit, Michigan.
March 10, 1941.

Met, pursuant to notice at 10:00 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

H. R. Hanley, Esq., 910 S. Michigan Avenue, Chicago, Illinois, on behalf of the Respondent.

2 PROCEEDINGS.

Trial Examiner Ballinger: The hearing pursuant to order of the Federal Trade Commission, Docket number 4389 in the matter of Standard Oil Company, is convened at 10:00 A. M. Eastern Standard time, March 10, 1941, in Room 859, Federal Building, Detroit, Michigan.

The reporter will note counsel for the Federal Trade Commission and Respondent present.

Anyone desiring a copy of the record, may obtain same by application to the reporter, who is not an employee of the Federal Trade Commission.

Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

P. A. RAUPAGH was thereupon called as a witness for the Commission, and having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Will you state your full name to the reporter, Mr. Raupagh?

A. P. A. Raupagh; R-a-u-p-a-g-h.

Q. What is your address?

A. Residence?

Q. You can state your residence address.

3 A. 1230 Bishop Road.

Q. In what business are you engaged?

A. In the oil business.

Q. That is pretty general. What is your actual position? I assume that you are with the Standard Oil Company?

A. Manager of the Standard Oil Company, Detroit division.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: May it be understood that the corporate name of the Respondent is Standard Oil Company; that the company is domiciled in the State of Indiana, and the name is usually written "Standard Oil Company (Indiana)".

Trial Examiner Ballinger: It may be so understood.

By Mr. Austin:

Q. Where is the main office of the Standard Oil Company located, Mr. Raupagh?

A. In Detroit, Michigan.

Q. Isn't your main office in Chicago?

A. The Standard Oil Company?

Q. Yes.

A. Chicago, yes.

Q. And what is the location of your Detroit office?

A: 1011 Fort Street, Detroit, Michigan.

Q. What territory does your division include?

A. It includes the territory north of Pontiac and over to Lansing, then down to Jackson, thence, down to the Ohio line.

Q. Is it entirely in Michigan?

A. Yes, sir.

Q. Can you state, generally, the nature of the business of the Standard Oil Company; not only in Detroit, but the general business?

A. General business is to handle and supply petroleum products and other allied products.

Q. How many refineries does the Standard Oil Company have?

A. Four or five.

Q. Do you know where they are located?

A. I don't know where they are all located.

Q. Do you know in how many states the Standard Oil Company does business?

A. About fourteen states.

Q. Are those chiefly in the middle west?

A. Yes, sir.

Q. Could you name them?

A. It would be quite a job to name them all. I think we would be glad to furnish them to you.

Q. Does it include Ohio?

A. No, sir.

Q. Indiana?

A. Yes, sir.

Q. Illinois?

A. Yes, sir.

Q. Michigan?

A. Yes, sir.

Q. And the other states more to the West or to the East?

A. To the West.

Q. Do you have a refinery at Whiting, Indiana?

A. Yes, sir.

Q. Do you have any other refineries in Indiana?

A. No, sir.

Q. Do you have a refinery in Michigan?

A. No, sir.

Q. Where does the oil come from that goes to the Whiting, Indiana refinery?

A. From the producing fields.

Q. Do you know what fields?

A. I couldn't say, definitely.

Q. Have you ever made a study of the sources of petroleum that is used by your company?

A. I don't know as I have ever made a study of it. I have heard, from time to time.

Q. Does it come from Texas or Pennsylvania, or where does it come from?

A. I think most of it ~~would~~ come from Texas.

Trial Examiner Ballinger: Off the record.

6 (There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: The fact is, that we will agree that crude oil, to supply the refineries of the Standard Oil Company comes from various sources, but primarily from what are known as mid-continent fields; Kansas, Oklahoma, Texas, and, to some extent, for a time, from Wyoming. That is not exclusive at all, but that is the primary source.

Trial Examiner Ballinger: That is not conclusive, of course, but that will answer the question.

By Mr. Austin:

Q. We will get a little closer home now, Mr. Raupagh, and we will start you out at Whiting, Indiana, and we will talk about gasoline. I would like to have you describe and trace the movement of gasoline from the Whiting Refinery to Detroit. Before you answer that, does all of the gasoline which is sold by Standard Oil Company in Detroit, come from Whiting, Indiana?

A. Yes; it has in the past.

Q. Well, will you then describe how the gasoline is shipped or transported from Whiting, Indiana to your marine terminal in Detroit?

A. It is transported by tankers from Whiting, Indiana, to our marine terminal in Detroit.

Mr. Hanley: Just by way of keeping the record
7 straight, is River Rouge regarded as part of Detroit?

The Witness: Yes, generally regarded as part of Detroit.

By Mr. Austin:

Q. River Rouge is in Michigan, anyway, isn't it?

A. Yes, sir.

Q. On the edge of Detroit?

A. Yes.

Q. Does all the gasoline come by tanker, by boat?

A. Yes, all of it comes by boat. There may be an exception occasionally on account of an emergency, when there is some shipped in by tank cars.

Q. By tank cars?

A. By tank cars; yes, sir.

Q. Do you ever operate any so-called truck-trains between Whiting and River Rouge?

A. No, sir.

Q. Do you have any pipeline transportation of oil into Michigan?

A. No, sir.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Is Whiting located on Lake Michigan?

8 A. Yes, sir.

Q. And that means that those boats have to go up through the Straits of Mackinaw and on down?

A. Yes, sir.

Q. Is that waterway open during the winter, generally?

A. No, sir.

Q. What do you do during the winter?

A. We have sufficient storage at our River Rouge terminal to last us during the winter.

Q. Now I am going to divert from the course of gasoline, as long as we have it at River Rouge. Before doing that, however, I might ask you as to the capacity of your tanks at River Rouge. You said you had large storage facilities there.

A. The capacity is about a million and a half barrels, barrels of the capacity of forty-two gallons.

Q. And how is that oil loaded from the tankers into your marine terminal?

A. By pumps.

Q. Is the marine terminal a magnified bulk plant, or is it a different sort of an animal! I am not familiar with the difference between a terminal and bulk plant except as to size, and I would like to know whether there is any other difference.

A. Well, I think it is a large bulk plant.

9 Q. And I suppose it has docks and facilities where the tankers can come up so that the oil can be pumped right out into the tanks?

A. Yes.

Q. How many retail gasoline stations are there in the Detroit area to which the Standard Oil Company sells gasoline?

A. We supply about 436.

Q. That is, includes Dearborn and Hamtramck and City of Detroit, and perhaps, other suburbs?

A. I would like to correct that answer, if I may.

Trial Examiner Ballinger: You may.

A. We supply about 336, and our jobbers supply about 106.

By Mr. Austin:

Q. Does that include the suburbs or the separate towns that are in the Detroit area?

A. It includes Hamtramck and Dearborn.

Q. Now, I was under the impression, from some of the statements that have been made, either in correspondence or the pleadings, that you had about 500 stations in the Detroit area; 450 to 500. Perhaps, that included your jobber stations, but I didn't so understand it.

A. That is the number that we have in the area.

Q. At the present time?

A. Yes, sir.

Q. Will you repeat that number again, please?

A. Three hundred thirty-six, and our jobbers have 106 stations.

10 Q. Does that 336 include contract stations and leased stations, both?

A. Yes.

Q. Is that a smaller number of stations than you had, say, two years ago, or is it larger?

A. Oh, it is about the same.

The Witness: You Honor, may I make another correction?

Trial Examiner Ballinger: You may.

The Witness: I think Highland Park should also be included in that area.

By Mr. Austin:

Q. How many out of 336 stations, how many of the properties are owned by the Standard Oil Company?

A. About 200.

Q. Those stations are then leased to the operators?

A. Yes, sir.

Q. That would leave 136 which are owned by the operator, or leased by him, from some other source?

A. Yes, sir.

Q. Does the Standard Oil Company lease any oil station properties?

A. Very few. You mean—

Q. Lease them, and then sub-lease them?

A. Yes, a few of them.

Q. How many, approximately?

11 A. Oh, eight or ten.

Q. Are the majority of those 200 leased stations stations which were owned and operated by Standard Oil Company prior to the inauguration of the Iowa Plan?

A. Yes, sir.

Q. When was that ownership ceased and stations begun to be operated on a leased basis?

A. May I consult a memo that I have?

Q. Yes.

A. (Referring to document.) September 10, 1936.

Q. That is the date upon which you abandoned operation of gasoline stations?

A. Yes, sir.

Q. You might explain, for the record, what you mean by the Iowa Plan.

A. It means that we discontinued the operation of service stations that we owned; I mean direct operation, and on the particular stations that we owned, we leased them out to dealers who then operated them. We assumed the status of landlord and tenant.

Q. And does the Iowa Plan, as it is generally referred to, mean a plan whereby the rental is based upon the gallonage consumed, or is that inherent in what is known as the Iowa Plan?

A. No, our gallonage is based both on a cash rental
12 and a gallonage rental.

Q. Do you know why that system of sub-leasing is called the Iowa Plan?

A. Well, it was first started in Iowa, I believe, as far as our company is concerned.

Q. Was that partially the result of chain store tax laws?

A. I don't know.

Mr. Hanley: If you know.

Mr. Austin: What?

Mr. Hanley: If you know.

The Witness: I don't know.

Mr. Austin: It is nothing important. I was under the impression that it was partially due to that, and partially due to social security taxes, and other things which might make a chain of stations rather burdensome to the company. Is that correct, Mr. Hanley?

The Witness: I don't know.

Mr. Hanley: In part it is. If it is important—

Mr. Austin: It is not important.

Mr. Hanley: —we can develop it for you. There were reasons in addition.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Austin:

Q. Do I understand, Mr. Raupagh, that the sta-
13 tions which are owned or where the properties are
owned or leased by Standard Oil, they are either leased or subleased to the operators and that there are written leases covering those stations?

A. Yes, sir.

Q. Can you state generally, but as clearly as possible, the method in which those leases are negotiated and the way that the amount of the rental is determined?

A. The amount of the rent is determined according to the valuation of the property or the valuation of the station, the business it does, its value as a service station.

Q. Is there, generally, a so-called flat rental, a certain amount per month?

A. Yes, sir.

Q. Plus a certain amount per gallon?

A. Yes, sir.

Q. On gasoline sold?

A. Yes, sir.

Trial Examiner Ballinger: And that applies to all of them?

The Witness: Yes, sir.

By Mr. Austin:

Q. How much is the rental per gallon?

A. It is generally a half cent per gallon.

Q. And does the flat rent vary?

14 A. Yes, sir.

Q. Does that vary according to the equipment in the station and the location?

A. Yes, sir.

Mr. Austin: I would like to have this paper marked for identification.

Trial Examiner Ballinger: The reporter will mark the paper Commission's Exhibit 1, for identification.

(That paper writings referred to were marked "Commission's Exhibit 1-A to 1-D," inclusive, for identification.)

By Mr. Austin:

Q. Mr. Raupagh, will you describe this paper marked Commission's Exhibit 1, and state what it is?

A. This is a lease covering the station located at 1715 Robinson Street, Detroit, Michigan, leased to Charles Dameron.

Q. Is that a typical lease between the Standard Oil Company and its Detroit stations?

A. Yes, sir.

Q. What is the flat rental per month in that lease?

A. $174.97.

Q. And the rental per gallon?

A. One half cent per gallon.

Q. Is that a rather high flat rental, or would that be lower than the others?

A. I think that is a rather high flat rental. It is a
15 very good station.

Mr. Austin: I offer this lease in evidence.

Trial Examiner Ballinger: Without objection?

Mr. Hanley: I have never seen it. May I look at it just a moment?

(The Exhibit referred to was handed to Mr. Hanley.)

Mr. Hanley: I haven't any objection to its reception.

Trial Examiner Ballinger: Without objection, Commission's Exhibit 1-A to and including D, for identification, is admitted in evidence.

(The lease referred to, heretofore marked for identification "COMMISSION'S EXHIBIT 1-A to D, inclusive," was received in evidence.)

By Mr. Austin:

Q. Now, you have about 136 stations, if I understood you correctly, that are not leased from the Standard Oil Company?

A. Yes, sir.

Q. What sort of an arrangement do you have with those stations?

A. We have regular contracts with those stations, gasoline contracts.

Q. I will show you this sheet and ask you whether that is one of the contracts to which you have just referred?

A. Yes, sir.

Q. Is that same form of contract used with all of your stations except the lessees?

16 A. Yes, sir.

Q. No variation?

A. The only variation may be as to the length of time that the contract is to be in effect.

Q. And what variation is there in that respect?

A. Well, a variation as to time.

Q. Well, I mean, how short or how long?

A. Well, they generally run for a year, but I think there are some that we have that run for a period of three years.

Q. Do you have any that run for less than a year?

A. No.

Q. After the end of the first year, though, isn't it true that they are then only renewed for six months periods, according to the terms of the contract?

A. Not this agreement, no, sir.

Q. Is that true in respect to the leases?

A. No.

Mr. Austin: I will offer this "Dealer's Agreement" in evidence.

Mr. Hanley: Off the record.

(A discussion ensued off the record.)

Mr. Hanley: I haven't any objection to the offer. I am wondering, however, what you regard their materiality to be, Mr. Austin. May I inquire as to that? Is there any issue on any of this kind of fact material?

17 Mr. Austin: No, but I think that the relationship between the company and the stations should be shown. I think it is material on the question of interstate commerce. As a matter of fact, I am introducing them on

that, and refer to them in the complaint upon that ground. I believe, in that paragraph.

Trial Examiner Ballinger: Without objection the document described by the witness is admitted in evidence as Commission's Exhibit 2.

(The paper referred to was marked "COMMISSION'S EXHIBIT 2" for identification, and was received in evidence.)

By Mr. Austin:

Q. Mr. Raupagh, I wish you would read this paragraph right here (indicating). You may wish to correct the statement you made about extensions of the leases.

Trial Examiner Ballinger: Handing witness—

Mr. Austin: Commission's Exhibit 1.

Trial Examiner Ballinger: —Commission's Exhibit 1-A through D.

A. No, I don't think I would correct that, Mr. Austin, because this paragraph simply refers to the proposition; if there is no renewal, then it automatically renews itself for a period of six months. That is the way—

Trial Examiner Ballinger: Describe the paragraph you referred to as "this paragraph." On page what? 18 What paragraph?

The Witness: Exhibit 1-B, paragraph 11. This paragraph refers to the extension of the lease. If there is no renewal made, the lease automatically extends for a period of six months.

By Mr. Austin:

Q. Well, that is what I intended to ask you a moment ago. Of course, if there is a new lease made, that would be a renewal, and that would be for a year, but ordinarily isn't it true that these leases run without any new lease being executed?

A. No.

Q. At the end of a year?

A. No.

Q. Then is it your practice to make out a new lease for the station at the end of each year?

A. Yes, sir.

Q. Rather than to permit the lease to continue under that renewal clause?

A. Yes, sir.

Q. So that most of your lease agreements run for a period of at least a year?

A. Yes, sir.

Trial Examiner Ballinger: The renewal clause is only operative for six months, is it not?

19 Mr. Austin: Well, as I understand it, if nothing is said at the end of the year and neither side cancels, it just goes on for periods of six months at a time, subject to cancellation by either party; but I understand Mr. Raupagh to say that the practice is to make out a new lease and not allow the extension to work automatically.

By Mr. Austin:

Q. Referring to the terms of the leases, Mr. Raupagh, I wish you would read over those last two paragraphs of this statement, and if what is there is correct, I would suggest, if it is agreeable to Mr. Hanley, that it be read into the record.

Mr. Austin: Off the record, if you please, a moment.

(A discussion ensued off the record.)

By Mr. Austin:

Q. Do you agree, Mr. Raupagh, that this statement which I am here showing you is a correct statement as to the reasons for a variation of rentals?

A. Just let me read that again, please.

Q. If so, I wish you would just read that statement to the reporter, just the last paragraph.

A. Yes, that is okay.

Q. Do you want to read that to him?

A. "On other service stations which do not have these comparable facilities, the cash rental is decreased proportionately with lesser facilities. We have a number of 20 stations which are leased, with no cash rental, but with a gallonage rental of one-half cent, which is our normal gallonage rent. However, we have stations purchased a number of years ago where traffic has been diverted, the neighborhood has been run down, and we are unable to obtain our normal rent, and in these cases we lease these properties for as low as one-tenth of a cent per gallon."

Q. By what method is gasoline sold and delivered to your retail outlets?

A. By tank delivery.

Q. Where do these tank trucks start?

A. They start at our bulk plants, located in Detroit.

Q. A while ago we only got the gasoline so far as River Rouge. I wish you would carry it along from there.

A. All right. From our terminal at River Rouge, we ship by tank cars or transport truck to our bulk station located in Detroit. From our bulk station—

Q. Just a moment. What do you mean by transport truck?

A. Well, I mean that we hire somebody that makes a business of transporting gasoline by transport truck or large truck, and they deliver it in that method to our bulk plants. From the bulk plants we deliver with our own trucks to our dealers.

Q. Then the shipments from the River Rouge terminal to your bulk plants are not handled by you; that is, you employ someone to do that for you?

21 A. They are handled by us, but we employ transport haulers just the same as we would employ a railroad to ship a car.

Q. How many bulk plants do you have in Detroit?

A. Six.

Q. Does all of the gasoline that goes to the retail service stations go through those bulk plants, or does some of it go direct from the River Rouge terminal to the service station?

A. Practically all of it goes through our bulk plants. I think there is a small portion that is routed direct from our River Rouge terminal.

Q. Why is it that you use the bulk plants as an intermediate place of storage? Why not load the tank trucks at River Rouge and go directly to the service stations?

A. Well, to cut down the distance of hauling with our trucks.

Q. In other words, do you find it is less expensive to operate the bulk plant and deliver from there than it would be to deliver it from River Rouge direct?

A. Well, that is kind of a—that is quite a question at the present time, which is most economical. We are studying that situation.

Q. I don't want to go into that cost, but I just want to get into the reasons which dictated your construction and operation of the bulk plant rather than the direct deliveries from River Rouge.

A. Well, the reason why is that it would be a
22 shorter haul to our dealers; we could give better service that way.

Q. It would be partially that, then, the shorter haul, in other words, would relate to the service as well as to the cost?

A. Yes, sir.

Q. Do you know whether some of the major oil companies deliver to their service stations direct from River Rouge without operation of bulk plants?

A. Of course, you don't mean that question the way you have stated it. Off the record. There are no other companies delivering out of River Rouge.

Q. Aren't there other marine terminals at River Rouge?

A. I believe there are. I believe you are correct.

Q. I thought there were.

A. I believe you are right.

Q. Well, I won't pursue that.

Trial Examiner Ballinger: Are you acquainted with those companies?

The Witness: Yes, sir.

Trial Examiner Ballinger: With their facilities at River Rouge?

The Witness: Yes, sir.

Trial Examiner Ballinger: Do you know whether they make delivery to the retail trade direct from River Rouge?

The Witness: I couldn't say definitely whether they
23 do or not, Your Honor.

By Mr. Austin:

Q. About what percentage of your deliveries are made direct from River Rouge and about what percentage from the bulk plants?

A. Why, I don't think that our deliveries from River Rouge would run—that is, deliveries from River Rouge to our dealers, would run over ten or fifteen percent at the present time.

Q. Will you state the location of your six bulk plants?

A. Yes, if you are willing to take the locations as we designate them. I haven't got the exact street address. I would be glad to furnish those.

Q. Do you know the intersection or whatever it is? You state them your way, and if it isn't sufficient, we will ask you for more.

A. Clay Avenue, Bellevue, Lycaste, Strathmoor, Scotten. There is one other; I just can't recall where it is located.

Mr. Hanley: I will find out for you, to save you time.

Mr. Austin: I think we might get a little better address on those.

Mr. Hanley: The other is north of Detroit.

The Witness: Yes, that is the North Detroit.

Mr. Hanley: We will get you the addresses.

24 Trial Examiner Ballinger: With the consent of counsel, if he will get them and let the reporter have them, he will insert them in the record at this point.

(A discussion ensued off the record.)

(The addresses furnished by counsel for the Respondent are as follows:

Bellevue Plant, 2945 Bellevue Avenue,
Clay Plant, 1545 Clay Avenue,
Lycaste Plant, 421 Lycaste Avenue,
North Detroit Plant, 8600 E. Seven Mile road,
Scotten Plant, 3450 Lovett Street,
Strathmoor Plant, 13895 Intervale Avenue.)

By Mr. Austin:

Q. Is gasoline delivered in the same way to your lessees as to your contract dealers?

A. Yes, sir.

Q. And when the gasoline gets to the bulk plant, is it loaded there into the tank trucks and taken direct to the service stations?

A. Yes, sir.

Q. And does the driver of the truck empty it right into the tank?

A. Yes, sir.

Q. At the service station?

A. Yes, sir.

Q. Right under the pump?

25 A. Yes.

Q. How are the needs of the various service stations known so that your driver knows when to call and how much to deliver?

A. Two ways: Many times the dealers will call up our bulk plant and order his gasoline. In some cases we know just about when he is out, and the driver makes his regular routes and calls and delivers the gasoline.

Q. Then I suppose the same driver—that is, each driver has a route?

A. Yes, sir.

Q. So that he calls on the same stations from day to day or from week to week?

A. Yes, generally so.

Q. And does he become familiar with the needs and the capacity of the various stations?

A. Very much so.

Q. That being true, isn't it in a majority of instances necessary for the station to call up and order or is that only when there has been an exceptional amount of business or something of that kind where the station needs something extra?

A. Oh I think that happens quite often, because it is pretty hard to know definitely just how long gasoline will last at their stations, and there is always a danger of running short.

Q. The drivers do, however, make periodical calls and try to keep stations supplied?

26 A. That is their duty.

Q. That applies to all of the 336 stations?

A. Yes, sir.

Q. What is the average delivery of gasoline to a certain station? I suppose there is a very wide variation on that, Mr. Raupagh?

A. Yes, there is.

Q. You might state what the minimum or maximum is. I suppose the maximum would be a tank truck ful?

A. Yes.

Q. How much does a tank truck hold?

A. All the ways from—the deliveries, I would say all the way from a couple of hundred gallons up to 1,500 gallons.

Q. Is the capacity of a tank truck 1,500 gallons?

A. We have some that capacity.

Q. You have others that are a thousand?

A. Yes, sir.

Q. What is the minimum delivery that you make?

A. I don't know as we have a definite minimum delivery, but I don't think any delivery could be less than a couple hundred gallons.

Q. About 200?

A. Yes, sir.

Q. Are the majority of deliveries between 500 and 1,000, or are they a thousand or over?

27 A. Oh, I would say the most of them are between 500 and 1,000.

Q. Is it nearer a thousand or nearer five hundred?

A. Well, I think you had better say 50-50. I would hate to say.

Q. That would bring your average somewhere around 700 or 800 gallons?

A. (Witness nods head affirmatively.)

Q. Does the Standard Oil Company own the six bulk plants?

A. Yes, sir.

Q. Does the Standard Oil Company own all of the tank trucks?

A. Yes, sir.

Q. That are used for delivery from the bulk plants?

A. Yes, sir.

Q. How long have these present bulk plants been operated by you?

A. I don't know the exact date that they were constructed, but I will say that they have been operated by us for over ten years?

Q. All six of them?

A. Yes.

Q. Then the newest one is at least ten years old?

A. Yes, sir.

Q. By what other method is gasoline sold by the Standard Oil Company in Detriot, other than by this retail delivery method?

28 Mr. Hanley: Just a moment. Are you referring to sales to re-sellers?

Mr. Austin: Yes, I am referring to sales to re-sellers at the moment.

Trial Examiner Ballinger: Is your question confined to the Standard Oil Company?

Mr. Austin: Yes.

By Mr. Austin:

Q. I want to know this: You sell gasoline other than through these bulk plants and tank trucks?

A. Yes, sir.

Q. So I want to know about tank car deliveries now, to be specific, and also whether there is other means?

A. There is no other means except either tank truck or tank car deliveries.

Q. How many customers do you have that take delivery by tank car?

A. We have four customers that we designate as jobbers, who take deliveries by tank car or transport truck.

Q. Will you distinguish between tank car and transport truck—

A. No.

Q. —method?

A. No, we don't.

Q. Well, there is a difference. I am asking you to tell me.

29 You said that they took delivery either by tank car or transport truck.

A. Well, what would you like to have me answer?

Q. I want to know—well, to go back, you said there were four customers, as I understood you, who took delivery by tank or transport truck?

A. Yes, sir.

Q. Who are those four customers?

A. Stikeman Oil Company, Ned's Auto Supply Company, Citrin-Kolb Oil Company, Wayne Oil Company.

Q. Tell me which of those purchases by tank car and which by transport truck.

A. At the present time we are making deliveries to all four of them by transport truck.

Trial Examiner Ballinger: What is the distinguishing difference between the two?

The Witness: Your Honor, the only distinguishing difference is that prior to, oh, I would say, about a year ago or less, we made all shipments to these jobbers by tank cars. Then there is in the oil industry what is known as transport truck haulers, people who have trucks that hold all the way from six to twelve thousand gallons, just the same capacity as a tank car, and they simply haul it over by that method rather than shipping it by tank car.

Trial Examiner Ballinger: ~~Is~~ that strictly within 30 the State of Michigan?

The Witness: Yes, sir, as far as we are concerned, it is, but that is done—

Trial Examiner Ballinger: Does any of that come across the State line?

The Witness: No, sir.

By Mr. Austin:

Q. Well, that gasoline is the Whiting, Indiana, gasoline that comes from River Rouge—that goes to River Rouge and then—

The Witness: May I make a further statement?

Trial Examiner Ballinger: You may.

The Witness: These transport haulers, I believe, have to file a schedule of rates just the same as a railroad company, and as far as we are concerned, it is just a convenience of getting the gasoline delivered to these jobbers over the tank car method.

Trial Examiner Ballinger: They load at River Rouge, do they?

The Witness: Yes, sir.

By Mr. Austin:

Q. Why did you shift from tank cars to tank trains?

A. More convenient to the customer, and I think a little lower rate, also.

Q. Are your deliveries now exclusively by tank train or still by tank car to some extent?

31 A. To these four customers?

Q. Yes.

A. We are delivering by truck train.

Q. Now, that truck train can go anywhere? It can go to a retail service station, can it?

A. It could, yes, providing the retail service station had the storage, and so on.

(A discussion ensued off the record.)

By Mr. Austin:

Q. Since you are making deliveries by tank train, Mr. Raupagh, it would not be necessary for a purchaser to operate a bulk plant, would it, in order to receive delivery in, say, 10,000 gallon lots? For instance, if he had a tank that large right at his service station, it would be feasible, would it not, to make delivery to him by tank truck?

A. Yes, sir, that would be feasible.

Q. What is the minimum delivery that you can make by this tank train?

A. Well, our policy, I believe, is 8,000 gallons as a minimum that we will deliver, but we do not make that kind of delivery to any station or re-seller.

Q. Well, that is your practice?

A. That is our policy, yes, sir.

Q. But there is no reason why you couldn't do it if you wanted to, is there?

32 A. No, none whatsoever.

Q. Where are the bulk plants of the four customers located? Have you got those addresses?

A. No, I haven't. I will be glad to furnish them to you. One is located at Brandon and Wyoming. There is two plants in that area, Wayne Oil Company and Ned's Auto Supply Company. That is in Dearborn, I believe, and—

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

33 A. Stikeman Oil Company is located on Waterman.

Q. I will ask you now if you can state the Citrin-Kolb Oil Company.

A. Lyndon and Livernois; Linwood and Detroit Terminal Railroad.

Q. Ned's just has one plant?

A. Yes, sir.

Q. That is in Dearborn, is it not?

A. Yes, sir.

Q. Do you have any contracts or agreements with these four buyers?

A. No, sir.

Q. What is the method of sale? Describe your method of sale and delivery to them.

A. Whenever they need gasoline or want gasoline they simply call us by telephone and order so many tank cars. I think that is the way it is generally designated, a tank car holding about 10,000 Gallons and we make the delivery from River Rouge Terminal directly to their terminal or their bulk plant. When I say "we make the delivery," we make it either by tank car or by transport haul.

Q. Do you deliver the gasoline into their bulk plant? For instance, on the transport truck does the operator of the transport truck or truck-train empty that gas or pump it into the plant?

34 A. Yes, sir.

Q. And on tank car deliveries?

A. Tank car deliveries, the railroad simply switches the tank car on their side track and it is up to them to unload it.

Q. So that there is a slight saving of expense to the buyer by tank train delivery, isn't there?

A. I believe there is, yes, sir.

Q. Is there any difference in the price charged per gallon for gasoline as between tank car delivery and tank train delivery at one time?

A. No, sir.

Q. Then, if there is any saving, as between the freight charge and the trucking charge, why, that is not deducted from the price?

A. No, sir.

Q. What sort of an agreement or understanding do you have with these four? You said you had no contract.

A. We have no contracts.

Q. You must have some basis under which you do business?

A. We sell them on our regular reseller tank car basis which generally, on house brand gasoline is a cent and a half off the posted tank wagon reseller house price.

Q. What do you mean by "reseller house price gas"?

A. I mean, standard Red Crown gasoline.

35 Q. And since you mentioned prices, what is the difference between the price of Solite Ethyl to the tank train or tank car buyer, and to the retail station?

A. I believe the price is $1\frac{3}{4}$ cents. That is, the price of Solite with Ethyl is $1\frac{3}{4}$ cents above Red Crown gasoline.

Q. Well, isn't it true that the price to a retail station of the Ethyl gasoline is one and a half cents above the tank wagon price on Red Crown, whereas the difference in the tank car price on the Ethyl and the regular is only a cent and a quarter?

A. I am under the impression it is $1\frac{3}{4}$ cents.

Q. Well, yes, but I am afraid that we may not be talking about the same thing. If I understand you correctly there is a $1\frac{3}{4}$ cent differential between the tank car and tank wagon price on the Ethyl.

A. Yes, sir.

Trial Examiner Ballinger: Is that correct?

The Witness: Yes, sir.

By Mr. Austin:

Q. And there is a $1\frac{1}{2}$ cent differential on the Red Crown between tank car and tank wagon buyer?

A. Yes, sir.

Q. But that increase of a quarter of a cent results from the fact that the tank car buyer only pays a cent and
36 a quarter more for his Ethyl, whereas the tank wagon buyer pays a cent and a half more?

A. I believe so.

Mr. Hanley: Do you understand that questioon?

The Witness: I don't believe so.

Trial Examiner Ballinger: Off the record.

(Discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Now, how about the Stanolind? Is that the third grade gasoline?

A. Yes, sir.

Q. And what is the differential there between tank car and tank wagon?

A. Generally one cent a gallon.

Q. How is your tank car price determined? It isn't always exactly a cent and a half off the tank wagon, is it, on the Red Crown?

A. No, it isn't. It depends on how low the market really is. I think there is some limit as to how low we would go. Just exactly the mechanics as to how it is determined, I don't believe I can answer that.

Q. Where is it determined? Do you determine it in your office?

A. No, we get instructions as to what our markets are.

37 Q. And where do the instructions come from?

A. They come from our main office in Chicago.

Q. And do the instructions as to the price of Red Crown also come from Chicago?

A. Yes, sir.

Q. And the Stanolind also?

A. Yes, sir.

Q. That is true both as to tank car and tank wagon prices?

A. Yes, sir.

Q. Are you familiar with the businesses in which these four tank car buyers are engaged?

A. Yes, sir.

Q. Do they resell this gasoline?

A. Yes.

Q. To whom do they resell it?

A. To their dealers and consumers.

Q. Do you know whether Ned's Auto Supply Company sells any gasoline to dealers?.

A. I don't believe they do.

Q. All their gasoline is resold through their own retail stations, is it not?

A. There might be one exception. I think they have a service station that is leased out; if that could be considered a sale to a dealer, that might be the exception.

38 Q. If there is one such instance, that would be a very small portion of the gasoline which they purchase, would it not?

A. Yes, sir.

Q. Has that one station been leased out only recently, do you know?

A. No, I think it has been for a number of years.

Q. Is that a small station?

A. It is, generally speaking, a good average station.

Q. Do you know how many outlets Ned's have that they operate themselves?

A. They have six.

Q. And this one you are speaking of was aside from that?

A. Yes.

Q. Does the Stikeman Oil Company operate any of its own retail stations?

A. None.

Q. Did it formerly?

A. If you go back far enough, why, they did; yes, sir.

Q. How far back?

A. (Referring to document) I can't answer that without looking it up.

Q. Do you know whether Citrin-Colb Oil Company operates a number of retail stations?

39 A. I think they operate a few of their retail stations.

Q. And do you have exact data on that as to the number or location?

A. Only what they have given us.

Q. Do they give you that information right along?

A. Not right along, but I think you requested it.

Q. I am not trying to go into this in detail at this time, but I want to find out whether you do have the information, as to the character of the business. And by that I mean information as to the character of the business of these tank car buyers. Do you make it your business to know whether they resell and to whom they resell?

A. No, sir.

Q. Then, do I understand that the character of the business of the purchaser isn't a qualification to be allowed to purchase in tank car quantities?

A. Will you state that question again, please?

Trial Examiner Ballinger: Read the question, please.

(The question was read.)

A. I think that is one of the qualifications.

By Mr. Austin:

Q. What; the nature of the business?

A. Well, you said the "character of the business."

40 Q. What must the character of the business be?

A. Well, he must have a bulk plant; he should have some established business; he should be able to purchase from a million to two million gallons a year.

Q. Why do you make that volume requirement?

A. I don't know of any particular reason excepting that for an individual or a concern to be a jobber there must be some volume involved, and that's what we consider as the proper volume.

Q. Does the jobber, to you, simply mean somebody who buys in certain quantities?

A. Who buys in certain quantities and performs a function of a jobber.

Q. What is your understanding—what is the function of a jobber?

A. First, that he buy in sufficient quantity.

Q. Is it necessary that he resell to other dealers?

A. No.

Trial Examiner Ballinger: Are there any other qualifications or requirements?

The Witness: Yes, your Honor. His credit, financial standing should be such that —

Trial Examiner Ballinger: Assuming that his financial standing is all right. It's really,—isn't really the only test as to whether or not he has storage facilities and

41 can buy in sufficient quantities?

The Witness: That is principally it.

Mr. Austin: I would like to have these documents marked for identification.

Trial Examiner Ballinger: The reporter will mark the papers referred to as Commission's Exhibits 3-A and 3-B, for identification.

(The documents referred to were marked, for identification, "Commission's Exhibit 3-A and 3-B.")

By Mr. Austin:

Q. Mr. Raupagh, I hand you these papers marked Commission's Exhibit 3-A and 3-B, for identification, and ask you to describe the contents.

1 A. Exhibit No. 3-A is a statement of dealer tank wagon prices; jobber tank car prices; prevailing retail prices of standard Red Crown gasoline from January 1, 1937, to March 1, 1941.

Exhibit 3-B is a statement of dealer tank wagon prices; jobber tank car prices; prevailing retail on Solite with Ethyl gasoline, from January 1, 1937, to March 1, 1941.

Q. What do you mean by "prevailing retail prices"?

A. I mean the prevailing prices posted by the majority of dealers handling major brand gasolines.

Q. Retail dealers?

42 A. Retail dealers, yes, sir.

Q. That is, other major brands as well as Standard Oil?

A. Yes, sir.

Mr. Austin: I offer these statements in evidence, your Honor.

Mr. Hanley: No objection.

Trial Examiner Ballinger: There being no objection, Commission's Exhibits 3-A and 3-B, for identification, are admitted in evidence.

(The documents referred to, heretofore marked, for identification, COMMISSION'S EXHIBITS 3-A and 3-B, were received in evidence.)

Mr. Austin: Your Honor, I have here a statement which was supplied by Mr. Hanley regarding posted retail prices of Red Crown and Solite Ethyl gasoline at retail service stations directly operated by the Stikeman Oil Company, from the period from January 1, 1937, to February 14, 1938.

I understand that counsel for the Respondent will stipulate that these go into the record, and since I am not planning to call a witness from this company, I think that the easiest way to dispose of this is to stipulate it now.

Trial Examiner Ballinger: Oughtn't the stipulation go a little further and have it in the record as being the
43 facts?

Mr. Hanley: I understand them to be the facts, your Honor, and I assume they are the facts. The information was supplied by Mr. Stikeman and we assume they are the facts and will be found by them.

Mr. Austin: I request that this be marked in evidence as Commission's Exhibit 4.

(The document referred to was marked, for identification, "Commission's Exhibit 4.")

Trial Examiner Ballinger: The reporter will mark the paper Commission's Exhibit 4 without objection and it is admitted in evidence, it being stipulated that the statements thereon appearing are true. Is that correct?

Mr. Hanley: That is right, your Honor.

Incidentally, that answers the question, I think, that Mr. Raupagh could not answer, as to the time of their stopping.

(The document referred to, heretofore marked, for identification, "COMMISSION'S EXHIBIT 4," was received in evidence.)

By Mr. Austin:

Q. I was just going to ask that. Mr. Raupagh, I would like to show you Commission's Exhibit 4. Does that help you to remember when the Stikeman Oil Company
44 ceased operating retail stations?

A. Since February 15, 1938, they have operated no retail stations.

Q. Are you positive of that?

A. Quite so.

Q. Do any of these tank car purchasers that we have referred to or, specifically, Citrin-Colb Oil Company and the Wayne Oil Company, do they file with you the prices at which they resell to their dealers?

A. No, sir.

Q. Do you keep any information on that at all?

A. No, sir.

Q. About how many tank trucks are owned and operated by the Standard Oil in Detroit?

A. About 60.

Q. Has the Standard Oil at any time furnished trucks to a tank car buyer for the purpose of delivering gas from the buyer's bulk plant to its service station?

A. I don't recall of a single instance.

Q. Has your company ever delivered gas for any of the tank car purchasers? I am referring now to deliveries either to their dealers or to their operated stations.

A. No.

Q. When you made delivery by tank car did you always deliver a full carload or is there sometimes a 45 half carload, or a quarter, or a partial carload delivery?

A. Always a full carload.

Q. Is the only variation, then, in the size of the car?

A. That's all.

Q. That is, if you have a 10,000 gallon tank car, you wouldn't deliver, say, 5,000 gallons?

A. No, sir; we haven't any such thing as a 5,000 gallon tank car.

Q. What is the smallest tank car?

A. About 8,000 gallons, as far as tank cars that are utilized for gasoline.

Q. And they run as high as what?

A. 12,000.

Q. Isn't it true that there are some tank cars that you have used for delivery here in Detroit as low as 6500 gallons?

A. There may have been some; but I don't recall any.

Mr. Austin: May I go off the record just for a moment?

Trial Examiner Ballinger: Off the record.

(Discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. How frequently, Mr. Raupagh, did your company make shipments by tank car from Whiting, Indiana, 46 refinery direct to any of these four tank car buyers?

A. I believe the last shipment was made in April, 1940, to Ned's Auto Supply Company, of some premium grade gasoline. The only time that we would make shipments of that kind would be a case of emergency, that we were out of some particular grade in the winter months, at River Rouge.

Q. Were there any other instances in 1940, direct shipments?

A. Not that I know of, sir.

Mr. Austin: If your Honor please, I would like to have these papers marked, for identification. There are about 10 of them all attached to one back, if they might be marked A to J?

Trial Examiner Ballinger: Do you want each paper marked as a separate exhibit, or do you desire them under one number with alphabetical designations?

Mr. Austin: I think that is probably preferable, to keep the number of exhibits down.

Trial Examiner Ballinger: The reporter will mark the papers Commission's Exhibits 5-A to 5-J, inclusive, for identification.

(The documents referred to were marked, for identification, "Commission's Exhibits 5-A to 5-J.")

By Mr. Austin:

47 Q. Mr. Raupagh, I hand you these sheets marked Commission's Exhibits 5-A to 5-J, inclusive, for identification, and ask you if you can describe them (handing documents to witness).

A. These are prepaid freight bills. Exhibit 5-A covers UTLX 16290 shipped from Whiting, Indiana, to Detroit, Michigan, Stikeman Oil Company.

Q. Are the others similar freight bills?

A. Yes, sir.

Q. Do they all represent or show shipments from Whiting, Indiana, direct to the purchaser in Michigan?

A. Yes, sir.

Q. And are all of them to one or the other of these four purchasers that we have been talking about?

A. Yes, sir.

Mr. Austin: I offer these freight bills in evidence, your Honor.

Trial Examiner Ballinger: Let Mr. Hanley examine them.

(The documents were handed to counsel.)

The Witness: I don't see any shipment there to the Wayne Oil Company, and I believe you mentioned four of them.

Mr. Austin: I asked, I think, if these were to one or the other of the four.

48 The Witness: Pardon me.

Mr. Hanley: No objection.

Trial Examiner Ballinger: There being no objection, Commission's Exhibits 5-A through 5-J, for identification, are admitted in evidence.

(The documents referred to, heretofore marked, for identification, "COMMISSION'S EXHIBITS 5-A to 5-J, inclusive," were received in evidence.)

By Mr. Austin:

Q. Mr. Raupagh, aside from these four concerns in Detroit, who have purchased by tank car and truck train from your River Rouge Terminal, have you made other deliveries in Michigan by tank car or truck train?

A. Yes, sir.

Q. Where do you have other purchasers located who purchase in that manner?

A. Ann Arbor, Lansing.

Q. Any others? Grand Rapids?

A. We, no doubt, have, but that is out of my district.

Q. In your district you sell by tank car in Ann Arbor and in Lansing?

A. Yes, sir.

Q. To whom? Purchasers in each one of those places?

A. One in Ann Arbor and two in Lansing.

Q. Do they get deliveries from the River Rouge Terminal?

49 A. Yes, sir.

Q. If there are any others up-state, where would they get their deliveries from?

A. Other marine terminals in Michigan, Ludington, and Bay City.

Q. Have there been any direct shipments from Whiting to the two purchasers in Lansing or the one in Ann Arbor?

A. I don't believe so. There may have been, but I don't know.

Q. How about the commercial accounts which you supply in the Detroit area such as, for instance, some of the large automobile companies? Do they receive their shipments from River Rouge, or does it come from Whiting direct?

A. It comes from River Rouge.

Q. All of it?

A. Yes, sir.

Q. Do you have occasional shipments to them direct from Whiting?

A. I don't remember any.

Q. Is there any customer in your territory to whom the company regularly ships by tank car direct, tank car or any other means directly from Whiting, Indiana?

A. I don't know of any.

Q. Well, you would know if there was, wouldn't you?

50 A. Yes, sir.

Mr. Austin: Your Honor, I suggest we might take a five minute recess.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: Take a five minute recess.

(A short recess was had.)

Trial Examiner Ballinger: Proceed.

By Mr. Austin:

Q. Mr. Raupagh, are you familiar with the reports issued by the Secretary of State, of Michigan, every four months, based upon the sales tax returns of licensed jobbers?

A. Would I be allowed to say something off the record?

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Austin:

Q. I show you this group of reports which appear to be dated from April, 1937, through November, 1940, and ask you to state whether those are the reports issued by the Secretary of State's office?

A. Yes, they are.

Q. Do those reports show the monthly gallonage of gasoline upon which the Michigan gasoline tax was

51 paid by licensed jobbers in Michigan?

A. Yes, sir.

Trial Examiner Ballinger: Those are reports submitted by the Standard Oil Company, are they?

Mr. Austin: No, your Honor. Those are reports issued by the Secretary of State's office, as I understand it, which show for all licensed jobbers of gasoline in the State of Michigan the monthly gallonage of those jobbers, and, if I understand correctly, they are based upon the gasoline tax returns of the jobbers.

By Mr. Austin:

Q. Is that right?

A. Yes, sir.

Mr. Austin: I would like to offer these in evidence.

Mr. Hanley: No objection.

Mr. Austin: These run from April, 1937, which covers gallonage from January, 1937, up through November, 1940.

Mr. Hanley: Which would cover gallonage up to July, 1940?

Mr. Austin: No. Up to and including November, 1940.

Mr. Hanley: I see.

Mr. Austin: Each one covers the month which appears on the report and the three preceding months.

52 Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: Without objection, the documents are admitted in evidence as Commission's Exhibits 6 to 17, both inclusive.

(The documents referred to were marked, for identification, "COMMISSION'S EXHIBITS 6 to 17," both inclusive, and were received in evidence.)

By Mr. Austin:

Q. Mr. Raupagh, in referring to the sales of gasoline by your company to retail gasoline stations in Detroit, is the price charged the same to all of the retail stations?

A. Yes, sir.

Q. Over what period has that been true?

A. The last three or four years.

Q. Isn't it true that from September, 1936, through February, 1938, Ned's Auto Supply Company received a ½ cent better price on tank wagon deliveries?

A. Yes, sir, that is true.

Q. Was this the only tank wagon buyer that received that half cent differential?

A. Yes, sir.

Q. Are the posted tank wagon prices of the major oil companies in a given area generally the same?

A. Please read the question.

53 (The question was read.)

A. Generally, yes.

Q. Has that been true in Detroit during the last three or four years?

A. Generally, yes.

Q. That is, if your tank wagon price is 8.1 cents, exclusive of taxes, Texas or Sun or Shell would be selling at that same price to their stations?

A. Not always.

Q. Well, you said generally it was true?

A. I said generally, yes.

Q. Is it true as to tank car prices?

A. No.

Q. Then, there is more variation between the tank car price than between the tank wagon prices of different companies or not?

A. I think there is.

Trial Examiner Ballinger: Do you know?

The Witness: There is no way for me to definitely know, your Honor.

By Mr. Austin:

Q. Do you know whether the tank car price of most of the major oil companies on their house brand gasoline is generally a cent and a half above the tank wagon price of the same company?

54 A. You mean below.

Q. Below, yes.

A. It is generally more than that.

Q. Do you know of specific instances of that?

A. Yes.

Q. Do you keep informed as to the tank wagon prices of other major oil companies?

A. As close as we can.

Q. Yes.

Trial Examiner Ballinger: Where do you get your information from?

The Witness: From the trade.

By Mr. Austin:

Q. If one of the major oil companies lowers its tank wagon-post tank wagon price, do the other major companies generally follow?

A. No.

Q. You stated that it has not always been true that the tank wagon prices are the same?

A. That is right.

Q. Can you tell me some cases when it has not been the same?

A. Yes. Particularly in 1939, there was a period there, I think, running from September and October, when our tank wagon prices were different than other companies.

55 Q. Was that during the so-called price war?

A. Well, you can term it that.

Trial Examiner Ballinger: What year was that?

The Witness: 1939.

By Mr. Austin:

Q. And that was only over a period of about four or five weeks, was it not?

A. That is right, that particular incident, but there have been other cases where other major companies don't have the same dealer price that we have.

Q. That would likely be only for a short period of time or may it continue over a long period of time?

A. Oh, that doesn't continue for a long period of time, because gasoline, being a product such as it is, I don't think that one major company could sell for a particularly lesser price than the other for any length of time.

Trial Examiner Ballinger: Has that ever occurred except in a price war period?

The Witness: Oh, yes; yes, it has, your Honor.

By Mr. Austin:

Q. But if one company lowers its price, then the others are likely to follow in order to meet that competition; are they not?

A. Yes, sir.

Q. Now, we have certain cases where the posted
56 tank wagon price has risen; for instance, on June 17, 1939, referring to Commission's Exhibit 3-A, it appears that the posted tank wagon price was increased from 7.6 to 8.1. Do you recall that?

A. Yes, sir.

Q. When that occurs, how is such a price rise accomplished? Before you answer that question, isn't it true that on that date all of the major oil companies in Detroit increased their tank wagon price, on or about that date?

A. No, sir.

Q. What happened then to the others?

A. Well, that is up to them. If they increase their price, that is up to them, but sometimes they don't increase their price.

Q. Don't you know as a fact that the prevailing tank wagon price in Detroit did increase from 7.6 to 8.1 about June 17th, 1939?

A. Yes.

Q. All I am trying to get at, Mr. Raupagh, is that service stations, retail service stations, whether they are operated—rather, whether they sell Standard Oil gas or some other major oil gas are generally paying the same price for their gasoline at a given time? I would like to know whether that is so?

A. I don't believe it is.

57 Q. A moment ago you said that generally the tank wagon posted prices were the same.

A. Yes.

Q. Do I understand you now to change that testimony?

A. No.

Q. Then perhaps I didn't understand you, but I wish you would explain that a little bit. I thought you just said now that the service stations were not generally paying the same price.

A. What I mean to say is that there are many jobbers in the Detroit area—there are many oil companies in the Detroit area who perhaps don't maintain the same price to their dealers.

Q. I was speaking of the major oil company stations:

A. Well, that would all—

Q. —served directly by the major oil companies.

A. Served directly by the major oil companies?

Q. Yes.

A. That is true.

Q. Those stations generally pay the same price?

A. Yes, sir.

Q. What is the present posted tank wagon price of Standard Oil?

A. Standard Red Crown gasoline?

Q. Yes.

58 A. Dealer tank wagon price; is that what you mean?

Q. Yes.

A. 8.1 cents per gallon, without taxes.

Q. Are you selling or delivering to any retail purchasers in Detroit at the present time at any lower price than 8.1?

A. No.

Q. Do you have a customer known as Marvin Service?

A. No, sir.

Q. Marvin Goldberg?

A. No, sir.

Q. Are you familiar with that chain of stations?

A. Yes, sir.

Q. Who do they buy their gasoline from?

A. Let me change—can I change that testimony, your Honor?

Trial Examiner Ballinger: You may.

A. We have such a customer; yes, sir.

Q. They buy in tank wagon quantities?

A. Yes, sir.

Q. Do they lease their stations from you?

A. Yes, sir; that is, they lease two stations from us.

Q. Do they have other stations?

A. Yes, sir.

Q. And has all gasoline that you have sold that customer in the last year been sold at 8.1 cents per gallon, Red Crown?

A. It has been sold on the regular reseller tank
59 wagon basis.

Q. Well, that exhibit shows the 8.1 price going back to November 18, 1939.

A. Yes, sir. Yes, sir, sold at that price.

Q. Do you know the terms of your leases to the two stations which you say that you lease to Marvin Goldberg?

A. Not in detail.

Q. Could you obtain that information or obtain copies of those leases?

A. I would be glad to.

Q. Has your company ever paid any rebates to any retail service stations in Detroit?

A. No, sir.

Q. Have there ever been any delayed discounts or refunds or any other concessions from the posted tank wagon price?

A. No, sir.

Q. With the exception of—

A. Ned's Auto.

Q. The one-half cent to Ned's?

A. Yes, sir.

Q. While we are on this subject, will you describe what is meant by posted tank wagon price?

A. We mean by a posted tank wagon price the price that we are charging our dealers for tank wagon de-

60 livery or tank truck deliveries, and we post that price at our bulk plants, and also in the office.

Q. Is that custom of posting the tank wagon price one which is common to the major oil companies?

A. Yes, sir.

Q. That price is generally posted at the terminal or bulk plant from which the gasoline is delivered to service stations?

A. Yes, sir.

Q. What is the purpose of that posting?

A. Well, there is generally no secret about our business, so we just let anybody know what we are charging for our gasoline.

Q. Is that so all the stations can have a means of knowing at any time what the price is?

A. Yes.

Q. Any other reason for it?

A. Not particularly.

Q. Now, I understand you to say that the prices which are stated on Commission's Exhibit No. 3-A and B are exclusive of taxes?

A. May I see the exhibit?

Q. Certainly (handing exhibit referred to to the witness).

A. Yes, sir.

Q. What are the taxes on gasoline which are col-
61 lected in this area?

A. 3 cents gasoline highway tax, a cent and a half federal tax, and a 3% sales tax.

Q. The gasoline highway tax is the state tax?

A. Yes, sir.

Q. How long has the federal tax been a cent and a half?

A. I don't exactly recall that date. I don't believe I have it?

Mr. Austin: May it be stipulated that that is from July 1, 1940?

Mr. Hanley: If you know that is the fact.

Mr. Austin: I am pretty sure of it.

Mr. Hanley: All right.

Trial Examiner Ballinger: It is so stipulated.

By Mr. Austin:

Q. Prior to that time what was the federal tax, Mr. Raupagh?

A. 1 cent.

Trial Examiner Ballinger: Is that 3% sales tax? Not 3 cents on the gallon?

The Witness: It is a 3% sales tax.

By Mr. Austin:

Q. On what is that sales tax computed?

A. It is computed on the retail price.

Q. Well, now, is that so, Mr. Raupagh?

62 A. I guess not.

Q. Isn't it computed on the retail price less the sales tax and the Michigan State 3 cent tax? In other words, it is computed upon the price shown here plus the 1-½ cent or 1 cent federal tax?

A. There has been quite an argument on that. I would appreciate it if you would let me look that up and give you the correct answer on that.

Q. Well, I was just trying to hurry it. I don't want to state what it is, because it is only hearsay, as far as I am concerned.

Trial Examiner Ballinger: If it becomes material, we ought to have something definite.

Mr. Hanley: We will look it up.

Mr. Austin: Off the record?

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Can you state how those taxes are paid, Mr. Raupagh?

A. They are paid by the dealer or seller. He pays them direct to the State.

Q. That is a pretty broad statement. I think we had better itemize it. In the first place, the federal tax: who pays that?

63 A. We pay the Federal tax.

Q. Is the Federal tax added onto the price of the gasoline, as shown by this schedule, both to retailer buyers and to the tank car buyers?

A. I would have to look that up, to be sure; just exactly what our billing is on that.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. If you are not entirely familiar with that, Mr. Raupagh, I would like to get a statement of it accurately without attempting to suggest what it is, because I might be in error, although I think I understand it, and perhaps we had better postpone that.

A. We would be very glad to furnish you with a statement showing exactly how it is invoiced. Is that what you want to know?

Q. I want to know how it is computed, in the first place, and, in the second place, how it is paid; that is, how much is paid by you, how much is paid by the tank car buyer, in the case of the sale to him, and how much is paid by the retailer; both in direct sales by you and of the tank car buyer.

A. I will be glad to furnish that information.

64 Q. I think several of these gentlemen in the room probably have that at their finger tips, and can probably help you out during the lunch hour.

Mr. Austin: I think this might be a good time to adjourn for lunch, your Honor, and then we can take up this tax matter when we come back.

Trial Examiner Ballinger: Is that submitted in the form of a motion?

Mr. Austin: Yes.

Trial Examiner Ballinger: The motion is granted.

Now, at 1 P. M., the hearing stands adjourned to be reconvened at 2:15 P. M.

(Thereupon at 1 o'clock P. M., an adjournment was taken to reconvene at 2:15 o'clock P. M.)

65 Afternoon Session.

2:15 P. M.

Trial Examiner Ballinger: We are now reconvened at 2:15 P. M.

Mr. Hanley: If your Honor please, before the noon adjournment, at Mr. Austin's request, we undertook to get some facts relative to the application of taxes to the sale of gasoline. At this time I am prepared to offer at this time a stipulation for the record, if you will listen to this, please, Mr. Austin.

The Respondent is prepared to agree that in the State of Michigan there are three types of taxes applicable to the sale of gasoline.

First, a Michigan State Highway gasoline tax of 3 cents per gallon applicable to all gasoline, naphthas, or any other motor fuel used for the propulsion of motor vehicles on the public highways, and also for use in airplanes and motor boats. This tax is paid to the State of Michigan by licensed wholesale distributors on all receipts of gasoline and naphtha into the State of Michigan and on the sales of any other products that may be used as a motor fuel. This tax is passed on by the wholesale distributor through the retail vendors to the ultimate consumer.

Secondly, the Michigan General Sales Tax: this
66 is a 3% tax imposed upon sales of tangible personal
property sold at retail and including gasoline and sold in the state to consumers or users. The amount of the tax payable is determined by application of the 3% rate on all taxable sales during each calendar month. The following items under this tax are non-taxable: Michigan State Highway Gasoline Tax, Federal Excise Tax is non-taxable only to the manufacturer. The retailer must pay the Michigan sales tax of 3% on the Federal Excise Tax. This tax is payable to the State of Michigan by the retailer who is licensed under the Act and who passes this tax on to the ultimate consumer.

Thirdly, Federal Excise tax: the Federal Excise Tax on gasoline prior to July 1, 1940, was at the rate of 1 cent per gallon. Since July 1, 1940, the rate has been 1½ cents per gallon. This is a tax on all sales of gasoline and naptha and is paid to the Federal Government by the manufacturer who, in turn, passes it on to the ultimate consumer.

Each of the four dealers, to-wit, Stikeman Oil Company, Wayne Oil Company, Citrin-Colb Oil Company, and Red's Auto Supply Company are licensed wholesale distributors in the State of Michigan, and as such make their own accounting of the Michigan State Highway Gasoline Tax to the taxing authorities of Michigan.

67 The Michigan General Sales Tax being collectible by the retailer of gasoline, it being obligatory upon him to make an accounting therefor to the taxing authorities, therefore, in each instance where a retailer sells gasoline at retail he makes the accounting for the 3% sales tax thereon to the taxing authorities of the State of Michigan.

The Federal Excise Tax being a tax upon the manufacturer is billed by the supplier, the Standard Oil Company, in this instance, to its reseller customers, whether they be tank car customers or tank wagon customers, and the Standard Oil Company makes the accounting for such tax to the United States Department of Internal Revenue.

Trial Examiner Ballinger: Is the statement of counsel for the Respondent accepted by counsel for the Commission as a true portrayal of the facts?

Mr. Austin: Yes.

Mr. Hanley: Now, you asked, Mr. Austin, for the lease which—

Mr. Austin: Two stations operated by Marvin Goldberg.

Mr. Hanley: They are not operated by Marvin Goldberg. I find we have one leased to Marvin Goldberg and one to Lester Goldberg, who, I understand, is his brother. Here are the leases.

(Thereupon counsel for the Respondent handed
68 counsel for the Commission the leases with the two
Goldbergs.)

P. A. RAUPAGH thereupon resumed the stand, and having been heretofore duly sworn, testified further as follows:

Direct Examination (Resumed).

By Mr. Austin:

Q. Mr. Raupagh, are these the original leases now in existence with a station operated by Lester Goldberg at 1217 West Philadelphia Avenue, Detroit, and Marvin Goldberg at 3003 Fullerton Avenue, Detroit?

A. Yes, sir.

Q. I note that both of these leases expired in December of 1940.

A. Yes, sir.

Q. And there are renewal slips extending them, with some modification of terms, to April, 1941. I believe the Marvin Goldberg lease was extended to April 8th and the other to April 29th.

What was the reason for that?

Trial Examiner Ballinger: Is that correct?

The Witness: Yes, sir.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

69 Trial Examiner Ballinger: On the record.

A. The reason for that extension is that we like to have our leases expire about the same time during the year.

By Mr. Austin:

Q. Do you mean that the majority of your leases expire in April now?

A. Yes.

Q. Have you recently tried to change the terms of the leases so that would result?

A. Yes, sir.

Q. Is that a new policy?

A. Comparatively new.

Q. Why was the minimum rental on these two leases reduced on this extension?

A. Well, I assume that we couldn't get the rental that we originally had, and the value of the station had perhaps changed.

Trial Examiner Ballinger: Is that merely a presumption on your part, or have you any knowledge of the facts?

The Witness: I have knowledge of that fact, your Honor.

By Mr. Austin:

Q. What is that knowledge based on?

A. At the time we made the extension on that lease.

70 Q. Is that what they told you or what—

A. That is what they told me, yes.

Q. Do you have any figures on the amount or number of gallons they sold in 1939 and in 1940?

A. The figures were considered at that time.

Q. Do you have those figures?

A. I haven't them with me.

Q. As to the gallonage?

A. We have them in our office.

Q. Do you have the gallonage records of all of the stations that you serve?

A. Yes, sir.

Q. As to the number of gallons that they sell, that is based on the gasoline they purchase from you, I suppose?

A. Yes, sir.

Mr. Austin: If it wouldn't be too much of a burden, I would like to have in connection with these leases a statement of the gallonage records for 1939 and 1940 of these two stations.

Mr. Hanley: If your Honor please, we have no objection at all to furnishing them, and we will do so, at the request of Mr. Austin, but if this thing is material as to how this specific lease or how any lease with any of these 300 or 200 odd leases in Detroit are arranged as to terms, then it is going to involve quite a voluminous presen-
71 tation of facts, because just as a matter of mechanics in handling this thing every year, because there are some leases expiring in every year, an analysis is made of each of the stations upon which a lease may be expiring, and various factors are given consideration; as, for instance, the investment, the location of the service station, the amount of gallonage that the station is capable of handling and has handled, the general competitive situation in the area, what it is worth from a rental standpoint. So gallonage, while it is a factor, is not the sole factor. I don't understand the materiality of this.

Trial Examiner Ballinger: I presume you would include in that classification everything that would naturally fall within what is commonly known as goodwill, wouldn't you?

Mr. Hainley: Right, all of those factors.

You see, your Honor, the fact is in this filling station leasing business, by the very physical nature of a filling station it is peculiarly adapted to the sale of petroleum products. It is not like a store room in a downtown building that may be adaptable to numerous occupancies. Its value as a business location is largely determined by its value just as a filling station, how much business in petroleum products can be done through it. Now, that is one factor, and another is the amount of investment, the 72 amount of carrying cost, the potentialities: if a new highway is going through, or if a highway has been diverted. All of those factors influence the amount of rental that can be obtained.

Frankly, I don't know what the materiality is. We are perfectly willing to disclose the factors that resulted in this determination if they are regarded as material.

Mr. Austin: I don't think they are. I don't care about all the factors. I am only interested in showing any current reductions to this particular station.

If your Honor please, upon examining these more closely, I see that there is no change in the flat rental and no change in the gallonage. The only change is in the minimum rental in the case where the gallonage falls below a certain amount, and that being true, I think I will not press the request for that information, because I doubt if anything would be accomplished that would be material. I don't think these leases show any particular change.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Counsel has withdrawn the request.

Mr. Austin: I offer Commission's Exhibit 18, a lease from Standard Oil Company to Marvin Goldberg, 73 3003 Fullerton Avenue, Detroit, flat rental, monthly, 138.78, and minimum 203; Exhibit 19, a lease from Standard Oil to Lester Goldberg, Davison and Indiandale Avenue, Detroit, Michigan, flat rental, 44.85, minimum, 104.

(The documents referred to were marked, for identification, "Commission's Exhibits 18 and 19.")

Mr. Hanley: I would like to note a record objection to the materiality, if I may have it, please.

Mr. Austin: Those are offered because of the fact it is important to bring out whether any retail service stations are obtaining any price concessions against any other retail stations served by this company.

Trial Examiner Ballinger: You think this forms any part of a link—

Mr. Austin: I think if the station was receiving—for instance, getting rent free while other stations of similar facilities were paying a higher rental, that would be the same thing as a rebate on price. I am not insinuating or inferring that that is the case, but as long as I did make inquiry about this particular station, I would like to have the lease in evidence so that it will be possible to determine whether that station is receiving any advantage.

Trial Examiner Ballinger: The objection is overruled,
with right reserved to counsel for the Respondent,
74 before the case is closed, to renew the motion.

(The documents referred to, heretofore marked, for identification, "COMMISSION'S EXHIBITS 18 and 19," were received in evidence.)

Mr. Austin: Will you mark this, for identification, Mr. Reporter?

(The document referred to was marked, for identification, "Commission's Exhibit 20.")

By Mr. Austin:

Q. Mr. Raupagh, I show you Commission's Exhibit No. 20, for identification, and I will ask you to tell me what this contains. If you will just look at these top two sheets and tell me what each one of them is, then you can state whether the rest of the file is not the same sort of material.

A. These are invoices. The first one that I see here is to Citrin-Colb Company, Detroit, Michigan, showing a shipment of a tank car of gasoline from our River Rouge Terminal to Citrin and Colb Company, located at 14445 Linwood Avenue, Detroit, Michigan. The next sheet is an acknowledgment of the order.

Q. An acknowledgment by whom?

A. By us.

Q. And to whom is the acknowledgment addressed?

A. This particular copy is addressed to Mr. Amos 75 Ball, General Manager.

Trial Examiner Ballinger: When you said "us" you meant Standard Oil?

The Witness: Yes, sir.

By Mr. Austin:

Q. How many copies of that acknowledgment are made out, in the usual practice?

A. I believe two. I am not positive of that, though.

Q. Well, is the acknowledgment a verification of the invoice?

A. That is it.

Q. And made from the invoice?

A. Yes.

Mr. Austin: Mr. Hanley, are you willing now to stipulate that this file marked Commission's Exhibit 20, for identification, is a bound volume containing invoices and acknowledgments as just described by Mr. Raupagh showing sales of Standard Ethyl Gasoline, Standard Red Crown Gasoline and Standard Stanolind Gasoline to Citrin-Colb, Ned's Auto Supply Company, Stikeman Oil Company, and Wayne Oil Company, the invoices covering sales at each price charged from the period, November 3, 1937, to December 31, 1939, it being my understanding that while these are not all the invoices of all sales made, that there is an invoice here showing a sale at each price so that 76 whenever there was a price change this list shows the date of the price change and the first and last sales at each price? And I would like to say that I am requesting this stipulation only for the purpose of possibly introducing some of these particular invoices later, and I would like to reserve the right to do that, but I do not intend to offer the entire group in evidence. This stipulation is requested solely for the purpose of identification so that any one of these may be offered at a later date.

Trial Examiner Ballinger. Let your reservation carry through to the close of the case.

Mr. Austin: Yes.

Mr. Hanley: Upon the representation of counsel for the Commission that certain invoices and acknowledgments of orders, as reflected in the bound volume now referred to, were supplied to the Commission by the Standard Oil Company, the Respondent stipulates that such invoices and

acknowledgments of orders are either authentic original documents or accurate copies of such Standard Oil Company documents: that it is understood that said Standard Oil Company documents—said volume does not purport to contain invoices or copies thereof of all of the orders and counsel for the Respondent is unfamiliar with the fact of whether or not said invoices disclose all of the price changes that may have occurred during the dates
77 which counsel for the Commission says are covered in the volume, but as to any of the original documents or copies that do appear in the volume, the Respondent makes no issue as to authenticity thereof. There are certain documents in the volume which appear to be notations made by someone reflecting a date and what would seem to be a price per gallon of gasoline. With respect to these memoranda Respondent has no information and makes no agreement.

The last reservation as to this stipulation was made because counsel for the Respondent is without present knowledge as to the origin of the memoranda referred to. It is not to be understood that any question is now being raised by counsel for the Respondent as to the authenticity of any of the documents and are perfectly willing that the same be checked as to accuracy at any stage of the proceeding and used if found by all parties to be an accurate reflection of any fact which the document purports to reflect.

Mr. Austin: I am satisfied with that. I think that is a sufficient identification of what we have here, and if there are certain sheets in here I may want to offer in evidence, we can talk about them then, and they will save trouble going back to find out what they are, in case Mr. Raupagh might not be here.

Trial Examiner Ballinger: Are there any further
78 questions with this witness?

Mr. Austin: Yes, I have some further questions.

By Mr. Austin:

Q. Mr. Raupagh, showing you again Commission's Exhibits 3-A and 3-B, I want to be sure that we have one point clear on the record, and that is whether, to determine the cost of gasoline to the station, service station who buys direct from you, is it necessary to add on all three of the taxes which we have discussed to these figures in the first column on these exhibits (handing documents to witness)?

A. No, not all three of them.
Q. Well, the State tax has to be added, doesn't it?
A. Yes, sir.
Q. And the Federal tax?
A. Yes, sir.
Q. And the sales tax, while it is collected by the service station, it is paid by the service station to the state, is it not?
A. Yes, sir.
Q. So that the collection of the sales tax does not involve any return to the service station, does it?
A. No, sir.
Q. Then, would it not be correct to say that all three taxes should be deducted to determine the service station's margin for operation?
79 A. Yes, sir.
Q. That's what I wanted to be clear about.
What other customers in the Detroit area, or in your territory, purchase from the Standard Oil Company in tank car quantities?
A. You mean reseller customers?
Q. Well, no. In this case, we will include commercial accounts. I don't want you to give me names, but are there other customers?
A. Yes, many of them.
Q. And they buy direct from you?
A. Yes, sir.
Q. Do any of those customers resell any of the gas which they buy?
A. Not that I know of.
Q. Are some of those customers automobile companies?
A. Yes, sir.
Q. Are some of them trucking companies?
A. Yes, sir.
Q. Have you ever made any effort to find out whether or not they resell any of the gas that they use?
A. No, sir.
Q. That they buy?
A. No, sir.
Q. Then, if they resold part of that gas to their
80 employees, would you have any means of knowing it?
A. No.
Mr. Hanley: May I inquire if that is an issue at all?
Mr. Austin: It would be in issue, if there were resales.

They would be in a position to retail it. Very material, I think.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record. I want you to understand when I say "Off the record," it is by mutual consent.

Mr. Hanley: I understand.

Trial Examiner Ballinger: If counsel advise the Examiner they desire it on the record, I shall consider it.

By Mr. Austin:

Q. What is the price at which you sell Standard Red Crown gasoline to your commercial buyers in tank car or tank train quantities?

A. The regular consumer tank car price.

Q. You mean the same price that is charged to these four buyers that we have been talking about?

A. No, sir.

Q. Is it a lower price or higher price?

A. At present, it is a lower price. Sometimes it is a higher price.

Q. What is the difference between Red Crown gasoline and White Red Crown?

A. One contains lead and is colored and the other is the natural product, and the specifications are entirely different. They are two different products.

Q. And a different amount of lead?

A. No. One has no lead.

Q. The White Red Crown has no lead?

A. That's right.

Q. That is used only by commercial consumers?

A. No.

Q. Who uses it?

A. We sell some to the Ford Motor Car Company.

Q. That is a consumer, isn't it?

A. Yes, sir.

Q. I just wondered if you sell any to anybody except commercial accounts.

A. If we do, they are very, very few exceptions.

Q. Is it used at all by—well, do truck companies use it?

A. No.

Q. The private car owner doesn't ever see it, does he?

A. No.

Q. I don't want to get into that too far, but I never
heard of that until the other day I saw it in one of
82 these cases, and if it is the same grade and quality of
gasoline, I would like to know it; and if it isn't, I
would like to know it.

A. Well, it isn't the same gasoline.

Q. Obviously, if it has no lead, it wouldn't be.

A. And obviously it can't be the same quality, either.

Q. Does the octane rating of gasoline depend upon the amount of lead in it?

A. Yes, sir.

Q. Tetra-ethyl lead is what we are referring to, I suppose, when we say "lead"?

A. Yes, sir.

Q. Is there any of that in Stanolind?

A. Yes, sir.

Q. And a larger amount in Red Crown?

A. I can't say as to that. There may be the same amount in either one, and it may be a different octane. It all depends upon the base, although that is used in order to determine the octane you want to secure.

Q. What is the octane rating of Red Crown?

A. I think it runs about 75 A. S. T. M., and by that I mean that is the method used in testing the octane.

Q. A. S. T. M.?

A. Yes, sir.

Q. I am not going to ask you what that stands for.

83 Trial Examiner Ballinger: The Examiner would like to know.

The Witness: It is The American Society of Testing Materials.

By Mr. Austin:

Q. What is the octane rating on the Solite Ethyl?

A. It runs about 78, 79 A. S. T. M.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Mr. Raupagh, have any other Standard Oil gasoline dealers, referring now to operators of retail stations, applied to you for permission to buy in tank car quantities or by tank train?

A. Oh, from time to time they talk about it, Mr. Austin, but I don't remember any of them that are properly equipped to handle it, according to our policy, that have applied.

Mr. Austin: I move that the latter part of the answer be stricken as being unresponsive.

Mr. Hanley: We will agree.

Trial Examiner Ballinger: The motion is granted. Read the last question.

(The question was read.)

Trial Examiner Ballinger: I will sustain the mo-
84 tion to the entire answer.

The Witness: Now may I have the question?

(The question was read.)

By Mr. Austin:

Q. Yes or no?

A. Not within the past year.

Q. Prior to that?

A. Yes, I think prior to that they have.

Q. Did you grant any of those requests?

A. No.

Trial Examiner Ballinger: You may explain your answer, if you desire.

Mr. Austin: Well, your Honor, I think the reasons for that might be brought out on cross-examination better, if it is desired to bring them out, although I will go somewhat farther with it.

By Mr. Austin:

Q. Did some of those requests come from groups of retailers who stated that they would rent a bulk plant if they could get tank car deliveries, and then deliver their gasoline to their own stations?

A. I don't recall of having such a request since 1936.

Q. Didn't you have, along in 1938, around the 1st of 1938, a request from certain groups of dealers to purchase on tank car?

85 A. No.

Q. Well, were these requests in 1938 by groups or by some individuals?

A. Well, I recall that prior to 1936 there was some individuals that made a request of that kind. However, they were not equipped with storage or anything, and even their credit responsibility wasn't of the best.

Mr. Austin: I move to strike out that last, beginning with "however."

Mr. Hanley: We resist that motion, your Honor. That is responsive.

Mr. Austin: Would you mind reading the question and the answer?

(Question and answer were read.)

Mr. Austin: The latter part is not responsive. The question was whether it was by group or by individuals.

Trial Examiner Ballinger: Do you object to the motion?

Mr. Hanley: I will withdraw the objection, your Honor.

Trial Examiner Ballinger: The latter portion—if you will read the answer, I will tell you where to strike it.

(The answer was read.)

Trial Examiner Ballinger: Commencing with "however," strike the rest of it.

86 Mr. Austin: It is objectionable as a conclusion and a lot of other things, if the objection were made from the other side. I certainly don't want it to go in on my questioning.

By Mr. Austin:

Q. Mr. Raupagh, do you recall testifying in the Recorder's Court in the City of Detroit, before the Assistant Prosecuting Attorney, Ralph Garber, in a case pending between the People and the Standard Oil Company, in 1938?

A. Yes, sir.

Q. I would like to show you this paper and ask you to read this and see whether it will refresh your recollection upon the subject we are discussing. Then I will ask you further questions.

Trial Examiner Ballinger: What year was the testimony given in that case?

Mr. Austin: In August, 1938, your Honor, and it referred to the period from, I think, February until July, 1938—March 1st, 1938, to July 29, 1938.

A. I remember that testimony.

By Mr. Austin:

Q. I ask you again, Mr. Raupagh, whether you had any requests from other dealers to be allowed to buy on a tank car basis since 1936.

A. There may have been some, but I can't recall
87 now who they were.

Q. Didn't you testify in that proceeding that there had been such requests?

A. Yes.

Q. And it is a fact, then, isn't it?

A. Yes, sir, if I testified that way, that is a fact.

Q. Did you testify that you didn't grant any of those requests?

A. Yes, sir.

Q. And that is still true?

A. Yes, sir.

Trial Examiner Ballinger: Did he state in his testimony when the requests had been made?

By Mr. Austin:

Q. Did your testimony in that case refer to the year 1938?

Mr. Hanley: Do you want to look at it?

(A transcript was handed to the witness by Mr. Hanley.)

A. This request refers to the period of March 1st, 1938, to July 29th, 1938. There may have been someone at that particular time that made a request, but I couldn't recall who it is now.

By Mr. Au~~stin~~:

Q. I didn't ask you who it was, but upon thinking
88 it over, do you remember whether it was a group or whether it was an individual?

A. I couldn't say, Mr. Austin.

Q. Don't you remember that there were a number of dealers spoke to you about that?

~~A. No.~~

Q. Around that same time?

A. No.

Q. Did Mr. Blough tell you that any of them spoke to him about it?

A. No, sir.

Q. Would you mind turning to page 191 of that document that you have there before you before I ask this next question, toward the lower part of the page and the top of page 192.

A. (Witness does as requested.)

Q. If a dealer obtained permission from you or from some other company to purchase oil by tank car or tank train and he needed a bulk plant for that purpose, would it be difficult for him to obtain bulk plant facilities?

Mr. Hanley: That is objected to for the reason that it calls for a conclusion and opinion of the witness as to what some other oil company would do, and it is not a matter within the knowledge of this witness, and apparently incapable of being within his knowledge.

89 Mr. Austin: If I may repeat the question, I am not asking what any other oil company would do. The question may be restated in this way:

Q. Are bulk plant facilities easy to obtain or are they difficult to obtain in the Detroit area? Before you answer that, I will ask you whether you know the situation as to bulk plant facilities in Detroit?

A. Yes, I think I do.

Q. And are such facilities available?

A. I don't think they are. I don't think there are any bulk plants available at the present time. However, I am frank to say that if anybody has the money, they could build one.

Q. Are they expensive to—I will have to withdraw that. That would depend upon what kind of a plant you built and a lot of other things and where you built it.

Is there any shortage of storage facilities for oil in Detroit?

A. Well, that depends on the individual companies. I don't hardly see how I could answer that.

Q. Do you know whether there are not a number of companies in Detroit that will receive oil in tank car lots and deliver it for a price, and some of them may be jobbers and some of them may be only trucking companies?

Isn't there a certain amount of that business done in 90 Detroit?

Trial Examiner Ballinger: You mean receive it and store it?

Mr. Austin: Receive it, take it out of the tank car, and deliver it to the service station in a truck.

A. I only know of one such arrangement.

Q. You only know of one company that will store oil?

A. Yes, sir.

Q. Which company is that?

A. Peerless Distributing Company.

Q. Didn't you tell Mr. Garber in 1938 that at that time there would be no difficulty getting storage for oil or gasoline if a man could buy in tank car lots?

A. Why, I don't think there is any difficulty today if he has got the money to build himself a plant.

Q. Well, I suppose a man could build himself a plant, but let me ask you again whether you didn't state at that time that there would be no difficulty in obtaining bulk plant facilities, storage facilities?

A. Maybe there were vacancies at that time.

Q. You think there were more vacancies then than there are now?

A. I don't know of any right now.

Q. When you stated to Mr. Carber that there would be
no difficulty in the service station operator acquiring
91 storage facilities, were you referring to the current
situation then as to existing storage facilities, or were
you talking about whether he could build them?

A. Both.

Mr. Hanley: Would you mind directing him to the question and the answer, Mr. Austin, please?

Mr. Austin: The question and answer?

Mr. Hanley: Yes, that you are referring to.

Mr. Austin: Well, the bottom of 191 and the top of 192, but he already read those, I think.

Trial Examiner Ballinger: If the witness desires to see a transcript of his testimony to which you make reference, he may do so.

By Mr. Austin:

Q. To what were you referring at that time?

A. Both.

Q. He could either rent the storage space or he could build it?

A. Yes, sir.

Q. Are you familiar with locations in Detroit where it is possible to deliver gasoline on a railroad spur?

A. I am familiar with some.

Q. Either in Detroit or Dearborn or some place in the Detroit area?

A. (Witness nods head affirmatively.)

92 Q. How is the real estate value of those places? Is it very high or not?

A. Well, I will say it runs all the way from very low to very high.

Q. Well, I suppose that some of it in the middle of the Ford Motor plant might be worth something?

A. That is right, sir.

Trial Examiner Ballinger: That answer is very, very definite and certain.

By Mr. Austin:

Q. Well, the question is that there are some that are very low?

Trial Examiner Ballinger: What may be considered low out here in Detroit may be very high somewhere else.

By Mr. Austin:

Q. Well, to get to the point, Mr. Raupaugh, will you say it is possible for a man to build a bulk plant, I mean within the means that might be available to any group of service station operators, who, between them, handled enough volume to buy in a tank car quantity?

A. Again, that is so indefinite—

Q. That is very indefinite.

A. —I question whether I could answer that, Mr. Austin.

Q. I assumed that when you said a man could build a bulk plant, you weren't talking about something that no
93 service station operator or group of operators could
ever expect to do.

A. Well, it all depends on how much money they have got and what kind of a plant they want to build and where they want to build it.

Q. Do you think at least there is a chance they might be able to rent the facilities now, though?

A. I wouldn't know where they would rent any facilities right now.

Q. You said you know of one company that is in that business.

A. One company that is in that business.

Trial Examiner Ballinger: Mr. Austin, I would like to know wherein this is material to the case.

Mr. Austin: I think it has some materiality, your Honor, to show that there are only certain retailers—in fact, only one retailer, and that is Ned's Auto Supply Company, that is getting tank car volume, and that is not available, even though it be requested by other competing retailers, who would like to have the same and its advantages.

Trial Examiner Ballinger: These competing retailers, are they shown to have been similar circumstanced and situated?

Mr. Austin: I can't bring that out from Mr. Ran-
94 pagh, but I expect to bring that out further, possibly,
by some of the men who made the requests.

Trial Examiner Ballinger: This thing of indulging in conjecture doesn't seem to me to be material.

Mr. Austin: Well, one of the arguments is that a man has to have storage space before he can become a tank car buyer. I am simply trying to show now that he could get the storage space if he could get the permission from the Standard Oil to buy at that basis. In other words, the obstacle to his getting a tank car buy is not because he can't get storage space; it is because he can't get the deal with the Standard Oil.

Trial Examiner Ballinger: Is it your contention that if they would have gotten a price from Standard Oil, they could have put in their own tankage?

Mr. Austin: Or rent it.

Trial Examiner Ballinger: Or rent it?

Mr. Austin: Yes. As I understand now, Mr. Raupagh said, at least, in 1938, when these requests were made, they could have rented.

Mr. Hanley: If your Honor please, it seems that it is
immaterial on at least two grounds that are pertinent here:
in the first place, if there were any bona fide efforts on the
part of individuals or groups, and that has not been
shown, which individuals or groups were comparable
95 to Ned's Auto Supply Company or any of the other
jobber buyers supplied by Standard Oil Company, and
had the Standard Oil Company sold to that applicant, it would merely have aggravated a situation which the Commission is already asserting here was illegal, and two wrongs wouldn't make a right. If the custom and practice being indulged in by the Standard Oil Company and by other companies, practically all of them in this area and elsewhere in the United States, is wrong, that fact is not going to be corrected in the illegality, if any, and that practice is not going to be alleviated by increasing that type of operation.

Secondly, it has not been shown, and it cannot be shown, that there was any applicant who made any application to the Standard Oil Company who was circumstanced as was Ned's or any of these other jobbers. And in addition

to all of that, your Honor, if the purpose here is to prove that it would be easy for retailers to supply themselves with storage, I haven't any hesitancy in saying right now that so far as this Respondent is concerned, they would have to supply themselves at their own expense, either by purchasing or building or renting that storage. They would have to maintain it; they would have to have their own distribution outlet; they would have to buy and maintain their own inventories; and they would have to be able
96 to finance that operation.

But I will say further, your Honor, and I think it is true, and I think we will establish it, that if it is merely the purpose of the Commission here to show that it was easy for certain filling station operators to get storage, I think they are quite right. They couldn't get it from this Respondent, but I think they could get some storage probably for nothing from some suppliers in this area. But they couldn't get it from this company. All we have to say about this is—and I think the witness has repeatedly said it—certainly a man can buy oil tanks if he has the money, and that is all there is in this testimony so far.

Mr. Austin: I wasn't talking about getting storage from Standard Oil, and the storage has nothing to do with it. You buy it, as I understand it, first, and then you store it. But also I don't think it is at all material as to whether a man should have a tank car buy as to whether he is buying as Ned's or whether he has the same gallonage. Maybe the little fellow would like to get it, too, if he can buy one of these 10,000 gallon carloads once a month. But I don't want to go into that any farther now.

Trial Examiner Ballinger: Mr. Austin, what is confusing the Examiner is this: if you could prove what you apparently are now attempting to prove, wouldn't it
97 merely be an aggravation of an unlawful situation? Your contention is that it was unlawful, is it not?

Mr. Austin: Well, there has to be a certain background in these cases, your Honor, and it is a little early to attempt to make any argument on some of these facts, but there are a lot of things in this case such as the defense of good faith to meet competition, which is not part of my case, but when you get into what is good faith and what isn't and how many customers get a deal and how many don't, and whether it is offered a lot of them, a lot of things may be material in the ultimate consideration of the whole case.

By Mr. Austin:

Q. Mr. Raupagh, talking about the gasoline business generally and the volume of the gas business in Detroit, and not as to commercial business but as to business done through the gasoline station, the retail gasoline station, speaking of the volume of the retail gasoline business as a whole, upon what does that depend; that is, the amount?

A. It depends on the amount of automobiles in use.

Q. It depends almost entirely on that, does it not?

A. Yes, sir.

Q. Is the volume of that retail gasoline business more or less constant?

A. I would say yes.

98 Q. That is, would you say what fluctuations there are are chiefly as perhaps the number of cars in use may vary slightly from year to year?

A. Yes, sir.

Q. Then, if that is true, isn't it also true that if one dealer increases his business, that he takes that business away from other dealers?

A. Well, he takes it or he gets it somewhere.

Q. It isn't possible for a dealer to create new business, is it, by advertising or salesmanship like a man who sells carpet sweepers or Fuller brushes can go out and by pushing his product he will get somebody to buy it that hasn't thought about buying? That isn't true in the gasoline business, is it?

A. Of course, the number of cars are increasing. I mean by that, take a given population and the number of cars used by that population increases and has increased in the last two years.

Q. Isn't it true, then, that about the only new business is the new car owner who hasn't owned a car before?

A. Or if they drive more, as you stated, or other services, if that is what you mean, that they can render.

Q. Well, you mean if a dealer renders other services?

A. Yes; he increases his business.

Q. But he takes that business away from somebody

99 else, doesn't he?

A. Well, I assume so.

100 Q. That is, if I had a car, I either have a car or I don't, and if I have it, I am going to buy gasoline for it.

A. If you use it.

Q. And within any limitation within which we have been in the last seven or eight years, certainly the highest and lowest prices for gasoline, the variation—I would like to ask you whether the variation has been sufficient to make anybody quit using a car that had one? In other words, you would have to have a very high price or a very low price to affect the amount of use to any very great extent, would you not?

Mr. Hanley: I think, if Your Honor please, I will object to this line of examination. It has become argumentative and asks for a conclusion of the witness, and we can establish it by showing the public consumption of gasoline, and we propose to do that.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: There is a question that is not answered, and I would like to withdraw it. I agree it is too long, anyway, to be of any use.

Trial Examiner Ballinger: The question is withdrawn.

The Examiner inquires of Respondent whether the Respondent in its answer does not concede competition, but contend only that the competition is in intrastate and 101 not in interstate commerce?

Mr. Hanley: First, Your Honor, it is the position of the Respondent that the commerce in gasoline engaged in by the Respondent in Detroit and complained of in the Commission's complaint, is commerce which is intrastate in character, and it is our position that the Commission has no jurisdiction of the parties or the subject matter in this particular proceeding, but argue now if the Commission should take the position that there are factors in this commerce, which, in the Commission's view either constituted interstate in character, or which, in the view of the Commission, give the Commission jurisdiction to deal with that commerce, then it is the position of the Respondent, first, that the Respondent had a right to classify and select customers to the extent that the Respondent has done so.

Secondly—and irrespective of the last named defense, that the Respondent was justified on the basis of bona fidedly meeting competition in all that it did, and is now doing in the matter of giving differentials in price as between retail re-sellers and the four dealers whose operations are being questioned.

Thirdly, and in addition to the foregoing defenses, and
in spite of them, that the Respondent is justified in making
the prices to these different jobbers and making the differ-
entials that were made by reason of the fact that such
102 differentials make only due allowance for the differ-
ence in the cost of method of sale and delivery in
handling the business. Then, in addition to all of those
defenses, it is asserted by the Respondent that whatever
competitive effect may be sustained by commerce—passing
for the moment whether it is intra or interstate—but what-
ever the effect on whatever gasoline commerce may arise
out of the character of the operations of the Respondent,
that that effect does not tend to create a monopoly, restrain
trade, or injure anyone in his competition. That is to say,
it is so small a factor in the overall picture in Detroit as
to not give rise to any impropriety under the law or any
violation of the anti-trust group of statutes.

Now, to answer Your Honor's question specifically:
namely, as to whether it is the insistence of the Respondent
that the competition which we admit exists technically and
theoretically is in interstate or intrastate commerce: We
say, of course, consistently with all our defense, that any
competition that we have anything to do with in Detroit,
as alleged in the complaint, is in intrastate as distinguished
from interstate commerce, and we do admit that just tech-
nically a service station dealer to whom we sell gasoline
tank wagon is technically and theoretically in competition
with a service station which may be directly operated or
supplied by one of these jobbers to whom we also sell gaso-
line in Detroit, but we say two things, Your Honor, that:
first, that competition is intrastate in character, that
103 commerce is intrastate in character, and the Commis-
sion is without jurisdiction, and; secondly, whether the
Commission has jurisdiction or not, whether it is in intra-
state or interstate commerce, that it doesn't have the effect
of injuring competition or restraining trade.

Trial Examiner Ballinger: Do you admit that the competition existing in the Detroit area is substantial?

Mr. Hanley: No, I don't think we care to admit, Your Honor, that it is substantial enough so that on the overall picture of the gasoline business in Detroit, that it has the effect as alleged in the complaint, of injuring gasoline commerce in Detroit. In explanation of that, perhaps, I should say at this time—so that the Court may not mis-

understand my position at all—it is a fact, and we propose to establish that there are a great number of service stations in Detroit which have been increasing in numbers over the past several years, which are continuously, and have been continuously underselling the prevailing retail gasoline market from something over one cent up to five cents a gallon, and they are selling a gasoline which is claimed to be comparable, at least, to ours, and I understand claim to be comparable to any major brand gasoline, and that the jobber business in Detroit has increased principally by these low or cut-rate operators, as they are commonly referred to in the industry; that their business has increased to a point where they are doing a very,
very substantial amount. I don't want to bind myself
104 irrevocably to figures. We will introduce them in
Exhibit form, but in my mind half of the business is done now by operators of a character who are continuously increasing their business and selling at a figure below the prevailing market, which, if these jobbers used all of their margin, couldn't possibly meet, so we say that the real competition in this Detroit picture on depressing of prices doesn't come from the kind of operation in which we are engaged. We just frankly confess we haven't met that kind of competition, and are not in a position to meet it on our present price structures and certainly our customers are not, so we say we don't injure competition in Detroit. Indeed, we say that competition has run pretty wild in Detroit; constantly on the increase.

Trial Examiner Ballinger: Proceed.

By Mr. Austin:

Q. Mr. Raupagh, what is the most important factor in obtaining retail gasoline business?

A. To have a good quality gasoline, and to advertise it; to create a demand for it.

Q. How about price?

A. Price is also a factor.

Q. Wouldn't you say price was the most important thing with the consuming public? Let me restrict that question to major brands.

A. Not entirely.

105 Trial Examiner Ballinger: He didn't ask you
whether it was entirely. Read that question.

(The question was read.)

A. No, I wouldn't say so.

By Mr. Austin:

Q. What is more important?

A. Good quality and good advertising.

Q. Well, aren't all of the major brands considered by the public to be of substantially the same grade and quality?

A. I hope not, because we claim ours is the best.

Mr. Austin: Will you read the question, Mr. Reporter?

(The question was read.)

A. No, I don't think so.

Q. What do you mean by the term "identification advertising?"

A. I mean that particular advertising that we furnish to a dealer; namely, a product identification sign, "Standard Service," that we erect wherever a dealer sells our products.

Q. And are there other things?

A. In regard to gasoline, now?

Q. Yes; globes on the pumps?

A. Globes on the pumps; road maps, circulars about the product.

Q. Are all of those things that you named as found in the service station, or as exhibited in the service station, the property of the Standard Oil Company?

106 A. Yes; with, perhaps, the exception of the maps or the circulars. If we give that to a dealer, why, it is his, to give out.

Q. The signs are your property?

A. Yes, sir.

Q. The globes are your property?

A. Yes; sir.

Q. Can you remove them from a service station at any time?

A. Yes, I think we can.

Q. Those signs and brand labels, and so forth, are of value to the service station, are they not?

A. Yes, sir.

Q. If they were removed, what effect would that have upon his business?

A. Well, it might not have such good effect on his business.

Q. Isn't it true that a lot of people drive into a Standard station because they see the Standard sign?

A. Yes.

Q. And think they can rely on Standard gasoline?

A. Yes, sir.

Q. And if those signs were taken down, the man would lose a lot of his trade, would he not?

A. Yes, I think he would.

Mr. Hanley: May I inquire the purpose of this examination, Mr. Austin? Again, are you just inquiring, or do you assert we ever do that?

107 Mr. Austin: I haven't asserted in any particular case it was done. I simply showed the ability to do it. The ownership of that particular equipment and the ability to remove it.

Trial Examiner Ballinger: You are establishing an opportunity?

Mr. Austin: Right; and presumably the service station operator knows that that opportunity exists.

By Mr. Austin:

Q. Have you or your office ever had occasion to suggest to one of your jobber accounts, not including Ned's as a jobber account, that the jobber resell to a retail dealer at less than the posted tank wagon price?

A. No.

Q. Have you ever suggested to one of your jobbers that they take over a station which was previously served by you direct?

A. Oh, I think that has happened.

Q. Can you tell me of a particular case?

A. No, I can't, offhand.

Q. How recently has that happened?

A. Well, I am thinking of sometimes we might get on bad terms with a dealer for credit reasons, or some other reasons, and the jobber is willing to take him on. I think that has happened in the past.

108 Q. Can you recall any particular station?

A. I can't, offhand, no.

Q. When any such station was taken over by a jobber, was the price to the station ever reduced by the jobber below what you had been selling the station for?

A. I assume he would be sold on the regular dealer tank wagon basis.

Q. You never made any suggestions to the contrary?

A. No, sir.

Q. In connection with Red Crown and Ethyl and Stanolind, in what percentages are those gasolines sold at retail in Detroit?

A. Stanolind would be about three or four per cent. Ethyl would run about seven to ten per cent, and the balance would be Red Crown.

Q. Red Crown would be close to ninety per cent, then?

A. That's right.

Q. Do you allow cash discounts; by "you" I mean the Standard Oil Company?

A. In some cases.

Q. What cases?

A. I believe a sale of ten cars.

Q. Is there any cash discount to the service station?

A. No.

Q. And what is the cash discount allowed on a tank car buy?

109 A. I believe it is one per cent, if paid within ten days.

Q. One per cent in ten days?

A. Yes.

Q. That would be shown on these invoices, would it not (referring to Commission's Exhibit 20, for identification)?

A. Yes.

Mr. Austin: I think that's all I have. May I request a short recess prior to the cross examination?

Trial Examiner Ballinger: Is it agreeable to the counsel for Respondent?

Mr. Hanley: Surely.

Trial Examiner Ballinger: We will take a recess for five minutes.

(A short recess was taken.)

110 Trial Examiner Ballinger: Come to order.

Mr. Hanley: May I proceed?

Trial Examiner Ballinger: Proceed with cross examination.

Cross-Examination.

By Mr. Hanley:

Q. Mr. Raupagh, I wish you would please briefly give the Court a summary of the facts relative to when you began working the oil industry, whom you worked for, where, and in what capacity—just briefly.

A. I was employed by the Standard Oil Company of Indiana on June 4, 1904, at Minneapolis, and worked there until October 1, 1907, in a clerical capacity in the sales office. From October 1, 1907, to September 1, 1909, I was city salesman in the City of Minneapolis. From September 1, 1909, to January 1, 1914, I was country or rural salesman out of the Minneapolis division office. From January 1, 1914 to January 1, 1916, I was assistant chief clerk of the Minneapolis office, a post similar to office manager. On January 1, 1915, to January 1, 1923, I was assistant manager of the Fargo, North Dakota sales division. From January 1, 1923 to December 10, 1923, I was assistant manager of Chicago sales division. From December 10, 1923, to December 3, 1929, I was manager of the Milwaukee, Wisconsin sales division. From December 3, 1929, to date, manager of the Detroit division, Standard Oil Company.

111 Q. So that since 1904, you have been connected in one capacity or another with the marketing department of the Standard Oil Company?

A. Yes.

Q. And since 1929, your connection has been that of division manager here in Detroit?

A. Yes, sir.

Q. Continuously. Now, Mr. Raupagh, I want to ask you briefly about some of the things that were touched upon in your examination in chief.

Mr. Hanley: I will say to the Court and counsel that I do not propose to go into the affirmative defense at this time, but I want to clarify some of these matters, and I will want to go into the interstate commerce feature rather fully. Otherwise, we will defer our examination until our own case in chief.

By Mr. Hanley:

Q. You were questioned about the so-called Iowa Plan, Mr. Raupagh. Did there come a time in the history of the Standard Oil Company when that company entirely withdrew from direct retail operation of service stations?

A. Yes, sir.

Q. Throughout the entire territory?

A. Yes, sir.

Q. Is that the policy that has come to be called sometimes the Iowa Plan?

112 A. Yes, sir.

Q. I believe you stated that withdrawal occurred in the Detroit area on September 10, 1936. Is that in accord with your recollection?

A. Yes, sir.

Q. Now, up until that time, was it or was it not customary for the Standard Oil Company to quote a retail service station price for gasoline?

A. Yes, sir.

Q. And that, as I understand it, was the price at which gasoline was sold by the Standard Oil Company at retail in its own directly operated stations?

A. Yes, sir.

Q. Now, at that time, did the company also post a dealer's tank wagon price?

A. Yes, sir.

Q. At that time where was the dealer's tank wagon price posted?

A. At the bulk plant, at the office.

Q. Was that a public posting, Mr. Raupagh?

A. Yes, sir.

Q. Anybody could ascertain what that posting was?

A. Yes, sir.

Mr. Austin: Pardon me. What was the other price 113 that you referred to before?

Mr. Hanley: The retail price. I am going to ask him where that was posted.

By Mr. Hanley:

Q. Where was the retail gasoline price posted, as long as you posted them?

A. It was posted at our service stations and at the office.

Q. So that that was a public posting, and anyone could ascertain what it was?

A. Yes, sir.

Mr. Austin: Was that just while you were operating your own stations?

Mr. Hanley: That is right.

By Mr. Hanley:

Q. Has the company ever posted a retail gasoline price, service station price, in Detroit, since September 10, 1936?

A. No, sir.

Q. Have you continued in the same manner to publicly post dealer tank wagon prices?

A. Yes, sir.

Q. And that custom is in use right today, is it not?

A. Yes, sir.

Q. Mr. Rampagh, you were examined at some length relative to the type of arrangements you had with dealers to whom the company leased service stations, and the relations with dealers who had their own stations or 114 leased from someone other than the company. Do you recall those questions?

A. Yes, sir.

Q. So far as a dealer is concerned, who leases from the Standard Oil Company, is there any contract or arrangement between the company and that dealer, other than the lease?

A. No.

Q. You were shown the Commission's Exhibit 2 this morning, which is a contract for the sale of gasoline. Do you recall that?

A. Yes, sir.

Q. With what dealers is that contract used?

A. That contract is used with dealers other than dealers to whom we lease our stations.

Q. Mr. Rampagh, does it make any difference at all into which category a customer, a retail dealer falls, insofar as the price is concerned, which he is charged for his gasoline?

A. No.

Q. What is that price in reference to the posted price?

A. The regular posted tank wagon re-seller price.

Q. Are there any distinguishing characteristics at all between a lessee and a dealer who owns his own station, so far as the dealings between that dealer and the Standard Oil Company are concerned, beyond the single relationship of landlord and tenant in the instance of the lessee?

115 A. No.

Q. You were shown this morning Commission's Exhibit 1-A, which was a lease on a station to sell Dameron. Do you remember that Exhibit?

A. Yes, sir.

Q. Do you recall that you said that the rental on that lease was, in your judgment, higher than the ordinary service station?

A. Yes, sir.

Q. And that the gasoline rental was one-half cent in addition to the flat rent?

A. Yes, sir.

Q. I call your attention to a statement, the last paragraph of which you read into the record, in answer to a question by Mr. Austin, and I will ask you if the station to which you were referring there and contrasting with other stations, was the station referred to in Commission's Exhibit 1-A? If you will just read that, you will understand what I mean.

A. I wish you would repeat that question.

Mr. Hanley: Will you read the question?

Trial Examiner Ballinger: Read the question, Mr. Reporter.

(The question was read.)

By Mr. Hanley:

Q. That is the Dameron station?

A. Well, the latter part of this paragraph cannot 116 be construed as to mean a station such as we mean is comparable to the Dameron station.

Q. That is what I am trying to get at. Mr. Raupagh, isn't it a fact that the rental both as to the cash and to the amount per gallon of gasoline is arranged differently for each one of the stations which you lease in Detroit?

A. Yes, sir.

Q. And of the two hundred odd stations, which the Standard Oil Company leases, or in connection with all of those stations, is it or is it not a fact that each year an analysis is made of those individual stations, with a view to determining a proper and fair rental?

A. Yes, sir.

Q. I wish you would please give the Court, as completely as you can, a clear picture of what elements, and all the elements that are considered in arriving at the rental, that you ask for at any given station?

A. We take into consideration the value of the real estate, and also the value of the improvements. We take into consideration what the station is worth as a service station, and the gallonage that it does, getting at the point what the station is actually worth from a rental standpoint. We have to do this because there are changes in highways, or there are other factors which increase the value of a station. For instance, a station may be located

out quite a ways, and for a number of years there
117 has been no development in the way of building
residences in that particular neighborhood. Then the development starts and a considerable number of residences are constructed, which adds to the value of the station. We are also confronted with the fact that we have a number of stations yearly, which we consider cats and dogs because the neighborhood has gone down to such an extent that the value has decreased to such an extent that we are lucky if we can rent it for one-tenth of a cent a gallon, or if we can rent it at all. As a matter of fact, we have a number of service stations that we have been obliged to close, that we can't rent at the present time on account of those factors.

Trial Examiner Ballinger: Isn't the controlling factor what the station has been producing?

The Witness: I believe so, Your Honor, because unless that station was manned, perhaps, by an operator who wasn't efficient, and that determines to a great extent the value of the station, what it can produce.

By Mr. Hanley:

Q. Do you have the experience sometimes, Mr. Raupagh, of a station which represents a large investment, I mean a large cost to the company, sometimes being a much poorer producer and unable to command as much rent as some other station which represents a considerably lesser investment in cost?

A. We have that situation quite frequently in
118 Detroit, on account of real estate values at one time
being very, very high.

Q. I am not sure whether you mentioned it or not, but does the re-routing or building of through highways and heavy traffic highways have any bearing on the productivity of service stations, and if so, please explain what it is?

A. I would say it does have a bearing, and it makes a station more productive. We feel that if we can get a combination of a good highway with lots of travel and a good neighborhood—if we can get that combination, that makes the best type of service station for us.

Trial Examiner Ballinger: Doesn't that have an important bearing?

The Witness: Yes, sir.

By Mr. Hanley:

Q. Now, is there not a continuous state of flux in the relative productivity of these service stations from year to year?

A. Yes, sir.

Q. When you make your yearly analysis for the purpose of making leases on the individual stations, do you take into consideration all of those factors, Mr. Raupagh, every year?

A. Yes, sir.

Q. And is it not a fact that from year to year the rental which you set upon different individual stations will
119 materially change?

A. Yes, sir.

Mr. Austin: Are you referring now to flat rent or gallonage?

Mr. Hanley: Both.

By Mr. Hanley:

Q. I am referring, Mr. Raupagh, to flat cash rental and gallonage rental, and either one and both.

A. Yes, sir.

Q. And the total of the two.

A. Yes.

Q. When you undertake to determine the rental which you will ask for a station, do you have any element of gasoline price involved at all? Do you take that into consideration at all?

A. No.

Q. Is it not true in respect of all of these leased-out stations, no matter if the rental has changed from year to year, that the price which you charge the operator for gasoline is the dealer posted price?

A. Yes, sir.

Q. In effect from time to time?

A. Yes, sir.

Q. I wish you would make this entirely clear whether or not there is not the relationship at all between the rental you charge and arrive at, as you have explained, and
120 the gasoline price which is charged all of these dealers.

A. There is no difference whatsoever.

Q. Mr. Raupagh, if an analysis were to be made of the amount of rental which is charged the various retail dealers to whom Standard Oil Company leases in Detroit, is it or is it not true that it would involve an analysis of each of these two hundred odd locations for each of the years in question, and involve an analysis of all of the factors which you say you have taken into consideration in fixing your various rentals?

A. Yes, sir.

Q. I will ask you if in the last analysis, Mr. Raupagh, it isn't a matter of the best judgment of yourself and your staff and your real estate men in the company as to what rental you finally arrive at?

A. Yes, sir.

Q. As to any given station?

A. That is right, sir.

Q. You were interrogated at considerable length in relation to two stations, one leased to Lester Goldberg and one leased to Marvin Goldberg. The leases in question were supplied to Mr. Austin at his request, and have the identification numbers 18 and 19. Do you remember those leases?

A. Yes, sir.

Q. I will ask you, Mr. Raupagh, if in your dealings with these two lessees, the rental amounts paid by
121 them for these stations have been arrived at always in just the manner you have explained that you have arrived at all these rentals?

A. It has, sir.

Q. That is to say, you have given consideration to all of these various factors that you have explained?

A. Yes, sir.

Q. Did you give consideration in that specific instance, or instances, to the price, or any change in the price of gasoline charged to those two customers?

A. No, sir.

Q. Mr. Raupagh, has the Standard Oil Company made any special deal of any kind with either one of these customers?

A. No, sir.

Q. Do they get the same price that all the rest of these retail dealers get?

A. They do.

Q. And that is the posted dealer price?

A. Yes, sir.

Q. Do they get any rebates or refunds or bonuses, or any concessions of any kind?

A. Not a thing.

Q. So they are on identically the same price basis as any other retail dealers in Detroit?

A. Yes, sir.

Q. Is that right?

122 A. Yes, sir.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Hanley:

Q. You were asked about whether or not you ever received any instructions from the Chicago office relative to prices which would be charged in the Detroit area. I wish you would explain clearly just what you mean by receiving instructions about prices from Chicago from time to time, Mr. Raupagh.

A. The instructions we receive from Chicago are to the effect that upon a certain day the price on a certain product is a certain price, and that remains in effect until such time that we may receive other instructions.

Q. Now, I want you to make it clear to the Court whether or not that is just an instruction that applies to a given product. Let's take Red Crown gasoline, for instance. That that instruction apply to Red Crown gasoline as distinguished from any customer who may be buying Red Crown gasoline?

A. It applies to the product, Red Crown gasoline.

123 Q. And again taking Red Crown gasoline, do you get such an instruction as to what, on a given date, the dealer tank wagon price will be?

A. Yes, sir.

Q. Then, is it not a fact that you post that tank wagon price, as you have described?

A. Yes, sir.

Q. And thereafter you sell, do you not, to all of your tank wagon dealer customers at that price?

A. Yes, sir.

Q. That is, without respect to whether the Chicago office knows anything about who they are, or not; isn't that true?

A. That's right, sir.

Q. And, indeed, is it not a fact that they don't know who they are, in many instances?

A. That's right. Of course, there is this one exception Mr. Austin brought out.

Mr. Hanley: Yes. Always we make that exception; as to the Ned's situation from September, 1936, until February, 1938.

By Mr. Hanley:

Q. That's right, isn't it, Mr. Raupagh?

A. That's from September 1, 1936, to March 1, 1938.

Q. Yes. Now, does Chicago, from time to time, advise you as to what price you should charge for tank car 124 deliveries to jobbers?

A. Yes.

Q. And that's without reference, again, to any customer, isn't it, Mr. Raupagh?

A. Yes, sir.

Q. Thereafter, you just go ahead and do business with jobber customers on that price basis, do you not?

A. Yes, sir.

Q. And the only such customers that you have had in Detroit for the last two or three years have been these four dealers that have been so frequently named today, are they not?

A. Yes, sir.

Mr. Austin: If your Honor please, I don't object to any of these questions, but I think Mr. Hanley has a little less freedom with leading questions with this witness on cross-examination than with others. I was really cross-examining, and he is, more or less, as I understand it, on direct, except he is limited to the subjects brought out by me.

Mr. Hanley: I am entirely agreeable about trying to avoid leading, your Honor, but I disagree thoroughly with the basis. I think this is Mr. Austin's witness I am cross-examining.

Trial Examiner Ballinger: This is Mr. Austin's witness and unless he displayed hostility, unless Mr. 125 Austin was surprised, he could not have indulged in cross-examination with him. The cross-examination is now being properly conducted.

Proceed.

Mr. Austin: I don't want to dispute with that, but I feel, while the witness is not in any way hostile, I feel he is adverse, and I feel there should be some limit to the amount which the attorney for the Respondent can lead the Respondent's officers on the stand, even though it is cross-examination.

Trial Examiner Ballinger: You are referring now to the Federal Rules of Procedure, I take it?

Mr. Austin: What I understand the rules are, generally, on our hearings.

Mr. Hanley: In order to avoid difficulties, I won't lead the witness. He doesn't need to be led. I thought we both understood he was thoroughly qualified.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. I think I asked you if the price was always the same.

A. Yes, sir.

Q. As between the four jobber customers; is that true?

A. That is true.

126 Q. Now, you were asked, Mr. Raupagh, if the posted price for dealers' tank wagon price was not generally the same among all major suppliers. Do you recall that discussion with Mr. Austin?

A. Yes, sir.

Q. Do you recall that you said that generally such posted price was the same?

A. Yes, sir.

Q. I will ask you whether or not it is a fact—basing your knowledge—basing your answer on your knowledge and experience as a marketer in the oil business—tell us whether or not it is a fact that that posted price is not necessarily the selling price, in all instances?

A. That is a fact.

Q. I will ask you if with this single exception on the half cent incident with Ned's, it is a fact that the Standard Oil Company's posted dealer tank wagon price is the selling price?

A. Yes, sir.

Q. And that has been true ever since June, 1936, Mr. Raupagh?

A. Yes, sir.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

127 By Mr. Hanley:

Q. You were asked, Mr. Raupagh, what determined the consumer price in Detroit. Do you recall that?

A. I don't recall that I was asked that exact question, though, in that way.

Mr. Austin: I don't recall asking those questions; what determines it.

Mr. Hanley: Perhaps I am mistaken.

Mr. Austin: I would like to know that myself.

By Mr. Hanley:

Q. Well, I will ask Mr. Raupagh. In the last analysis, Mr. Raupagh, what determines every price?

A. Competitive conditions.

Q. What you can get for the gasoline; isn't that true?

A. Yes, sir.

Q. When you get out in the market place and try to sell it; isn't that the fact?

A. That is true, sir.

Q. Now, you were questioned at considerable length, Mr. Raupagh, about applications having been made to the Standard Oil Company by dealers or groups of dealers, for tank car purchases. Do you remember that long examination?

A. Yes, sir.

Q. There was a time, was there not, in the spring or summer of 1938 when a proceeding was brought
128 against the Standard Oil Company and others in Detroit under what is known as the Michigan Fair Trade Act?

A. Yes, sir.

Q. And that law was a price discrimination and less than cost law, was it not?

A. Yes, sir.

Q. Do you recall whether or not during the pendency of that case certain service station dealers made suggestions to Standard Oil Company that they be permitted to buy on a tank car basis? Do you recall anything of that kind during the pendency of that case?

A. I believe there was a request of that kind.

Q. Now, directing your attention to the time of June, 1936, and right up until now, and having in mind this incident in 1938, I will ask you if at any time any application has been made to the Standard Oil Company here on the part of any individual service station operator or group thereof, that such person or group might buy tank car in any instance where such person or group had bulk storage; their own facilities for distributing gasoline and acceptable line of credit and a volume of business that is ordinarily found in a jobber set-up?

Mr. Austin: I think that question ought to be made a little more specific.

Anyway, before he answers it: do you mean as to

129 the acceptable credit set-up, do you mean acceptable to the standpoint of the Standard Oil Company?

Mr. Hanley: Yes; surely.

Mr. Austin: Within their exclusive judgment?

Mr. Hanley: Why, yes.

Mr. Austin: Satisfactory to them?

Mr. Hanley: Certainly that's what I mean. I don't suppose we are required to sell anybody on somebody else's judgment.

Mr. Austin: And as to whether they actually had jobber facilities at the time?

Mr. Hanley: I will break up the question, if it is preferable.

By Mr. Hanley:

Q. Was there any such individual or group who made any such application to you or your staff, to your knowledge, which individual or group had storage facilities? Answer that, in the first place.

A. May I ask what time you refer to?

Q. Any time, from June, 1936, until now.

A. Yes, I believe there was.

Q. And when was that?

A. Well, just recently received a request that one of the operators of four service stations here in Detroit wanted to purchase from us, but he had no bulk storage.

130 Q. That's what I asked you. Did you ever receive any such request from any group or individual who, at that time, had bulk storage?

A. No.

Q. Did any of them ever make a request of you when, at that time, they had a set up of distribution facilities?

A. No.

Q. Were any of them in a position, from a credit standpoint, in your judgment, to purchase from the Standard Oil Company on a tank car basis?

A. No, sir.

Q. During that period of time, June, 1936, until date, what do you say as the manager of the company here, as to whether or not you ever got a bona fide application for the purchase of gasoline on a tank car basis other than from the four buyers who are involved in this proceeding?

Mr. Austin: I object to that question, your Honor, in the first place, on the ground the use of the words "bona fide," which calls for a conclusion as to whether or not it was bona fide. This witness cannot testify to that. It refers to the person who made the application.

Secondly, he has already answered the question as to whether he received such application so that this question is only asking whether it was made in good faith, and that would involve a conclusion of the witness.

131 Trial Examiner Ballinger: Did you investigate the condition of the applicant?

The Witness: Yes, sir.

Trial Examiner Ballinger: Instead of stating it was bona fide, state what conditions you found.

By Mr. Hanley:

Q. Just go ahead and answer the Court's question, please, Mr. Raupagh.

A. The conditions I found was that he had no bulk storage; that the stations were scattered quite a ways; that it was against our policy to sell or make deliveries to a person that is located in such a manner.

Q. What do you mean by that last?

A. Well, he couldn't take a tank car of gasoline at one time. He couldn't take a transport truck a one time, because he didn't have the proper storage facuities.

Q. Now, Mr. Raupagh, just during the pendency of this action, in the spring or early summer of 1938, do you recall that there were several suggestions made about that time to you, or to somebody in your staff by dealers?

A I recall that there was one.

Q. And did you investigate that situation?

A. Yes, sir.

Q. Did your investigation disclose anything to you as to how that request came about?

132 A. No, I can't say as to how it came about.

Q. Do you recall that that was inquired into during the course of that proceeding?

A. Yes, sir.

Q. Did you learn any facts in connection with how the matter occurred?

A. Yes, sir.

Q. Your Honor, I object to any questions as to what he learned on the ground of hearsay.

Trial Examiner Ballinger: We haven't reached that point yet.

Mr. Austin: All right. I will withdraw that objection.

By Mr. Hanley:

Q. Now, without reference, Mr. Raupagh, to anything you may have heard on the trial, but, as a result of your investigation and conversations with the applicant for this tank car basis, did you learn anything about how he happened to make it at that time?

A. Yes. We saw the—I saw the contract that he had made with another supplier, selling him at the tank car price, calling for deliveries direct to his service station, and I think it specified that the gallonage was 8,000 a month.

Mr. Austin: I think it should be brought out who this is that we are talking about here.

133 By Mr. Hanley:

Q. All right. Who was it?

A. Roman Miller.

Trial Examiner Ballinger: Who was it?

The Witness: Roman Miller.

By Mr. Hanley:

Q. Had that man been a customer of the Standard Oil Company?

A. Yes, sir.

Q. Did he later leave the Standard Oil Company and buy from somebody else?

A. Yes, sir.

Q. Did he have any distribution system of his own, when he applied to you?

A. None whatever.

Q. Did he have any bulk storage of his own?

A. No.

Q. Were you willing, on the whole investigation that you made of his business, and ability to buy as a jobber, willing to sell him as a jobber?

A. No, because he wasn't a jobber.

Q. Now, did you discover any facts in your dealings with any of the individuals who made an application to you as to whether that application had any reference to the lawsuit that was being tried at that time?

134 A. I believe it was all inspired.

Mr. Austin: I move to strike that out.

Trial Examiner Ballinger: The motion is granted.

Mr. Hanley: It may be stricken.

Trial Examiner Ballinger: The answer is stricken.

By Mr. Hanley:

Q. Tell us what you learned in your investigation with these dealers who were asking you to put them on a tank car basis.

Mr. Austin: I object to that question, your Honor. Let him state what the dealer told him; what the dealer said and what the witness said.

Trial Examiner Ballinger: State what, in fact, transpired; of your own knowledge.

Mr. Hanley: Yes, that's all I am asking him for.

A. A request was made by some dealers that they wanted to purchase in tank car quantities at the tank car price. However, they had no bulk storage. They had no bulk storage in prospect or sight. They had made no effort to secure any, as far as we could learn. Their financial standing wasn't such that we would accept them.

Trial Examiner Ballinger: Do you mean they had no bulk storage, or they had inadequate bulk storage?

The Witness: Your Honor, what we term as bulk stor-
age was not the storage they may have at their service
135 station, but it is a bulk plant separately operated and
conducted from their service station. They had no
bulk storage whatsoever.

By Mr. Hanley:

Q. Mr. Rampagh, did you ever have any experience with the so-called group buying—this so-called group buying that Mr. Austin was talking to you about?

A. Yes, sir.

Q. And where did you have that experience?

A. I had that experience in Chicago.

Q. And what was the result of your experience?

A. It was kind of disastrous.

Q. Just tell the Court what you mean by that.

Mr. Austin: I object to further answers on that unless he states what experience he had; that is, what sort—who applied, and what facilities they had and so forth.

Mr. Hanley: If your Honor please, if Mr. Austin will indicate what he meant, then I will try and confine my examination to what Mr. Austin is talking about, but he limited me most stringently in going into this question of who he was talking about as a group buyer.

He has created the impression here, apparently, that the Standard Oil Company has turned down bona fide applicants to buy on a tank car basis. I think it is already 136 sufficiently established here, your Honor, to justify the insertion that there was an inspired effort to make some testimony in a case in which this company was a Defendant.

Mr. Austin: I don't think there is any testimony of that kind at all in the record, and I haven't objected, Mr. Hanley, to any testimony as to what his requirements are. Now you are going to Chicago to make a basis of comparison. I want to know what happened in Chicago.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. I want to ask you something about availability of storage, Mr. Raupagh. Let me understand your testimony. Is there any way that you know of, and, if so, you tell us what it is, that anybody in Detroit can get bulk storage facilities without buying them, building them, or renting them, or have somebody give it to them?

A. I don't.

Q. So far as the Standard Oil Company is concerned, has that company ever given bulk storage—

A. No.

Q. —to any jobber?

A. No, sir.

Q. Have each of the jobbers concerned in this a
137 tion supplied at their own expense and without co
to the Standard Oil Company their own storage fa
cilities?

A. They have supplied their own facilities.

Trial Examiner Ballinger: Without any contribution
any kind.

The Witness: No contribution of any kind, your Hono

By Mr. Hanley:

Q. Some effort was made in examining you, Mr. Ra
pagh, to establish that there was no increase or decreas
in the consumption of gasoline from year to year in th
Detroit area. I think you were asked a question that
one dealer got a customer that he must of necessity tak
that customer away from some other dealer. Do you reca
that testimony?

A. Yes, sir.

Q. Now, do you recall whether there has been an in
crease in the general consumption of gasoline through th
past several years in Detroit?

A. There has been an increase in consumption of gas
line yearly with the exception of 1938.

Q. Based on your experience, was 1938 a bad year i
the oil industry?

A. Yes, sir.

Q. That was true all over the country?

138 A. Yes, sir.

Q. And also in Detroit.

Is it or is it not a fact that an increase in the numbe
of cars would normally increase the consumption of gas
line?

A. Yes, sir.

Q. Is it not also true that an increase in the buyin
power of the people who operate cars irrespective of a
increase in the number of cars would also increase th
consumption?

A. It would.

Q. Is it a fact that whenever one dealer in gasoline get
a new customer that he necessarily has taken that custome
away from some other dealer?

A. Would you repat that question?

(The question was read.)

A. Not if it is an individual that has bought his first car or a new car and never used any gasoline before.

Trial Examiner Ballinger: As a general proposition, isn't it true?

The Witness: Yes.

By Mr. Hanley:

Q. I believe you said that the price might not be the most important factor in a customer changing from one dealer to another; am I right about that?

139 A. You are right, and I would like to add to that statement. When, of course, the price differential gets too large, then it is an important factor.

Q. Just a moment, on that price situation. You were asked by Mr. Austin a number of questions as to the importance of price. Are there not localities, Mr. Raupagh, where the price is one of the less important factors in the ability of a service station to obtain and retain his customers?

A. That is true, sir.

Q. And, conversely, is it not true that there are certain other localities where price assumes a greater importance?

A. Yes, sir.

Trial Examiner Ballinger: You might develop those localities a little.

Mr. Hanley: I will, your Honor.

By Mr. Hanley:

Q. In respect of the first type of locality just described, tell us what you have in mind as to the character of such a locality, Mr. Raupagh.

A. I have in mind localities like Grosse Point; Rosedale Park, and there are certain localities off Woodward Avenue, very high class neighborhoods.

Trial Examiner Ballinger: Those are localities where the stations are patronized by wealthy people?

140 The Witness: Yes, sir.

By Mr. Hanley:

Q. Places where the buyers are not price conscious primarily; is that right?

A. Yes, that is it, sir.

Q. And is it also true, Mr. Raupagh, that in those localities emphasis is placed on the effectiveness of the station and the services rendered and things of that kind?

A. Very much so.

Q. Then tell us what you mean by the other type of unit.

A. The other type are in those localities in poor neighborhoods where many people are on the Welfare and still own and operate cars, generally poor localities who are price buyers, who must be price buyers, and that generally takes place in the quite closely downtown areas, too.

Q. Some examination was made of you, Mr. Raupagh, as to identification advertising, which you said were signs identifying products and pump globes and that sort of thing.

A. Yes, sir.

Q. Ordinarily, when you lease a station, you supply that type of advertising to the lessee, do you not?

A. Yes, sir.

141 Q. And it is for his use, is it not?

A. Yes, sir.

Q. As long as he has the station?

A. Yes, sir.

Q. What is the situation with respect to a dealer who owns his own station or leases a station from someone other than the company?

A. The situation is exactly the same.

Q. Is it or is it not true that he keeps that equipment as long as he wants to deal in Standard Oil Company products?

A. Yes, sir.

Mr. Hanley: If your Honor please, I think I do not care to go into anything further except the one subject of interstate commerce, and that is a proper subject, and I can do it nearer the chronological order if we might recess at this time. I will dispose of that the first thing in the morning.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Redirect Examination by Mr. Austin.

Q. Referring to your leases, how many service stations are there in the Detroit area that pay less than ½ cent per gallon on their gallonage rent?

142 A. You mean of our own stations?

Q. Of your lessees.

A. Of our lesses. I can't answer that definitely, but I could look that up and get it for you.

Q. Are there two or five or ten?

A. Oh, yes, I would say about—I am guessing now—about ten.

Trial Examiner Ballinger: That is your best judgment, is it?

The Witness: Yes, sir.

Trial Examiner Ballinger: Not a guess.

The Witness: I will let it stand as my best judgment.

By Mr. Austin:

Q. All the others pay ½ cent?

A. No, sir.

Q. Nobody pays over ½ cent?

A. No, sir. Well, now, wait a minute. I am not so sure of that, either, but I don't believe there is anybody else that pays over half a cent.

Q. So that this variation in rental that you were speaking of largely applies to the flat rental, does it not?

A. Largely, yes, sir.

Q. And in the cases where the rental is less than ½ cent on the gallonage, those are generally poor locations?

A. Yes, sir; cats and dogs.

143 Q. You referred to Roman Miller, and I believe you said he made a request to become a tank car buyer?

A. Yes, sir.

Q. Was he a customer of Standard Oil Company's when he made that request?

A. Yes, sir. Could I make another statement in that connection?

Q. Well, that is all I wanted to know, whether he was a customer at that time, because some reference was made to a contract he had with some other company.

A. Yes, sir.

Trial Examiner Ballinger: What you have in mind, is it pertinent to any issue in this case? If so, you may make a statement.

The Witness: I believe it is, your Honor.

Trial Examiner Ballinger: Let's have it.

The Witness: He wanted to purchase in a tank car price and wanted us to make track train deliveries or tank wagon deliveries at tank car price direct to his service station. He went on at length to explain that that is the economical way to do, and he wouldn't think of doing business any other way. He claimed that he originated the idea in some other line of business at the time.

By Mr. Austin:

Q. At that time you weren't making any deliveries, 144 were you, by tank train?

A. We are not now.

Q. Well, you are now to jobbers?

A. Yes, to jobbers, but not to resellers.

In addition to that he showed us a contract that he had made with another supplier of major company gasoline giving him a discount on house brand gasoline of a cent and a half per gallon, and making deliveries direct to his service station at that price.

145 Q. Well, you just said he was a customer of Standard Oil. You mean this was a contract that he had?

A. We lost him.

Q. Did he show you this contract at the time he made the request, or later on?

A. Later on.

Q. That is what I wanted to bring out.

A. Yes, sir.

Q. Well, now that you are delivering by tank train—or what is the other name you called it?

A. Transport haul.

Q. Transport truck?

A. Yes.

Q. To your jobbers, and also to Ned's, there would be nothing to prevent you from delivering to a man like Roman Miller at his station, by the same means, is there?

A. There is a big distinction.

Q. Just answer that yes or no, so far as the physical ability to do it by a method which you are now using.

A. If they have sufficient storage, there wouldn't be anything to prevent us, no.

Q. Do you consider Ned's a jobber?

A. Yes, sir.

Q. Then when you used the term "jobber," you didn't mean necessarily a man who resells to other dealers, did you?

146 A. Not necessarily.

Q. You mentioned volume figures for the Detroit consumption of gasoline.

A. Yes.

Q. Where did you get those figures, or where did you get that information?

A. Well, that is something that we set up ourselves here as we thought was the right thing to do. That is our own judgment.

Q. Have you got the figures there?

A. One to two million gallons a year. You mean that a jobber—

Q. No, no. You stated in response to Mr. Hanley's question—you referred to the total gallonage of gasoline consumed in Detroit.

A. Yes, sir.

Q. You said it increased, except for 1938?

A. Yes, sir.

Q. Have you the figures on that?

A. I have the figures. I haven't them here. I have them in percentages.

Q. Where did you get those figures?

A. From the State of Michigan.

Q. As long as that question has been asked, I would like to know the total volume. Is that for the State, or just for Detroit that you were speaking of?

147 A. Well, we have it for both.

Q. I would like to know the total volume in gasoline consumption, if there is such a figure available, for Detroit, for the last five years.

A. Well—

Mr. Hanley: Just a minute.

Mr. Austin: If he has the figures.

Mr. Hanley: He hasn't got them in that form, Mr. Austin. What we did was make a computation inspired by the necessity of this litigation, which computation is based on the data that was obtained from the tax authorities of the State of Michigan. Now, it is not a record of our company; it is a computation which we think is the soundest one that can be made, but we can't give it to you as a record of our company. I have no objection to your having it if you are willing to agree that it may be used—

Mr. Austin: I want to find out— Mr. Raupagh made the positive statement here that the consumption of gasoline in Detroit had increased from year to year since 1935 or 1936, except that there was a decrease in 1938. Well, now, if that is not based on any reliable figures which are sufficiently reliable to be introduced here, then I don't see that his testimony is reliable enough to be in the record.

Mr. Hanley: I think they are reliable and sufficiently
reliable to be introduced, and I propose to put them in
148 on our side of the case, Mr. Austin. I just wanted you
to understand that they were not a record of the Standard Oil Company. They are a computation which our accountants have made, and which they make from year to year, and so do other companies, based on the records of the taxing authorities of the State of Michigan. It is the only way you can tell how much the total gasoline—

Mr. Austin: I would like to ask, then, whether Mr. Raupagh's testimony is merely his conclusion based upon those computations.

Mr. Hanley: No, it is the results of the computation. There isn't any legerdemain about this thing at all. I can show you what the computation is or explain it to you sometime during a recess.

Trial Examiner Ballinger: I understand from counsel for the Respondent that he proposes to introduce into the record as a part of the Respondent's case, the basis upon which the conclusion was reached, and I suggest that you pass the matter over at this time, and if a satisfactory basis for the conclusion which has been expressed in the record is not laid, why, you may raise the question at a later time.

Mr. Austin: Thank you, Your Honor. That, of course, I would like to do, but I didn't like to leave this thing with a statement here that there had been an increase except
in 1938, when, for all I know, the increase may be very
149 small or maybe the 1939 and '40 figures are less than
1937, and that testimony is in here to give a picture of increasing consumption and new business for retail gasoline dealers. I don't know whether there is or not, and I have no way of finding out the basis of what has been said.

Trial Examiner Ballinger: With the reservation the Examiner has given you, are you not satisfied?

Mr. Austin: I am satisfied that I may have leave to move to strike at a later time if it is not supported.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Mr. Austin: That is all I have tonight.

Mr. Hanley: I move we adjourn to reconvene tomorrow at 10:00 o'clock.

(A discussion ensued off the record.)

Trial Examiner Ballinger: Motion of counsel for Respondent is granted, and now, at 5:40 P. M., the hearing stands adjourned, to be reconvened on March 11, 1941, at the hour of 10:00 o'clock A. M., in Room 859, Federal Building, Detroit, Michigan.

(Whereupon, at 5:40 P. M., March 10, 1941, the hearing in the above-entitled matter was adjourned.)

150 Room 859, Federal Building, Detroit, Michigan.

March 11, 1941.

Met, pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., Attorney for the Federal Trade Commission.

H. R. Hanley, Esq., 910 S. Michigan Avenue, Chicago, Illinois, on behalf of the Respondent.

151 PROCEEDINGS.

Trial Examiner Ballinger: Come to order.

This is a reconvening of Docket No. 4389, a case entitled in the matter of the Standard Oil Company, at 10 A. M., Eastern Standard Time, March 11, 1941, at Room 859 Federal Building, Detroit, Michigan. The last hearing was held in Detroit, March 10, 1941.

The report will note counsel for the Commission and Respondent present.

Gentlemen, you may proceed.

P. A. RAUPAGH thereupon resumed the stand, and having been heretofore duly sworn, testified further as follows:

Recross Examination.

By Mr. Hanley:

Q. Mr. Raupagh, where is the Standard Oil Company office located in Detroit?

A. At 1011 Fort Street.

Q. Just generally, what size building is it?

A. It is ~~three~~-story building, brick.

Q. Is the building entirely occupied by offices?

A. Yes, sir.

Q. Approximately how many persons are employed in the office personnel of the company in Detroit?

152 A. There is about 165.

Q. You have stated that there are six bulk plants in Detroit. What is a bulk plant?

A. A bulk plant, as we term it, is a storage plant for gasoline and other merchandise that we use as a distributing point or center.

Q. Is it a fact that those plants are located strategically about the city so that you can conveniently serve all communities in the city?

A. Yes, sir.

Q. Are there large bulk storage tanks for the reception of gasoline and other petroleum products at those plants?

A. Yes, sir.

Q. Do tank trucks operate out of the plants making deliveries to various gasoline customers?

A. Yes, sir.

Q. I think you stated that there were approximately 60 trucks operated by the Standard Oil Company in Detroit?

A. Yes, sir.

Q. Do those trucks operate out of these 6 bulk plants that you have described?

A. Yes, sir, with the exception, I think there is a few trucks that operate out of the River Rouge Terminal.

Q. Is it true that there is a personnel consisting of truck drivers and stock men and maintenance men who work at these bulk plants?

153 A. Yes, sir.

Q. Approximately how many such employees do you have in the Detroit area?

A. You mean working in the plants?

Q. Yes, sir, driving the trucks and doing maintenance and repair work, doing any work that needs to be done in connection with operating the bulk plants?

A. Well, it would be over 200.

Q. Then would that mean that there are approximately 360 to 365 persons altogether employed by the Standard Oil Company in Detroit?

A. Yes, sir.

Q. Directing your attention to the Marine Terminal at River Rouge, is that located entirely within the State of Michigan?

A. Yes, sir.

Q. Will you describe for the Court the physical set-up of the River Rouge Terminal, Mr. Raupagh, with reference to how gasoline is put into the terminal and how it is taken out?

A. Gasoline is transported from our Whiting, Indiana, refinery by boat or tanker. It is unloaded at the River Rouge Terminal.

Q. Does that involve the use of docks and pump lines and power pumps and that sort of thing, Mr. Raupagh?

154 A. Yes, sir.

Q. Go ahead.

A. It is unloaded at the River Rouge Terminal and comes to rest there. Then we haul or transport or ship by tank car direct to our bulk stations in Detroit, and from our bulk plants in Detroit we deliver to our customers by our own tank trucks.

Q. Is it true that all of the gasoline that goes into the River Rouge Terminal is transported to that terminal by gasoline tankers?

A. Yes, sir.

Q. And that is over the Great Lakes?

A. Yes, sir.

Q. Mr. Raupagh, is there a period in the year when, due to weather conditions, navigation on the lakes has to be abandoned?

A. Yes, sir.

155 Q. And, generally, why is that?

A. Well, it is generally four or five months during the winter period. I don't recall the exact dates, but this is whenever the lake transportation is closed or it is frozen up so that boats can't ply on the lakes.

Q. Now, I think you stated in answer to Mr. Austin's questions that the capacity of the River Rouge terminal was—it is out of my mind. What was it?

A. A million and a half barrels; barrels of 42 gallons capacity.

Q. What is the practice with reference to filling that storage during the period of open navigation on the lakes?

A. The practice is to fill the storage during open navigation so that we can draw on the terminal during the winter months, as well as during the summertime.

Q. Is that true that for your sales in Detroit to all classes of customers that you continuously, throughout the year, draw on the supplies of the terminal?

A. Yes, sir.

Q. And during the period of open navigation, it is true that supplies of gasoline are constantly being unloaded into the terminal?

A. Yes, sir.

Q. As to any given brand of gasoline during that period of unloading into the terminal, and withdrawing for sale, is that gasoline just mixed up in the tanks?

156 A. Yes, sir.

Q. Are any of these shipments of gasoline by tanker to the terminal ear-marked for any particular customer or contract?

A. No, sir.

Q. Then, if I understand you correctly, the Standard Oil Company simply ships gasoline to the terminal with the view to selling it, if the company can sell it, to any customers that you may be able to obtain here in Detroit?

A. Yes, sir.

Q. Now, how do you get gasoline from the River Rouge terminal to the six bulk plants in Detroit proper?

A. We ship it either by tank car or by transport truck haulers.

Q. Now tell us what the mechanics are of getting that gasoline out of the tanks at the terminal, across the intervening space, and into the tanks in the bulk plants.

A. The mechanics are that either a tank car or transport truck is loaded at the River Rouge terminal and is then transported to our bulk plants and unloaded there and put into our storage at our bulk plant.

Q. So the Court may fully understand, does that loading and unloading of either a truck transport or a tank car involve the use of special equipment; pumps and that sort of thing, Mr. Raupagh?

A. Yes, it does.

Q. So that any bulk storage facility, in addition to

the tanks themselves, has to have special equipment
157 for the handling of the gasoline, is that true?

A. Yes, sir.

Trial Examiner Ballinger: Will you have the witness
lescribe that?

By Mr. Hanley:

Q. Do that, will you please, Mr. Raupagh? Describe in
letail what the physical mechanics are and what the equip-
nent is that is used in this loading and unloading op-
eration.

Trial Examiner Ballinger: And wherein they differ
rom the loading of a lesser amount supplied to retail
tores.

A. When we load at our River Rouge terminal for
ransportation to our bulk plants, we draw it off from
he tank and we meter it into the tank car or transport
ruck.

By Mr. Hanley:

Q. Do you use a power pump to do that?

A. We use a power pump to do that, yes, sir.

158 Q. Go ahead.

A. It is then transported to the bulk plant and is
nloaded and placed into our bulk storage at the bulk
lant and, again, a power pump is used. From our bulk
lant practically the same operation takes place, as far
s loading tank trucks, which make deliveries to dealers.

Q. Now, is it true that in connection with some of the
elivery trucks, tank trucks which make deliveries to re-
ail stations, that you use power take-offs, or power pumps
r is that a gravity feed in the service station?

A. It is mostly a gravity feed in service stations.

Q. Is it the same equipment that is used for these large
ulk—for the transfer of gasoline?

A. No, it is entirely different, as to size and so on.

Q. And the capacity and power of the pumps: different
s to that, is it?

A. Yes, sir.

Trial Examiner Ballinger: Only as to size and power?

The Witness: Only as to size and power and one is
ocated on the truck, and, generally, at our bulk plant the
ower take-off is a part of the plant.

By Mr. Hanley:

Q. And not a part of the traveling equipment?

159 A. That's right.

Q. If I understood you correctly, ~~you said that~~ most of the deliveries to service stations don't use a pump at all; that is, merely a gravity feed?

A. Yes, sir.

Q. Now, Mr. Raupagh, is that operation of first unloading the tankers into the terminal at River Rouge, and then loading tank cars or truck transports at River Rouge for delivery to the bulk plants in Detroit, and then the delivery out of the bulk plants to customers in Detroit; do all of those operations take place within the State of Michigan; entirely within the State of Michigan?

A. Yes, sir.

Q. Do any of them take place out of the State of Michigan?

A. None.

Q. Now, how do you determine when you will move gasoline from the River Rouge Terminal to a bulk plant in Detroit?

A. We determine that by the necessity for our stock at the bulk plant. Movements take place continually.

Q. When you do move gasoline to a bulk plant, do you earmark that gasoline for any particular customer, or to fill any particular contract?

A. No.

Q. When you move it, do you put it right into the tank of the same grade of gasoline at the bulk plant?

160 A. Yes, sir.

Q. Does it become mixed with such gasoline as may already be in that tank?

A. Yes, sir.

Q. Is it true, Mr. Raupagh, that gasoline in any given tank at a bulk plant may have in it a mixture of gasoline that may have been put in there from time to time over a period of some months?

A. Yes, sir.

Q. Now, isn't that true with respect to all grades of gasoline in all of these terminal and bulk plant tanks, with the exception of a difference that occurs when you change the grade of gasoline, giving consideration to seasonal requirements?

A. Yes, sir.

Q. Perhaps it would be well to clarify what is meant by the seasonal requirements, Mr. Raupagh.

A. What we mean by season requirements of gasoline is that we make four separate grades of gasoline. By that I mean gasoline is adjusted to the weather conditions, as to quick starting, and so on.

Q. This may not be very scientific, but to summarize it: you may use a more volatile gasoline in the winter time to meet the cold weather conditions?

A. Yes, sir.

161 Q. Obtain quick starting?

A. Yes.

Q. Now, you were shown Commission's Exhibit No. 2, which is, as you said, a typical form of gasoline contract which you write with retail dealers. Do you recall that exhibit?

A. Yes, sir.

Q. When you make a contract of that kind, Mr. Raupagh, with a dealer in Detroit, just explain to the Court what happens. How does that thing come into existence?

A. It comes into existence this way: that we continually solicit the business of dealers whose business we are not securing, and we try to get the business.

If we sell the dealer upon the idea of handling our products, we make this kind of contract with him and we deliver our merchandise to him as per the contract.

Trial Examiner Ballinger: Will you pursue that contract a little farther?

Mr. Hanley: Yes, I will.

By Mr. Hanley:

Q. Now, let us start back a little ways. Are a part of this office personnel that you refer to salesmen?

A. The office personnel? No, they are not.

Q. In addition to these 360-odd employees, are there salesmen employed?

A. Yes, sir.

162 Q. About how many salesmen do you have?

A. We have about 43 salesmen.

Q. Now, do you have any other classes of employees that you haven't taken into consideration in these totals?

A. Yes. We have construction men. We have maintenance men.

Q. Well, about how many of them?

A. We must have about 25, 30 construction men.

Q. And are there any others?

A. And perhaps 10 maintenance men.

Q. And are there any other classes?

A. No; I think that's about all.

Q. Now, roughly, that would total about 440 to 450, altogether. Am I right about that?

A. Yes.

Q. Now, returning to the salesmen, do they work out of your office here in Detroit?

A. Yes, sir.

Q. And do they solicit business from dealers in Detroit?

A. Yes, sir.

Q. Is their work entirely within the State of Michigan?

A. Yes, sir.

Q. Are the dealers whom they solicit located and doing business within the State of Michigan?

A. Yes.

163 Q. Now, when a salesman successfully solicits a dealer you say that one of these contracts will result?

A. Yes.

Q. Who signs that contract?

A. The dealer signs it and I sign it, or someone in our office signs it.

Q. Here in Detroit?

A. Yes, sir.

Q. Does that whole thing happen in Detroit?

A. Yes, sir.

Q. Is the contract itself made in Detroit?

A. Yes, sir.

Mr. Austin: I object to that, your Honor, as to where he contract is made. I move the answer be stricken. It is a conclusion of law.

Mr. Hanley: I will withdraw the question, in the face of hat objection.

By Mr. Hanley:

Q. Physically, is that contract filled out and signed in Detroit?

A. Yes, sir.

Mr. Austin: I assumed that's what you meant.

Mr. Hanley: Yes, sir.

By Mr. Hanley:

Q. What becomes of the contract after it is fully 164 executed; I mean fully signed?

A. We have a file where we keep it in our office and refer to it when necessary.

Q. Is that kept in Detroit?

A. Yes, sir.

Trial Examiner Ballinger: Prior to the execution of the contract, is your office in Chicago consulted?

The Witness: No, sir.

Trial Examiner Ballinger: It is not submitted to them for approval?

The Witness: No, sir.

By Mr. Hanley:

Q. Is it true, Mr. Raupagh, that many of these contracts are fully signed and completely filled out in your office and that you supply a dealer with gasoline under them without Chicago even having knowledge of that transaction?

A. That's right, sir.

Trial Examiner Ballinger: Is that true in all instances?

The Witness: Of that kind of a contract, yes, sir.

By Mr. Hanley:

Q. Now, having the contract made, as you have described, Mr. Raupagh, what happens then?

A. We install our product advertising; put the 165 globes on the pumps.

Q. Who does that?

A. Our maintenance men.

Q. And they work out of your office in Detroit?

A. Yes, sir.

165-A Q. All right. Go ahead, what happens then?

A. Then we start making delivery to the dealer.

Q. At whose instance do you make the deliveries?

A. The dealer.

Q. Does he tell you when he wants gasoline?

A. Yes, sir.

Q. Whom does he tell?

A. Well, he either 'phones our office, tells our driver, possibly our salesmen sometimes.

Q. Is it always somebody in Detroit connected with your office?

A. Yes, sir.

Q. And does he advise how much gasoline he wants?

A. He generally does; yes, sir.

Q. Then what happens?

A. Then we make the delivery and collect for it.

Q. Out of the bulk plant, ordinarily?

A. Yes.

Q. And that goes into his tanks in Detroit?

A. Yes, sir.

Q. And then what happens?

A. Then he sells it to the public.

Q. I mean, first, Mr. Raupagh, do you bill him for that gasoline, and what takes place in reference—

A. The driver that makes the delivery makes out the bill and collects for it.

166 Q. Usually right at the time of the delivery?

A. Yes.

Q. Then what happens to that bill that the driver has made out?

A. He turns that into the bulk plant from which he operates during the end of the day, with the money or credit that he has collected.

Q. Then what happens to that record and the money?

A. The clerks in the bulk plants then transmit that report with the money and tickets to our main office in Detroit.

Q. Do you keep that record there as a permanent record?

A. Yes.

Q. Is that a record of the Detroit office?

A. Yes, sir.

Q. What do you do with the money?

A. We deposit it in the bank

Q. Where?

A. The Detroit National Bank.

Q. Do you maintain a bank account in Detroit for the business of your office therein to which you put funds and from which you withdraw funds?

A. Yes, sir.

Q. All done in your office here in Detroit?

A. Yes, sir.

167 Q. Now, suppose, Mr. Raupagh, that one of these four dealers involved in this action want some gasoline, what happens?

A. He generally calls up our order clerk in our Detroit office and we make up an order, and then it is transmitted to our River Rouge terminal.

Q. By whom?

A. By our clerk in the office.

Q. What happens?

A. And there the order is filled, either the tank car or the transport truck, that quantity of gasoline is delivered to the jobber or distributor.

Q. All right. Do all of those things physically happen in the State of Michigan?

A. Yes, sir.

Q. After the delivery is made to the bulk storage of the customer, what occurs then in reference to completing the transaction?

A. An invoice is mailed to him.

Q. From where?

A. From Detroit.

Q. Your office in Detroit?

A. Yes, sir.

Q. And mailed to the customer involved in Detroit?

A. Yes, sir.

Q. And then what happens?

A. We hope to collect for it then.

168 Q. And usually do?

A. Yes, sir.

Q. And that collection is paid to you where?

A. In Detroit, at our Detroit office.

Q. And does that terminate the transaction as far as that customer is concerned?

A. Yes, sir.

Q. Then what do you do with the money that you have received in payment of that invoice?

A. Placed in the bank.

Q. Here in Detroit?

A. Here in Detroit.

Q. Do you keep a copy of the invoice as a permanent record of the transaction in your office in Detroit?

A. Yes, sir.

Q. Now, do those sales occur both in respect to the tank car sales and in respect to the sales to retail service stations, without any reference to the Chicago office in the first instance?

A. Yes, sir.

Q. Do you pay these employees to which you have referred here in Detroit?

A. Yes, sir.

Q. Most of them are residents of Detroit and live here, do they not, Mr. Raupagh?

169 A. Yes, sir.

Q. In fact, many of them have never worked for the Standard Oil Company any place but Detroit, is that not true?

A. That is true, sir.

Q. You have referred to maintenance men. Explain just what their duties are, Mr. Raupagh.

A. Their duties are to maintain equipment that the company may own, such as pumps, and so on.

Q. Are their duties confined to work entirely within the State of Michigan?

A. Yes, sir.

Q. Primarily, I suppose, in Detroit?

A. That is right, sir.

Q. You have also referred to construction men. What are their duties?

A. Whenever we rebuild a property that we own—I mean by that a service station—they perform some of that work.

Q. Are their duties confined to work within the Detroit area?

A. Yes, sir.

Q. Entirely within the State of Michigan?

A. Yes, sir.

Q. Now, are all of these employees of the various classes to which you have referred, paid out of your office?

A. Yes, sir.

Q. Are the personnel records in connection with 170 them kept in your office?

A. Yes, sir.

Q. Does the Standard Oil Company pay real estate and personal property taxes on the land and physical equipment and facilities located at River Rouge?

A. Yes, sir.

Mr. Austin: You don't mean personal property taxes on the land, do you?

Mr. Hanley: I meant to say real estate taxes.

By Mr. Hanley:

Q. You pay real estate taxes on the land?

A. Yes, sir.

Q. And you pay personal property taxes on the facilities and equipment, do you not, Mr. Raupagh?

A. Yes, sir.

Q. Now, do you also pay personal property taxes on the gasoline inventory that may be in the tanks there, from time to time?

A. Yes, sir.

Q. Do you pay land taxes on the land that is represented by your bulk plants here in Detroit?

A. Yes, sir.

Q. To the State of Michigan?

A. Yes, sir.

Q. And that is a Michigan tax levied by the State of Michigan?

171 A. Yes, sir.

Q. Do you pay personal property taxes on the equipment and facilities located on those bulk plants?

A. Yes, sir.

Q. Do you, from time to time, pay a personal property tax that may be levied by the State of Michigan on the inventories of gasoline that are in the tanks in these bulk plants?

A. Yes, sir.

Q. Do you buy Michigan licenses for the trucks that are in use for making deliveries of gasoline?

A. Yes, sir.

Q. In respect of the leases which are made with certain dealers covering properties, covering service stations properties owned by the Standard Oil Company, please tell the Court how those leases originate, how they came into being.

A. We negotiate with property owners to make such lease, and then supply them with merchandise the same way as we do on one of the contracts that we have made.

Trial Examiner Ballinger: Who makes that lease?

The Witness: We make the lease here. We negotiate the lease here.

Trial Examiner Ballinger: Is that submitted to the Chicago office?

The Witness: I think the leases are submitted to the Chicago office.

172 By Mr. Hanley:

Q. Who signs them?

A. I think I sign a lease—I sign the lease, and I think there is a signature that is made in Chicago, also.

Q. And does the dealer sign?

A. And the dealer signs.

Q. What becomes of the original lease?

A. It is kept on file in our office.

Q. And the dealer has a copy or a duplicate, original, I presume?

A. Yes, sir.

Q. As to the service stations owned in Detroit by the Standard Oil Company and leased, does the Standard Oil Company pay real estate taxes on the land?

A. Yes, sir.

Q. And buildings?

A. Yes, sir.

Q. And does the company pay personal property taxes on any company owned equipment or facilities that may be pertinent to the station?

A. Yes, sir.

Q. And is that a tax levied by and collected by the State of Michigan?

A. Yes, sir.

Q. There seems to be a good deal of question as to
173 the distinction between tank cars and truck transports;
Mr. Raupagh. First, is it true that the four dealers
involved here have bulk storage facilities capable of receiving deliveries by tank car?

A. Yes, sir.

Q. And are those facilities now capable of receiving deliveries by truck transport?

A. Yes, sir.

Q. Aside from the physical differences that a tank car runs on a railroad track, and a truck transport runs on a highway, are there any substantial differences between moving gasoline by tank car and by tank truck?

A. No.

Q. Or truck transport?

A. No difference.

Q. I think you stated that the capacities of these truck transports were comparable to tank car capacities?

A. Yes, sir.

Q. Mr. Raupagh, having made a sale of gasoline to one of these retail dealers, does that gasoline become the absolute property of that customer so far as the Standard Oil Company is concerned?

A. It does.

Q. Does the Standard Oil Company have any interest in it of any kind whatsoever?

174 A. No.

Trial Examiner Ballinger: Do you have any lien on it?

The Witness: No.

By Mr. Hanley:

Q. So far as the Standard Oil Company is concerned, is that customer at liberty to do anything he pleases with that gasoline?

A. He is at liberty.

Q. As a matter of fact, most of those customers re-sell the gasoline to automobile consumers, do they not?

A. Yes, sir.

Q. Does the Standard Oil Company have anything to do with fixing the price which such dealer will demand from his customers?

A. No, sir.

Q. Is that a matter entirely within the control and discretion of the retail dealer?

A. It is.

Q. Does the Standard Oil Company have anything to do with the manner in which the dealer will operate his business?

A. No, sir.

Q. Does the Standard Oil Company have any interest in the profits of that business?

A. No, sir.

175 Q. Does the company have any control over the hours which the service station will remain open?

A. None.

Q. Do you have anything to do with the number of employees or attendants that may be employed at the station?

A. We do not.

Q. Do you have anything to do with the wages that they pay any of the employees at the station?

A. None.

Q. Have you anything to do with the subject of what other merchandise the station operator may use or sell at the station?

A. No.

Q. So far as the company is concerned, is such a service station operator a completely independent merchant?

A. Yes, sir.

Q. In respect of the gasoline that is sold the four tank car customers, does that gasoline become the absolute property of those customers after Standard Oil has delivered it to them?

A. It does.

Q. Does the company have anything to do with the price at which that gasoline may be resold by any of these four dealers?

A. No, sir.

Q. Indeed, does the Company have anything to say 176 about whether they shall resell it at all or not?

A. Nothing.

Q. Do they operate their businesses entirely independently of the Standard Oil Company?

A. Yes, sir.

Q. Does the Standard Oil Company have any interest in their profits or in their business from any standpoint?

A. No, sir.

Q. I mean, financial interest of any kind?

A. No, sir.

Q. Do they bear the entire expense of their own operations in their business?

A. They do.

Q. Do they have any assistance or help paid for by the Standard Oil Company?

A. They have none.

Q. Does the Standard Oil Company have any power or right to in any wise control any branch of the business of any of these customers?

A. They have not.

Mr. Austin: I object to that question.

Trial Examiner Ballinger: Does counsel insist on the question?

Mr. Hanley: No, I don't.

Trial Examiner Ballinger: Objection sustained.

177 By Mr. Hanley:

Q. Do you or does the company, in fact, exercise any control whatsoever over either the business of these four dealers or any of the service station operators or over the disposition of the gasoline sold to them, or any of them?

Mr. Austin: I object to that question, Your Honor. I think it is entirely too general and calls for a conclusion;

that might be argued that the company exercises control in lots of ways. I think it should be directed more specifically to the particular thing that you may have in mind. I might get up here and argue for quite a while about how much control the company has.

Mr. Hanley: I think, Your Honor, I will insist on that question. This man is not only an expert in the oil business, but he is the manager of the Respondent in this vicinity, and he knows whether there is any control or not. It seems to me he is entitled to testify specifically on that subject, and if it is insisted here—I didn't know that it was—if it is insisted here that this company does exercise any control, it is a matter of proof for the Commission, and the burden is upon the Commission to establish it.

Trial Examiner Ballinger: Haven't you pretty well covered the field in detail?

Mr. Hanley: I intended to cover it in detail, but I don't want to leave anything out, Your Honor, because we 178 don't exercise any control.

Trial Examiner Ballinger: The Examiner rules that it be a conclusion, sustains the objection.

By Mr. Hanley:

Q. Does the Standard Oil Company in its operations in Detroit, make any effort, Mr. Raupagh, of any kind to police the disposition of gasoline to any class of customers to which the company may sell in Detroit?

A. No, sir.

Q. I might ask you, Mr. Raupagh, if all of these classes of customers, both the four tank car dealers and all of the service station operators, whether they be lessee dealers, or other dealers, if they pay all of their own taxes on any property which is not company property?

A. Yes, they do.

Q. They secure their own permits to do business?

A. Yes.

Q. Licenses, if there are any?

Trial Examiner Ballinger: Does your knowledge go any further than that the Standard Oil Company does not pay the taxes?

A. Yes, it does, Your Honor.

Trial Examiner Ballinger: You know of your own personal knowledge that they pay the taxes?

A. Yes.

179 By Mr. Hanley:

Q. And does the Standard Oil Company pay any social security or workmen's compensation or any taxes of that character, if there are any levied in this State, on the employees of any of these dealers?

A. No, sir.

Mr. Austin: Your Honor, I do not object to a reasonable amount of this line, but, after all, we have not contended that the Standard Oil Company fixes the resale prices of its customers, nor have we alleged that or attempted to prove that it controls the prices at which they resell or the manner in which they run their stations. I think we are just getting a little far afield from the direct examination and from the issues.

Mr. Hanley: Now, on that statement of counsel, I will desist from any further pursuit of this subject. I don't know just what he is going to contend, Your Honor.

By Mr. Hanley:

Q. Mr. Raupagh, you were shown yesterday an Exhibit 5-A to J, being a file of freight bills originating in the year 1939, covering five cars of gasoline shipped apparently from Whiting to some or all of the four tank car dealers of Detroit.

A. Yes, sir.

Q. You have examined that Exhibit?

A. Yes, sir.

180 Q. Does that disclose shipment of five cars of gasoline in the year 1939; in the spring of 1939?

A. I am just trying to find the date (referring to document). Yes, sir.

Q. Can you explain, Mr. Raupagh, how it occurred that that shipment, or those shipments were made?

A. Yes. That was an emergency proposition. We were out of stock of this particular grade of gasoline at River Rouge, so they were shipped direct from the refinery.

Q. Does it sometimes occur, Mr. Raupagh, in the closed navigation period of the year, you will sometimes run short at River Rouge of some product?

A. Yes, sir.

Q. When that does occur, have you in the past, from time to time, supplied an order, or filled an order by asking the refinery at Whiting to make a shipment by tank car?

A. What happens.

Q. I think you have testified that the last time that that occurred, to your knowledge, was in April of 1940.

A. Yes, sir.

Q. And did that involve one tank car of material?

A. Yes, sir.

Q. Was there any other such occurrence in 1940, to your knowledge?

181 A. None that I know of.

Q. Has there been any this year?

A. None that I know of.

Q. Mr. Raupagh, was there any such transaction pending at the time that this Complaint was filed against the Standard Oil Company? For your information, the Complaint was filed December—

Trial Examiner Ballinger: The Complaint was issued November 29, 1940.

Mr. Austin: It was served on the 30th of November, I think.

Mr. Hanley: Will you read the question, Mr. Reporter?

(The question was read.)

A. On or about November 30, 1940? No.

Mr. Austin: Pardon me. What sort of a transaction were you referring to; one of these shipments?

Mr. Hanley; One of these shipments out of Whiting.

By Mr. Hanley:

Q. Has there been any such transaction since this case has been pending?

A. No.

Q. Are there any such transactions pending now?

A. No.

182 Q. Is that class of transaction, so far as supplying these four jobbers, an extraordinary, unusual method of sending them gasoline?

A. It is.

Q. Is the practice which you have described of supplying their orders out of the River Rouge Terminal the ordinary, usual, and customary method of supplying gasoline to them?

A. It is.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: You may take the witness.

Mr. Austin: I have one slight matter here that I want to ask about, which is not strictly redirect. I presume you won't object, Mr. Hanley?

Mr. Hanley: Go right ahead, Mr. Austin.

Redirect Examination.

By Mr. Austin:

Q. Mr. Raupagh, the Standard Oil Company issues what is known as credit cards, does it not?

A. Yes, sir.

Q. Will you describe those cards, and to whom they are issued?

A. I can show you one.

Q. If you will, please?

183 (The witness handed document to counsel for the Commission.)

By Mr. Austin:

Q. I notice from this card which you have handed to me, Mr. Raupagh, that this permits the customer whose name is typed on the card to purchase gasoline on credit at a Standard Oil Station.

A. That's right, sir.

Q. How many of these cards are in circulation, or how many of them have been issued in Detroit?

Mr. Hanley: That is objected to as incompetent, irrelevant, and immaterial, in view of counsel's statement a few moments ago that he wasn't pressing the issue of control or anything of that sort.

Mr. Austin: I am not.

Mr. Hanley: Then, may I inquire what the purpose of this examination is?

Mr. Austin: I want to find out the use of these cards, as a matter of records of the—as to the transactions that are carried out between the service stations and the company. That is a great deal material, along that line, in connection with price discrimination and prices charged, which doesn't have anything to do with price fixing. There is no claim of price fixing in this case.

Mr. Hanley: I still don't understand. Does your 184 Honor understand the purpose?

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record. Proceed. What is the last question?

(The question was read.)

Trial Examiner Ballinger: Do I understand that is merely a preliminary question?

Mr. Austin: That's right.

Trial Examiner Ballinger: Objection overruled.

Mr. Hanley: Exception.

By Mr. Austin:

Q. You may answer.

A. I haven't the exact number in my mind.

Q. Well, approximately is all I want.

A. Oh, eight or ten thousand.

Mr. Austin: In view of the material appearing on this card showing the territory over which it is used, I would like to offer this card in evidence with the understanding that a duplicate will be supplied by counsel for the Respondent so that I can return this one to Mr. Raupagh.

Mr. Hanley: No objection to the copy, but the offer is objected to on the ground it is irrelevant, incompetent and immaterial; on the ground there is no issue in 185 this case on that; it is entirely outside the pleadings.

It is contrary to the statement of counsel on the record that he wasn't seeking to establish anything relative to the control of Standard Oil dealer stations by the Standard Oil Company; that this card has no probative value on any issue in this case or on anything alleged in the Commission's Complaint; that it is not issued to dealers in gasoline, but is issued to consumers of gasoline who are not controlled by or within the purview of the Robinson-Patman Act, Clayton Act, or any of the anti-trust acts or any of the laws under which the Commission's Complaint is leveled against the Respondent in this lawsuit.

Mr. Austin: I would like to say two things.

In the first place, counsel referred to my stipulation as to control, and I want to make it clear I stipulated we were not trying to prove price control nor control such as control over salaries and other control over employees of those stations, but I want to make it clear that what I said a while ago doesn't mean that in so far as control may be important in connection with price discrimination and the effects of price discrimination that I have certainly not intended to say that the element of control may not

A. No, prior to '40.

Q. When was that station opened at Gratiot and Madeline?

A. They were both opened within a year of each other, I think about in '38. One was in '38 and—

Q. Which one was in '38?

A. Well, Gratiot was either '37 or '38, and Woodward was either '38 or '39, but between '37 and '39 we opened both of them.

Q. And the station at John R is the oldest?

A. Yes, sir.

Q. And you opened them at Michigan Avenue, East Jefferson, and Grand River?

A. Grand River.

Q. Did you ever have a station at 15801 West Warren?

A. No.

Q. I don't know where I got that from, but some place. I knew that it wasn't right, but I thought possibly you might have had a station there and discontinued it.
215 You have six stores now; is that right?

A. Yes.

Q. Plus this store—is it? Or is it a service station that you do not operate under your name?

A. It is a service station. It is just a gasoline station. It is right across the street from our Grand River—

Q. Across the street from your Grand River store?

A. Yes, it is.

Trial Examiner Ballinger: I understand they do operate it, but not under their name.

The Witness: That is correct.

Mr. Austin: Yes.

By Mr. Austin:

Q. What name is that operated under?

A. Charlie's Service Station. That is the man who operates it. That is under his name—the man who runs it.

Q. Is that station selling Standard gas, too?

A. Yes, it does.

Q. Well, that is in competition with your Grand River Store, isn't it?

A. The same as all other stations in that neighborhood, yes. There was a Standard station there prior to the time that we acquired the lease.

be important; but not as to price fixing. There is no claim of control fixing of retail price. That has nothing
186 to do, what I just said, with the question of this card. I simply wanted to make clear what I said awhile ago.

Mr. Hanley: If Mr. Austin can tell me what he is trying to prove with this thing, maybe I can withdraw the objection.

Trial Examiner Ballinger: I would like to know the exact purpose.

Mr. Austin: I haven't gotten to the questions I intended to ask, which are very simple.

Trial Examiner Ballinger: Before you get the card into evidence shouldn't you lay a predicate to justify its admission?

Mr. Austin: On the question of admissibility, I should pass this up to your Honor, and if you will look at the material on the inside showing the territory in which it is used, that is the reason I would like to introduce it, which may have some bearing on Interstate Commerce. I don't know.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

The objection is overruled. The document will be admitted in evidence as Commission's Exhibit 21, the present document to be withdrawn and a copy substituted.

187 (The document referred to was marked, for identification, "COMMISSION'S EXHIBIT 21," and was received in evidence.)

Mr. Austin: May I go off the record just a minute?

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Mr. Raupagh, when an automobile owner who has one of these credit cards goes to a Standard Oil Station, how does he use the card? He buys some gas?

A. He buys some gasoline and shows the card and a credit slip ~~is then~~ made up, or a charge ticket, which he signs.

Q. The customer signs it?

A. Yes, sir.

Q. Is the price of gasoline at that store the same as 216 at your Grand River store? Has it varied?

A. You mean the retail price at which he is selling?

Q: Yes.

A: There is no attempt on the part of our company to regulate the retail price. I can't answer that. I would say it varies.

Q. But it is your own station—

A. I would say it varies from time to time.

Q. You said you operate it, so you would naturally regulate it, wouldn't you?

A. No, we don't control the functions of the man who operates it. He operates on a commission basis, and he uses his own judgment on the resale price.

Q. Well, he is an employee of yours, isn't he?

A. On a percentage basis. He receives both a salary and gets a commission on his sales. He is sort of a—I would say holds a quasi employee position. He is permitted to use his own judgment in the running of that station.

Q. What is the volume of gasoline at that station? If it is small, I want to forget it.

A. I would say it runs anywhere from—it represents my best judgment—anywhere from seven to 15,000 a month, depending on the season of the year, competitive conditions, and all the other factors.

Q. What is the average volume at your Grand River store across the street?

217 A. Of course, there is no comparison in size of the physical buildings. We have a real establishment there, and about four times as many pumps, and I would say that our gallonage there is about four times what that station is running, anywhere from, oh, twenty-five to perhaps 45,000 a month, depending on all the other factors I named.

Q. Does the Standard Oil Company own any stock in Ned's Auto Supply Company?

A. No, sir.

Q. Or the Merchant's Supply Company?

A. Nor anyone else. It is all in the family.

Q. When these various stores, or, at least—well, I will make it apply to all of them, but I assume it wouldn't apply, at least, to the first two, perhaps not to the others—when those stores, the facilities were constructed, those

Q. And does he keep a copy of it?

A. He can have a copy, if he wishes it.

Q. Now, what does the service station operator do with that slip?

A. He turns it to the driver that delivers the gasoline and he is given credit for that as he pays for the gasoline.

Q. That is accepted in lieu of cash?

A. Yes, sir.

188 Q. And in the case of service stations who purchase their gasoline from, say, Ned's Auto Supply Company, or Citrin-Kolb; what do those service station operators do with those credit slips?

A. They carry on practically the same operation with the exception that they turn the charge tickets or credit slips in to the main office of their supplier.

Q. Those credit slips which are turned in to your drivers, I suppose they bring them back to your office?

A. Yes, sir.

Q. And then do you undertake to collect from the customer?

A. Yes.

Q. How often do you bill them?

A. We bill them monthly.

Q. And the slips which are turned in to the tank car or transport truck buyers, such as Ned's and Citrin-Kolb, do they not, in turn, send those slips in to you and take credit for them?

A. Yes, sir.

Q. You give them credit for the amount of those slips?

A. Either credit or cash.

Q. You give that credit without waiting to see whether you can collect it?

A. Yes, sir.

189 Q. In other words, you assume full responsibility for collection?

A. Yes, sir.

Q. Then, do you keep customers' records of all of these charge accounts at your main office?

A. Yes, sir; we keep an account with each customer.

Q. And would those accounts show how much the gasoline the customers had bought each month?

A. That would show the charge; whatever charge was on the ticket.

Q. So that would show the price per gallon, at least, over a period of a month which the customer had paid. Well, of course, it would show it for each purchase, I assume—at the time—but how long do you keep those credit slips?

A. We keep them a period of 90 days.

Q. And after that you still retain the records showing the customer's account charges made?

A. Yes, we have a ledger record.

Q. Would that show the number of gallons purchased by the customer as well as the price charged?

A. I don't believe it would; it would simply show the charge, the amount of the charge.

Q. Are you sure about that?

A. Quite sure.

Q. Because when you bill the customer at the end 190 of the month, doesn't your bill show not only the charge, but what it is for, and, certainly, wouldn't it show whether it is for gasoline or accessories, or for something else?

A. No. It shows the amount.

Q. The bill that you send the customer?

A. Yes, sir. I don't mean the bill we send to the customer; I mean the statement we sent to the customer at the end of the month.

Q. Don't you send him an itemized statement, so much for gasoline and so much for oil and so much for something else?

A. We don't itemize it.

Q. Just the amount?

A. Just the amount.

Q. Well, then, sometimes doesn't the customer call you up or write in and want to know what that is for?

A. Yes————.

Q. Well, I don't want to go into that any further, but I just wanted to show that those records are sent in and you maintain the individual slips for 90 days.

A. Yes, sir.

Q. And the charge records you keep for how long?

A. Well, that is a period of years.

Q. Mr. Raupagh, as to the tankers which bring the gasoline to River Rouge from Whiting, how frequently are those deliveries made by tanker during the summer?

191 A. Oh, they come in there every week, sometimes twice a week. It all depends.

Q. What does it depend on?

A. Well, it depends on how much stock we have at the terminal and how much they want to transport.

Q. How much who wants to transport?

A. Well, how much we want to transport up there.

Q. Does that determination result partially by the refinery at Whiting, or do you determine it entirely at this end?

A. Oh, that is partially determined by the refinery at Whiting.

Q. How much of that million and a half barrel storage space at River Rouge is used during different periods of the year?

A. Well, it is practically all in use.

Q. Are those tanks kept full most of the time?

A. Oh, they are not kept full, but it is all in use.

Q. Well, that is what I meant as to the capacity. Has the full capacity of the tanks there ever been filled at one time?

A. Yes, I would say they have.

Q. When would that be? In the fall?

A. That would be in the fall.

Q. Is practically the entire million and a half
192 barrel storage required to store enough gasoline for
winter consumption?

A. No.

Q. How much is necessary?

A. Oh, I think we use about a million barrels.

Q. During what period?

A. During the winter months.

Q. How late do the tankers ply on the lakes?

A. Well, I can't tell you definitely just when the navigation season closes, but there is a definite date that they generally close. It depends on the weather.

Q. Is it October, November, December?

A. Yes, it is about November, December.

Q. November, December.

How do you determine how much gasoline you need to put in your storage prior to the close of navigation?

A. Well, we know about what our sales ran the previous year.

Q. Is that estimate based partly upon the requirements that are purchased by your contract dealers and lessees?

A. It is based upon the entire consumption of gasoline that we expect to have.

221 Q. What change was made about March 7, 1938?

A. Well, we acquired the bulk plant and rolling equipment, prepared to buy gasoline on a tank car basis from either the Standard Oil Company or someone else. Our volume and competitive conditions at that time reached the point where we felt that that was the basis under which we had to buy in order to be competitive, and we started to purchase from Standard Oil on a tank car basis and—

Q. Did you apply to Standard Oil to be permitted to—

A. Oh, yes, indeed.

Q. —to purchase on that basis?

A. And even before that—that had gone on over a period of two or three years.

Q. You mean you had been asking to be put on a tank car basis for two or three years?

A. Well, we had received competitive offers to buy on a tank car basis, and we would have—.

Q. I am just talking now about what you negotiated with Standard.

A. I couldn't answer your question directly, because we advised Standard Oil Company of these competitive offers, too, as a means of getting them to sell us on that basis.

Q. Why did you want to change over from tank wagon to tank car?

A. Why, one of the factors, of course, was the bet-

222 ter price. We felt that our then volume would make it possible for us to operate a bulk plant, pay the cost of operating a bulk plant and still have some profit left which would, of course, be one of the commodities that the wholesale distributor, merchants—would just result in additional profit to the operation.

Q. Did you feel that it would put you in better competitive position in the gasoline market, in the retail gasoline market?

A. Why, you mean Neil's?

Q. Yes.

A. I can't say that that was a determining factor. I don't think that entered into the matter of it, being in a better retail position. It was largely to make more profit. The same is true at any time you can better the buying price on any commodity, you primarily think of making additional profit from it. That is true in any commodity we buy, be it gasoline or tires.

Q. And that purchase by tank car has continued up to

Q. Do you keep records in your office so that you know approximately how much gas every one of your stations uses from month to month or from week to week?

193 A. We have a record in our office showing what each one of these stations—what their gallonage is.

Q. You use that, do you not, as a basis for anticipating future requirements?

A. We use the composite of those figures.

Q. Did I understand you to say that the leases are approved at the Chicago office before they are closed or delivered to the lessee?

A. I believe they are. I would have to look at one of them to be absolutely sure, Mr. Austin.

Q. Would it help you to look at this lease (indicating)?

A. Yes.

Trial Examiner Ballinger: Handing the witness—

Mr. Austin: Handing Commission's Exhibit 1 to the witness.

Mr. Hanley: I just want to make a record motion, if your Honor please. At this time the Respondent moves to withdraw all of the questions asked by Respondent's counsel of this witness as to how service station leases were completed in Detroit and to strike all of the answers of this witness to such questions; and in addition thereto, we object to the question now asked by Commission's counsel in respect of the lease, for the reason that the lease has to do with the relation of landlord and tenant as between the Standard Oil Company and the re-
194 spective lessees, and irrespective of where or how
such contract of lease might be made, it is not commerce in gasoline in any respect, and the only commerce that would give the Commission jurisdiction in this case would be an interstate commerce in gasoline.

Mr. Austin: I realize Judge Hanley's point, your Honor, but I think it simply goes to the weight of the evidence in this case: I think it is clearly material and competent.

Trial Examiner Ballinger: You object to counsel's request to withdraw certain testimony, to strike it from the record?

Mr. Austin: Yes. I do not accept that.

Trial Examiner Ballinger: Object to that?

Mr. Austin: Yes.

Trial Examiner Ballinger: The objection of counsel the present time, or there hasn't been a recent change to train delivery or transport truck?

A. We make no distinction between tank train—

Q. I just wanted to ask you whether you were—

A. We are still buying on a tank car basis.

223 Q. But deliveries are now made by transport truck?

A. Yes.

Q. That was covered by Mr. Raupagh?

A. Yes.

Q. It isn't necessary—

A. The only point I want to make is that it is still delivered to our bulk plant and into our bulk storage. There is no change in buying as far as we are concerned. They pump it in.

Q. In other words, you get the gas from them and you pay the price for it, and you don't care whether it comes in tank cars or by truck?

A. That is right. We have to have the same facilities there, the bulk storage tanks, and our pumping equipment.

Q. Except that you had to unload the tank cars and you don't have to unload the transport trucks; isn't that right?

A. Well, it is my impression that we use our pumps to unload the tank train. I think in our case that works out. I don't know whether the tank trains have pumps to pump it up into our high tanks. You see, our storage tanks are vertical rather than underground, and you have—and they fill from the top, so I believe we use our own pumps to unload from the tank train into our bulk storage tanks. I know of no saving that has resulted to us from receiv-
224 ing it in tank trains, as compared to tank car.

Q. Did you ask for that change, or did Standard Oil initiate that?

A. It was initiated by Standard Oil Company.

Q. Who owns the bulk plant? Merchant's Supply?

A. I believe Ned's own it now.

Q. Do they own it or do they lease it?

A. We lease it.

Q. Whom do you lease it from?

A. Lease it from the Michigan Terminal. They own the tanks. The tanks were there.

Q. Wasn't there a Gershenson Realty Company at one time that leased that property?

A. There still is.

Q. That leased that property?

is overruled and the request to withdraw or strike from the record certain testimony.

Mr. Austin: We have a question pending.

Trial Examiner Ballinger: One moment.

Judge Hanley, if you desire to insist on that request, you had better particularize as to the testimony to be withdrawn or stricken.

Mr. Hanley: Well, if your Honor please, if I think it is of sufficient importance, I will do that after I have 195 the transcript, if I may.

Trial Examiner Ballinger: At a later date.

Mr. Hanley: At a later date, or at the close of the Commission's case. I make this more for the purpose of not getting myself into any trap. I don't want to have it understood that I admit that the making of a lease is commerce in gasoline.

The Witness: What is the question?

(The question was read as follows: "Did I understand you to say that the leases are approved at the Chicago office before they are closed or delivered to the lessee?")

A. I find I am in error. These leases are signed and approved here.

By Mr. Austin:

Q. This lease is signed and approved here?

A. Yes.

Q. Are any of them—is the practice any different with any of the others?

A. No, sir.

Trial Examiner Ballinger: Is the authority obtained from the Chicago office to execute that lease?

The Witness: Yes.

Trial Examiner Ballinger: In each instance?

The Witness: No, as a general proposition.

196 Trial Examiner Ballinger: General authority given?

The Witness: Yes.

By Mr. Austin:

Q. Do you notify the Chicago office of each one of these leases?

A. No.

~~Q. And terms?~~

A. No.

Q. What correspondence do you have with the Chicago office or what approvals do you get from them?

A. I think they have a record of each lease.

Q. What approvals do you have to get in connection with these leases?

A. We talk to them about it once a year, maybe.

Q. But not before you execute the lease?

A. No. What our general policy is.

Trial Examiner Ballinger: You have general authority to execute leases and transact such business?

The Witness: Yes, sir.

Trial Examiner Ballinger: Is that in writing or verbal?

The Witness: That is verbal.

By Mr. Austin:

Q. I believe you said yesterday you had only about
197 136 dealers, retail dealers who are under contract?

A. Yes, sir.

Q. Didn't you have about 225 of those in 1938?

A. I can't say that definitely, what we had in 1938.

Q. In any event, isn't it true that these contracts and leases, such as Commission's Exhibits 1 and 2, have been continuously in effect with all Standard Oil Company retail service station operators since 1936?

A. Yes.

Q. And ever since the Standard Oil Company ceased operating its own stations, it has done business with all of its retail purchasers under either one of these contracts or one of these leases?

A. Yes, sir.

Q. Would you describe a transport truck?

A. A transport truck is a vehicle of capacity of an ordinary tank car that transports, in our case, petroleum products over the highways.

Q. Well, is it one big tank or is it a series of tanks? Does it have a trailer and—

A. Sometimes it is one big tank; sometimes it is a series of tanks.

Q. The term tank train—truck train, rather, is used frequently, and that always made me visualize a sort of
a series of separate units going along trailing one
198 after the other. Now, I wondered whether a transport
truck might be a single tank or several tanks.

A. It is both.

Q. In either case, isn't it true that a transport truck might make several stops on a trip and that it is possible for it to unload a part of its gasoline at one place and part at another place?

A. It is possible, yes, sir.

Q. It isn't necessary that it all go to one stop and be unloaded together?

A. It is, so far as our service is concerned.

Q. Well, is it necessary, ~~or is that~~ simply the way that you do it?

A. That is the way we do it.

Mr. Austin: That is all.

Trial Examiner Ballinger: Any further questions?

Mr. Hanley: I have just a few, your Honor.

Recross Examination by Mr. Hanley.

Q. I wish you would straighten us out on this lease situation, Mr. Raupagh. Is it now your testimony that these leases are negotiated and signed and completed here in Detroit without reference to Chicago?

A. Yes, sir.

Q. In respect of the credit card, Exhibit 21, to 199 whom are those credit cards issued?

A. They are issued to the consumer.

Q. What do you mean by consumer?

A. I mean automobile owner.

Q. Where are they used?

A. They are used for the purpose of purchasing at Standard Service Stations—I mean, service stations handling Standard products.

Q. Is the service station operator required to honor those cards if he chooses not to do so?

A. No, he is not.

Q. If he does honor the card, does he then make out the credit slip for the amount that he is charging for gasoline on that particular day?

A. Yes.

Q. If I understand you, he then uses that credit slip as cash either with the Standard Oil Company or his jobber supplier?

A. Yes, sir.

Q. And the Standard Oil Company assumes the responsibility of making the collection?

A. Yes, sir.

Q. In the case of the jobber transaction, where some Standard Oil products dealer may honor a card and then send the slip to his jobber supplier for credit, the
200 jobber gives him the full amount of credit that appears
on that slip, does he not? That is, gives the dealer the full amount of credit that appears on the slip?

A. Yes, sir.

Q. And then, in turn, the jobber is reimbursed in like amount by the Standard Oil Company?

A. Yes, sir.

Q. So the jobber in that instance neither loses nor gains anything; is that right?

A. That is right..

Q. Now, those slips, as they come in to the Standard Oil Company office or the jobber's office, as the case may be, would indicate only the price of gasoline on the day that the slip is dated or originates; is that not true?

A. That is true.

Q. There are many stations where the use of credit cards would be very limited, are there not, Mr. Raupagh?

A. There are.

Q. It might be that a station would go for many days or weeks without having occasion to honor a credit card; is that true?

A. That is true.

Q. You do not keep the detailed records, that is, the slips beyond the period of 90 days?

201 A. We do not.

Mr. Hanley: You may take the witness.

Redirect Examination by Mr. Austin..

Q. Well, just along the line of what was asked here: Are there service stations who refuse to honor one of those cards?

A. Yes, sir. Yes, sir.

Q. What can a service station lose by not honoring—by honoring it if he uses it for cash?

A. Well, there are just some individuals that don't want to be bothered with that, even.

Q. Well, that card states on it that it may be used at any Standard Oil of Indiana service station.

A. That is; providing the service station will accept them.

A. The fall; yes.

Q. Why is it that your figures don't appear in the report of the Secretary of State?

A. That had something to do with that criminal case, too. At first, when we started on tank car, we were told we didn't have to have that wholesaler's license, which automatically reveals your figures, because we weren't soli-
231 citing other dealers' business, but, subsequent to that criminal suit which was thrown out, why, we were approached by a member of the tax office who stated that we would have to have a wholesaler's license, so we took one out at that time.

Q. Have you got your volume for 1936?

A. I have a paper here—and incidentally, that is a copy of one that our office gave your investigator on November 28th 1939.

Q. We have that. Starting—that starts January, 1937, though; the one I think you are referring to.

A. That is the earliest I have, and that runs through August of 1939.

Q. Do you know approximately what your volume was in 1936?

A. I can't answer that without referring to the record.

Q. Do you know whether it was 2,000,000 or 3,000,000? Perhaps that would be a little to broad, anyway.

A. I would only be guessing, anyway.

Q. Could you call up some time—

A. During the noon hour.

Q. —this noon and just get the total volume? I don't care about the monthly. If you will just give me the total volume for 1936 and that will give us a basis to start out with.

A. Total volume. You mean, including Ford Benzol?

232 Q. No, Standard.

A. I believe these figures we gave you included Ford Benzol.

Q. Yes. I will take that back, Mr. Gershenson. I think we should have the whole figure, because that is what is reported in the Secretary of State's reports, and that is what is on these statements I have, so it wouldn't be any use for comparison, otherwise.

A. The reason I ask, I don't think we have it broken up. These figures are the total gallons.

Q. Did I ask you what percentage of the gasoline sold

Q. Does the card say "provided the service station will accept them"?

A. I don't know.

Mr. Hanley: Yes, it does.

A. (Cont'd) But I know definitely that the dealers are not required—

Mr. Austin: It speaks for itself.

Mr. Hanley: It speaks for itself, and you put it in the record.

202 Mr. Austin: I didn't realize I said that. I don't think it is very important.

By Mr. Austin:

Q. But, in any event, I am only interested in those cards to the extent that they show the price paid, and that is what I wanted to make clear, that the customer using one of those credit cards pays the same price that he would pay if he paid cash; isn't that true?

A. Yes.

203 Q. At the particular time?

A. Yes.

Q. In other words, he is charged the same amount that he would pay if he paid cash for gas?

A. If that's what the driver elects.

Q. At that station?

A. Yes, if that's what the driver elects.

Mr. Austin: That's all.

Trial Examiner Ballinger: The Examiner would like to ask the witness a question or two.

Examination by the Trial Examiner.

Q. You are in charge of a sales district in Michigan, or in a certain section of the country, established by the Standard Oil, are you not?

A. Yes.

Q. The Standard Oil has like sales districts throughout the United States, has it not?

A. Yes, sir.

Q. Everything you do, you do as and for the Standard Oil Company, do you not?

A. Yes, sir.

Trial Examiner Ballinger: That's all.

(Witness excused.)

to stations is Ford Benzol, compared with all of the Standard gas?

A. You didn't ask that, and I can't answer that right now. I would have to check that.

Q. Would it be quite small?

A. It would vary in some stations. The Ford Motor would be higher, and certain seasons of the year, there would be a difference.

Q. Generally it would be less of the Ford Benzol and the Solite Ethyl, or what?

A. I would say Ford Benzol would be slightly more.

Q. Than the Ethyl?

A. Yes.

Q. Because we have the figures from Mr. Raupagh
233 as to the percentage of Ethyl, which is not very big.

A. About 10%. That would be a guess.

Q. If you could get more accurate information on that, without taking up time, I would like to know approximately, because I want to know what proportion of this gasoline is Ford Benzol in a rough way, in these figures; and the 1936 volume, and I think that will be all I can think of at the moment.

I would like to show you, Mr. Gershenson, the record here which purports to be—and I believe is a copy of the testimony given by your brother Samuel in that suit in 1936—yours is here, too—and I want to see if it refreshes your recollection upon the way that the transactions were handled by Ned's and Merchant's and Standard right after the bulk plant was purchased (handing documents to witness).

Mr. Hanley: What pages, please, Mr. Austin?

Mr. Austin: 18 and 19.

(The witness referred to documents.)

Mr. Austin: The witness says it does not refresh his memory, so I will abandon any further questions along that line, and, if your Honor please, I will be glad to adjourn at this time.

Trial Examiner Ballinger: The suggestion of counsel
for the Commission meets with the approval of the
234 Examiner, without objection on the part of counsel
for the Respondent.

Now, at 12:45 P. M., the hearing stands adjourned to be reconvened at 2 P. M..

(Thereupon at 12:45 P. M., an adjournment was taken to reconvene at 2 P. M.)

Trial Examiner Ballinger: We will have a five 204 minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: We will come to order.

Mr. Austin: Mr. Charles Gershenson.

CHARLES H. GERSHENSON, was thereupon called as a witness for the Commission and, having been first duly sworn, testified as follows:

Trial Examiner Ballinger: Let me have your full name, please.

The Witness: Charles H. Gershenson.

Direct Examination by Mr. Austin.

Q. What is your business, Mr. Gershenson?

A. I am connected with Ned's Auto Supply Company.

Q. Is Ned's Auto Supply Company a corporation?

A. Yes, it is.

Q. And what is your position with that corporation?

A. I am president.

Q. When was Ned's Auto Supply Company incorporated?

A. 1938. Prior to that it was a co-partnership. Do you want the exact date of the incorporation?

Q. Well, if you have it convenient.

A. I think I have it. (Witness refers to documents.) September 1, 1938.

Q. Who are the other officers of the corporation?

205 A. My brother William is vice-president; Aaron, treasurer; Samuel, secretary; and my sister Rose. She holds no office but is a stockholder. I am not sure of the secretary and treasurer. That might be reversed.

Q. And who are the directors?

A. We five.

Q. When Ned's Auto Supply operated as a partnership, who were the partners?

A. The same ones.

Q. The four brothers and one sister?

A. Yes.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

235 **Afternoon Session.**

2 P. M.

Trial Examiner Ballinger: Come to order.

Mr. Hanley: At this time, your Honor, we are able to supply counsel with the copies of the Goldberg leases which we agreed to have made, and also a copy of the credit card.

Mr. Austin: I believe it is only necessary for me to turn these over to the reporter and have them marked. They have already been introduced.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

CHARLES H. GERSHENSON thereupon resumed the stand, and, having been heretofore duly sworn, testified further as follows:

Direct Examination (Resumed) by Mr. Austin.

Q. Mr. Gershenson, you received a subpoena from the Federal Trade Commission requesting you to produce certain information regarding retail prices?

A. Yes, sir.

Q. Posted at the Ned's Auto Supply Company service stations?

A. Yes, sir.

236 Q. And also all discounts, premiums, rebates, and so forth, from those prices?

A. Yes, sir.

Q. Have you got that information with you?

A. I interpret that subpoena as having the information to make statements. I can testify as to that. We don't have a record—we don't have an office record as to what our continual posted price is from any single document.

Q. Can you state for the record the retail prices posted on tanks at the gasoline stations or stores of Ned's Auto Supply Company from—I would like to have it from 1937 to date, although the subpoena only says from January 1, 1938.

A. I have them from January, 1938, to date, through July, 1940.

By Mr. Austin.

Q. What is your sister's name?

A. Juliar, J-u-l-i-a-r; Rose Juliar.

Q. Where is the main office of the company located?

A. At 9465 Grand River Avenue, in Detroit.

Q. And where was the partnership office located?

A. Well, at the time we formed the corporation, at the same place.

Q. And prior to that?

A. Oh, in several places.

Q. Wasn't there an address on Greenway?

206 A. That is in the same building; that is another location.

Q. Greenway and Grand River was it?

A. Yes. Greenway runs into Grand River and there is an entrance on Greenway and one on Grand River.

Q. Are you an officer in any other corporation?

A. Yes. We have another company, the Merchants Supply Company. I am vice-president of that.

Q. When was that incorporated?

A. That was incorporated at the same time; September 1, 1938.

Q. And who are the other officers of that company?

A. My brother William is president, and my other two brothers are also officers.

Q. And are the directors of Merchants Supply Company the same as the directors of Ned's Auto Supply Company?

A. Yes, they are.

Q. And where is the office of Merchants Supply Company?

A. That is located at 4800 Greenway.

Q. Is that the same building?

A. It is in the same physical building, but have separate offices; utilize separate space.

Q. Prior to incorporation, was Merchants Auto Supply Company a partnership?

A. No, it was operated—registered as operating under an assumed name.

207 Q. Who was the operator?

A. My brother Samuel.

Q. Samuel Gershenson, doing business as Merchants Supply Company?

A. That's right. When it was incorporated, the name was changed from Merchants Supply Company to Merchants Auto Supply Company.

Q. It is now Merchants Auto Supply Company?

A. It is now Merchants Auto Supply Company, and when it was operating under an assumed name, it was Merchants Supply Company.

Q. In what business is Ned's Auto Supply Company engaged?

A. General retail merchandising business. We sell a variety of products; gasoline, tires, electrical household appliances; sporting goods; general merchandiser of that nature.

Q. Do you operate retail gasoline stations; does Ned's Auto Supply Company operate retail gasoline stations?

A. The retail gasoline islands. A part of our larger operation. We do not operate any independent gasoline stations aside from our large building.

Q. But you do sell gasoline at each of your stores?

A. Yes, we do.

Q. What business is Merchants Auto Supply Company engaged in?

A. Merchants Auto Supply Company is a distributor
and wholesaler of practically the same products that
208 I have named, including motor oils and greases.

Q. Including gasoline?

A. No, we don't sell it. We did at one time.

Q. Then, as I understand, Merchants Auto Supply Company does not buy or sell any gasoline?

A. We did. We don't now.

Trial Examiner Ballinger: When did you cease?

The Witness: Oh, we sold it for just a few months around in March of 1938 until about June, and then we discontinued buying and selling gasoline.

By Mr. Austin:

Q. Prior to March, 1938, did the business, as operated by Samuel Gershenson, deal in gasoline?

A. No.

Q. And during the short period which you mentioned in 1938, the gasoline purchased by the Merchants Supply Company—which it was then—from what company was that purchased?

A. The Standard Oil Company.

Q. And to whom was that gasoline sold?

A. Why—you mean by Merchants?

Q. Yes.

A. To Ned's Auto Supply Company; to one station. That's a station which we lease, but is operated by a lessee.

Q. Who leases it? I had better make that clear. In the first place, who leases the property upon which
209 the station is located?

A. Ned's Auto Supply Company.

Q. And Ned's Auto Supply Company then sub-leases that?

A. We don't know. It was, at that time, but today Ned's Auto Supply Company holds the lease and just operates it, but not under Ned's name. We just operate it as an independent station.

Q. But it is operated by Ned's?

A. Yes.

Q. The gasoline which Merchants Auto Supply Company purchased from Standard Oil Company in the Spring and early Summer of 1938; wasn't that merely a matter of billing and transfer? As I understand it, the gasoline was billed by Standard Oil Company to Merchants Auto Supply Company and—.

Trial Examiner Ballinger: Is that correct?

The Witness: Yes, that is correct. It was also delivered to Merchants.

By Mr. Austin:

Q. Yes.

A. Merchants had the bulk plant, the warehousing facilities, the delivery equipment, and it was a functioning operation. It wasn't just a billing operation, as you stated.

Q. What I mean, was the transfer from Merchants Supply to Ned's Auto Supply at that time—was that a purchase and sale transaction on the books of those two companies, or did Merchants Supply Company just re-
210 ceive that gasoline? Just state how that was handled.

A. I don't understand the second part of your question. I understand what you mean by purchase and sale, and that's what it was. There was no "but." That's what it was.

Q. As between Merchants Supply and Ned's Auto Supply?

A. Yes; the same as merchandise to any other of its customers.

Q. But wasn't the gasoline transfer to Ned's Auto Supply at the same price which Merchants Supply paid for it?

A. No, that is not so. There was a differential that I don't recall now, but Merchants paid the operating expense and retained the profit and sold it to Ned's at the then prevailing tank wagon or dealer price. I am reasonably sure that's it.

Q. That's the way it shows on the books of those two concerns?

A. On the books. It was sold to Ned's at the regular dealer's price.

Q. That, however, only covers a period of perhaps from March until May; something like that?

A. It covers from that until the instigation of this criminal suit that has been referred to in this record. At that time, Merchants ceased buying gasoline, and Ned's started to buy it direct from the Standard Oil Company.

Q. But after Ned's started to buy it direct, it was still delivered to the same bulk plant, was it not?

A. Ned's started operating that bulk plant, yes.

Q. Ned's took that bulk plant over, then, from the 241 Merchants Supply?

A. Yes.

Q. And from May of 1938 until now, has Ned's operated the bulk plant and made all the purchases of gasoline?

A. Ned's makes all the purchases of the gasoline. I might point out this: The personnel—I think I was in error when I said that Ned's started to bulk plant. Merchants continued to operate the bulk plant and charged Ned's a certain amount for performing that function.

Q. But that was a transaction just between those two companies?

A. Between the two companies, yes. I don't remember just exactly how it was handled. The two companies are two separate corporations performing different functions, but having the same stockholders in both corporations.

Q. Yes, and Merchants Supply Company has never resold gasoline at retail, have they?

A. No, not at retail. They sold to some commercial accounts.

Q. Just during that period, or since?

A. Just during that period.

Q. Prior to 1938, where did Ned's Auto Supply Company, the partnership, obtain its gasoline?

A. From the Standard Oil Company. Prior to 1938?

Q. Yes.

A. Yes, that's right; from Standard Oil, on a tank wagon basis.

212 Q. Has Ned's always been a Standard Oil dealer?

A. From the first day; for some twenty to twenty-two years.

Q. Does Ned's Auto Supply Company sell gasoline otherwise than at retail at the present time?

A. Not as a general practice. There might have been some isolated instances where we would supply gasoline to a commercial account and whom we sell other commodities to.

Q. But not to other dealers?

213 A. No, not to other dealers other than this one station which we don't operate under our name.

Q. Would you be good enough to just state when Ned's Auto Supply Company—and I refer now in saying Ned's Auto Supply Company to the partnership prior to 1938 or prior to the date of incorporation, and since then I will be referring to the corporation, so it won't be necessary to state each time—but I would like to know—well, we will not carry back too far. You said that Ned's Auto Supply Company has been in business for about 22 years?

A. Yes.

Q. And in the beginning of 1936, how many retail outlets did Ned's have?

A. I believe it was four. Yes, it was four.

Q. Could you state approximately the date when those four stores were opened, and the locations?

A. The first one was opened—founded by our father in the fall of '18 or early 1918, out on John R. and Nevada. We still operate that one. The second one was some ten years later, approximately that, in Dearborn, at the corner of Michigan and Maple. We took over and remodeled a then renting service station. The third one was about in 1933 or '34. That was over on Jefferson and Manistique. And the fourth one was on Grand River, this one 214 where the main office is now, and Chicago Boulevard.

That was prior to '36, but right around that time—I believe '35. That covers up to the period of '36. And then between '36 and '40 we completed two others within about the same time, one at Woodward and Calvert, the other at Gratiot and Madeline.

Q. You say that was opened in 1940?

247 Q. When was that?

A. Oh, on and off for the past four years.

Q. Do you have copies of the continuities?

A. No, sir. About 50% of them the announcer ad libs. He just—it is just that type of program where he just talks about it, and I don't believe—I suppose the station has copies of that, but we never have received copies of that continuity.

Q. Has there been any radio advertising of a 2 cents a gallon discount or any other discount available at Ned's?

A. I don't recall of any in the past two years. There might have been some during the so-called price war there along some time in '38, but I have no independent recollections of any.

Q. Would that be about the first half of '38?

A. Yes.

Trial Examiner Ballinger: Has there been any advertising stating there were discounts using equivalent words: "Savings" or words to that effect?

The Witness: Yes, your Honor. I would say that there has been continuity that would make the general statement of savings, without referring to any discounts or any specific—or any posted price, just a general statement such as—

Trial Examiner Ballinger: How do you differentiate 248 between savings and discount? What is the difference?

The Witness: Well, my differentiation is this: if we were to say in our continuity: "Today's posted price is 16 cents a gallon, but during this specific period you can get a discount of 2 cents a gallon off and buy that gasoline at 14 cents," that would be a discount; while, when I refer to saving copy, I mean some general statements. You might see it in the automobile ads: "It is more economical to run our type of car than another," or "It is more economical to buy gasoline from Ned's that somewhere," the general statement.

Trial Examiner Ballinger: Where you use the word "saving": how do you use that? What does it mean?

The Witness: Not in connection with any price. If I may give a typical example: You can buy gasoline at Ned's savings, meaning by that whatever economies are available, either in service—it might not even—

Trial Examiner Ballinger: Have you coupled up the words "2 cent savings"?

7°

various locations that you named, did the Standard Oil Company aid in any way in financing the construction?

A. No, sir.

Q. Didn't loan you any money or the company or the partnership?

A. No, sir. Nor did we ask them to.

Q. Would that same be true as to the bulk plant?

A. Yes, sir. That is, they didn't.

Q. That is, they never had any financial interest in your company or your operations?

218. A. That is correct.

Q. Does Ned's Auto Supply Company own those six properties upon which your six main stores are located?

A. All except Dearborn, which we lease.

Q. Whom do you lease that from?

A. We lease that from—I believe it is an estate.

Q. You don't lease it from the Standard Oil?

A. No, we do not.

Q. Are any other brands of gasoline other than Standard sold at your stores?

A. Ford Benzol is sold at all of our stores.

Q. Isn't that rather customary here in Detroit, for Standard gasoline stores—Standard gasoline stations also to sell Ford Benzol?

A. I can't answer that question.

Q. Haven't you seen Ford Benzol pumps at other—

A. I have.

Q. —Standard stations?

A. I have seen Ford Benzol pumps at other Standard as well as at other stations selling Sun and all the other gasolines.

Q. Well, what I wanted to find out: the Ford Benzol doesn't have separate stations, does it?

A. I can't answer that question.

219 Q. What I mean is: just selling their own gasoline?

A. I know they used to. I don't know whether they still do or not. They might have close to the Ford Motor.

Q. What is Ford Benzol gas? What is Ford Benzol gas as compared with regular gas and Ethyl gas, and how does it sell in price?

A. It is sort of half way between both. It is generally sold at a cent a gallon more than regular and a cent a gallon under Ethyl.

Trial Examiner Ballinger: Where do they produce it?

The Witness: It is my understanding—now, this is just on information and belief, I have no direct information on this—that the product is manufactured by the Ford Motor Company but is sold by an independent distributor jobber.

Q. What is the name of the distributor from whom you purchase it?

A. My best guess is that it is Ford Benzol, Incorporated. Now, I might be wrong.

Q. Would it be Benzol Stations, Incorporated?

A. It might be Benzol Stations, Incorporated; yes. I just have a visual recollection. I don't have a—

Q. Do they have their own trucks for delivery?

A. Yes, they do, as far as I know. They might lease the equipment, but it is their own—

220 Q. It is their operated—

A. It is their operation, yes.

Q. It is their equipment?

A. Yes.

Q. Has all of the Standard Oil gasoline sold at Ned's Auto Supply Company stores since May, 1938, been purchased direct from the Standard Oil Company?

A. Yes, sir.

Q. Will you describe the method of purchase prior to March 7, 1938, and since that date?

A. Well, prior to March Ned's bought from Standard Oil Company on a tank wagon basis under the then prevailing—prior to March of 1938—under the then prevailing dealer contract, or whatever the relationship—whatever the legal relationship was, on a tank basis, and we would either call up and ask for a tank wagon of gasoline or else the driver, in his regular routine—

Q. Well, I don't care about that, Mr. Gershenson. You bought that tank wagon, and it was delivered by Standard Oil direct to the Ned's stations?

A. Yes.

Q. Is that right?

A. Yes.

Q. In the same way that other retail stations purchased?

A. In the same way that other retail—that is correct.

A. There still is. We boys have that—that was a part of the partnership, but the real estate wasn't included either in Ned's or in Merchant's when we formed a corporation, so we boys still hold the real estate in our own individual names.

Q. Well, does that lease of the bulk plant—that was leased by the realty company?

A. I believe that might run to the Gershenson Realty, and then we, in turn, lease it to Merchant's or Ned's.

Q. Was that bulk plant there when you got it? Was
225 it leased originally?

A. The equipment was there, yes, and we leased it from the Michigan—I don't recall the name.

Q. Well, that is not important.

A. It was there, though.

Q. When did you lease it?

A. Oh, about in February of '38.

Q. Did you at the time you leased it have an arrangement with Standard Oil Company to begin buying by tank car?

A. I believe we leased it before we had the arrangement. I know we had the bulk plant at the time we approached Standard Oil, because I entered into the negotiations. We were looking around for a bulk plant, and we found this one and we leased it with the expectation of buying gasoline in tank car from either Standard or somebody else. I can make the definite statement that we had the bulk plant at the time we went to Standard Oil and asked to buy gasoline on a tank car basis.

Q. After you began purchasing Standard gasoline in tank car quantities in March of '38, how did you at first obtain the transportation of that gasoline from the bulk plant to your gasoline pumps?

A. Before we bought our own equipment, we employed the Ford Benzol Company, who had excess equipment, and they used to haul the gasoline from our bulk plant to
226 our own retail stations. We hired them as a carrier.

Q. How much did they charge per gallon for that?

A. They charged us, to start with—this represents my best judgment; I might not have it exact—but it is my present impression it was ¾ of a cent a gallon for a few months, and then, I believe it went down to half a cent a gallon. I worked these negotiations out, and they said at first until they got an experience of how many trips they would have to make and work out the best route, that we agreed on three-quarters of a cent a gallon. One of the reasons we used them was to acquire some experience as to what equipment would be best suited for our deliveries, what size tank trucks.

Q. Do you recall that criminal case that you mentioned a while ago, there was some testimony taken, and I think you testified in the summer?

A. I testified. I recall that, yes.

Q. In '38. Do you recall that there was a representative of Benzol Stations, Incorporated, who appeared there as a witness and testified that the cost that they charged was .45 of a cent per gallon?

A. I didn't hear that witness' testimony. I do recall that there was a witness, that someone testified for Benzol, but I wasn't in the court room at the time, and I never seen
a transcript of his testimony.

227 Q. Are you positive about that half cent figure?
Might it not have been .45?

A. You mean 4.5?

Q. .45.

A. Yes.

Q. That is, of a cent.

A. You mean four and a half tenths rather than five tenths?

Q. That is right.

A. That might be so. I believe I qualified my answer and stated that it was about half a cent, as I recall it.

Q. But it may have been four and a half tenths, as you say, instead of five?

A. I know that it started with a higher figure.

Q. I suppose that could be proved?

A. That could be determined from the record, yes. I know it ranged—

Q. In any event, it wasn't over half a cent, perhaps except at the start when they may have charged a little more until they got their routes laid out?

A. I would say it was more than half a cent for a few months, maybe a month or two, and then the half cent. I believe it was half a cent when we discontinued. They wanted to raise it again, and that is when we discontinued and put in our own equipment. I am sure that that was it.
They came to us and said that they couldn't operate on
228 about half a cent, wanted to charge us more again.
That is when we took over the operation ourselves.

229 Q. Well, you either purchased or rented your own trucks, didn't you?

A. You mean, in the meantime?

Q. Yes.

A. No, I believe we got them to extend hauling it for about a month after we were ready, after they wanted us to discontinue. We were a customer of theirs, buying their Benzol, and the relationship was quite friendly.

Q. Didn't you say one of the reasons you had them in there, was wondering what sort of equipment you wanted to purchase yourself?

A. Yes.

Q. So you did want to take over the delivery yourself, after you established the bulk plants?

A. Not if we could get somebody to haul it for less than it cost us. There would be no point in taking it over.

Q. What did you do about trucks?

A. We bought one used truck and tank and one new Ford tractor, and another tank.

Q. How many is that altogether?

A. Two tractors and two tanks.

Q. And how many trucks and tractors, or tractors and tanks, do you operate now?

A. Two trucks and two tanks.

Q. That is the means by which all of the gasoline
230 is now transported from the bulk plant to Ned's stations?

A. Yes, except that Ford Benzol still deliver their gas.

Q. I am only referring now to the Standard gasoline.

A. Yes, that is right.

May I please make a comment to you, off the record; a personal matter?

Mr. Austin: Yes.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Have you the figures on the total volume of gasoline sold at retail by Ned's Auto Supply since about 1936? We have the figures in the record from the Secretary of State, but you don't start in those figures until the fall of 1938. Was that when you first registered as a licensed jobber, Mr. Gershenson?

Q. Through July?

A. Well, it has continued the same since, so that is the last change that I have.

Q. Before going into the prices on any one date, from 1936 to date, that is, to today, if a certain price is posted on the gasoline pumps of one of your stores, would the same price be posted at all of the other stores, or do the prices vary?

A. No, the same price would be at all the other stores, with this possible exception: if there is a price change 237 as of noon on a certain day, one or the other stores might be an hour or late changing, but all stores were supposed to have changed at the same time on the same day.

Q. That has been your invariable policy, to charge the same price, or, at least, to have the same posted price at all stations?

A. Yes, it has.

Q. In giving prices, it will be understood that they apply to all of the Ned's outlets, according to the number that were in operation at the time?

A. Yes, sir; that is right.

Q. Do you recall preparing a statement for the Commission's investigator, Mr. McDonald regarding posted prices on Red Crown gasoline?

A. I didn't prepare it. There was such a statement prepared by our company, and I know one was turned over to him.

Q. I would like to show you this sheet and ask you whether that is a copy of the information which was prepared, and whether that sheet was prepared in your office.

A. I have no way of identifying it, but I would say that it was. I didn't personally prepare it, but—

Q. Well, are those prices stated there correct for the period given? You see, those go back to 1936, and I thought that would be one way to bring them in here now.

238 A. They are all correct with one exception. There seems to be an error on one of them.

Q. Which one is that?

A. The one on January, '38. This one is 16, and on my record it is 16.5. This is the only one that is—all the others are correct.

Q. Does your record show 16.5 for August, 1937?

A. No. Mine starts with January, '38. This purports to be January.

Q. Is it your belief that the figure on the list that you brought with you is correct and that this figure is incorrect?

A. Yes, it is, because this is multiplied out according to the number of gallons for a dollar.

Trial Examiner Ballinger: Which is?

The Witness: The one that I have. The other is just one listed figure.

By Mr. Austin:

Q. Will you change that to the corrected figure, then, so that I can offer that sheet?

(The witness does as requested.)

Trial Examiner Ballinger: Put your initials behind it.

Mr. Austin: If your Honor please, I would like to offer in evidence this list of posted prices on Standard
239 Red Crown gasoline about which I have just interrogated Mr. Gershenson, with the notation on the record that it refers to the prices posted on the pumps at all of the retail gasoline stations operated by Ned's Auto Supply Company during the period covered by the date stated. The sheet itself doesn't say whose prices they are, and for that reason that should appear.

Trial Examiner Ballinger: Will you show that to counsel for Respondent?

(The paper referred to was handed to Mr. Hanley.)

Mr. Hanley: No objection.

Trial Examiner Ballinger: Without objection, the document is admitted in evidence as Commission's exhibit 22.

(The document referred to was marked, for identification, COMMISSION'S EXHIBIT 22, and was received in evidence.)

By Mr. Austin:

Q. Now, commencing with January, 1938, from the information you have with you, I would like to have you state the posted retail prices at Ned's stations, giving the dates of all changes.

A. I will read these.

May I make this additional statement: that this has some prices that weren't on your statement; in other
240 words, didn't get a chance to say that before, in answer to that question, but this has about two or three price changes that weren't on that statement. This was made up in anticipation of testifying. The other was, as I under-

stood it at the time, he just wanted a casual statement, so that wasn't made with as much care as this was.

Trial Examiner Ballinger: This is a more accurate statement?

The Witness: Yes, it is. This was made up in anticipation of testimony—anticipation of testifying from it. The other, the investigator had asked me to give him a general idea as to how our prices ran.

Trial Examiner Ballinger: Was this statement you are about to refer to made up under your immediate supervision?

The Witness: Under my supervision, yes, sir.

A. January, 1938, our posted price was 16.5 cents per gallon, or 6 gallons for 99 cents.

I would like to explain this, if I may, your Honor. We both put up a price for so many gallons for such an amount of money as well as the price per gallon, and there might be 1.2 of a cent variance on the six or seven gallons. In June of 1938 our posted price was changed to 16.7 cents per gallon, or six gallons for $1.

Q. Is that any particular date in June?

241 A. I have it as to the month.

Trial Examiner Ballinger: That was in effect during the entire month, was it?

The Witness: Some time during the month that was changed.

By Mr. Austin:

Q. Some of these later on may be more important to get the particular day of the month. There may be more than one change in one month.

A. Starting with September of 1938 I have the days of the month.

Q. Fine.

A. The next one was in July of 1938, the posted price dropped to 15.3 cents, or 6 gallons for 92 cents.

September 17, 1938, the posted price was 15 cents, or 7 gallons for $1.05.

November 29, 1938, the posted price was 14.3 cents or 7 gallons for $1.

On April 10, 1939, our costs dropped, but we retained the same posted price. I have that notation in there. The wholesale price went down a cent and two-tenths, but we didn't change our retail price.

The next change on the retail price was on June 19, 1939. We went up to 15.8, or 6 gallons for 95 cents.

On November 1, 1939, the price dropped to 13.5 cents; 242 7 gallons for 95 cents.

November 10, 1939, there was a decrease of one cent a gallon to 12.5; 8 gallons for a dollar.

Q. Will you pardon me a moment, Mr. Gershenson? Do you have one there for July 1, 1939, or did I make a mistake on that? The next one I have is June 19th.

A. That is November 1st.

Q. All right. And the next one after that November 10th?

A. November 10th; 12.5 cents per gallon, 8 gallons for a dollar.

November 24, 1939, 15.7 cents, and 7 gallons for $1.10.

July, 1940—I don't have the specific date on here—16.2 cents; 7 gallons for $1.13. That is the last change that I have.

Q. Now, have you the same prices for Ethyl?

A. I don't have that on this summary. Throughout most of this period the differential was 2 cents a gallon.

Q. Haven't you the same prices?

A. I beg your pardon?

Q. Didn't you bring the same data for Ethyl with you that you have just given on Red Crown?

A. It is probably my error. I had told the clerk to prepare it on Standard gas, and he must have interpreted it just on Standard Red Crown and not Ethyl.

Q. The subpoena, I believe, asked for Red Crown 243 and Ethyl; not Stanolind.

A. We don't sell Stanolind. I was ill at the time. It was probably my fault for not having it prepared, but I can get that for you.

Q. You say the differential between Ethyl and Red Crown is generally 2 cents?

A. 2 cents a gallon, yes, sir.

Q. Has there been any variation from that?

A. Not to my knowledge.

Q. If there is any variation off the 2 cents differential, would that be more or less than 2 cents difference between Red Crown price and Ethyl price?

A. It would be less. I don't recall of any time it being more, but there might have been a period. It just doesn't come to my mind.

Q. You will produce those if I decide I need to ask for them?

A. Yes, sir.

Q. May I call for them at any time while we are here?

A. Yes, sir.

Mr. Austin: Perhaps Judge Hanley would permit you to send those in, or bring them in some time while we are in session, and I might offer them in the record.

Mr. Hanley: That will be all right, if Mr. Gershenson prepares them.

244 Mr. Austin: We might make it in a statement that we could offer as an exhibit and then it wouldn't be necessary for you to take the stand and go through them. The best way to do it would be to give me the Ethyl price on each of these dates that you have here so that they could be compared as of the same date.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Mr. Gershenson, has Ned's Auto Supply Company, either the partnership or the corporation, ever advertised gasoline in the Detroit newspapers?

A. In connection with some of our other advertisements, we have run gasoline copy, yes.

Q. And has there been any such advertising recently; relating particularly to discounts?

A. I don't recall of an advertisement relating to discounts at any time.

Q. Didn't you ever advertise 2 cents off at Ned's Stations, or a saving in purchasing gas?

A. Perhaps savings, but not discounts.

Q. Just now I am merely trying to find out the period when you did advertise in the papers.

A. I don't recall when the last advertisement was. 245 It was very likely last summer or fall.

Q. Have you copies of newspaper ads? Do you keep a file of your advertising?

A. Yes.

Q. Did you bring that with you?

A. I haven't that complete file, because it is 99% other ads, not gasoline.

Q. Have you brought any of the gasoline ads with you?

A. I have one here. I have one of June, 1939, and I can get our whole file, but I don't have the gasoline ads segregated. I would have to pick it out; and this was part of a composite ad on other merchandise.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Could you bring in your file of newspaper advertising?

A. Yes, sir, I could have it here this afternoon.

Q. Is that a pretty complete file of ads?

A. It is a complete file, but there won't be a single gasoline ad with a price or discount in there. I know that.

Q. I would like to see the advertisements of gasoline, and if you could get that brought in this afternoon, that would be helpful. Did you say you could?

246 A. Did I understand you correctly? You want our whole file of advertisements, whether they are gasoline or not?

Q. Unless you can pull out every one that relates to gasoline. I don't care about the ones that do not relate to gasoline.

A. Well, I have answered that. I have said that I went through that pile. We have no newspaper advertisements in that file which refer to discounts on gasoline. There might be some with the general statement such as "Buy your Red Crown gasoline from Ned's to avail yourself of superior service saving," and so forth, but without any price or any—

Q. Well, I can judge that better when I see the advertisement. You said that they do talk about savings, and I think it would be better—

A. Well, the subpoena asked for them with discounts, and there are none that refer to any discounts off posted prices. That was the distinction I was making.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. How about radio advertising? Did Ned's have certain radio broadcasts for a while?

A. Yes, sir.

The Witness: That has never been done, sir.

Trial Examiner Ballinger: That has never been done?

The Witness: No, sir.

By Mr. Austin:

Q. Mr. Gershenson, isn't your distinction this, that
249 when you advertise saving by buying at Ned's, you
mean that Ned's price may be lower than other prices, whereas if you advertise the 2 cent discount, they might interpret that to mean that that was a discount off your posted price? In other words, the saving would apply to the posted price as compared with other posted prices, whereas a discount might refer to a discount below the posted price?

Don't you mean that you advertise savings because your posted price was less than the price, the prevailing retail price, but that you did not give any discount off the posted price? Is that correct? I am just asking whether—

A. I don't understand your question fully, I understand half of it, the part about the discount.

Q. There is a difference between saying that your posted price—

Trial Examiner Ballinger: Let us find out what portion he does not understand.

The Witness: The portion when you say savings from a posted price as distinguished from discounts.

By Mr. Austin:

Q. No. I said that it is one thing to advertise that you give a discount off your posted price—

A. We have never done that.

Q. —it is another thing to say that your posted
250 price is less than some other fellow's price, and so
you save by buying at Ned's.

A. We have never done the second part, to say that our posted price is less than anyone else's.

Q. When you have advertised savings by buying at Ned's, wasn't that intended to mean that the price at Ned's was lower than the price might be somewhere else?

A. Well, it was a composite word, savings, meaning general to apply to the whole operation rather than to price. At no time do we say that our price is lower.

Mr. Austin: I think, if your Honor please, it would be much better if we can get copies of some of these things; then we can let them speak for themselves, and try to do that.

By Mr. Austin:

Q. Now, so far, Mr. Gershenson, I have only tried to establish the times when you advertised in newspapers and on the radio. Have you given me that as accurately as you can?

A. Yes, sir.

Q. Now, I would like to ask you directly what and when discounts have been given at any of your six retail outlets to customers so that the customer actually paid less than the posted price of gasoline purchased. I would like to know to whom such discounts have been given and when.

251 A. As long as we have been in business there has been prevalent a so-called commercial discount that operators of commercial vehicles or people operating passenger cars but performing some commercial function like collectors or vendors, candies, and things of that nature, and insurance men have received that the industry has recognized as a commercial discount. That has been in effect from the time we first started in the gasoline business right up to today.

Mr. Austin: Your Honor, I move to strike out the part, what the industry recognizes as a commercial discount in the latter part of the answer as not responsive.

Mr. Hanley: We resist that motion on the ground that this witness has shown himself qualified to express what the industry practice is in Detroit.

Mr. Austin: It is still not responsive, whether he is qualified or not.

Trial Examiner Ballinger: Read the witness' answer, first the question and then the answer.

(The record was read.)

Mr. Austin: I move to strike the entire answer except the part where he lists certain people that were given the discount. That is the only thing there that is responsive.

Trial Examiner Ballinger: Off the record.

252 (A discussion ensued off the record.)

Mr. Austin: Beginning with the word "collectors" I think can stay in, or I am willing to strike the whole thing out and start over, but beginning with the word "Collectors" to the end of that sentence is the only thing that is responsive.

Trial Examiner Ballinger: The answer in its entirety is not responsive to the question. If the motion is broadened so as to move to strike out the entire answer, the Examiner will sustain it.

Mr. Austin: I so move, your Honor.

Trial Examiner Ballinger: The entire answer is stricken. Read the question to the witness.

By Mr. Austin:

Q. In other words, Mr. Gershenson, I want to know what discounts were given, when you gave them, and to whom you gave them, and you can explain what you mean by commercial customers, if it is your statement that you gave discounts to those customers, but I am not interested in what anybody else considers them. I am only interested in whom you gave your discounts to at this time.

A. From time to time we have given—

Mr. Hanley: Just a moment, Mr. Gersnenson.

253 For the purpose of the record, your Honor, I, at this time, want to object to the question on the ground that it is not material to the inquiry as to the Respondent Standard Oil Company, and that any answer that the witness may give is not binding on the Respondent, the Respondent having no obligation to police the disposition of gasoline sold to any customer, and Respondent being out of control of any disposition of the gasoline is out of control of any price that may have been charged for such gasoline.

Trial Examiner Ballinger: If this line of examination is not shown to be material to the Commission's case, the Examiner reserves to counsel for Respondent the right to move to strike it in its entirety or any portion thereof.

Mr. Hanley: Then, may it be understood, your Honor, that that goes to any testimony of this general character?

Trial Examiner Ballinger: That is correct.

Mr. Hanley: So that I won't have to make any objections.

Trial Examiner Ballinger: That is correct. You need not repeat.

Mr. Hanley: Very well. Thank you, your Honor.

By Mr. Austin:

Q. All right. Let us just try to get down to the 254 meat of this now. We are wasting a lot of time.

A. I am trying to answer as directly as I can what I understand your question to mean.

From time to time we have given commercial discounts varying from 1 to 2 cents to so-called commercial customers. These discounts were off our posted price.

Q. What did the customer have to do to qualify as a commercial customer?

A. That classification has varied from time to time depending upon competitive situation. That I can't state now, general qualification.

Q. Has that been extended to City employees?

A. Some city employees.

Q. School teachers?

A. Occasionally, yes.

Q. Have you ever—

A. That was governed, if I may answer further—that was governed entirely by competitive conditions.

Q. I am just asking now, not your reasons.

A. Yes, sir.

Q. You are not a Respondent. It isn't necessary for you to justify. I just want to know what the facts are.

Has your company in the last three years circularized or sent advertising matter to City employees, school teachers, and others in any of the municipal departments, 255 advertising your gasoline stations, and advertising the fact that they were entitled to a commercial discount?

A. We have never circularized City employees nor school teachers as a group with any such material.

Q. Have you obtained the names of certain individual employees and sent them advertising to the effect that they would be entitled to a 2 cent discount if they purchased from Ned's?

A. The proceedings are rather the other way around. That individual would apply or would state that he or she is qualified to receive that discount and give certain reasons why, and we would either extend it or not, depending upon the merits of the specific case. We at no time have circularized nor broadcast any such advertisements nor any such material.

Q. But you have sent letters of that kind from time to time to numbers of City employees, have you not?

A. Well, as I have just answered.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

(The record was read.)

Trial Examiner Ballinger: Your answer was that you had never engaged in that practice.

The Witness: Your Honor, the previous answer said—if you would please read that.

256 (The record was read.)

Trial Examiner Ballinger: As I understand, you had previous stated that you had never sent letters to City employees soliciting business; is that correct? That they would come to you?

The Witness: That is correct, your Honor. They would apply for a discount card or wanted to know whether they could qualify to buy gasoline at a discount, but we didn't send out a broadside or a letter inviting school teachers and City employees to come and buy gasoline.

Trial Examiner Ballinger: Did you do that in isolated cases?

The Witnesss: I don't recall of any. There might have been groups of so-called commercial employees where we would send a letter like that to employees of a certain company telling them that arrangements had been made by that company for them to buy gasoline at a discount, but not to municipal school teachers.

By Mr. Austin:

Q. Have you had any definition of a commercial account that you have issued to your station operators?

A. Well, that is the answer that I tried to give before, that that definition varies from time to time as to who qualifies as a commercial buyer.

257 Q. That has been a very broad definition at times, has it not?

A. At times it has been broad, yes, sir; at times, the classification.

Q. It might include any man who is driving a car back and forth to his office?

A. Well, it has never been that broad. I understand by that you mean any motorist?

Q. Yes.

A. No, sir.

Q. A man drives into your station, one of your stations, and says he wants a commercial discount. Suppose your station attendant asked him if he uses his car for commercial use, and he says yes. Does the station operator make any further check?

A. I know of no specific case, but I would say that that wouldn't be enough to qualify him for a discount.

Q. You wouldn't want to say that no automobile driver had ever obtained a discount at your station on that basis, would you?

A. I had no personal knowledge of such. I wouldn't—if it were shown that it was so—I wouldn't say that it was impossible, but I have no knowledge of such an instance.

258 Q. Well, do I understand that there are no definite instructions issued by your office to your various service stations to guide them on those discounts?

A. Oh, yes, there are.

Q. What are those instructions?

Mr. Austin: I will withdraw that.

Q. Have you any copies of those instructions?

A. No, sir. They are not written instructions.

Q. Then you can tell me what they are?

A. Those instructions vary from time to time, depending, again, upon competitive conditions. If we are satisfied that competitors generally are extending commercial discounts liberally, why, our instructions to our attendants would be to satisfy themselves that that particular customer is either buying at a commercial discount elsewhere or would buy if we didn't extend it to that customer, and then, in that case, to meet that competitive condition, why, we would extend a commercial discount. That is about the extent of the instructions.

Mr. Austin: I would like to have this paper marked for identification.

Trial Examiner Ballinger: The reporter will mark the paper Commission's Exhibit 23, for identification.

Mr. Austin: Also this paper.

Trial Examiner Ballinger: The reporter will mark
259 that paper 24 for identification.

(The paper writings referred to were marked "Commission's Exhibits 23 and 24", for identification.)

By Mr. Austin:

Q. I would like to show you two cards marked Commission's Exhibits 23 and 24, for identification, and ask if you can state what they are (handing documents to witness)?

A. Yes, sir. I am familiar with these cards.

Q. Will you describe them?

A. They are identification cards that I have already referred to, that we would mail or personally give to the employees of some commercial account which would entitle him, because of his connection with that particular account, or his individual qualifications, to buy merchandise in our store at the then prevailing commercial discounts. That applies to all merchandise.

Q. By "the then prevailing," you mean the discounts that you were allowing to commercial accounts at that time?

A. That doesn't refer to gasoline. That refers to merchandise in our stores.

Q. But referring to gasoline, it means whatever discount you were giving to commercial accounts at that time, doesn't it?

A. That part doesn't refer to gasoline. As a matter of fact, they expressly state, "Only such discount as permitted under the Michigan Fair Trade Act."

260 Q. Well, weren't the holders of cards like these given a discount on gasoline?

A. No, sir. That wasn't an identification for a commercial discount.

Q. Well, they say, "Commercial price privileges."

A. That refers to the stores, sir; within the stores.

Q. What is the distinction of gasoline, between the holders of these cards and the other people you just said did get gasoline discounts? You said some people got commercial discounts on gasoline, isn't that right?

A. They don't have to have a card.

Q. They don't have to have a card to do that?

A. No.

Q. What is the purpose of these cards?

A. I have answered that. We sell considerable other merchandise, other than gasoline, and that is intended for tires, auto accessories, and all other commodities.

Q. So that these cards were not necessary for the gasoline discount?

A. No, sir.

Q. But they were used for other things?

A. Yes, sir; that's right.

The Witness: Your Honor, if I may add a statement. I will say I have seen cards like that issued by competitors that refer to gasoline right on their face. They would state that was a gasoline tax.

261 Mr. Austin: I move that be stricken, Your Honor.

Trial Examiner Ballinger: Motion is granted.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: Now, I would like to have this sheet marked for identification, if you please.

Trial Examiner Ballinger: The reporter will mark the paper Commission's Exhibit 25, for identification.

(The paper referred to was marked "Commission's Exhibit 25" for identification.)

Mr. Austin: Are you familiar with those stamps that are shown on that sheet, marked "Commission's Exhibit 25" for identification (handing document to witness)?

The Witness: Yes, sir.

May I make a statement off the record?

Trial Examiner Ballinger: Yes. Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Will you explain those stamps, Mr. Gershenson?

A. You refer to stamps appearing on Commission's Exhibit 25, for identification?

Q. Yes.

262 Mr. Hanley: What are these, trading stamps?

Mr. Austin: Yes.

The Witness: These are trading stamps that we issued to purchasers of gasoline during October-November, 1939. Every purchaser of gasoline was given one of these stamps for every gallon of gasoline that he purchased, and they were redeemable in merchandise in any of our stores.

By Mr. Austin:

Q. And by "merchandise," you included gasoline, did you not?

A. It says right on their face, "Redeemable merchandise only excluding gasoline." I think they were redeemable on everything except gasoline.

Q. As a matter of fact, weren't they redeemable on gasoline, too?

A. I believe later they were.

Q. When did you start issuing those stamps?

A. (Referring to document) We began to issue a two cent gas saving stamp on our about August 25, 1939.

Q. And when was it discontinued?

A. Sometime between November 1 and November 10.

1939, it was decreased from two cents to one cent a gallon, and November 15, 1939, they were entirely discontinued.

Mr. Austin: I would like to offer this sheet in evidence, Commission's Exhibit 25, for identification.

263 Trial Examiner Ballinger: Let counsel for the Respondent examine it.

(The document was handed to counsel for the respondent.)

Mr. Hanley: No objection, except that general one, Your Honor, that you have reserved ruling on and that may go to all Exhibits, I assume, as well as to all testimony?

Trial Examiner Ballinger: Certainly. With that reservation Commission's Exhibit 25, for identification, is admitted in evidence.

(The document referred to, heretofore marked for identification "COMMISSION'S EXHIBIT 25" was received in evidence.)

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Mr. Gershenson, I show you this photograph and ask you if that is a picture of one of your stations (handing photograph to witness)?

A. Yes, sir, it is.

Q. Do you see in that photograph a sign advertising trading stamps?

A. Yes, sir.

Q. Does that refer to the stamps which were just placed in evidence as Commissioner's Exhibit 25?

264 A. Yes, it does.

Q. And would you say that that was taken during the period that you mentioned?

A. From the sign, yes.

Mr. Austin: I offer this photograph in evidence.

(The photograph was handed to counsel for the Respondent.)

Trial Examiner Ballinger: Without objection, the photograph is admitted in evidence as Commission's Exhibit 26.

(The photograph referred to was marked "COMMISSION'S EXHIBIT 26," for identification, and received in evidence.)

By Mr. Austin:

Q. Are you familiar with this envelope, Mr. Gershenson (handing document to witness)?

A. Yes, sir; I am.

Mr. Austin: Will you mark that for identification, please?

Trial Examiner Ballinger: The reporter will mark the document Commission's Exhibit 27, for identification.

(The document referred to was marked "Commission's Exhibit 27," for identification.)

By Mr. Austin:

Q. Will you describe Commission's Exhibit 27 for identification?

A. Do you want me to read what is on it, or just 265 tell the use?

Q. Tell the use.

A. This envelope was issued to customers buying gasoline at the time we were giving the trading stamps for such customers to keep the stamps in this envelope; just to have a place to keep them. It had no value in itself, and when they redeemed the stamps for merchandise, why, they turned this envelope in with them. It was merely a container for such stamps, and it says so on its face. It says: "Stamps and receipts must be kept and redeemed in this container."

Q. They will speak for themselves. As a matter of fact, Mr. Gershenson, weren't these envelopes used sometimes to obtain discount on gasoline by customers who had simply to present the envelope—who would simply present the envelope when they came to the station to buy gasoline?

A. No sir—well, that might help to identify the person. At the time, we gave that envelope, that stamp, everybody received the stamp, so there was no need to use that envelope. That was the time we had the sign on the station.

Q. Was the use of this envelope discontinued at the time the use of the stamps was discontinued?

A. It was discontinued to all customers. I believe they continued to use them to these commercial discount holders which I referred to earlier in my testimony.

Q. In other words, someone might show this for the 266 purpose of getting a commercial discount?

A. No, sir.

Q. I mean, after the stamps were no longer issued, and presumably, turned ~~in~~, someone might still have one of these envelopes?

A. When we discontinued to give the stamps, we discontinued.

Q. Were these envelopes honored for discounts on gasoline; just by showing the envelope?

A. No, sir.

Q. At no time?

A. I answered that. I will re-answer it.

Q. You said they were only good as a container for the stamps. I am asking you now whether the envelope itself was ever used for the purpose of obtaining a discount?

A. No, sir, but if I may qualify the answer: These commercial discount holders would put their receipts for gasoline, subsequently, in these envelopes, and if an attendant saw someone with an envelope like that with commercial discount receipts, it might help to identify that person as being one to buy at a commercial discount.

Trial Examiner Ballinger: Was a discount ever given merely upon the presentation of one of those envelopes?

The Witness: No, Your Honor, I have answered that.

Mr. Austin: I offer this envelope in evidence, in connection with the trading stamp folder.

267 Mr. Hanley: That is the only purpose you are offering it for?

Mr. Austin: The purpose of it is to complete the information regarding the giving of discount through trading stamps. The testimony itself states what it is.

Mr. Hanley: If the Exhibit is offered for the purpose of completing the testimony of the witness in connection with trading stamps, there is no objection beyond the general objection.

If offered as proof of the giving of a discount by Ned's Auto Supply on gasoline, it is objected to on the ground that no foundation has been laid.

Mr. Austin: I think the witness' testimony speaks for itself. This can be of no evidence at all, except in connection with the testimony describing it.

Trial Examiner Ballinger: Well, is that envelope offered in evidence to establish the giving of a discount on that envelope?

Mr. Austin: No, Your Honor.

Trial Examiner Ballinger: Presentation of the envelope?

Mr. Austin: No, Your Honor, it isn't.

Mr. Hanley: That satisfies Respondent; that statement of counsel.

Trial Examiner Ballinger: Then, without objection 268 to COMMISSION'S EXHIBIT 27, for identification, it is admitted in evidence, the right being reserved by counsel for the Respondent at a later time to move to strike it from the record together with the whole line of testimony.

Mr. Austin: Of course, I reserve the right to introduce evidence and testimony with other witnesses at a later date.

Trial Examiner Ballinger: Yes. No motion will be entertained by the Examiner to strike until the Commission's case is closed.

Mr. Austin: Will you mark this letter for identification, please?

(The document referred to was marked "Commission's Exhibit 28-A" for identification.)

Trial Examiner Ballinger: The reporter has marked the document, "Commission's Exhibit 28-A" for identification.

By Mr. Austin:

Q. Will you describe that paper, please (handing document to witness)?

A. This is a letter that was sent with these courtesy cards you asked me to identify a little while ago, in response to an inquiry from the person who received it, asking for one of these. If I may read the first sentence from the letter, I think that will help explain what I am saying.

Trial Examiner Ballinger: Is that a letter written 269 by your company?

The Witness: Yes, Your Honor. The first sentence says—

Mr. Austin: Just a minute, please.

By Mr. Austin:

Q. This is a mimeographed form, is it not?

A. It looks as if it is.

Q. Is it addressed to anyone?

A. The envelope was, but the salutation on here is not, but it is obviously sent in reply to an inquiry, because it says so; or a reply to a request for one, I should say.

Q. Are you merely making that statement because that's what the letter says?

A. No, sir. I know that from my personal knowledge, that the only ones we sent that card to, or that letter, is when a person writes in or requests it, then it is passed upon, whether they are qualified to receive it, and when we send that card, we sent that letter along with it.

Q. You are quite sure of this?

A. Yes, sir; both from having read it and from what I know about it.

Q. Are the cards which were enclosed with this letter the same cards we discussed a few minutes ago, commercial discount cards?

A. Yes.

270 Q. And did the people who received those cards and this letter, did they receive commercial discount on gasoline?

A. No, sir. I have already answered that. There is no reference made of gasoline in there, and that is not the purpose of either the letter or card. It specifies in there the merchandise which they cover.

Q. That is your stationery, is it not?

A. Yes, it is.

Q. And is this the type of envelope in which those letters were sent?

A. That is our regular envelope. I have no personal knowledge that that letter was sent in that envelope.

Q. And is this another one of your special discount cards?

A. That is similar to the one you just showed me. It is the same thing.

Mr. Austin: If Your Honor please, I would like to have the envelope and card marked for identification as Commission's Exhibits 28-B and 28-C.

Trial Examiner Ballinger: The reporter will so mark them.

(The documents referred to were marked "Commission's Exhibits 28-B and 28-C" for identification.)

Mr. Austin: I would like to have this document marked for identification.

Trial Examiner Ballinger: The reporter will mark 271 the document "Commission's Exhibit 29" for identification.

(The document referred to was marked "Commission's Exhibit 29" for identification.)

By Mr. Austin:

Q. Do you recognize that letter, Mr. Gershenson, Commission's Exhibit 29, for identification (handing document to witness)?

A. I knew of such a letter, yes. I recall the circumstances surrounding.

Q. Will you state the circumstances—

Mr. Austin: Withdraw that.

Q. Was this letter sent over the signature of Ned's Auto Supply Company and the other signatures appearing on it, to a large number of retail dealers?

A. You mean operate as a retail gas station?

Q. Yes. This letter was sent to retail dealers, wasn't it; written for that purpose?

A. I had nothing to do with the sending of the letter. I just know the letter was sent. I don't know how many dealers it was sent to, but I do know it was sent.

Q. You authorized the sending of that letter over your company's name, did you not?

A. I gave no express authorization. I knew that such a letter was going out. I don't remember whose idea it was to send the letter. I believe it was—may I see it again?

Trial Examiner Ballinger: It is immaterial.

272 A. I believe it was Stark-Hickey or Jimmie Bright.

By Mr. Austin:

Q. It was sent with your knowledge and you are one of the dealers named on it?

A. That's right. That was the extent of our contribution.

Q. I show you a copy of an advertisement which appears, upon its face, to have been published in the "Detroit Free Press" on August 7, 1937, and ask you whether that was an advertisement appearing over the name of your company?

A. The circumstances surrounding the running of this ad—

Trial Examiner Ballinger: Answer the question, please.

By Mr. Austin:

Q. Just yes or no.

A. Yes.

Q. Was that advertisement published the morning after this letter was sent out?

A. It was pertaining to the same thing. I don't recall which came first.

Q. Can't you tell by looking at the letter and the advertisement, which came first (handing documents to witness)?

A. Both have the same date.

Q. The "Free Press" is a morning paper, isn't it?

A. This was on the streets the night of the 5th; yes, sir.

Q. Aren't those dispatches dated the 6th?

273 A. Yes.

Q. And those dispatches would appear in the paper on the morning of the 7th, wouldn't they; if they are dated the 6th?

A. I don't know if this paper was the 6th or 7th.

Q. At least, it is the 6th or 7th, and the letter is dated the 6th.

A. I am answering to the best of my knowledge. I don't know which of these were sent out first, but they were both the result of the same circumstances.

Q. But at the same time?

A. Yes, at the same time.

Trial Examiner Ballinger: The paper speaks for itself.

Mr. Austin: I am just trying to identify them enough to offer them, Your Honor. Neither one alone, or at least the letter, I don't believe would be admissible except with the advertisement, but I think it is—one explains the other, and, at this point, I will offer both of these papers, Commission's Exhibit 29 and the advertisement, which has just been discussed.

(The documents referred to were handed to counsel for the Respondent.)

Mr. Hanley: We just have a general objection to these Exhibits.

Trial Examiner Ballinger: Off the record.

274 (There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: I make a specific objection to these documents that they do not prove anything as to the giving of any discounts by any of the dealers named, or that the prices charged by such dealers were at variance with ordinary and prevailing prices, and do not prove any discriminatory prices given by any of the dealers.

Trial Examiner Ballinger: Neither prove nor tend to prove. Let me examine the documents first.

Mr. Austin: I would suggest that if they may have any such tendency, then the amount to which they prove it would be something to be argued to the Commission, I should think, at a later date.

Trial Examiner Ballinger: The objection is overruled. The documents are admitted in evidence as Commission's Exhibits 29 and 30.

Mr. Hanley: May I add this further ground to my objection? The Exhibits 29 and 30 are further objected to for the reason that they indicate, if anything at all, relative to prices, that the dealers named in the advertisement and letter, had, apparently, undertaken to advance the price above what was then the prevailing price, and that the action referred to in the letter and the advertisement was not
the giving of a discriminatory price by the dealers
275 named, but was merely a reduction in their price and
a return to the then prevailing price.

Mr. Austin: That's, again, argument upon the face of the documents.

Mr. Hanley: I wanted to get my record straight.

Trial Examiner Ballinger: The objection is overruled, subject, however, to a later motion to strike.

(The document referred to was marked "Commission's Exhibit 30" for identification.)

(The documents referred to, heretofore marked for identification "COMMISSION'S EXHIBITS 29 and 30" were received in evidence.)

276 By Mr. Austin:

Q. Do you have a man named Kroh in your organization?

A. Yes, sir.

Q. Is he there now?

A. Yes, he is.

Q. Working with you now?

A. Yes, sir.

Q. What is his capacity?

A. He acts as a service manager in one of our stores, the one on Grand River.

Q. Which store? The Grand River store?

A. The one on Grand River, yes, sir.

Q. Have any of your stations ever given premiums with gasoline, merchandise premiums?

A. No, sir; except perhaps as an anniversary souvenir for a day or so, but not over a period of time. I have no recollection of giving premiums.

Q. How long would the souvenirs be given?

A. Two or three days maybe in connection with the opening of a new store or an anniversary; then that would be given to all customers in the store, and gasoline would be included with that. It wouldn't be limited to gasoline customers.

Q. What sort of premiums were given on those days?

A. I have no recollection now. There might be such 277 things as balloons or key cases—key rings, I should say. I recall that as a souvenir on one of the anniversaries, or other souvenirs of that nature.

Trial Examiner Ballinger: What do you mean by a balloon?

The Witness: Toy balloons. We have had a balloon made as a replica of one of our service men that were given to youngsters.

By Mr. Austin:

Q. Haven't you for a number of years given away newspapers to all gasoline purchasers, free newspapers?

A. That is not a souvenir. I wasn't thinking—

Q. I asked you about merchandise premiums.

A. Well, I wasn't thinking of that as a premium because we give that to all customers, to people in the service as well as on the drive, and it has been our practice for a number of years to give newspapers, but it has no relationship to the gas they bought. I thought of—

Q. Did every purchaser who went into your station to buy gasoline receive a newspaper free?

A. Yes, as well as some of those who didn't buy gas.

Q. Well, just answer my question, Mr. Gershenson.

A. No, I can't answer that question.

Q. Were those papers given morning, afternoon, evening, or when?

278 A. During our business hours. There might be a number of customers who buy gasoline who don't get the newspapers. I don't—

Q. If they don't get it, it is because they don't ask for it, isn't it?

A. It is because they don't ask for it, that is right, or they don't want it.

Q. Is that always the latest edition of one of the Detroit papers?

A. Not necessarily; and there are times when we don't have any newspapers.

Q. What papers are given?

A. We have given the Detroit papers from time to time or any one of them, I should say.

Trial Examiner Ballinger: Over what period of time?

The Witness: This goes back several years, your Honor, four or five years.

Trial Examiner Ballinger: And it has continued right through?

The Witness: Yes, sir.

Trial Examiner Ballinger: Anybody buying gasoline at your store would be entitled to a newspaper of that issue, the day's issue?

The Witness: If they want one, yes, your Honor,
279 but what I tried to say is anybody buying anything
else gets it, too. I mean, it is just part of our regular—

Trial Examiner Ballinger: Anyone buying merchandise at your store—

The Witness: That is right.

Trial Examiner Ballinger: —including gasoline—

The Witness: Yes, sir.

Trial Examiner Ballinger: —would be entitled to it?

The Witness: Yes, your Honor, that is right.

By Mr. Austin:

Q. Haven't you, from time to time, given to gasoline customers with the purchase of gasoline a 2-ounce bottle of Pyroil?

A. You mean to all gasoline buyers?

Q. Well, to some of them?

A. Yes, we did that for a while to advertise Pyroil.

Q. When did you do that?

A. I have no recollection as to that. We don't have any records to show that. I would say that we have been—we started doing that about two years ago, in about '39.

Q. Started it in '39 or discontinued it in '39? I didn't hear you.

A. Maybe it was started in '38 or discontinued in '39. It had no—

280 Q. Didn't you give some Pyroil in 1940?

A. Yes, I would say. We still have some, that if a customer will ask for it, that it is available. We don't offer it to all gas customers, but if somebody wants to put some in their tank, why, we will supply it.

Q. Your service men frequently told the customers about it, didn't they?

A. If they did, it wasn't part of their instructions. It wasn't part—

Q. Didn't you ever tell them to give it away?

A. Yes, sir.

Q. You didn't have it to put away and store it?

A. We sold it in the store. We sell it in larger cans. The purpose of giving that was to get people to try it; if they liked it, to buy a larger can or put it in their motors. It was more in the nature of a sampling process.

Q. But these 2-ounce bottles were given free, were they not?

A. Yes. I should clear that. It wasn't a 2-ounce bottle. We gave them the contents of it. We retained the bottle. The bottle was worth several times over the contents. The customer didn't take the bottle. We put a little in the tank.

Q. You put the 2 ounces in the tank?

A. Or an ounce and a half.

Q. Didn't you have it in 2-ounce bottles?

281 A. No. We filled them ourselves. We buy it in the barrel. Each one of those bottles cost us less than a cent.

Q. You put it—

A. In the tank.

Q. —in the tank?

A. Yes, sir.

Q. For the customer?

A. That is correct.

Trial Examiner Ballinger: Was this that you were giving something away that you were buying or something that had been given to you?

The Witness: Well, we bought it in barrel lots.

Trial Examiner Ballinger: And gave it away in small quantities?

The Witness: Yes, sir. I might qualify that. Our price—we were given a special price with the idea of giving it away as samples, because we sold the same product in 25 or 50 cent cans, and it was part of the merchandising program of that manufacturer for us to do that. They supplied us with banners.

Trial Examiner Ballinger: Then, it didn't cost you anything?

The Witness: Well, a nominal sum, very little, if anything.

282 By Mr. Austin:

Q. Did you ever see this camera or one like it (indicating)?

A. Yes, sir.

Q. Will you state what that carton contains?

A. It contains a camera.

Q. Film also?

A. No, the film—

Q. Well, you might look and see.

A. Well, if this didn't—this one does, yes. I mean, when they came packed, there was no film in it.

Q. What connection has that with your business? That is, you describe how it was used.

A. This was—the complete story of this was covered with the ad I showed you, but we sold this camera and film for 39 cents to any customer. Well, at first it was to anybody making a purchase, they had to buy something else to buy this, and afterward we just sold them outright in connection with a snapshot contest that we were running. Either gasoline customers or anybody was privileged to buy one. We didn't give it away. We sold it.

Q. Didn't you advertise in the newspapers that gasoline customers could purchase one of those for 29 cents?

A. Well, for 39 cents, as well as any other customer.

Q. 39 cents includes the film, didn't it?

283 A. That is right, but we didn't sell the camera without the film. We sold the two together, I am pretty sure.

Q. But that was offered as an advertising inducement, was it not, to try to get people into your store to buy other things?

A. Into our store, yes.

Q. Including gasoline?

A. We didn't exclude gas customers from buying that, so your statement is correct, but it wasn't given as a premium. We sold both the camera and the film.

Q. What did the camera cost you?

A. We made a profit, I believe of 9 or 10 cents on the camera and film together.

Q. Selling them at that price?

A. Yes, sir.

Q. Were these cameras sold anywhere else at a higher price?

A. I believe they were used throughout the country for the same type of promotion. At least, the manufacturers' representative showed me ads where they had used them in other territories. I don't know whether anybody sold them.

Q. They cost you less than what you sold them for?

A. Considerably, yes.

Q. So you weren't giving away anything when you sold these for 39 cents?

284 A. No, sir; no, sir. We made a profit, and I believe they cost us 19 cents.

Q. I show you a little piece of paper here and ask you if that is a receipt issued by one of your stations, minus the writing on the front of it. I suppose that wasn't on there when it was given, was it?

A. I have no way of knowing whether it was on there. I assume that because this is a printed—all the rest of it is printed by the cash register, and that appears to be written in script, so—

Q. Is that a receipt for the purchase of gasoline at one of your stations?

A. Yes, it is.

Q. How many gallons and what price?

A. It appears to be 6.4 gallons for a dollar on May 9th.

Q. That would probably be 1940, would it not, judging from the price?

A. Yes, I think so.

Q. And that shows the posted price at the station at the time, does it not?

A. Yes, it does.

Q. That is the price at which you were selling gasoline to all retail consumers?

A. Yes, sir.

Q. And were not customers who bought gasoline 285 and received these receipts told to save the receipts?

A. May I see that?

Q. During 1940 (handing the paper to the witness).

A. On the back of this receipt there is also the stamped notation "Sold for commercial use." And that receipt identifies these commercial buyers that I referred to earlier in my testimony this afternoon, and only such receipts as had that stamp on, they were the only ones that had any value.

Q. What value did they have?

A. Whatever the prevailing commercial discount was at the time.

Q. Wasn't it most of the time 2 cents a gallon?

A. Well, it has been 1 cent and 2 cents.

When you say most of the time, I don't know what period you are referring to. It has been 1 and 2 cents.

Q. Well, I refer to 1940. How about 1940?

A. I believe it was 2 cents in '40. It might have been 1 cent in '39.

Q. Prices were lower in '39, weren't they, most of the time?

A. Well, when?

Trial Examiner Ballinger: What do you mean by "might have been"?

The Witness: Well, I don't recall now. There are
286 varying periods depending upon the cost of gasoline
at any given period as well as the posted price. If the margin in there—

Trial Examiner Ballinger: Well if you are not certain at all about it, that statement should be stricken from the record, what might have been.

Mr. Austin: Your Honor, it was at least 2 cents, he said, in 1940.

Trial Examiner Ballinger: Yes.

By Mr. Austin:

Q. I will ask you if this is correct: at the times when it was 1 cent, it was during a price war or at some other time when your margin was low, when the margin between your posted price and what you paid was very small? You couldn't afford to give a large commercial discount, obviously, at that time.

A. I can't answer that.

Q. You are not sure about that?

A. Well, I mean, just saying something about affording—I mean I can't either agree or disagree.

Q. Let's go back. We know it was 2 cents in '40?

A. I can only say that our commercial discount was whatever the prevailing commercial discount was, and we follow competitive conditions in that, and I have no independent recollection.

287 Q. Didn't you say that in 1940 you thought it was 2 cents?

A. I believe it was 2 cents.

Q. You know it has been 2 cents over a considerable period, don't you?

A. From time to time it has been 2 cents, yes.

Trial Examiner Ballinger: That is your best recollection?

The Witness: Yes, sir, it, is, your Honor.

By Mr. Austin:

Q. Now, the person who received this, if I understand you correctly, would bring this back the next time he bought gasoline or any other article at your store and receive 2 cents per gallon based on the number of gallons purchased here; is that correct?

A. I don't believe I follow you.

Q. Well, then, you tell me how that was used.

Trial Examiner Ballinger: Referring to that, what do you refer to? You haven't had it marked, have you?

Mr. Austin: I think the testimony is clear, your Honor, that it refers to receipts, printed receipts issued for the sale of gasoline at Ned's, and I am going to offer it in evidence.

Trial Examiner Ballinger: You might have it identified.

Mr. Austin: I mean there may be other receipts
288 in force other than this—I don't know but he said
this was a printed receipt given at his station.

Trial Examiner Ballinger: Let the reporter mark the document which has been referred to in the recent testimony of the witness as Commission's Exhibit No. 31, for identification.

(The document referred to was marked, for identification, "Commission's Exhibit 31.")

By Mr. Austin:

Q. Now, will you explain just what value that has to the person to whom it was issued?

Trial Examiner Ballinger: Referring now to the document just identified.

A. This receipt is only given to purchasers of gasoline who are entitled to the commercial discount, and at the end of a month or at any period that they elect, a week or a month, they could turn these in to our office and receive book credit or merchandise credit. It is the same—it amounts to payment on account for the value that they have. In other words, if it is for six gallons, this would be worth 12 cents, and it is because of the fact that that purchaser bought gasoline on the commercial price, and retail buyers didn't get any receipt at all. See, that would only be used in connection with a commercial purchase of gasoline.

289 Q. Well, by commercial purchaser, the persons whom you described awhile ago in your testimony this afternoon as being allowed commercial discounts at your stations?

A. Not only at our station. I said—

Q. I am just asking you whether the commercial purchaser you are referring to now is the same sort of a purchaser that you were referring to a while ago when we first talked about commercial discount?

A. Yes, that is right.

Mr. Austin: I offer this card, Commission's Exhibit 31, for identification, in evidence.

Mr. Hanley: No objection.

Trial Examiner Ballinger: It is admitted in evidence.

(The document referred to, heretofore marked, for identification, "COMMISSION'S EXHIBIT 31" was received in evidence.)

Mr. Austin: I think, unless I find something else, I am through with the direct examination of this witness.

Trial Examiner Ballinger: Let us take a recess for five minutes.

(A short recess was had.)

Trial Examiner Ballinger: Come to order.

By Mr. Austin:

290 Q. This is the volume of your newspaper ads, Mr. Gershenson? (Indicating.)

A. Yes.

Mr. Austin: Off the record, please.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Austin:

Q. What is the date that this file covers? What are the dates?

A. I haven't looked at it myself. You can tell that from the start and finish there. There are dates on there, about three or four years, I think.

Q. These apparently go from February, 1941, back to December of 1937.

Trial Examiner Ballinger: The file which counsel for the Commission holds in his hand is what?

The Witness: Is all newspaper ads that we run during the period shown on the date.

Trial Examiner Ballinger: And is a file kept in your office?

The Witness: Yes; that is, in our office.

By Mr. Austin:

Q. And it contains all of the newspaper ads; that is, there aren't any other ads that you know of in here?

A. That is right.

291 Q. On gasoline or otherwise?

A. That is correct. Oh, there might be one or two that inadvertently weren't filed, but, as far as I know, that is a complete file.

Q. I asked you to obtain certain information regarding your volume of sales in 1936. Have you got that information?

A. Yes, sir. I had it a minute ago. Our total volume in 1936 was 2,694,000.

Q. Is that for four stations?

A. One of them was opened during the year, in June of 1936. That is three stations, plus a fourth one that was opened in the middle of '36.

Trial Examiner Ballinger: That is gallons, is it?

The Witness: Yes, it is 2,694,000 gallons.

By Mr. Austin:

Q. Did you open any new stations in 1937?

A. No, sir. In the middle of '38—in July of '38 we opened a fifth one, and then in October we opened the sixth one.

Trial Examiner Ballinger: October of what year?

The Witness: 1938.

By Mr. Austin:

Q. That gallonage covers what brands of gasoline?

A. That is the composite of the Standard Oil brands 292 and Ford Benzol, both together.

Q. And the Standard Oil brands do not include Stanolind?

A. We do not sell Stanolind.

Q. Just Red Crown and Ethyl?

A. Yes, sir.

Q. And that is the total gallonage of Red Crown, Ethyl, and Ford Benzol?

A. That is correct.

Q. What percentage, approximately, constitutes Ford Benzol?

A. In 1936 it was 10%. I have it for another year, if you want it, 1940.

Q. All right.

A. 12% Benzol in 1940. I have the exact gallonage of Benzol for '36 if you want that.

Q. Well, you may state it.

A. Well, Standard was 2,449,000 and Benzol was 245,000. That is approximately 10%.

Q. Using this paper to refresh your recollection, can you state the total gallonage on your four stations in 1937, including Ford Benzol?

A. 4,393,000.

Q. Can you give the same figure for 1938, which would include two additional stations opened that year?

A. Of course, that included six stations, and that 293 was 4,797,000. For the same four stations I have that figure here, too.

Q. Well, all right. Give the gallonage for the same four stations, the total.

A. Well, it dropped in '38 from '37. In '38 for the four stations, it was only 4,212,000.

Q. When were the other two stations opened, will you state again?

A. Well, the fifth one was opened in July of 1938, and the sixth one was opened in October of 1938.

Q. That first total that you gave includes those two stations for the balance of the year?

A. Yes, it does. That includes all six stations, whatever period of the year they were opened.

Mr. Austin: That is all.

Cross-Examination by Mr. Hanley.

Q. Directing your attention to the criminal prosecution which occurred early in 1938, Mr. Gershenson, is it true that your company and the Standard Oil Company were the Defendants in that action?

A. Yes.

Q. And was that action dismissed by the Court?

A. Yes, it was.

Q. As to all of the defendants?

294 A. Yes, sir.

Mr. Hanley: That is all.

Mr. Austin: All right. Thank you, Mr. Gershenson.

Trial Examiner Ballinger: The witness is excused.

(Witness excused.)

Mr. Austin: Mr. Biber.

Trial Examiner Ballinger: What is your full name?

The Witness: Max Biber.

MAX BIBER was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

By Mr. Austin:

Q. What is your residence address, Mr. Biber?

A. 18251 Prairie, Detroit, Michigan.

Q. What is your business?

A. I am the general manager for the Citrin-Kolb Oil Company.

Q. Are you an attorney?

A. Yes, I am.

Q. Is the Citrin-Kolb Oil Company a corporation or a partnership?

A. No, it is a co-partnership.

Q. Who are the partners?

A. Jacob A. Citrin, Nathan Kolb, and Barney Citrin.

295 Q. In what business is the Citrin-Kolb Oil Company engaged?

A. They are engaged in the wholesale and retail sale of petroleum products.

Q. When was that partnership organized?

A. In 1922, I believe.

Q. Has that company continuously been engaged in the sale of gasoline in Detroit since that time?

A. Yes, it has been.

Q. Was it always engaged in the sale at wholesale or was it formerly only at retail?

A. I would say that the retail operations began before 1922, but it is about sixteen to eighteen years that they are also engaged in the wholesale sale of petroleum products.

Q. Does the Citrin-Kolb Oil Company now sell gasoline to other retail dealers?

A. They do.

Q. About how many dealers do you serve?

A. About 54, I believe, today.

Q. Have you the figures on that back as far as 1936? That is, as to the number of retail stations that you had as sub-dealers?

A. Yes, I believe we have. I believe you have the figures there, if I can use them. You have my last copy of 296 them.

Q. Well, I am not talking about operated stations now.

A. I understand that.

Q. I didn't know that I had the figures on the others.

A. Maybe I have a schedule here.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

The Witness: What does was that you wanted?

By Mr. Austin:

Q. From 1936 on. From 1936 on.

A. January 1st, 1936, we served a total of 29 dealer stations. As of January 19, 1936, there were 43; January 1st, 1937, 51; January 1st, 1938, 57; January 1st, 1939, 66; January 1st, 1940, 52; and December, 1940, 57.

Q. Do those figures include stations which were operated by the Citrin-Kolb Oil Company?

A. Yes, they do.

Q. What brand of gasoline does Citrin-Kolb Oil Company deal in?

A. The Standard brands of gasoline; Standard Red Crown, Solite with Ethyl, and Stanolind.

Q. Do you sell any Ford Benzol?

A. No, we don't.

Q. Do any of your stations handle Ford Benzol?

A. Yes, they do.

297 Q. All of them?

A. No, not all of them.

Q. About how many?

A. Are you referring to our dealer stations?

Q. Yes.

A. I would estimate about half of them.

Q. As to the stations which Citrin-Kolb has operated, or now operates, is Ford Benzol sold at those stations?

A. They now operate five stations, and Ford Benzol is sold at two of them.

Q. The volume figures shown in the Secretary of State's reports, which we introduced here in evidence,—are you familiar with those reports?

A. Yes, I am.

Q. Those would not include the Ford Benzol, would they?

A. I don't believe so; I don't believe we pay the state tax on Ford Benzol.

Q. You stated that you didn't sell Ford Benzol as a jobber.

A. No.

Q. And isn't it true that those reports are based upon the—

A. State tax.

Q. —State tax on sales of licensed jobbers?

A. That's right.

298 You are licensed jobber?

A. We are.

Q. Have you been purchasing Standard Oil gasoline from the Standard Oil Company since 1936?

A. We have.

Q. Have you ever purchased it from any other source?

A. No.

Q. Does your company own a bulk plant?

A. Yes, they do; two bulk plants.

Q. Where are they located?

A. One is located at 14481 Livernois and the other at 14445 Linwood.

Q. Where is your office located?

A. The office is located at 14445 Linwood.

Q. Are both of those bulk plants operated now?

A. They aren't operated today, but they are operated from time to time, when we need the storage.

Q. Is one of them operated today?

A. Yes.

Q. Which one is that?

A. 14445 Linwood.

Q. Is that the larger plant?

A. That is the larger plant.

Q. When were those bulk plants acquired?

A. The Livernois bulk plant was acquired in 1927
299 or '28, and the Linwood bulk plant was acquired in 1936.

Q. Does your company purchase all its gasoline from Standard Oil Company at tank car prices?

A. They do.

Q. And how long has it been buying at tank car prices?

A. Several years. Ten years, at least.

Q. Prior to 1936?

A. Yes.

Q. Can you state the locations and period of operation of all retail gasoline stations operated by Citrin-Kolb Oil Company from 1937 to the end of 1940?

A. Yes, I can from that information (referring to documents.) Do you want the periods of operation of each?

A. State the location of station and the dates during which it was operated.

A. The location at 14481 Livernois operated from January 1, 1937, until February, in the month of February, 1938, then we leased that station out. It came back to us and we operated it again from March 8, 1939, to December 22, 1940.

The location at Jefferson and Nottingham and Grosse Point, operated from January 1, 1938, to the present time.

The location at 2400 Brush Street operated from June 2, 1939, and we are operating it today.

The location at 9504 Woodward operated from July
300 27, 1939, to December 29, 1940.

The location at 17100 Joseph Campau operated from August 17, 1939, to February 27, 1941.

The location at Wyoming and Eaton operated from July 1, 1940, and we are still operating it.

The location at 8620 Linwood operated from January 1, 1937—may I interrupt here? Some of these were operated before January 1, 1937, but you only wanted them from January 1, 1937.

Q. Yes; that will be enough.

A. January 1, 1937, until in the month of October, 1938, and that same location, again, from September 27, 1940, to the present date.

The location at 14445 Linwood, from October 15, 1940, and we are still operating that station.

The location at 8716 Linwood, January 1, 1937, to October 6, 1937.

The location at Grand River and Littlefield from December 15, 1937, to January 21, 1938.

Q. Thank you. Now, as to the prices which were charged for the gasoline sold at these company-operated retail stations.

Mr. Austin: I would like to have these three sheets marked, for identification, Commission's Exhibits 32-A, 32-B, and 32-C.

301 Trial Examiner Ballinger: The reporter will mark the papers Commission's Exhibits 32-A, 32-B, and 32-C.

(The documents referred to were marked, for identification, "Commission's Exhibits 32-A, 32-B, 32-C.")

By Mr. Austin:

Q. I show you those documents just marked, for identification, and ask you if you will state what they are.

A. That is a schedule prepared by myself from the records of the company showing the retail prices of gasoline at these locations indicated on the schedule, at certain dates.

Q. Do those cover the prices from 1937 to the end of 1940?

A. These don't—yes, all these schedules together do cover the prices from January 1, 1937, to February 27, 1941.

Q. On this sheet marked Commission's Exhibit 32-C, which states prices from January 1, 1937, to December 21, 1938, were those prices the same at all of the stations which were operated during that period?

A. They were.

Q. So that that sheet applies to all stations which you stated to be operated during that period?

A. That's right.

Q. Are these the prices posted at the station, or the prices actually charged, or is there any difference?

A. There is no difference between the posted price and charged price.

302 Q. And is this the price actually charged?

A. That is the price actually charged.

Mr. Austin: I offer these three sheets in evidence marked Commission's Exhibits 32-A, 32-B, 32-C, for identification.

Trial Examiner Ballinger: Let counsel for the Respondent examine them.

(The documents referred to were handed to counsel for the Respondent.)

Mr. Hanley: No objection, except a general objection.

Trial Examiner Ballinger: The documents are admitted in evidence as Commission's Exhibits 32-A, ~~32-B, and 32-C~~.

(The documents referred to, heretofore marked, for identification, were received in evidence as COMMISSION'S EXHIBITS 32-A, 32-B, and 32-C.)

Mr. Austin: I would like to have this letter marked, for identification.

Trial Examiner Ballinger: The Reporter will mark the document Commission's Exhibits 33-A and 33-B, for identification.

(The document referred to was marked, for identification, "Commission's Exhibit 33-A and 33-B.")

By Mr. Austin:

303 Q. I show you this letter and ask you if you wrote that letter (handing document to the witness).

A. Yes, I did.

Q. To whom is it addressed?

A. It is addressed to Mr. Cyrus B. Austin.

Q. Was that in response to a certain request I made of Mr. Shapiro in clarification of papers demanded by subpoena?

A. That's right; it is.

Q. Will you state, generally, what that letter shows?

A. This letter shows the invoice price of Red Crown gasoline to five specific dealers inquired about by Mr. Austin, and it also shows any discounts given to these dealer accounts.

Q. Does it also contain a true statement regarding the rentals charged to these dealers?

A. It does.

Mr. Austin: I offer this letter in evidence.

Trial Examiner Ballinger: Is there an objection?

Mr. Hanley: ~~None~~, except a general objection.

Trial Examiner Ballinger: The documents are admitted in evidence as Commission's Exhibits 33-A and 33-B, subject to the general objection.

(The documents referred to were marked, for identification, "COMMISSION'S EXHIBITS 33-A and 33-B" and were received in evidence.)

304 By Mr. Austin:

Q. Are the invoice prices for the five stations shown here from January 1, 1938, to December 31, 1940, identical with the prices charged all other dealers—

A. They are.

Q. —to whom gasoline was sold for resale by Citrin-Kolb?

A. Yes, sir, they are.

Q. And how many of the fifty-odd stations that you have mentioned as being operated in 1940 are lessees of Citrin-Kolb? If you can state approximately, it will be all right.

A. (Referring to documents) I think it is 22. You want the figure for 1940?

Q. Yes.

A. Yes, 22.

Q. Those are stations, I suppose, that are located on properties that are either owned or leased by Citrin-Kolb Oil Company?

A. That is right.

Q. And are your other dealers, either dealers who own them or lease their stations from some other source?

A. Yes.

Q. What is the practice of the Citrin-Kolb Oil Company regarding rentals charged to these dealers?

305 A. On our leased stations?

Q. As to amount, yes. Let me ask you, first, as to properties which you lease and then sub-lease to the dealer.

A. Properties which we lease and sub-lease are treated the same as owned properties, in that we set a value on the property as a service station but where we do lease and sub-lease, usually we determine the value by the rental which we pay. In other words, we determine that was fair rental to pay and sub-lease it at the same rental.

Q. The station pays you the same as you pay your lessor?

A. That is not universal, but usually we fix it at that. Sometimes, during a term, we reduce it, if we find a man can't make out, and sometimes we have raised the rentals.

Q. You have noted one exception here in this letter to where rent was waived due to a price war. Did that situation exist or does that situation exist with any other station?

A. No, it does not.

Q. It is also stated here that for the year 1939, the invoice price to all dealers was the same and they conformed with the above schedule, with certain named exceptions. You state 1939, I suppose, because that is the year I asked for.

A. That is right.

Q. Was the invoice price to all dealers the same, 306 with the same exceptions, in 1938 and 1940?

A. Yes, they were.

Q. The three locations mentioned in this letter, of the five, are 4200 3rd Street, 1309 West Warren, and 11301 Van Dyke. Are those three stations all operated by the same management?

A. They are.

Q. Who is that?

A. Langer and Cohen.

Q. Does Langer and Cohen also operate certain other stations?

A. Yes, they do.

Q. And how many other stations?

A. Two others.

Q. Can you state the addresses of those?

A. 13244 Dexter and the other one is John R and Euclid.

Q. Do those two stations which you have just named,—or, rather, does Langer and Cohen, in purchasing gasoline to be delivered to those two stations, receive the same rebate from the invoice price as is shown here for the three stations listed in this letter?

A. They do.

Q. Are any of your dealers charged a rental based on gallonage?

A. I think we have a few that have a gallonage rental.

307 Q. Is that in addition to the flat rental?

A. I don't believe we have any—I am sure we don't have a lease with a flat rental and a gallonage. Our leases run with a minimum rental and then a gallonage over a certain amount.

Q. In that case, would the minimum rental ordinarily be the amount that you pay for your lease?

A. No, we don't have that arrangement with any subleased station; it is only an owned and leased station.

Q. How many properties do you own on which the service station is operated by other dealers; that is, by lessee?

A. Eight, I believe. I think I have it on here (referring to a document); seven.

Q. And that gallonage arrangement would only be in connection with one of those seven?

A. That's right.

Q. Did you hear Mr. Raupagh give some testimony regarding Standard Oil charge accounts?

A. Yes, I did.

Mr. Hanley: What was that question?

(The question was read.)

Mr. Hanley: You mean the credit card?

Mr. Austin: Yes.

By Mr. Austin:

Q. Do persons holding Standard Oil credit cards 308 purchase on credit at Citrin-Kolb stations?

A. Yes, they do.

Q. That includes your dealers as well as operators?

A. That's right.

Q. And are those credit cards honored at all your stations?

A. I know they are honored at all the company-operated stations. Whether the dealers honor them or not, I don't know.

Q. Do the dealers turn in credit slips to you sometimes on those cards?

A. Do they? Yes, they do.

Q. Do you furnish any list of names to any of your subdealers of persons entitled to credit in purchasing Standard Oil gasoline?

A. Yes, we do. It isn't—

Q. What is the purpose of such a list?

A. The Citrin-Kolb Oil Company has certain accounts in the City of Detroit that probably run trucks or have many cars that run throughout the City of Detroit, and we carry those charge accounts, and these accounts may charge their gasoline at any of our dealer stations.

Q. Those are your accounts, as distinguished from Standard Oil accounts?

A. That's right. Similar set-up to Standard Oil except that they are restricted to the Citrin-Kolb account.

309 Q. In other words, you make the collection on that and people who charge on Standard Oil cards, you pass that along and let the Standard Oil make the collection?

A. That's right.

Q. Are persons on either one of those lists, that is, either on your list of credit customers or persons holding Standard Oil credit cards, are customers in either one of those groups permitted to buy at any of your operated stations at a lower price than is charged to other customers?

A. They are not.

Q. Have any of your dealers ever been requested by your company to give any discount to persons coming within either one of those categories?

A. They have not.

Q. Do you operate or lease a station at Woodward and Vernor?

A. We neither lease nor operate that location.

Q. Do you serve that dealer?

A. Yes, we do.

Q. Is that station within the last two years—has that station been given any advantage in purchasing gasoline or whether it be an advantage or not, has it received any rebate or has it paid the same tank wagon price as other stations served by you?

A. It has paid the same tank wagon price, invoice
310 price, for gasoline.

Q. Any rebate or other concessions?

A. None whatsoever.

Q. Was that station closed at one time for non-payment of sales tax?

A. I believe it was, for about four days.

Q. Is the operator of that station now the same operator that operated it previously, before it was closed?

A. No, I believe it has changed hands three times since then.

Q. In a case like that, how is that liability removed?

A. The liability for what?

Q. To sales tax.

A. I don't know that it is.

Q. I just wondered what the practice is here if a station doesn't pay the sales tax and gets in arrears, what the State does about that.

A. The State levies against the personal property belonging to the tax payer.

Q. The new operator who takes that over, is he forced to pay that off?

A. If he takes over the business of the previous operator, he becomes responsible for the sales tax. If, however, the station is closed or abandoned and the landlord
then acquires a new tenant, and the tenant takes over
311 none of the personal property of the previous tenant,
then they have no claim against the station or the new
tenant.

Trial Examiner Ballinger: Is this merely informative?

Mr. Austin: Probably. If I ask one more question, I think that will conclude it.

By Mr. Austin:

Q. I wanted to ask if Citrin-Kolb Oil Company ever paid any of that arrearage for sales tax, or assumed any obligation for it.

A. They never paid it, and I don't think anybody ever will pay it.

Q. Has your company an arrangement with any gasoline station to whom you sell gasoline for—when I say gasoline station, I assume I am referring to the operator or possibly the owner of the property, whichever it may be—for an arrangement whereby you pay a certain rental per month for the right to use the driveway in that station?

A. No.

Q. You don't know of any such arrangement?

A. I know there is no such arrangement.

Q. Have you ever had such arrangement?

A. No.

Mr. Austin: I would like to have this card marked 312 for identification.

Trial Examiner Ballinger: The reporter will mark the document Commission's Exhibit 34, for identification.

(The document referred to was marked, for identification, "Commission's Exhibit 34.")

By Mr. Austin:

Q. Are you familiar with that card, or cards like it (handing document to the witness)?

A. Yes, I am.

Q. Will you describe what that card is, and how it is used?

A. That is—I imagine it is called a discount card. It says: "This card will save you 2 cents per gallon on a gallon of Standard Red Crown or Ethyl gasoline."

Q. What station is that named?

A. That is the Jefferson and Nottingham service.

Q. Is that station operated by Citrin-Kolb?

A. It is.

Q. Were those cards given out by that station?

A. Yes, they were.

Q. And when?

A. During some period of the gas war, but I don't know when.

Q. Well, 1938 or 1939; would it be one of those two years?

313 A. I would say 1938.

Q. And to whom were those cards given?

A. Given to almost anyone, I guess.

Q. Did that entitle the holder of those cards to 2 cents off the posted price?

Trial Examiner Ballinger: There is a guess again.

The Witness: They were given to anyone.

Trial Examiner Ballinger: Were they given out to anyone who bought gas?

The Witness: I imagine some of them were even distributed in parked automobiles.

By Mr. Austin:

Q. Did that entitle the holder of the card to a discount of 2 cents from the price posted?

A. Yes, it did, in the form of stamps also. It is indicated on the card they are to ask for stamps in order to get the 2 cents discount.

Trial Examiner Ballinger: The stamps ultimately were redeemed, wholly, in gas?

The Witness: In gas or other merchandise.

By Mr. Austin:

Q. Did they have to get the stamps first on the gas purchase?

A. They had to get the stamps.

Q. And those could be used on any subsequent 314 purchase of merchandise or gasoline?

A. That's right.

Q. Have you any way of establishing the length of time during which these cards were in use?

A. I remember at the time they were out about three days when a group of our dealers objected to our merchandising in that manner and we called in the cards.

Q. Would you say that those discounts were only given on stamps, were only given for a period of three days?

A. No, I would say because the cards were out and customers asked for them, I would say it possibly lasted two to three weeks before we apologized to the customers for the card.

Q. And were they ever resumed or used at any other time?

A. I don't believe they were.

Q. Are you sure that they were not used again in the fall of 1939?

A. They were used one time. If they weren't used in 1938, they were used in 1939; I don't remember which.

Q. But only during one period?

A. But only during one period.

Mr. Austin: I offer this card in evidence.

Trial Examiner Ballinger: Without objection, it is admitted.

Mr. Hanley: Nothing but the general objection.

315 (The document referred to was marked, for identification, COMMISSION'S EXHIBIT 34, and was received in evidence.)

Mr. Austin: I would like to have this card marked for identification.

(The document was marked, for identification, Commission's Exhibit 35.)

By Mr. Austin:

Q. Will you state what station that is, and whether that was an operated station of Citrin-Kolb?

A. 14445 Linwood; and was not an operated station at that time.

Q. Are you familiar with the issuance or use of that card?

A. Yes, I am.

Q. And will you state it?

A. Exactly the same as the previous exhibit; same use and same type of card.

Q. At the same period or some other period?

A. Yes, at the same period.

Q. That is, you are positive that both were started the same time and ceased at approximately the same time?

A. Within a day or two of each other.

Q. Did your company have that card printed for that station?

A. No, we did not.

316 Q. It seems to be practically identical with this card except the name appearing on it, so it must have been done at the same place.

A. There are many, many stations in Detroit which had this identical card. The man did a good business out of them!

Q. How do you know that that card was not issued by that dealer longer than the time that you used this one (referring to Commission's Exhibit 35)?

A. You mean that it didn't last any longer?

Q. Yes.

A. Our office happens to be adjacent to this dealer station and I know when it was started and when it was stopped. I am there every day.

Mr. Austin: I offer this card in evidence.

Trial Examiner Ballinger: Subject to the general objection reserved to counsel for Respondent, the document is admitted in evidence as Commission's Exhibit 35.

(The document referred to, heretofore marked, for identification, "COMMISSION'S EXHIBIT 35," was received in evidence.)

Mr. Austin: I would like to have this card marked for identification.

Trial Examiner Ballinger: The reporter will mark the document Commission's Exhibit 36, for identification.

317 (The document referred to was marked, for identification, "COMMISSION'S EXHIBIT 36.")

By Mr. Austin:

Q. Will you give me the same information for this card, if you will (handing document to the witness)?

A. Yes, this is the same kind of a card.

Trial Examiner Ballinger: Issued by whom?

The Witness: Issued by the owner of the station at 8620 Linwood.

By Mr. Austin:

Q. Is that one of your subdealers?

A. Yes, it is.

Q. That station was not operated by you?

A. No, it was not.

Q. Do you have any idea or any knowledge, rather, as to when and how long that card was used?

A. This card was used at the same time, but it was printed similar to these cards, with the legend "Citrin-Kolb Oil Products" on the card, and we asked this dealer to discontinue using that card or any card with our name on it, as he was an independent operator and in that neighborhood our reputation is good and has been for years, and our name was valuable, and we asked him to discontinue using the card and he did, I think that same day; discontinued using this card, but I believe he had another printed without our name on it.

318 Q. What is the difference between that one and Commission's Exhibit 35, which says, "Citrin-Kolb Products"?

A. No difference at all, except that that was in front of our office.

Q. Is there any reason why this fellow should use the name "Citrin-Kolb" and that one should not?

A. No. He didn't use it, either. That is how I know. When this one was stopped, he didn't use that subsequently, but he printed another card in the next few days.

Mr. Austin: I offer this card, number 36, for identification, in evidence.

Trial Examiner Ballinger: Subject to the general objection reserved to counsel for the Respondent, it is admitted in evidence as Commission's Exhibit 36.

(The documents referred to, heretofore marked for identification "COMMISSION'S EXHIBIT 36" were admitted in evidence.)

Mr. Austin: Here is a card I would like to have marked, for identification.

(The card referred to was marked "COMMISSION'S EXHIBIT 37" for identification.)

By Mr. Austin:

Q. What is the name of the station on that card?

A. John R. Horton Service.

Q. Is that a Citrin-Kolb dealer or Citrin-Kolb operator?

319 A. No, this is a Citrin-Kolb dealer.

Q. Have you ever seen those before?

A. No, this is the first experience I have with this card.

Q. If you have never seen it before, probably you cannot tell me much about it?

A. No, except what it says.

Q. Did you know that that station issued discount cards at any time?

A. No, I did not.

Trial Examiner Ballinger: Is that a station either owned or supplied by his company?

Mr. Austin: Yes. He says it is one of the stations supplied by his company, but not operated by it.

By Mr. Austin:

Q. Do I understand, then, that you have no knowledge as to whether this station ever offered the discount here stated?

A. No, I wouldn't know.

Mr. Austin: Here is another, for identification.

(The card referred to was marked "Commission's Exhibit 38" for identification.)

By Mr. Austin:

Q. I show you this card, Commission's Exhibit 38, for identification, and ask you whether that appears to have been issued by a retail dealer supplied by Citrin-Kolb?

A. Yes, it is.

320 Q. What is the name of the station?

A. There is no name on it as far as the station is concerned. The address is 9705 Dexter and Chicago Boulevards.

Q. Do you have any knowledge as to whether that station has at any time since January 1, 1937, given the discounts referred to on that card?

A. Well, I have heard that they gave discounts. I never bought gas there at a discount, but I believe they did give a discount.

Q. Did you ever see any of those cards before?

A. No, I never saw this card.

Q. Can you state whether or not that is a card which was issued by that station?

A. I wouldn't know whether they actually issued it or not.

Q. Are you familiar with the fact that a number of the dealers that purchased their gasoline from you were giving such discounts as were mentioned on the last two Exhibits during 1938 and 1939?

A. Tell me what you mean by "number" and I think I can answer that.

Q. Do you know of your own knowledge that any of your dealers were giving discounts off the prevailing retail price during that period?

A. Yes, they were.

Q. Do you know of your own knowledge whether

321 either one of these stations named on these two cards, marked for identification, were giving such discounts?

A. No, I don't.

Q. Exhibits 37 and 38. Can you state the names of any dealers purchasing from Citrin-Kolb Oil Company, who were giving discounts at some time between January 1, 1937, and the end of 1939?

A. Yes. I think the Vernor and Woodward station gave a discount.

Q. Have you purchased gasoline at other stations during that period that were giving discounts at the time you bought there?

A. You mean at other competitor stations?

Q. No, at other retail stations supplied by Citrin-Kolb.

A. No, I don't buy my gas there.

Q. You said you had personal knowledge of some cutting?

A. The knowledge I have would come through Mr. Peck of the Retail Gas Dealers Association, who would call me and say, "You have got a dealer over there that is cutting prices."

Q. After all, that is hearsay?

A. Well, on that information I would go over and talk to the fellow and he would tell me whether he is or not.

Q. Oh, I see. But you don't recall any other instances where you found that out; I mean, by your own investigation?

A. No, there is no other instance where I actually investigated and know.

322 Q. Well, that has been some two or three years ago, hasn't it?

A. Yes, it has been.

Mr. Austin: Without marking these for identification, I think I can hurry it a little bit.

By Mr. Austin:

Q. Tell me whether you have any previous knowledge of that card (indicating)?

A. No, I never saw this card before.

Q. Is that the Citrin-Kolb dealer whose name appears on the card?

A. He used to be. He isn't any more.

Q. How about this card (indicating)?

A. I have never seen this card before.

Trial Examiner Ballinger: Was that issued by one of your dealers?

The Witness: Yes, it was. It purports to be. That is one card that I don't think actually was. I don't know who made it, but I don't believe that was one.

By Mr. Austin:

Q. Well, do you know whether the Langer & Cohen station at 13244 Dexter did give any discount off the prevailing retail price during 1938 or 1939?

A. I don't believe they did.

Q. You don't know positively? You don't know that they did, do you?

323 A. I don't know that they did.

Q. I assume that you couldn't know that they didn't.

A. That is right. As a matter of fact, I don't believe that station was in existence. I don't believe the building was in existence in 1938 or the early part of 1939.

Q. How about 1940?

A. Yes, it was in existence in 1940, and I know of my own knowledge that there was no price cutting in 1940 at that station.

Q. Isn't that a pretty confident statement, Mr. Biber, knowing that you made it in all good faith, but could you know that unless you had been present there most of the time?

A. Well, I think I could because the station is operated by an employee of Langer & Cohen. In other words, the owner doesn't operate it himself, and I was present at several instances when his instructions were that there were no discounts to be given.

Q. Nevertheless, isn't it possible that these cards may have been given out to some customers without your knowledge?

A. I imagine it is possible.

Mr. Austin: In view of the fact that there has been some questioning regarding it, I would like to have this card marked for identification, and the envelope.

(The card and envelope referred to were marked "Commission's Exhibit 39-A and 39-B." for identification.)

324 Mr. Austin: 39-B is an envelope in which the card marked 39-A is contained. Rather, the card has the name of Langer & Cohen, 13244 Dexter, and is the card to which the testimony immediately preceding refers.

By Mr. Austin:

Q. Have you ever seen that card, or one like it, previously (indicating)?

A. No, I haven't.

Q. Do you know whether the Theatre Park Service at 1900 Cass Avenue offered a two cent discount on gasoline in 1939?

A. I don't know that they did.

Q. That station purchases its gasoline from Citrin-Kolb?

A. It does now, but to the best of my recollection, I don't think they did in 1939.

Mr. Austin: I think that is all, Your Honor.

You may cross examine, Mr. Hanley, if you wish.

Mr. Hanley: I have just a few questions.

Trial Examiner Ballinger: Proceed.

Cross-Examination by Mr. Hanley.

Q. What were those Langer & Cohen addresses that do not appear on Exhibits 33-A and B, Mr. Biber?

A. That is 13244 Dexter, and John R and Euclid.

Q. During the last three or four years, have you been familiar with the prevailing tank wagon price, dealer
325 tank wagon price, in Detroit?

A. Yes, I have been.

Q. With the exception shown in your Exhibit letter 33-A and B, have you continuously charged the prevailing tank wagon price?

A. Yes, we have.

Q. To all the dealers that you served?

A. That is right.

Q. Now, that prevailing tank wagon price would coincide, would it not, with the Standard Oil Company's posted dealer price?

A. Yes, it is exactly the same.

Q. Will you look at these Exhibits number 34, 35, and 36, and tell me which one, if any, was issued by a station operated directly by the Citrin-Kolb Company?

A. Exhibit 34.

Q. Is that the only one?

A. That is the only one.

Q. Are the other cards, cards that were issued by any of these stations, which are noted as having received a special discount, in Exhibit 33-A and B?

A. They are not.

Mr. Hanley: At this time, in addition to the general objection to the reception of evidence and Exhibits along this line, Your Honor, the Respondent at this time moves that Exhibits 35 and 36 be stricken from the record for 326 the additional reason that it now affirmatively appears on the Government's case that those were discount cards issued by dealers who were being charged the prevailing tank wagon price, which it now appears was the same as the Standard Oil Company's posted dealer tank wagon price, and at the start where was no differential existing between the prices paid by the dealers who are said to have issued Exhibits 35 and 36, and the prices paid by all of the Standard Oil retail customers who were being served on the regular posted dealer tank wagon basis.

Mr. Austin: Your Honor, I think that that objection, and I think one or two similar ones that Judge Hanley has made, are on some misconception. The prices which Standard Oil Company charges and which Citrin-Kolb charges are material and relevant and they are in the record, and the prices charged by Citrin-Kolb dealers are relevant, at least, to the extent that it is relevant and very material to find out what those prices are. That is in the record. Now, all that Judge Hanley is saying is, that adding the two together doesn't prove anything. Well, that may be, but that is no reason for a motion to strike.

Trial Examiner Ballinger: The motion is denied, with the right to renew at the conclusion of the Commission's case.

Mr. Hanley: We have no further examination.

Trial Examiner Ballinger: Off the record.

327 (There was a discussion off the record.)

(Witness excused.)

Trial Examiner Ballinger: Adjourned, at 5:30, to reconvene at 10:00 o'clock A. M., March 12, 1941, in Room 859 Federal Building, Detroit, Michigan.

(Whereupon, at 5:30 P. M., March 11, 1941, the hearing in the above-entitled matter was adjourned.)

328 Room 859, Federal Building,
Detroit, Michigan,
March 12, 1941.

Met, pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., Attorney for the Federal Trade Commission,

H. R. Hanley, Esq., 910 S. Michigan Avenue, Chicago, Illinois, on behalf of the Respondent.

329 PROCEEDINGS.

Trial Examiner Ballinger: We will come to order, gentlemen.

This is a reconvening of Docket No. 4389, a case entitled In the Matter of Standard Oil Company, at 10 o'clock Eastern Standard Time, March 12, 1941, in Room 859 Federal Building, Detroit, Michigan.

The last hearing was held in Detroit, March 11, 1941.

The reporter will note counsel for the Commission and Respondent are present.

You may proceed.

Mr. Austin: I would like to recall Mr. Biber, who was on the stand when we adjourned yesterday.

MAX BIBER was thereupon recalled as a witness by and on behalf of the Commission, and having been heretofore duly sworn, testified further as follows:

Redirect Examination by Mr. Austin.

Q. Mr. Biber, is there a Citrin-Kolb station at Middle and Case Streets?

A. I believe you have reference to what we call Cass and Grand River. Yes, there is.

Q. Cass and Grand River?

A. Yes.

330 Q. And is that an operated station or a leased station or a contract station?

A. That is a leased station.

Q. Who is the lessee of that station?

A. Sherman Fisher.

Q. Have you any invoices or sales slips showing the sales made to that station in August, 1940?

A. Yes, I have.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Austin:

Q. Are these original—what do you call them? Sales receipts, invoices, or what?

A. Original requisitions.

Q. —original requisitions signed by the service station operator or someone at the service station at the time the gas was delivered?

A. They are.

Mr. Austin: I would like to have these two slips marked, for identification.

(The documents referred to were marked, for identification, "Commission's Exhibits 40 and 41.")

By Mr. Austin:

Q. I show you Commission's Exhibit 40, for identification, Mr. Biber. What is the meaning of the notation
331 on there, "1 cent on rent account"?

A. In some instances, as in this instance, the rental is collected at the rate of 1 cent a gallon, in order to facilitate the collection, and it will be a little easier for the dealer to pay it, and it is credited to a rent account, and at the end of his current rental month that is figured up and if it doesn't constitute the entire rental, why, he pays in cash or by check. In other words, it is more or less of an easy payment plan of the rental.

Q. Suppose it amounts to more than the rental?

A. Then it is returned to him or applied on the next month's rent.

Q. I see.

Mr. Austin: I will offer these two requisitions in evidence.

Mr. Hanley: May I ask a question as a foundation?

Trial Examiner Ballinger: You may.

Examination on Voir Dire by Mr. Hanley.

Q. In reference to Exhibits 40 and 41, Mr. Biber, do those reflect the gasoline price, the tank wagon price, the dealer tank wagon price in effect as to the time that the invoices show?

332 A. They do.

Q. And was that prevailing posted wagon price in effect in the Detroit vicinity at that time?

A. Yes, it is.

Mr. Hanley: We have a general objection to these, your Honor, and the further objection that they do not prove anything. There is no basis of comparison. If there is no basis for comparison of these prices with any price charged by the Standard Oil Company to any resellers of any category, it now affirmatively appears on the Government's case that these prices are their regular prevailing dealer's price and that there is no differential between this price and any other price shown in this case, and, consequently, no foundation for the reception of the evidence.

Mr. Austin: If your Honor please, that is the same kind of an objection that we had yesterday. I don't think that it is an objection at all simply to argue as to what certain evidence may prove. Furthermore Judge Hanley's question as to whether or not these show the Standard or prevailing tank wagon price is unnecessary, because we now have in the record a complete schedule of the prevailing tank wagon prices, and it is always possible that—these things speak for themselves. They can always be
333 compared with the schedule which was put in evidence
on Monday to determine in any case whether or not they were. I think it is unnecessary to prove or ask the witness whether or not the price shown here is the prevailing tank wagon price. The prevailing tank wagon price is in the record, but on the objection, I—

Mr. Hanley: If that is the position—

Mr. Austin: I think it is proper for me to prove as to the prices charged to certain service stations by various jobbers buying from the Standard Oil Company.

Mr. Hanley: Before your Honor rules, and in view of the statement of counsel for the Commission as to what is in the record on the prevailing posted dealer prices, I want this on the record: That at the request of Mr. Austin the Respondent furnished him a statement of the

tank wagon dealer prices that were being charged from time to time by the Standard Oil Company, and that there is nothing on such exhibit, which I think is Exhibit 3-A and 3-B, having to do, respectively, with Red Crown and Ethyl gasoline. There is nothing on that exhibit to indicate what the prevailing prices to dealers may have been that were maintained by any of the jobbers involved in this action or anyone else; that there was also reflected on that exhibit a statement of what were supposed to be the prevailing retail prices from time to time. I want this understood
334 now, as I explained to Mr. Austin at the time, and I
think the record shows that the Standard Oil Company ceased to post retail service station prices on September 10, 1936, and the only prevailing retail service station prices that we have any knowledge of are the prices that we learned by making periodic surveys and taking a cross section of the price postings as we find them to exist from time to time. All that that exhibit purports to represent in that respect are the results of our findings in those surveys as of the time that the prevailing prices are dated.

Mr. Austin: Your Honor, I object and ask that that statement be stricken from the record as testimony by counsel. I think the document speaks for itself, and if desirable to the Respondent's attorney to show what the document proves, he should put on the witness who introduced and who prepared it.

Mr. Hanley: You introduced it, Mr. Austin; the Respondent didn't introduce the exhibit.

Mr. Austin: Then, if the document does not show what it purports to show and what the witness said it showed, then I think that that is a matter of testimony and I will not certainly object to your recalling Mr. Raupagh or asking him further about that on your case.

Mr. Hanley: Well, Mr. Austin, don't—

Mr. Austin: But I will not consent to the state-
335 ment of counsel as to what exhibits in the record mean.

Trial Examiner Ballinger: The Examiner doesn't care to hear any further discussion.

You consider this important to your case, and its relevancy and materiality will be established by the time your case is completed?

Mr. Austin: Yes, getting back to this pending objection.

Trial Examiner Ballinger: The objection is overruled, subject to renewal of your motion to strike at a later date. Proceed.

Mr. Austin: I move, your Honor, to strike the statement made by counsel for the Respondent as to the meaning and content of an exhibit which was introduced as Commission's Exhibit 3-A and 3-B.

Trial Examiner Ballinger: The correctness of that exhibit is sufficiently challenged by your own statement. Let's pass on.

Commission's Exhibits 40 and 41, for identification are admitted in evidence.

(The documents referred to, heretofore marked for identification, "COMMISSION'S EXHIBITS 40 and 41," were received in evidence.)

Redirect Examination by Mr. Austin.

336 Q. Mr. Biber, is there a Langer and Cohen service station located at Dexter and Waverly?

A. Yes, there is.

Q. That is one of the stations which was mentioned in the letter which was introduced in evidence yesterday and a letter which you wrote to me, I believe, Commission's Exhibit 33-A?

A. That is right, it is.

Q. Is there a Citron-Kolb dealer at Dexter and Courtland?

A. Yes, there is.

Q. Who is the operator of that station?

A. Myer Rosenzweig.

Q. Does he lease that station from Citrin-Kolb, or is he a private operator?

A. No, he leases it from Citrin-Kolb. We lease it and sublease to him.

Q. Will you see if you can produce sales requisitions for that station for August 1940? I would like to have two requisitions. Mr. Biber, are these invoices which you are producing typical of invoices for the month of August, 1940?

A. I don't know what you mean. Typical in what respect?

Q. I mean, would there be any variation in price during that month?

A. No, there wouldn't be.

337 Q. Then, as I understand, these invoices would be typical of the price charged any one of these stations during that month?

A. That is right.

Trial Examiner Ballinger: And you refer to invoices marked Commission's Exhibits 40 and 41?

The Witness: That's right. They all bear the same price.

Mr. Austin: I would like to have these two sales requisitions marked for identification which were just produced by the witness from his file for August, 1940, which purport to show and do show, do they not, Mr. Biber, the price at which the amount of gasoline described on the requisitions was sold to that station?

The Witness: That's right.

(The documents referred to were marked, for identification, "Commission's Exhibits 42 and 43.")

Mr. Austin: I would like to offer them in evidence.

Mr. Hanley: Same objection as to Exhibits 40 and 41.

Trial Examiner Ballinger: The objection is overruled with the same reservation to counsel for the Respondent. The documents tendered will be admitted in evidence as Commission's Exhibits 42 and 43.

338 (The documents referred to, heretofore marked for identification, "COMMISSION'S EXHIBITS 42 and 43," were received in evidence.)

By Mr. Austin:

Q. Is there a station known as Sid's Super Service at Dexter and Chicago?

A. Yes, there is.

Q. And is that one of the stations which was mentioned in that same exhibit?

A. Yes, it is.

Q. Commission's Exhibit 33-A?

A. That's right.

Q. Do you know the rent paid by that station during August, 1940?

A. $235 per month.

Q. And there was no rebate at any time to that station either on gas or rental during 1940?

A. There was not.

Q. Is there a Citrin-Kolb station at Linwood and Blaine?

A. Yes, there is.

Q. Who is the operator of that station?

A. Herbert Chaben.

Q. Is he a lessee?

A. Yes, he is.

339 Q. Is there a Citrin-Kolb station at Linwood and Buena Vista?

A. Yes, there is.

Q. Is that known as Linwood Standard Service?

A. I believe it is known as Linwood Buena Vista Service.

Q. Is that the only Standard Oil station on that corner?

A: Yes, it is.

Q. Is that a station that is leased from Citrin-Kolb?

A. Yes.

Q. Who is the lessee?

A. Edmund Clark.

Q. And the address Linwood and Detroit Terminal Railroad; is that where your office is?

A. That's right.

Q. Is there a station there called B and B Service, or was it ever called that?

A. It was formerly called B and B Service.

Q. Is that now operated by Citrin-Kolb?

A. Yes, it is.

Q. I believe that was shown by testimony yesterday.

A. Yes.

Q. During August, 1940, was that station then operated by the lessee?

A. That's right.

340 Q. Who was the lessor?

A. Morris Brandwine.

Q. I would like to ask you, Mr. Biber, to produce two invoices for each one of these stations for August, 1940. I will go back over them: Dexter and Chicago, Linwood and Blaine, Linwood and Buena Vista, and Linwood and Detroit Terminal Railroad.

Mr. Biber, referring to these specific stations here, as to which I have just asked you to produce sales requisitions, were any of those stations, other than Chicago and Dexter, mentioned in Commission's Exhibit 33-A?

A. They were not. That was the only one mentioned.

Q. Mr. Biber, I understand that you have not been able to produce any sales requisitions showing sales of gasoline in August, 1940, to Sid's Super Service, Dexter and Chicago, due to the fact that you understood that I would not require requisitions on any stations about which you were questioned yesterday.

You now produce two sales requisitions dated August 1 and 2, 1940, respectively, for the Citrin-Kolb station located at Linwood and Blaine; two invoices dated August 3 and August 13, showing sales of gasoline to the Citrin-Kolb station located at Linwood and Buena Vista, and two sales slips dated August 1 and August 3, showing sales of 341 gasoline to the Citrin-Kolb Station located at Linwood and Detroit Terminal Railroad.

Mr. Austin: I would like to have these marked, for identification.

Trial Examiner Ballinger: The reporter will mark the documents referred to Commission's Exhibits 44 to 49, inclusive, for identification.

(The documents referred to were marked, for identification, "Commission's Exhibits 44 to 49," inclusive.)

Mr. Austin: I will offer them in evidence.

Mr. Hanley: The same objection to that offer as made to Exhibits 40 and 41.

Trial Examiner Ballinger: The objection is overruled, with the same reservation to counsel for the Respondent. The documents referred to will be received in evidence.

(The documents referred to, heretofore marked, for identification, "COMMISSION'S EXHIBITS 44 to 49," inclusive, were received in evidence.)

Mr. Austin: That is all.

Recross Examination by Mr. Hanley.

Q. Are all of the prices that appear on these exhibits, gasoline requisitions for which Mr. Austin has asked 342 you, your regular dealer posted tank wagon price as of the date the invoice shows?

A. They are.

Mr. Hanley: That's all.

(Witness excused.)

Mr. Austin: I would like to call Mr. Chandler.

WILLIAM G. CHANDLER was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Give your full name to the reporter, please.

A. William G. Chandler.

Q. What is your address, Mr. Chandler?

A. 806 Phillip.

343 Q. Are you employed by the Sun Oil Company?

A. I am.

Q. In what capacity?

A. As a salesman in the motor products department.

Q. Is that the department that handles sales of gasoline?

A. That is right, yes, sir.

Q. Among your duties are you a gasoline salesman?

A. Right, yes, sir.

Q. What is the territory which you serve, Mr. Chandler?

A. My territory starts at the River, at Beaufait—.

Q. What river?

A. The Detroit River. Goes north on Beaufait to Lafayette, goes west on Lafayette to Elmwood to Gratiot, Gratiot to Harper, everything south of Harper, and out Harper to Seven Mile back down to the Detroit River. I have nothing on Harper Avenue.

Q. Is the intersection of Jefferson and Manistique in your territory?

A. Yes, it is.

Q. Is there a Ned's Auto Supply Company station located at that address?

A. Yes, there is.

Q. In the summer of 1940, Mr. Chandler, were you directed to make a survey of all of the gasoline service stations in your territory, to determine the prices charged by those stations and the pricing policies of those stations?

344 A. Yes, I was.

Q. Who directed you to do that?

A. That was done by the management of the company.

Q. Whom did you receive your directions from?

A. Mr. Cunningham, who is our district manager.

Q. Did you make such a survey?

A. Yes, I did.

Q. In the course of your duties in making that survey, did you call upon this station of Ned's Auto Supply Company located at Jefferson and Manistique?

A. Yes, I did.

Q. Did you make any purchases of gasoline there?

A. Yes.

Q. When was this survey made?

A. Approximately from, I should say, the first of August to the two weeks after that, about the middle of August.

Trial Examiner Ballinger: What year?

The Witness: 1940.

By Mr. Austin:

Q. What facts did you ascertain from your investigations on that survey as to the prices charged at that time, August, 1940, by this Ned's Auto Service Station, and any discounts or other price reductions?

Mr. Hanley: Note a general objection as to the materiality and relevancy to this question.

345 A. Ned's Auto Supply at Manistique and Jefferson, at the time I made a buy, for which a receipt was turned in to the company—

Q. Mr. Chandler, will you state the prices and discounts, and I will ask you how you found it out or what you did, if you wish to go into that.

A. The price was 16.3 for gasoline, for which they gave me a receipt, telling me that at some later time I could redeem the receipt for two cents on the gallon. Along with that they gave me a paper, and also gave me a can of pyroil to put in the gasoline.

Q. You say they gave you a can of pyroil?

A. That was for those who asked for it, they could have it. That wasn't the usual practice. I don't know whether it was or not, but I know that if it was asked for, that it could be had at no extra cost.

Q. Did they pour that into your gas tank, or did they give you the can or the bottle?

A. They poured it into the gas tank.

(There was a discussion off the record.)

Q. Did I understand you to say, Mr. Chandler, that you were given a receipt for gasoline at 16.3 a gallon?

A. Yes, sir.

Q. And you were told that that would be good for two cents credit on future purchases of what?

346 A. Any merchandise I wanted to buy.

Q. Including gasoline, or not?

A. That was not stated.

Q. Did you try to turn any of those in?

A. No, sir.

Q. On purchases of gasoline?

A. No, sir.

Q. But did the station operator tell you that this would be good for credit on merchandise?

A. Yes, sir.

Q. Did he offer those to you, or did you ask for it?

A. He offered it to me.

Q. Before he offered it to you, did you make any representations to him as to whether or not you were using your car for commercial purposes?

A. No, sir.

Q. Are you referring now to just *one* purchase, or did you make other purchases from time to time?

A. I have made other purchases at times prior to this and after that.

Q. Have you any of those receipts with you?

A. Yes, I have.

Q. That were given to you?

(Papers were handed to Mr. Austin by the witness.)

The Witness: As I say, some of those may have been—some of those were before and some of them

347 were made after.

Q. These slips, then, that you have just handed me, were not all obtained in connection with this survey that you made for the Sun Oil Company?

A. No, sir. No, sir.

Mr. Austin: I would like to have this envelope marked for identification, please.

Trial Examiner Ballinger: The reporter will mark the envelope "Commission's Exhibit 50" for identification.

(The envelope referred to was marked "COMMISSION'S EXHIBIT 50", for identification.)

By Mr. Austin:

Q. Mr. Chandler, I show you this envelope, marked Commission's Exhibit 50, for identification, and ask you to describe what it is and where you got it.

A. This envelope was given to me by one of the attendants, after he had put gas in my car and said that it would be valuable to me to keep my receipts, which they were giving me for gasoline.

Q. The receipts are those sales receipts you have just referred to?

A. Yes, sir.

Trial Examiner Ballinger: One of the attendants of what?

The Witness: Of Ned's Service Station.

348 Mr. Hanley: May it be understood, Your Honor, that our general objection includes an objection against hearsay? I think I objected on the ground that none of this was binding on the Respondent. Of course, it is not binding on us what somebody unidentified, whose name we don't even know, may have said to this man, who went there at the instance of a competitive organization to, apparently, obtain evidence in a lawsuit. And it is, of course, the worst type of hearsay that could be offered. We want that objection to all of this class of testimony, in addition to our general objection.

Trial Examiner Ballinger: The objection is overruled, subject to renewal at a later time, if counsel sees fit to urge it.

By Mr. Austin:

Q. Are these seven slips, which I now hand you, slips which you have just referred to in your testimony as sales receipts obtained at Ned's Auto Supply Company station at Jefferson and Manistique?

A. Yes, they are.

Mr. Austin: I would like to mark one of these, for identification.

Trial Examiner Ballinger: The reporter will mark the receipt "Commission's Exhibit 51" for identification.

(The slip referred to was marked "COMMISSION'S EXHIBIT 51" for identification.)

349 By Mr. Austin:

Q. On the back of this particular Commission's Exhibit 51, for identification, appears a little stamp with "Twelve cents" printed on it. What is that?

350 A. That is the amount of savings, the amount that I could buy in merchandise at the time I turned all the tickets in that I had in my possession.

Q. You mean that that is the amount which you could get on this particular ticket?

A. Yes, sir.

Q. So that when you said all the tickets, you meant that would be the sum?

A. That would be the sum of that one ticket.

Q. In other words, this 12 cents applies only to this ticket? Is that right?

A. Yes, sir.

Trial Examiner Ballinger: Does the ticket represent a purchase of 12 gallons of gasoline?

The Witness: No, sir. I believe the ticket represents a purchase of 6-3/3 gallons of gasoline.

By Mr. Austin:

Q. 3/3?

A. Well, 3/10. Excuse me.

Q. Can you state from looking at this particular ticket, Commission's Exhibit 51, for identification, when it was that you made that purchase?

A. Only that the ticket is stamped, "October 18".

Q. Do you know whether that was '39 or '40, or either one?

351 A. No, sir, I do not.

Q. I see.

Trial Examiner Ballinger: You are certain it was one of those years?

The Witness: Yes, sir.

Trial Examiner Ballinger: '39 or '40?

The Witness: Yes, sir.

Mr. Austin: I offer in evidence this envelope marked "gasoline savings container" which has been identified as Commission's Exhibit 50; also a sales slip with a savings stamp on the back, which has been identified as Commission's Exhibit 51; also six other slips similar to Commission's Exhibit 51, except that there are no sales stamps on the back of the other six.

Trial Examiner Ballinger: Let the first ones, Commission's Exhibits 50 and 51 be received in evidence, subject to the right of counsel for the Respondent to move to strike at a later date; also Commission's Exhibit 52-A, B, C, D, E, and F, are admitted in evidence.

(The documents referred to, heretofore marked, for identification, "Commission's Exhibits 50 and 51," were received in evidence. The documents referred to last above were marked, for identification, "COMMISSION'S EXHIBITS 52-A, B, C, D, E, and F," and were received in evidence.)

352 Mr. Austin: Your witness.

Cross-Examination by Mr. Hanley.

Q. How long have you been employed by the Sun Oil Company as a salesman in Detroit, Mr. Chandler?

A. From March 15, 1940.

Q. What was your occupation prior to that time?

A. I worked—prior to that I was an attendant in a training station at Jefferson and Beaconsfield.

Q. Whose training station?

A. Sun Oil Company's.

Q. How long were you there?

A. From December 28, 1939.

Q. Were you connected with the oil business prior to December, 1939?

A. No, sir.

Q. I don't know what the boundaries mean that you indicated as circumscribing your territory in Detroit; to those of us who are not familiar with geography, can you tell us about what portion of Detroit that covers?

A. I would say that covers the southeast section of Detroit.

Q. Would it be a fourth of the area of the city or a third or a tenth or what, Mr. Chandler? Just roughly, I don't mean to ask you to be accurate about that.

353 A. I imagine about a fifth.

Q. How many retail service stations are there in Detroit, and by Detroit I mean this contiguous area that has been under discussion here including Detroit proper, Hamtramck, Dearborn, Highland Park.

Trial Examiner Ballinger: Do you know?

The Witness: No, I don't know exactly how many there are.

Trial Examiner Ballinger: Have you information upon which you can base an approximation?

The Witness: I would say approximately in the vicinity of 3700 or 3800.

By Mr. Hanley:

Q. That is your best judgment?

A. Yes, sir.

Q. How many are in your territory?

A. As a guess, I don't know exactly, but as a guess—

Q. Your best judgment?

A. I would say around 435.

Trial Examiner Ballinger: That is your best judgment?

The Witness: That is my best judgment, yes, sir.

By Mr. Hanley:

Q. Did you call on all of them in the course of this survey you made in 1940?

354 A. Would you please state that again?

Q. Did you call on all of those stations in your territory in the course of this survey that you made in 1940?

A. Would you tell me exactly what you mean by saying did I call on them?

Q. You tell me. I don't know what you did. Will you tell us what you did in respect to these 450-odd stations in your territory in connection with this survey which you say you made in August, 1940.

A. I stopped and looked at the posted prices on the pumps in every one of these stations in my territory.

Q. Did you buy gasoline at them?

A. No, sir, not at every one of them.

Q. At several?

A. No, sir. The only buys that I have made on gasoline were made at Ned's at Jefferson and Manistique.

Q. Well, was there a posted price there?

A. Yes, sir.

Q. Which you say at that time was 16.3 cents?

A. That is right, yes, sir, for regular gasoline.

Q. Did you find posted prices at these other 450-odd stations?

A. Yes, sir.

Q. That you looked at?

355 A. Yes, sir.

Q. But you didn't buy gasoline from anybody except Ned's?

A. Yes, sir.

Q. Then, as a matter of fact, you don't know what the actual price of gasoline at any station except Ned's was, do you, in your entire territory covered in that survey?

A. I know the prices that were posted on the pump for which the meters were set.

Q. I understand, but you found the price different actually than the posted price at the only station that you bought gasoline, didn't you?

A. Would you repeat that again, please?

Mr. Hanley: Would you read it, please?

(The question was read.)

Trial Examiner Ballinger: Do you understand the question?

By Mr. Hanley:

Q. If you don't understand, I will try and clarify it for you.

A. I would appreciate it.

Q. I understand you to say that you purchased some gasoline from Ned's and were given some Pyroil and a receipt which was good for 2 cents in trade, or something of that kind; that is correct, isn't it?

A. Yes, sir.

356 Q. Let me ask you if you don't regard that as a reduction from the posted price of 16.3 cents?

A. I do regard it as a reduction from that.

Q. Now, all I am asking you, Mr. Chandler, is whether you know what prices gasoline was actually being sold at at all of these other stations in your territory, you not having—

A. I didn't buy at the other stations. I don't know actually what the price was.

Q. Isn't it true, Mr Chandler, that as far as you knew on the day you made this purchase in August, 1940, of Ned's, that price that you paid at Ned's may have been higher actually than any other price in your territory, so far as you know?

A. The price that I paid there was the same that was posted on all the gas pumps in my territory at that time. All that I checked was 16.3.

Q. I understand that, Mr. Chandler, but you don't know how much below that any other station in your territory may have been actually selling gasoline for, do you?

A. No, sir.

Q. They may have been selling gasoline for much less than Ned's sold you this gasoline; is that not true, so far as you know?

A. I don't know.

357 Q. So, really, all you know about this whole survey that you made, Mr. Chandler, is that you bought these six gallons of gasoline from Ned's one day in August, 1940, and were given a can of Pyroil and a trading stamp worth 2 cents in merchandise, and you don't know what you could have bought gasoline any place else in your territory for on that day; is that not right?

A. I don't know that the price would have been higher any place else.

Q. How do you know that?

Mr. Austin: He said he didn't know that.

The Witness: I said I didn't know that.

By Mr. Hanley:

Q. Oh, I beg your pardon.

Well, can't you answer that question as stated? Isn't it true that you don't know what the price was, the actual price any place else—

Trial Examiner Ballinger: Judge, isn't that repetitious? Hasn't the witness answered that several times?

Mr. Hanley: It is repetitious, but I haven't got even one answer yet.

Trial Examiner Ballinger: Hasn't the witness testified that he didn't know what the prices charged at the other stations were, other than the posted price?

358 By Mr. Hanley:

Q. Is that your testimony?

A. That was my answer, yes.

Q. As the Court has stated it.

Trial Examiner Ballinger: And he didn't know whether they were given any rebate in the form of receipts or otherwise at the two stations.

By Mr. Hanley:

Q. Is that your testimony also?

A. That's right; yes, sir.

Q. Now, you have traded on a number of occasions at Ned's, have you not?

A. Yes, sir.

Q. You did that on some occasions before you were employed by the Sun Oil?

A. Yes, sir.

Q. What was your business before you became connected with the Sun Oil Company, in any capacity?

A. I was a salesman for Millenbach's at Grosse Point and they were a Ford-Lincoln Zephyr dealer.

Q. Did you drive a car in the course of your work?

A. Yes, sir.

Q. And it was a business car, you used it in your work?

A. Yes, sir.

Q. You purchased gasoline at various places for it?

359 A. Yes, sir.

Q. Among them did you purchase gasoline at Ned's?

A. Yes, sir.

Q. Did you advise them, or anyone in attendance there, at any time, what your business was?

A. Yes, sir.

Q. And they knew you, did they not?

A. Pardon?

Q. They knew you and knew your business?

A. Yes, sir.

Q. Did you advise any other service stations in Detroit who you were and what your business was?

A. At what time?

Q. While you were working for this automobile jobber.

A. Yes.

Q. And did you receive from any other service station than Ned's a discount upon the gasoline which you purchased?

A. No.

Q. Never?

A. Not during the time I was selling automobiles, no.

Q. Did you ever ask for any such discount?

A. No.

Q. Any place except Ned's?

A. No.

360 Trial Examiner Ballinger: Did you ask for it at Ned's?

The Witness: No, sir.

By Mr. Hanley:

Q. Never asked for it at Ned's?

A. No, sir.

Q. You have stated what they told you about this receipt they gave you in August, 1940. What did you tell them when you went in? In the first place, who did you talk to if you can recall?

A. I don't know the man's name. I went in, a man came up and asked me whether he could fill the car up, or asked me what I wanted. I don't know the exact words he used.

Q. What did he say?

A. I told him to fill the gas tank.

Q. Did you tell him who you were on that occasion?

A. No, sir.

Q. Did you give him any—any name?

A. No, sir, I had no occasion to.

Q. Did you tell him who you were connected with?

A. No, sir.

Q. Did you show him this envelope, Commission's Exhibit 50, which you produced here, or a similar one?

A. No, sir.

Q. Did you tell him you had ever traded at Ned's before?

361 A. No, sir.

Q. Did you say anything to him?

A. Nothing other than the direct answers to the questions that he gave me, as to asking me how much gasoline I wanted.

Q. What did you tell him?

A. I told him to fill the tank.

Q. Is that all you said to him?

A. That's all I remember of having said to him.

Q. Then what did he say to you?

A. He handed me a paper and after he had just about finished filling the tank I asked him if I might have Pyroil and he said "Yes" and put it in.

Q. You asked for the Pyroil?

A. Yes, sir.

Q. Why did you ask for Pyroil?

A. Because it could be had at no extra price there.

Q. And they put that in your tank?

A. Yes, sir.

Q. Just as a matter of explanation: this Pyroil is a substance that is presumed to have some merit as a lubricant, when used in gasoline, isn't it?

A. It is presumed to have some.

Q. Just what were the circumstances surrounding the giving of the receipt to you? What did you say about that, if anything?

362 A. I did not say anything about it. I gave him the money and he, in turn, gave me a receipt.
Q. Did he say anything about it?
A. No, sir.
Q. You don't know whether he knew you or not?
A. No, I don't.
Q. But you had purchased, on a number of occasions prior to that time, at Ned's stations?
A. Yes, sir.
Q. They didn't give you a toy balloon at that time?
A. Not then.
Mr. Hanley: I think that's all.

Redirect Examination by Mr. Austin.

Q. One more question. Was this car that you were driving last summer when you were working for the Sun Oil Company—did it have the Sun Oil Company's name on it?
A. No, sir.
Q. Did it have any other name or business marking on it?
A. No, sir.
Q. Just a plain, private vehicle?
A. Yes, sir.
Mr. Austin: That's all.
Trial Examiner Ballinger: You are excused.
(Witness excused.)

363 RUSSELL G. WARREN was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. What is your full name, Mr. Warren?
A. Russell G. Warren.
Q. What is your address?
A. 14941 Penrod, Detroit.
Q. Are you employed by the Sun Oil Company?
A. Yes, sir.
Q. In what capacity?
A. As a motor products salesman.

Q. Is gasoline one of the products that you sell?

A. Yes, sir, all automotive products.

Q. And do you call on service stations in your territory?

A. Yes, sir.

Q. Sun Oil Company stations?

A. Yes, sir, and competitive stations in solicitation of additional accounts.

Q. Where is your territory?

A. Do you want specific information?

Q. Just generally the part of the city.

A. I cover East River and the Down River section, including a small part of River Rouge, Ecorse, Wyan-
364 dotte, Trenton, Lincoln, and Allen Park, and Melvindale.

Q. Is there a station operated by Ned's Auto Supply Company located in your territory?

A. Yes, sir, the one at Michigan and Maple, in East Dearborn.

Q. Have you ever purchased any gasoline at that station?

A. Yes, sir, I have.

Q. Did you make any purchases there during 1940?

A. Yes, sir, I did.

Q. From time to time or at a particular time?

A. Just periodically.

Q. Did you make those purchases in the course of your employment for the Sun Oil Company, or did you make them simply for the purpose of getting gasoline to run your car?

A. I made them at the request of the executives of the Sun Oil Company; getting buys regarding checking on this discount situation.

Q. Were you instructed by the Sun Oil Company to check from time to time on the prices charged by stations selling other major brands of gasoline?

A. Yes, we are.

Q. I suppose not only major brands but all other stations in your territory; or do you check more on major brands?

A. I think our checks have been on the major
365 brands rather than on the so-called lower grades of gasoline sold by other than major companies.

Q. Can you state the price which you paid for gasoline purchased at this station of Ned's Auto Supply Company on Michigan Avenue during 1940, and if there was any difference in the price at different times, state what it was.

A. I have no record to indicate the exact price; the prevailing price, however, during the time that the survey was made, was 16.3.

Q. Did you pay that price each time that you went to Ned's?

A. Yes, sir.

Q. Were you given any premiums or receipts or discount slips or anything of any value, in connection with those purchases?

A. I was, yes, sir. I was given a newspaper and a sales receipt similar to the exhibit that you have on file, and told by the uniformed attendant that presented it at a later date—I think in the amount of a dollar, if I remember correctly—that that could be redeemed for any merchandise available at this Ned's store.

Q. Including gasoline or not?

A. Yes. I think, if I remember correctly, it was for any merchandise available on the location.

366 Q. When you made these calls at Ned's, what sort of a car were you driving?

A. A Chevrolet town sedan.

Q. Did it have any business markings on it, or name?

A. None, other than an identification emblem which, I assume, you are familiar with.

Q. One of the small Sun Oil Company identification emblems?

A. That is correct.

Q. Those emblems are given by the Sun Oil Company to anybody purchasing gas at the Sun Oil Company stations, are they not?

A. They are not. They are sold to customers purchasing gasoline in the Sun Oil Company stations for a nickel.

Q. I knew they could be obtained, but the point I wanted to make was it wasn't only a salesman of the Sun Oil Company that had one of those emblems.

A. No. I might state quite frequently people do get those emblems without paying the nickel. However, the dealer is billed for them at the time he receives them at a price, I think, if I remember, of 3 cents. They are resold for a nickel.

Q. On any of these calls at Ned's Auto Supply Com-

pany station on Michigan Avenue, was there any conversation between you and the station attendant in connec-
367 tion with the giving of those receipts?

A. No, I believe that was the common practice. I mean, you were simply given a sales receipt for the amount of your purchase.

Mr. Hanley: Your Honor, I move to strike that answer: "common practice" unless he identifies whose common practice.

The Witness: Should I say at Ned's station they would give you a sales receipt for the amount of your purchase?

By Mr. Austin:

Q. Did the sales receipts which you received have stamped on the back "Commercial Use" or "Commercial Account", or words to that effect?

A. Only in one instance, and I don't have that particular slip, but in checking for discounts in my area, I went with a truck driver and bought a dollar's worth of gasoline and the sales slip that he was given said "For Commercial Use," and there was just a "12" marked on the back of the sales slip that he was given.

Q. Did the station operator—I believe you just said he told you they were good for 2 cents a gallon after you got a dollar's worth of them?

A. That's right.

Q. Did you make any statement to him or have any
368 conversation with him as to what business you were in at the time you made the purchases?

A. No, I didn't.

Q. You weren't asked whether or not you were driving the car for some commercial use?

A. I wasn't.

Q. Have you any of those receipts with you?

A. I do not. The only receipts I obtained I turned in to the company, I think, with my survey.

Q. I show you Commission's Exhibit 52-C, and ask you whether the receipts to which you have referred are receipts of that nature (handing document to witness).

A. They are similar to this, yes.

Q. Will you look at the back? Do you recall whether your receipts had that notation on the back, or not?

A. I do not.

Q. They may have had that notation?

A. As I recall, the receipt that I had just had; I think, either marked in green or red pencil, the "12".

Q. Was it a receipt for 6 gallons of gasoline?

A. I think, if I remember correctly, my purchase was a dollar, which, I think, would be 6 and a fraction gallons.

Q. What was your understanding of the meaning of the "12"?

A. "12" was to represent the 2 cents a gallon discount
on the 2 cents a gallon gasoline which, when the sales
369 ticket, the amount on the back of the sales ticket
amounted to a dollar, that you could use it for the purchase of the products in the Ned's station.

Mr. Austin: That's all.

Cross-Examination by Mr. Hanley.

Q. How long have you been engaged as a salesman with the Sun Oil Company?

A. It will be 15 years November 1st, this year.

Q. All the time in Detroit?

A. No, I was at Reading, Pennsylvania.

Q. Just how long in Detroit?

A. All but two years and seven months; approximately 13, 13 and a half years.

Q. Has that been continuously in Detroit, from this time back?

A. No.

Q. How long have you been with the company continuously in Detroit, up until now?

A. The last has been about nine years.

Q. Now, about how much of Detroit and its immediate inclusions is covered by your territory?

A. A very small portion of Detroit; that part of Detroit outside of Warren Avenue, or on Warren Avenue, from Greenfield, west.

370 Q. Can you give it to us in a fraction? The streets don't mean much to us.

A. The fractional part of Detroit proper that I cover would be very, very small. I don't presume it would amount to a square mile.

371. Q. What is your knowledge as to the number of service stations in Detroit? By that I mean Detroit, Hamtramck, Highland Park, and Dearborn?

A. I assume in the neighborhood of three or four thousand.

Q. How many are in your territory?

A. I couldn't give you the definite number that were in the survey I made, which covered every gasoline account, but I would assume I had between three and four hundred on the survey.

Q. And when was this survey made by you?

Mr. Austin: Your Honor, I object to any questions regarding the survey by the Sun Oil Company, because I didn't ask this witness anything about that subject. I only asked him if he bought gasoline at Ned's Auto Supply Company—I did ask him whether those purchases were made in his capacity as a salesman for Sun Oil, or merely buying gas for his own car; if Your Honor is of the opinion that that opens the door to survey questions, I will withdraw the objection, but it seems to me it is going a little far afield.

Trial Examiner Ballinger: The Examiner is of the opinion that the examination in chief opened the door, and this is proper cross-examination. You may proceed.

Mr. Hanley: Will you read the last question, please?

(The question was read.)

A. In August, I believe, 1940.

372 By Mr. Hanley:

Q. Do you remember the day or days?

A. As I recall, the taking of the survey covered a fairly good part of the month.

Q. Did you buy gasoline at any stations among this four or five hundred included in your survey, except Ned's station?

A. Only those selling Sunoco products in my territory.

Q. So you did buy from Sun stations; that is, dealers handling Sun products?

A. Yes, sir.

Q. But from no other product dealer except Ned's?

A. That is correct.

Q. And about how many Sun dealers are there in your territory, or among that four or five hundred stations?

A. I believe at that time there were forty; that's in the metropolitan area, going as far south as Trenton.

Q. Now, at this time, did you buy gasoline from each of the Sun dealers?

A. No, I simply bought gasoline where I needed it.

Q. You weren't surveying Sun's?

A. Yes, sir, we did.

Q. But you bought the gasoline from the Sun dealers when you wanted the gasoline?

A. That is correct.

Q. About how many of the Sun dealers did you
373 patronize at that time?

A. Oh, I presume from time to time I patronized all the dealers.

Q. I mean in the period of this survey?

A. Well, this would be a guess; I would say probably six or eight; possibly ten.

Q. Do you recall what you paid for the gasoline at those particular stations where you bought it?

A. I would assume that it was at the same—

Q. I don't want you to assume it. I want you to tell us what you know. If you don't know, say so.

A. Very well, sir. I don't know the exact price I paid in August, 1940.

Q. Then the only knowledge you have today as to the actual price of gasoline in your territory and among the four or five hundred stations in August, 1940, is the price you say you paid to Ned's, is that right?

A. Is that the only price that I know?

Q. The actual price.

A. Now wait a minute here. Let me get this thing straight. The going price at the time, during the survey—which I do not have my figures here; I could give you if I had the survey figures—would indicate that the price was 16.2 or 16.3.

Q. Just a moment. I am not asking you what some-
374 thing else would indicate or what you assume. I am
asking you if you know what the actual sale price of gasoline was in August, 1940, at any of these four or five hundred stations in your territory, except the one you went specifically to to make a purchase at and keep a record of; namely, Ned's.

A. At the present time, no. However, there are records available in my survey—

Q. Isn't that all that you want to say about it?

A. Sir?

Q. Isn't that all that you want to say about it, or can say about it?

A. Yes, sir; now.

Q. Is it not true that the actual price of gasoline in all of the other stations, including Sun stations in your territory at that time, so far as you know, may have been either higher or lower than the price that you paid Ned's?

A. I am not in a position to say. I just said I didn't know what the price was.

Trial Examiner Ballinger: The Examiner would suggest to counsel that if he thinks this is material, that he avail himself of the offer of the witness to produce the records.

Mr. Hanley: I don't think it is material. I don't want it.

375 Mr. Austin: I thought he would have his papers with him. Do you have anything with you you can refresh your recollection on?

The Witness: I have here a copy of the sheet that I made of the Standard stations in my territory, and the prices at the time that this survey was made: only on the Standard dealers in my territory.

Mr. Austin: You haven't got any Sun?

The Witness: I do not, sir; but it is available.

By Mr. Hanley:

Q. You are talking about posted prices now, aren't you?

A. That is correct, sir; prices I took from the posting at the stations on the pumps at the time the survey was made.

Q. Isn't it a fact, based on your nine years experience in Detroit, that in the majority, at times, of these three or four thousand stations in Detroit, the post prices bear very little relation to the actual prices at which you can buy gasoline.

Mr. Austin: I object to that question on the ground he said, "at times." I would like to have that a little more specific, if you don't mind, Judge Hanley.

Trial Examiner Ballinger: The witness, if he knows, is capable—

Mr. Austin: He said "at times." "At times" might be when? It might be 1935, 1939, or a week, or a year.

By Mr. Hanley:

Q. At various periods from 1936 until now.

376 Trial Examiner Ballinger: Do you understand the question?

The Witness: I believe I do, Your Honor. I would say this: That from the experience that I have had in the gas business, that, generally speaking, the posted price on the pumps is usually the price charged by the operator or dealer.

By Mr. Hanley:

Q. Isn't it a prevalent custom in Detroit for many dealers to give various kinds of concessions, premiums, rebates, bonuses of one sort or another, to their customers?

A. No, I wouldn't call it prevalent.

Q. Isn't it true that there are many stations, several hundred stations, at least, in Detroit, which have been continuously, since 1936, offering rebates in price, or offering premiums of various kinds, such as giving away eggs and cigarettes, and crockery, and all sorts of merchandising; hasn't that been your observation and experience?

A. Those conditions have existed.

Q. And haven't they existed continuously for the past four years?

A. Frankly, I would say no.

Trial Examiner Ballinger: Have there been a hundred or more stations at which that practice has prevailed?

The Witness: I presume the percentage, Your 377 Honor, would be very much higher than that, at times.

By Mr. Hanley:

Q. Didn't you find the conditions so bad in that respect that your own company protected dealers on a two cent margin?

A. During August of 1940?

Q. No, within this period from 1936 to date.

A. I would say so, sir.

Q. Isn't it true that in October and November of 1939 your own company did do that; and you gave a dealer, your dealers, an additional discount off your own dealer posted tank wagon price in sufficient amounts to make his margin two cents a gallon?

A. That is correct.

Trial Examiner Ballinger: Over what period of time?

The Witness: During the time that this price war that this gentleman speaks of was in progress, we did.

By Mr. Hanley:

Q. And at that time you had two levels of prices?

A. No, sir, we had one level of prices.

Q. But you gave this differential to your own dealers, where they were up against a competitive situation; is that the situation?

Mr. Austin: Your Honor, I don't know what the witness' knowledge is on policies of the Sun Oil Company. I have the manager of the Sun Oil Company here. I 378 expect he would be a little better witness, and, furthermore, I think it is outside of the scope of the direct examination, although I have no objection particularly to it; but I want to have the right to pursue it myself, if Judge Hanley is going to open the door on that subject.

Mr. Hanley: You have opened this whole question on resale pricing, with this witness.

379 Trial Examiner Ballinger: If the witness has personal knowledge of the facts, he may answer.

Mr. Austin: What was the question?

(The question was read.)

A. I would say it was at that time, yes, sir.

By Mr. Hanley:

Q. Did you ever buy gasoline at Ned's station prior to this purchase you have referred to in August, 1940?

A. I don't recall; I believe I did.

Q. You don't know whether you did or not?

A. I believe I purchased prior to August, 1940.

Q. Do you know whether you were known to Ned's attendants or not when you made that purchase?

A. I would say that I was not known.

Q. Well, do you know that? Do you know that you were not known?

A. No, sir, I do not.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Hanley:

Q. What is this Sun Oil emblem that you talk about, Mr. Warren?

A. Well, it is a personalized small metal diamond with a red arrow on which individuals' initials are put, and they are attached to the license plates of the cus- 380 tomer's car.

Q. Your dealers give that piece of merchandise to a Sun customer for 5 cents? Is that true?

A. That is correct.

Q. You regard that as a premium?

A. I don't, sir, no.
Q. How much is the thing worth?
A. Well, it is probably worth a nickel.
Q. Probably worth more, isn't it, Mr. Warren?
A. Well—
Mr. Austin: Do you know or don't you know?
The Witness: I don't think that I know how much it is worth.
Trial Examiner Ballinger: Didn't you state in your direct examination that it cost 3 cents?
The Witness: We sell them to the dealers in packages of 50 at 3 cents apiece.

By Mr. Hanley:

Q. Well, that is the selling price. That hasn't anything to do with costs, as I understand it.
A. That is the cost price to the dealer, sir.
Q. Yes. But I am talking about the worth of the thing itself.
A. Frankly, I am not in a position to know what the thing is worth. It is an identification emblem. I feel
381 that it is worth a nickel on my car.
Q. Well, you think it would be just as valuable to you as a toy balloon, don't you, Mr. Warren?
A. Well, I imagine.
Mr. Hanley: That is all.

Redirect Examination by Mr. Austin.

Q. Mr. Warren, you said that you bought perhaps six or eight or ten times from Sun stations during the period of this survey?
A. That would be my guess, yes, sir.
Q. Do you know of your own knowledge from the price that you paid at those Sun stations whether it was the same or higher or lower than the price at Ned's after deducting the 2 cents per gallon at Ned's?
Mr. Hanley: Will you read that question, please?
(Question was read.)
A. It was higher.
Mr. Hanley: That is objected to, just a minute; I move the answer be stricken. It is objected to for the reason that the witness has already answered he doesn't know what he paid at the Sun stations, and, consequently, it is impossible to make that involved calculation.

Trial Examiner Ballinger: The objection is over-ruled. You may answer. 382

The Witness: I said that—I said yes, didn't I? I paid the posted price.

By Mr. Austin:

Q. The question was whether it was higher, lower, or the same after taking into consideration the 2 cent discount at Ned's?

A. I said that the price was higher.

Q. You were just asked about the prevalence of discounts and premiums being given by gasoline stations in the last few years. During the year 1940, since the end of the price war at the end of 1939, was the giving of premiums and discounts prevalent or not?

A. I would say that the market conditions since the end of the price war in November of '39 has been the cleanest that I have ever seen it since I have been in the business.

Q. That includes 1940?

A. I mean our market has been cleaner during that period than I have ever experienced since I have been with the Sun Oil Company.

Q. Then when you said that perhaps at time there might have been well above 100 stations giving premiums and discounts, you were not referring to 1940, were you?

A. No, I was not. I think the question was from '36 on, during which time we did have discounting, premiums, and waves of one thing after another. 383

Mr. Austin: That is all.

Recross Examination by Mr. Hanley.

Q. Just a question or two, please, Mr. Warren. Are you acquainted with an operator in Detroit known as Charles Austin?

A. Am I acquainted with him? No, sir.

Q. Do you know of him? I don't mean personal acquaintance. Do you know of him?

A. Yes, sir.

Q. Are you familiar with the location of his stations and his brand name?

A. I wouldn't be in a position to give the locations of his stations, but I think the brand name is Joy.

Q. Do you know it to be a fact that he has a number of stations at various points about Detroit?

A. I have seen them, yes, sir.

Q. Is it true that that gasoline is represented and sold as a comparable gasoline to the ordinary house brand major gasolines?

Mr. Austin: I object to this line, your Honor. It is off the line of anything—

Mr. Hanley: Foundation, wholly.

Mr. Austin: —on direct. Isn't that outside of
384 anything that I have gone into?

Mr. Hanley: It is just a foundation of exactly what you asked.

Trial Examiner Ballinger: It is leading up, I take it, to another question. Objection is overruled.

Mr. Austin: The witness testified he didn't even make a survey on anything except major oil.

Mr. Hanley: I am just asking for his general knowledge now.

The Witness: In other words, you want my opinion as to what I think of Joy gasoline?

By Mr. Hanley:

Q. No, no.

Mr. Hanley: Read the last question.

The Reporter: (Reading.) "Is it true that that gasoline is represented and sold as a comparable gasoline to the ordinary house brand major gasolines?"

A. I don't believe I could answer truthfully, no. I don't know.

Q. You don't know what it is represented as being?

A. No, I frankly don't.

Q. Maybe you don't know enough about this marketing thing for me to ask the question. I will do it, however. Do you know that it has been a fact during the period from 1936 and including 1940 that that gasoline has
385 been sold at retail at amounts varying from about a cent to as much as 5 cents below the prevailing market price in Detroit?

A. I wouldn't—

Trial Examiner Ballinger: Just a moment.

Mr. Austin: I must urge earnestly an objection here. I put this witness on the stand for one purpose, and the only thing I asked him about was—

Trial Examiner Ballinger: The Examiner doesn't think a sufficient foundation has been laid for this question. If there is an objection, the Examiner sustains it.

Mr. Hanley: I am inclined to agree that I can't qualify the witness about this. I don't think he knows about it. I will excuse him.

Mr. Austin: I only asked about Ned's.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Mr. Hanley: That is all I have.

The Witness: Is that all, sir?

Trial Examiner Ballinger: That is all. You are excused.

(Witness excused.)

Trial Examiner Ballinger: Take a recess for five minutes.

(A short recess was had.)

386 PAUL HENRY HARRISON was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Give your full name to the reporter, please, Mr. Harrison.

A. Paul Henry Harrison.

Q. Your address?

A. Business address or residence?

Q. Well, give us your residence address.

A. 412 Devonshire Road, Grosse Point Park, Michigan.

Q. What business are you engaged in, Mr. Harrison?

A. I am in the oil business.

Q. Are you connected with the Sun Oil Company?

A. I am the western regional manager for the Sun Oil Company's business.

Q. Where is their office in Detroit?

A. The National Bank Building.

Q. Is that the regional office?

A. That is the regional office.

Q. For your region?

A. Yes, sir.

Q. Will you state what territory the western region covers?

387 A. It covers an area bounded on the east by the western line of the first tier of counties in Ohio down to the Ohio River.

Q. Will you just state what states, perhaps?

A. Ohio, part of West Virginia, Kentucky, Indiana, Michigan. There are eighteen of them, sir, the middle western states as far as the Rocky Mountain Divide.

Q. How many states?

A. Eighteen states.

Q. That includes Michigan, of course?

A. Yes.

Q. How many Sunoco Oil stations are there in the Detroit area, greater Detroit?

A. The district area includes approximately 480.

Q. Is the Detroit district one that includes Hamtramck and Dearborn? How much area does that include besides the city of Detroit?

A. Well—

Q. Besides the city of Detroit and Hamtramck and Dearborn?

A. It goes out as far as Ann Arbor on the west; it goes down to the Monroe County line to the south, and goes up about, well, it includes Oakland County and part of Macomb, Washtenau, part of Washtenau; it goes out to the west as far as a town called Brighton on the route to Lansing.

Q. How long have you been the western regional
388 manager for Sun Oil Company?

A. Approximately 12 years.

Q. How long have you been in the oil business?

A. It will be 20 years this fall.

Q. What was your position or occupation before you were western regional manager for the Sun Oil?

A. I was southeastern regional manager.

Q. Is that the territory in the southeastern part of the United States?

A. Yes, sir.

Q. How long were you in that position?

A. Six and a half years.

Q. How many years did you say you were western regional manager here?

A. 12.

Q. That brings it up to 18 and a half?

A. Yes, sir.

Q. Were you with the Sun Oil Company before that?

A. A year and a half prior to that. I started in September of 1921.

Q. In what capacity did you start out in?

A. So-called smokestack salesman, to start with.

Q. Did gasoline smoke in those days?

A. No. That was industrial.

Q. In the course of your duties as western regional 389 manager, have you made it your business to keep informed as to the competitive situation in the sale of gasoline at retail in Detroit?

A. Yes, sir.

Q. Now, it has been proved in these hearings, Mr. Harrison, that the Standard Oil Company sells gasoline to three or four customers who are in whole or in part operators of retail stations. I might qualify that by saying that the Stikeman Oil Company has at some time operated retail stations, but may not be doing so now,—but they have sold to some few customers operating retail stations, who buy gasoline in tank car quantities and who take delivery at their own bulk plant, and purchase at tank car prices, whereas the price which Standard Oil Company charges to the retail stations in Detroit that purchase direct from the Standard Oil Company is from one and a half to one and three-quarters cents per gallon higher than the price charged to the retailers who buy in tank car quantity. Are you familiar with that practice?

A. Yes, sir.

Q. Is that practice engaged in by other major oil companies doing business in Detroit other than Standard Oil Company?

A. I understand, yes, there are other companies that follow the same policies and practice.

390 Q. How is that practice referred to in the gasoline trade in Detroit?

A. It might be referred to as a distributorship or jobber, sometimes called agents.

A. Are those retailers buying at tank car prices ever referred to as subsidized accounts?

A. I have heard that expression used, that and others, other expressions.

Q. What are some of the others?

A. Preferential price.

Q. Aren't those tank car buying retailers frequently referred to as subsidized accounts?

A. Yes, I think I have heard them so referred to. Personally, I don't use the term. I am not as familiar with it as I might be.

Q. Does the Sun Oil Company sell at tank car prices to any purchasers of Sun Oil Company gasoline in Detroit?

A. No, sir.

Q. That is, to any purchasers who resell at retail?

A. No, sir.

Q. In your opinion, what is the effect of this practice which I have just described, with which you say you are familiar, upon retail competition in the sale of major brand gasolines in Detroit?

Mr. Hanley: Just a moment, Mr. Harrison.

391 In addition to the general objection, this question is objected to on the ground that it appears to be hypothetical, to elicit an opinion from the witness, and not even the hypothetical question is included in the present question propounded to the witness but appears to refer back to a statement made by counsel, and that even such statement does not include all of the factors of proof which are present in this case and upon which the witness would be required to base an opinion before any opinion would be admissible.

Furthermore, any opinion based on any hypothetical question, even if it did include all of the factors proved, would not be proper testimony in this case for the reason that such an opinion as is sought to be elicited is an opinion as to the ultimate issue in the case and is tantamount to asking an opinion of a witness in a criminal case whether the Defendant is innocent or guilty.

Trial Examiner Ballinger: Read the question.

(The question was read.)

Trial Examiner Ballinger: The objection is overruled.

A. My opinion is that it creates a very difficult competitive condition by reason of the fact that some marketers are able to buy at a lower cost than others; and it is the usual practice that the preferential buying leads to
392 a lower retail price to either openly or through one means or another of discounting.

By Mr. Austin:

Q. By marketers, you mean retail marketers?

A. I mean by retail marketers.

Q. Is it your statement that this practice leads to price cutting by the stations receiving the preferential price?

A. Yes.

Mr. Hanley: That is objected to as leading.

Mr. Austin: Well, I understood that he already said that.

Trial Examiner Ballinger: The objection is overruled.

The Witness: Repeat the question.

(The question was read.)

Trial Examiner Ballinger: If that is not his statement, the witness may answer.

The Witness: I answer yes to that question.

By Mr. Austin:

Q. And based upon your experience and observation of the competitive retail situation here, what has been the effect of such price cutting upon the business of other retail gasoline dealers who are paying the posted tank wagon prices of their respective major oil companies?

393 A. It forces—

Mr. Hanley: Just a moment, Mr. Harrison.

The Witness: Yes, sir.

Mr. Hanley: The same objection to that question, and I would like to inquire, if your Honor please, whether Mr. Austin is pointing these questions to the practice of the Respondent in this case or whether he is just talking about some general situation.

Mr. Austin: Well, in the first place, I think you will concede that Mr. Raupagh testified that the posted tank wagon prices of major oil companies are generally the same, so that that part of the question I think is based upon proof. As to the question you just asked, it is intended to show the result of this practice, whether engaged in by Standard Oil Company or by some other company, the witness already having testified that other companies engage in it.

Now, so far as this case is concerned, I contend that it is relevant only in so far as it indicates the effect of the practice as engaged in by Standard Oil, but in all fairness I didn't want to make it in any way appear that I was contending that the Standard Oil Company was the only company which engaged in the practice.

Mr. Hanley: Then to the general objection and the objection to the hypothetical question which was earlier
394 asked of this witness, Respondent desires to add to the
objection. He has shown no qualifications to testify as to the effect of any practices in which the Respondent may have been or be engaged. He has not shown himself familiar with either the prices charged by the Respondent to any of its dealers or the jobbers, the cost of doing business, and has not shown himself familiar with the fact as to whether or not the cost of gasoline in retail stations to jobbers, to retail sellers, so far as the practices of Standard Oil Company are concerned, may not be the same.

The question is further objected to for the reason that it is now quite apparent that the hypothetical question originally asked and of which this is a follow-up lacked necessary and essential factors and elements in order to qualify the witness to express an opinion.

Trial Examiner Ballinger: Read the question.

(The question was read.)

Trial Examiner Ballinger: I will hear from counsel for the Commission.

Mr. Austin: In the first place, I don't agree that this is a hypothetical question. It is based upon—

Trial Examiner Ballinger: It is based upon his experience. Now, what experience has he actually testified to that he has actually had?

395 Mr. Austin: In the first place, it is based upon—
as to the facts in the question, it is based upon proof of the fact which has been made, that the Standard Oil Company sells to these tank car buyers at a cent and a half to a cent and three-quarters per gallon less than it sells to its posted tank wagon buyers, price buyers. The witness has stated that he is familiar with that practice. He has also stated that he has made it his business to keep in touch with the competitive situation in the sale of gasoline at retail in Detroit.

I will ask the witness whether he is familiar with what is meant by tank car buying and bulk plants and retail stations who buy at posted tank wagon prices.

Are you familiar with those subjects?

The Witness: That is, what is a tank car buyer and what is a tank wagon buyer?

Mr. Austin: Yes.

The Witness: I am familiar with that difference.

Mr. Austin: And the method in which tank car buyers handle their gasoline through their own bulk plant?

The Witness: The latter part of that question?

Mr. Austin: I say, and the method in which tank car buyers operate through bulk plants and deliver to their stations. Are you familiar with that?

The Witness: Yes, sir.

396 Trial Examiner Ballinger: The objection is overruled.

Mr. Austin: I suggest you now read the question again.

The Reporter: (Reading) "Based upon your experience and observation of the competitive retail situation here, what has been the effect of such price cutting upon the business of other retail gasoline dealers who are paying the posted tank wagon prices of their respective major oil company?"

A. In my opinion, it forces the other dealers to sell at a lower retail price, either by direct price posting or by some means of discounting, in order to meet the competition established for them in their respective trade areas.

By Mr. Austin:

Q. And in meeting that competition, does it follow that the margin—that the operating margin of the retail service station buyers is necessarily lower than the margin of the tank car buyers?

Mr. Hanley: Just a minute, Mr. Harrison. That is objected to.

Mr. Austin: I will withdraw the question.

Mr. Hanley: It is entirely immaterial on any theory in this lawsuit.

397 Mr. Austin: I think it is material, but I will withdraw it.

By Mr. Austin:

Q. Just to carry your answer to the previous question a little farther, you stated that the result is that the stations that buy at tank wagon prices and by tank wagon deliveries are forced to cut their price to meet the competition of the tank car buyers—is that what you said?

A. Well, not exactly, because the retail—the retail operator is not in direct competition with the tank car buyer. He is in competition with the stations of that tank car buyer who buy retail and—

Q. Well, now, just a minute. Don't some of the tank car buyers sell at retail?

A. Some of them, I understand, do. I would say yes, that some do.

Q. Well, I was directing my question, and I think that everything that has been said here will show, that we have only been referring to tank car buyers who are retailers, such as Ned's Auto Supply Company.

A. In that case the tank car buyer has a wider margin of profit than the ordinary dealer who buys at the ordinary tank wagon price, and, obviously, if the tank wagon buyer has to reduce his retail price, his gross return is less
398 than the operator who has the benefit of a preferential price or tank car price.

Q. Suppose that the retail service station paying the posted tank wagon price doesn't cut his price to meet competition, as you have suggested he might. What is the result then?

A. If he is within the trade zone of a competitor making a lower retail price on comparable quality merchandise, the effect is generally that he loses volume of business. The trade of his trading neighborhood flows away from his station to another station where the price is lower, and the amount of that movement varies with different localities. The proximity of the competition has a bearing on it.

Mr. Hanley: We have the objection, I take it, to all this line of testimony.

Trial Examiner Ballinger: The objection runs to this entire line.

By Mr. Austin:

Q. In your opinion, Mr. Harrison, does an advantage of as much as one-half cent per gallon in the price paid by a retail seller for the ordinary house brand gasoline of a major oil company give that seller a substantial competitive advantage over competing sellers who pay as much as one-half cent higher price?

399 A. I would say if the retailer who has the lowest cost uses his lower price to reduce correspondingly his retail price to the public, it will effect—

Q. If he doesn't use it for that purpose, why, then—

A. It doesn't make any difference.

400 Q. What are the principal factors that will attract

automobile owners to a service station to purchase gasoline?

A. There are several elements that go in to make up what we call public acceptance; advertising, you might say, the personality of the operator of the individual station, the type of service given there, the appearance of the station, and a confidence in the quality of the material that the individual dealer may be selling. On the basis of comparable quality, price is a very effective factor.

Q. By "comparable quality" would you say that the house brand gasolines of all of the major oil companies are of substantially comparable or equivalent quality in the public mind?

A. Yes, I think so. I think there is very little difference in the public opinion as to the quality of the major companies.

Q. In your opinion, and from the observation of the gasoline business here, and in your region, during the past four or five years has a difference in price at which gasoline can be purchased in different retail stations in a locality been an increasingly greater or a lesser influence upon the retail purchaser?

A. I don't quite get that.

Q. To make it briefer: Price—you mentioned that as a very important consideration.

401 A. Yes.

Q. In determining where an automobile owner will purchase his gasoline. Has that become more or less so, in recent years?

A. It has become more so. In my opinion, the buying public, generally, not only in petroleum, but in all commodities, has become very price conscious in the general retardation of the economic situation; lower wages, reduced incomes. It has made everybody price conscious, and if the merchant satisfies the buyer and he can get it at a cheaper price, again, it is obvious where he will buy. He will buy for the lower price.

Q. Is the amount of gasoline consumed in Detroit fairly stable; aside from seasonal variations?

A. There is, generally, each year, an increase in consumption. There have been a few years of exceptions to that, but, usually, the consumption of gasoline does increase with the increase of the number of cars. Sometimes a spurt in industry will cause an increase in consumption, but, generally speaking, the consumption is pretty stable.

Q. Does the public demand for gasoline vary with minor price changes—and by "minor" I would say within the range of one cent a gallon either way, or two cents a gallon either way?

A. I don't think so. I don't think that the motoring public stops using the automobile for a difference in price.

Q. But, on the other hand, so that there will be no
misinterpretation of the use of the word "minor"
402 would you or would you not say that two cents a gal-
lon is a minor difference in price to the purchaser of
gasoline?

A. No, it is a tremendous influence. I would like to have that advantage myself.

Q. Are you familiar with so-called off-brand gasoline, or non-major brand gasoline? Will you explain the meaning of those terms?

A. Well, I have heard both of them. Off-brand is usually taken to mean a gasoline other than that sold under the brand name of a major company. They are sometimes called local brands, and they are sometimes called "gyps." I prefer to refer to them as non-major brands.

Q. [illegible] there any accepted definition of what companies are included in the term, major oil companies?

A. No, I think each company has to make up its mind individually what it considers the non-major competition. I might include in my mind a certain group, but the make-up of that group might be different with some other oil marketer. Some of them might include us as the off-brand marketer, in some cases.

Q. Well, the term "major-brand oil companies" is
used so frequently that we might just make a tentative list
here of the companies, at least, included in that, for refer-
ence, when that is used in the record, Judge Hanley. Let
me start out, and in deference to the witness, I will
403 make it Sun Oil Company, first; the Standard Oil
Company, the Socony Vacuum Oil Company; Texas,
Gulf, Shell, City Service, Pure Oil—is that one?

A. I would say so.

Q. Maybe you can carry on from there. Are there any others?

A. In this market here the Pure Oil is represented through the Hicock Refining Company, with a brand called Hi-Speed.

Q. Is that considered a major oil company in this area?

A. In this area.

Q. Can you think of any others that there would be no doubt of being major oil companies, that I haven't brought up? All I want is to see if you wouldn't agree, Judge Hanley—

Mr. Hanley: No, sir.

Mr. Austin: —that the ones named, are. I am not going to ask you if it is complete, or not.

Mr. Hanley: I won't agree on that proposition.

The Witness: I don't know if we missed anybody, or not. If you read the list over, we will try again.

The Reporter: "—Sun Oil Company first, the Standard Oil Company, the Socony Vacuum Oil Company, Texas, Gulf, Shell, City Service, Pure Oil."

The Witness: You forgot Sinclair.

Trial Examiner Ballinger: Off the record.

(There was a discussion off the record.)

404 Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Getting back to what you call the non-major brands—and we will understand that we are not necessarily referring to everybody that is not named here—is competition from those brands within a two cent differential per gallon; that is within a two cent lower price per gallon at retail than the prices charged by the Sun Oil stations, considered by you a serious competitive factor?

A. In this Detroit market—now these are the non-major operators that you refer to?

Q. Yes.

A. Under the existing conditions I would say they are not very hurtful.

Q. That is, provided they are not sold at more than two cents a gallon below your price?

A. Yes; not very hurtful.

Q. I suppose you might reach a point where they would be—

Mr. Austin: I will withdraw that.

By Mr. Austin:

Q. I suppose it would follow that there might be a different answer to other differentials, but I will leave that for the time being. I might ask you whether, without any limitation as to the amount of the differential, the retail stations selling off-brand gasolines in Detroit are—

405 Mr. Austin: I will withdraw that.

By Mr. Austin:

Q. Let me ask this question: Have you any records—do you know what percentage of gasoline sold in the Detroit area is off-brand or non-major brand gasoline? That, of course, would involve some classification of your own as to what is a non-major brand.

A. Well, in my studies of the problem, I differentiate between those selling the so-called house brand quality gasoline, and those selling the so-called third grade quality gasoline. I differentiate between those two in our individual studies. I think, combining all of it, however, the third grade with the non-major group gallonage, they will run between ten and thirteen percent of the total of the potential market of the metropolitan Detroit area; twelve to thirteen percent; around there.

Q. Does that include both?

A. That will include the third grade quality, the house brand quality of the non-majors.

Q. Did the Sun Oil Company, on August 27, 1939, reduce its tank wagon price to its dealers in Detroit?

A. It did not reduce its tank wagon price, but it made a special billing to its Detroit area dealers.

Q. What were the conditions which led to that reduction?

406 A. After a study of the competitive conditions through survey, it was established to our satisfaction that the general retail market forced our dealers to sell at a point which did not allow them a two cent gross profit. In our opinion, they couldn't survive on less than two cents, and on appeal from our dealers for relief, we agreed to support them on a two cent marginal basis; that is, two cents below their selling price, and that was granted to all dealers in this marketing area; all of our dealers were put on that basis.

Q. How long did that last?

A. Probably six weeks. I am not exact as to those dates.

Q. Wasn't it until November 18th?

A. Possibly. You probably may have evidence more than I have as to the dates of those changes. I can ascertain those dates, but I haven't got them in my mind.

Q. Did you hear the testimony of two of your salesmen, Mr. Warren and Mr. Chandler, on the stand this morning, in which they both referred to a survey which they were directed to make by the Sun Oil Company?

A. I heard Mr. Chandler, completely, and part of Mr. Warren's.

Q. Are you familiar with the survey to which they referred, made in August, 1940?

A. The survey was made by my direction.

Q. And was each of the salesmen directed to turn in
407 to the district office the records which he made, or the information which he obtained in the course of his duty, as to the prices and pricing policies of all of the service stations in his area?

A. The instructions were issued to the district manager of this Detroit area, and just exactly what instructions he issued to his men, I don't know, but the purpose was that full information should be brought in by every salesman of the competitive conditions which he found in his individual area. These were reported to Mr. Cunningham, the district manager, who compiled them and sent that report in to me.

Mr. Austin: I would like to have those sheets marked for identification.

Trial Examiner Ballinger: The reporter will mark the papers "Commission's Exhibits 53-A and 53-B, for identification.

(The papers referred to were marked "Commission's Exhibits 53-A and 53-B" for identification.)

By Mr. Austin:

Q. When that report was compiled, to which you have just referred, were the reports arranged so that the stations of each oil company were segregated in a separate list?

A. Yes, sir.

Q. I show you Commission's Exhibits 53-A and 53-B, for identification, and ask you if this is a copy of the

report which you have described, based on the survey
408 made by the salesmen, showing only stations at which
Standard Oil gasoline is sold?

A. This is the compilation of the report of the prices, a certain number, 58 Standard Oil Company stations, where our investigators reported discounting in some form below the generally accepted service station price, at that time.

Q. This, then, does not contain a list of stations which were not found to be engaging in any discount practices, is that right?

A. If there were no discounting observed or discovered, that station was not listed on that list there. Those are only those at which these practices were reported.

Q. And did the entire survey cover all of the Standard Oil stations in Detroit?

A. Yes, sir.

Mr. Austin: I offer this Commission's Exhibit 53-A and 53-B, for identification, in evidence.

Mr. Hanley: Same objection, Your Honor, as formerly, with the additional objection that that statement, as offered, is incomplete. It refers only to Standard Oil Company stations, and only a portion of them, and it excludes all other stations in Detroit which are in number, according to the witnesses of the Government, connected with the Sun Oil Company, between three and four thousand, and
this statement refers to only 58 stations.
409 Furthermore, there is no date on the Exhibit, and
it is impossible to tell therefrom on what day the
price was in effect as reflected at any given station.

Furthermore, it is not disclosed on the Exhibit as to whether the service stations listed were tank wagon customers of the Standard Oil Company, tank wagon customers of one of the four jobbers involved in this action, or directly operated stations of one of the four jobbers in this action. That, in any event, the Respondent is entitled to the complete survey and all that was prepared as a result of the survey, if any part of the thing is to be introduced, and if it is regarded that any part of it has any probative value, by the same token it would all have probative value.

We now demand, if the offer is persisted in, the balance of the survey.

Mr. Austin: Would it be your contention that the survey, other than Standard Oil stations, would be material, or are you asking only for the entire survey on Standard Oil stations?

Mr. Hanley: I want the whole survey; whatever it was. Your witnesses say there were three or four thousand stations in Detroit. You reflect, here, some information, without date, as to 58 stations, all of which are Standard Oil stations, but without reference to what kind of 410 Standard Oil stations they are.

Now, I say this, Mr. Austin, that if this kind of thing has any probative value on this case at all, then the result of the entire survey has the same probative value.

I wish to make myself clear about this. The Government should not be entitled to put in this piece-meal Exhibit and draw a conclusion therefrom in support of the opinion of this witness that this discounting practice which he has talked about affects competition when, as a matter of fact, there appears there is in existence a survey which may disclose hundreds of other stations other than Standard Oil Company stations which were indulging in this practice.

If you are just trying to prove a competitive situation, we haven't any objection to your doing that. We will do that ourselves, but we do object to putting this in.

Mr. Austin: In view of the objections by counsel for the Respondent, the offer is withdrawn. I think that's all I have on direct examination.

Cross-Examination by Mr. Hanley.

Q. Mr. Harrison, I think you said you had 480 Sun stations in what you refer to as the Detroit district, and then you describe that being quite an area outside the metropolitan area of Detroit. I would like to ask you how many Sun stations there are in the Detroit area proper: Detroit, 411 Hamtramck, Dearborn, and Highland Park.

A. What we consider as the Detroit metropolitan area for ourselves, includes, in this survey that we made, 466 dealers. The difference between that and the district number of 480, lie outside of the metropolitan area; such as Ann Arbor and small towns forty or fifty miles away from Detroit.

Q. Does that mean, or did you have at that time, about 466 stations in the area that I described; that is, Detroit, Highland Park, Dearborn, and Hamtramck?

A. Yes, sir; including Mount Clemens and Pontiac.

Q. Can you exclude those, please, and just confine it to those four towns?

A. It would be a guess, sir, but I would say possibly it would reduce it by twenty; say it would be 440 to 450, excluding Pontiac and Mount Clemens.

Q. Now, you were asked your opinion, Mr. Harrison, in relation to the practice of selling to jobbers on the tank car basis and on a tank wagon basis; that is, your opinion with reference to the competitive effect. You have said, in substance, that the effect was to cause price cutting. I assume it is true that you are basing that opinion on a general observation of the oil industry wherever you have been acquainted with it?

A. Yes, sir.

Q. I think you said that that price cutting result
412 would not follow unless the additional margin as between tank wagon and tank car price was used to depress the market by the customer who had the advantage of it.

A. That is true, I said that.

Q. And that is your opinion, is it not, Mr. Harrison?

A. That is my opinion. To elaborate: If the price to the public is the same in both cases, I don't think that the cost to one merchant, as compared to another, has anything to do with the flow of the volume of business.

Trial Examiner Ballinger: The opportunity, however, is always present, is it not?

The Witness: The opportunity is there, always. The man with the wider margin of growth in his business, is always in a stronger position to lower retail or public prices.

By Mr. Hanley:

Q. Is the jobber method of distribution one very commonly in use in Detroit, Mr. Harrison?

A. Yes, I would say, confining the opinion to Detroit, that it is generally used by most of the marketers.

Q. And isn't that true elsewhere in the United States?

A. Even worse than in Detroit, in some places.

Q. Do you regard the use of the jobber system of distribution any more reprehensible in Detroit than it would be anywhere else in the United States?

A. I think it is reprehensible anywhere.

413 Q. Your company does use that system of distribution elsewhere than in Detroit, do you not?

A. Yes, but not in like manner. May I explain my opinion?

Q. Yes; if there is a difference, I would like to know what it is.

A. We do not distribute through jobbers or distributors, or agents in territories where we operate our own distribution through our own plants. Where we have distributors or so-called jobbers, they have a franchise of a certain definite area for which they become, for all intents and purposes, the Sun Oil Company. We do not send our operators into those areas.

Q. Is that true throughout your operations?

A. Insofar as we do not duplicate this distribution in any areas.

Q. There are points in Michigan where you have jobbers?

A. Yes, we have distributors—we call them distributors—we have some, probably a dozen in the lower Peninsula.

Q. And it is true that in none of those places does the Sun Oil Company sell on a tank wagon basis?

A. In none of those distributor areas—we do not operate our tank wagons.

Q. Are there any localities where you sell through a distributor that that area would come into competition with any area where you directly operate or directly sell to the service station operators?

414 A. I didn't get the last part of that question.

Q. Do the areas in which you sell through distributors, and in which you sell directly to the service station operators, conflict competitively? Do they adjoin each other in any instances?

A. They border each other but do not overlap.

Q. So that jobbers on the one hand might be operating stations or supplying stations, and just across the line you might be supplying, directly, service stations operators?

A. That's right.

Q. You have explained your testimony that the contiguous location of service stations had much to do with the effect of differentials in prices to the public, of those stations?

A. Yes.

Q. Wouldn't the same situation identically arise in the setup you have just explained, as would arise in Detroit?

A. If the distributor were selling—if he were running his own station and selling at a lower retail price, we will say, on the north side of Oakland County and Genesee, and we had a dealer on the south side of that line in a close proximity, reasonable distance from him, and the distributor's dealer was selling at a lower price than our dealer, it certainly would affect our dealer's business.

Q. And that is true every place, isn't it?

415 A. Yes. I might add, however, that we have no evidence that that is happening anywhere. If it is, we would like to know it.

Q. But as the Court suggests, the potentiality always exists?

A. The potentiality is there.

Q. Now, Mr. Harrison, you have stated that in your judgment, a differential or a lower price at one service station, to the public, than at another, was a very important factor in the purchasing public's mind; is that true?

A. Yes.

Q. I think you said, also, that, in your judgment, as much as two cents off a price to the public would be a very large reduction. Do you recall making that statement?

A. Yes, sir, with respect to the so-called non-major brands and the third grade brands; not with respect to the house brand.

Q. You don't think that a difference in retail price of two cents, as between house brand gasolines, would have any compelling effect in the public mind?

A. Yes; some.

416 Q. But not important?

A. But not in the same relative proportion. If the difference in price is between two so-called major brands, ours and some other major brand, a 2 cent differential in such case would be very important and very potent in influencing the flow of business.

Q. Well, that is what I thought you had said.

A. Yes.

Q. That 2 cents as between relatively comparable brands of gasoline would be an important factor?

A. Yes, sir.

Q. And a highly important one?

A. Yes.

Q. Now, if that be true, I don't think I understand you when you say that it would make minor or little difference in the case of non-major gasolines. Is that your view?

A. Yes. It is not as potent in the case of non-major and third grade brands as it is between major brands.

Q. Isn't it true, Mr. Harrison, that what you term as non-major brands may be a locally branded gasoline that has a large public acceptance in a city like Detroit?

A. You mean there is a difference as to how I would classify these marketers as?

Q. Well, you have named what you think are the major marketers.

417 A. That is right.

Q. In Detroit. Let me ask you, first: in your judgment, how much gasoline is sold in Detroit in a year, approximately?

A. I think it will average approximately 32,000,000 gallons per month on the average. It will fluctuate with the seasons.

Q. How much of that gasoline would you say is sold by the major companies?

A. By the major companies? Approximately 87% is sold by major companies under their brands. There is some of the gasoline not sold under major brands that is major company gasoline.

Q. But you think 87% of the total gasoline sold in Detroit is sold under major brands, as you have defined "major"?

A. Yes.

Q. Now, what percentage of the gasoline in Detroit would you say is sold through jobbers?

A. I haven't got those figures in my head, but I have got some notes here, if you want me to take time.

Q. If you can from any quick source give us the answer, I would like to have it.

A. Sir?

Q. If you have any quick source from which you 418 can gain the answer, I would like to have.

A. Somebody will have to do a little arithmetic here. I haven't got this added up. Are you going to take down these quantities, sir?

Q. They will go in the record.

Perhaps it would help you and speed this somewhat if

I ask you this question: Are you able to say whether it is not true that approximately slightly in excess of 50% of all of the gasoline sold in Detroit is sold by jobbers?

A. I am not in position to say that.

Mr. Austin: What percentage did you say?

Mr. Hanley: Slightly in excess of 50%.

Mr. Austin: By jobbers?

Mr. Hanley: By jobbers.

The Witness: I can list these in volumes, if you want to work it out, as according to my estimate, and in my opinion.

A. The Goodrich stores served by Texas and Gulf Company, 300,000 gallons per month.

Wayne Oil Company, Standard. We surveyed 20 of those stations and estimated 131,000 gallons for the group.

The Citrin-Kolb—now, this is only on the house brand gasoline. I did not include—I am not including the Ethyl or the third grade. If you want those, I will have
419 to give you three figures, if you want all of it.

By Mr. Hanley:

Q. The house brands.

A. Just the house brands.

Citrin & Kolb, 45 stations, 381,700 gallons.

Stikeman Oil Company, 9 stations, 90,000 gallons.

Ned's Auto Supply, Standard Oil Company, 257,000 gallons.

Victor and Silverman, served by Fleet Wing, a brand of the Standard Oil Company of Ohio, Fleet Wing being a jobber operation, 8 stations, 81,700.

J. J. Bright, Sinclair, 51,500, through four stations.

Carnick, handling Gulf, 6 stations, 53,500.

Firestone stores, 4 stations, served by Texas, 32,000 gallons.

The Puritan Stations, known as Zip, Pure Oil operation, 797,000 gallons.

The Joy stations, Austin Oil Company, 1,000,000 gallons.

I don't know how much that all adds up to. Let's see if I have missed anything.

Q. Well, I won't ask you to add that.

A. Sir?

Q. I won't ask you to add that.

Please tell us, though, if you have now named all of
420 the jobbers doing business in Detroit according—

A. Have I named all of them? No. There is some I haven't got. I list those under a miscellaneous group, such as the Plymouth Oil Company. That is one type. I haven't got that particularized, but I have got a miscellaneous which will add to this total of non-major. Here is some more.

The Dixie, 89,200.

Sucher Brothers, 544,000.

The Argo Oil Company; I have only 8 stations of those; 68,000.

The Dura Oil Corporation, one station, at 30,000.

Another Victor and Silverman station, at 60,000.

The Oakland County Gas and Oil, 267,000 gallons.

Peerless Distributing Company, 3 stations, 42,000 gallons.

Victor Oil Company, 4 stations, 38,000 gallons.

Keystone Refining Company, 2 stations, 8,000 gallons.

Plymouth Oil Company. I haven't got gallonage on Plymouth Oil Company. We are getting down into some pretty small figures now.

Leonard Refining Company, at 15,000.

The Petroleum Service, at 6,500.

The Globe Oil Company, 274,000.

Pennzoil Company, 17,000.

421 The Rex Transportation and Posnik, 6,000.

Red Indian Oil Company, 4500.

Terminal Oil Company, 45,000.

And the Fried Oil, at Mt. Clemens, which isn't in the picture.

Then, besides that there is a miscellaneous group selling other than major brands of 435,000.

That is all I have on my survey of other than the major companies.

Q. Do you think now you have covered with some very trivial exceptions, all of the jobbers doing business in Detroit?

A. All that I know of, yes, sir.

Q. You are not prepared, without making a calculation, to say what percentage you think—

A. Well, I said awhile ago, sir, that I would estimate it at approximately 13% of the market as the non-major group, and included the Joy and Zip group of stations, a total of 13% of this market, leaving 87% of the gallonage sold by major companies. It might be direct or it might be through jobbers.

Q. That is what I want to clear up.

A. I am not prepared to separate the jobber gallonage from the total of the major company gallonage.

Q. Now, with that basis, is it not a fact that in 422 Detroit jobbers generally engage both in retail and wholesale operations?

A. Generally, I think possibly they do; yes.

Q. Aren't you sure of that?

A. I am not familiar enough with the details to say definitely just which ones do and which ones don't.

Q. I am not asking you that, just your opinion as to whether it is the general custom.

A. Generally, yes.

Q. And isn't that—

A. I think most of them have stations of their own, one or more; some of them only have one, some may have a chain of 10 or 15 or 20 stations.

Q. Is that not generally true all over the country?

A. I think so.

Q. You have outlined a number of factors that you regarded as being important in gaining customers at a service station, among them advertising, personality of the operators, appearance of the station, and so on. In your judgment, is it not true that those factors other than price and other than the brand of gasoline, assuming it is one of which you call major brands, are the most important factors in gaining and retaining customers?

A. Other than the price?

423 Q. Yes, sir.

A. No, sir; I don't think so. I think the price is the potent factor.

Q. Always?

A. Yes, sir.

Q. Do you think that is true in every locality; I mean in Detroit. When you say that, you mean in all communities in Detroit that that is true?

A. No. I can pick out some isolated spots such as Grosse Point, maybe Palmer Woods, or some locality there where the residents of those areas are not price conscious because they are not in that earning group. They are above the necessity point in income, and, consequently, are not affected so much by price, but in the vast majority of the areas of Detroit, which is a wage-earning class, very definitely they are price conscious and price is the predominant factor that brings their trade in or keeps it away.

Q. In giving your opinion as to the effect of the practice of distributing through jobbers coincidentally with selling tank wagon, I want to know definitely whether your opinion was based on any knowledge you claim to have of the specific operations of the Standard Oil Company in that respect?

A. I haven't any particular knowledge of the opera-
424 tions of the Standard Oil Company any more than what is generally known through the gossip of the trade, you might say.

Q. Do you have any knowledge of the costs of the four jobbers involved in this action in the operation of their own business, their own distributing business?

A. I have no knowledge of their costs whatever.

Q. Do you have any knowledge of the prices that they charge the service station dealers whom they serve?

A. No, I have no knowledge of what, to use the vernacular—what their tank wagon price is as to their dealers. I don't know that.

Q. Have you any knowledge as to whether or not the cost of these jobbers of the gasoline that they may buy on a tank car basis is not as great in their service station tanks as it is to a retail dealer who buys on a tank wagon basis?

Mr. Austin: Will you repeat that question, please?

(The question was read.)

Mr. Austin: You are referring there to retail stations operated by these jobbers?

Mr. Hanley: Yes.

Mr. Austin: Not to anything that they sell to dealers? You are talking about their retail tanks, if I understand you correctly.

Mr. Hanley: Yes.

425 The Witness: I have no knowledge of that. In such case we can only deduce—

By Mr. Hanley:

Q. I am not asking you to speculate about it. I am not asking you for opinions now, Mr. Harrison, I am asking you what you know.

A. I don't know anything—

Q. About the operation.

A. —about what prices any of these jobbers charge their own dealer stations. I don't know that, and perhaps no one knows it other than the jobber who is making the delivery."

Q. My question refers specifically to the stations operated by these jobbers; that is, a direct retail operation. You haven't answered that question.

Do you know anything about the cost of the gasoline to that jobber in his retail station tanks as compared with the cost of gasoline in the retail tanks of a tank wagon reseller?

Mr. Austin: May I interrupt, with your permission, Judge Hanley?

Mr. Hanley: Yes.

Mr. Austin: Are you willing to qualify that question, that is, the question being asked, upon the assumption that the so-called jobber was paying a cent and a half less for his gasoline than the retailer is paying?

426 Mr. Hanley: All right. I thought I covered that when I said tank wagon to tank car basis.

The Witness: The question is just a little confusing, sir, at the moment. I think I know, but I am not certain.

By Mr. Hanley:

Q. I will try and clarify it. In answering this question, bear in mind I am not asking you for an opinion; I am asking you for what you know about facts.

A. Facts, yes, sir.

Q. You have stated that you don't know what the cost is of these jobbers, what that may be in any of their operations.

A. No.

Q. It follows, does it not, that you don't know but that their gasoline actually costs them more by the time they have got it in a service station operated by them than it costs the ordinary tank wagon buyer?

A. Well, that question is perfectly clear, and I don't know.

Q. That is what I thought. When you give your opinion as to what you think the effect of this practice of selling through jobbers has upon competition, you are basing that opinion upon just the potential possibility that the additional margin might be used to depress the retail price?

427 A. No. My opinion is not based on that.

Q. Well, is it based on the operations of the Standard Oil Company?

A. No, it is not based on that. My opinion, if you want me to explain it again, is based on purchases that we have had made to determine what is their selling price. And if we find a price that is 2 cents below the posted market, and we are, to our best knowledge and belief—we know the marketer is buying at a cent and a half a gallon below the tank wagon price, we can't very well account for a two cent discount at the retail, which would have that operator selling at a half a cent a gallon below his cost.

Q. I don't understand you, but I will try.

A. I guess we don't understand each other.

Q. If such a retailer of gasoline had only a cent and a half better price and he sold at retail at 2 cents below the general prevailing market, it follows, does it not, that he would have to take the other half cent out of what otherwise would be his profit margin?

A. Yes, sir. That is what I tried to say a moment ago.

Q. Maybe you did and I just didn't understand you, Mr. Harrison.

You don't mean to say, I take it, Mr. Harrison, that in
all instances where you have found the retail marketers
428 were cutting prices, that you reasoned that they must
be buying on a tank car basis?

A. No, I didn't have to guess at that. Those who are buying on a tank car basis are generally known.

Q. Isn't it true that competition in Detroit is such, as it is elsewhere, that some marketers are willing to take a lesser margin than others in order to increase their gallonage?

A. Yes, sir, that is right.

Q. Don't you know that in your own operations you frequently meet with cut prices by dealers who have not, to your knowledge, any price advantage at all?

A. Yes. They are working on what we call a lower margin, less than the generally accepted idea of the prevailing margin; yes.

Q. That is just one method of getting business, isn't it, Mr. Harrison?

A. That is one method to get business.

Q. And it is a perfectly legitimate one in your view, I take it?

A. Perfectly legitimate.

Q. Indeed, your own company, the Sun Company, has been very aggressive in the Detroit area in keeping down the tank wagon price to dealers, has it not?

A. No, I don't think we have been very aggressive
429 in keeping the tank wagon prices down.

Q. I mean by that, Mr. Harrison, that you make a bid to get customers, and you keep your price down to a point where it aids you to get them?

A. We, to the best of our ability in our contacts with our dealers, endeavor to school them to the thought that they must remain competitive if they are going to hold their business, if they are going to get any advantage of general increase in consumption of business. We school them just diametrically opposite to creating a lower price competition. All of our efforts are bent on those two principles, not to create a low price competition, but when they are faced with it, to meet that competition.

Q. And you follow that policy very vigorously, do you not?

A. To the best of our ability, we use the most persuasive way that we can with our dealers.

Q. And it is true of your company, is it not, that when a competitive situation arises that you, as a company and in your advice to dealers, are very prompt to meet that competitive situation?

A. Yes, sir.

Q. Now, 1938 was a bad year in the oil business generally, wasn't it, Mr. Harrison?

A. Yes, it was.

430 Q. Your company's business in the Detroit area increased in that year, however, didn't it?

A. Not in '38.

Q. Not at all?

A. It fell off as against '37.

Q. Well, did it fall off comparably with the business of other companies?

A. I don't know. I think we dropped back about 4%.

Q. You do not answer the question. Do you think you more than held your own as compared with other companies?

A. I think we did, yes. I don't think we suffered as badly as some others suffered in this market.

Q. In 1939 you increased your business in this area, didn't you?

A. Yes.

Q. And in 1940?

A. Yes.

Q. So whatever the results of this competitive situation in Detroit has been, it has not hurt your business, has it?

A. No, no, we can't say that it has.

Q. You have always followed the policy of always meeting competition?

A. Yes, sir.

Q. Isn't it true, Mr. Harrison, that oftentimes the
Sun dealers have reduced their prices to meet com-
431 petitive situations before a large number of other
dealers have not reduced their prices?

A. They probably have. In most cases they have been the first to meet it.

Q. When that occurs, Mr. Harrison, and some dealer then cuts to meet the general cut in price, is there any way that you know of to determine how that slide began, what initiated the situation?

A. I don't quite get that.

Q. Well, I will withdraw the question.

A. I don't quite get the point, sir. I am quite willing to answer it, if I understand what the question is.

Q. I will withdraw the question and reframe it. When there is a competitive situation that is keen, are you able to attribute that to any given factor in Detroit?

A. I attribute it, the beginning of it, in nearly all cases, to the fact that some marketer has got a preferential cost; that is, a preferential buying price, and he is anxious to expand, and he has the power to do so through having the wider margin of profit, gross profit to work with, and he wants to get more gallonage; so he does something to reduce his price to the public and that is always the start of these price-cutting orgies that we get into periodically.

432 Q. Mr. Harrison, wouldn't it amount to the same
thing as a preferential price if a retail service station operator was an efficient operator and kept his cost down and did a large volume on a low margin?

A. Would it be equivalent to a preferential price?

Q. Yes.

A. No, it would not.

Q. Why not?

A. Because there is not comparable efficiency in the operation of the two plans. One man can do it because his costs are lower; that is, his purchase costs of the merchandise is lower. The other man, through skill and efficiency on his own part finds out how to run a business at a lower operating cost to himself, although he pays more for his goods, so that his net might balance against the preferential cost of the other fellow.

Q. That is what I am asking you.

A. It could be done through the efficiency of operation by large volume.

Q. Yes.

A. It could be done just that way.

Q. Don't you think it is done?

A. Sir?

Q. Don't you think it is done that way in a number of instances?

433 A. In some isolated cases.

Trial Examiner Ballinger: Could it be done where there was a preferential rate of 2 cents per gallon on gas?

The Witness: No, sir. That is asking too much, because the most that a dealer can expect over the past considerable time is the gross margin of 3½ cents on gasoline, and if he is going on a 2 cent differential against him, it would cut him down to a cent and a half, and that is not possible. The dealer will certainly go broke.

Trial Examiner Ballinger: Ordinarily could efficiency equal the 2% differential?

The Witness: The 2 cent differential?

Trial Examiner Ballinger: Yes.

The Witness: No, sir. Efficiency can't equal the 2 cent differential in price, in my opinion.

By Mr. Hanley:

Q. Do you think in your judgment, based on your experience, Mr. Harrison, that the elimination of any one of the suppliers that you have named who do business through a jobber would eliminate the competitive difficulties in Detroit?

A. I am afraid that it would not.

Q. To make that just brutally clear, Mr. Harrison:

434 if the Standard Oil Company were prevented from selling gasoline to the four jobbers involved in this action and everybody else kept on doing business as they have been doing it, as you know they are doing it in

Detroit, would it make any difference in the competitive situation in Detroit, in your judgment?

A. If any other major company, we will say comparable in public acceptance and ability of the Standard Oil Company were to take on the business of these people, it would not in any way cure or help to cure this competitive situation.

Q. Do you have the slightest doubt in your mind, Mr. Harrison, that if that business were lost to the Standard Oil Company that some other supplier, and a major supplier, would not immediately take it on?

A. There is a possibility that they would, because there is a lot of us that are still very foolish.

Q. Well, foolish or otherwise, what is your judgment as to the fact?

A. I think if they were not under the same restraint as the Standard Oil Company that they would take it on.

Mr. Hanley: I think that is all.

Mr. Austin: Now, just one or two questions, Mr. Harrison.

Redirect Examination by Mr. Austin.

435 Q. Right on that point, now, let me ask you a question in a little different form: if all of the major oil companies were prevented from selling to retail operators at tank car prices in the Detroit area, would that improve the competitive situation in Detroit?

A. I think it would.

Q. Does the Sun Oil Company maintain a constant system of cost accounting to determine its cost of delivering gasoline?

A. Yes, sir.

Q. I believe your gasoline reaches here by pipe line from Toledo; is that correct?

A. That is right.

Q. Where does it go to then? To a bulk plant?

A. It goes to our terminal at Hamtramck.

Q. How is the gasoline delivered from that terminal to the service station?

A. By truck, tank trucks.

Q. Can you state how much it costs the Sun Oil Company per gallon to deliver gasoline from the bulk plant at Hamtramck to the Sun Oil Company stations, including the cost of operating the bulk plants?

Mr. Hanley: Just a moment. That is objected to as wholly immaterial. It seeks to elicit a cost of a company who is not concerned in this action, and it seeks to
436 elicit a cost which is based upon an operation which is not involved in this action, trying to get a pipe line cost, and we have got to hire a railroad.

Mr. Austin: I am not asking about pipe line costs. I am asking the cost from the bulk plant to the service station, including operation of the bulk plant. In the first place, Standard Oil Company operates bulk plants and delivers in exactly the same method by tank wagon to its service stations. However, that is your case, and if I ask this question as far as it relates to that, I am not assuming any burden of proof, but I am merely asking it because Mr. Harrison is here, without any intention to continue with it. But, secondly, and primarily, I offer it for this reason, that in the questioning Judge Hanley raised the question as to whether Mr. Harrison was familiar with the cost of delivery of these jobbers. That is something else. These jobbers operate bulk plants. It has been proved that they deliver by tank wagons to their service stations.

I am offering this in view of the fact that you have asked questions regarding the possibility, at least, that jobbers may use up that cent and a half in delivering from their bulk plants to their service stations.

Trial Examiner Ballinger: The objection is overruled.

437 Mr. Austin: Read the question, please.

The Reporter: (Reading) "Can you state how much it costs the Sun Oil Company per gallon to deliver gasoline from the bulk plant at Hamtramck to the Sun Oil Company stations, including the cost of operating the bulk plants?"

A. That is pretty hard for me to pull right out of my head with no recent reference, but I will endeavor to do the best I can.

By Mr. Austin:

Q. Well, ~~if you~~ can, say definitely that it is less than a certain amount, or something like that.

A. I think I am safe in saying definitely that it is less than half a cent a gallon, including all costs of operating the bulk plant, that is, including the ordinary evaporation and spillage losses, the labor, operation of the warehouse, personnel, cost of the truck operations, the accounting going along with the operation, and a cost element for the amount of invested capital in the plant, which constitutes practically all of the overhead connected with delivering the gasoline to the dealer—will be less than half a cent a gallon.

Q. That is based on your personal knowledge derived from the records kept at your office?

A. Records kept in my office. The exact figures 438 are available, if necessary.

Mr. Austin: Thank you. That is all I have.

Recross Examination by Mr. Hanley.

Q. Does that include the maintenance of your bulk plants and the element for investment in the bulk plant?

A. Yes.

Q. All depreciation and repair costs?

A. And they charge us 6% on the invested money. It is all in there.

Q. And you say that you can finance that operation for less than half a cent a gallon?

A. Yes.

Q. And you deliver all over Detroit?

A. Up to a range of as far away as Saline, which I think is about 50 miles, down to Flat Rock on the south, Mt. Clemens on the northeast, and slightly north of Pontiac on the north, an average haul pretty close to 40 miles.

Q. How many trucks do you operate?

A. For gasoline, I think we operate about 12, 12 or 13 trucks.

Q. You serve all of your stations out of the one bulk plant?

A. Yes, sir.

Q. And the bulk plant is served by a pipe line?

A. Yes, sir.

439 Mr. Hanley: That is all.

Mr. Austin: That is all. Thank you, Mr. Harrison.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Trial Examiner Ballinger: What is your suggestion with reference to a recess?

Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: The suggestion of counsel for the Commission is approved~~, Now, at 2~~ o'clock P. M., the hearing will stand at recess until 2:45.

(Thereupon at 2 o'clock P. M., an adjournment was taken until 2:45 P. M.)

440 Afternoon Session.

Trial Examiner Ballinger: The hearing is now reconvened at 2:45 P.M.

Mr. Hanley: Just before the noon recess, when Mr. Harrison was on the stand, the subject of the Sun Oil Company's bulk station operation costs were under discussion, and I would like to reserve at this time the right to recall Mr. Harrison for further cross-examination on that subject, if it is going to be regarded as material.

My reason for not proceeding now is two-fold. The witness wanted to get away, and he didn't have his records and figures, and, quite frankly, I am not fully prepared to go into the figures myself at this time, but I would like to reserve the right to recall Mr. Harrison for further cross-examination.

Mr. Austin: I have no objection to such a reservation. If there is to be cross-examination, however, I assume, naturally, it will be limited to the field I covered.

Mr. Hanley: Oh, yes. I am willing to be bound by that limitation. That's all I wanted to recall him for, is the question of costs, and I am only interested in doing that in the event you press your insistence it is material, and you expect to use it.

Mr. Austin: I think by the time you get through with your defense, it will be of increasing materiality. I think it is material now.

Trial Examiner Ballinger: The witness may be re-
441 called for further cross-examination.

Off the record.

(There was a discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: I will call Mr. Pearson.

ROLAND PEARSON was thereupon called as a witness for the Commission and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. What is your full name?

A. Roland Pearson.

Q. What is your address?

A. 690 Kimberly Road, Birmingham.

Q. That's Birmingham, Michigan?

A. That's right.

Q. What is your business?

A. Sales department, Sun Oil Company, motor products, which includes motor oil, gasoline, and grease.

Q. Where is your territory located; in Detroit?

A. Yes, sir.

Q. You work out of the Detroit district office?

A. Yes, sir.

Q. Is Mr. Cunningham the district manager?

442 A. Yes, sir.

Q. And will you state, in a general way, your territory?

A. Well, with Warren Avenue on the south and north, following Fourteenth to McNichols Road, and east to Woodward, north on Woodward to Ten Mile, east on Ten Mile to Livernois, and south on Livernois to Warren Avenue, and back to Fourteenth.

Trial Examiner Ballinger: Relatively, what portion of the city?

The Witness: You might call that the northwest; it would be in the northwest section. It covers a very narrow strip of that section.

By Mr. Austin:

Q. Do you know whether there is a gasoline station in your sales territory which is operated by Ned's Auto Supply Company?

A. Yes, sir.

Q. Where is that station located?

A. At the corner of Chicago Boulevard and Grand River.

Q. How long have you been working for the Sun Oil Company in this territory?

A. In the City of Detroit?

Q. No, in the territory where you are now?

A. Seven years.

Q. Has this station, Ned's Auto Supply Company, been there all of that time?

443 A. No, I don't think it has been there seven years, I think it is about five years. This is just an estimate. I am not positive when the place was erected.

Q. Constructed about 1936?

A. I think that is about right—no, it isn't that long. To tell you the truth, I don't know. It has been within the last five years. I know that.

Q. I think the record shows it was constructed in 1936. I was just trying to refresh your recollection on that.

Have you ever made any purchases of Gasoline at Ned's Grand River store during 1940?

A. Yes, sir.

Q. I suppose you drive a car?

A. Yes, sir.

Q. Is that a so-called private car?

A. Yes, sir.

Q. Does it have anything on it to indicate that you work for the Sun Oil Company?

A. Nothing on the automobile.

Q. It probably has one of its service emblems?

A. No, I haven't got one on.

Q. Is that the car that you drove to Ned's Auto Supply station when you purchased gasoline there?

A. Yes, sir.

444 Q. Now, how many times during 1940 have you purchased gasoline at Ned's?

A. Between five and six times.

Trial Examiner Ballinger: Over what period of time? When did you first purchase it?

The Witness: Sixty days; during July and August, during the summer of 1940.

By Mr. Austin:

Q. Did you pay the same price for gasoline each time you purchased there, during that period?

A. Yes.

Q. Will you state what that price was?

A. As I recall it, I went in and asked for a dollar's worth of gasoline, which amounted to about 16.3 gallons;

offhand. I can't just remember, but I do remember that the price was 16.3 or 16.2 cents at the time.

Q. Did the service station give you at that time, or at any of those times that your purchased during that period, anything of value, or which they stated was of value?

A. On a few occasions I was presented with a newspaper when I drove in, and when the attendant came up and asked me what I wanted, I told him, and I also got a coupon, which was the equivalent of two cents a gallon, but I paid the full price when I purchased the gasoline, and he told me this ticket could be redeemed at a later time.

Q. Is that what they told you about it?

445 A. Yes, sir; plus the instructions on the envelope. It stated the same story.

Q. What envelope is that?

A. I don't have the envelope or any of the receipts. They have been turned in to the company and have been lost since, or destroyed. Similar to the ones you showed this morning.

Q. You referred to an envelope?

A. Yes, sir.

Q. Did you receive that envelope the first time you were there, or did you get one afterward, each time you went?

A. No, the first time I went.

Q. When was that? Do you mean the first time during this period that you have talked about?

A. That's right.

Q. Your had been purchasing there previously?

A. No, I never bought at Ned's Auto Supply.

Q. Is the envelope you refer to, similar to either Commission's Exhibits 27 or 50 (handing documents to witness)?

A. This is the one I have reference to.

Q. That is Commission's Exhibit 27?

A. Yes.

Q. What, if any, conversations did you have on any of those visits with the service station attendants, regarding the value of those receipts?

446 A. Well, the attendant explained that the receipt was equivalent to two cents a gallon, which could be redeemed at a later date, and the instructions were on the envelope. They were presented at the same time.

Q. Did he say whether or not those receipts had any value in making future purchases of gasoline?

A. I can't state that. I don't know.

Q. You don't know whether they were?

A. I can't say that the attendant said that, no, at that particular time.

Q. He didn't say that they were not good for gasoline?

A. That is right.

Q. Did I understand you to say that you asked for the discount?

A. I did. I went there for the purpose to get the discount, and I asked for it, and received it, and that was the manner in which I received it.

Q. Did they ask you what your business was, before giving you those receipts?

A. No, sir, no question was asked.

Q. Were you acquainted with anybody at that station before you went there?

A. No, sir.

Q. Were you asked whether you drove your car for business use?

A. No, sir.

447 Mr. Austin: I think that is all.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Cross-Examination by Mr. Hanley.

Q. Have you had the same territory for seven years, Mr. Pearson, approximately?

A. Approximately, yes, sir.

Q. Can you tell us by any fraction, that is, a half, a fifth, or a tenth, how much area in Detroit your territory covers?

A. Now covers?

Q. Covered in 1940, August, 1940.

A. Well, I would say that area would cover about one twentieth of the City of Detroit.

Q. How many service stations were in that area at that time?

A. Approximately 300 to 325.

Q. As I understand you, your purchased gasoline at Ned's station some five or six times during July and August of that year?

A. Yes, sir.

Q. Did you buy gasoline at any other of these stations on the same day that you bought gasoline at Ned's?

A. At any other service station?

448 Q. Yes, sir, your own—that is, I mean by that, Sun dealer's station or any other station.

A. I cannot answer that.

Q. Do you know what the actual sale price of gasoline was at any of the other 300 or 325 stations in your territory on the days which you bought gasoline from Ned's?

A. The only way I can answer that is the going price or the established price at the particular time.

Q. You are referring now to the posted price, Mr. Pearson?

A. Yes, sir.

Q. I am asking you not about the posted price, but the actual price at which gasoline had been sold. The question is: Do you know what the actual price of gasoline may have been on any of the other stations in your particular territory on the day you bought from Ned's station?

A. The only way anybody could answer that, as I see it, is the posted price. That is all I know of, that particular day.

Q. I understand there was a posted price, Mr. Pearson. I am asking you if you know what the actual price was any place else. If you don't know, say so; if you do, tell us what it was.

A. Well, I don't know.

Q. All right. Now, please tell the Court just what you said and what the attendant said when you went in to Ned's Service Station on these occasions.

449 A. Well, first of all, I went in there for the sole purpose to get the receipts or to buy the gasoline at a discount, and as I recall it, the first time I went in, I had to ask for it.

Trial Examiner Ballinger: Ask for what?

The Witness: For the two cents a gallon discount.

A. (Continuing.) I drove in and I said, "I want to get a discount." And as I recall it, he said, "We will take care of you." And I said, "Well, put a dollars worth in." So I gave the man a dollar, and, as I picture it now, he goes back to the cash register, which was on the outside of the station, and came back with the envelope and the little slip. The instructions were on the envelope.

Q. And you kept going back from time to time, five or six times to—

A. To see if this practice was still continuing.

Q. And it was?

A. Yes, sir.

Q. You got the discount?

A. The discount receipt.

Q. Yes.

A. Plus a newspaper on two or three of the occasions if I wanted it.

Q. Have you told us all the conversation that took place between you and the attendants with reference to this

450 discount any of the times that you went in there?

A. Yes, I would say that that is the whole of it.

Q. Now, as a matter of fact, you do drive your car for business purposes, don't you, Mr. Pearson?

A. Yes, sir.

Q. You use it in your work as a salesman?

A. Yes, sir.

Q. You were using it at that time?

A. Yes, sir.

Q. As you say, you don't know the attendants who served you?

A. No, I wouldn't know him from—I don't know who he was, not the slightest idea.

Q. I presume you don't know whether he knows you or not?

A. I don't know. I don't presume he does. I doubt it. I don't remember if it was the same attendant twice that waited on me.

Q. Mr. Pearson, is not the Chicago and Grand River location of Ned's store, their main office building?

A. I was under the impression that was their main office.

Q. Have you ever, as salesman for the Sun Company, solicited Ned's to purchase Sun products?

A. I never have, no, sir.

Q. Is it within your knowledge that the Sun Oil Company did solicit Ned's within the period of your employment?

451 A. I cannot answer that question. I do not know.

Q. You know nothing of it?

A. I know I never did, and I don't know anybody else that ever did.

Mr. Hanley: That is all. Oh, just a moment.

By Mr. Hanley:

Q. You are acquainted with Mr. Cunningham of the Sun Oil Company?

A. Mr. Cunningham is our district manager.

Q. Is he still so?

A. Yes, sir.

Mr. Austin: That is all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Mr. Austin: If Your Honor please, you will note I am not repeating here on any single station. Each one of these men is testifying as to a different Ned's station, and that is the reason that I am calling several of them, to testify, apparently, to the same thing.

Trial Examiner Ballinger: Call your witness.

Mr. Austin: Each one of these conversations was had in a different part of the city, and I want to point that out.

Mr. Day.

452 JOHN A. DAY was thereupon called as a witness for the Commission and having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. State your name and address, to the reporter.

A. John A. Day, 1409 Clairmount.

Q. Are you a salesman for the Sun Oil Company?

A. Yes, I am.

Q. How long have you had that position?

A. One year.

Q. What was your business before that?

A. I was working in a training station for the Sun Oil Company.

Q. Is that the way they develop and train their salesmen?

A. That is one of the ways, yes.

Q. What is your territory in Detroit?

A. I have the general territory lying on the west side of Woodward, extending from the River to the Six Mile Road, and approximately over to Fourteenth Street from the River to Six Mile Road.

Q. Do you travel throughout that territory?
A. Yes.
Q. Are you familiar with the various gasoline service stations located in that territory?
453 A. Yes.
Q. Are there any gasoline stations in that territory operated by Ned's Auto Supply Company?
A. Yes, there is one at Woodward and Calvert.
Q. Did you, during 1940, purchase any gasoline at that station?
A. Yes, I did.
Q. Was the gasoline purchased for your own automobile?
A. That is right, yes.
Q. What kind of an automobile is that?
A. 1940 Chevrolet coupe.
Q. Has it any markings on it to indicate the purpose for which it is used?
A. Only the emblem which goes on the license plate on the rear of the car.
Q. Otherwise, it is the usual private car?
A. At that time it was, yes.
Q. What time during 1940 did you purchase gasoline at Ned's?
A. I made several purchases during the summer, and I made one in the middle of August, when we were asked to make this survey of our territory.
Mr. Austin: I move to strike the latter part of that answer, Your Honor. I only asked him as to the time, and I don't want to open up this survey question on cross-examination again, if I don't have to.
454 Mr. Hanley: That may be stricken.
Trial Examiner Ballinger: The motion is granted. Now point out the portion.
Read it back.
(The record was read.)
Trial Examiner Ballinger: Commencing with the word "when"?
Mr. Austin: Yes.
Trial Examiner Ballinger: Strike the balance of the answer.

By Mr. Austin:

Q. Will you state what you did on the occasions you went there, the price that was paid, and how the transaction was handled, and any conversations that you may have had with the operator.

A. I purchased in the middle of August. I drove in and asked for a dollars worth of gas. He put the gas in. When he came back to the window, I held up an envelope which had previously been given me. He took the envelope and put the cash coupon receipt, which amounted to twelve cents, into the envelope, and told me to keep it until I had a dollars worth of redeemable coupons.

Q. Is that coupon that you have just referred to as a cash coupon receipt—I believe you called it—was that similar to this receipt which I show you, and which is
455 marked Commission's Exhibit 52-C?

A. Yes, that is right.

Q. Did it have any stamp on the back of it?

A. Yes, it did, such as that.

Q. Well, what does that stamp say?

A. "Sold for commercial use."

Q. That was stamped on the receipt you had?

A. That is right.

Q. Was there any trading stamp on the back?

A. No trading stamp on the back of the one I received.

Trial Examiner Ballinger: Who had previously given you the envelope?

The Witness: An attendant at the same station earlier in the summer.

456 Q. Now, let us go back to the time when you got the envelope. Tell us what happened then.

A. I drove in the station. The attendant came out to wait on me. I asked for a dollar's worth of gas and he put the gas in. I asked him for the discount. I told him I was in the territory there and wanted to get the 2 cent discount.

He said, "What business are you in?"

I said, "At present I do some real estate in this part of town, real estate business."

He said, "Do you drive your car for business?"

I said, "I drive it for business and pleasure;" so he went and gave me the coupon and the envelope.

Q. And thereafter did you just show the envelope and the coupon on the gas was given without question?

A. That is correct.

Q. Did you ever cash in any of those coupons?

A. No, I haven't.

Q. What did you do with them?

A. I turned them in to the company.

Q. Sun Oil Company?

A. That is correct.

Q. What was the posted price at that station at that time?

A. 16.2.

Q. Was that the prevailing posted price in your territory at major oil company service stations at that
457 time?

A. That and 16.3

Q. Which was more prevalent?

A. 16.3.

Q. During the summer of 1940 did you purchase gasoline at any other service stations in your territory other than Ned's?

A. Yes.

Q. What stations?

A. Well, the Sun stations, wherever I needed gas.

Q. And how much did you pay per gallon at those Sun stations?

A. 16.3, the full retail price.

Q. Were you given anything of value or which was alleged to have value at the time you got the gasoline?

A. Nothing.

Mr. Austin: Your witness.

Cross-Examination by Mr. Hanley.

Q. What fractional part of Detroit does your territory cover?

A. About one-tenth the area of Detroit.

Q. And about how many stations, all kinds of filling stations, are there in your territory?

A. I would estimate about 360.

458 Q. Did you buy gasoline at any of them on the days that you bought gasoline at Ned's station, as you have testified to?

A. I doubt it very much, because of the fact that a dollar's worth of gas—and you generally have some gas in the tank. I believe not.

Q. I presume it is true that you don't know what the actual price was at any other station on the day you purchased at Ned's?

A. Only the posted price.

Q. When you went to Ned's service station, isn't it true, Mr. Day, that you made such representations and statements to the attendant who was serving you as you thought would qualify you for what is commonly called a commercial discount?

A. Well, I did not commit myself to the fact that I was commercial entirely. I said I used my car for commercial and private use, both.

Q. That was true, wasn't it?

A. Yes.

Q. You do use your car for both purposes?

A. Yes, for both.

Q. And did, at that time?

A. Yes.

Q. And you were asked how you used your car, as 459 I understand it?

A. I was asked if I used it for business, and I said I use it for business and pleasure, both.

Q. And did you understand at that time that there was a custom in Detroit of giving commercial discounts to users of automobiles who used their cars in whole or in part in their business?

A. I knew that it was a general fact that some stations did, yes.

Mr. Hanley: That is all.

Redirect Examination by Mr. Austin.

Q. You referred to purchasing some gasoline in the summer of 1940 at perhaps not the same day but near the time at which you purchased this gasoline from Ned's?

A. Well, yes. Naturally I buy gas two or three times a week.

Q. Do the operators and the attendants at those Sun Oil stations know you?

A. Yes.

Q. In your territory?

A. Yes.

Q. And they knew you when you purchased gasoline?

A. Yes.

Q. But they didn't give you any discount?

460 A. That's right.

Mr. Austin: That's all.

Recross Examination by Mr. Hanley.

Q. It is the company policy, isn't it, Mr. Day?

A. Not that I know of. It was never told me it was the company policy.

Q. Isn't it customary—don't you have knowledge of the fact it is customary that employees of the Sun Oil Company pay the Sun dealers the full price the dealers post?

A. It has never been explained to me as company policy; no.

Q. You have always done it, haven't you?

A. I have done it, yes.

Q. As far as you know, everybody else has done it; employed at the Sun Company?

A. I don't know about the rest.

Mr. Hanley: That's all.

Mr. Austin: I assume it is company policy. My point was that there was no policy, also, to give commercial discounts at Sun stations, or, if so, he wasn't a commercial customer; one or the other.

I would like to make this statement on the record, if your Honor please. In view of these questions relating to commercial discount, I don't want to be understood
461 as conceding in any way that a commercial discount
is any more justifiable or any less harmful to a competitor than any other kind, the only point being that if price cutting by a particular station were limited to certain accounts it would be less harmful than if extended to a greater number of customers, but it is purely the number of people that get the discount and not whether they are commercial buyers or not. That is merely a statement of my position for the benefit of counsel—of counsel for the Respondent and the Examiner.

Trial Examiner Ballinger: The only inducement that would be present for giving a lower rate to the commercial creditor would be that probably he would use a great deal more gas than he would in driving his car for his own personal use?

Mr. Austin: Surely. He is a more desirable account and is able to bring a little more pressure because he uses more gas, and, I suppose—if it isn't rambling on too far—that the same consideration applies to the very large commercial users such as big factories, automobile companies, and so forth, and that is one of the reasons or perhaps

the reason why they, as has been shown, can buy direct from the oil company on a commercial contract. Real big commercial accounts aren't even tossed to the dealers for competition. The oil companies keep those for them-
462 selves, as has been shown.

Trial Examiner Ballinger: Call the next witness.

Mr. Austin: Mr. Ecker.

L. WILLIAM ECKER was thereupon called as a witness by and on behalf of the Commission, and, being first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Give your name and address to the reporter, please.

A. L. William Ecker; 10520 Roxbury.

Q. Are you a salesman for the Sun Oil Company?

A. I am.

Q. How long have you acted in that capacity?

A. Three years; March 8, 1938.

Q. Were you in the oil business before that?

A. I was a dealer over on East Vernor and Burlidge.

Q. Did you operate an oil station there?

A. Right.

Q. What part of the city is your Sun Oil territory located?

A. I cover Gratiot north of Houston Avenue to Mt. Clemens, including Mt. Clemens; Harper from Dickerson to Mt. Clemens, including Jefferson from the Seven Mile Road out and north of Eight Mile Road on Van Dyke
463 to Utica.

Q. What commodities or articles are you selling?

A. Regular motor products department; selling gasoline and oil to prospective new dealers.

Q. Are you familiar with all the gasoline stations locations in your territory?

A. I am.

Q. Is there any gasoline station in your territory operated by Ned's Auto Supply Company?

A. Yes, sir; at Gratiot and Madeline.

Q. Did you make any purchases of gasoline at the Ned's station at Gratiot and Madeline during 1940?

A. I have; periodically.

Q. During what period of 1940?

A. Particularly in August, 1940, and on several occasions before that. I usually make it a point to more or less check them every once in a while, myself.

Q. Why do you do that?

A. I want to know what is going on in my own territory.

Q. Do you make the same check on other stations that are not operated by Sun Oil Company?

A. Right.

Q. Had you been purchasing gasoline at Ned's prior to 1940, also?

A. Yes, because—the station only has been there for two years and I have been buying off and on there
464 for some time. Even my dealers tell me they get a discount there. That is the reason I buy there.

Q. You started going there last August?

A. Right.

Q. Do you recall what happened when you went to the station?

A. I went in and they asked me if they should fill the tank, and I told them I wanted a dollar's worth, and they brought out the newspaper to me first, and I paid them the dollar and they went through their service procedure and they came back with a cash receipt, and the attendant pointed out on the back that that entitled me to a 2 cent discount after I received a dollar's worth of them.

Q. Had received what?

A. After I had received a dollar's worth of them.

Q. That then you could turn them in?

A. Yes.

Q. Did he state what they were redeemable for?

A. Anything they had in their place. You could take it out on a refrigerator, if you wanted to.

Q. Did you show the attendant any envelope or anything of that ~~sort to indicate~~ that you had been buying there previously?

A. No, sir.

465 Mr. Hanley: Are you asking about the August, 1940, purchase?

Mr. Austin: Yes.

Q. Did that same procedure, substantially, take place each time that you called there?

A. It often did, yes, sir.

Q. Was the attendant who you said—had he known you or were you there frequently enough to remember you? I can't ask you if he remembered you, but did he give any indication of knowing you?

A. He didn't.

Trial Examiner Ballinger: What time and what year did you first receive these receipts?

The Witness: I think the store opened up in July, 1938.

Trial Examiner Ballinger: And have you been buying your gas there ever since?

The Witness: I do use Sunoco once in a while, Judge.

Trial Examiner Ballinger: How often have you been patronizing the store since?

The Witness: Oh, I will usually slide in there maybe a couple, three times a month.

Trial Examiner Ballinger: And have you received this discount each time?

466 The Witness: That's right.

Mr. Hanley: He is a steady enough customer so he is about entitled to it now.

By Mr. Austin:

Q. You stated that from time to time you have shopped around for gasoline at other stations in your territory?

A. That's right.

Q. Have you received any discounts or discount cards or discount tickets or premiums below 16.3 cents or 16.2 cents a gallon, during 1940, from any other station in your territory?

A. I have a courtesy card mailed to me from Morrison, a Gulf dealer at Gratiot and Pelenkey, I think it is.

Q. Do you have that card with you, by any chance?

A. No, I haven't.

Q. Could you state what the content of it was?

A. This card certifies the bearer to 2 cents a gallon discount at this station upon presentation of this card.

Q. 2 cents?

A. Yes.

Q. What was the location of that station?

A. Gratiot and Pelekey.

Q. How far is that from this Ned's station at Gratiot and Madeline?

A. That happens to be about a half mile from Ned's.

467 Q. On Gratiot?

A. Yes.

Q. Is Gratiot what is known as a through street?

A. Pardon me. I will change my answer to a mile instead of a half mile.

Q. Is Gratiot what is known as a throught street?

A. It is a U. S. Highway.

Q. Is there a large amount of traffic that would drive past both of those stations going to and from Detroit?

A. That's right. It carries tarffic all the way up to Port Huron.

Q. Is there a large amount of commuting traffic on that highway, that is, people go down to business every day and back at night?

A. That's right.

Q. Then, in your opinion would that Gulf station on Gratiot and the Ned's station on Gratiot be strictly competitive stations?

Mr. Hanley: That, of course, is objectionable: All this goes in subject to the same objection, anyway.

Mr. Austin: If you want to object on the ground it calls for a conclusion, I perhaps would withdraw the word "strictly."

Mr. Hanley: I would have to object to almost every question if I started to do that, Mr. Austin. We can 468 have the general objection. That's all I am interested in. I don't want to object to form.

Mr. Austin: I think what I mean by service stations competitively engaged is pretty clear, and I would just like to have the witness answer that question as to whether those two stations, from the nature of their locations, whether they are competitive stations.

Trial Examiner Ballinger: The witness may answer the question.

The Witness: Well, this Gulf dealer, he has often said to me that he is not going to let—

By Mr. Austin:

Q. No, I am not asking you that. I am sure that Judge Hanley would have a valid objection to that sort of testimony. Just answer my question.

Trial Examiner Ballinger: Just read the question to the witness.

The Witness: Read the question again, please.

(The question was read.)

A. Yes, they are.

By Mr. Austin:

Q. What was the answer?

A. Yes, they are.

Q. There probably have been some other stations that
you have been able to obtain some discount at during
469 1939 where you have actually purchased gas; or have
there been?

A. No, there hasn't. I have tried it in several cases, but I haven't been able to get the discount.

Q. You didn't actually buy any gas at this Gulf station you mentioned?

A. I did.

Q. After you got the card?

A. Right.

Q. Did you purchase gasoline at the Sun Oil stations during the same period?

A. I did.

Q. What did you pay there?

A. I paid the full price of 16.3.

Q. Could you estimate approximately from about how many stations in your territory you have purchased gas during, we will say, the last half of 1940?

A. I would say about 25 of them; 25 of my own accounts, that means.

Q. What do you mean by your own accounts?

A. My own stations.

Q. You mean Sun Oil?

A. Right.

Q. How many others besides that?

A. Well, about 6 contracts from other than Ned's accounts.

470 Q. Other than what?

A. Other than Ned's accounts.

Q. There was only one Ned account?

A. Right.

Mr. Austin: That is right.

Cross-Examination by Mr. Hanley.

Q. I didn't hear how long you had been salesman for the Sun Company?

A. Three years.

Q. You said you had purchased at Ned's station in your territory some time before August, 1940. Do you remember when you first began buying there?

A. I can't give you the exact date, no. I went into my territory March 8th, 1938, and this store happened to open up that summer of 1938.

Q. Had you been buying at Ned's stations or elsewhere in the city prior to that time?

A. No, I haven't.

Q. Now, beginning—

A. It was common knowledge, though, that you could get it. I worked at Stern's previously.

Q. What I mean is, did you personally buy any gasoline?

A. No.

Q. Prior to the opening of the store in your territory?

471 A. No.

Q. Tell the Court, please, exactly what happened the first time you ever bought gasoline at Ned's?

A. As I stopped at the pump, the attendant came out and asked to fill it up, or how many, and I told him a dollar's worth, and he went on with his procedure of service and raised my hood, and then checked the oil, and I paid him the dollar, and he automatically came out with a cash receipt.

Q. What do you mean by automatically came out?

A. That is their manner of form, that they bring a receipt.

Q. Just tell us what he did, Mr. Eeker.

A. Well, that is what I am telling you, that is what he did. He brought out the receipt to me when he brought my change out. I gave him a $5 bill. On the back of the receipt was noted a 2 cent discount.

Q. Had you said anything to him except that you wanted a dollar's worth of gasoline?

A. I hadn't.

Q. And from that time you continued to buy gasoline, did you not, from time to time?

A. That is right.

Q. Have you been receiving this discount you refer to?

A. I get the slips but I have never taken advantage
472 of the discounts.

Q. You have never done that?

A. No.

Q. You have bought gasoline at the Gulf station that offered to give you a discount, I think you said.

A. Right.

Q. Did you get the 2 cent discount at that station?

A. I did.

Q. Did you take it?

A. Right.

Q. Have you continued to buy from that station from time to time?

A. I can't use Gulf products.

Q. You use Standard products, apparently.

A. Once in a while. They are all right.

Q. Well, you have referred twice to the service procedure at Ned's. I presume you mean by that the usual wiping of the windshield and that sort of thing that is done?

A. Yes.

Q. That is done very promptly and effectively and efficiently, isn't it?

A. Very efficient.

Q. At Ned's service stations?

A. Very efficiently.

Q. Isn't that one reason why you like to go there?

473 A. Well, just like anybody else, if I was an outsider out of the oil business, I would probably take advantage of it.

Q. Well, you are in the oil business, and don't you like to have your windshield cleaned?

A. I get it cleaned.

Q. You say you haven't taken advantage of the discount there, so that hasn't been the reason you go to Ned's, is it?

A. No.

Q. Isn't the reason you go to Ned's because you like the service you get and the products that he sells?

A. No.

Q. What do you go there for?

A. I go there to see what they are doing, to keep up on their service and to get a discount.

Q. Do you also go to the service stations handling all other products than Sun products in your territory?

A. I usually see what the fellows are doing and their procedure of service and advise my dealers accordingly.

Q. That is to say, if you find that some dealer in Blank gasoline is giving some kind of a premium or a discount or a cut price, you go and tell your Sun dealers about it?

A. I usually tell them what they are doing, if they 474 ask it. I don't bring it up.

Q. As a matter of fact, don't you urge your dealers to be competitive?

A. No.

Q. Did you hear the testimony of Mr. Harrison?

A. I did.

Q. This morning?

A. I did.

Q. Do you recall that he said that it was the policy of your company to advise your dealers to be competitive?

A. Yes.

Q. Early?

A. Yes.

Q. Don't you follow out that policy in your territory?

A. Well, I think the dealer, if he is a smart business man, he is going to follow any business tactics that Ned's pull off or anybody that pulls off those business tactics.

Q. Or anybody else; isn't that right?

A. That is right.

Q. And they do, don't they?

A. And they do it, too.

Q. They sometimes do it when it isn't Ned's that is doing—

A. Listen. Ned's has started out this business in De-
troit. I was a dealer for four years myself, and they
475 did it then. That is how they got their name known in
the City of Detroit.

Q. Is that the only reason, in your judgment?

A. That is right. They have to have those contacts from the pumps.

Q. Is it your testimony, Mr. Ecker, that the growth of Ned's merchandising business in Detroit has been due to the fact that Ned's has given the sort of a discount which you have been talking about on gasoline?

A. Right.

Q. Do you think that aids them to sell bicycles?

A. Right.

Q. Do you think that the general merchandising policies, the efficiency of service given by Ned's has nothing to do with it?

A. Oh, it has something to do with it.

Q. With their success in business?

A. Sure. When you treat a man right when he comes into your place, you are going to make a habit of coming back there, aren't you?

Q. Well, you have, haven't you?
A. I have periodically, yes.
Q. You have been treated all right?
A. Certainly.
Q. And you have gone back?

476 A. Certainly. They are smart people. They know how to do business.

Q. And you accord the palm to them as being good business men?
A. In their own way, yes, but not for the other fellow.
Q. Well, let us understand the implications in your testimony, Mr. Ecker. Do you wish it to be understood by this Court that Ned's service stations are the only price cutters in Detroit?
A. They aren't the only ones.
Q. Do you wish to leave the implication for the Court that they have always been the initiators of price cutting?
A. Right.
Q. Always?
A. Right!
Q. Do you mean to say that nobody ever undersells Ned's?
A. No.
Q. Is that your testimony, Mr. Ecker?
A. That is my testimony.
Q. Are you familiar with the Zip stations?
A. I am talking of major brand stations in that question that you just asked me.
Q. What kind of gasoline do they sell at the Zip stations?
A. Well, it is not a Standard brand; it is not merchandised under a major brand sign.

477 Q. Well, it has a tremendous trade acceptance in this town, hasn't it?

A. On account of price.
Q. Isn't that exactly what I am asking you, Mr. Ecker?
A. Well, speak up so I can hear you, will you?
Q. It has public acceptance, hasn't it?
A. It has to a certain extent to that class of buyer.
Q. Has there ever been a time in the last four years, to your knowledge, that Ned's service stations have ever had a price that met the Zip and Joy stations?
A. Well, Judge, you can't compare Ned's with Joy or Zip.

Q. Don't tell me what I can compare, Mr. Ecker. Just please answer that question.

A. I would like to have that question read.

The Reporter: (Reading.) "Has there ever been a time in the last four years, to your knowledge, that Ned's service stations have ever had a price that met this Zip and the Joy stations?"

A. No.

Q. So it isn't true that Ned's always had the lowest price and always initiated the cuts, is it, Mr. Ecker?

A. Not in the gasoline business here in Detroit, but in the major line of business, yes.

Q. What do you define as the major line?

478 A. Standard Oil, White Star, Sinclair, Shell, Gulf, and High Speed, if you want to class High Speed as a major here in Detroit.

Q. Well, I am asking you. Where do you put it?

A. I will put in with the majors.

Q. What is the distinguishing feature between the major brands and any other brand?

A. Just a little larger, I guess.

Q. Sir?

A. Just a little larger, I guess.

Q. How much?

A. Oh, about $50,000,000.

Q. Does that make any difference in public acceptance of gasoline and the price of gasoline in Detroit as between, we will say, your gasoline and Joy gasoline?

A. I would like to have that question read.

(The question was read.)

A. What are you referring to, the price?

Q. This definition of a major that you have given.

A. No.

Q. So from the standpoint of the customer, it is true, isn't it, that he would just as soon buy Joy gasoline as Sun gasoline or Standard Oil gasoline if it serves his purpose; isn't that true?

A. That is right. It is public instinct, price conscious.

479 Q. You answered, I think, that always those stations have been under Ned's?

A. They have. That is right.

Q. And the difference that you can assign as between a major company and all the rest of these companies, whatever you call them, is that maybe one is about $50,000,000 bigger that the other?

A. That is right.

Q. You are willing to concede, are you not, Mr. Ecker, that that difference of $50,000,000, assuming it exists, doesn't make a bit of difference to a purchaser of gasoline?

A. No. It is just like you said before. As long as the product satisfies and it is received at the right price, and it has got the acceptance, O. K.

Q. It is true, isn't it, that these low price gasolines such as Joy and Zip brands have been selling in increasing quantities over the past several years in Detroit?

A. In the past several years, but in the past six months to eight months, they have been taking decidedly a drop.

Q. Generally speaking, they have shown an increase yearly since 1936, haven't they?

Mr. Austin: Do you know?

The Witness: No, I do not know.

By Mr. Hanley:

Q. You haven't any judgment about that?

480 A. No.

Q. Now, a little while ago you made the statement which I want to give you the opportunity to correct, if you care to correct it, Mr. Ecker, that always in Detroit price reductions were initiated by Ned's service stations. Do you want to leave that testimony stand?

Trial Examiner Ballinger: Judge, as I understand his testimony, it was that in all price cutting on major company products, they were initiated by Ned's.

By Mr. Hanley:

Q. Will you name, then, slowly, Mr. Ecker, what you mean by major companies? Name the companies.

A. O. K. We will put your company first. Standard Oil Company, Sunoco, White Star, Sinclair, Gulf, Texas, High Speed.

Q. Is that all?

A. That is all.

Q. And every other company now you are excluding?

A. That is right. They are either classified as a gyp or a non-brand.

Q. Now, it is your testimony that every cut in Detroit, say, since 1936, in the sale of any of those brands of gaso line which you have named has been initiated by Ned's service stations?

A. That was before my time.

481 Q. All right.

A. Back in '36.

Q. For the past three years since you have been salesman for Sun.

A. Well, yes, because—

Q. Well, just—if yes is the answer—

A. Yes.

Q. —that is the answer. Now, that is without exception?

A. That is the selling price?

Q. Selling price, retail selling price is what I am talking about.

A. Right.

Q. That is without exception?

A. Right; yes, sir.

Q. So that if Ned's were out of business in Detroit, in your judgment there never would have been any cut prices, competitive prices; is that right?

A. No. If they don't sell Standard, they are going to sell Cities Service, or something to that effect, and as long as Standard gives them a price, they are going to buy it from them.

Q. Well, that isn't answering the question. I said if Ned's were out of business, is it your position that during the last three years there would never have been any deviation in the retail selling price in Detroit?

482 A. Yes, you always have some deviation in selling price.

Q. I am talking about the major brands.

A. Yes.

Q. Your major brand?

A. Right.

483 Q. How do you reconcile that with your statement, that without exception, Ned's has always been the originator of a cut price?

A. They have been known for that for years, ever since they started in business.

Q. Well, that is your opinion.

A. Well, as an outsider, how else would I know it?

Q. I am asking you, if you know that.

A. Why, certainly, I knew of it.

Q. And yet, do you still say that had they been out of business, that there still would have been cut prices?

A. Well, you or I haven't got any control over this market. I am not going to straighten it up and neither are you.

Trial Examiner Ballinger: That is purely conjectural.

Mr. Hanley: Will you answer the question, please?

Mr. Austin: I was just about to make the objection on the ground that the question was not capable of a direct answer.

The Witness: That is right.

Mr. Hanley: Well, he made a positive statement, and I want to be sure whether he means what he says.

Mr. Austin: I don't think your question follows, and it certainly isn't capable—

Trial Examiner Ballinger: I think that is too highly speculative.

484 Mr. Hanley: I will withdraw the question.

By Mr. Hanley:

Q. You say you were a dealer up until three years ago?

A. Right.

Q. You don't like Ned's, do you?

A. As a dealer, I cussed them, and every God damn thing else.

Q. Is that your attitude now?

A. As long as anybody starts—

Q. Well, is it or isn't it?

A. Yes.

Q. And that has been your attitude over—

A. Right.

Q. —over a period of years?

A. Right.

Q. And you don't like the Standard Oil Company because the Standard Oil Company sells Ned's gasoline; is that true?

A. No, the Standard Oil Company does things underhanded just like Ned's does.

Q. That is what you think?

A. That is what I think.

Q. Well, based on that attitude of mind, can you now answer the question that you do not like the Standard Oil Company? That is the question.

A. I am not going to give the answer to that question.

485 Q. Can't you answer it?

A. No.

Q. You don't know whether you like them or not?

A. No.

Q. You don't know that you don't like Ned's? You are very sure of that, aren't you?

A. From a business standpoint, yes.

Q. And you have a definite personal interest in how this action comes out, haven't you?

A. That is right.

Q. And you want something to happen that will be harmful to Ned's business, don't you?

A. Well, I hate to see the boys go out of business, if they have to go out of business, if that is going to be what it is, but they won't go out of business as long as Standard Oil Company, Shell, or anybody else sells them the gasoline.

Q. Well, I agree with that.

A. Or even any major company. They are going to get gasoline.

Q. That is your candid judgment, isn't it?

A. That is right.

Q. That if Standard Oil Company were prevented from selling to Ned's, they would get the gasoline someplace?

A. Anyplace.

Q. And that can easily be done in Detroit, can't it?

A. That is right.

486 Q. And if today, in your judgment, the Standard Oil Company, either because it had to or because it wanted to, quit selling gasoline to Ned's, they could immediately buy gasoline on a tank car basis, couldn't they?

Mr. Austin: I object to that.

Trial Examiner Ballinger: Objection sustained.

By Mr. Hanley:

Q. Oh, one other thing: Did you belong to the Dealers Association while you were engaged—

A. I did.

Q. —as a dealer?

A. Right.

Q. Are you a member now?

A. No, not connected with any station whatsoever.

Q. By the way, is that a qualification for membership in the Association, that you be an operator of a station?

A. I do not know.

Mr. Hanley: I think that is all, Mr. Ecker.

Redirect Examination by Mr. Austin.

Q. Mr. Ecker, when you named the companies that you considered major oil companies, you didn't mention Shell, I don't believe. Was that intentional that you left them out?

A. I think I did, if I am not mistaken. They are a major.

487 Q. Does this Zip gasoline, whatever it is, have the same public acceptance that any of the major brands have?

A. No.

Q. Then when you said that an automobile owner would purchase Zip or some other brand, if it served the same purpose, and he could get it for a better price, does the average automobile owner know that it does serve the same purpose, or think that it does?

Mr. Hanley: Oh, just a minute. It is a conclusion, and everything else.

Trial Examiner Ballinger: Objection sustained.

By Mr. Austin:

Q. Let me ask you this: Is the Zip gasoline and, say, Standard Oil gasoline—are those two brands competitive if sold at the same price?

A. No.

Mr. Hanley: Zip and what?

Mr. Austin: Standard. That is all.

Mr. Hanley: One question, Mr. Ecker.

The Witness: Yes, sir.

Recross Examination by Mr. Hanley.

Q. You just told Mr. Austin that Zip and Standard were not competitive. What do you mean by that?

Mr. Austin: If sold at the same price.

The Witness: If sold at the same price, he said.

488 Mr. Hanley: Oh, if sold at the same price?

Mr. Austin: Yes.

By Mr. Hanley:

Q. How do you know that? It never happened; did it?

A. Pardon?

Q. I say, how do you know that? That never happened, did it?

A. How do I know what?

Q. That they are not competitive if they are sold at the same price!

A. That has never happened.

Q. Well, that is what I am asking. It never did happen, did it?

A. No.

Q. Well, then, how do you know?

A. Not as I know of.

Q. How do you know that they would not be competitive if they were sold at the same price?

A. I do not know.

Q. Then you were mistaken when you answered Mr. Austin, I take it?

A. Refer me back to his question, Mr. Austin's question.

The Reporter: (Reading.) "Is the Zip gasoline and, say, Standard Oil gasoline—are those two brands competitive if sold at the same price?

A. No."

Trial Examiner Ballinger: Do you desire to change!

489 The Witness: Sure, they would be competitive if they were sold at the same price.

Mr. Hanley: That is what I thought. That is all.

Redirect Examination by Mr. Austin.

Q. What do you mean competitive! Well, we will go back to your previous answer. I think you stated that the Zip gasoline did not have a good public acceptance or as good public acceptance as Standard gasoline.

Mr. Hanley: That was stricken, as I remember it.

Mr. Austin: No, that is on the record. It wasn't objected to, I don't think.

Mr. Hanley: I am objecting to all this.

The Witness: So what the hell are you holding me up here for, then?

Trial Examiner Ballinger: What was that statement! Read that statement.

(The statement was read.)

Trial Examiner Ballinger: You desist from using that kind of language in the future.

Mr. Hanley: You got the other expressions of that kind in the record, I am sure, Mr. Reporter?

The Reporter: Yes.

Trial Examiner Ballinger: Is there a question pending?

490 Mr. Austin: No, I don't think so.

I don't think I will pursue that subject further with this witness.

Trial Examiner Ballinger: Any further questions?

Mr. Hanley: No, sir.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Mr. Austin: I move we adjourn until 10:00 o'clock tomorrow, your Honor.

Trial Examiner Ballinger: The motion of counsel for the Commission is granted, and now, at 4:30 P. M., the hearing stands adjourned until 10:00 A. M., March 13, 1941, to be reconvened in Room 859 Federal Building, Detroit, Michigan.

(Whereupon, at 4:30 P. M., March 12, 1941, the hearing in the above-entitled matter was adjourned.)

491

Room 859, Federal Building,
Detroit, Michigan,
March 13, 1941.

Met pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., Attorney for the Federal Trade Commission.

H. R. Hanley, Esq., 910 S. Michigan Avenue, Chicago, Illinois, on behalf of the Respondent.

492 PROCEEDINGS.

Trial Examiner Ballinger: We will come to order, gentlemen.

This is a reconvening of Docket No. 4389, a case entitled In the Matter of Standard Oil Company, at 10 o'clock A. M., Eastern Standard Time, March 13, 1941, in Room 859 Federal Building, Detroit, Michigan.

The last hearing was held in Detroit, March 12, 1941.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

Mr. Austin: Mr. Ledbetter.

ELMER E. LEDBETTER was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Will you state your name, please?

A. Elmer E. Ledbetter.

Q. Will you state your residence address to the reporter?

A. 22267 Cherry Hill Road, Dearborn, Michigan.

Q. What is your business, Mr. Ledbetter?

A. I am a wholesaler of petroleum products and allied lines. That is, my company is. I am president of the

493 company.

Q. What is your company?

A. Wayne Oil Company.

Q. When was that incorporated?

A. November, 1931.

Q. Have you been president of the company since that time?

A. I have.

Q. Are you the principal stockholder in the company?

A. Yes.

Q. How long have you been in the oil business?

A. I started as an individual; that is, personally; in the summer of 1931.

Q. Did you operate a gasoline station at that time?

A. Yes.

Q. When you organized the Wayne Oil Company, did the Wayne Oil Company then continue to operate retail gasoline stations?

A. The Wayne Oil Company never started business until January 1, 1932, at which time it took over the business I was operating personally.

Q. That was a retail business, was it not?

A. That was a retail business.

Q. How long did the Wayne Oil Company continue in the retail oil business?

A. March 1, 1933.

494 Q. And what change in the business of the company took place then?

A. Let me see if that date is correct (referring to documents). That's right. On that date the Wayne Oil Company ceased operating stations and leased all of its stations to the then operators.

Q. Did the operators to whom the stations were leased then purchase their gasoline from the Wayne Oil Company?

A. No.

Q. Well, then where did they purchase?

A. From Standard Oil principally and other suppliers.

Q. At that point, then, was the Wayne Oil Company only the lessor of Real Estate?

A. I would say that was about the situation.

Q. When did the Wayne Oil Company begin to engage in the oil business?

A. The Wayne Oil Company went into the wholesaling of petroleum products in August, 1935. I should say that would be about the date that it could be said to have been actually in the oil business.

Q. At or prior to that time did it purchase oil lease or construct a bulk plant?

A. Shortly prior to the time it went into the wholesale business, it leased bulk plant facilities.

Q. Where are they located?

495 A. Wyoming and Brandt, Dearborn.

Q. Do you still lease those same facilities?

A. Yes, and except that there are more of them than there were at that time.

Q. Whom do you lease them from?

A. From the Central Detroit Terminal Warehouse Company.

Q. Does that company have other such facilities there which it leases to others?

A. It has other bulk plant facilities.

Q. Are they all in use at the present time or are there vacant facilities which are now available?

A. I believe they are all in use.

Q. Beginning in 1935 I believe you said, did the Wayne Oil Company then commence to sell gasoline to the dealers who were its lessees?

A. That is right.

Q. And was that gasoline purchased by the Wayne Oil Company at its bulk plant and delivered from the bulk plant to the service station?

A. Most of it.

Q. Where did you purchase your gasoline?

A. Standard Oil Company.

Q. Have you always purchased from the Standard Oil Company since you began operating the bulk plant?

A. Yes.

496 Q. How are those purchases made; that is, in what quantities?

A. Tank car quantities.

Q. Were deliveries by tank car until recently?

A. Yes, comparatively recently.

Q. How are the deliveries made now?

A. Transport truck they call them.

Q. Do those transport trucks bring the gasoline to the bulk plant?

A. Yes, they do.

Q. Do they unload it into the bulk plant?

A. No, we unload it.

Q. You have your own pumps?

A. Yes.

Q. That is done by you rather than by the oil company?

A. Yes, it is.

Q. After the gasoline is put into your bulk plant—incidentally, what is the capacity of your bulk plant facilities.

A. I have for gasoline—I have four 15,000-gallon tanks and six 4,000-gallon tanks.

Q. About 84,000 gallons?

A. Yes.

Q. You said for gasoline. Do you also have tanks for oil or for something else?

497 A. Well, we have yards and docks, loading docks, pumps, and equipment, and a warehouse building, and also additional space in the bonded warehouse a half a block down the street.

Q. Are you on Water?

A. No.

Q. You said docks.

A. Well, I mean loading docks for gasoline, loading up our—

Q. That term is apparently used—

A. We call them loading docks where we load our docks with gasoline.

Q. Well, I wasn't familiar with the term "docks," except on water. I was wondering whether there was any water out there.

Q. How is the gasoline delivered from the bulk plant to the service station, did you say?

A. By tank trucks.

Q. Do you own the trucks?

A. I own one of them and rent another one.

Q. You have two?

A. Yes, sir.

Q. Did I understand you to say that there was some gasoline which reached the service station by some other method?

498 A. There was for a while.

Q. What method was that?

A. Standard Oil delivered Ethyl gasoline for a time after I began to buy Red Crown as a wholesaler.

Trial Examiner Ballinger: When did that cease?

The Witness: I would say some months after I went into the wholesale business, possibly a year or less. I wouldn't—it would just be a guess unless I looked at the records.

Trial Examiner Ballinger: What year?

The Witness: Beginning with August, 1935, and from that time on, whenever it ended. I would have to guess at it, at the present time.

By Mr. Austin:

Q. Would it exceed a year?

A. I don't think so.

Q. You are a little hazy, aren't you, on that, Mr. Ledbetter?

A. Yes, I am. That is five years ago.

Q. Maybe you had better look that up.

A. I will be glad to.

Q. Can you state when they made those deliveries, how did they make them? Did they make them direct from their bulk plant by tank wagon delivery to your subdealers or did they deliver from your bulk plant to your subdealers?

A. No, they delivered from their bulk plant in their 499 own equipment.

Q. Did they charge you the tank wagon or the tank car price for that Ethyl gasoline?

A. Tank wagon is my recollection on it.

Q. They charged you a different price for the gasoline which they delivered than for the gasoline which you received at your bulk plant?

A. It is my recollection.

Q. Will you check on that?

A. I will be glad to.

Q. Did they charge you anything for the delivery service?

A. I don't believe so. I think they charged the tank wagon price, the prevailing tank wagon price.

Q. Well, presumably if they charged the tank wagon price, there would be no charge for delivery; on the other hand, there might be if it was the other price, they probably would?

A. If that was the situation, there was nothing in addition. I don't recall paying any delivery charges.

Q. Well, I wish you would check up on all those points.

A. I will be glad to do that.

Q. I believe you will be here and we will ask you at some later time.

A. Let's see. What else was it you wanted me to check up? I might as well get it down here now.

500 Q. How long they delivered.

A. Oh, yes.

Q. And what price they charged and whether there was any charge for the delivery service.

A. O. K.

501 Q. How many dealers, retail dealers did you sell gasoline to in 1936, Mr. Ledbetter; say, the first of 1936?

A. Just guessing at it, now—although I think the information is here, exact—

Trial Examiner Ballinger: If the information is here, let's have the information.

Mr. Hanley: I don't know whether Mr. Ledbetter has it. I have some information I am willing to give the Government, if they need it.

Mr. Austin: If you got it from Mr. Ledbetter, I would like to have it.

Mr. Hanley: He gave it to me. However, I won't interfere in the matter. I can give it to you.

Trial Examiner Ballinger: Guesses don't constitute acceptable evidence.

The Witness: I can give a pretty close estimate, just from memory;

Mr. Austin: I think that will do, for my purpose.

A. That would be the first of 1936?

Q. Yes.

A. Somewhere between twelve and fifteen stations, I would say.

Q. How many of those were leased on properties owned or leased by the Wayne Oil Company, and how many of
502 them were dealers who either owned their equipment or leased from some other source?

A. I can give that exact information later, but my best estimate now would be that probably all but possibly two or three of them were leased by the Wayne Oil Company and subleased to the dealers; at that time.

Q. Do you know how many stations—that is, how many retail dealers—were served by the Wayne Oil Company in 1937?

A. Well, of course—

Q. January, 1937?

A. Well, of course, I have records showing exactly, but somewhat more than that number I have just given, I would say.

Q. You haven't those records here?

Mr. Hanley: If Your Honor please, I think I could be of some assistance here. I have some data that Mr. Ledbetter prepared at one time.

Mr. Austin: We would be very glad to have you hand it to him to refresh his recollection. I am sure it would be helpful.

Mr. Hanley: I don't want to interfere in your method of examining, Mr. Austin, but I think it would shorten this thing a lot.

Mr. Austin: I am only anxious to get the answers. The easier, the better.

503 Mr. Hanley: I think I have it.

Trial Examiner Ballinger: Is this a memoranda prepared by Mr. Ledbetter?

Mr. Hanley: No, he didn't prepare it. He gave the information from which it was prepared, Your Honor.

Trial Examiner Ballinger: That should refresh his recollection sufficiently for the present purposes.

Mr. Hanley: You are asking about the number of stations?

Mr. Austin: I want to find out the number of stations he had each year.

Mr. Hanley: (Handing document to witness.) I think that will help.

By Mr. Austin:

Q. This has the number of station outlets: at least, what purports to be, Mr. Ledbetter?

A. Yes, it has.

Q. Is your recollection improved any now, Mr. Ledbetter, as to the number of outlets which the Wayne Oil Company had in 1936?

A. In 1936 and 1937, which are the two years you have already asked me about, my recollection was pretty good: had a total of 15 stations, I believe, at the first of 1936, and a total of 19 on the first of 1937.

504 Q. Now, will you look at the little square above that column and see if that doesn't refer to the end of the year, rather than the beginning.

A. Well, I believe it does.

Q. Well, do you wish to change that statement or not?

A. No, I don't think there was much change during the years.

Q. And how many retail stations did you supply in 1938?

A. Twenty-one, at the end of the year, I was supplying.

Q. How many in 1939?

A. Twenty-four.

Q. How many in 1940?

A. Twenty-four.

Q. How many today?

A. I believe it is twenty-four.

Trial Examiner Ballinger: That is the best recollection?

The Witness: That is within one of being exactly right, and I expect it is exactly right.

By Mr. Austin:

Q. Do you know whether your volume figures you have on that sheet there are correct, or not; and, incidentally, if you have any other material with you, I rather you would use it or check it, because I believe I asked you to prepare some figures on volume. I don't know whether you have them with you, or not, as to totals.

A. These figures are, I believe, correct. However, 505 they represent the shipments from Standard Oil Company to the Wayne Oil Company.

Q. They wouldn't be, then, exactly the same as the sales by the Wayne Oil Company?

A. That is true.

Q. Do you know whether they vary very far, or have you any statements on your sales?

A. Not with me.

Q. Are the purchases from the Standard Oil Company the same figures that are published by the Secretary of State?

A. That's right.

Q. In those state gasoline tax report? In other words, are those based on purchases or sales?

A. Those are based on Standard Oil sales to me and my purchases from Standard Oil. We both report to the Secretary of State. We don't necessarily report the same figures, but they are approximately the same. In figures this size you could say there would be practically no difference, no substantial difference.

Q. Have you any figures with you on your volume, either of purchases or sales during those years?

A. No, I haven't.

Mr. Hanley: Are you referring to his total volume of Standard Oil products and anything else?

Mr. Austin: Talking about Standard Oil gasoline. 506 He said he bought all his gasoline from Standard Oil Company.

A. These figures given here are approximately—

Q. Are they approximately accurate?

A. So far as my recollection.

Q. Will you state for the record, then, what your volume was during the years 1936 to 1940, inclusive?

A. 1936.

Q. Give it in round thousands, if you will, please, Mr. Ledbetter.

A. 1,438,000.00; 1937, 1,686,000.00; 1938, 1,825,000.00; 1939, 2,226,000.00; 1940, 2,340,000.00.

Q. Referring to prices at which you sold that gasoline to your sub-dealers, have you a statement of the prices at which you sold to sub-dealers during each of these years?

A. With me?

Q. Yes.

A. I have no written statements.

Q. Were you familiar at all times with the posted tank wagon price of the Standard Oil Company in Detroit?

A. I was.

Q. In what respects, if any, did your price to your subdealers differ from the Standard posted tank wagon price?

A. It did not differ.

Q. You always sold—have you always resold gasoline to your retail dealer outlets in the posted tank wagon 507 price of the Standard Oil Company?

A. Whenever there was a posted tank wagon price of Standard Oil Company, the Wayne Oil Company did.

Q. Has there always been a posted tank wagon price since 1936, when the Iowa Plan went into effect?

A. Posted tank wagon price?

Q. Yes.

A. Yes, I believe there has. I might state it this way: Wayne Oil's prices to its dealers have always been exactly the same as Standard Oil prices to its dealers.

Q. That's what I wanted to find out. Now, Mr. Ledbetter, since the Wayne Oil Company started operating as a gasoline wholesaler in 1935, has it operated any retail stations of its own?

A. Not until September 8, 1939.

508 Q. Has it operated retail stations since September, 1939?

A. It has.

Q. Will you state what stations have been operated by the Wayne Oil Company and their locations and the times during which they were operated?

A. The station at 8400 West Chicago has been operated by Wayne Oil Company continuously up to the present date since September 8, 1939.

The station at 13100 Livernois was operated by the Wayne Oil Company from September 8, 1939, until the 1st of May, 1940.

The station at Wyoming and Brandt was operated by the Wayne Oil Company from November 1st, 1939, to October 1st, 1940.

The station at 2945 South Fort Street was operated by the Wayne Oil Company from November 15, 1939, until July 1st, 1940.

Q. Is that all of them?

A. No. The station at Schaefer and Tireman was op erated by the company from December 1st, 1939, until April 1st, 1940.

The station at 10618 West Jefferson, River Rouge, was operated by the Wayne Oil Company from June 4, 1940, to the present date.

The station at Grand River and Mendota was op-
509 erated from some time in October, 1939, to some time in November, 1939, a period of three or four months.

Then there was one other. Some time between March 1st, 1933, and September 9, 1939, the station at Schaefer and Tierman was operated for a period of two weeks by the company.

That is the extent of the company operations.

Q. Have you prepared a statement showing the retail prices at which Standard Oil gasoline was sold at those retail company operated stations during the periods you have just mentioned?

A. All except the one isolated two-week operation at Schaefer and Tireman.

Q. May I see that statement, please?

(A paper was handed to Mr. Austin by the witness.)

Q. Does this have all the data on prices charged at all these stations except the one that you just mentioned on Schaefer?

A. Yes, I believe it does.

Q. And this covers all of the periods which you have just stated to the reporter?

A. It does.

Mr. Austin: Will you mark this for identification, please?

(The document referred to was marked, for identifi-
510 cation, Commission's Exhibit 54.)

Mr. Austin: And I offer Commission's Exhibit 54, for identification, in evidence.

Mr. Hanley: No objection.

Trial Examiner Ballinger: The paper marked Commission's Exhibit No. 54, is admitted in evidence.

Mr. Hanley: The general objection, of course!

Trial Examiner Ballinger: Subject to the general objection reserved to counsel for the Respondent.

(The document referred to, heretofore marked, for identification, COMMISSION'S EXHIBIT 54, was received in evidence.)

By Mr. Austin:

Q. How often do you receive gasoline from the Standard Oil Company at your bulk plant? I will make that apply to the time during which you received deliveries in tank cars.

A. Well, depending on the period involved—

Q. Do you place those orders from time to time from your office? Just tell me how you—

A. Yes. We call up the order department of Standard Oil Company and place our orders for the gasoline.

Q. You always order in one or more tank cars?

A. That is right.

Q. That is, prior to the tank train deliveries?

A. That is right.

511 Q. When you now order delivery by tank train, how are those orders placed?

A. The same way.

Q. Now, you don't order a tank car any more.

A. Well, I believe our order department does order tank cars, to be exact about it.

Q. Don't they order just a certain number of gallons now rather than—

A. They specify—I think they order exactly like they did when they ordered tank cars.

Q. How did they order them, by gallons or what?

A. They would say 6500-gallon car, 8000-gallon car, 10,000-gallon car, and my recollection is they use the same terms. I don't know. I wouldn't be too sure about that.

Q. What was that lowest sized car that they would order?

A. 6500 gallons.

Q. Did you frequently order carloads of that size?

A. I believe we used that size only for Ethyl gasoline.

Q. Could it be used for the other?

A. Yes, it could, and might possibly have been a few times. I wouldn't be sure.

Q. They also run 8,000 and 10,000?

A. And twelve.

Q. I believe you stated you have been familiar at 512 all times with the price at which Standard Oil Company sells gasoline to its direct retail accounts in Detroit?

A. I think I have.

Q. Do you find it necessary to keep in touch with the selling methods of Standard Oil Company and their prices in order to operate your own business intelligently?

A. I think that is right.

Q. Have you also been familiar at all times during the past five years with the retail prices charged by your dealers?

A. I have.

Q. Have you been familiar with the retail prices charged by the majority of other Standard Oil stations to the extent that you can say there was any such price?

A. In a general way, yes.

Q. Have you then made it your business, Mr. Ledbetter, to keep in touch with the competitive situation in the retail gasoline business in Detroit?

A. Yes.

Q. Going back to, say, the last half of 1936, early in 1937, and based upon your own knowledge and observation, were there certain of the larger and more prominent service stations in Detroit that were selling house brand major oil gasoline below the prices which were then being charged by your dealers?

513 A. That is my recollection.

Q. Can you name any of those stations?

A. You are talking about major gasolines?

Q. Yes.

A. Langer's, Bright's, Ned's, and Hickey's come to my mind, and I think there were others not so big.

Q. Of those four stations which you named, have they always been known as price cutters?

A. Well, I would—

Mr. Harley: Just a minute. Do you understand what Mr. Austin means by a price cutter? If you don't understand it, you are entitled to get an explanation of it, Mr. Ledbetter.

By Mr. Austin:

Q. By price cutter, I mean selling below the prevailing retail major oil company gasoline price.

A. And by being known, I suppose you mean being known by me?

Q. No. I mean provided—if you can't answer the question, all right. I am asking you whether they are generally known among the gasoline trade; that is, you say that you know the competitive gasoline situation, you talk to your dealers and other dealers, and I am asking what that is, not what John Smith may think about it. I assume there was some general understanding in the oil business, 514 or knowledge on that question. If there isn't, say so.

A. I don't believe I could testify as to what was generally known in the gasoline trade in that respect.

Q. All right, then. If you can't answer the question, why—

Trial Examiner Ballinger: Have you any personal knowledge?

The Witness: I have a personal idea.

Trial Examiner Ballinger: What is that based on?

The Witness: Recollection of the situation as it comes to me now.

By Mr. Austin:

Q. Based on your own observations, isn't it?

A. Yes, I believe you would say that.

Q. Let's have it.

A. My own personal idea of those large concerns is that they were selling below the prices at which my dealers were selling at that time.

Q. I asked you about the latter part of 1936, I believe, and early in 1937.

A. That is right.

Q. Now, carry that along. Let's see if we can develop the situation. Did that underselling continue to be true during 1937 and 1938?

A. I would say yes.

515 Q. That is, by those four stations that you named?

A. Yes.

Q. And you also said that there were others not so large. I would like to know whether the price cutting, as I described it, by other stations increased or decreased during 1937 and into 1938.

A. My recollection is that it increased progressively, spread, if that is a better word for it.

Q. Wasn't that a very obvious spread? Wasn't there advertising price cuts and price reductions at that time by a lot of stations?

A. I would say that price cuts and advertising of price cuts increased progressively during 1936 and '37 and '38.

Q. How about '39?

A. I think it continued up into, well, through 1939.

Q. During 1937 and 1938 did you ever pass by any of the Ned's Auto Supply stations and see signs out in front advertising 2 cents a gallon discount?

A. Oh, I am quite sure that I did.

Q. Did you ever hear any radio broadcasts advertising Ned's products?

A. Yes, I have.

Q. Can you recall whether on these radio broadcasts there were any discounts or discount advertised?

516 A. Well, there was so much advertising of cut prices by various concerns, that I don't believe I could single out any one thing that I heard or saw during that period that far back.

Q. But there was a great deal of cut price advertising going on during that period?

A. There surely was.

Q. Since November, 1939, November 19, 1939, which was the time when the Standard posted tank wagon price was brought back to 8.1, where it has remained, as I understand it, ever since—since that time has there been as much or nearly as much advertised price cutting and price reductions in Detroit as there was prior to that time?

517 A. No, there has not.

Q. To what extent would you say that the open price reductions and advertised price reductions have been eliminated since then, as compared to the situation two years prior to that time?

A. To a very great extent.

Q. Do you know of any stations since November 19, 1940, that have had a posted pump price of below the prevailing retail price, or have specifically advertised a discount below that price?

A. No, I don't.

Q. Have you heard your dealers speak of any such station?

A. Yes, I have heard dealers, I think, speak of such.

Q. Of open advertising?

A. No open advertising. I don't recall that.

Q. Then, what you heard them speak of was what is so called undercover price cuts?

A. If I heard anything of that kind, that's what it was. I just don't remember any specific instance.

Q. During 1938 and 1939, did any of your dealers cut their price—and by that, I mean, reduce the margin between what they were paying for the gasoline and what they were selling it for—or to put it another way; did that bring their price below the prevailing retail price, if there

was a prevailing price? I think the first definition is
518 probably better; to refer to reducing their margin.

The Witness: Will you read that question, please?

(The question was read.)

A. Yes. In 1938, in the summer of 1938, two or three of my dealers did that.

Q. Did more of them do it in the winter of 1938 or 1939?

A. I believe some more of them did it towards the latter part of 1938, and more of them in 1939.

Q. Were those reductions all after the time when you know that Ned's and these other prominent stations which you mentioned, were cutting prices?

A. Well, yes; quite a period after; about two years, I guess.

Trial Examiner Ballinger: Well, were the other companies engaged at that time in the same practice?

The Witness: I don't quite understand that, Judge.

Trial Examiner Ballinger: At the time the stations you serviced were cutting prices, were Ned's places cutting prices?

The Witness: Yes, and had been for two years.

By Mr. Austin:

Q. And it was continuing at that time?

A. That's right.

Q. On November 19, 1939, when the Standard tank
wagon price was increased to 8.1, did your dealers all
519 put their retail price back up, or up to, 15.7 or 15.8?

A. Within a space of two or three days from that time they all did.

Q. What do you understand is meant by the term off-brand or non-major brand gasoline?

A. Well, in my own mind I would say it is kind of an arbitrary classification, I imagine guided a good deal by classification made by people whom I know in the oil business as differentiating between two classes of oil people.

Q. Were you here yesterday when Mr. Harrison testified?

A. I was.

Q. Would his classification of major oil companies be approximately the same as yours?

A. Yes, I think it would.

Q. Then, would off-brand gasoline be referred to you as gasoline made by some other company than those which were named as major oil companies; or marketed by some other company?

A. That would be my personal classification of it.

Q. I just wanted to be sure I knew what we were talking about.

A. Yes.

Q. Has the so-called off-brand gasoline during the past five years sold generally at lower prices than the major brand gasoline in Detroit?

520 A. Yes, it has.

Q. Can you state whether there is any difference between the public acceptance in this area of off-brand gasolines and the public acceptance of major-brand gasolines?

A. I think I could.

Q. What is the difference?

A. I believe major-brand gasolines have a better public acceptance.

Q. And do you know the reasons for that; in your opinion?

A. Yes. In my opinion it is a result of, possibly, the length of time the product has been on the market, the quality of the product itself, the type of people that have contacted the public in selling it or dispensing it, the kind of service they have given, the kind and volume of advertising that has been done by them, would be some of the factors, at least, that would—

Q. Isn't national advertising a very large factor; and reputation acquired through such advertising?

A. I should say that national advertising would be a very important factor.

Mr. Hanley: That classifies us as off-brand, Mr. Austin. The Respondent does not do national advertising.

Mr. Austin: National advertising in certain companies,
such as the Standard Oil Company, which operates in
certain states, and companies like Tidewater, which is
521 a major company, and American Oil, which are major
companies on the Atlantic seaboard, but I haven't
heard them mentioned here—I meant to state, when I said
national advertising, I meant to say, at least through a
number of states in which the company operates.

Mr. Hanley: Of course, for the purposes of this hearing, we are perfectly willing to classify us wherever you want to.

Trial Examiner Ballinger: That is sufficient discussion for the record. Any further discussion will be off the record.

By Mr. Austin:

Q. What facilities are necessary for storing gasoline in tank car quantities?

A. Just storing?

Q. Yes.

A. Just sufficient storage to hold it.

Q. And assuming the gasoline stored is to be transferred in trucks for delivery, from time to time; is there any pumps or anything of that sort necessary?

A. Oh, yes; lots of additional equipment.

Q. To transfer from the storage tank to the pump?

A. To do it properly and efficiently and safely, yes.

Q. Supposing the service station had a tank right at
the station, right under its pumps, that would hold
522 10,000 gallons of gasoline. That would be sufficient to
take a tank train delivery, would it not?

523 A. I believe it would be a violation of the law,
wouldn't it, here?

Q. I don't know. Would it?

A. I believe it would.

Q. What law?

A. I think there is an ordinance against anything more than 8,000, if I am not mistaken, in a gas station.

Q. At gas stations?

A. I believe that is true.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Q. Might not a service station operator install an 8,000-gallon or 7,000-gallon tank at his station?

A. So far as I know, he might.

Q. And apart from these transport trucks, thinking of it from the tank car delivery standpoint, would it be feasible and practicable for a service station operator to have, say, an 8,000-gallon tank at his service station, and to have a siding some place where a tank car could be delivered and then transfer that gasoline directly from the tank car into tank trucks for delivery to the service station without operating the bulk plant?

A. I presume it would be possible.

Q. Assuming that he bought one car at a time.

524 A. Yes.

Q. His practice was to empty that car, to transfer it to his service station?

A. Yes, I think it would be possible.

Trial Examiner Ballinger: Do any of the service stations have storage for as much as 8,000 gallons?

The Witness: I think there are some in the city that have that much.

By Mr. Austin:

Q. Are there companies in Detroit who make a business of hauling gasoline for hire?

A. I believe there are.

Q. Can you name any of them?

A. Ogden and Moffett, I think, are hauling gasoline for Standard Oil Company to us. L. A. Smith and Company would another one. The only two that I can call to mind now, that I could name at the present time.

Q. Those companies, then, are available if the man I was mentioning a minute ago wanted to employ someone to transfer his gasoline from his tank car to his tank in his service station?

A. I wouldn't undertake to say that, because I don't know what instructions they operate under; whether they are under the control of the Federal Government or how they do it. I wouldn't say they are available or not,

525 because I don't know enough about it.

Q. You know they are in the business of hauling gasoline but you don't know whether they are in that business for anybody who may want to come to them for tank car, is that what you mean?

A. That is about what I mean.

Q. Or truck load?

A. I don't know whether they could be said to be available. I don't know whether they want the business or what the situation is.

Q. I won't ask you anything further on that. We can call the trucking people themselves, if it becomes material. We can always do that. I thought you might have had experience at the Wayne Oil Company of employing some of those people.

A. I have never done it.

Q. When your dealers began to reduce their prices in

1938 and 1939, as you just mentioned a few moments ago, did that have any effect upon the volume of business of the Wayne Oil Company?

A. It did.

Q. What effect?

A. It increased it.

Q. In your opinion, and again based upon your experience and observation and contacts with your 526 dealers, and an observation of their business, did the sale of gasoline by Ned's Auto Supply Company in 1937 and 1938 at prices below the prevailing retail price of major brand gasoline in Detroit, did that price cutting by Ned's cause loss of gasoline business to the Wayne Oil Company's dealers?

Mr. Hanley: Pardon me just a minute. I am not sure I understood the first part of that question.

Trial Examiner Ballinger: Read the question.

(The question was read.)

Mr. Hanley: You are limiting that to Ned's only?

Mr. Austin: Limiting it to Ned's and Wayne Oil Company's dealers.

A. Well, certainly I could say that the general price cutting situation in Detroit affected the Wayne Oil Company's business.

By Mr. Austin:

Q. What other large prominent service stations are there that you can think of that deal in Standard Oil gasoline, other than Ned's?

A. Well, I wish I had a list in front of me so that I could look it over.

Trial Examiner Ballinger: Can you recall any now?

The Witness: I don't believe I can recall any quite as large as Ned's, if that is the type you want.

527 By Mr. Austin:

Q. Can you recall any quite as large as any one of Ned's stations; that is, are you referring to Ned's now as a group or as a single station?

A. I was thinking of them as a group when I made that answer.

Q. Are all of their stations large stations located on prominent intersections or on prominent highways?

A. Well, they are large institutions, but the gasoline end of the business, I think probably there are other stations around Detroit that do as much gasoline business as they do—

Q. But you can't think of—

A. —individually.

Q. —any other Standard Oil stations right now?

A. Well, no, not having paid as much attention to the rest of them as I do to my own, and mine are not that big.

Q. Well, you stated that there was price cutting that was going on at the end of '37 and early—at the end of '36 and early in '37, and that it increased during '37 and '38; is that correct?

A. I believe that is true.

Q. You mentioned four stations out of which only one, Ned's, was a Standard Oil station among the larger stations.

Now, do you recall any other Standard Oil station
528 where you saw discount signs or which you know to have been cutting prices as early? Did you know that that was true of Ned's?

A. Not offhand, I don't believe I can.

Q. Can you state whether Ned's was one of the first of the larger Standard Oil stations to reduce prices below the prevailing retail price?

Mr. Hanley: When?

Mr. Austin: Commencing the end of 1935 or the first of 1936, from that time on. I wouldn't attempt to say when it started.

A. Well, it would be my idea that they were among the first.

Mr. Austin: I think that is all I have.

Cross-Examination by Mr. Hanley.

Q. I have just a few questions, Mr. Ledbetter.

You were asked to get some information relative to deliveries of Ethyl gasoline in 1935 or '36. The volume of Ethyl which you were using or your stations were using at that time in relation to Red Crown was very small, was it not?

A. It was.

Q. Now, you have indicated that after you went into the wholesale business, you did not operate any retail

529 outlets until beginning September 8, 1939. You told Mr. Austin the location of the stations and the periods which you operated at retail since.

If I understood correctly, it appears that there were times since September, 1939, when you were directly operating a good many more stations than you are now; that is true?

A. That is true.

Q. And it also appeared that you were operating some of them for only a short time?

A. That is true.

Q. Will you please explain why it was that in September, 1939, you did go into the retail operation of some of the stations and why you ceased operating them as retail from time to time since?

A. The reason the Wayne Oil Company ever operated a retail outlet since it became a wholesaler was what I would term an emergency reason. The Wayne Oil Company never took over the operation of any of those stations until September 8th, 1939, which was just about the tail end of a series of very destructive price wars running over a period of two or three years, culminating about that time. These stations—or these dealers of mine, of course, never made the money during the price war that they could have made during stable times, and these stations that the 530 Wayne Oil Company started to operate were stations that were going broke, and you might say that the Wayne Oil Company took them over as a rescue proposition to keep the people in them eating.

Q. Well, your policy as a company has been and is today, is it not, Mr. Ledbetter, to confine your business to the wholesale operation and stay out as much as you can from the retail field?

A. That is true. We want no part of the retail proposition at all.

Q. Now, with respect to these price wars, so-called, from your experience and observation in the oil industry, those periods of destructive competition occur from time to time, do they not?

A. They do.

Q. And can it be fairly said that during those periods, that no one in the oil business, no matter what branch of the business they may be in, makes as much money as during the period of more stable conditions of prices?

A. That is true.

Q. It hurts everybody, I suppose?

A. It sure hurt me.

Q. As a matter of clarification, I would like to have you explain, Mr. Ledbetter, when you order a car of gasoline, say it is a 10,000-gallon car that you order, isn't it 531 true that you in all probability get 9,870-odd gallons or something like that, or maybe 10,230 gallons, due to the inage and outage?

A. That is true.

Q. So there is always up to several hundred of gallons more or less than the exact capacity of the car?

A. That is right.

Q. And a tank car buyer doesn't pay any attention to which way it is, the overage or the underage being not important to the tank car buyers?

A. Well, let me make this clear, that a 10,000-gallon car might not hold exactly 10,000. Whatever it holds, we get and pay for, whether it is under or over. They can't be built to hold exactly, I suppose, the exact amount that they are called for.

Q. At least, they never do?

A. They never have, anyhow.

Q. You were asked, Mr. Ledbetter, if you kept in close touch with the Standard Oil Company's business, and you were asked that question in connection with your knowledge of the tank wagon dealer price of the Standard Oil Company. As a matter of fact, that is a publicly posted price; anybody can ascertain what it is any day, can they not?

A. I believe that is true.

Q. And you just knew from day to day what it was, 532 didn't you?

A. I think I did.

Q. Well, you didn't have any such contacts with the Standard Oil Company, I assume, as would give them any opportunity to even make suggestions to you as to how you would operate your business, did you?

A. Will you read that?

Trial Examiner Ballinger: Read the question.

(The question was read.)

A. Well, I think I had the contact, but they certainly never suggested to me as to how I run my business.

By Mr. Hanley:

Q. In point of fact, you did run your business entirely irrespective of the Standard Oil Company, didn't you?

A. That certainly is true.

Q. Now, a great deal has been said here, Mr. Ledbetter, about price cutting and the prevailing retail prices in the City of Detroit. Is there any such thing as a prevailing retail price that you can point to and say that is the prevailing retail price.

A. At the present time?

Q. At any time. What do you mean by the prevailing retail price?

A. Did I use that term in my examination?

Q. No. Mr. Austin used it.

533 A. Well, if I was going to use the term "prevailing price," I would have to make my own definition of it.

Trial Examiner Ballinger: Well, what would be your definition?

The Witness: My definition, I believe, would be something like this: the prevailing price of any major product would be the price at which the majority of dealers were selling at at any given time; so far as I can see now, that would be my definition.

By Mr. Hanley:

Q. And it was that type of prevailing price that you had in mind, I assume, when you answered questions about price cutting that Mr. Austin asked you?

A. I don't recall the questions, and I don't recall the way in which that word "prevailing" was used in that question at the present time.

Q. Well, you were asked questions, several of them, Mr. Ledbetter, along this line: Was there a time when certain retailers of gasoline cut the price below the prevailing retail price? And you give some instances of such cuts. Now I am inquiring if, when you made that answer, or those answers, if the prevailing price that you had in mind was the type of prevailing price that you have now defined?

A. That is right.

534 Q. Then it would follow, wouldn't it, Mr. Ledbetter, that there might be a great many service stations handling any given brand of gasoline that were using various prices and yet some majority of the cases handling

that product would be on a given price which you would regard as the prevailing price?

Trial Examiner Ballinger: Read the question to the witness.

(The question was read.)

A. I believe that would be.

By Mr. Hanley:

Q. Then you did not mean to infer, I assume, Mr. Ledbetter, when Mr. Austin asked you about Ned's, that all of the retail stations in Detroit selling Standard Oil gasoline were on one price and Ned's was on another and lower price?

A. Well, no, I wouldn't have enough information to know.

Q. In point of fact, during the period when Mr. Austin says there was a price war, isn't it a fact that price cuts, premium offers, price cut advertising was indulged in by dealers in all brands of gasoline and what have been termed here off brands of gasoline?

A. Yes, I think that probably is true.

Q. You were asked if you hadn't driven past Ned's and seen a sign "2 cents off," heard radio advertising, and you were asked if you had seen that class of advertising
535 posted before any other service stations, particularly major brand stations, and, more particularly, Standard Oil stations.

You said you couldn't recall specifically. I want to ask you the reverse of that, Mr. Ledbetter. Isn't it a fact that during that time, when this so-called price war was in effect, that practically all service stations were advertising some sort of an inducement or offering premiums?

Mr. Austin: I would like to have that referred to a specific time.

Mr. Hanley: Well, I will refer it to a time that Mr. Austin defines as the price war period.

Mr. Austin: You would have to go back to my testimony to find that out.

Mr. Hanley: You put a lot of it, Mr. Austin. It was late in 1938 through the fall of 1939.

Mr. Austin: Well, I only referred to a price war as about five weeks prior to November 19, 1939. I am sure that is the only period which I characterized with the term "price war,'' but Mr. Ledbetter testified that there was increasing price cutting during 1938 and 1939.

Mr. Hanley: I will confine it to that period, Mr. Austin, if that will clear up the situation.

Mr. Austin: I would like to also say, if I may, if this is directed to my question, as you say it is, that
536 my question was only directed to Standard Oil stations.

Mr. Hanley: I asked for both.

Mr. Austin: I only asked that particular question on Standard Oil.

Mr. Hanley: And you asked as to both, but I want to ask as to both.

Well, I had better reframe the question, there has been so much said since I asked the question.

Trial Examiner Ballinger: The question is withdrawn?

Mr. Hanley: Yes.

By Mr. Hanley:

Q. Can you recall any station in the five-week period before November 19, 1939, in Detroit that wasn't posting prices or offering premiums or otherwise advertising as participation in the so called price war?

A. I think in that period practically every station in the city had signs out on prices.

Q. That applies to both the branded products and what have been referred to as off brand and non-brand?

A. I don't think a man could have found a station in the city that didn't have a price sign out at that period.

Q. And you were asked specifically if there wasn't a time about then when Ned's was openly advertising 2 cents off. Do you recall that?

537 A. No.

Q. Do you recall you were asked that?

A. I remember some question of that type, but I don't—

Q. It is true that many stations handling all kinds of gasoline were at least that much off at that time; isn't that true?

A. There was a period in there—just where to place it, I couldn't—where practically all stations got to advertising 2 cents off. That was their form of price sign, if I remember correctly.

Q. Now, conditions began to get more stabilized from a price standpoint, did they not, in the fall of 1939?

A. They did, yes, in November.

Q. There was a time about which you were asked, when the Standard Oil Company posted a price of 8.1 cents; do you remember that?

A. I remember the question, yes; I don't remember the price.

Q. Isn't it true that about that time all suppliers of gasoline raised their dealer prices?

A. It is my recollection of it.

Q. You didn't mean by any answer that you gave to the question that Mr. Austin put that the mere fact that the Standard Oil Company raised its dealer price was the thing that stopped the price war, did you?

A. No.

538 Q. It was a general condition, was it not?

A. It was.

Q. It was also a general condition that started the price war, wasn't it; it affected all the dealers?

Mr. Austin: Do you know what started it?

Mr. Hanley: I didn't ask that. Let him answer my question, please.

Mr. Austin: I am sorry.

Trial Examiner Ballinger: Have you any knowledge?

The Witness: I don't believe I would undertake to say what started the price war.

By Mr. Hanley:

Q. But there was a general condition affecting the whole industry in Detroit, wasn't there?

Mr. Austin: Now, I think that question is very capable of misunderstanding. Do you mean that the price war was a general condition, or do you mean a general condition caused the price war?

Mr. Hanley: I mean, wasn't the price war a general condition affecting the oil industry in Detroit?

By Mr. Hanley:

Q. Is that clear, Mr. Ledbetter?

A. Is that the question?

Q. Yes, sir.

A. I would say it certainly became that.

539 Q. There was some inference in the questions of Mr. Austin that the prices at Ned's Service Stations may have been responsible for starting this price war, without reference to what anybody else was doing. I will

ask you [illegible] you mean to infer by any answers which you gave to Mr. Austin, that you held Ned's Service Stations responsible for that general price war and condition that came to exist in Detroit?

Trial Examiner Ballinger: Did you have sufficient knowledge so that you could reach a conclusion?

The Witness: I don't think so.

By Mr. Hanley:

Q. You were in the retail operation prior to the organization of the Wayne Oil Company?

A. Yes, I was.

Q. You bought gasoline from the Standard Oil Company and certain other suppliers?

A. That's right.

Q. Did you buy some from the Hi-Speed people at that time?

A. Not at the beginning. That was later.

Q. There was a time when you were buying Hi-Speed?

A. Yes.

Q. And even at that early time, isn't it true that the Hi Speed was selling gasoline to you at one-half cent less than the Standard Oil price; at least at one station?

A. Yes; I was getting it less; just what the figures 540 were, I would have to look at the records to see.

Q. One other thing: You were asked about the physical possibility of putting an 8,000 gallon tank under a service station pump. You said, of course, it is physically possible. I will ask you if it isn't a fact that that sort of operation just simply isn't done; in Detroit or anywhere else, as far as you know?

Mr. Austin: He answered that question. I am sorry. I guess you can ask him over again, on cross examination.

A. It not only isn't done, but I don't see why it should be.

Mr. Hanley: That's all.

Mr. Austin: What was the last question?

(The question was read.)

Redirect Examination by Mr. Austin.

Q. That directly contradicts the answer you gave me, Mr. Ledbetter. I think you said awhile ago, it was done in a number of instances; there were tanks that size.

A. My answer to the last question, you would have to construe that as meaning a general proposition. I am not attempting to say it never was done, because everybody knows it has been done in isolated cases. That is the explanation of my answer.

Q. Then it has been done and is done in certain cases?

A. Yes; very isolated cases.

541 Q. If it is done in isolated cases, then there is no reason it couldn't be done if someone else wanted to do it?

A. I would like to say this: As a general proposition, it isn't done, and I see no reason, from a practical, economical standpoint, why it should be done.

Q. That is something else, as to reason.

A. Well, that's the answer.

Q. I am only asking you whether it has been done here, or can be done.

A. That is the impression I intended to convey by my last answer.

Q. Your impression you intended to convey, you see no reason for it?

A. No practical or economical reason.

Q. But you didn't intend to say it couldn't be done or hasn't been done?

A. No, I didn't mean that.

Q. A little while ago, Judge Hanley asked you whether periods of destructive competition do occur from time to time in the retail gasoline business. Do you recall that?

A. Yes.

Q. And you said, "Yes, they do occur"?

A. Yes.

Q. Do you mean that they do occur, or that they have occurred?

542 A. Well, using that language, I probably was referring to the past. I hope they don't any more.

Q. Did you think that it is necessary; that they always will occur, or is that part of what is to be expected; or that they are unnecessary?

A. I am sometimes rather pessimistic about it, I can tell you that.

Q. Did you intend to express it as your opinion that that is a natural cycle in the oil industry; that there must always be price wars; or were you referring only to what has happened?

A. I would say that that probably would be quite analagous to the philosophy that wars are always necessary in the world. Nobody knows. Every body hopes that they won't. I hope that there are no more price wars.

Q. What is the prevailing retail price for a house brand major gasoline today, in Detroit.

A. 16.3, I believe is the price.

Q. You don't have any trouble in stating that there is a prevailing price, do you?

A. Not right at the moment, I don't think.

Q. And don't you know that almost all gasoline stations, retail major gasoline stations in Detroit—that is, of major oil companies—are now posting that price?

A. That is my belief.

Q. And wasn't that true all during 1940?

543 A. Yes.

Q. And regarding responsibility for that price cutting situation, which you say increased during 1938 and 1939, in your opinion, was the reduction in prices or price cutting by those four stations which you mentioned, Ned's, Bright's, Hickey's, and Langer's, was the cutting by those four stations partially responsible, or responsible to a substantial degree, in your opinion, for the price cutting situation which developed in 1938 and 1939?

A. Well, I think I could say that it was responsible to a substantial degree.

Mr. Austin: That's all.

Mr. Hanley: Nothing further.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Trial Examiner Ballinger: We will have a recess for five minutes.

(A short recess was taken.)

Mr. Austin: Mr. Leake.

DOUGLAS LEAKE was thereupon called as a witness for the Commission, and having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

544 Q. Give your name and address to the reporter, please.

A. Douglas Leake, 4080 Pingree.

Q. In what business are you engaged, Mr. Leake?

A. In the retail gasoline business.

Q. How long have you been engaged in that business?

A. Since May, 1936.

Q. And what business were you in before that?

A. I was employed in the retail gasoline business by the Standard Oil Company; operating a station.

Q. Did you take over the operation of that station when the Iowa Plan was put into effect here?

A. I did.

Q. Have you operated it ever since?

A. Yes.

Q. Where is the station located?

A. At 7650 Grand River.

Q. Do you lease that station now from Standard Oil?

A. Yes.

Q. What is your rental?

Mr. Hanley: That is objected to as immaterial.

Trial Examiner Ballinger: Is that material?

Mr. Austin: Well, not particularly. I will withdraw it, if there is any objection to it.

Trial Examiner Ballinger: Unless it is material. Off the record.

(There was a discussion off the record.)

545 Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. What brands of gasoline do you sell, Mr. Leake?

A. Three brands; Solite with Ethyl, Standard Red Crown, and Stanolind.

Q. Are you familiar with stations in Detroit operated by Ned's Auto Supply Company?

A. I know they operate retail outlets.

546 Q. Where is the nearest Ned's station to you?

A. A mile and a quarter up the street, Chicago and Grand River.

Q. Is Grand River a through thoroughfare?

A. Yes.

Q. Is there a great deal of traffic driving up and down that street past your station and past Ned's station?

A. Yes, there is considerable traffic.

Q. Isn't that one of the thoroughfares that runs from downtown out into the suburbs?

A. Yes.

Q. During the latter part of 1937 and the first six months of 1938, do you know whether Ned's Grand River station was selling at a different price than you were selling at retail?

A. Yes, they were.

Q. Were they selling at a lower price?

A. Yes.

Q. Do you know how much lower?

A. Approximately 2 cents a gallon.

Q. Do you recall what your margin was between what you were paying for gas and what you were selling it for at that time on Red Crown?

A. In 1937?

Q. Yes.

547 A. 4 and a half.

Q. How long did that continue, approximately, up through the first six months of '38?

A. We maintained that margin through the first six months of '38.

Q. Did you reduce that margin around the middle of '38?

A. I think in the latter part of July, '38, we reduced that margin.

Q. What was your reason for reducing the margin?

A. The drop in business practically compelled us to become more competitive in order to do business.

Mr. Austin: I would like to have this sheet marked for identification.

(The document referred to was marked, for identification, "Commission's Exhibit 55.")

By Mr. Austin:

Q. I show you this paper marked Commission's Exhibit 55, for identification. Will you state what that is?

A. That is the retail sales of gasoline month by month for 1937, '38, '39, and '40.

Q. For your station?

A. For my station.

Q. Did you prepare that from your records that you have at your station?

A. I did.

548 Q. Is that correct to the best of your knowledge and belief?

A. That is correct.

Mr. Austin: I will offer this sheet in evidence.

Mr. Hanley: The general objection.

Trial Examiner Ballinger: Subject to the general objection, the document is admitted in evidence as Commission's Exhibit 55.

(The document referred to, heretofore marked for identification, "COMMISSION'S EXHIBIT 55," was received in evidence.)

By Mr. Austin:

Q. Now, this volume statement, Commission's Exhibit 55, Mr. Leake, shows a material falling off in your volume in the first seven months of 1938. I believe you just mentioned that?

A. That is right.

Q. During the period of the first seven months of 1938, did you lose a number of customers?

A. Yes, quite a number.

Q. That is, customers that had been buying gasoline from you ceased to buy during that period?

A. Yes, they did.

Q. And did some of those customers come in for 549 grease jobs or oil but not buy gasoline?

A. Yes, that is right.

Q. And I am referring now to customers who had previously bought gasoline from you.

A. Yes.

Q. Would that apply to customers who had been rather regular buyers of gasoline from you prior to this time?

A. Yes, it would.

Q. Did you have any conversations with any of those customers as to the reasons why they had ceased buying gasoline at your station?

A. Yes, I asked quite a number of them.

Q. What reasons did they give?

Mr. Hanley: Just a minute, please.

In addition to the general objection to the witness' testimony, we object to this question as being hearsay.

Trial Examiner Ballinger: The objection is overruled. Off the record.

(A discussion ensued off the record.)

A. The reasons that the customers gave me for discontinuing buying gasoline from our station was because they could buy it cheaper elsewhere, and they didn't see why I shouldn't sell it as cheap as the stations up the street.

Q. Do you remember specifically of any customers
550 stating they could buy cheaper at Ned's?

A. Yes, several customers stated that they could buy cheaper at Ned's.

Q. Did they say they were buying their gas there?

A. They told me they were buying their gas there.

Q. Did they say why?

A. They could buy it 2 cents less than I was selling it for.

Q. Do you remember any specific conversations with any particular customer at that time that you can recall?

A. Yes; I have got a couple in mind that I could name that I had specific conversations with during that period.

Q. I suppose you don't know the names of all of the people that buy gasoline at your station?

A. Oh, no, not all of them.

Q. Well, will you relate any such conversations that come to your mind and the names of the customers.

A. Well, I had a customer by the name of George Brundage, did considerable driving, was coming in for his grease jobs and oil drain, and previously had bought gasoline, and we used to try to sell him a tank of gas at the time he got his lubrication and oil drain. He said that he would have to quit buying gas from us, because he was buying it up at Ned's at 2 cents off. It meant quite a saving to him in his business inasmuch as he drove
551 over a thousand miles a week.

Q. Do you remember any other cases?

A. Another case was a fellow by the name of Mr. Maher, who lives right close to the station, about a block away. He drives about 1500 miles a week, and he claimed that he couldn't continue to buy gasoline from us, because it meant too much of a saving; he could buy it at 2 cents off at Ned's.

Q. Going over to 1940, did you have a customer who had been buying gasoline from you in 1940 or previous to 1940 by the name of Snyder?

A. Yes, I did.

Q. What is his business?

A. He is at the motorcycle department of the Police Department, rides for the Traffic Department.

Q. Does he also drive an automobile?

A. He drives his own personal car.

Q. Did you try to persuade him or solicit him to buy gasoline at your station in the summer of 1940?

A. Yes, I did.

Q. Did you have a conversation with him on that subject?

A. Yes.

Q. Will you state that conversation?

A. Well, we used to do a little talking about gasoline when he would stop into the station, and I solicited him for his business, and inasmuch as he lived close to the
552 station, and he was living out at the cottage about 40 miles from Detroit, driving back and forth to work.

Q. You mean in the summer?

A. In the summer. And was using quite a lot of gas, and I solicited him for his business, and he told me that he had given me his lubrication and oil changes, but he couldn't give me his gasoline business, because he was getting coupons up at Ned's, 2 cents a gallon, he could turn those coupons in on tires, batteries, or any other merchandise that he happened to need for the car.

Q. And did he buy any gasoline from you after that conversation?

A. No, he didn't buy any gas from me. He came in and got his car lubricated and also his oil changed two or three times, but he never bought any gas.

Mr. Austin: That is all I have.

Cross-Examination by Mr. Hanlen.

Q. Did you say your station was a mile and a quarter from Ned's?

A. That is right.

Q. Are there other service stations between your station and Ned's station on Grand River Avenue?

A. Yes.

Q. Do you know how many?

553 A. Not exactly, no.

Q. Well, your best judgment, just give us your estimate?

A. I would say about 12.

Q. Are any of them handling Standard Oil products?

A. Yes.

Q. How many handle Standard products?

A. Three.

Q. And they were handling those products during the years '37 and '38, '39, '40?

A. Yes.

Q. Out of these stations, were those not handling Standard Oil products handling what have been referred to as branded gasolines?

A. They all handled branded gasolines.

Q. Were you familiar in 1937 and the years following with the prices actually being charged by all of those service stations between you and Ned's?

A. No, not all of them.

Q. Well, do you know actually what any of them were charging?

A. I couldn't definitely say any particular price at any particular time, no.

Q. So far as you know, then, I take it, Mr. Leake, their prices may have been below the price you were charging?

A. It could have been.

554 Q. You just don't know that?

A. No.

Q. Do you know how many customers that had formerly been your customers you lost in early 1938?

A. No, I couldn't definitely say how many really I lost.

Q. You have named two who told you that they bought their gasoline at Ned's station. You lost more than two customers, I suppose?

A. Yes. The gallonage shows that.

Q. Do you know where the other customers went after they left your station?

A. Not all of them, no.

Q. Do you know whether they left your station simply because of your price on gasoline or for other reasons?

A. Not definitely, but I would say it was chiefly price at that time.

Q. Do you know whether or not they continued in all cases to buy Standard Oil gasoline or whether they may have purchased some other brand of gasoline after leaving your station?

A. I couldn't say that.

Q. About that time in early 1938 there was a great deal of price reducing by dealers in all brands of gasoline in Detroit, wasn't there, Mr. Leake?

A. That is right.

555 Mr. Austin: About what time was that?

Mr. Hanley: Early 1938.

By Mr. Hanley:

Q. In your judgment, you say it was probably price that influenced a good many customers that you lost; that is right?

A. That is right.

Q. You think it is more a question of price than brand?

A. Yes, I do.

Q. That is to say, Mr. Leake, do you think that if the price on, we will say, Sinclair gasoline was reduced substantially below the price that you were getting for Standard Oil gasoline, that it might influence the customer to change his brand to Sinclair gasoline at a cheaper price?

A. It would some people, yes.

Q. You are generally familiar with the conditions that existed in the retail gasoline marketing business throughout 1938 in Detroit, aren't you, Mr. Leake?

A. Yes.

Q. You were also familiar with conditions for a few years prior to that and a few years since?

A. That is right.

Q. You talked with other dealers from other—you talked with other Standard Oil Company dealers from time to time as well as dealers handling other products, I sup-556 pose; don't you, Mr. Leake?

A. Yes.

Q. I will ask you if it isn't true that so far as Standard Oil Company dealers were concerned in 1938, that there was a general falling off of business?

Trial Examiner Ballinger: Have you any personal knowledge?

The Witness: Not personal, no.

By Mr. Hanley:

Q. Well, did you gain such knowledge by your conversations with other people in the oil business?

A. Yes.

Q. What is the fact as to whether or not there was a falling off in all Standard Oil stations in 1938?

A. There was a general falling off of business in 1938, but some specific cases there was more than others. There was some instances where there were gains.

A. I don't suppose you know the over-all figure or percentage?

A. No, I couldn't give you that.

Q. The conditions in 1938 in the oil business were just very highly competitive in this city, were they not?

A. That is right, they were.

Q. Is this location where you are a business district?

A. Yes, it is all business district there.

557 Q. And there are a lot of service stations in that vicinity?

A. Yes.

Q. Within just a few blocks from you, are there not?

A. Yes.

Mr. Hanley: Off the record.

(A discussion ensued off the record.)

Mr. Hanley: I just want to have marked, for identification, this map, if you please.

(The document referred to was marked, for identification, "Respondent's Exhibit 1.")

By Mr. Hanley:

Q. I show you a map of Detroit, Mr. Leake, which has been marked Respondent's Exhibit No. 1, and show you a dot on that map with an arrow pointing to the number "3" and I will ask you if that correctly represents the location of your service station.

A. That is correct.

558 Q. Just one other question—and I may have asked you that, Mr. Leake: During 1938 is it not true that all over the city, and more particularly in your territory, you observed many stations advertising price cuts and premiums, and representing all sorts of brands of gasoline?

A. That is true.

Mr. Hanley: That is all.

Redirect Examination by Mr. Austin.

Q. Did that situation become worse towards the latter part of 1938, or the summer of 1938?

A. Yes. It became worse as the year went on.

Q. And was it as bad in 1937?

A. No, we didn't feel it as bad in 1937 as in 1938.

Q. One thing I forgot to ask you, and that was about the time that you reduced your price, which, I believe you said, was around the end of July, 1938—

A. That's right.

Q. —to what extent did you reduce it?

A. To the prevailing price at that time: the lowest competition.

Q. Lowest competition?

A. That's right.

Q. What was the lowest competition? I don't mean the amount; I mean, who was it?

559 A. In our territory, Ned's Auto Supply.

Q. Do you know of any other stations on Grand River, between yours and Ned's?

Mr. Austin: Withdraw that.

By Mr. Austin:

Q. Did any customers, during that period, tell you they were getting two cents off at any other station on Grand River other than Ned's?

A. No, they didn't.

Q. And did you make any farther price reductions; I mean, did you reduce your margin further at any other time after July, 1938, up to the end of 1939?

A. Yes. In the latter part of 1938, I believe it was the latter part of November or first of December, we made a further deduction.

Q. And then, did you continue that through 1939, up until the end of the price wars?

A. Yes.

Mr. Austin: That's all.

Recross Examination by Mr. Hanley.

Q. Referring to Commission's Exhibit 55, the statement of your gallonage, Mr. Leake, you show that your gallonage in the years 1939 and 1940 are both an increase over your gallonage in 1938, is that correct?

560 A. That's right.

Q. You raised your price in 1939 and 1940 over your low price in 1938, didn't you?

A. Yes.

Mr. Hanley: That's all.

Redirect Examination by Mr. Austin.

Q. Did the other stations in your neighborhood raise their posted retail price at the same time, at the end of 1939?

A. At the same time I did, yes.

Mr. Austin: That's all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

CHESTER MARTOGLIO was thereupon called as a witness for the Commission, and having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Give your address and name to the reporter, please.

A. Chester Martoglio.

Q. What is your business, Mr. Martoglio?

A. Operating a Standard Oil service station.

Q. Where is it located?

A. Hamilton and Collinwood; 11305 Hamilton.

561 Q. What brands of gasoline do you sell?

A. Standard Red Crown, Solite with Ethyl, and Stanolind gasoline.

Q. How long have you been in the service station business?

A. Since May of 1936.

Q. Was that the time that the Standard Oil ceased operating their own stations?

A. That's right.

Q. Were you a Standard Oil operator before that?

A. I was managing that station for the Standard Oil Company.

Q. How long?

A. Two years.

Q. Since 1936, have you leased that station from the Standard Oil Company?

A. I have.

Q. And do you purchase your gasoline from them by tank wagon delivery?

A. That's right.

Q. The present price is 8.1 plus taxes?

A. I don't know.

Q. What is the present price?

A. I wouldn't know. I haven't got it in my head. I don't know.

Trial Examiner Ballinger: I didn't get your answer.

562 The Witness: I don't know. I really don't have it on my tongue. I don't know what the present price is.

By Mr. Austin:

Q. I think we have it on the record, anyway, Mr. Martoglio.

A. I didn't look that up.

Q. Where is the nearest Ned's Auto Supply station to you, located?

A. Calvert and Woodward.

Q. How far is that from you?

A. Four blocks.

Q. Is that one of the nearest service stations to your location?

A. No, I have a Mobil gas station that is two blocks.

Q. And is that as large a station as Ned's?

A. Oh; no; and I have a few other stations that are closer than Ned's, too.

Q. Are any of them as large a station in facilities as Ned's?

A. No, they are not.

Q. Do you recall what margin you were selling gasoline at around the end of 1937 and early 1938, over the price that you paid?

A. Was that during the price war?

Q. During the first half of 1938. I won't call it a price war.

563 A. The first part of 1938 I got down as low as half a cent a gallon.

Q. When was that?

A. Around the first part of 1938.

Q. How long did that continue?

A. Only a few days; at that price.

Q. Then you raised your price again?

A. Then we raised it again, for a while.

Q. What was the address of Ned's station?

A. Calvert and Woodward.

Q. During the latter part of 1937 and first half of 1938, do you know whether Ned's was selling at a lower price than you were on Red Crown?

A. I have to explain something to you here. I don't remember whether that station was erected at that time. Ned's wasn't my competitor in my neighborhood at that time.

Q. Wasn't that station constructed in 193[illegible]

A. I don't remember that.

Mr. Austin: I know that appears.

Mr. Hanley: If you know, all right.

Mr. Austin: I am pretty sure that was one of the two that were opened in 1938, and I had forgotten, for the moment, myself.

(Counsel referred to documents.)

Mr. Austin: The Woodward Avenue station was
564 opened in 1938, according to Mr. Gershenson's testimony.

By Mr. Austin:

Q. What was the principal competition in erly 1938?

A. I had two competitors. I had L. Paul Taylor at Woodward and Davison, and Marvin Goldberg at Pingree and Grand River.

Q. What kind of gas did Taylor have?

A. Mobil gas.

Mr. Austin: Will you mark this paper for identification, please?

Trial Examiner Ballinger: The reporter will mark the paper Commission's Exhibit 56, for identification.

(The paper referred to was marked "Commission's Exhibit 56" for identification.)

By Mr. Austin:

Q. I show this sheet, Mr. Martoglio, marked Commission's Exhibit 56, for identification, and will you please describe what that is?

A. This is my gasoline gallonage for the years 1937, 1938, 1939, and 1940.

Q. By months?

A. By month.

Q. Did you prepare that for your sales tax records?

A. This was prepared for my sales tax records.

Q. Is that a correct statement, to the best of your belief?

565 A. To the best of my knowledge.

Mr. Austin: I will offer this statement in evidence.

Mr. Hanley: No objection, except the general one.

Trial Examiner Ballinger: Subject to the general objection reserved to counsel for the Respondent, the document is admitted in evidence as Commission's Exhibit 56.

(The document heretofore referred to, marked for identification "COMMISSION'S EXHIBIT 56" was received in evidence.)

By Mr. Austin:

Q. Now, when Ned's opened up their station on Woodward Avenue, do you recall the opening of that station?

A. I do.

Q. Do you recall that it was opened while you were doing business at your present address?

A. That's right.

Q. After they opened that station, did they sell gas at the same price you were, or at a lower price, on Standard Red Crown?

A. I can't answer that, and I can tell you why? Do you want me to?

Trial Examiner Ballinger: If you can't answer it.

By Mr. Austin:

Q. You don't know?

A. I don't know.

566 Q. During the year 1939, do you know, of your own knowledge, whether or not Ned's was selling at a lower price than you were?

A. The posted price, no.

Q. I am not referring specifically to the posted price. I am referring to what they charged customers, and if you are thinking of any discounts or premiums, you can describe what you know about what they were doing?

A. I do know they were giving coupons.

Q. When was that?

A. That was in 1939, and just about right on through.

Q. Have you had any conversations during 1939 or 1940 with any automobile owners who had bought gasoline from you and had ceased, or whom you solicited to buy gasoline from you, as to why they didn't purchase gas from you, and where they purchased it?

A. Yes, I have had quite a few contacts.

Q. When did you have such contacts?

A. This has been going on for the past six or eight months, but I had been noticing as they drive around, and stop them, meet them over at the bank, or over at the store, stopping them on the highway or some place, and finding out why.

Q. What was said?

A. I wasn't meeting competition with the coupons.

Q. What competition?

A. From Ned's, and lately, it is from other stations.

567 Q. What other stations?

A. Marvin's.

Q. Is that Marvin Goldberg?

A. That's right.

Q. You referred to lowering your price around the first of 1938 for a few days, and then raising it again, is that right?

A. Yes, sir.

Q. Now, going further on in 1938, when did you reduce your retail price again?

A. In July.

Q. And did you make any further reductions after that?

A. Only to meet competition. Whether I did, or not, I do not remember.

Q. What competition did you try to meet?

A. What has been called a prevailing price. At that time, on discount signs at stations, or the prices posted at the stations.

Q. You mean by the price cutting stations?

A. That's right.

Q. Did you try to meet that price?

A. Always.

Q. Why didn't you do that during the first part of 1938?

A. During the latter part of 1937, my station was being rebuilt, ~~remodelled, and I only~~ had the facilities of one
side of my pump island. While my station was in the
568 process of being rebuilt, price cutting started. I was
operating under such a disadvantage that I could not
meet competition at that time, because I couldn't handle
the customers when they came in. All I could do was sell
gasoline. Any oil drains or any other service, I had to do

on the driveway, which was partly cluttered up by the machinery and supplies.

When my station was opened, the week before Thanksgiving of 1937, for business, I kept on doing business under the old price, not meeting competition. I went along until January, 1938. I couldn't go along any further. My business had dropped to the point that I met competition.

Q. Was there any change in your volume after you cut price?

A. Very much so. It increased.

Q. Did your profits increase proportionately to your volume?

A. No, they didn't.

Q. Do you know what it costs you to sell a gallon of gasoline?

Mr. Hanley: That is objected to as immaterial.

Trial Examiner Ballinger: Do I understand there is an objection?

Mr. Hanley: Immateriality.

Mr. Austin: We are talking about injury to competition because one dealer gets a better price than another.

569 Trial Examiner Ballinger: The objection is overruled subject to the right to reserve, of counsel for the Respondent, to move to strike at a later date.

A. I know what it cost me to operate my station per day, and that's easily found, how much it costs me per gallon.

Q. But you don't know the gallon figure, offhand?

A. I have never figured it that way.

Q. When did you get into full operation again after you remodelled your station?

A. The week before Thanksgiving.

Q. 1937?

A. Right.

Q. And was your station facilities and equipment in full operation during the first half of 1938?

A. It was.

Q. Prior to the time you reduced the price; except for that few days?

A. It was; that's right.

Q. Was your net profit on gasoline, total net profit, greater or less per month, or however you figure it, after you cut the price, than before?

Mr. Hanley: Per gallon?
Mr. Austin: No.

By Mr. Austin:

Q. I mean, did you make more money selling gasoline after you cut the price and increased your volume,
570 than you did on a higher price and a lower volume?
A. No, I didn't.

Q. In other words, even though your volume increased, your profits didn't increase?
A. On gasoline, no, sir.

571 Mr. Austin: I believe that is all I have.

Cross-Examination by Mr. Hanley.

Q. Mr. Martoglio, I show you a map of Detroit which has been marked Respondent's Exhibit No. 1, and refer you to a spot on it indicated by an arrow numbered "1". I will ask you to say whether or not that correctly represents the location of your station?
A. It does.

Q. And that red circle with a dot in it numbered "6", does that correctly represent the location of Ned's service station you have been talking about?
A. Yes.

Q. Now, you are located on Hamilton Street, are you not?
A. That is right.

Q. And Ned's is located on Woodward Street?
A. That is right.

Q. Now, those two streets are each arterial highways in Detroit, aren't they?
A. That is right.

Q. And there isn't any cross traffic at any point between your station and Ned's station, is there?
A. Not a great deal.

Q. Now, Mr. Martoglio, did you ever regard Ned's Auto Supply Company as your only competitor in the oil business?
572 A. I never have.
Q. In Detroit.

You referred to I. Paul Taylor as being one of your competitors in your neighborhood?
A. Yes.

Q. He handles Mobil gas?
A. That's right, sir.
Q. He is located closer to you than Ned's, isn't he?
A. No, sir.
Q. Isn't he?
A. No.
Q. Where is the other Standard Oil station near you?
A. You mean the Standard Oil station nearest to me?
Q. Yes, sir. I thought you referred to one.
A. I did. But that is not the nearest one to me.
Q. Oh, I see.

Well, are there a number of Standard Oil stations close to you out there?

A. I think so.

Trial Examiner Ballinger: What do you mean by "a number"?

The Witness: Well, I have one that is 8/10 of a mile away; I have one that is just about another 8/10 of a mile away; I have one that is three blocks away; I have one that is four blocks away; I have one that is eight blocks 573 away, and I have another one that is about 14 blocks away.

By Mr. Hanley:

Q. Those are all Standard Oil stations?
A. That is right.
Q. That you are talking about?

Mr. Austin: Is that Ned's that is four blocks, that you mentioned?

The Witness: Ned's are four blocks.

By Mr. Hanley:

Q. Now, in addition to Standard Oil stations, I suppose you are also surrounded with everybody's else's stations, aren't you?
A. Every major brand.
Q. Do you regard all of those stations as being your competitors?
A. I do.
Q. Including the Standard Oil stations?
A. I do.
Q. Have you ever regarded Ned's as any special competition of yours, as distinguished from everybody else selling Standard gasoline and other brands of gasoline?
A. I have to one extent, just one.

Q. What is that, Mr. Martoglio?

A. I will have to mention the name of the Wilshire Hotel. That is at 3rd and Collingwood. I used to
574 derive enough business from that place to warrant my spending around $40 a year in advertising in that one hotel alone, and in the last year I have discontinued all advertising in that hotel because I only have four customers left, and it is one of the largest apartment hotels in that part of the city.

Trial Examiner Ballinger: Where has that patronage gone?

The Witness: Sir?

Trial Examiner Ballinger: Where has that patronage gone?

The Witness: Well, the ones that I have contacted have all gone to Ned's.

By Mr. Hanley:

Q. And where is that in relation to Ned's?

A. It is between my station and Ned's station.

Q. That is, it is within those four blocks?

A. That is right. That is right.

Q. That is the only instance that you had in mind where he was any specific competition?

A. That is the only instance where he has ever caused me any competition.

Trial Examiner Ballinger: That you know of?

The Witness: That I have made it a point to find out, yes, sir.

575 By Mr. Hanley:

Q. You haven't lost any of your gallonage during the years 1938 and '39? Your gallonage has kept up, hasn't it, Mr. Martoglio?

A. '38 and '39, the total yearly gallonage?

Q. That is what I mean.

A. The total yearly gallonage kept up.

Q. Yes. Indeed, it was better than it has been in 1940?

A. Very much so.

Q. Now, Mr. Martoglio, do you know the actual price of gasoline—do you know what the actual price of gasoline was at the various Standard Oil stations which you have mentioned being near you in 1938 and 1939?

A. I know the price of the one that I was watching at all times.

Q. Well, that wasn't Ned's?

A. No, sir.

Q. Do you know the price of any of the others, the actual price, I mean?

A. Yes, sir.

Q. All of them or—

A. No, no, by no means all of them, just the ones that I consider my competitors.

Q. Well, I mean that group around .8 of a mile. You named certain locations. Did you keep track of the
576 actual price of all those stations?

A. I didn't keep track of the actual price, no, but I kept track of whether they were underselling me or whether I was underselling them.

Q. That is, as to posted price?

A. Well, it was a posted price. The stations that hadn't cut their prices at that time, weren't posting their prices.

Q. Lots of stations didn't post their prices during that period?

A. That is right.

Q. Did they?

A. At the beginning, yes, sir.

Q. So that no one could know by driving by a station during the period—

A. Yes, you did know; you did know.

Q. —what they said the price was?

A. You did know. If you drove by a station, if he didn't have the price, he didn't have the customers. The station that had the price had the customers.

Q. I know. When you learned what the price was?

A. You didn't drive in unless you saw another one on the drive.

Q. Do you know what the actual prices were that were being charged for gasoline in the stations in your
577 vicinity in 1938 and 1939, which were handling brands other than the Standard Oil brands?

A. Definitely, no, I wouldn't know.

Q. You did mention this Mobil gas dealer, Mr. Taylor. Did you regard him as severe competition from your standpoint?

A. I did. I did, because Mr. Taylor happened to be the one that started the whole situation in my own neighborhood.

Q. Do you know whether any of these hotel people may have gone to him?

A. That I don't know.

Q. You don't know where they all went, I take it?

A. No, I don't.

Mr. Hanley: That is all.

Redirect Examination by Mr. Austin.

Q. When you said the Taylor station started the price cutting in your neighborhood, that was before Ned's station existed there, wasn't it?

A. That is right.

Mr. Hanley: Well, that wasn't—or were you through?

Mr. Austin: I am going on to some more, but if you want to ask on that particular point—

Mr. Hanley: No, no, I will wait.

578 By Mr. Austin:

Q. You just mentioned a Standard Oil station that you said you watched. Which one was that?

A. Marvin Goldberg's.

Q. And after Ned's station opened up, did Goldberg's and Ned's sell at about the same price, or do you know?

A. Well, the way I figured it, Marvin watched Ned's, and I watched Marvin's.

Q. You said that people wouldn't drive in those places unless they knew what the price was. Do you mean by that that there were signs posted at all the stations?

A. That is right.

Q. Advertising what they charged?

A. At the stations that were discounting, they posted their price, and the fellows that were not discounting, they didn't post their price.

Q. Now, at the end of 1939, in November, did you withdraw those signs and raise your price for Red Crown gas? Well, we will go back before that. How long did you have those signs up and how long did you keep them up?

A. Well, I do know this: I worked with a group of dealers to eliminate these signs at that time, and it got to the point where there was only two signs left in our neighborhood.

Q. Where were they?

A. My station and Marvin Goldberg's, and I had
579 to give in first. And then he wouldn't come down, and
I think it was one of the assistant prosecutors that had to go down and remove his sign.

Q. Well, in the first place, this time that you are just speaking of, when was that; do you know?

A. That was the end of '39.

Q. And since the end of '39 have you been selling at your posted pump price?

A. I think there was a short period of a few days in '40. I am not positive, though.

Q. Well, since about that time, all during 1940, what has been your price for Red Crown gasoline?

A. Well, it has been 16.3 for quite a long while. Now, how long that has been, I am not sure.

Q. Are there any stations in your neighborhood that have been having discount signs posted in their stations during 1940?

A. Yes, sir. Three days ago Marvin Goldberg had a sign in his station going north on Hamilton, 8 for $1.26.

Q. That is, Standard Oil station?

A. That is right.

Q. Is that just recently?

A. Three days ago.

Q. Aside from that, during 1940, were major gasoline prices stable or were they identical with the posted 580 prices in your neighborhood?

A. To my knowledge, they were.

Mr. Austin: That is all.

Recross Examination by Mr. Hanley.

Q. Please assume, Mr. Martoglio, that Marvin Goldberg, whom you watch, buys his gasoline at the same price that you pay for gasoline. Then when he reduces his price below yours or any others in the neighborhood, it would follow, wouldn't it, that he was just satisfied with a less margin?

A. You want me to answer that?

Q. That is, he is willing to take a less margin?

Trial Examiner Ballinger: That is the question asked.

A. I don't think he is willing to take a less margin. I think that he is trying to build up that business.

Q. Get gallonage?

A. Right.

Q. Isn't that a common practice among merchandisers of gasoline to reduce their margins in order to build their gallonage?

A. Not a common practice among merchandisers, a common practice among a few type of dealers.

Q. And you find that type of dealers handling all kinds of brands of gasoline, don't you, Mr. Martoglio?

581 A. They do.

Mr. Hanley: I think that is all.

Redirect Examination by Mr. Austin.

Q. You said that Goldberg's is now offering 8 gallons for $1.26, or did a few days ago?

A. Three days ago.

Q. If my arithmetic is correct, that would be 15¾ cents per gallons.

A. That would be 15.8 cents a gallon.

Q. In other words, that is a half cent a gallon cut below the prevailing price?

A. That is right.

Q. Do you consider a half cent a gallon cut a material cut?

A. I am not worried about the half cent a gallon cut.

Q. Well, just answer my question, whether you consider that is a cut which is large enough to affect competition?

A. Yes, sir.

Mr. Austin: That is all.

Mr. Hanley: That is all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Trial Examiner Ballinger: We will take a recess 582 for luncheon.

Now, at 1:10 P. M., the hearing stands in recess until 2 P. M.

(Thereupon at 1:10 o'clock P. M., a recess was taken, to reconvene at 2 o'clock P. M.)

583 Afternoon Session.

2 P. M.

Trial Examiner Ballinger: We will now stand reconvened at 2 P. M.

You may proceed.

Mr. Austin: Mr. Hawley.

CASH B. HAWLEY, was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. What is your name, please?

A. Cash B. Hawley.

Q. What is your address?

A. My home address is 18953 Westmoreland.

Q. Is that Detroit or Dearborn?

A. Detroit.

Q. In what business are you engaged?

A. Retail gasoline business.

Q. Do you operate a gasoline station?

A. I do.

Q. Where is that service station located?

A. At 19111 Grand River Avenue, Detroit.

Q. What products do you handle at that station?

584 A. Standard Oil products.

Q. Three brands of gasoline, Standard gasoline?

A. No, I have two brands; Red Crown and Solite with Ethyl.

Q. Do you handle any other brands of gas?

A. No, sir.

Q. Do you sell other products at the station besides gasoline?

A. I do.

Q. Oil and accessories?

A. Oil, accessories, batteries, and so forth.

Q. And you give service on automobiles that come in, such as grease jobs and washing?

A. I do; lubrication service, washing, and everything that goes with a super service station.

Q. How long have you been in the gasoline business?

A. It will be 11 years the 1st day of August of 1941.

Q. Have you operated that station at that address during that period?

A. I have.

Q. Are you a lessee of that station?

A. In a sense. I operate it in my own name, my own business. I lease the property.

Q. That's what I mean.

A. I lease the property from my supplier.

585 Q. And who is your supplier?

A. Wayne Oil Company.

Q. You buy all of your gasoline, then, from the Wayne Oil Company?

A. I do.

Q. And it is delivered to you in their trucks?

A. Yes, sir.

Q. Is your station located in what is known as Rosedale park?

A. That is right.

Q. And what is Rosedale Park?

A. Rosedale Park is a residential subdivision of Detroit out Grand River Avenue. The Rosedale name is a name that had been adopted even before my time out there and it has been carried through by civic activities. It is highly residential.

586 Do most of your customers out there, most of the people in Rosedale Park, drive automobiles; that is, the heads of the families? Do they drive downtown?

A. Yes. Most families there have two cars, I might say.

Q. Two cars in a garage?

A. That is right.

Q. That is not saying how many chickens in the pot?

A. I am not saying that.

Q. Well, do most of those people, or, at least, the men, drive down for business and back again?

A. Just about everybody, yes; very little street car riding public there.

Q. How far out from the center of town is that?

A. Well, it is about eleven miles, I would say, approximately.

Q. Is there a service station operated by Ned's Auto Supply Company on Grand River?

A. Yes, sir, there is.

Q. How far down is that from your station?

A. Oh, that is approximately half-way dow; I would say six miles or so.

Q. Do most of the customers who purchase gasoline at your station and who drive back and forth from the city, drive past Ned's station on their way out to Rosedale Park?

A. I would say that practically all of them.

Q. You consider Ned's a competitor of yours?

A. I do.

587 Mr. Austin: Will you mark this sheet, for identification, please?

(The paper referred to was marked "Commission's Exhibit 57" for identification.)

By Mr. Austin:

Q. I show you Commission's Exhibit 57, for identification, and ask you to describe it.

A. That is the record of the gallonage pumped at my station the years 1936, '37, '38, '39, and '40.

Q. Did you prepare that at my request?

A. I did.

Q. Was that prepared from your records that you have at your office?

A. It is actual sales.

Q. Was that prepared from sales tax returns, or from your own—

A. No, that is from my own sales records.

Q. Are the figures correct to the best of your knowledge?

A. Absolutely correct.

Mr. Austin: I will offer this in evidence.

Mr. Hanley: Just a general objection.

Trial Examiner Ballinger: Admitted in evidence as Commission's Exhibit 57.

(The document referred to heretofore marked for identification "COMMISSION'S EXHIBIT 57" was received in evidence.)

588 Trial Examiner Ballinger: Without repeating at all, these are being admitted subject to an objection reserved to counsel for the Respondent.

By Mr. Austin:

Q. During the latter part of 1937 and the first half of 1938, Mr. Hawley, do you know how the prices down at Ned's Grand River store compared with your prices?

A. Yes, they were selling two cents under me.

Q. How long did that continue?

A. Well, that continued—

Q. That is, how long did that two cent difference continue?

A. It continued right up. You mean, in comparison with my selling prices?

Q. Yes.

A. Up until about July 8, 1938.

Q. Just prior to July 8, 1938, do you remember what your retail price was?

A. I can't just recall the price.

Q. At that time, were you familiar with the price being charged by other Wayne Oil Company dealers for Red Crown gasoline?

A. Yes.

Q. Can you state whether your price was the same as the price charged by other Wayne Oil Company dealers at that time?

A. It was just about the same as the majority of them. I probably cut my price a little later, by possibly a 589 week or a few days than some of the rest of the Wayne Oil Stations; that is—

Q. Going back to, say, January, 1938, was your price the same? If you don't know, say so.

A. Yes, I would say it was approximately the same.

Q. You mentioned cutting your price. When did you cut that price?

A. I cut that price in July. I believe the date is the 8th.

Q. How much did you cut?

A. Two cents.

Q. Did that make your price the same as the price then being advertised at Ned's?

A. Yes.

Q. When you say "advertised at Ned's," you mean advertisements which you saw at that station?

A. Yes, the sign said, "Save two cents," I think.

590 Q. I show you Commission's Exhibit 57 and I see a little dot there next to the figure for July, 1938. Does that dot have any significance?

A. Yes. It draws attention to the trend of the increased gallonage, after cutting my margin.

Q. Was that the month when you cut your price?

A. July, 1938; that's right.

Trial Examiner Ballinger: Was your reduction a cash reduction or did you give rebate slips?

The Witness: No, it was a cash reduction to everyone.

By Mr. Austin:

Q. After you reduced your price in July of 1938 and your volume increased, did your profits on the sale of gasoline also increase?

Mr. Hanley: Are you talking about gallons?

Mr. Austin: Total profits on total gallons.

By Mr. Austin:

Q. That was the way you understood the question, wasn't it?

A. That's right.

Q. During the first half of 1938 did you notice any instances of customers who had formerly been regular customers at your station, ceasing to buy from you?

A. I did.

591 Q. Was that an unusual occurrence, or did it happen frequently?

A. It happened frequently but it was gradual; it kept getting worse up to that date.

Q. Up to the time you cut your price?

A. The gallonage will show several thousand gallons difference.

Trial Examiner Ballinger: Was that up to the date you cut your price?

The Witness: Yes.

By Mr. Austin:

Q. Did any of those customers come back after you cut your price?

A. They did.

Q. Did you have conversations with any of the customers who had ceased to buy gasoline from you and who had formerly been regular customers, as to why they had stopped buying at your station?

A. I always made it a point to try to find out the reason, and that was invariably the excuse for leaving—price. I can remember—

Q. What was the excuse?

A. That my price was too high. They were getting a discount down the street, you see, at Ned's, and also—

Q. Was it Ned's or someplace else?

A. I can relate a particular instance.

Q. Just answer that question, first. When customers
592 actually mentioned to you reasons for leaving you and they said it was a question of price, where were they getting a better price?

A. At Ned's.

Q. Were there other places, too?

A. There were other places, too.

Q. But was Ned's mentioned more frequently than any other one place?

A. Yes, it was, and there was a "Free Press" paper included, that Ned's was doing better than I was, after I met the price.

Q. You said you could mention some specific instances.

A. Yes. I think of one man now. He happens to be a lawyer, a customer of mine by the name of Lester E. Deeley, who told me himself that he traded at Ned's because of the 2 cent differential and also the "Free Press" in the morning.

Q. How did he happen to make that statement to you?

A. I made a special effort to regain his business and find out the reason for leaving us.

Q. And you spoke to him for the purpose of trying to regain his business?

A. I did.

Q. Any other instance of that sort that you can relate in detail?

593 A. There were several, but I can't at this time, think of the names. He happened to be a very close neighbor to my station and is foremost in my mind at this time.

Q. Have you had any instances in 1940 or of 1941, to date, of conversations with customers whose business you were soliciting or who had ceased to buy from you, where reasons were given why the customer did not purchase from you?

A. I have in mind one case where I solicited some business from a real estate salesman hoping to get several customers from one office, and I found that a station down the street, another Standard station run by the Citrin-Kolb Company, had offered this office a cent a gallon to get this group of salesmen.

Q. This man told you that?

A. This man told me that.

Q. Did he say he had been offered this?

A. He said the group of salesmen, including himself, had been offered it.

Q. Offered one cent off?

A. One cent off. That was the reason.

Q. Where is that station located?

A. At Glastonbury and Grand River.

Mr. Hanley: I don't understand just how this occurred.
I don't want to object on the ground of hearsay,
594 but this may be twice removed.

By Mr. Austin:

Q. Will you state who you talked to and what he said and you said?

In the first place, state what the subject of the conversation was; how it happened to come about.

A. Well, Mr. Ralph Lamb, a real estate salesman for a Harry J. Durbin Company, who has an office right between my station and the Citrin-Kolb station. I was getting some of the wash business from Mr. Lamb, and I was wondering of him why I couldn't get the business of all these salesmen from that office, and this was his answer, as to why he thought I wasn't getting it.

Q. I think I will have to ask to restrict yourself to what he said as to why you didn't get his business and not as to why you didn't get the other people's business, because I would have to agree with Mr. Hanley that that would be a little too far removed, but you can state what this man told you as to why you didn't get his business.

A. I couldn't say in as many words that he was accepting the cent, because he only said it was offered there; whether that was the excuse or not.

Q. Did he say that was why he didn't buy from you?

A. He did say I couldn't expect to get the business
unless I met that competition so I more or less dropped
595 it, thinking I would not meet that competition.

Q. Were you talking about getting his business, also, or just the other people in the office?

A. Oh, yes; his business also; his business first.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Will you just state again what this gentleman told you about the situation, about the Citrin-Koib station?

A. He told me that the manager of this station came over to that office and solicited the business of that office at 1 cent discount, and that was the reason that I couldn't expect the business.

Q. Now, did you continue to cut your price down to the same price being advertised at Ned's station during the rest of 1938 and all of 1939?

A. I did continue to meet that competition. I did continue to meet that competition until the latter part of 1939 when there was a leveling off on the part of everyone. I was still meeting competition, but there was a—

Q. Was that the time you just referred to, the time that the Wayne Oil Company raised its tank wagon price to you to 8.1; was it some time in November?

A. I think it was; in November. Yes, it was in November.

596 Q. And since that what has your posted price been?

A. The posted price between that time and, I believe, July of 1940 was 15.8, there being a half cent Federal tax added in July, 1940. From that time on to this it has been 16.3.

Q. And have you at any time given any discount off that price, or any premiums or rebates?

A. I have not.

Q. Have you been familiar during the last few years with the gasoline prices charged along Grand River on Major brand gas?

A. I have.

Q. In 1936 were the posted prices below the prices charged at your station the rule or the exception on Grand River?

A. Just state that again, please.

Mr. Austin: Read the question.

(The question was read.)

A. I would say at that time it was the exception.

Q. Were there any stations on Grand River in 1936 down as far as Ned's station that were offering 2 cents below the price charged at your station?

A. I don't believe there were in, at least, the first part of 1936. I just can't remember the exact—

Q. When did Ned's begin to offer a price 2 cents 597 below the price you were charging?

A. Shortly after the first part of 1936 or right after the time the Iowa plan came into effect. '37 it was more prominent.

Q. You mean more prominent at Ned's or more prominent at other stations?

A. More prominent at Ned's and kept stretching out.

Q. What do you mean by more prominent at Ned's?

A. Well, more people knew of Ned's discounting.

Q. How do you know that?

A. I have had occasion to talk to lots of dealers during that time and since then.

Q. Did they have signs out at that time in '37?

A. '37, yes.

Q. And is it the best of your belief, based upon your personal observation, that Ned's was the first station on Grand River, at least, the part of Grand River between Ned's station and your station, to cut prices 2 cents a gallon?

Mr. Hanley: I don't have any objection if he answers what he knows about it.

Mr. Austin: He said he was familiar awhile ago with the prices charged down there, generally familiar.

By Mr. Austin:

Q. Now, I want to know whether you feel that you 598 can state positively, and if you can't, say so, whether there were any other stations on Grand River cutting 2 cents a gallon prior to the time Ned's advertised that cut?

A. I feel I can state positively that Ned's was absolutely the first. That is the way I feel about it.

Mr. Austin: That is all.

Cross-Examination by Mr. Hanley.

Q. Mr. Hawley, I hand you a map of Detroit marked Respondent's Exhibit 1, for identification, and ask you if you will, please, to put a dot at the point where your service station is located.

A. Right here (witness does as requested).

Q. That is in Detroit, isn't it?

A. Yes, sir.

Q. In Rosedale?

A. Rosedale Park.

Q. Which is just a designation—

A. It is just a civic association.

Q. You purchase your gasoline from the Wayne Oil Company and you pay the regular posted dealer price, Mr. Hawley?

A. The regular tank wagon price?

Q. Tank wagon dealer price.

A. Yes.

599 Q. And that has been true for a number of years past and it is true now, isn't it?

A. Yes.

Q. I believe you said you were about six miles from Ned's Grand River station?

A. That is approximately correct.

Q. You are both on Grand River?

A. That is correct.

Q. Are there a large number of service stations between your place and Ned's on Grand River?

A. Yes.

Q. And I presume a large number between Ned's and the downtown Detroit area?

A. Yes.

Q. Does that include both stations dealing in Standard Oil products as well as stations dealing in many other brands of products?

A. That's right.

Q. About how many stations are there on Grand River between your station and Ned's? I mean total number irrespective of what they handle.

A. I wouldn't guess.

Q. Haven't you any idea at all?

A. There is a great number.

Q. Would there be as many as several hundred, would you think, Mr. Hawley?

600 A. Oh, no, I wouldn't say several hundred.

Q. Well, I just want some approximate figure. Would there be as many as 200, would you think?

A. I don't believe so.

Q. As many as 100?

A. That is possible.

Q. About how many stations are there in that area between your place and Ned's who handle Standard Oil products?

A. Oh, offhand, I would say eight or ten.

Q. And are there other Standard Oil stations in your immediate vicinity?

A. There is one now.

Q. And that one is very close to you, isn't it, Mr. Hawley?

A. Two blocks.

Q. How long has that station been there?

A. I think that opened up business about, I would say, October or November, 1939. I believe that is correct.

Q. What is the next nearest Standard Oil station to you?

A. Oh, a little better than half a mile.

Q. Are there stations close to you within a matter of a few blocks that handle other brands than Standard Oil products?

A. There is another station about the same distance out further, and then others about twice the distance
601 toward town. You understand—

Q. What distance are you referring to in that answer?

A. In other words, I said the other Standard Oil station closest to me was about two blocks. There is a Gulf station two blocks above me going away from town. There is a Texaco station about four blocks toward town.

Q. Now, at the point on Grand River where your station is located, is it a business or a residential district?

A. More residential.

602 Q. For quite an area about your station?

A. All around the station.

Q. Are you located in the center of quite an extensive residential area?

A. Practically the center of Rosedale Park.

Q. And that is primarily a residential section, I think you said.

A. That is right.

Q. You made the statement in answer to the question, that you regarded Ned's as your competitor?

A. That is right.

Q. Were you referring to Ned's Riverview station about six miles further in towards town?

A. Not Riverview, but Grand River station.

Q. Grand River. I am sorry.

A. Yes.

Q. Do you regard Ned's as your only competitor in Detroit?

A. No.

Q. Was there a time when the Montgomery, Ward Company opened a store, or, at least, added a gasoline-selling business to some store of theirs, somewhere in your vicinity?

A. Yes, sir.

Q. And when was that?

A. I can't just remember the date, but I believe it was in the Fall of '39.

603 Q. How far away from you is that station?

A. Between a mile and a half and two miles.

Q. And in what direction?

A. Toward town.

Q. On Grand River?

A. Their gasoline station is off of Grand River.

Q. How far?

A. Their store is at the corner of Grand River and Greenfield Road, and their entrance to the gas station is off of Greenfield Road about, oh, I would say, what would be an ordinary three-quarters of a block, or something like that.

Q. What kind of gasoline do they sell?

A. I don't know.

Q. Are you acquainted with a Langer station between your location and Ned's on Grand River?

A. I am acquainted with the station that used to be Langer's.

Q. Maybe that is the one I am talking about. I don't know.

A. I imagine it is.

Q. What kind of gasoline does it sell?

A. Texas; Texaco.

Q. What is the fact as to whether or not the Montgomery, Ward station, after it went into business (1939), began to sell gasoline at two cents off the so-called prevailing retail price?

A. I know nothing about that.

604 Q. What do you know, if anything, about the price that was being charged at the Langer station or this Texaco station that we have referred to?

A. That station was built several years after the starting of this price cutting.

Q. Well, when was it built, approximately?

A. I don't know exactly. It has been a few years. They seem—I might say that they seem to do just whatever Ned's done. It is a station of that type.

Mr. Hanley: I move to strike that answer, Your Honor.

Trial Examiner Ballinger: Read the question, and answer.

(The last question and answer were read.)

Trial Examiner Ballinger: Beginning with "They seem—", from there on the answer may be stricken; the motion is granted.

By Mr. Hanley:

Q. Now, Mr. Hawley, when was the time that you first knew of any service station in Detroit giving two cents off the so-called prevailing retail price?

A. The noise of the door, then—what was the first part of the question?

Trial Examiner Ballinger: Read the question.

(The question was read.)

605 A. In 1936.

Q. What time in 1936? I think you said early in 1936, in answer to some question of Mr. Austin's, and I wish you would fix it as definitely as you can.

A. I can't tell you, definitely. I believe it was the forepart or middle, somewhere along there. It is too long to remember exactly.

Q. Are you familiar with the so-called Joy and Zip string of stations?

A. I know them when I see them.

Q. Do you know anything about their prices?

A. Well, I know they have always been lower than a major brand gasoline.

606 Q. And they were much lower than 2 cents off the prevailing retail price of the so-called major gasolines for many years last past, weren't they?

A. I believe so.

Q. And they were below that 2 cents off in 1936, weren't they?

A. I don't think Joy was operating then.

Q. Well, Zip, then?

Mr. Austin: Your Honor, I feel that I would like to make an objection on the record to a continuation of questioning on the prices charged by off-brand gasolines in view of the fact that it has been proved without dispute that those gasolines have always sold at a lower price and don't have the same public acceptance, and in view of that I don't think it is material as to what prices that gasoline sells at, and further reasons, all my questions on direct examination were limited to prices of major brand gasoline, although I wouldn't object on that ground if this is purely to test the knowledge of the witness, but I do urge the ground it is immaterial to the case as a whole.

Trial Examiner Ballinger: The Examiner isn't able to see the materiality of this line of examination, but as no objection was interposed, he assumed it was material.
607 I would like to hear from counsel for the Respondent.

Mr. Hanley: It is material on our case, your Honor. We do not agree with counsel that there is no dispute at all that this gasoline isn't in competition in the city of Detroit and propose to follow that presentation through this case.

Trial Examiner Ballinger: If that is your contention.

Mr. Hanley: It does affect competition very materially in Detroit.

Trial Examiner Ballinger: The objection is overruled with the right reserved to counsel for the Commission to move to strike the testimony.

Mr. Austin: Thank you. I would like to note an exception to the overruling of the objection.

Mr. Hanley: Do you have to do that in a proceeding before the Commission, Mr. Austin?

Trial Examiner Ballinger: The Examiner will state you may have an exception to any of his rulings without formal notations on the record.

Mr. Hanley: May we have the last question read?

(The question was read.)

By Mr. Hanley:

Q. What is your answer to that?

A. I think so.

608 Q. Now, when you made the answer that your first knowledge of this 2 cent cut below the prevailing retail price came to you in early 1936, I assume you didn't have in mind your knowledge of the Zip stations, for instance, but were referring to major gasolines; is that true?

A. I was referring to major gasolines.

Q. What has been your knowledge as to the existence of a reduction of 2 cents below the generally prevailing retail price in Detroit since it first came to your attention in 1936?

A. I might say it has been gradually getting worse, up to 1939. Does that answer your question?

Q. I think so. And has that practice been prevalent and increasingly so from 1936 up to 1939 in many service stations in Detroit handling many brands of gasoline?

A. Price war naturally spreads.

Q. Well, can you just answer my question directly, please, Mr. Hawley?

A. I am afraid you will have to put the question again.

Trial Examiner Ballinger: Read the question.

(The question was read.)

A. I believe so.

By Mr. Hanley:

Q. Since 1939 has that practice, to your knowledge, been indulged in in Detroit? I want to know what you know

609 about that, Mr. Hawley.

A. It has been indulged in very secretly.

Q. Do you know that?

A. Yes.

Q. And how do you know that?

A. By having different dealers show me cards of courtesy or whatever they call them.

Q. Did you ever buy any gasoline yourself at that reduction at any station in Detroit?

A. No. I witnessed receipts.

Q. But you didn't yourself buy any?

A. I didn't pay for the gasoline.

Q. You put your price back up some time in the fall of 1939, didn't you?

A. That's right.

Q. You no longer met even the so-called secret rebates that may have been existing since then; which you believed did exist?

A. I didn't meet any secret rebates.

Q. As a matter of fact, you were meeting a general and prevailing condition, were you not, in 1938 and 1939?

Trial Examiner Ballinger: Are you speaking now about the major companies' price?

Mr. Hanley: Yes.

By Mr. Hanley:

610 Q. You may understand that that refers to major brands of gasoline.

A. Yes.

Q. The answer to the question is yes?

A. Yes.

Q. You haven't found any necessity for reducing your price, have you, since the fall of 1939?

A. No, sir.

Q. You referred to the fact that a number of customers left you in 1938. Do you know where they all went?

A. I don't know the exact spot that they all went.

Q. How many customers left you, if you know?

A. I would say about 20% of my gasoline buying trade.

Q. Can you give us any idea of the number of persons that would be?

A. That's a little difficult.

Q. Can you give us any idea about it?

Trial Examiner Ballinger: He is asking for a rough approximation.

By Mr. Hanley:

Q. That's all. I don't want to tie you to any definite figure, Mr. Hawley. I know perhaps you haven't got that in mind.

A. I would say approximately 50 customers.

Q. Now you have told Mr. Austin that one of

611 those—you named him—told you that he went to Ned's; is that correct?

A. That's right.

Q. How many others, if any, told you where they went?

A. There were several told me that they went to Ned's. Others told me that they stopped at Langer's and I can't just recall some of the other stations that had broken down between Ned's and my station, in the meantime, but they were stopping somewhere where the prices broke down.

Q. And about that time—I am now referring to 1938, the middle of 1938—one driving from downtown Detroit to the location of your station would pass several hundred stations in that eleven miles, wouldn't they?

A. That is right.

Q. And at about that time in most of those stations it was possible to buy at this greatly reduced price, wasn't it, of major brands of gasoline?

A. Yes.

Mr. Austin: What period was that in that question?

Mr. Hanley: In 1938; about the middle of 1938.

By Mr. Hanley:

Q. You so understood it, didn't you?

A. I think so.

Q. As a matter of fact, do you know what the actual price of gasoline was between your location and Ned's location on Grand River at any time in 1938?

612 A. Do I know what the actual price was?

Q. What the actual price was.

A. I am afraid I would have to refer to the record to get the actual price.

613 Q. Do you know whether gasoline was being sold actually in other Standard stations first, above or below what you were selling gasoline for up until July, 1938?

Trial Examiner Ballinger: Do you understand the question?

The witness: I think I do.

A. The majority of Standard stations were meeting Ned's.

Trial Examiner Ballinger: Ned's price?

The Witness: Yes.

By Mr. Hanley:

Q. How do you know they were meeting Ned's and not somebody else? Do you wish to leave the impression here that Ned's is the only service station in Detroit that cut the price?

A. No, the first.

Q. You say, Mr. Hawley, that Ned's Service Station was the first station that reduced the price below the generally prevailing price in 1936?

A. Yes, I think so.

Q. Well, do you know?

A. I think—

Mr. Austin: I would like to ask whether this still relates to Standard stations. Your first question along this line was restricted to Standard.

Mr. Hanley: No, I am talking about all service 614 stations.

The Witness: Yes, I will say yes, for all service stations.

By Mr. Hanley:

Q. How many service stations are there in Detroit?

A. Approximately 2,900.

Q. Are you willing to say positively that you know that none of those stations were selling below the generally prevailing price in 1936, until Ned's offered this two cent receipt?

A. I wouldn't know the exact selling price of 2,900 gasoline stations.

Q. I wouldn't think so, Mr. Hawley.

Are we to understand from that answer that you do not know that Ned's was the first?

Trial Examiner Ballinger: You may answer that within your knowledge.

A. Within my knowledge, I think they were the first.

By Mr. Hanley: You think they were?

A. Within my knowledge they were the first, if you want it that way.

Q. Well, perhaps we can get at it this way: Were they the first you knew anything about?

A. That is what you asked me, what I knew. That is right.

Q. You keep telling me what you think, so I am trying to make it a little easier for you, Mr. Hawley.

615 A. Yes.

Q. Was that the first station that you knew anything about?

A. Yes.

Q. Are you referring to this two cent receipt that was given with the purchase of gasoline at Ned's, when you talk about a two cent cut?

A. It was given—you are talking about what date? What time?

Q. Well, the time you say you knew about the reduction, until you say it ceased to exist in 1939.

Trial Examiner Ballinger: Do you understand the question?

The Witness: I am afraid not.

Trial Examiner Ballinger: Read the question.

Mr. Hanley: I will withdraw it.

Trial Examiner Ballinger: Question withdrawn.

By Mr. Hanley:

Q. How was this two cent reduction given at Ned's, that you were referring to, Mr. Hawley?

A. Cash reduction, if that is what you mean, instead of a rebate.

Q. I want to know what you understood it to be.

A. It was a cash reduction. They was buying at a lesser price.

Q. Do you mean by that, that if there was a posted
616 price of, say, sixteen cents, that the customer was only charged fourteen cents?

A. That is right.

Q. And he only handed—

A. I am not positive about the posting.

Q. —the attendant fourteen cents?

A. I am not positive about what was posted, but they was buying two cents under the so-called prevailing price.

Q. Well, assume that the prevailing price, then, was, we will say, twenty cents, for example. Is it your understanding that a customer could go into Ned's station and buy a gallon of gasoline for eighteen cents?

A. Yes.

Q. And would he just hand the attendant eighteen cents, and that would be the end of the transaction?

A. That is right. That is my understanding.

Q. Now, has that been your understanding that the way that this two cent reduction at Ned's has been given?

A. They have had several different procedures of discounts.

Q. I am talking about this period now you referred to when you said your price was reduced.

A. Yes.

Q. That is the way it happened?

A. Yes.

Q. All right. What was your margin before you
617 cut your price in 1938?

A. Four and a half cents.

Q. What was your margin after you raised your price in the Fall of 1939?

A. Three cents, I think. Three cents is right.

Q. And has it remained the same since that time?

A. It is 3.3 now.

Q. During the period from 1938, when you cut your price, to the Fall of 1939, the price of gasoline all over Detroit for major brands was greatly reduced below what the price had been prior to July, 1938, wasn't it?

A. All over Detroit?

Q. Yes.

A. Yes.

Q. And that was true in practically all service stations handling practically all brands of gasoline?
A. Practically.

Q. Do you know anything about what the so-called non-brand gasolines were selling for, in relation to that cut-branded gasoline price during that period?
A. I don't remember.

Q. They were below it, were they not, however?
A. Yes.
Mr. Hanley: That is all.

618 *Redirect Examination by Mr. Austin.*

Q. With reference to further reductions in price in 1939, particularly in the summer and fall of 1939, which you said just now that such reductions existed all over Detroit, that is, the price then was lower than it was in '38, there were reductions in the tank wagon prices to the dealers by all major oil companies in the Fall of '39, were there not?
Mr. Hanley: Fall of '39?
Mr. Austin: Yes.

By Mr. Austin:

Q. Do you remember the Standard Oil Company—or that the Wayne Oil Company reduced its tank wagon price in the Fall of '39?
A. That is right.

Q. Do you recall that that same reduction in posted tank wagon prices was made by major oil companies?
Mr. Hanley: I don't think it went down.
Mr. Austin: It went down in November.
The Witness: It went down first—
Mr. Hanley: You fix the time, then.
Mr. Austin: I am speaking about prior to November.
Mr. Hanley: Oh, That is all I want.
A. The dealer's price went down to the public ap-
619 proximately—or I will say exactly three cents, and the dealer stood 1.7, if I remember correctly.
Trial Examiner Ballinger: And that continued until what date?
The Witness: That continued until about November 19th.

By Mr. Austin:

Q. And you made another statement, that Standard Oil dealers on Grand River, or practically all of them, are meeting Ned's—or were meeting Ned's prices in 1938?

A. That is right.

Q. Would you be a little more specific about that? Is that the Fall or the summer, or the beginning of 1938 that that was true?

A. Oh, I would say shortly after the first quarter of the year, 1938.

Q. And the price reductions became rather general after the first quarter?

A. That is right.

Trial Examiner Ballinger: Did it continue throughout the year?

The Witness: Yes.

By Mr. Austin:

Q. How about the first quarter?

A. You asked the question, more prevalent?.

620 Q. I am asking now, yes—I am asking you to explain the statement you made about the Standard Oil dealers on Grand River meeting Ned's price. I wanted to know when they started to meet Ned's price, or whether they always did meet Ned's price.

Mr. Hanley: I object to that.

A. They started immediately.

Mr. Hanley: And move that all the testimony of that character be stricken, if there is, in fact, any in the record, for the reason that this witness has shown no qualification to testify as to the reasons motivating other dealers on Grand River, in establishing whatever prices they did. Indeed, he has testified he doesn't even known how many dealers there were on Grand River, handling Standard Oil products.

Mr. Austin: If the question is subject to that interpretation, let me make it clear that when I talk about meeting Ned's price, I am talking about whether it was the same price as Ned's, or whether it was not, not the purpose.

Mr. Hanley: I wish you would so state in your questions then.

Mr. Austin: Didn't you ask him that question first?

Mr. Hanley: I asked him if there wasn't a general cut in the price, and that was what happened.

Your Honor, it is just the implication here in all
621 of these questions, that the only reason for this situation was that Ned's was the only villain in Detroit, out of these three thousand odd service stations.

Trial Examiner Ballinger: Read the question.

Mr. Austin: I will withdraw it, Your Honor, if I may, and then start over again.

Trial Examiner Ballinger: Let's have the question.

(The record was read.)

Mr. Austin: May I strike the last question, Your Honor?

Trial Examiner Ballinger: Strike the question.

By Mr. Austin:

Q. I understood you said, Mr. Hawley, in response to a question asked by Mr. Hanley, that the Standard Oil dealers on Grand River, between your and Ned's, were selling at a price which was the same, or about the same, as Ned's price in the summer of 1938. I will change that. You simply said in 1938 that they were charging a price which was about the same price as Ned's, and I want to know whether, when that became true, that most of them were selling as low as Ned's? Was it true the first of the year, or did it become true the middle of the year?

A. Just prior to the time I cut. You said most of them?

Q. Yes. Well, that is what I wanted to find out. Then the first of 1938, were the majority of them selling at a
622 price as low as Ned's?

A. I wouldn't say the majority.

Q. Some of them were?

A. Some of them were.

Mr. Austin: That is all.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Recross Examination by Mr. Hanley.

Q. You did say, did you not, Mr. Hawley, that you became aware of this two cent reduction at Ned's in the early part of 1936?

A. Yes.

Q. And is it your testimony that from that time on, you became more aware of more price cutting throughout the Detroit area, with particular intensity in 1938, and up to the Fall of 1939?

A. That is right.

Mr. Hanley: Does that clear it up?

Trial Examiner Ballinger: Continuing?

Mr. Hanley: Yes, sir.

Mr. Austin: Yes. I understood the testimony to be Ned's started in '36, but as to the dealers, these last few questions were as to '38, and I think that is clear from what you have said.

623 Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: When did you first commence price cutting?

The Witness: July, 1938.

Mr. Austin: That is all, Mr. Hawley.

Mr. Hanley: That is all.

(Witness excused.)

624 Trial Examiner Ballinger: Call your next witness.

Mr. Austin: Mr. Maloney.

WILLIAM H. MALONEY was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. What is your name, please?

A. William H. Maloney.

Q. And what is your address?

A. 16872 Snowden.

Q. What is your business, Mr. Maloney?

A. Retail gasoline dealer.

Q. Where is your service station located?

A. Michigan and Wyoming.

Q. Is that 9515 Michigan?

A. Yes.

Q. Where is that; just this side of Dearborn?

A. It is right at the Detroit and Dearborn city limits.

Q. Do you own your station or lease it?

A. Well, I don't own it, no. I lease it.

Q. Who do you lease it from; Standard Oil or not?

A. No, Stikeman Oil.

Q. Are they a Standard Oil Jobber?

625 A. Yes, sir.

Q. You buy your gasoline from Stikeman Oil?

A. Yes.

Q. What brands do you handle?

A. Two brands of Standard and Ford Benzol.

Q. Do you handle Red Crown and the Solite Ethyl?

A. Yes, sir.

Q. How long have you operated that station?

A. Well, since 1938 up to the present time I have been operating it, and then from 1936, I think from about the middle of 1936, to 1938 I was out of there, and then I believe I took the station over in 1933; 1933 to the middle of 1936.

Q. How did you happen to drop out in 1936?

A. I had some financial difficulties, not pertaining to the gasoline business.

Q. Was the station operated by someone else from 1936 to 1938?

A. Yes, it was.

Q. And you took it over again under lease from Stikeman in 1938?

A. That's right.

Q. What do you pay now for your gasoline from Stikeman?

A. I am working on a 3.3 margin. That would be 16.3 and 3.3 would be 13.

626 Q. You pay 13, including taxes; that is, including the Michigan sales tax?

A. No. Wait. That's right, there is the sales tax.

Q. If you deduct the sales tax from 13 cents you would have what you pay, wouldn't you?

A. Yes—maybe it is 12.5, 12.6. I don't know what it is.

Q. Anyway, your margin is 3.3.

A. That's right.

Q. How long has that been true?

A. That has been true from July, when they put the—I believe when they put the extra half cent in the Federal tax.

Q. Wasn't your margin 3.3 before that? The tax didn't affect your margin, did it?

A. I know; but there was— I guess it was.

Q. Did you raise your retail price a half a cent a gallon when that new tax came in?

A. No.

Q. You didn't?

A. I raised the retail price a half a cent July 1; yes; when the tax went into effect.

Q. In that case, then, your margin was just the same as it was before?

A. 3.3.

627 Q. How near are you to the Ned's Auto Supply station in Dearborn?

A. About a mile.

Q. You are both on Michigan Avenue?

A. Yes, sir.

Q. You are a little nearer downtown than Ned's; is that right?

A. That's right.

Q. In 1936 or 1937 or 1938 did you ever find out from your own investigation or from what you saw yourself that Ned's was selling at a lower price than you were?

Mr. Hanley: He wasn't in business then.

By Mr. Austin:

Q. I am sorry. You were out from 1936 to 1938.

A. That's right.

Q. Do you remember what your monthly gallonage was before you left the station in 1936?

A. Yes, I do. It was around between twelve and 15,000 gallons.

Q. And when you came back to the station in 1938 and again took it over from the previous operator, what was the gallonage of the station at that time?

A. Say about 5,000.

Q. You mean there was a drop of 10,000 gallons a month?

A. Yes.

628 Q. Do you remember what your margin was on the price that was being charged when you took the station over in 1938?

A. I think it was four and a half cents.

Q. Do you remember what the price was?

A. What price are you talking of?

Q. The retail price that you charged customers.

A. At that time it was—I don't remember offhand.

Q. Do you generally keep track of the margin rather than the actual price?

A. After all, the margin is what we are interested in.

Q. That's what I was trying to bring out. That is why I asked your margin first, because I thought you might remember it better over that length of time.

How long did you continue to sell on a four and a half cent margin after you came back in 1938?

A. About one month, approximately.

629 Q. And what part of 1938 was that?

A. I took over the station for the second time the 23rd of January.

Q. Toward the end of February—

A. Around about March.

Q. About March you reduced your price?.

Trial Examiner Ballinger: That was March, 1938?

The Witness: Yes.

By Mr. Austin:

Q. How much did you reduce it?

A. Two cents a gallon.

Q. What was it that made you reduce it two cents instead of some other amount?

A. I knew the station should pump more gallonage than it was pumping during the month of February, 1938, because I had had the station before. I knew that the station had better possibilities than that; pumping 5,000 gallons.

Q. Did your gallonage increase after you reduced your price?

A. Yes, it did.

Q. During that month, before you reduced your price, in 1938, did you get around and see or talk to any of your old customers you had in 1936, to find out what happened to them?

A. I occasionally would run across them; once in a while, yes.

630 Q. Do you remember any conversations you had with any of them as to why they weren't still buying at that station?

A. Yes, but most of the time it was just poor management. That was why they weren't coming into that station at that time.

Q. I was going to ask you, the reasons given, weren't a number of them, that they didn't like your predecessor?

A. That's right.

Q. Did any of them talk to you about discounts?

A. You mean, approach me for a discount at that time?

Q. Either that, or ask you—well; did any of them approach you for a discount?

A. I don't remember of any at that time.

Q. Did any of them that you went to find out why they had left that station since 1936, did any of those customers say it was because the price was too high?

A. I didn't call on any. I just happened to run across them on the street. That station out there is mostly transients. There aren't many people out there.

Q. Michigan Avenue is a through thoroughfare, isn't it?

A. Yes, sir.

Q. Does it go out all the way through Dearborn?

A. Yes.

Q. Aren't other residential suburbs beyond Dearborn?

A. Yes.

631 Q. I am not familiar with how far Dearborn goes.

A. On Michigan Avenue, a half mile west, there is no residential section at all there. On Michigan Avenue there is, a few blocks south, about fifty houses.

Q. It is a business section along through Dearborn, isn't it?

A. It is vacant property through here.

Q. On Michigan Avenue?

A. Yes.

Q. When you get on further past your station into Dearborn, isn't there a business district?

A. That is further out; a few blocks the other side of Miller Road; about a half mile out west of my station is where the business section starts.

Q. And isn't there a business and residential section out that way, both sides of Michigan?

A. Yes, sir.

Q. Do these people drive past your station on the way downtown?

A. Yes, sir.

Q. And is there a business section and residential section out beyond where Ned's is located?

A. Yes, sir.

Q. You said that you started cutting your price two cents a gallon in March, 1938?

632 A. That's right.

Q. Did you make any further cuts after that?

A. You mean, more than two cents a gallon?

Q. Well, a lower price than what it was after you cut the first two cents?

A. I never cut below two cents. I just followed in line with the others.

Q. You mean, you never cut more than two cents off the prevailing price?

A. That's right.

Trial Examiner Ballinger: Did I understand you to say you were merely following the others?

The Witness: That's right.

Trial Examiner Ballinger: Is that the reason you first cut your price two cents?

The Witness: Well, I knew that that station should do more business than it was doing, and I just took it for granted that it must be on account of a lot of the stations selling at two cents less.

Trial Examiner Ballinger: You just assumed that?

The Witness: Yes.

By Mr. Austin:

Q. Do you know whether Ned's was selling at a lower price than you were in February of 1938?

A. He was, yes.

633 Q. How do you know that?

A. I passed by the station two or three times a day. I would see the signs up there.

Q. Then you do know, at least, Ned's station was selling below what your station was selling at, when you first took it over in 1938?

A. That's right.

Q. How long has your present price been at a 3.3 margin?

A. Oh, I imagine about a year and a half.

Q. From around the last part of 1939?

A. About that, yes.

Q. Have you observed the posted prices on other stations on Michigan Avenue since the time I just mentioned; that is, in the last year and a half?

A. Yes, I have.

Q. What are the posted prices at those stations now?

A. Most of them are seven for $1.14; that's 16.3.

Q. Does Ned's have the same posted price now?

Trial Examiner Ballinger: If you know.

A. I don't know. I don't know if he has got a sign up there, or not.

Q. When did you last notice it?

A. I think he has got a sign up there now.

Trial Examiner Ballinger: Have you noticed the price posted on the sign?

634 The Witness: Yes, I noticed the posted price on the sign is the same I am selling, the posted price that he has there.

By Mr. Austin:

Q. Have you solicited business from any customers during the last year, or since the first of 1940, who told you the reasons why they would not buy at your station?

A. I recall one man, a street car man. He passes by my station every day.

Q. Is he a street car motorman?

A. Yes.

Q. What is his name?

A. I don't know. I know him by sight; that's all.

635 Q. I see. Well, go ahead.

A. He passes by the station every day or so, and I talked to him and I approached him one day in regard to his business, and he told me that I couldn't compete with where he was getting gasoline; therefore, I didn't get any of his business, and he told me he was getting his gasoline at a particular place, Ned's.

Q. Did he give any reasons why he bought it there instead of buying it at your place?

A. Why, it was the price.

Q. What did he say?

A. Well, that his price was cheaper than the price that I had been selling to him.

Q. Did he tell you how much cheaper?

A. 2 cents.

Q. A gallon?

A. Yes, sir.

Q. And just about when was that conversation held?

A. Well, let's see. That was, oh, approximately about a year ago, I would say.

Mr. Austin: I think that is all I have.

Cross-Examination by Mr. Hanley.

Q. Mr. Maloney, I hand you a map of Detroit marked Respondent's Exhibit No. 1, for identification, and
636 call your attention to a dot on the map indicated by an arrow with a circle numbered "4" and will ask you if that represents the location of your service station.

A. Yes, it is.

Q. Did it come to your attention within a short period after you took this station over in early 1938, that a great many service stations selling many different brands of gasoline were selling below the price that you started out to post when you took the station over?

A. Did you say did I notice that?

Q. Did it come to your knowledge.

A. Yes, it did.

Q. And as a result, I think you have said you decided you would cut your price and try to increase your gallonage?

A. That's right.

Mr. Hanley: That is all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: We will have a five minute recess.

(A short recess was had.)

Trial Examiner Ballinger: Come to order. Call
637 your next witness.

Mr. Austin: Mr. Ruehle.

CHARLES F. RUEHLE was thereupon called as a witness by and on behalf of the Commission, and having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Give your full name to the reporter.

A. Charles F. Ruehle.

Q. Where do you live, Mr. Ruehle?

A. 1108 Nottingham Road.

Q. What is your business?

A. A retail gas dealer.

Q. Do you operate a service station?

A. That is right.

Q. Standard Oil service station?

A. That is right.

Q. Where is it located?

A. 184 West Davison and 3rd.

Q. How long have you been doing business at that address?

A. Since April, 1937.

Q. Do you purchase your gasoline from the Standard Oil Company?

A. I do.

638 Q. Do you lease your station from the Standard Oil Company?

A. No.

Q. Do you lease it from somebody else?

A. Yes, sir; DeMarr Brothers.

Q. Are you in business by yourself or is it a partnership?

A. I am in business by myself now. When we first went up there, it was a partnership.

Q. Who was the partner?

A. Hayward F. Barnes.

Q. Did you yourself go into that station, that is, were you there personally helping in the operation of that station in April, 1937, or did you go in later?

A. Well, I was there part of the time, but not very much of the time. I had a station downtown on Cass and Canfield that was in the process of being closed out and I stayed there until we disposed of that station and then I went up to 3rd and Davison.

Q. Well, down at Cass and Canfield, were you in the gasoline business there, or was—

A. Well, yes, we did. There was gasoline business there, but it was a minor part; the tires was the major part at that time.

Q. What gasoline did you handle down there?

A. I had Mobilgas in there.

Mr. Austin: I would like to mark this paper, for 639 identification, if your Honor please.

Trial Examiner Ballinger: The reporter will mark the paper, for identification, Commission's Exhibit No. 58.

(The document referred to was marked, for identification, "Commission's Exhibit 58.")

By Mr. Austin:

Q. I show you Commission's Exhibit 58, for identification, Mr. Ruehle, and ask you whether you can describe the contents of that document.

A. That is the records of my gallonage from '38 on.

Q. Does that start at the time that you closed your station at Cass and went up to this station?

A. Approximately so, yes, sir; approximately so.

Q. And does that gallonage record—was that compiled from the sales tax reports or other records at your office?

A. Well, yes, both. You might say they are both identical.

Q. Is that a correct statement of the gallonage sold at that station during the time shown?

A. Yes.

Mr. Austin: I offer this gallonage statement, Commission's Exhibit 58, for identification, in evidence.

Trial Examiner Ballinger: Admitted.

(The document referred to, heretofore marked, for identification, "COMMISSION'S EXHIBIT 58," was received in evidence.)

640 By Mr. Austin:

Q. When you went up to this station on Davison Street to actively assist in operating it in February of 1938—that is correct, isn't it?

A. Yes, sir.

Q. —was Red Crown gasoline being sold at that station at the prevailing retail price?

A. Yes, it was.

Q. And by prevailing retail price, what margin do you mean?

A. Why, I believe it was 4½. I am not positive about that, but I think that was the margin at that time.

Q. What was the gallonage at that station as shown by that exhibit in February, 1938?

A. 17,328.

Q. Did you reduce your price in March of 1938?

A. It was either the very last of February or the first of March we put out a sign, reducing 2 cents.

Q. Will you read from the exhibit what the gallonage was during March, April, May, and June?

A. 23,452 in March; 25,432 in April; 40,000 in May; 32,439 in June.

Q. During that period did you continue to keep that price reduction in effect?

A. You mean from March?

641 Q. Through June?

A. Through June? Yes.

Q. How much of a price reduction did you make in March?

A. That was 2 cents. It was 2 cents all the way along.

Q. Were there other service stations near you that were making that same 2 cent reduction during that period?

A. Yes, it was quite prevalent with some of the larger stations.

Q. Where was the nearest station to you operated by Ned's Auto Supply station?

A. Right now Calvert and Woodward.

Q. When did that station open?

A. I think that opened early in the summer of '38.

Q. Now, I carried you through June of '38. After the end of June, 1938, did you then raise the price? When did you next raise the price at your station?

A. In July of '38 we raised the price. There was some of our friendly competitors came around and said it was a bad situation, which we agreed with, and we agreed to raise the price.

Q. Who were those friendly competitors?

A. Well, there was Mr. Ferguson and Chet Martoglio and—I just don't remember; that is two of them. There were about six or eight, I should say.

Q. And did you then raise your price back to what 642 it was in February?

A. Yes, we did.

Q. Was that about the 1st of July?

A. About, approximately; yes.

Q. And how long did you keep that price in effect?

A. It was about the whole month. Not the entire month, but very close to it.

Q. And what was your gallonage for July?

A. 19,311.

Q. That is as shown by the exhibit?

A. That's right.

Q. What was the gallonage for the previous month?

A. 32,439.
Q. Did you again reduce your price?
A. We did. Then it became prevalent all over the city. Almost everybody went into it.
Q. You mean the price cutting?
A. The price cutting.
Q. Did you lower your price again at the end of July?
A. We did, yes.
Q. Back to where it was in June?
A. That's right.
Q. Do you recall whether there was any change in the tank wagon price you paid along during that period?
A. I don't believe so. I wouldn't be positive, but I don't think there was.
643 Q. Just to be clear: when you say the price in July was the same as February, and the price in August was the same as in June, do you mean the actual price you charged or—
A. I mean whatever the prevailing price was, we cut 2 cents, we discounted 2 cents from what you might call the posted price, the going price, except in July.
Q. When you didn't cut?
A. That's right.
Q. Then how long did that cut continue that you started in August of 1938?
A. Then it continued until February, 1939.
Q. In February, 1939, did you take over the sole operation of that station?
A. I did, yes.
Q. Did you raise your price in February, 1939?
A. Well, it seems to me there was a differential in price there but what we did was sell at the regular posted price. In other words, any discounts were cut out. Discounts were eliminated. I haven't any notation here as to the price the gas was selling at. However, we were selling at posted price about the last of February, 1939.
Q. Were the other service stations of the major oil companies in your neighborhood giving discounts from the prevailing price?
644 A. Prior to that?
Q. No, after February, 1939.
A. I think the situation was pretty well cleaned up. There may have been some, but most of them were selling at posted price; the going price.

Q. You are talking about February, 1939.

A. That's right, yes.

Q. After February, 1939, were there reductions in the tank wagon price, which you paid for gasoline?

A. I believe so, but I just can't remember all the fluctuations that there were from time to time.

Q. Were there changes in price you paid and in the price at which you sold during 1939; particularly in the fall?

A. I couldn't say offhand. I just don't definitely remember. There were price changes there, but just when they occurred and what they were, I wouldn't definitely remember.

Q. After February, 1939, and continuing through 1940, have there been instances where customers who previously bought gasoline regularly at your station, ceased to buy from you, or where they began to come in and get oil and grease jobs but didn't buy gasoline?

A. Yes, there was that, quite a bit of that. We have quite a few customers that have their cars lubed there and have them washed, but still don't buy any gas.

645 Q. Is that true up to the present time?

A. That is true up to the present time, yes.

Q. Have you discussed with any of those customers why they don't buy gas?

A. Yes, I have some.

Q. Can you recall any particular instances of a conversation of that sort?

A. Well, I recall one instance; Mr. Bevins. He has become a friend just through knowing him in the station, and he just came in and I said, "What's the matter with your business?" And he said, "Well, I get a better price down at Ned's. What am I going to do?" So there you are.

Q. When was that?

A. This was four to six months ago; one of the evenings I happened to be on.

Q. Do you have any other cases of that sort?

A. Very few of them will say where they are getting it, but a good many of them have said, "Well, your price is wrong; we can buy better elsewhere," and we just let it go at that.

Q. Do they say where?

A. No, they don't say where, and I never press them.

Q. Do you recall any other particular customers?

A. There was a Mr. Krause and a Mr. Cardinal. I don't know where they are buying.

646 Q. They might be buying some place besides Ned's, then?

A. They may, as far as I know; yes.

Mr. Austin: That's all.

Cross-Examination by Mr. Hanley.

Q. Mr. Ruehle, I will get you on the map, too, please!

A. All right.

Q. I hand you a map of Detroit marked Respondent's Exhibit No. 1, for identification, and will ask you if you will please put a dot at the point where your station is located; I mean the station that you have been operating since 1938.

(Witness does as requested.)

Q. Mr. Ruehle, isn't it true that about the middle of 1938 the generally prevailing retail price of branded gasoline in Detroit became a price about 2 cents less than the generally prevailing price had been prior to that time?

A. Well, the posted prices remained the same, but 2 cents discounts were almost universal.

Q. The actual prevailing price was just two cents lower?

A. That's about right; yes. Substantially.

Q. That was true in a very great many stations, was it not?

A. That is true, yes.

Q. And those stations represented all branded gasolines in Detroit?

647 A. I would say so, yes, sir.

Q. It is your recollection that the low price situation righted itself pretty well about February, 1939?

A. Yes, sir.

Q. You have told Mr. Austin that some of your customers were lost to you during 1938; is that right?

A. No, not through 1938. We maintained our customers pretty well, then, because we were discounting, with the exception of July.

Q. When did you lose your customers?

A. After 1939; after February, 1939, there was a gradual loss after that, after the 2 cent discount was definitely off.

Q. With the exception of Mr. Bevins, do you know where any of those customers went?

A. Well, that's pretty hard to determine.

Q. He is the only one that told you?

A. He is the only one that came right out and told me. We might have our suspicions, but that's all.

Q. As a matter of fact, they could have gone to a good many places and bought gasoline cheaper than you were selling, couldn't they?

A. No, not after that time. The situation was pretty well cleaned up. There was comparatively little discounting.

Q. Are you referring now to Standard Oil gaso-
648 line or all brands of gasoline?

A. I am referring to all major brands of gasoline.

Q. There has been some testimony here that this thing didn't shape up to a stabilized point very well until about the middle of November, 1939. What have you to say about that?

A. As far as my records and recollection, I feel that it was pretty well straightened out after February. You see, I took over at that time.

Q. As far as your experience went?

A. Yes; that's my experience.

Q. Did you get any new customers after February, 1939?

A. Well, we lose them and make them. The thing is static.

Q. Do you figure you have about as many customers now?

A. No, I don't think I have. I know I haven't.

Q. You say that there is some flux in the number of customers at the station; some leave and new ones come in?

A. That is true.

Q. It is true all the time in most any station, isn't it?

A. That's right.

Q. You have stated, also, that you lost some since February, 1939, and you also gained some new ones since that date?

A. Yes.

Q. Now, I want to know if there have been any times since February, 1939, when you had as many cus-
649 tomers as you did have in February, 1939; in your judgment.

A. Do you mean gasoline customers?

Q. Yes.

A. I don't think so. I don't believe so. I think that as far as the gas angle, I have lost customers. It shows here by my gallonage.

Q. Your gallonage has come down, you mean?

A. That's right, and it is pretty hard to just say how many customers. I wouldn't know today how many customers. I have a mailing list. I know what that is, but they are not all customers.

650 Q. Now, there are other Standard Oil stations close to you?

A. Yes, there are.

Q. What is the nearest one to you?

A. I would say the nearest one is about three blocks over on Davison, three or four blocks over.

Q. Who operates that?

A. I don't even know him.

Q. And the next nearest?

A. Well, then, there is one down Third, about six or seven blocks down.

Q. Are there stations near you within a few blocks, handling other brands of gasoline?

A. Yes, there is stations all around me.

Q. Is Paul Taylor somewhere near you?

A. He is two blocks, Woodward and Davison.

Q. Is the Carnick Oil Company station somewhere near you?

A. Carnick? Yes, they are down on Woodward, three blocks down, I believe it is.

Q. They handle Gulf gasoline, don't they?

A. That is right. I don't believe it is Carnick any more. I think they call it the Post Service now. It has changed hands, I believe.

Q. Do you know whether they were giving discounts after February, 1939?

A. No, I do not.

651 Q. Do you know whether they are giving them now, or not?

A. No, I don't.

Mr. Hanley: I believe that is all, Mr. Ruehle.

Mr. Austin: That is all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Trial Examiner Ballinger: Call your next witness.

Mr. Austin: Mr. Tanski.

MR. JOSEPH TANSKI was thereupon called as a witness for the Commission, and having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Give your name and residence to the reporter, Mr. Tanski.

A. Joseph Tanski, 6448 Schaeffer Road.

Q. Are you in the gasoline business, Mr. Tanski?

A. Retail gasoline.

Q. Do you operate a retail gasoline service station?

A. At 3201 Mulkey Avenue, Dearborn.

Q. Dearborn?

A. Dearborn.

Q. Is that near the Ford plant?

A. Right back of the Ford plant, or in front of it.

652 Q. What brand of gasoline do you sell?

A. Standard Oil Red Crown, Ethyl, and Ford Benzol.

Q. Where do you buy your gasoline?

A. Standard Oil Company.

Q. How long have you operated that station at that address?

A. Since 1930, December.

Q. What was your business prior to that?

A. I worked for the Standard Oil Company.

Q. At a service station?

A. Service station operator.

Q. Did you become a lessee from the Standard Oil Company in 1930, or do you lease your station?

A. I own my own property and my own station.

Q. You own your own property. You have a contract with the Standard Oil Company?

A. I think I have. I haven't signed no contract for five or six years, but I believe I have. I understand a contract, if it is not signed, it automatically goes into a contract, anyway. I don't know about that. I couldn't say. I haven't signed one for a long time.

Q. How far are you from Ned's Auto Supply Company, Dearborn store?

A. Oh, less than two miles.

Q. Are there other Standard service stations closer to you than Ned's?

653 A. Two.

Q. Where are they?

A. Maloney, at Michigan and Wyoming, and I don't recall the man's name that runs the station at Ruder and Michigan.

Q. Is that Maloney the man that testified here today?

A. Yes, sir.

Q. Are either one of those stations in the same direction from you as Ned's?

A. Well, I am in kind of a funny spot there. I wouldn't say—

Q. Well, you are off Michigan Avenue, aren't you?

A. I am off Michigan Avenue.

Q. And is the traffic passing your station largely employees of the Ford plant?

A. That is right.

Q. And is it or is it not true that most of the traffic past your station from the Ford plant goes over to Michigan Avenue?

A. Well, the Michigan and Wyoming— or Michigan and Schaeffer, rather, is the center of Dearborn, and they all have a reason to go there because it is a main shopping district of Dearborn; regardless of where they live in Dearborn.

Q. Is Ned's station located near that center, too?

A. Ned's station is located a block from Schaeffer 654 and Michigan.

Q. Do you ever go over that way yourself?

A. Every day.

Q. You live on the other side of Michigan, don't you, from your station; that is, you have to cross Michigan every time you go to your home from your station?

A. I do.

Q. And do you live on Schaeffer?

A. I live on Schaeffer. I used to live right on Maple. I used to pass Ned's station all the time.

Q. When was that?

A. Oh, three, four years back.

Q. Did you frequently pass Ned's station in 1937 and 1938?

A. I passed Ned's a lot in 1937 and '38.

Q. In 1936?

A. In '36, also. I lived on Maple.

Q. Was that Dearborn store opened in '36, or was it there before that?

A. I imagine the Dearborn store has been there about ten, eleven years.

Q. In 1936 and '37, did you ever notice any discount signs posted at Ned's?

A. I wouldn't say about '36, or neither would I say about '37, but I would say in '38.

Q. The first of '38?

655 A. All of '38, most all of '38.

Q. You don't recall prior to that time?

A. I can't recall. I was too busy tending to my own business.

Q. And did Ned's Auto Supply Company ever distribute circulars or literature advertising in your neighborhood, advertising the cut prices?

A. Not to my knowledge.

Q. In 1937 what was your margin of operation between buying price and selling price of Red Crown gasoline?

A. I just can't remember. In '37 it was four and a half. That is right.

Q. And in '37 do you know what price Ned's was selling at?

A: No, I don't. I would have to look that up, according to my own selling price.

Q. Do you know whether it was higher or lower than the price you were selling at?

A. It was lower, with their secret two cents off.

Q. What?

A. It was lower, with their secret two cents off.

Q. Do you know they were giving two cents off?

A. Only from what customers would say.

Q. Customers of yours?

A. Yes, sir.

Q. How did you happen to have any conversations 656 with customers on that point?

A. Well, I have a Principal of the Dearborn School buying from me now, that asked me, and, by the way, the name is Mr. Hotchkiss, and asked me if I would discount to all the school teachers of Dearborn, and if I could, I would get all their business, which I didn't do; but he happens to be selling fire insurance and I need fire insurance for my building, so I am getting his business only through the fire insurance.

Q. Since when have you been getting his business?

A. Nearly all the time that he asked me—I have bee buying the insurance all that time.

Trial Examiner Ballinger: Did he tell you anything about any discounts at the other places?

The Witness: Yes, at Ned's. He asked me if I could meet Ned's discount, which I didn't want to.

Trial Examiner Ballinger: When was this that he told you?

The Witness: This was in—late in '37.

Mr. Austin: If Your Honor please, I would like to have this paper marked, for identification.

Trial Examiner Ballinger: The reporter will mark the paper "Commission's Exhibit 59", for identification.

(The paper referred to was marked "Commission's Exhibit 59", for identification.)

657 By Mr. Austin:

Q. Will you describe this paper, marked Commission's Exhibit 59, for identification?

A. Yes, them are my records for '37, '38, '39, and '40

Q. Your records of your monthly gallonage?

A. Monthly gallonage, total for the year.

Q. What does that include?

A. That includes '37, '38, '39, and '40.

Q. I mean, what gasolines?

A. Red Crown, Ethyl, and Benzol. That is the total of all gasolines.

658 Q. It includes Ford Benzol?

A. Ford Benzol, also.

Q. About what percentage of your sales are Ford Benzol?

A. About 40%.

Q. 40%?

A. Yes.

Q. When there has been any variation in your monthly gallonage, has the variation been about the same on the Benzol and on the Standard gasoline?

A. I wouldn't say that. I think that the variation was a little tougher on Standard gas.

Q. You mean when your volume goes down that it goes down more on Standard?

A. More on Standard than it does on Benzol.

Q. And when it goes up, it goes up more on Standard?

A. It does.

Q. Were these figures compiled from your records at your station?

A. Records of the station, yes, sir. I think that would be about—I would say the same as our sales tax records.

Q. These are correct?

A. Correct.

Q. They were compiled under your supervision, or did you do it yourself?

659 A. I did it myself.

Mr. Austin: I offer this in evidence.

Trial Examiner Ballinger: Admitted.

(The document referred to, heretofore marked, for identification, "COMMISSION'S EXHIBIT 59," was received in evidence.)

By Mr. Austin:

Q. Now, Mr. Tanski, you said that you began to observe discount signs at Ned's station about the first of 1938?

A. That is right.

Q. How long after that did you see those signs?

A. I think the signs were up there until some time around the first of 19—the first two months of 1939; that would be January and February, I imagine.

Q. After figuring in the discount, was Ned's price during 1938 lower than your price on the same gasoline?

A. 1938? I don't think so.

Q. I mean after.

A. Let me get that straight.

Q. Yes. I mean was Ned's price, after taking off the discount—in other words, the price the customer had to pay as shown by the signs you saw.

A. Yes.

Q. Was that a lower price or the same or higher than the price that the customers paid to you?

660 A. It was 2 cents lower than our price.

Trial Examiner Ballinger: That was Ned's posted price?

The Witness: Ned's posted price.

By Mr. Austin:

Q. Less any discount that wasn't included in the posted price?

A. In other words, if they advertised 2 cents off, they were 2 cents lower than my price.

Q. And you say they did so advertise in 1938?

A. They did all during 1938.

Q. Did you make any reductions in your price during '38?

A. No. I couldn't tell you just when I did make the reduction. I think it was around early in 1939. I am not sure.

Q. Would the card help you to remember?

A. Probably the card would help me to remember.

Q. Referring to Commission's Exhibit 59.

A. Well, we showed such a big loss in '38 that I couldn't remember whether that price, the discounting continued all through '38 and the first part of '39. I seem to have come back up in March or February, March, 1939, and then continued increase in my volume, and I think it was due to them stopping.

Q. Due to what?

661 A. Due to them stopping advertising discounts.

Q. Well, you haven't told me yet whether you cut your price and when you did it.

A. I can't seem to remember just what month I cut my price unless I could—

Q. You did cut it some time?

A. I did cut it.

Q. Was it in 1938 or was it after 1938?

A. I think it was late in '38, from what I heard here. They say—

Q. Well, now, don't talk about what you heard; just tell us what you remember.

A. Well, I can't remember that far back. As I says, I was interested in my own business, not the other man's.

Trial Examiner Ballinger: Well, it is your own business they are talking about.

The Witness: I know that, but I haven't got the records in front of me to be able to say when I have dropped my price and when I raised it, and that don't show that (indicating Commission's Exhibit 59).

By Mr. Austin:

Q. Did Ned's stop advertising discounts in '39?

A. They did.

Q. Did your volume increase during the early part of '39?

A. Yes, it did.

662 Q. Did you talk to any of those Ford employees who used to come to your station and also lived in Dearborn?

A. I have talked—

Q. About the purchase of gasoline?

A. I have talked to many of them, but I don't know their names, so I wouldn't want to have anything go on record if I don't know a man's name; but they have been getting discounts, and I have been losing a lot of business through the ones that were discounting.

Q. Well, did they tell your that?

A. Yes.

Q. And the people that told you that, were they people that you talked to about buying gas at your station?

A. Yes.

Q. And you said some of the others. Who were the others besides Ned's?

A. Well, there was Langer's and James Bright that were also in that discounting field.

Q. Langer's has a Texaco station in Dearborn near Ned's, doesn't it?

A. About three or four blocks, I would say that, west of Ned's.

Q. When Ned's was posting these discount signs, did Langer's do the same thing?

A. They also; they followed.

663 Q. You mean by that, that Ned's did it first and then Langer came right after them?

A. I wouldn't say that. Maybe Langer did it first and Ned's would follow; one or the other. I don't know.

Q. They both did?

A. They both did.

Q. And when Ned's stopped posting the signs in the spring of '39 did Langer also stop posting the signs?

A. They did.

Q. During 1940 have you attempted unsuccessfully to obtain gasoline business from any customers who bought other things at your station?

A. No, I haven't. I have been coming along pretty nice in my business, so I haven't had much trouble.

Q. 1940 was a pretty good year for you?

A. I would call it good.

Q. How near to you is the nearest gasoline station?

A. How near is the nearest gasoline station?

Q. Yes.

A. A block down; north.

Q. What gasoline is sold there?

A. Blue Sunoco. Excuse me. I am wrong on that. That goes to show you how much I paid attention to my neighbor's gas. It is either Shell or Gulf. I don't know.

Q. Are there many gasoline stations out there near
664 the Ford plant?

A. There are quite a few. I would say within a radius of a mile there, there must be eight or ten.

Q. Do you keep track of their prices at all?

A. No.

Mr. Austin: That is all.

Cross-Examination by Mr. Hanley.

Q. I show you a map which has been marked Respondent's Exhibit No. 1, for identification. It is a map of Detroit. Will you please put a mark where your station is located, Mr. Tanski?

A. (Witness does as requested.)

Mr. Hanley: I wanted to ask you, Mr. Austin, about these gallonage figures that you have been putting in as exhibits. I have assumed, perhaps erroneously, that those were gallonage figures relating to Standard Oil gasoline only.

Mr. Austin: I think they have been, so far as I know, except this case where it also includes Ford Benzol.

Mr. Hanley: I don't care as long as it is clear as to what it is.

Mr. Austin: I want to be clear, and this is the only case I know of. I think I have asked every witness what brands of gasoline he handled, so I think it will be clear.

665 Trial Examiner Ballinger: That is the understanding of the Examiner, that this is the first one that has included both kinds. If there is any mistake about it, it ought to be checked and placed on record.

By Mr. Hanley:

Q. Mr. Tanski, you said that you didn't know whether Langer or Ned's put up a sign advertising a discount; that is, you didn't know which one of them put up the sign first. They both did.

A. I still say I don't know which, because I don't check that close.

Q. They both took the sign down later?

A. They did.

Q. I presume you don't know which took the sign down first, either?

A. No.

Q. You were asked if your gallonage didn't begin to go up in 1939 after Ned's stopped advertising the discount, and you said that it did. Do you attribute the rise in your gallonage entirely to the fact that Ned's quit advertising a discount?

A. Well, I think it helped our business a lot; that is, helped increase our business a lot by them discontinuing that practice.

666 Q. Weren't other dealers giving the same discount that Ned's was; this 2 cents off; generally, in 1938, up until early 1939?

A. Are you referring to the big dealer or the small?

Q. Oh, just a number of dealers in your vicinity.

A. In my vicinity there weren't any giving 2 cents off.

Q. And didn't that happen at all in 1938?

A. Not that I know of.

Q. Wasn't there a Gulf station near you on Mulkey and Eagles Street?

A. There is a station there.

Q. Weren't they giving a discount?

A. Well, if I may tell you something about that station, I will tell you why I don't pay no particular attention to it.

Trial Examiner Ballinger: Just a moment. Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hadley:

Q. Can you just tell us whether or not they were giving a discount?

A. I couldn't tell you.

Q. You have suggested that you lost some business by virtue of the discounts that were being offered at that
667 time, in 1938.

A. Yes, sir.

Q. And do you think that was largely due to the price?

A. To the price, yes, sir.

Q. Do you think you lost some customers to this Gulf stations?

A. I don't see how I could when there wasn't more than 10 or 15 cars going in there a day. He wasn't doing any business.

Q. So you don't think you lost any there?

A. I don't think so.

Q. Do you think you may have lost some to Langer?

A. I think so.

Q. And you may have lost some to Ned's, you think?

A. Yes.

Q. But you didn't have any conversations with your lost customers at all, as I understand it?

A. I never inquired much.

Q. I will ask you the same question I have asked everybody: if it wasn't a fact in 1938, and at least until early 1939, throughout the Detroit area there was a very prevalent custom of offering discount from the price which had been prevailing in early 1938?

A. I didn't quite get that. I would like to have that read.

Trial Examiner Ballinger: Read the question.

668 (The question was read.)

Trial Examiner Ballinger: Do you refer to the Standard gases?

By Mr. Hanley:

Q. You may understand that to apply to branded gasolines.

A. I would say that it was.

Q. In your particular location doesn't your volume depend a good deal on the operations at the Ford Motor plant?

A. It does.

Q. 1938 wasn't such a good year in the automobile business, was it?

A. I don't believe so.

Q. And that would affect your volume to some extent, wouldn't it?

A. It would.

Q. Is there a Cities Service station near you somewhere?

A. Well, if there is, I would to take a drive around and look around to see, if there was one in the neighborhood.

Q. You just don't have any such in mind?

A. No.

Mr. Hanley: I think that is all.

Mr. Austin: That is all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

669 Mr. Austin: I move that we adjourn until 10 o'clock tomorrow, your Honor.

Trial Examiner Ballinger: The motion is granted. Now, at 5:10 P. M., the hearing stands adjourned to reconvene at 10 o'clock Eastern Standard Time, March 14, 1941, in Room 859, Federal Building, Detroit, Michigan.

(Thereupon at 5:10 o'clock P. M., an adjournment was taken to reconvene at 10 o'clock A. M. March 14, 1941.)

670 Room 859 Federal Building,
Detroit, Michigan,
March 14, 1941.

Met, pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

- Cyrus B. Austin, Esq., Attorney for the Federal Trade Commission.
- H. R. Hanley, Esq., 910 S. Michigan Avenue, Chicago, Illinois, on behalf of the Respondent.

671 PROCEEDINGS.

Trial Examiner Ballinger: Come to order.

The hearing in Docket No. 4389, a case entitled In the Matter of Standard Oil Company, is convened at 10 o'clock A. M., March 14, 1941, in Room 859 Federal Building, Detroit, Michigan.

The last hearing was held in Detroit March 13, 1941.

The reporter will note counsel for the Commission and Respondent present.

You may proceed.

Mr. Hanley: Off the record.

(A discussion ensued off the record.)

Mr. Austin: If your Honor please, I would like to make a statement for the record before we proceed with the testimony.

Trial Examiner Ballinger: Proceed.

Mr. Austin: At the close of the Commission's case, after I go back to Washington, I intend to make a motion to the Commission to amend the Complaint, and the amendments will be, in substance, as follows:

The motion will ask for an amendment of Paragraph 3 of the Complaint, to state that the four dealers named in that paragraph resell gasoline—rather, three of them, all except Ned's Auto Supply Company, resell gasoline to
retail dealers of gasoline, and that the Citrin-Kolb Oil
672 sells gasoline to its subdealers or some of them at
prices which are lower than the prices charged by the Standard Oil Company to its direct retail dealer purchasers, and that those retail dealers purchasing from Citrin-Kolb are in competition with other retailers of gasoline purchasing the same from the Respondent or from other manufacturers.

Further, to amend Paragraph 4 of the Complaint, to add the words "and with their customers", after the word "Paragraph" in the third line of Paragraph 4.

That is not intended to be a definite statement of the motion but will be the substance of what the motion will be, and I might say that that will conform this Complaint more nearly to the Complaint which the Commission has issued against Texas and Gulf Companies.

Mr. Hanley: I assume that this is just an advance notice to the Court and counsel as to your purpose, Mr. Austin?

Mr. Austin: It is purely to give you as much notice as possible.

Mr. Hanley: May it be understood that we may have a copy at your earliest convenience of your proposed amendment?

Mr. Austin: Yes. You will receive notice of the
motion and an opportunity to be heard before the
673 commission in case you should desire that.

Mr. Hanley: Well, I understand that, but I just thought we would like to have a copy of the amendments when you have them prepared, and I understand the procedure is that we may reserve any objections or concessions or whatever it may be, for that time, before the motion is made.

Mr. Austin: I don't believe I said at the beginning of my statement that the purpose of the motion is to conform the Complaint to the proof. I take it that is the usual ground given in such cases, and the mode of action followed.

Trial Examiner Ballinger: I take it this is merely an informal notice.

Mr. Hanley: I so understand.

Trial Examiner Ballinger: Counsel for the Commission will apply to the Commission for leave to amend the Complaint to conform to the proof.

Mr. Austin: Mr. Tapert, will you take the stand?

ELTON J. TAPERT was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. What is your full name?

674 A. Elton J. Tapert.

Q. Where do you reside, Mr. Tapert?

A. 11308 Maryland.

Q. In what business are you engaged?

A. Gasoline and oil; garage business.

Q. Do you operate a service station where gasoline is sold at retail?

A. I do.

Q. Where is that service station located?

A. 13207 Jefferson.

Q. What brand of gasoline do you handle?

A. High Speed.

Q. From whom do you purchase your gasoline?

A. The Highland Oil Company.

Q. Are they a jobber or a producer?

A. I imagine they are a jobber.

Trial Examiner Ballinger: That is your best information of it?

The Witness: Yes.

By Mr. Austin:

Q. Is the gasoline delivered to your service station in tank wagons or tank trucks?

A. Tank wagons.

Q. Do you pay the posted tank wagon price of the Highland Oil Company?

675 A. Yes, I do.

Q. Do you know where the Highland Oil Company obtains its gasoline?

A. The Hicock Company in Toledo.

Q. And is that gasoline manufactured by the Pure Oil Company?

A. I understand it is.

Q. How long have you been in business at that address?

A. Five years.

Q. Where were you before that?

A. At 14308 East Jefferson.

Q. How far is that away from your present location?

A. Just five blocks.

Q. At the other location did you also operate a service station?

A. I did.

Q. In your present service station do you lease the property or do you own it?

A. I am buying it.

Q. Have you, in the past, leased it from the Highland Oil Company or has it been a company owned property; that's what I want to ask you.

A. No.

Q. What grades of gasoline do you handle, Mr. Tapert? I am not familiar with the High Speed gas.

676 A. Ethyl, Benzol, and regular.

Q. What is it called?

A. High-Speed X-Carbon. That would be just like the regular gasoline. That is the trade name they have.

Q. What do you pay for that X-Carbon gasoline now?

A. It is 12.1 cents a gallon. Just a minute. (The witness referred to a document.) 12.6; I beg your pardon.

Q. And does that include 3 cents state tax and 1-1/2 cents Federal tax?

A. Yes, it does.

Q. So that without the taxes you are paying 8.1?

A. That would be it.

Q. And is that gasoline the gasoline which you treat as comparable to the house gasolines of other major oil companies, such as Red Crown, Texaco, Shell—

A. That is correct.

Q. Now, going back, Mr. Tapert, to 1937 and 1938; do you recall what you were paying for your X-Carbon, I believe you call it, gasoline in around the end of 1937 and early in 1938?

A. It was 13.6 cents a gallon.

Mr. Hanley: With or without taxes?

By Mr. Austin:

Q. That included taxes?

A. That included the taxes, yes.

677 Q. And up to the end of 1937, or about the end of 1937, what were you selling that gasoline for, at retail?

A. 18-1/2 cents a gallon.

Q. Is there a station of Ned's Auto Supply Company located near you?

A. Yes. They are nine blocks from my present location.

Q. On the same street?

A. Same street, same side of the street.

Q. Do you know their address, there? That is at East Jefferson and what street?

A. About the 14700 block.

Q. Well, it has been shown here there is a station at 14701 East Jefferson. Would that be the Ned's station?

A. That's the one.

Q. There is no other Ned's station in that location, is there?

A. No.

Q. Around 1937 or early in 1938 was Ned's selling Red Crown gasoline at prices as high as 18.5 cents a gallon, or were they selling it at less?

A. In the early part of 1937—

Q. No, the end of 1937.

A. No, they were selling it at less, at that time.

Q. How much less?

A. The average would be 2 cents a gallon.

678 Q. Do you pass their station frequently?

A. Every day.

Q. Did they have signs in front of their stations in regard to discounts?

A. They did at the time. I don't know whether, at the beginning of 1937, whether they did or not.

679 Q. But you do know they were selling for two cents less than you were at the end of 1937?

A. Yes.

Trial Examiner Ballinger: You say they had signs up. At what period?

The Witness: It would be the latter part of 1937, and all through 1938; for about a year in that period.

By Mr. Austin:

Q. Did you reduce, or did you make any change in your price of 18.5 cents a gallon around the beginning of 1938?

A. Yes, I did. I reduced the price two cents a gallon, also.

Q. And how long did you continue that reduction?

A. Well, it was close to a year. It was either a little more than a year, or a little under a year. About a year period.

Q. Did the advertised price cutting cease, or was it greatly reduced in your neighborhood early in 1939?

A. Yes, it was.

Q. After you reduced your price to 16.5 cents a gallon around the first of 1938, did your volume decrease, or increase?

A. It increased.

Q. After you lowered your price?

A. Yes, it did.

Q. And have you a statement of your gallonage
680 figures with you?

A. I have.

Q. May I see them?

(The witness handed a document to counsel for the Commission.)

Mr. Austin: I would like to have this sheet marked in evidence.

(The paper referred to was marked "Commission's Exhibit 60-A and 60-B" for identification.)

By Mr. Austin:

Q. I show you this document, marked Commission's Exhibit 60-A and B, for identification, and ask you to describe it.

A. What is that?

Q. I ask you to describe it.

A. Well, it is the gallonage pumped at the station, from 1936 to, including 1940.

Q. From what record was that made?

A. The oil company's records.

Q. What oil company?

A. The Highland Oil Company.

Q. Was that made at their office or at your office?

A. At their office.

Q. Have you checked that with your own records?

A. Yes, I did. I didn't check every month, but I checked the average.

681 Q. Is that a correct statement, to the best of your knowledge and belief?

A. That is a correct statement; yes, it is.

Q. You asked them for a statement of your gallonage?

A. I did.

Mr. Austin: I will offer this.

Mr. Hanley: No objection other than the general objection.

Trial Examiner Ballinger: Subject to the general objection, reserved to counsel for Respondent, the document is admitted in evidence as Commission's Exhibit 60-A and B.

(The papers heretofore referred to, marked "COMMISSION'S EXHIBIT 60-A and B," for identification, were admitted in evidence.)

By Mr. Austin:

Q. I will hand you Commission's Exhibit 60-A and B, Mr. Tapert, and using those figures to refresh your recollection, I would like to ask you whether your volume of business increased or decreased during the first few months of 1938?

A. It increased.

Q. When was it that you lowered your price from 18.5 to 16.5?

A. The first part of '38.

Q. In January?

A. Probably November.

682 Q. November, '37?

A. Of '37.

Q. That is when you reduced from—

A. That is right.

Q. From 18.5 to 16.5?

A. That is right.

Q. After you made that reduction, did your business pick up?

A. Yes, it did.

683 Trial Examiner Ballinger: You mean in volume?

Mr. Austin: In volume.

The Witness: Yes, sir.

Mr. Austin: Yes, your Honor.

By Mr. Austin:

Q. Gasoline volume is what I am talking about.

A. That is correct, yes.

Q. Is there a Standard Oil station which is operated or appears to be operated by the Citrin-Kolb Oil Company in your neighborhood?

A. They are about half a mile away, yes.

Q. Where are they located?

A. On Nottingham and Jefferson.

Q. And that is East Jefferson?

A. That is correct.

Q. The same street that you are on?

A. That is right?

Q. You say about half a mile away?

A. Yes, sir.

Q. In 1937 was that station located there at that time?

A. Yes, it was.

Q. Did that station advertise a 2 cent discount during 1937?

A. How do you mean advertise it?

Q. Did it advertise any discount and do you re-684 call when they started?

A. Just about that time they advertised with a courtesy card.

Q. What do you mean by a courtesy card?

A. Well, a card that is sent out allowing any—the purchaser 2 cents off on a gallon.

Q. You mean that is what it says on the card?

A. That is what it said on the card, yes, sir.

Q. Did you see any of those cards?

A. Yes, I did.

Q. Have you any of them now?

A. No, I haven't.

Q. By the way, Mr. Tapert, is that Citrin and Kolb station the one that is located at Jefferson and Nottingham?

A. Yes, it is.

Q. I show you this card marked Commission's Exhibit 34, and ask you whether that is a card, one of the same cards, or the same type as the ones you just referred to?

A. Yes, it is. I wouldn't say it was exactly, but that is just about the way it was. That is quite a while back for me to remember, but that is just about the same thing.

Q. Were some of those cards shown to you by customers who drove into your station?

A. Yes, they were.

Q. And did those customers buy gas at your station 685 or were they buying other things?

A. Well, they were buying gasoline at that time.

Q. I mean the customers that showed you those cards.

A. Well, up until that time they were buying gasoline from me.

Q. Did some of them stop buying gasoline at that time?

A. Yes, they did.

Q. Did you speak with any of them as to the reason why they didn't continue to buy gasoline at your station?

A. I did, or they told me voluntarily.

Q. What did they say to you?

A. That they were receiving 2 cents off from the Standard Oil station, some of them at Ned's and some of them at Citrin & Kolb.

Q. Was this during 1937 that you are speaking of?

A. Yes, it was.

Q. Were there any other stations advertising a 2 cent discount in your neighborhood at that time?

A. No. I probably was the first one after they discounted.

Trial Examiner Ballinger: Whom do you mean by "they"?

The Witness: Citrin & Kolb and Ned's.

By Mr. Austin:

Q. Did you have a couple of customers at that time, one by the name of Mrs. Peabody and another one her sister?

686 A. I did.

Q. What was Mrs. Peabody's business, or did she have a business?

A. No, she was a housewife at the time.

Q. She wasn't a school teacher?

A. No, no, she wasn't.

Q. Had they prior to 1937 been purchasing gasoline at your station?

A. Yes, they had.

Q. And did they continue to buy gasoline at your station during 1937 and '38?

A. No, no, they hadn't.

Q. Did they tell you why they quit buying there?

A. They told me that they had received cards from Ned's or from—I beg your pardon—from Citrin-Kolb at the time.

Q. What else did they say?

A. That they were receiving 2 cents off on the gasoline.

Q. Did they say they were buying it there?

A. Yes, they did.

Q. Did I understand you to say, Mr. Tapert, that the advertised discounting in your neighborhood has decreased since early in '39?

A. Yes, it has.

Q. Do you know of any gasoline stations in your neighborhood that have, since January—or July 1, 1940,
687 advertised or posted prices for less than 16.3 cents
for the regular gas?

A. That is posted price? No.

Q. What is your present posted price?

A. 16.3 cents.

Q. During 1940 or 1941 to date have you lost any customers who told you that they were leaving you for another station in your neighborhood?

A. Yes, I have.

Q. Can you refer to particular cases?

A. Well, I have two customers that were steady customers; in fact, have been more or less for five years, Francis Chartier and Emil Friese. One is an individual and the other is a contractor with one truck. And they both left me to go to Ned's in the last 60 days because they were getting 2 cents off.

Q. Did you speak to Mr. Friese about it?

A. I did.

Q. What did he tell you?

A. He told me that—he told me at one time that—these were his words: that he could get 2 cents off on a gallon, and I told him that I couldn't meet it, so he said—he finally decided to go to Ned's because of the saving.

Q What did Mr. Chartier say?

A. Mr. Chartier, his words were just about the
688 same, he could save 2 cents on gasoline by buying at Ned's.

Q. Now, looking at your record there, Commission's Exhibit 60-A and B, you stated that about the end of 1937 you reduced your price from about 18½ down to about 16½, or, I believe you gave those exact figures?

A. That is right.

Q. And you stated that after you reduced your price your gasoline sales volume increased?

A. That is right.

Q. How much money did you make or how much did you lose on the sale of gasoline after you reduced your price to 16½?

A. I lost about $200 a month.

Q. And before that, when you were selling at 18.6, how much did you make or how much did you lose? What do you mean when you say you lost $200 a month?

A. Well, I had a net loss of pretty close to $3,000 for that year.

Q. Which year?

A. The year—I think that would be—just a minute—of '38.

Trial Examiner Ballinger: Do you mean by that your income for the year 1938 was pretty close to $3,000 less than your income for the year 1937, or do you mean that you sustained a loss?

689 The Witness: There was an actual loss in 1938 of $3,000, yes.

Trial Examiner Ballinger: In other words, it cost you that much more to operate your business than your income was?

The Witness: That is correct.

By Mr. **Austin**:

Q. Do you have any means of determining how much of that loss was due to gasoline business and how much was due to other things that you sold?

A. Well, 90% of the business is gasoline—was at that time at the station.

Q. It was?

A. Yes, sir.

Trial Examiner Ballinger: So that we may approximate what the decrease in your receipts were, what was your profit for the year 1937?

The Witness: The net profit at the end of the year, sir?

Trial Examiner Ballinger: Yes, sir.

The Witness: Well, I haven't that figure. I would—it would be between three and four thousand dollars.

By Mr. Austin:

Q. Profit?

A. Yes.

690 Q. And what percentage of your business in 1937 was gasoline?

A. Just about the same, sir.

Mr. Austin: You may cross-examine.

Cross-Examination by Mr. Hanley.

Q. Mr. Tapert, I hand you a map of Detroit, marked Respondent's Exhibit No. 1, for identification, and I will ask you to please put a dot on the map where your station is located.

691 (The witness did as requested.)

Mr. Hanley: Thank you.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. How long have you been operating a service station in any capacity, Mr. Tapert?

A. Fifteen years.

Q. And you have been at two different locations during that time?

A. I have.

Q. Just two?

A. Just two.

Q. What brand of gasoline did you first begin to handle?

A. City Service.

Q. And how long did you handle that?

A. Well, as near as I can remember, it was probably a year or a year and a half.

Q. Tell me, first, how long were you in the first location?

A. Ten years.

Q. And in your last one?

A. Five years; in the last one, five years.

Q. Tell me what you handled after you ceased handling City Service.

692 A. Standard Oil.

Q. And how long did you handle Standard Oil products?

A. I think it was about three years.

Q. After you ceased handling Standard Oil products, what was your next brand?

A. I think I handled Indian gasoline. I am quite sure that was it.

Q. And how long did you handle Indian?

A. Well, until the Indian Company went out of business—no, it was a jobber I was handling gasoline—and I handled Blue Sunoco afterwards. I just handled Indian a couple months, and I had Blue Sunoco with it.

Q. How long did you handle the Indian, first?

A. It wasn't very long, because the Indian Company sold out to Texaco; and the jobber I was buying from, handled Phillip's 66.

Q. So you began to handle Phillip's 66 a few months after you quit handling Indian?

A. That's right.

Q. But you were purchasing Indian while you were handling Phillip's 66, from the same source?

A. I did.

Q. Over what period did you handle the Indian and then the Phillip's?

A. Pretty close to five years; until the end of the 693 lease.

Q. And during part of that time, at least, you were also handling Sun Oil Company products?

A. That is correct.

Q. Was that all, from time to time?

A. That took care of everything. I handled Sunoco right up to the end of the contract.

Q. Up to then, what did you handle, Mr. Tapert?

A. That was the end of my lease, rather, and then I moved over to the other location.

Trial Examiner Ballinger: That is, the present location?

The Witness: The present location.

By Mr. Hanley:

Q. And what brand did you handle there?

A. Hi-Speed.

Q. And you have been handling Hi-Speed products ever since then?

A. Yes.

Q. And so doing now?

A. That's right.

Q. Mr. Tapert, during the time you were handling Standard Oil products, and just before you began to handle Red Indian and Phillip's products, do you remember an occasion of calling upon the Standard Oil Company and asking for a concession in price of Standard Oil gasoline?

694 A. At that time—

Trial Examiner Ballinger: First, do you recall of such an instance?

A. Yes. I know what the gentleman is referring to

695 By Mr. Hanley:

Q. Did you receive any concession in price?

A. No, we didn't.

Q. And thereafter you began to handle the Red Indian and Phillips products?

A. That's right.

Q. Did you receive a concession in price on those products below what you were paying, or had been paying to the Standard Oil Company, did you not, Mr. Tapert?

A. There might have been a concession on the Indian.

Q. Well, you know there was, don't you, Mr. Tapert?

A. Well, there probably was. I can't definitely—that is quite a while back—

Q. I am not asking you how long, I am just asking you whether there was or wasn't a concession.

A. Yes, I would say that there was at that time.

Trial Examiner Ballinger: Was that the inducing cause for the change?

The Witness: I wouldn't say yes or no on that. I imagine it had something to do with it.

By Mr. Hanley:

Q. It had a lot to do with it, didn't it, Mr. Tapert?

A. There was always a financial consideration there.

Mr. Austin: May I ask how long ago that was?

The Witness: That would be 12 years ago.

696 By Mr. Hanley:

Q. When you went to the High Speed brand, did you begin, at that time to pay the tank wagon price of High Speed Company, or the Highland Company?

A. That's right.

Q. Did they have anything to do with your location—I mean did they own the property or have a lease upon it?

A. Yes, they did. They had a lease with the party that was in there before I bought the property.

Q. Did you get any concession in price or premium or bonus or rebate or anything of value in any manner that was an inducement to you to go to the High Speed brand?

A. No, I didn't.

Q. Have you ever?

A. No, I haven't.

Q. Did you lease—when you went to the High Speed company—from them?

A. I leased it—I was the owner and I leased it to them.

Q. And did they lease it back to you?

A. They did.

Q. And was that lease based on gallonage?

A. Yes, it was.

Q. And you had a similar arrangement in your other location?

A. No.

697 Q. Who owned that property?

A. The Fred Sanders Company.

Q. Did you lease from that company?

A. Yes, I did.

Q. That was just a straight lease that you paid to the landlord?

A. Correct.

Q. And the oil company supplying you had nothing to do with that lease; is that right?

A. That's right.

Q. But when you went to your present location, you became the owner of that property?

A. That's right.

Q. And leased it to the High Speed Company?

A. That's right.

Q. And then they leased it back to you?

A. Yes—they didn't lease it. I was just put in there as their agent.

Q. Did they pay you for the property?

A. Yes, they did.

Q. Did you pay them anything for the use of the property?

A. No, I didn't.

Q. Then, as I understand it, you leased them the property and they paid you?

A. That's right.

698 Q. And then they sold you gasoline?

A. That's right.

Q. At the tank wagon price, and you paid them for the gasoline.

A. That's right.

Q. Now, were there ever any other transactions between you and the company that affected the amount of money you were paid on the lease or that affected the price of your gasoline?

A. No, there wasn't.

Q. How much did they pay you, Mr. Tapert, on your lease? Was it on a gallonage basis first?

A. Yes.

Q. How much a gallon?

A. A cent a gallon.

Q. And you owned the property?

A. That's right.

Q. And you had no lease back from them?

A. No.

Q. You used your own property?

A. That's right.

699 Q. And they paid you a cent a gallon?

A. That's right.

Q. Did you regard that as being any financial inducement to begin handling products of that company?

A. No, I didn't.

Q. Didn't it amount, as far as you were concerned, to a cent a gallon reduction over the tank wagon price?

A. No, it didn't. It amounted to a half a cent, as I remember it.

Q. Well, you could have used your own property without leasing it to the Hi-Speed Company, couldn't you?

A. That's right.

Q. And anything they paid you for using your own property was just that much, in the way of a reduction, on the gasoline price, wasn't it, Mr. Tapert?

A. That's right. I can probably straighten it out.

better than that. There was a lawsuit when I took over the property, and the Court allowed the Highland Oil Company to remain in there another year and a half.

Trial Examiner Ballinger: When did you take over the property?

The Witness: In 1937; in April.

By Mr. Hanley:

Q. Now, Mr. Tapert, you have testified that you regard the Hi-Speed house brand gas comparable to the house
700 brand gasolines of certain companies who are represented by stations around you. What are those companies?

A. Standard Oil, Gulf, Blue Sunoco, White Star—or Mobil gas.

Q. Are there any Joy or Zip stations near you?

A. Well, there is one within a mile.

Q. Are there any other service stations who are marketing local brands of gasoline near you?

A. No, not that I know of.

Q. You understand it to be a fact, do you not, Mr. Tapert, that the local branded gasolines, such as Joy and Zip, are represented as being comparable to the house brand gasoline of the Hi-Speed Company?

A. That they are comparable?

Q. Yes; are represented as being comparable and sold as being comparable?

Trial Examiner Ballinger: Do you know that?

The Witness: That would be hard to answer. They don't say that they are comparable to the—

Trial Examiner Ballinger: Do you know it?

The Witness: Do I know whether they are, or not?

Trial Examiner Ballinger: No. Do you know whether they are represented?

The Witness: No, I wouldn't say that.

By Mr. Hanley:

Q. Mr Tapert, did you ever happen to see any
701 publications in the paper by Charles Austin?

A. Yes; I have.

Q. Do you recall a comparison chart appearing in each of those issues, which undertook to compare laboratory findings of the Detroit Testing Laboratory as between the Joy gasoline and all of the house brand gasolines of large, so-called major companies in Detroit?

A. Yes, I do.

Q. Do you remember the claims that were made for Joy gasoline in those publications, as compared to Hi-Speed, for instance, or Standard Oil?

A. I do remember that.

Q. And will you tell the Court, in your language, what those claims were?

Mr. Austin: I object, Your Honor, on the ground it is entirely irrelevant and immaterial, and not relating to any matter developed on direct examination.

Trial Examiner Ballinger: Objection sustained.

Mr. Hanley: I would like to get this clear on the record, if Your Honor please. I want to ask counsel for the Commission if it is the position of the Government that any company whom the Government's witnesses have arbitrarily described as major companies, has no right to compete with what the witnesses for the Government have called non-brand or off-brand, or gyp companies? Are
702 you in a position to state the position of the Government, Mr. Austin?

Mr. Austin: I am afraid I can't answer that question in the way you have put it.

Mr. Hanley: All right.

By Mr. Hanley:

Q. Now, Mr. Tapert, you have described ~~a station you~~ said you thought was operated by Citrin-Kolb about a half a mile away from your location. Is that operated by Citrin-Kolb?

A. Well; it has been, off and on.

Q. What was the fact, if you know the fact, in 1937 and 1938?

Mr. Austin: That is, necessarily, hearsay, isn't it?

Mr. Hanley: Well, is there any rule against hearsay in this matter?

Mr. Austin: I think so—he can state whether he knows or not.

Trial Examiner Ballinger: The witness may answer that question.

The Witness: Do I remember whether it was operated at that time?

By Mr. Hanley:

Q. Maybe I don't have to ask you.

Mr. Hanley: Is it a matter of record?

Mr. Austin: Yes.

703 Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Hanley:

Q. Now, Mr. Tapert, were there any other Standard Oil stations, or stations, handling Standard gasoline near you?

A. Yes; right across the street.

Q. And who operated that station?

A. Two boys; Earl and Stan; Earl Stacey, and I don't recall the other boy's last name.

704 Q. Do you recall what they did?

A. What is that?

Q. Do you recall what they did in the matter of their prices during this '37 or '38 period?

A. Yes, they reduced their price after a while, too, shortly after I did.

Q. When, in respect to the time you reduced yours?

A. Shortly after I did.

Q. After you reduced your price?

A. Yes.

Q. Are you acquainted with the J. J. Bright string of stations in Detroit?

A. I am.

Q. Does he have a station located near you?

A. Yes, today.

Q. And where is that located?

A. That is on Emerson and Jefferson.

Q. On the same street you are on?

A. Yes.

Q. How far away is it?

A. Oh, six, seven blocks.

Q. How long has he been there?

A. About a month or two; I would say two months at the most.

Q. Now, Mr. Bright handles what gasoline, if you know?

705 A. He calls it Spitfire.

Q. Doesn't he handle Sinclair gasoline also?

A. In Detroit?

Q. Yes, sir.

A. The last time I saw his Boulevard station he was handling Sinclair at that station, also Blue Sunoco at another station on Fort Street.

Q. And he handles also a brand he calls Spitfire, you say?

A. Yes.

Q. How does the price of gasoline at that station, if you know, compare with your present price of 16.3?

A. At Emerson?

Q. Yes.

A. That is 3%—or 3 cents a gallon below the market.

Q. So he is selling at 13.3 cents?

A. That is right.

Q. Do you know whether in addition to that any premiums are being given away?

A. He has advertised sugar at different times.

Q. Isn't it true that he is advertising the giving away of several pounds of sugar every week end to customers?

A. I have seen it advertised, yes.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

706 Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Now, you reduced your price, you think, in November of 1937, 2 cents below what you had been previously selling it for?

A. That is right.

Q. During the year 1937 or part of it and 1938 and up to at least early 1939 there was an increasing reduction in price in Detroit, wasn't there?

A. That is right, yes.

Q. More and more service station managers reduced the price?

A. That is right.

Q. And the price itself was reduced to a greater extent; I mean, the spread?

A. Yes.

Q. Both as to money and as to premiums and that sort of thing given away?

A. That is right.

Q. Didn't that condition become what you term generally prevalent throughout the whole area of Detroit?

A. Yes, but they always start at the same locations.

Q. Was that not participated in by practically all of the service stations in Detroit?

A. It got to be general.

707 Q. Now, you have said that you learned of a price reduction of 2 cents at Ned's service station. When did you first learn of that, Mr. Tapert?

A. That is general, too. That is almost continuous.

Q. When did you first learn of it?

A. Well, I have had boys that work for me that worked up there and I probably always know just what they are doing.

Q. Can you say when you first learned of it, approximately?

A. I can go right through the last five years with the exception of the period when the NRA was in effect, that they have always, if they have stopped one scheme, they have started another, whether it is coupons or punching the register tickets, or whatever it happens to be.

Q. And you think you have known of that for five years?

A. I have, yes.

Q. That is, five years back from now?

A. That is right.

Q. So that would be in 1936 some time?

A. Well, I could go back farther than that, if necessary.

Q. I wish you would go back as far as you think you can properly, Mr. Tapert. Tell us when you first knew of it.

A. Well, I imagine their place was built in 1929, just about that time, and it probably was within six months after that, maybe right at the beginning, I don't know. I can't remember then, that they started discounting.

708 Q. And it is your impression that that has been going on ever since?

A. Yes, it has, with probably short periods in between that.

Q. Possibly the NRA, as you said?

A. Yes. Yes.

Q. So that this action that you have referred to on the part of Ned's was not confined to the year 1937 and '38, '39 at all?

A. No, I wouldn't say that.

Q. It didn't even begin? It was just a continuation of what already had been going on; isn't that right?

A. That is right.

Q. You have identified a card shown you, Commission's Exhibit No. 34, as being either of the same kind or similar to a card which you observed in use in 1937 or '38 issued by the Citrin-Kolb station. Tell us how long, if you know, that card was in use at that station.

A. Oh, I don't know definitely. Those cards go out just like the end of every price war. I imagine it was about six months, about as close as I can figure.

Q. Do you have any knowledge upon which you base that period of time, Mr. Tapert?

A. Well, only that I am interested generally in what the other stations are doing in the community.

709 Is it your best judgment that it was about six months?

A. I would say yes.

Q. And in what year did that six months occur?

A. I wouldn't say whether it was the last part of '37 or the first part of '38, just in that general period.

Q. You have referred to what you termed a net loss of $3,000 in the year 1938 as compared with a net profit in 1937 of from $3,000 to $4,000.

A. Yes.

Q. During the year 1937. Do you have in mind the total gallonage?

A. What is that you want?

Q. Refreshing your recollection from Commission's Exhibit 60-A and B, can you tell us in round numbers what your gasoline gallonage was in 1937?

A. In the whole year of 1937?

Q. That is right.

A. About 240,000 gallons.

Q. And what was it in 1938?

A. About 300,000.

Q. Is it your testimony, Mr. Tapert, notwithstanding you sold about 240,000 gallons in 1937 and about 300,000 gallons in 1938, that the difference in your net income from your gasoline sales was between six and seven thousand dollars greater in 1937 than it was in 1938?

710 A. Well, it would be hard—I imagine it would have to be.

Q. Well, I understand your testimony, that is the way it figures out. You say you lost $3,000.

A. That is right, in 1938, yes.

Q. Net loss?

A. Yes.

Q. And that you made a net profit in 1937 of between three and four thousand dollars in your business?

A. That is right.

Q. This figure includes all of your business, as I understand it?

A. That is right.

Q. But you said about 95% of that was gasoline business?

A. That is right. About 90%.

Q. You figure that 90% on the basis of gallons done or dollars?

A. Dollars.

Q. Then, let me frame the question again to give it your own qualification, Mr. Tapert.

A. All right.

Q. You did approximately 240,000 gallons of business in 1937?

A. That is right.

Q. And you did approximately 300,000 in 1938?

711 A. That is right.

Q. And on your gasoline business you made a net income in 1938 of approximately 90% of between $6,000 and $7,000?

A. That is right.

Q. You cut your price 2 cents in November, 1937?

A. Yes, approximately, at that time.

Q. And did you continue that cut price in effect until the close of 1938?

A. Well, the price and the margin varied at that time. It shows a margin of 4½ cents a gallon at one time, and if we gave that, it would be 2½. I know that the net profit at one time during that period was less than 2 cents. In other words, we didn't just figure 2 cents off all the time and continually going down, because it was generally 7 for $1, and 7 for $1.05, 7 for 98 cents, and then would start—

Q. Well, when did it begin to go up from its low point?

A. Well, they all went up at one time.

Q. Didn't that happen in—I will withdraw that.

You tell us as nearly as you can when the up-trend started on your prices.

A. I would say the last of '38 or beginning of '39.

Q. How much of '38 would be influenced by that uptrend?

A. How much?

Q. Yes.

712 A. Probably just the last month or month and a half.

Q. Now, what was your margin before you made your reduction of 2 cents in November, 1937?

A. About around 4 cents a gallon.

Q. Did your cash reduction below the prevailing retail price that you were charging prior to November, 1937, ever get below 2 cents?

A. Did it ever get below 2?

Q. Yes.

A. I think it did, yes.

Q. Were the same posted prices maintained throughout this cut price period that has been in existence in early 1937?

A. The posted prices?

Q. Yes, sir.

A. By the oil company or the dealer?

Q. No, I mean your dealer—the retail prices, the retail prices posted by dealers.

A. Yes.

Q. Did they remain the same?

A. Did they remain the same, did you say?

Q. Yes.

A. No.

Q. There was a fluctuation in that?

A. Yes.

713 Q. And the 2 cents would be figured off whatever that posting was; isn't that right?

A. Well, it got down to—it wasn't 2 cents all the time. It was anything. It was what they called a bushel price, I think, generally referred to as 6 for $1, 7 for $1, 8 for $1, and it was just one thing right after another. It was lowering of the price.

Q. Now, just one more question, I think Mr. Tapert.

At any time since 1936 has the practice been used in your station and High Speed stations otherwise of giving away to your customers premiums of any kind?

Trial Examiner Ballinger: First answer, now, as to your own station, and then as to whether of your knowledge it has occurred in other stations.

A. Yes, I have given premiums away.

By Mr. Hanley:

Q. Over how long a period of time since 1936 have you engaged in that practice?

A. Well, instead of cutting the price to meet competition in the neighborhood, I gave premiums away. I think it was sugar and cigarettes at that time, and later discarded that and continued with the price cutting or met the price of the other stations in the neighborhood.

Q. Just give us an idea. During the greater or lesser part of the time since 1936 up until now have you
714 engaged in this practice of giving away premiums?

A. Well, there was just that period in there, I imagine it lasted around two months.

Trial Examiner Ballinger: What year?

By Mr. Hanley:

Q. When was the last time you ever did that?

Trial Examiner Ballinger: What year, please?

A. Well, that would—now wait just a minute. The year I was doing that was approximately '38—the latter part of '37 and the beginning of '38. In other words, instead of giving 2 cents off, why, I gave a package of cigarettes with 7 gallons of gas or so much sugar.

By Mr. Hanley:

Q. How long has it been since you at your station gave away any premiums of any kind?

A. If you are referring to the company, the company has—the company had an advertising program about a year ago.

Mr. Austin: I object, your Honor. I don't believe that is responsive.

715 Mr. Hanley: Well, I will reframe the question.

Mr. Austin: And I will object to any questions in respect to what the Highland Oil Company does. I don't mind his asking this man what he does.

Trial Examiner Ballinger: Objection sustained.

Mr. Hanley: Your Honor, do you think that is not material, what happens in the way of premiums going out of this man's station?

Mr. Austin: Yes.

Mr. Hanley: No matter whether it is the company or the individual operator?

Trial Examiner Ballinger: If they were given away at his company, that is, at his station, he may testify to it.

Mr. Hanley: Well, so I understand. I want to ask him that.

Trial Examiner Ballinger: All right.

By Mr. Hanley:

Q. Were there any premiums given away at this station, whether supplied by you or the Highland Oil Company, or any other person?

A. Yes, about ten dollars worth over a period of six months.

Q. Well, what is that system? Tell us about it.

A. Well, we were to give coupons out with the gasoline, and then if the people came in, they gave you so much cash,
which amounted to about the wholesale price, I imagine,
716 and so many of these coupons got a coffee pot or an
iron, or whatever it happened to be.

Q. Did you give any cash prizes?

A. No.

Q. Never?

A. Oh, yes, at one period they had an advertising campaign, cash.

Trial Examiner Ballinger: What period was that?

The Witness: That was about 1939.

By Mr. Hanley:

Q. What has been the practice in 1940?

Trial Examiner Ballinger: What time in '39?

The Witness: Well, the Courts found the contest without—

Trial Examiner Ballinger: Can't you answer as to time?

The Witness: Against the Fair Trade law. It lasted about three months, I would say.

Trial Examiner Ballinger: Well, what time?

The Witness: In about the middle of the summer.

Trial Examiner Ballinger: About the middle of 1939?

The Witness: Of '39.

By Mr. Hanley:

Q. What is the last time since any premium has
717 been given away at your station or any plan for
giving away premiums operated through your station,
either by yourself or by your gasoline supplier?

A. Well, they have just discontinued giving away flying stamps.

By Mr. Hanley:

Q. About how long ago?

A. A month.

Q. Has anything taken place on that yet?

A. No.

Mr. Austin: Giving away what?

The Witness: Flying stamps.

Trial Examiner Ballinger: What are flying stamps?

The Witness: If you save 600 stamps, one with every 25 cents purchase, you get a flying lesson free. It is in conjunction with other department stores in Detroit, and chain stores.

Mr. Hanley: I learn something about premiums every day.

Trial Examiner Ballinger: Is that an aviation lesson?

The Witness: Yes, it is an aviation lesson.

By Mr. Hanley:

Q. Do you know of any program in the making now to substitute for that plan?

718 A. No, I don't.

Mr. Hanley: You may take the witness.

Redirect Examination by Mr. Austin.

Q. You were asked on cross-examination, Mr. Tapert, about price cutting by Ned's Auto Supply Store, and you said, that with the exception of the NRA, that had been going back a good ways?

A. Yes.

Q. When, however, was the first time, to your knowledge, that they advertised a discount of two cents off the prevailing price?

A. You mean—how do you mean by advertising?

Q. I mean, gave it, or advertised it openly at their station through signs, or how, otherwise—any other way that came to your knowledge, that they were actually selling gasoline for two cents below the prevailing price?

A. Within the first year, they were doing business there.

Q. In other words, the discount was as great, as that, at that time?

A. Right at the beginning, yes.

Mr. Hanley: That is 1929, as I remember your testimony.

The Witness: I didn't say that the place was built, definitely, in 1929.

719 Mr. Hanley: No; about that time.
The Witness: That is right.

By Mr. Austin:

Q. And in response to another question as to the increasing prevalence of price reductions by service stations in 1936: You said, "Well, it always starts at the same locations." What did you mean by that?

A. Ned's.

Q. What did you mean by "starts"; what starts?

A. The discounting.

Q. And have the general price cutting sprees occurred several times during the past ten years?

A. Yes, they have.

Q. Did your volume increase or decrease in 1939 and 1940, as compared with 1938?

A. It decreased.

Q. Were you giving any cash reductions off the prevailing retail price during 1939 and 1940?

A. No.

Q. Then you haven't found any premiums or anything else that will take the place of the cash reductions, have you, when it comes to drawing customers?

A. No. No, I haven't.

Mr. Austin: That's all.

720 *Recross Examination by Mr. Hanley.*

Q. There is testimony here that Ned's Auto Supply Company, or its immediate predecessor, has been in business in Detroit for twenty-two years, selling gasoline, among other things, and you stated you have been acquainted with the oil business in Detroit for fifteen years.

A. That's right.

Q. Now, do you wish it to be understood, by your answers to Mr. Austin's last questions, that during the fifteen years that you have been acquainted with the oil business in Detroit, that every reduction in retail price of gasoline has been initiated by Ned's Auto Supply Company?

A. You said every one?

Q. Yes. I understand that that's what you said; that they always started at the same location.

A. Well, I would be safe in saying most of them.

Q. Well, is that your testimony—

A. Yes.

Q. —that in the last fifteen years; out of how many service stations in Detroit?

A. What do you mean by "how many?"

Q. How many are there?

A. Oh, around 2,000, I would say.

Q. And no one undersells Ned's, is that true?

Trial Examiner Ballinger: If you know.

721 A. You say "no one?"

By Mr. Hanley:

Q. That's what you said. You said they always started at Ned's.

A. When I am speaking of comparative brands, yes.

Q. If you are just limiting this thing to some brands, you had better state what brand you mean.

A. I mean major brands.

Q. What major brands?

A. The Texas Company, Sun Oil Company, Mobil gas and Hi-Speed—I wouldn't say they are major. It is just a two-state oil company.

Trial Examiner Ballinger: Would you include Standard?

The Witness: And Standard Oil, yes.

By Mr. Hanley:

Q. Is that all?

A. Gulf Refining. I think that covers it.

Q. That's all?

A. Yes.

Q. Now, it is important that you get this clear, please, Mr. Tapert, in view of the next question I am going to ask you: You are referring to major brands as being the brands that you have now named. That's right, isn't it?

A. Yes, sir.

722 Q. Now, I will ask you, that if all of the cuts in the retail price of any brand that you have just named, in the City of Detroit, during the last fifteen years, that you have been acquainted with the oil business, have been initiated at Ned's Auto Supply Company?

Trial Examiner Ballinger: Do you understand the question?

The Witness: No, I don't.

Trial Examiner Ballinger: Read the question.

(The question was read.)

A. Well, it is the same answer. I wouldn't say all of them, but I said most of them.

By Mr. Hanley:

Q. And that is your testimony?

A. Yes.

Q. Covering a period of fifteen years. All right, now; which location?

A. What do you mean, "which location?"

Q. Of Ned's.

A. I would say all their locations; from the general experience I have had. Before Ned's station was built at Jefferson, I had a customer that would go out there and have his car greased, and buy his gasoline out there, in order to save money.

Q. When was the station built there?

723 A. In 1929. You said 1929.

Q. No, I didn't say 1929. I am not testifying to anything.

A. Well, it is within a half a year of that.

Mr. Hanley: All right. That is all.

Mr. Austin: That is all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Mr. Austin: May we have a recess at this time?

Trial Examiner Ballinger: We will have a five minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: We will come to order, gentlemen.

Mr. Austin: Mr. Moss.

724 FRED C. MOSS was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Will you state your name, please?

A. Fred C. Moss.

Q. Where do you reside, Mr. Moss?

A. 19215 West McNichols.

Q. What is your business?

A. Gasoline; retail.

Q. Do you operate a retail service station?

A. I do.

Q. What brand of gasoline do you handle?

A. High Speed.

Q. Where do you buy your gasoline?

A. Wilson Oil.

Q. Are they a jobber?

A. I think they are. I don't know. I am pretty sure they are.

Q. Do you know what you paying now for your regular brand of gas?

A. 8.1 plus tax.

Q. How long have you been in business at that address?

A. It will be three years in May. It will be three 725 years the 4th day of May.

Q. Have you been a High Speed dealer during all of that period?

A. I have.

Q. Have you been paying 8.1 plus tax for your regular brand of gasoline during all of 1940?

A. Well, that I wouldn't be sure of, but I think so; unless the price has changed, and I don't remember it. It seems it has been 16.3 during that period of 1940. I wouldn't be positive of that now. I didn't know I was going to be asked these questions.

Q. Don't you remember there was an additional half cent tax added on in the middle of 1940?

A. Yes, but it wouldn't affect the price, would it?

Q. No. But you said it was 16.3 and that is your selling price.

A. That's right.

Q. And that includes tax, doesn't it?

A. Yes.

Q. Mr. Moss, you recently bought that earphone you are wearing, didn't you?

A. Yes.

Q. And who did you buy it from?

A. From a man by the name of Cliff R. Cook.

Q. Was he ever a customer of yours in buying gasoline?

726 A. I don't know him personally, but he said he had stopped in passing.

Q. You mean he told you that at the time he sold you that earphone?

A. Yes.

Q. And what conversation did you have with him when you bought the earphone, about payment for the phone?

A. I asked him this—he let me have the 'phone on trial for a week or two and he came around and said, "How about buying it?"

I said, "Well, it proved satisfaction," and I would be interested in buying it provided he would trade part of it out in gas and oil or greasing and oil or tires and batteries, or anything he would need in my line.

He said he couldn't do that. I said, "Why?"

He said, "In the first place, do you give a discount?"

I said, "No, sir; I do not."

He says, "Why?" He said, "At the present time I am trading at Ned's and get 2 cents discount with a cash receipt."

He said, "I pay them for 8 gallons of gas $1.30, and he gives me a receipt—" and I haven't got any, but he showed them to me, and said he could turn those receipts in for 2 cents a gallon discount on anything Ned's had to sell, gas, oil, or a grease job, or most anything, and he did
727 say: "I have enough saved up to buy a set of car cushions; seat cushions for the car," so he was in next Monday and showed me he had purchased—showed me the seat cushions on the car; so he asked me what I ever found out about it, and I said, "I object to any discount. It seems to me like a hidden discount," and he said, "Well, I guess that's what they call it."

Q. Well, has he bought any gasoline at your station or did he agree to buy?

A. Yes.

Q. Did he agree to buy there?

A. Yes, he agreed to buy $10 worth on the purchase of this headphone, and I asked him could he buy more, and he said no. The reason that—he would give me more but that he could get 2 cents discount on his purchase of gas and he didn't feel like paying the difference of it, and he asked me would I give him the discount. I says, "No, sir, I can't do that unless you give me a discount on the headphone." He said well, he couldn't do that. And

I said, "Well, I can't do the other, either." And that is about all that we had to say about it.

Trial Examiner Ballinger: When did this occur?

The Witness: Why, around the middle of March.

Trial Examiner Ballinger: This year?

The Witness: Yes, sir.

728 By Mr. Austin:

Q. Do you mean March?

A. March. Well, that is when I first started buying the headphones.

Q. Well, this is March, you know.

A. I mean February, February of—

Q. Last month?

A. Yes, last month.

Q. Did he say what Ned's station he was buying at?

A. Well, he said at West Chicago and Grand River.

Mr. Austin: That is all.

Mr. Hanley: No cross-examination.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Trial Examiner Ballinger: I would like to confer with counsel.

(A conference was had off the record.)

Mr. Austin: Mr. Christian.

GUY EDWARD CHRISTIAN was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination.

Trial Examiner Ballinger: What is your full name?

729 The Witness: Guy Edward Christian.

By Mr. Austin:

Q. Where do you reside?

A. At 5428 Kingston Avenue, Dearborn.

Q. What is your business, Mr. Christian?

A. Retail dealer in gasoline and oil.

Q. Do you operate a retail gasoline service station?

A. I do, yes.

Q. Where is it located?

A. 14402 Michigan Avenue, Dearborn.

Q. What brand of gasoline do you handle, Mr. Christian?

A. Mobilgas.

Q. Who makes that gas?

A. The Socony Vacuum Oil Company, Incorporated.

Q. Do you buy from them?

A. I do, yes.

Q. Do you buy in tank truck delivery?

A. By truck delivery, yes.

Q. Have you records with you, Mr. Christian, as to the volume of Mobilgas sold at your station since 1936 and the prices which you charged for it?

A. I have, yes.

Q. Before I ask you for that, do you know whether you have always paid the Socony Vacuum posted tank wagon price for Mobilgas?

730 A. Yes, sir.

Q. I would like to have you take your records and, starting with January, 1936, if you have it there, state for each month the number of gallons of Mobilgas sold at your station and the price charged during that month; if there was a change during the month, you can say so.

A. Starting in January, 1936?

Q. Yes.

A. They were selling gasoline—

Mr. Austin: Off the record, please.

(A discussion ensued off the record.)

The Witness: You want this in round figures?

By Mr. Austin:

Q. Give the actual figures that you have.

A. The actual figures. Mobilgas in 1936, sold 17,705, retailed at 15.9; that is, including the state sales tax.

Q. All of these figures include the sales tax?

A. That includes everything.

Q. Go right along for each month on that same basis.

A. There was a change of price of January 17th of a half a cent.

Q. Making it what?

A. That month. Making it 16 cents. Wait. Let's go back here now. 15.9. Yes. 16.4. That is including half a cent raise there. That was on the 17th.

731 Q. That is .9 of a cent raise? Isn't it?

A. Pardon?

Q. 15.5 to 16.4?

A. .5. That is what I said, half a cent.

Q. Didn't you say 15.5 to 16.4?

A. No. 15.9 to 16.4.

Q. Oh, I am sorry.

A. Now, in February that price remained at 16 cents and we sold 14,665.

March, their price remained the same. We sold 21,658 gallons.

Trial Examiner Ballinger: What was your price then?

The Witness: 16.4. That includes all tax.

Trial Examiner Ballinger: Now, the previous month was 16.4, wasn't it?

The Witness: That is right, back here in February. We had no price change in February. It remained the same.

Trial Examiner Ballinger: You stated 16—

The Witness: 16.4.

What confuses me here slightly is in these figures in this book here, this is my Michigan State Sales Tax report, we drop the state sales tax, the .4 of a cent on this price here; understand? The difference would be added on the book.

732 By Mr. Austin:

Q. You just state the price you sold it at and the number of gallons.

A. All right. That is fine. That is, at March it remained at 16.4, and in April the same. We sold 21,580.

May, 16, and there is a price change of ½ cent a gallon on May 30th, of half a cent. During that month we sold 25,403.

Trial Examiner Ballinger: The price then was what?

The Witness: It went up half a cent more, and that would bring it to 16.9.

Trial Examiner Ballinger: 16.9.

The Witness: .5 on top of 16.4.

By Mr. Austin:

Q. Mr. Christian, we will save time if you don't talk about half cent raises. You say, for instance, on May 30th, the price was 16.9, and then go on.

A. All right.

Q. We can figure out later whether that is half a cent up or down.

A. During June, 21,183 gallons. The price increased on the 24th, 17.4.

July, 35,430; price 17.4 all through the month.

733 August, 34,409 gallons; price same 17.4. September,

31,636; price remained the same. October 28,345; same price. November 22,730; same price. December 15,849 gallons; price remained the same. In round figures, approximately 190,000 gallons.

Q. What was that last?

Trial Examiner Ballinger: For the year.

A. For the year, that is, in round figures, approximately 190,000 gallons.

Q. All right.

A. In 1937: January 16,245; price remained the same 17.4.

February, 14,884. And on the 2nd we had an increase of .6 of a cent, made at 18.2. Get this right. Well, take it back. 18.1. My addition isn't so good. 18.1. That is on the 2nd of February.

March 17,505; price same.

April, 17,914; same price.

May, 20,804; price went up. Wait, now. Let's go easy now. It went up, yes, half a cent, which would make it 18.5; I believe. That was on the 12th.

June, 20,263; 18.5.

July, 24,742, at 18.5.

August, 23,609; same price.

734 September, 21,458; no change.

October, 21,621; same price.

November, 19,048; price same.

December, 16,521; no price change.

In round figures for the year 1937 we had 226,000 gallons, that is, Mobilgas.

Now, in 1938: January, 12,875; price same, 18.5.

February, 9,416; price the same.

March, 12,049; the price the same.

April, 12,396; price the same.

May, 11,988. Gas dropped one-half cent on the 1st day of the month, brought it down to 17.8.

By Mr. Austin:

Q. Let's pause there just a minute, Mr. Christian. What month is that?

A. That was in May, 1938.

Q. When you say gas dropped, did your tank wagon price drop or did you cut your price without any drop in the tank wagon price?

A. That probably was a station cut without any tank wagon. We were confused along with a variation and fluctuation in price. This is my station price. I can't recall right offhand whether this was tank wagon or voluntary out for ourselves. See? I could probably get those figures for you, if necessary.

735 June, 11,319; same price.

July, 12,209. Here is where we went into the scrap. We dropped the price down from 17.8 to 16.2.

Q. Was your tank wagon price that you paid for gas reduced at that time?

A. No, the tank wagon price was not reduced that I can recall right at the present.

Q. Was that a cut in your margin?

A. It was a cut in our margin to meet competition.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

A. (Continuing) August, 12,721; price remained the same.

September, 12,861.

And then in October 11,494.

November, 10,771.

December, 9,820.

In round figures, 136,000. That ends 1938.

Starting in 1939: 8,800.

736 Q. What is the price now?

A. 14.6 plus your sales tax of .4; it will be 15 cents even on Mobil gas.

Q. How long has that 15 cents been in effect?

A. That went into effect the first day of January, 1939.

Q. Is that another price cut?

A. It is another price cut.

Trial Examiner Ballinger: First day of January of what year?

The Witness: 1939.

A. The gallons on that are 8,800.

February, 9,238.

March, 13,493.

April, 16,762.

May, 19,429.

June, 18,325.

July, 19,783.

August, 19,187.

September, 18,056.

October, 15,768. We have another price reduction on that: 13.8. That went into effect, here, the first of October.

Q. Was there a cut in the tank wagon price at that time?

A. That, I can't answer right off, whether it was, or not. We had plenty of price conditions at that time.

November, 19,600.

December, 16,605, and I haven't the round figures 737 on that, in Mobil gas; I didn't total them.

In 1940 gas went up a little bit, starting the first of the month, sold at 15.8; 15,354.

February, 13,897.

March, 15,659.

Trial Examiner Ballinger: The price?

The Witness: The price remained the same; 15.8. This is since the first of the year.

By Mr. Austin:

Q. What year is this, now?

A. 1940.

In April, 15,935—

Trial Examiner Ballinger: Same price?

The Witness: Right.

A. May, 18,287.

June, 19,771.

July, 22,613.

By Mr. Austin:

Q. Wasn't there a price change in July?

A. No. No price here, showing a change. This, you understand, is .4 of a cent paid me at 15.8—

Q. Didn't you have to add on a Federal tax in July, 1940?

A. We added that on—yes, we added that on.

Q. What was your price in July, 1940? What price did you charge?

738 A. 16.3.

Q. And the previous month you told it was 15.8, didn't you?

A. 15.8. That was back in June, and I guess that's where that price came in there, of a half a cent—

Q. Was there or wasn't there a price change at that time?

A. There was a price change of the Federal Defense Act on gasoline, but that took place in July, I think.

Q. Weren't you giving us the figures for July?

A. Yes, June 15.8; and July 16.3.

August, 24,318.

September, 21,674.
October, 19,434.
November, 17,392.

Q. Still 16.3?

A. 16.3.

December, 1940, 17,710. Price was the same.

Trial Examiner Ballinger: What is your total for the year?

The Witness: I haven't the round figures for that.

By Mr. Austin:

Q. Was there a Ned's Auto Supply Company service station located near you?

A. Yes.

Q. How far from you?

A. I would say three blocks, to be exact.

739 Q. You are on Michigan Avenue?

A. That's right.

Q. And is Ned's station on Michigan Avenue?

A. That's right.

Q. Three blocks away?

A. Yes.

Q. Is there a Langer's Texaco station near there?

A. Yes.

Q. Where is that as regards your station?

A. Just across the street.

Q. When did the Langer station come there?

A. In 1936.

Q. Was there a service station at that location prior to the time that Langer's came there?

A. No, there wasn't.

Q. Was it a new station, then?

A. There was no station at all. This is a brand new setup.

Q. Do you recall what your margin was in 1936 and 1937 on the sale of gasoline; between what you paid for it and what you sold it for?

A. I am on a gallonage basis. I pay a rental of 1.7.

Q. I mean, what was your margin of gross profit; the difference between what you paid for gasoline and what you sold it for?

A. Around three, three and a half, I would say.

740 Q. That is, after you deduct the rent?

A. No.

Q. Are you talking about now, or that time; speaking about 1937 or 1938?

A. I have always been on a straight rental base with the company, regardless what the tank wagon base has been, of 1.7 per gallon.

Q. You mean you pay 1.7 per gallon?

A. I pay rental.

Q. What was this figure of 3.3 you just gave?

A. 3.3?

Q. Yes.

A. You asked me—do you want to know the dealer's margin of gross profit on the sale of gas?

Q. That's right.

A. I don't know as I can answer that right off, because the price at that time was so changing, not only from the tank wagon, but marketing conditions.

Q. Is this 1.7 a gallon you pay the company?

A. That's right.

Q. That includes all rental?

A. That's right.

Q. You have no flat rental above that?

A. No, straight gallonage rental.

Q. That station is in the business section, isn't it?

741 A. Yes.

Q. Right in Dearborn?

742 A. Well, as near as you would want to be.

Q. At the time the Langer stations started operation in 1936 was Ned's station selling at the same price you you were or not?

A. No. Ned's is more or less, ever since I can recall of being in business, there was price cutting on gasoline. Sometimes it would clear up for a short period and then break out again.

Q. In 1936 were they selling below you, or not, at the time Langer's station opened?

A. Yes.

Q. How much below?

A. Well, they had what we more or less term them secret discounts.

Q. Just tell us what the price was. I don't care about whether you tell me how they arrived at them.

A. As far as their pump settings are concerned, it is always a known fact that Ned's had a pump rating competitive with other dealers but didn't mean anything in reality.

Q. Would Ned's post any signs advertising discounts along in 1937 and 1938?

A. Oh, yes; very much.

Q. Then at that time the price cutting was open, wasn't it?

A. It was really open, on a big scale.

743 Q. And did Langer's do the same thing?

A. Yes, they did.

Q. When Langer's opened up at that location did they start selling at the same price Ned's was or at your price?

A. They started selling at the price Ned's were selling at.

Q. Has Ned's ever circulated any cards or advertisements in that neighborhood or put them on parked cars, advertising discounts?

A. I can't say that they ever did that, no.

Q. During the latter part of 1937 and the early part of 1938 do I understand you that during all of that period that Ned's price was lower than your price?

A. That's right.

Q. What observation did you make, then, regarding any customers that you know and whom you recognized, who drove by there—were there customers who drove by there regularly whom you knew and could recognize?

A. That's right. I go to the bank most every day and I have to pass Ned's establishment on the way. Many times I have seen customers of mine in there buying gasoline. I have had customers saying that 2 cents was quite a savings to them. They had nothing against my service, but were taking advantage of the 2 cents.

Q. This was along when?

A. In 1937 and 1938.

744 Q. Prior to the time that you cut your price?

A. Yes.

Q. And by that I mean the time when you said you were getting into the scrap, I believe.

A. That was before, yes. We cut our price to meet competition.

Q. Did you have a customer named Sanderson?

A. Yes.

Q. Do you know his full name or where he lived?

A. Dennis Sanderson. I believe he lives on Robertson in Dearborn.

Q. Did he buy gasoline regularly at your station at one time?

A. Yes.

Q. When did he leave you, or has he ever left you?

A. He left me the latter part of 1937 and most of 1938 and he said due to working conditions ~~and one thing and~~ another he tried to take advantage of this saving of 2 cents a gallon, which was not out of his way to go over there, to get it at Ned's, rather than to come over to us and pay 2 cents more.

Q. About that time, say 1937 and 1938, did you ever hear any radio broadcasts advertising Ned's station or Ned's service?

A. Yes. Ned's had a broadcast. If I recall this
745 right, it was a short—what you would call a minute or two minute announcement of the saving. I can't say for certain whether they quoted what you saved at the time, but I do know they advertised a large savings at Ned's; their unit. They gave the locations of them, where these savings could be obtained. I won't say whether they quoted exactly 2 cents, or any figure, but I do know they quoted the savings you could receive by patronizing Ned's stores.

Mr. Austin: That's all.

Cross-Examination by Mr. Hanley.

Q. Mr. Christian, will you please locate your station on the map, Respondent's Exhibit 1, for identification?

(The witness does as requested.)

Q. As I understand you, the Langer station which opened up out there began selling when they started business at the same price that Ned's was selling?

A. That's right.

Q. And Ned's was giving the 2 cents discount at that time?

A. That's right.

Q. So Langer was also giving it when they opened their business?

A. It was competitive to us.

Q. So anyone, such as Mr. Sanderson told you, as being interested only in the 2 cents saving, they could have gone either to Ned's or to Langer's and obtained that
746 saving over what you were selling gasoline at that time?

A. That's right.

Q. How near are you to Michigan Avenue and Telegraph Road?

A. Five miles.

Q. I don't know anything about this geography, but I am trying to learn if there was a street out there near your station that carried heavy traffic that during 1938 or 1939, about that time, was closed or under repair or something of that sort?

A. In 1938 or 1939?

Q. Or about that time.

A. Well, if there was any structure there it didn't interfere much with us at our location.

Q. That's all I want to know. If there was any such thing out there, that hasn't affected you at all?

A. No, there was nothing like that that affected us at all.

Q. Do you recall the name of any other individual to whom you talked about the difference in price obtainable elsewhere than your station?

A. You mean a customer?

Q. Yes, other than Mr. Sanderson.

A. I talked to my customers in regard to the situation
and they thought it was just about as bad a situation for
me as an individual dealer having to stay there under
747 the circumstances I was under, and take the licking
that I took during this price war, which I had no way
at all to meet it.

Q. And you were adjacent to both Ned's and Lanker's all through that price war?

A. That's right.

Q. And you cut your price some time in 1937?

A. No, I believe it shows we cut our price back in 1938.

Q. You didn't cut—

A. We didn't get into the big price war until the latter part of 1938.

Q. When did you cut in 1938?

A. The exact date when we got into the fight was in August.

Q. 1938?

A. Yes.

Q. And when did you start up? When did you go back up? I don't mean the first time. I mean when did the thing right itself, as far as you are concerned?

A. Well, it gradually—it fluctuated as long as this price war existed, and it eventually did start to clear up a little later on in 1939. Gallonage began to come back, old customers we lost began to come back because the marketing condition began to clear up. They had nothing to induce them to go away from us to get this 2 cent saving.

748 Q. So the 2 cents wasn't being offered any more? Is that what you mean to say?

A. I can't say it wasn't being offered, because it has always been a known fact that discounts have never been out of the picture as far as Ned's is concerned.

Q. How about Langer? How about their station after they opened out there?

A. Their pump readings didn't mean anything at either place.

Q. Neither at Langer's nor at Ned's?

A. No, because customers said they could go out there and get a discount and their pumps read the same as ours, and that existed in both places.

Q. But notwithstanding that that kept on, there did come a time in 1939 when that didn't affect your business any more; customers came back?

A. It wasn't such an open war any more. It cleared up through some court action, or some things came out that things cleared up. Dealers realized they couldn't go on and stand a price war and still exist.

Q. And that's your judgment now?

A. That is my judgment now; that those in it took an awful licking.

Mr. Hanley: That is all.

749 *Redirect Examination by Mr. Austin.*

Q. Langer's is a Texaco station, is it not?

A. They advertise Texaco products.

Q. Do you know who they buy from?

A. They have a distributor—it is a Polish name—that has been delivering their gas; one of these what you might call a transport company. They deliver his gas and as to where they buy it, I couldn't tell you. It is not a genuine Texaco truck. It says on the panel on the side of this truck: "Texaco." That is the only identification you could go by, but it is a Texaco product.

Mr. Austin: That is all.

(Witness excused.)

Mr. Austin: I move we adjourn for lunch until 2:15.

Trial Examiner Ballinger: Without objection, the motion is granted and now, at 1 P. M., the hearing stands in recess until 2:15 P. M.

(Thereupon at 1 P. M., a recess was taken to reconvene at 2:15 P. M.)

750 Afternoon Session.

2:15 P. M.

Trial Examiner Ballinger: Come to order.

FRED H. BRANTON was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination.

Trial Examiner Ballinger: Give me your full name, please.
The Witness: Fred H. Branton.

By Mr. Austin:

Q. Where do you reside, Mr. Branton?
A. 319 East Euclid. It is my home address you want?
Q. Are you in the gasoline business?
A. Yes, sir.
Q. What is your business?
A. Gasoline, oils, grease jobs.
Q. Retail? Wholesale?
A. Retail.
Trial Examiner Ballinger: You run a service station, do you not?
The Witness: Service station, yes, sir.

By Mr. Austin:

Q. Where is it located?
751 A. 7635 John R.
Q. Is John R a street, avenue, road, or what? I never did find out?
A. Well, it is John R. Road, I guess. That is, the original, but I think that is proper, John R Road.
Q. How long have you been in business at that address?
A. About a little better than four years, or about four years.

Q. How long have you been in the oil business, Mr. Branton?

A. Oil business? Well, off and on since 1907.

Q. Here in Detroit?

A. No, not altogether; no.

Q. What business were you engaged in before you started operating this station?

A. Where I am now?

Q. Yes.

A. Well, I was up in another station at John R and Euclid before this.

Q. When did you leave John R and Euclid, did you say? About five years ago?

A. Four years, around four years ago.

Q. Why did you leave there and move to your present location?

A. Well, this other—the Standard Oil people offered me this site, so I—leased me this place; why I just thought
752 it was a better proposition, and I took it.

Trial Examiner Ballinger: Did you open this station about four years ago?

The Witness: Well, no. This station has been in operation for a number of years before.

Trial Examiner Ballinger: How long under your supervision?

The Witness: Well, going on four years I have been there.

By Mr. Austin:

Q. Do you buy your gasoline from Standard Oil?

A. Yes, sir.

Q. What brands do you handle?

A. Red Crown, Ethyl, and the Blue, Stanolind—or, the green.

Q. Do you obtain your gasoline by tank truck deliveries?

A. Yes, sir.

Q. Do you pay the tank wagon price?

A. Yes, sir.

Q. After you moved from the location at John R and Euclid, what happened at that location?

A. It was taken over by the Lanco Oil people.

Q. Is that L-a-n-c-o?

A. Lanco Oil.

Q. What does that name stand for, the name Lanco?

753. A. You can't prove it by me. I don't know. It is serviced by the Citrin Oil people.

Q. By whom?

A. Citrin-Kolb.

Q. Citrin-Kolb?

A. Yes, Citrin-Kolb.

Mr. Austin: Off the record.

(A discussion ensued off the record.)

754 Mr. Austin: It will be stipulated that the station at John R and Euclid, which the witness has just referred to as a Lanco Oil Company station is a Langer & Cohen station, which is a retail dealer, supplied by Citrin-Kolb.

Trial Examiner Ballinger: That is assented to by counsel for the Respondent?

Mr. Hanley: It is, Your Honor.

By Mr. Austin:

Q. Did the Lanco station move into that address shortly after you left?

A. I presume about, possibly, five or six months after I left. The people that had the place—there were two different parties in there, I think, before the Lanco people took it over.

Trial Examiner Ballinger: You say "think." That is to the best of your recollection?

The Witness: Yes, there were two other people in there, and after that it was vacant for about two or three weeks.

By Mr. Austin:

Q. And after the Lanco Oil Company took over the station, do you know whether they were selling Standard Oil gasoline below the price you were selling at your station, on the same brands?

A. Yes, sir.

755 Q. How do you know that?

A. Well, there were customers that came down, and I lived right in that same block, and the neighbors would tell me, ask me why I couldn't give them two cents off on gas, or if I would give them two cent off on gas, and I said no.

Well, they said, "I can get it here at your old stand." Of course, that is the only knowledge I have of it. I never bought any there.

Q. How far away was your new location from the old location?

A. About five blocks.

Q. On the same street?

A. Yes, sir.

Q. Did the Lanco Oil Company station give out cards in that neighborhood, advertising cards?

A. Yes, sir.

Q. Did you see any of those cards?

A. Yes, sir.

Q. Have you any of them now?

A. No, sir.

Q. Did those cards advertise any discount?

A. Well, it mentioned discount, yes.

Q. I show you this card, marked "Commission's Exhibit 36," and ask you whether the cards to which you have referred, are similar to that card, and if so, in what respects (handing document to witness.)

756 A. The only thing I can say, that it might be similar, is in size. I don't recall anything that was on them. I know several of my customers just drop them into the station, or something. When they came in for a purchase, they said, "See what I got?" They would say, "See what I can get?"

Q. When you say they came in for a purchase, what do you mean? Gasoline, or something else?

A. Gasoline, maybe oil or grease job.

Q. Would any of them come in for a grease job and not buy gasoline?

A. Yes, I have a lot of my grease jobs and not gas.

Q. Of course, they might be there—that might be for other reasons; maybe they didn't need any gas.

A. Sure; possibly, yes.

Q. During the remainder of 1937 and early 1938, do you remember what your margin was on gasoline then?

A. I can't recall. I can't give it to you.

Q. How long did that continue after the Lanco people moved in there; that your customers would show you those cards and tell you about their discounts?

A. That lasted part of one summer. I think, but it has never been any different, I don't suppose. If they didn't have cards, they circulated bills.

Q. What do you mean by bills?

A. Advertising handbills. They put them all over.

757 our neighborhood three or four times last Fall or last summer.

Trial Examiner Ballinger: What did those handbills advertise?

The Witness: Advertised their discount on different articles they could get for their merchandise.

Trial Examiner Ballinger: Including gasoline?

A. Gasoline, and stating that they were giving dishes and electric clocks and so on and so forth. I can't recall just exactly word for word what was on any of them. I never kept them and never paid much attention to them. I always figured if they wanted to give their stuff away, that was their business. I wasn't.

758 By Mr. Austin:

Q. Did you ever reduce your price to meet their competition?

A. No, sir, I didn't reduce the price until we were asked to meet a certain price to stop this discounting; that's all.

Trial Examiner Ballinger: You say you were asked to do that. Who asked you?

The Witness: I think it was one of our salesmen said they were all beginning putting up signs, and would like us to follow them, to fall in line, so we did.

By Mr. Austin:

Q. You say they were putting up signs. Who do you mean?

A. All the dealers around.

Q. When was that?

A. That was around the fall of 1938; along in the winter. Somewhere in there—no, 1939, I guess it was.

Q. It was a price war in 1939, wasn't it?

A. Yes. That was the closing up of the price war, when they all set up their signs for 7 for $1.05, I believe.

Mr. Austin: That's all I have with the witness.

Cross-Examination by Mr. Hanley.

~~Q. When did the Lanco people go into this John R and Euclid station, Mr. Branton?~~

759 A. I couldn't say, but I judge it would be around five or six months after I left there, and I left there the first day of July, 1937; going on there. I think it was 1936

or 1937. They had another party in there, was in there two or three months and he had to get out and they had somebody else in there that picked up and moved in the night, and then it was vacant.

Q. Well, would it be around the last days in 1936 or first days of 1937, Mr. Branton?

A. I couldn't tell you that. As near as I can recall, it would be six months or something like that, or seven.

Q. After July, 1937?

A. After I left. I think I am right on the dates. I may have been off on that a little.

Q. When did it first come to your attention that there were sales being made at that station at a discount under your price?

A. Just as soon as they went in there, they started.

Q. And how long did that last, do you know?

A. I don't think it has ever stopped.

Q. You think it still exists?

A. Yes, sir.

Q. What leads you to believe that it is in existence now?

A. Well, a business man on the corner up there—I am
right across from him—no later than ten days or so ago
760 made the remark that he didn't know why he was
coming down there when he could just go across the
corner and buy gas for the same price and get an electric
clock given to him or a set of dishes.

Q. Well, that is the premium business?

A. Yes.

Q. What I really had in mind was this two cent business.

A. Well, I don't know about that or when he stopped it or anything.

Q. What is the last you knew of it, that that was being done?

A. Well, that might—I could put it anywhere from six months to a year after he went in, possibly.

Q. You made your cut in price at what time?

A. Well, it would be right at the closing up of the price war.

Q. When was that?

~~A. I can't answer that.~~

~~Trial Examiner Ballinger: Do you know what year it~~ was?

The Witness: Well, it must have been in—I guess it must have ended up in '39. Now, you people know more about that than I do.

By Mr. Hanley:

Q. I am sure I don't.

761 A. Well, I can't—I wouldn't swear to that, because I don't know.

Q. That is your best recollection?

A. That is my best recollection.

Q. That you had a cut price for how long at that period?

A. Well, the price was on there all one summer, I guess.

Q. Do you think that was in 1939?

A. I think so, somewhere in there.

Q. How far from your location is Taylor and Woodward, the intersection?

A. Well, that is on the other side of Woodward. That will be—oh, that will be 10 or 11 blocks, I should think.

Q. Is there a Joy station at that point?

A. There is one right up there. I presume it is there. It is this side of Clairmont.

Q. Is there a Sun dealer somewhere near you?

A. Yes.

Q. How far?

A. There is a Sun dealer at Philadelphia and Woodward, and there is one at Hague and John R, I think it is, right in the corner of the alley in-between.

Q. In terms of blocks how far are those stations away from you?

A. Well, one of them would be seven and the other would be 12 or 13.

762 Q. Is there any such station about two blocks south of you?

A. Yes.

Q. A Sun station?

A. That is a—now, two blocks south of me would be Citrin-Kolb's old stand, Citrin-Kolb.

Q. You say old stand?

A. That is the stand that they used to do business in themselves and I presume—I understand they have leased it out, subleased.

Q. Is there anyone doing business there now?

A. Yes.

Q. What kind of gasoline do they handle?

A. Standard Oil.

Q. Is there a Gulf station anywhere in your immediate vicinity?

A. Yes, down the corner of Baltimore and—right down near Baltimore there and John R.

Q. In terms of blocks how far is that from you?

A. Oh, that would be about five blocks.

Q. Now, with particular reference to the Sun stations and the Gulf station that you have testified about, has there been a time since you went into that location that those stations have been selling at a price less than your price?

763 A. I wouldn't say. I don't know.

Q. You mean you just don't know about that?

A. I just don't know. In fact, I never paid much attention to them, what any of them that cut price. I couldn't cut price so I didn't pay much attention to them.

Q. I show you, Mr. Branton, a map of Detroit marked Respondent's Exhibit No. 1, for identification, and will ask you if you will put a mark on the map where you are located.

A. Well, let's see. Right here (indicating). On the southwest corner of Smith.

Mr. Hanley: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Mr. Austin: May we have a brief recess, your Honor?

Trial Examiner Ballinger: Take a recess for five minutes.

(A short recess was had.)

Trial Examiner Ballinger: Come to order.

Mr. Hanley: For the record, please. It is agreed by counsel that the Respondent may prepare a map of Detroit indicating the locations of the various service stations
764 that have been testified to by the several witnesses,
and which may be testified to hereafter in this proceeding, and that such map may be prepared and offered as an exhibit at the option of the Respondent at some later time in the case, and that the Respondent may withdraw its exhibit marked Respondent's Exhibit No. 1, for identification, it being understood that such locations as are indicated on any map to be presented shall be as such locations are reflected in the testimony.

Is that all right, Mr. Austin?

Mr. Austin: I don't stipulate that such map may be received in evidence. I prefer to reserve my right to make any objections, if any, that I might want to make at the time. I am not indicating that there will be any, but I just want to say that I will stipulate that—I will not object to any such map for the reason that it wasn't marked or that the locations weren't identified by the witnesses as they went on the stand, provided I have an opportunity to check it.

Mr. Hanley: Will you agree that you will not object to the foundation, reserve for yourself any objections as to materiality or relevancy that you may care to reserve?

Mr. Austin: By foundation, you mean the fact that the witnesses referred to those stations here?

765 Mr. Hanley: That is right, and that the map is all right. We will produce an adequate map.

Mr. Austin: No, I won't object to the foundation as described.

Mr. Hanley: Very well.

Mr. Austin: Mr. Ward.

EARL K. WARD was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination.

Trial Examiner Ballinger: Let me have your full name, please.

The Witness: Earl K. Ward.

By Mr. Austin:

Q. Where do you reside?

A. 955 Hudson, Detroit.

Q. Do you operate a gasoline service station, Mr. Ward?

A. Yes, sir.

Q. Where is your service station located?

A. 901 West Warren, at the corner of Fourth.

Q. How long have you operated that station at that address?

A. Five years, as an independent dealer.

Q. Do you lease that station?

A. Yes.

766 Q. From whom?

A. From the Standard Oil Company.

Q. What brands of gasoline do you sell at the station?

A. I sell Standard Red Crown, Ethyl, Stanolind gasoline.

Q. Do you buy all of that gasoline from the Standard Oil Company?

A. Yes, sir.

Q. How is it delivered to your station?

A. By tank wagon.

Q. And that is true as long as you have operated the station there?

A. Yes.

Mr. Austin: Your Honor, I would like to have this document marked, for identification.

Trial Examiner Ballinger: It will be marked as Commission's Exhibit 61, for identification.

(The document referred to was marked, for identification, "Commission's Exhibit 61.")

767 By Mr. Austin:

Q. Mr. Ward, will you describe this document, marked Commission's Exhibit 61, for identification?

A. Why, it is a record of my gasoline purchases from the Standard Oil Company, all of 1937 through 1940.

Q. Does that include all three brands of gasoline?

A. That includes all brands, yes, sir.

Q. I understand that those are your purchases and not your sales?

A. That is my purchases, right.

Q. Do you maintain a very large inventory at any one time?

A. The most we could possibly maintain would be 3,000, and it doesn't average more than, I believe, twelve or fifteen hundred at any time, at any given time.

Trial Examiner Ballinger: When you say 3,000, you mean 3,000 gallons?

The Witness: Gallons, yes, sir.

Q. Now, are those figures very far different from the amount of your sales?

A. No, they would be quite similar.

Q. From what records were those figures prepared?

A. From the records of my purchases from the Standard Oil Company.

Q. Did you prepare those figures yourself?

768 A. I got them from my salesman, from the Standard Oil salesman.

Q. Did you ask him for them?

A. Yes, sir.

Q. When?

A. About three days ago.

Q. Do you have any records in your own office of the amount of your purchases?

A. Yes, I would, by going through my books or my daily receipts of gasoline.

Q. Did you compare these figures with your own records?

A. I did a couple of months, and they were right.

Mr. Austin: I offer this gallonage record of Mr. Ward, in evidence.

Mr. Hanley: Only the general objection.

Trial Examiner Ballinger: Subject to the general objection reserved by counsel for Respondent, the document is admitted in evidence as Commission's Exhibit 61.

(The document referred to, heretofore marked for identification, "COMMISSION'S EXHIBIT 61," was received in evidence.)

By Mr. Austin:

Q. Where is the nearest Standard Oil retail gasoline station to your station?

A. It is at the corner of Warren and Brooklyn.

769 Q. How far away is that from your station?

A. Two blocks.

Q. Do you know who operates that station?

A. It is operated by the name of the Lanco Oil Company.

Q. Do they have their sign on the station?

A. Yes; Lanco Oil.

Q. And does the name of Citrin-Kolb appear anywhere on the station?

A. No, I don't believe so.

Q. Do Standard Oil signs appear on the station?

A. Yes.

Q. Do they sell Standard Oil gasoline?

A. Yes, sir.

Q. The same brands you sell?

A. Yes, sir.

Q. At least, you know they sell Red Crown and Ethyl.

When did that Lanco Oil Company station open up at Warren and Brooklyn?

A. I can't answer that. It is years ago.

Q. Was it five years ago or ten years ago?

A. It would be nearer ten years ago, but they weren't handling Red Crown gasoline all the time.

Q. How long have they been handling Red Crown gasoline?

A. Since 1936.

Q. And when they started selling Red Crown gaso-
770 line, did you notice any advertising from that station?

A. Yes.

Q. Will you describe it?

A. Yes. I believe the day they opened up, they passed courtesy cards to the neighborhood, and a few days later, they had a large sign up, stating one or two cents discount. I can't remember.

Q. You mean a few days after they started selling Standard gas?

A. After they started selling Standard gas, yes.

Trial Examiner Ballinger: When did you say they started selling Standard gas?

The Witness: I can't say the month, but it was in the Fall of 1936. I remember that, definitely, because I leased from the Standard Oil Company in June of 1936, and they started quite soon thereafter.

Mr. Austin: In view of that testimony, Judge Hanley, I would like to ask whether you have here the figures for the volume of purchases for Mr. Ward's station for 1936?

Mr. Hanley: We have it by months, and the total. That is a statement of his purchases of Standard Oil Company.

771 Mr. Austin: Would it be agreeable to you to either read the 1936 figures into the record; let me read them in or substitute these figures for the other, so that the 1936 figures agree with the other?

Mr. Hanley: It is agreeable to withdraw the present Exhibit 61 and substitute this as Exhibit 61; is that what you had in mind?

Mr. Austin: I would be glad to do that.

Trial Examiner Ballinger: Do you ask leave to do that?

Mr. Austin: I ask leave that this sheet which was just dentified by Judge Hanley be substituted for the sheet ow in evidence as Commission's Exhibit 61.

Trial Examiner Ballinger: The request is granted. he sheet original introduced in evidence will be withlrawn and the present document substituted therefor and e marked Commission's Exhibit 61, subject to the same eservation by counsel for the Respondent.

Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

y Mr. Austin:

Q. Did you say that this Lanco Oil Company station vas on the same side of the street or on the other side of the street from you?

772 A. It is on the same side.

Q. Did you notice any loss of business at your staion after the Lanco Oil Company became a Standard Oil lealer?

A. Not an appreciable loss, no.

Q. Do you know of any specific cases where customers vho had been buying regularly at your station ceased to uy and told you the reasons why?

A. Yes. They gradually dwindled off and got away rom me, finally.

Q. Can you describe any specific instances that you ave in mind?

A. Yes, I have. The name of the party is Coughlin and hey live on Hancock. They told me at various times that hey could save money by going down there, and they lid. I could name a lot of others. They went to Warren nd Brooklyn to save 2 cents a gallon.

Q. Did you see any signs at that station advertising 2 ents a gallon off?

A. Yes.

Q. When did you see those signs?

A. I saw them for about a year and a half, I believe, ltogether.

Trial Examiner Ballinger: During what period?

The Witness: Shortly after the fall of 1936, right through 1937 and most of 1938. The signs varied, of

773 course; different times they were up and then they were down.

By Mr. Austin:

Q. Do you know whether the price being charged for Red Crown gasoline by Langer and Cohen station, from the time they moved in there up until the end of 1938, was as high as the price charged at your station?

A. It was not. The average was 2 cents lower, I would say.

Q. And when did that advertised price cutting at Langer and Cohen station—or, to change that: when did the situation, as you have just described ~~as~~ to a difference in price between their station and your station cease?

A. I believe it was in the spring of 1939 when, so to speak, everyone cleaned up. They all set their price at 15 cents a gallon, I believe.

Q. You mean in your neighborhood?

A. Yes, in my neighborhood, and general, throughout the city. Of course, we all knew that.

Q. From the spring of 1939 until the end of 1940 was there any variation between the advertised posted price at the Lanco station and the price at your station?

A. No, sir. It was posted the same as my price, I believe.

Q. About what month did that situation commence,
774 where their price was the same as yours?

A. I believe that was about March or April of
1939. I am not positive of that.

Q. Now, after that period, and during 1940, has the Lanco Oil station at Warren and Brooklyn been giving any premiums?

A. Yes.

Q. What premiums have they been giving?

A. Oh, berry sets and water sets. That's all I can say positively. I saw their circular advertising water sets. They gave one with every 7 gallons purchased until you receive a full set.

Trial Examiner Ballinger: What is a water set?

The Witness: I believe it is a pitcher and some tumblers, your Honor. They call it a water set.

By Mr. Austin:

Q. Have you had any conversation with customers in 1940 who told you that they were buying their gas at Langer and Cohen's so that they could get those premiums?

A. Oh, yes; quite a few.

Q. Do you remember any of their names or any conversations?

A. Yes. I had a Mr. Jackson who lives on Warren Avenue—he told me that the minute his old lady got the dishes over there he would be back with me. He said he would rather trade over here, but as long as he got
775 those dishes, he would rather trade with them.

Q. In other cases—are there any other cases?

A. Lots of people told me they were buying their gas there. They would come in occasionally, and I asked them why I hadn't been seeing them more regularly, and they said they were getting their premiums; trying to complete a set of some sort; that was pretty general in the neighborhood.

Mr. Austin: That's all.

Cross-Examination by Mr. Hanley.

Q. Mr. Ward, was there a variation in the prices charged at the Lanco station during this period, from the time they went in there until the early part of 1939?

A. Yes. You mean it didn't stay the same price all the time?

Q. That's what I mean.

A. No, there were various prices.

Q. Was it always as much as two cents below your price?

A. It is possible there might have been a variation of one cent, but, on the whole, it was 2. There may have been a time when it was a cent or cent and a half.

Q. How close to your location is the third and Warren intersection?

A. That is one block.

776 Q. And is there a Sun station located there?

A. Yes.

Q. Was there in 1936, and on up until now?

A. I am not positive whether he was there in the beginning of 1936 because that was a station selling another brand, but he was there during most of this price war.

Q. But there was a station there all the time?

A. Oh, yes.

Q. Do you remember what he was selling just before Sun went in?

A. It was an off-brand.

Q. Can you recall it?

A. I can recall it if I can think for just a minute. The —Zieve.

Q. Do you remember anything about the prices at that station at that time in comparison to yours?

A. They sold about the same as all the other off-brand gas, as we call it.

Q. Just what was the difference? Was that a higher or lower price than your price?

A. It was about the same as our third grade or lower than our regular gas; yes, sir.

Q. After the Sun station went in, what did you observe
in connection with whether their prices were higher
777 or lower than the prices that you were selling at?

A. They were the same when they went in.

Q. The same as your price?

A. The same as my prices, yes, sir.

Q. And was there a time that you know of when their prices changed?

A. Yes.

Q. And when was that in relation to the time you changed your price?

A. It was a good long time before. They started to cut prices, so to speak, about the same time all the others did; maybe a little later.

Q. And you held onto your old price some little time after the stations around you had cut the price; is that the situation?

A. Yes, sir.

Q. Mr. Hanley: I believe that is all.

778 By Mr. Austin:

Q. Just a minute. I forgot to ask you whether it was brought out as to whether you ever reduced your price during '37, '38, or '39, except when there was a change in the tank wagon price?

A. No, I didn't. I am sure I didn't. I am quite sure there was a change in the tank wagon price when this was all levelled up for seven for a dollar and five, so I believe I am safe in saying—

Q. But you never changed your margin—you never reduced your price for the purpose of meeting the price that somebody else was charging?

A. No.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Mr. Austin: May we have another five minute recess?

Trial Examiner Ballinger: Recess for five minutes.

(A short recess was taken.)

Trial Examiner Ballinger: Reconvened.

Mr. Austin: Mr. Richards.

EARL M. RICHARDS was thereupon called as a witness for the Commission, and having been first duly sworn, 779 testified as follows:

Direct Examination by Mr. Austin.

Q. Your full name?

A. Earl M. Richards.

Q. And your residence address?

A. 22323 Cedar Avenue, St. Clair Shores.

Q. What is your business?

A. Retail gasoline.

Q. Where are you employed?

A. I am employed with George A. Russell on 10116 Vernor Highway.

Q. Is that a Standard Oil gasoline station?

A. That is.

Q. Are you employed there by Mr. Russell, or are you in partnership with him?

A. Employed by Mr. Russell.

Q. How long have you been there?

A. Since November the 1st of 1940.

Q. Where were you before November 1, 1940?

A. At 10401 East Jefferson Avenue.

Q. Did you operate that station?

A. I did.

Q. How long were you engaged in the operation of that station?

780 A. September the 13th, 1930, until 1936, as an operator for the Standard Oil, and from '36 until 1940, as a lessee, ten years altogether.

Q. Lessee of the Standard Oil Company?

A. Lessee of that station. I was lessee from the Standard Oil Company.

Q. Did your lease terminate on November 1, 1940?

A. It did.

Q. Why didn't you renew it?

A. It was refused. They refused to renew the lease.

Q. While you were leasing that station, did you purchase your gasoline from the Standard Oil Company?

A. I did.

Q. What brands did you handle?

A. Red Crown, Solite, and Stanolind, the three grades carried by the Standard Oil.

Q. Did you receive your gasoline by tank truck deliveries?

A. Tank truck is right.

Q. Did you pay the posted tank wagon price?

A. Yes.

Q. I assume, plus taxes?

A. Plus taxes.

Q. Are there other Standard Oil stations located on East Jefferson?

A. Several.

781 Q. Were there any of those stations in 1936 or 1937 that were offering Red Crown gasoline for sale at a lower price than you were selling it at?

A. Not any of the company-owned outlets, but one at Nottingham and Jefferson, Citrin & Kolb outlet.

Q. What do you mean by company-owned outlets? Were you referring to the time when the company operated its own stations, or after that?

A. I believe that the Standard Oil owned the property and leased it out to the individual. In other words, they were there when the Standard Oil—when we were all working for the Standard Oil on a—

Q. These stations were selling at the same price you were?

A. They were.

Q. Do you know who operates the station at Jefferson and Nottingham, or who did operate it, at that time?

A. No, I don't. No, I have never stopped in at the station. I passed it, but I don't stop in there.

Q. Is it a Standard Oil station?

A. It is selling Standard Oil products.

Q. Do you know whether it is a Citrin & Kolb station?

A. It is a Citrin & Kolb.

Q. How soon after you took over the operation as lessee of the station at 10101 Jefferson, did you notice or obtain knowledge to the effect that the Citrin & Kolb 782 station just mentioned, was selling at a lower price than you were?

A. In the Fall of '36, about six or seven months after I had taken over the station—I took over the station May 26, 1936.

Q. How did you obtain knowledge of the fact that the station was selling below you?

A. Both through loss of gallonage and through customers coming in, saying that they could get it cheaper other places, and why pass places that were selling it cheaper, to come to me, when it was all on their route.

Q. Who told you that?

A. Several of the customers, people that had been buying there for years.

Q. Where did they say they were getting their gasoline at a lower price?

A. They were buying it at Citrin & Kolb.

Q. At Jefferson and Nottingham?

A. That is right. Later on, they also brought in Ned's Auto Supply, which is just—

Q. Where is Ned's located?

A. Ned's is located just two blocks nearer the city, on the same street, than Citrin & Kolb, about three blocks.

Trial Examiner Ballinger: What did you start to say, "later on they brought in Ned's" what?

The Witness: They were bringing in information 783 that they could buy it from Ned's as well as they could from Citrin & Kolb; that it was more general.

By Mr. Austin:

Q. Did that price cutting become more general as to other stations?

A. It did.

Q. In 1937?

A. Yes.

Q. Or 1938?

A. Yes, it did.

Q. When? In both of those years or—

A. It was more prominent in 1938. That was when I showed my biggest loss of gasoline.

Q. You mean your volume dropped in '38?

A. My volume dropped in '38.

Q. Did you eventually cut your price, and by that I mean, reduce the margin between your buying price and selling price?

A. When I saw that I couldn't hold up otherwise.

Q. Just what did you do?

A. I dropped to meet competition, lowered our margin. We paid a certain—

Q. Did you cut your price how much? Or what did you do about that?

A. It varied at different times. Sometimes the margin would drop a cent; sometimes it would drop two cents,
784 according to the prices that were being posted.

Q. Posted where?

A. Both on sidewalk signs, and coming through the mail.

Q. At what stations?

A. Mostly—well, all of the stations along in there, all of the outlets, Standard Oil outlets, and White Star, and Sinclair, and Hi-Speed.

Q. That is, 1938?

A. 1938.

Q. They were all cutting?

A. They were all cutting their price. They were about the same as I was: They weren't trying to bring on competition, but to meet competition.

Q. Well, don't try to tell us what they were trying to do, Mr. Richards, because—

Mr. Hanley: Yes. May that be stricken?

Trial Examiner Ballinger: That will be stricken. Read that language so we will see exactly what is to be stricken.

The Reporter: (Reading.) "They were all cutting their price. They were about the same as I was: They weren't trying to bring competition, but to meet competition."

Trial Examiner Ballinger: That is what you desire stricken?

785 Mr. Hanley: It may stand, so far as I am concerned, except that portion, "They weren't trying." Beginning, "They weren't trying."

Trial Examiner Ballinger: Commencing with, "They weren't trying" may be stricken.

786 Q. Will you state again when you first noticed that advertising of 2 cent discount at the Citrin-Kolb station?

A. It was noticed in the fall of 1936.

Q. Do you recall any conversations with any of your customers whom you were soliciting to buy gasoline at your station, or did you discuss with any customers the reason why they may have left your station?

A. I didn't go out of the station to find out that, but I talked to them as they came into the station for various things, to see if I had started to cut so that they might come back to me, to buy gasoline.

Q. Yes?

A. As long as it wasn't costing them anything they would buy from me, but as long as they were saving money they would buy from somebody else.

Q. Is that what they told you?

A. Yes.

Q. Did they say where they were saving money?

A. They said they were getting it from Citrin-Kolb at that particular time.

Q. And how long did you continue to reduce your price after you—didn't you say it was in 1938 that you began to cut your price, or did I ask you that? I thought you did.

A. I believe you did ask me that question.

Trial Examiner Ballinger: When was it?

787 The Witness: Will you ask the question again, please?

By Mr. Austin:

Q. When did you reduce your price to the price which was being charged by most of the other stations in your neighborhood?

A. When I found I couldn't exist—

Q. Just what year was it?

Trial Examiner Ballinger: What year, what month?

A In February of 1937 I was buying it at 13.6 and selling it at 17.

In March, the same.

April was the same.

Then in June it was selling at 13.9 and we were selling it at 18.1. It continued that way on down through to September.

Trial Examiner Ballinger: September 1937?

The Witness: Yes, your Honor.

Trial Examiner Ballinger: The question is, when did you commence cutting your price to meet competitive posted prices?

The Witness: In 1939, the early part of 1939. In 1937 I pumped 249,000 gallons.

By Mr. Austin:

Q. I don't want to interrupt the answer to your
788 question, but I believe I can hurry this along a little bit. Will you look at your records during July, August, and September of 1938 and see whether that helps refresh your recollection?

A. In July of 1938 the gasoline was jumping around there. It was reduced one cent. We were paying 13.8 and it dropped to 12.8, and we were selling it for 18.6 from the 1st of July to the 22nd of July and 18.1 from July 22nd to the 27th, and then it dropped again to 16.1, July 27th to the 31st.

Q. Why was the cut from 18.1 to 16.1?

A. That was when we started to meet competition.

Mr. Hanley: What was that date?

Trial Examiner Ballinger: July, 1938; is that correct?

The Witness: That's right; during that month.

Trial Examiner Ballinger: That is the date you commenced cutting, to meet competition?

The Witness: That's right.

By Mr. Austin:

Q. How long did you continue that reduction which you described as a price cut?

A. The price remained the same until December of 1938. We were buying the gasoline at 12.8 and selling it at 14.6.

Trial Examiner Ballinger: Is that the date when
789 you ceased cutting prices?

Mr. Austin: If your Honor please, I would like to have him read into the record at this point, starting with July of 1938 until through March of 1939, the prices he was paying for gasoline and the prices that he was selling it at in his station.

Will you do that, Mr. Richards?

A. Starting July, 1938, for Red Crown, we were paying 13.8—

Q. You can limit it to Red Crown. You don't need to go into Ethyl or Stanolind.

A. —and we sold it at 18.6. We sold it from the 1st to the 22nd and then July 22nd, we dropped to 18.1.

Q. That's your selling price?

A. That's the selling price. On the 27th to the 31st we started selling it at 16.1.

Trial Examiner Ballinger: That is the commencement of your cut, again?

The Witness: That is the commencement of the cut.

By Mr. Austin:

Q. Will you proceed for the month of August?

A. The month of August we bought it at 12.8 and sold it ~~at 16.1~~.

September, 12.8 and 16.1.

October was 12.8 and sold at 16.1.

790 November, 12.8 and sold at 16.1 from the 1st to the 18th and then sold for 14.6 from the 18th to the 30th of November, 1938.

We were still paying 12.8 for it and selling it for 14.6 in December, right straight through the month of December.

Q. Now, in January, 1939.

A. We bought it at 11.6 and sold at 13.9.

February 11.6 and sold at 16.1.

Q. Is that the point when you quit the price-reductions?

A. That was when we were getting a little more margin on that.

Q. That was February, 1939?

A. That's right.

Q. For the next few months there did your price remain as high as 16.1?

A. No. In March it was 14.7.

April was 14.7.

May, 14.7.

Q. Was that reduction from 16.1 to 14.7 in line with the other stations in your neighborhood, or not?

A. Yes, sir. I have never made any individual changes. It was when the majority were making these changes, that I changed. In any of these figures—none of them were made of my own accord. It was sort of meeting competition.

791 Q. Does the majority include the Citrin-Kolb station at Jefferson and Nottingham; referring now to 1939?

A. No, that would not include—I couldn't say that it did, because I have no knowledge as to when they discontinued.

Mr. Austin: That's all.

Cross-Examination by Mr. Hanley.

Q. Mr. Richards, the station which you operated last was located at 10101 Jefferson Street?

A. Yes.

Q. And which way does Jefferson Street run?

A. It runs east and west at that particular point.

Q. And were these Ned's location and the Citrin-Kolb location that you have been talking about on Jefferson Street east or west of you? Where were they in relation to your station?

A. They were east of me, on the same side of the street, so any traffic coming into town would pass them as well as myself.

Q. The center of town is west of you?

A. That's right.

Q. And they were further on to the east?

A. That's right.

792 Q. Which one of them was closest to your station?

A. Ned's Auto Supply would be the closest.

Q. And how far from your station was that?

A. It would be about a mile and a half.

Q. And how far from your station was the Citrin-Kolb station that you have been talking about?

A. It would be about the same distance; about three or four blocks farther than that.

Q. So it was the Citrin-Kolb and the Ned's stations that were close together; within three or four blocks of each other, and both of them approximately a mile and a half, did you say, from your station?

A. That's right.

Q. Now, Jefferson is one of the main arteries in Detroit, isn't it?

A. That's right.

Q. There is a lot of traffic on the street and a lot of service stations on the street?

A. That's right.

Q. All the way out from the center of town here, for a number of miles? That's true, isn't it?

A. There are stations out about six miles from town from the city proper. At the city limits you go into villages there where there are very few gas stations.

There is a distance of eight or nine miles where
793 there are no gas stations at all.

Q. Is that west or east of you?

A. That is east of me.

Q. But between your station location and town there were a number of filling stations?

A. That's right.

Q. And is that true in the mile and a half between you and Citrin Kolb and Ned's stations, also?

A. There are several stations in between there, yes.

Q. Those stations represent, would you say, practically all of the brands of gasoline that were sold at that time in Detroit?

A. Yes, sir.

Q. You have stated that you learned some time in 1936 that the Ned's station and the Citrin-Kolb station, to which you have referred, were selling about 2 cents lower than your price. Will you fix the time as accurately as you can in 1936 when you first learned that?

A. That would be about November. It was in the fall of 1936.

Q. Is that the first you knew of those stations specifically?

A. That is the first.

Q. Did you know of any other stations anywhere in the vicinity that were doing likewise?

794 A. Not just at that particular time. There were, later.

Q. And how much later?

A. Going into 1937.

Could I read the amount of gallons that I pumped each year, so that you might see at the time that I was taking my biggest loss? Would that help you any?

Q. I have no objection to your doing so if Mr. Austin desires that testimony. I don't care particularly to have it.

Mr. Austin: Let us let him read them in as long as we are not using the whole exhibit, if you don't object.

Mr. Hanley: No, I don't object.

795 The Witness: In 1937 I pumped 249,958 gallons; in 1938 I pumped 196,351; in 1939 I pumped 250,505. And the difference between the '37 and '38, you will see that I lost 53,000 gallons in '38, but I gained it back again in 1939, when the price became established.

By Mr. Hanley:

Q. In the first place, Mr. Richards, didn't everyone lose gallonage in '38? I mean by that, wasn't it generally a bad year in the oil business?

A. It was for some of us, but not for all of those—

Q. I am talking about the industry generally. Wasn't the general sales of gasoline lower in 1938, for instance, than they had been in 1937, or do you know?

A. I don't know that. I know that those that maintained the price, didn't have a good year, but those that didn't—

Q. Well, at that time—

A. —made a harvest.

Q. —you were getting 4.8 margin, weren't you?

A. In '38?

Q. No, no, in 19—

A. '36.

Q. —'37?

A. '37.

Q. You were attempting to maintain that margin until you made your cut in July, 1937; weren't you?

796 A. That is right.

Q. And from your experience in the oil business, Mr. Richards, would you say that it is true that there are many dealers who are willing to operate on a lesser margin than 4.8 cents?

A. No, I don't know of any dealers that are willing. There are a great many that are, but not willing.

Q. Are there not a great many who voluntarily do?

A. There are not a great many that do. There are some that are doing it, but not because they feel that that is a wise thing to do. As long as the rest don't cut price, they get the other man's business, but it starts the war all over again as soon as it is found out.

Q. Isn't it true, Mr. Richards, that after a margin reaches a certain spread, that there always has been someone, or there will always be someone who will be willing to take a lesser margin.

Mr. Austin: I object to that question, Your Honor, on the ground that it is speculative and calls for a conclusion of the witness.

Mr. Hanley: He is giving his opinions here as to what they would do and why they will do it, Mr. Austin.

Mr. Austin: You have been asking for them, but this is asking what somebody else will do.

Mr. Hanley: I ask it based on his experience and observation in the oil business.

797 Trial Examiner Ballinger: The objection is overruled. You may answer.

The Witness: Could I have your direct question again, please?

By Mr. Hanley:

Q. I will tell you. I will reframe the question so everybody will understand it.

Assuming that the cost of gasoline, plus cost of sale of gasoline, are the same to a number of dealers, and that those dealers raised that margin between that cost of gasoline, plus cost of sales, on the one hand, and retail sale price on the other, if the raising of that margin is continued, does there not come a time when some of those dealers will begin to undercut that margin and be satisfied with less returns?

Trial Examiner Ballinger: Do you understand the question?

The Witness: I believe the question is that, would the average dealer be satisfied with a given profit, or wouldn't he rather—would he undertake to sell for less and be satisfied with less?

Trial Examiner Ballinger: I think I will sustain the objection to the question.

Mr. Hanley: I think I will withdraw the question. I can prove this if it becomes pertinent, very much more directly. I believe that is all, Mr. Richards. Oh, 798 pardon me. I do have just one other thing.

By Mr. Hanley:

Q. During the last three or four years has there not been a lot of repair work on Jefferson Avenue at various points?

A. Yes; sir, there has been.

Q. It has been torn up someplace most of the time, hasn't it?

A. The biggest part of the time.

Q. And wherever it is torn up, it has some effect on the gallonage of any service stations that may be adjacent to that repair work, doesn't it?

A. That is right.

Q. Did any of that ever occur in front of or near your service station while you were located on Jefferson?

A. Not in the last four years.

Mr. Hanley: That is all.

Redirect Examination by Mr. Austin.

Q. You said that you live at St. Clair Shores?

A. Right.

Q. That is a suburb of Detroit?

A. No, sir. That is a village outside of Detroit. In travelling east, you go through Grosse Pointe.

Q. How far out is it from your station?

A. Thirteen miles from our house to my station. It is the same street, Jefferson Avenue.

799 Q. Is that the through artery for the people who live in your locality, to go back and forth from Detroit?

A. That is.

Q. And also for Grosse Pointe?

A. That is right.

Q. Do you drive back and forth every day?

A. I do.

Q. And does that take you past Ned's station and the Cifrin & Kolb station, that you mentioned?

A. It did, until I changed addresses in November, 1940.

Mr. Austin: That is all.

Mr. Hanley: That is all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Mr. Austin: If Your Honor will be pleased to recess for five minutes, I may or may not call a witness. I haven't had a chance to talk to him.

Trial Examiner Ballinger: Take a recess for five minutes.

(A short recess was taken.)

Mr. Austin: I move we adjourn until 10:00 o'clock tomorrow, Your Honor.

Trial Examiner Ballinger: The motion is granted. Now,
at 4:30 o'clock P. M. the hearing stands adjourned, to
800 reconvene at 10:00 o'clock Eastern Standard time,
March 15, 1941, in Room 859, Federal Building, Detroit, Michigan.

(Whereupon, at 4:30 P. M. March 14, 1941, the further hearing of the above-entitled matter was adjourned.)

801 Room 859 Federal Building,
Detroit, Michigan,
March 15, 1941.

Met, pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., Attorney for the Federal Trade Commission.

H. R. Hanley, Esq., 910 S. Michigan Avenue, Chicago, Illinois, on behalf of the Respondent.

802 PROCEEDINGS.

Trial Examiner Ballinger: We will come to order, gentlemen.

The hearing of Docket No. 4389, a case entitled In the Matter of Standard Oil Company, is convened at 10 o'clock Eastern Standard Time, March 15, 1941, in Room 859 Federal Building, Detroit, Michigan.

The last hearing was held in Detroit March 14, 1941.

The reporter will note counsel for the Commission and counsel for the Respondent present.

You may proceed.

Mr. Austin: Will you take the stand, Mr. Miller?

ROMAN L. MILLER was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Will you give your name to the reporter?
A. Roman L. Miller.
Q. And where is your residence?
A. I live at Mt. Clemens.
Q. Mt. Clemens?
A. That's right.

Q. What is the address there?

803 A. Beg your pardon?

Q. What is the address?

A. 1740 Clinton Boulevard.

Q. What is your business, Mr. Miller?

A. Garage and gas station operator.

Q. Do you operate a retail gasoline station?

A. Yes.

Q. Where is it located?

A. 7450 Oakland.

Q. Do you have any other property at that corner?

A. I didn't quite get that.

Q. Do you have any other property at that corner?

A. No; not at 7450. We have a garage at 7453. Is that what you mean?

Q. What is the cross street there?

A. Custer.

Q. And the garage, then, is diagonally across the street from the service station?

A. That's right.

Q. How long have you operated the service station at 7450 Oakland?

A. Since 1937.

Q. Prior to that were you in the service station business?

A. Yes. That was 7451 Oakland, which is right across the street.

804 Q. How long have you been in the gasoline business?

A. I believe it was in 1934 that we took that station over.

Q. Were you in the gasoline business before that?

A. No, sir.

Q. Did you own the property at 7451 Oakland?

A. No, we just rented that.

Q. Did you rent it from an oil company or from someone else?

A. We rented it from an individual.

Q. And you say you moved to 7450 Oakland in 1937?

A. That is right.

Q. What time in 1937, do you recall?

A. I believe it was along in July, maybe the first part of August, something like that.

Q. Do you own the property at 7450 Oakland?

A. Yes, sir.

Q. Have you owned it ever since you moved in there in 1937?

A. That is right.

Q. What brand gasoline did you handle there, at the former address, at 7451?

A. Standard.

Q. And did you handle Standard gasoline all of the time you were at that address?

A. That is right.

Q. Did you purchase your gasoline from the Stand-
805 ard Oil Company?

A. That is right.

Q. How were the deliveries made?

A. By tank wagon.

Q. The deliveries were made by the Standard Oil Company?

A. Yes, direct.

Q. In their tank wagons?

A. Yes.

Q. When you moved to 7450 Oakland, did you also handle Standard Oil gasoline in that station?

A. That is right.

Q. What brands do you handle? Red Crown?

A. Red Crown and Ethyl.

Trial Examiner Ballinger: When did you move to that address?

The Witness: I believe it was in August, July or August of 1937.

By Mr. Austin:

Q. Do you handle Standard Oil gasoline now?

A. No, sir.

Q. What brand do you handle now?

A. Cities Service.

Q. How long did you handle Standard Oil gasoline which you bought from the Standard Oil Company after you moved to the present address at 7450 Oakland?

806 A. One year.

Q. Then you changed your brand in 1938?

A. That is right.

Q. Was that about July, 1938?

A. That is right.

Q. And what brand did you change to when you changed from Standard?

A. Linco.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Austin:

Q. You say you handle Cities Service gasoline now?

A. That is right.

Q. Since when?

A. That would be since 1939.

Q. And you handled the Linco for about a year?

A. That is right.

Q. When you first moved into the station at 7450 Oakland, what was the gasoline tank capacity at that station?

A. We had three 2,000-gallon tanks. That would be 6,000.

Q. Three 2,000-gallon tanks?

A. That is right.

Q. Did you subsequently increase the tank capacity at that station?

807 A. I did later on, about nine months later.

Q. When would that be?

A. I would say April or May of 1939. I believe that would be right, wouldn't it?

Q. You said you moved there in 1937.

A. That must have been 1938.

Q. And how did you increase the capacity?

Trial Examiner Ballinger: That was April or May of 1938?

The Witness: That is right.

By Mr. Austin:

Q. How did you increase the tank capacity?

A. I put in a 10,000-gallon tank.

Q. Has that tank been installed in that station ever since that time?

A. That is right.

Q. So if I understand you correctly, you now have a 10,000-gallon tank, plus 3 2000-gallon tanks?

A. That is right.

Q. Were you purchasing gasoline from the Standard Oil Company at the time you installed the 10,000-gallon tank?

A. That is right.

Q. And for several months after that?

A. Yes, sir.

Q. Did you, in 1938, request the Standard Oil Com-
508 pany to be allowed to purchase gasoline in tank car quantities—in tank car—

Mr. Hanley: That is objected to on the ground that it is immaterial in the statute under which we are being prosecuted, the right specifically being given to the Respondent to select its own customer.

Trial Examiner Ballinger: Objection overruled.

Mr. Austin: I had not quite finished the question.

By Mr. Austin:

Q. I asked you if in 1938 you applied to the Standard Oil Company to be permitted to purchase gasoline in tank car quantities at tank car prices.

Mr. Hanley: Objection is renewed.

Trial Examiner Ballinger: Objection overruled.

A. Yes, sir.

By Mr. Austin:

Q. The answer was yes?

A. Yes.

Q. Was that request made after you had increased your tank capacity to 16,000 gallons?

A. Yes, sir.

Q. How was that request made?

A. First I took it up with the district salesman, and, of course, he never came back with any satisfactory answers.

Mr. Hanley: I move to strike "he never came back
509 with any satisfactory answers."

Trial Examiner Ballinger: You didn't hear anything further from him; is that it?

The Witness: That's right.

Trial Examiner Ballinger: The motion is granted.

The Witness: That means he didn't give me any answer—

By Mr. Austin:

Q. Just a minute. Did you ever receive an answer from this salesman to what you said to him?

A. No.

Q. What did you do next?

A. I wrote to Chicago.

Mr. Hanley: I move to strike the answer, no address being given.

Trial Examiner Ballinger: The motion is denied.

By Mr. Austin:

Q. To whom did you address your letter when you wrote to Chicago?

A. To Standard Oil Company. I think it is 910—whatever it is—Michigan Avenue.

Q. Have you a copy of the letter with you?

A. Yes, sir.

Q. Will you produce that letter, please?

(The witness handed document to counsel for the

810 Commission.)

Mr. Austin: I would like to have this letter marked for identification, please.

Trial Examiner Ballinger: The reporter will mark the letter Commission's Exhibit 62, for identification.

(The document referred to was marked, for identification, "Commission's Exhibit 62.")

By Mr. Austin:

Q. Is this letter, marked Commission's Exhibit 62, for identification—I will ask you what it is.

A. This is the letter I wrote Chicago.

Q. Is that the original, or a carbon copy?

A. This is a carbon copy of the letter I wrote to the Standard Oil Company of Indiana.

Q. Was that carbon copy made at the same time the original letter was written?

A. Yes, sir.

Q. And has that carbon copy been in your files since that time?

A. That's right.

Q. Produced from your files?

A. That's right.

Mr. Austin: I will offer this letter in evidence.

By Mr. Austin:

811 Q. One more question: Did you write this letter yourself?

A. Yes, sir—well, it was dictated. I didn't run the typewriter, if that's what you mean.

Q. You did dictate it?

A. Well, I was there—

Q. Did you sign it?

A. I did.

Mr. Austin: I offer it in evidence.

Mr. Hanley: The Exhibit, Commission's Exhibit 62, for identification, is objected to on the ground that it is hearsay; self-serving; a complaint by a dealer apparently written to the Standard Oil Company; is incapable of, in itself, proving or tending to prove or aiding in the proof of any issue in this case. It establishes nothing in respect of the issues and contains matter not identified by the witness.

Trial Examiner Ballinger: Off the record.

(A discussion enued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: I want to say that I didn't want to be in the position of asking the witness about a letter which he said he had with him and not offer to produce it, but I do not press my offer that it be put in evidence. I am perfectly willing to bring out the facts regarding this tank car situation by oral testimony and do not feel
812 that it is important that the letter itself be introduced.

Trial Examiner Ballinger: Then the tender is withdrawn?

Mr. Austin: No, I will not withdraw the tender—in view of counsel's objection, I will withdraw the tender.

Mr. Hanley: Very well.

Trial Examiner Ballinger: Off the record.

(Discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: As I understand it, Mr. Austin, you are now withdrawing the offer of Exhibit No. 62, and hence, it is not necessary for me to amplify my objection.

Mr. Austin: I am withdrawing it in view of the fact it was objected to.

Mr. Hanley: Very well.

By Mr. Austin:

Q. After you wrote this letter, which you have referred to, to the Chicago office of the Standard Oil Company, did you receive a call from any employee or officer of the Standard Oil Company?

A. Yes, sir.

Q. And who was it that called on you?

A. Mr. Blough.

Q. Do you know Mr. Blough's position with the Standard Oil Company?

813 A. I don't know exactly, but I think he is one of the assistant managers, I believe, or something like that.

Trial Examiner Ballinger: That is your best information?

The Witness: I don't exactly know what his exact title is, but I know he is one of the men next to Mr. Raupagh.

Mr. Austin: Do you mind—

Mr. Hanley: We will stipulate. What time are you talking about?

The Witness: In March or April of 1938.

Mr. Hanley: We will stipulate that in March and April of 1938 Mr. Blough was an assistant to Mr. Raupagh, manager of the Standard Oil Company, Detroit Division.

Mr. Austin: Was he also in that same position in May, June, and July of that year?

Mr. Hanley: We will so stipulate.

By Mr. Austin:

Q. Did Mr. Blough have a conversation with you respecting your application to be made a tank car buyer?

A. Well, he came up there and we talked about the thing.

Q. Talked about what?

A. About this here tank car deal and about the only answer he gave me, that he didn't have anything for me,
814 and that was about the conversation.

Mr. Hanley: I object to the conclusion of the witness and request the conversation be given, if there was any.

Trial Examiner Ballinger: Objection sustained, and the answer is stricken.

By Mr. Austin:

Q. State the conversation, what you said and what Mr. Blough said.

A. He came up there and stated that they couldn't supply me with gasoline by tank train, like we were talking about, and, of course, then I went on further and said if I got a siding would he set it in on a siding, and I believe his answer was straight; he didn't answer yes or no.

Trial Examiner Ballinger: Did he mention the letter you had written to Chicago?

The Witness: Not to my knowledge.

Trial Examiner Ballinger: Prior to that time you had had no conversation with him about the letter?

The Witness: No, sir.

Trial Examiner Ballinger: And it was subsequent to the date when you wrote the letter to Chicago when he called on you?

The Witness: Something like three or four weeks 815 later, I would say.

By Mr. Austin:

Q. Was that Mr. Blough's language; that he didn't have anything for you?

A. Their answer was that they didn't have nothing for us.

Q. Did you tell Mr. Blough that you had 10,000-gallon tank storage at your station?

A. That's right.

Q. Or was it 16,000?

A. It was an additional 10,000 to what was already in.

Trial Examiner Ballinger: Making a total of 16,000?

The Witness: 16,000 gallons; that's right.

By Mr. Austin:

Q. Had you at that time made arrangements to have gasoline transported from a tank car siding to your station?

A. If they would be willing to put it on the siding, yes.

Q. With whom were those arrangements made?

A. Kaufman Cartage.

Q. Do you recall what the arrangements were as to the amount you were to pay?

A. You mean as to the price?

Q. Yes.

A. I believe it was .2 of a cent a gallon.

816 Q. And did you tell Mr. Blough that you had made such arrangements?

A. With the cartage company or with the siding?

Q. With the cartage company.

A. Yes.

Q. Now, as to the siding, what arrangements had you made if any, toward requiring a siding, toward acquiring a siding upon the which the tank cars could unload?

A. I did not make no arrangements direct.

Q. Where is the siding?

A. One block east of Mt. Eliot.

Q. Is that in Hamtramck?

A. Yes.

Q. Was the siding owned or controlled by the same persons from whom you purchased your 10,000-gallon tank?

A. Yes, sir.

Q. Who was that?

A. The Sterling Oil Company of St. Mary's, West Virginia.

Trial Examiner Ballinger: Do you mean a railroad spur, when you speak of a siding?

The Witness: Yes.

By Mr. Austin:

Q. Why did you think that you could obtain the use of that siding?

A. Well, it was standing there empty, and had
817 been for several years.

Mr. Hanley: That is objected to, and I move to strike out all of the evidence of the witness in reference to the siding, it now appearing he doesn't know anything about it, and he is attempting to conclude what somebody else would do, who owned the siding.

Mr. Austin: If Your Honor will have my question read back, I think you will find the question is responsive, the answer is responsive to my question.

Trial Examiner Ballinger: Objection overruled and the motion denied.

By Mr. Austin:

Q. Did you tell Mr. Blough that you had, that you would, furnish a railroad siding for tank car delivery?

Mr. Hanley: That is objected to as leading. This is the Government's witness.

By Mr. Austin:

Q. All right, did you say anything to Mr. Blough about railroad siding, and if so, what did you say?

A. I asked him if they would put a carload of gas on a siding if I got a siding, and he put it there, and his answer was, they did not have nothing for me. He did not say yes or no.

Q. Did Mr. Blough or any other representative of the
Standard Oil Company either at that time or at any
818 time during the period from May to July of 1938,

from March to July of 1938, say anything to you about your credit standing?

A. No, sir, not to my knowledge, never told me anything.

Trial Examiner Ballinger: Did he make, did they make any inquiries about it?

The Witness: Did they?

Trial Examiner Ballinger: Yes, of you?

The Witness: No, sir, not of me.

Trial Examiner Ballinger: Or of anyone else, so far as you know.

The Witness: No, sir, it just so happened I had the money laying in the bank.

Mr. Hanley: I move to strike out the answer as being a voluntary statement on the part of the witness, as having no bearing on the issues in this case at all.

Trial Examiner Ballinger: Motion denied.

Mr. Hanley: Denied that he says that he has money in the bank without reference to whether you were told anybody about it.

Trial Examiner Ballinger: The witness has testified that he tried to buy gas in tank car quantities from Standard Oil, that he told them of his facilities, and that he now testifies that at that time he had the money in the bank to consummate the transaction, and that they made no inquiry of him as to his financial condition, his ability to pay.

819 By Mr. Austin:

Q. After July, 1938, you stated that you then began to purchase oil from the Linco Oil Company.

A. That is right.

Q. How was that—how were deliveries made?

A. Tank trains.

Q. By tank train?

A. That is right.

Q. Is that the same thing as transport truck?

A. I guess you would call it the same, yes, I guess.

Q. Were those deliveries made directly to your station?

A. That is right.

Q. And in what quantities did you take delivery, the largest quantities?

A. I think the largest was about 9,500.

Q. How frequently did you take deliveries in excess of 8,000 gallons?

A. Well each delivery was in excess of that. You mean how often?

Q. No, I meant rather the size of the deliveries whenever you had them.

A. That was around 8,000 to 9,500. It just depends on which train brought the gas.

Q. And what has been your method of payment for these deliveries?

820 Mr. Hanley: That is objected to as being immaterial.

Trial Examiner Ballinger: Is this another company?

Mr. Austin: Yes.

Mr. Hanley: If the question is to price, I withdraw my objection.

Mr. Austin: It isn't; it doesn't go into price.

Mr. Hanley: Well, then, I insist upon the objection.

Trial Examiner Ballinger: Objection sustained. Off the record.

(A discussion ensued off the record.)

By Mr. Austin:

Q. Have your deliveries from the Cities Service Company been in the same quantities or are you taking deliveries in a different quantity now?

A. I did not get that last part of the question.

Q. Have your deliveries from the Cities Service Company been in the same quantities, that is, of 8,000 or more, or are you now taking smaller deliveries?

A. Well, their trucks happened to be a 5,000-gallon truck, a little over 5,000, so that is the one I am using, so I take them in 5,000 gallon deliveries.

Mr. Austin: I think that is all I have of this witness, your Honor.

821 *Cross-Examination by Mr. Hanley.*

Q. When did you cease buying Standard Oil products, Mr. Miller?

A. I believe it was when the contract expired, which I believe would be July 8th, 1938.

Q. And how long prior to July 8, 1938, had you been buying Standard Oil products?

A. I believe I started in January, 1934.

Q. And on July 8th you began handling what is known as Linco?

A. Yes, sir.

Q. Gasoline?

A. Yes, sir, that is right.

Q. Who supplied that?

A. Argo Oil.

Q. What is Argo Oil?

A. Well, they are the jobbers for Linco in this district.

Q. What is Linco?

A. Linco is the product of the Ohio Oil Company.

Q. Which oil company?

A. Ohio Oil Company. I don't know. Their office is in Ohio somewhere.

822 Q. There has been a lot of talk about what are major and non-major and off-brand gasolines. What is Linco gasoline in your estimation, a major or a non brand?

A. I could not answer that question. I am not familiar with their technicalities.

Trial Examiner Ballinger: You mentioned the Ohio Oil Company. Is that the Ohio Standard Oil Company?

The Witness: No, I think the Ohio Oil Company have their office in Findley, Ohio. It is an old oil company. I don't know just what is back of them.

By Mr. Hanley:

Q. How long did you handle the Linco gasoline?

A. One year.

Q. That is, until July 8, 1939?

A. That is right.

Q. What did you do then about supplies?

A. I changed to Cities Service.

Q. And since July 8, 1939, have you been handling Cities Service gasoline?

A. That is right.

Q. Are you handling it now?

A. Yes, sir.

Q. How many stations do you have?

A. Just the one.

Q. Are you a member of the Michigan Retail Gaso-
823 line Dealers Association?

A. Yes, sir.

Q. Do you know Rankin Peck?

A. Yes, sir.

Q. How long have you known him?

A. Ever since he started there with the Association; I imagine three years or whatever it is.

Q. Well, whatever it is, you tell me whatever it is.

A. Well, whenever he started. If there are any records when he started, that is when it is.

Q. Do you know?

A. I can't tell you exactly.

Q. Who is he in relation to the Michigan Retail Gasoline Dealers Association?

Mr. Austin: Your Honor, I object to further questioning regarding the Retail Gasoline Dealers Association or Mr. Peck, on the ground that it is immaterial.

Mr. Hanley: I will state that it is to show the animosity, prejudice, and hostility of the witness. It goes to his credibility.

Mr. Austin: The witness has testified to the fact that he actually had capacity to buy gasoline in the quantities in which he wanted to buy it, and consequently, I don't think it can be said that this is any hypothetical request of such as Mr. Raupagh referred to in his testimony.

824 Mr. Hanley: I think that is a matter for the Commission. As a matter of fact, I propose to make a motion about the entire testimony of this witness, and if you will prefer that I do it under your procedure before the cross examination, I will be glad to do that.

Trial Examiner Ballinger: You are at liberty to make that motion upon your statement that this line of examination goes to the credibility of the witness. The Examiner will admit it, subject to a motion to strike, and unless it does plainly appear that it pertains to his credibility, the motion will be granted.

Mr. Hanley: Well, I will make that motion now, and, perhaps, I should make it before the cross-examination goes, to the materiality of the entire testimony of the witness, and I will make that motion at this time. It is moved by the Respondent that the entire testimony of the witness, Roman Miller, be stricken, on the ground that it is incompetent, immaterial, and irrelevant to any issue in this case, as defined by the pleadings, or by the pleading as proposed to be amended by counsel for the Commission, that the entire substance of the evidence elicited from the witness goes to the question of whether or not he was able to buy gasoline, on terms not stated in the evidence, from Standard Oil Company, and that on terms not stated in the evidence, a failure to consummate any transaction ensued. That 825 even if there had been a definite proposition stated by the witness at the time, or by the Respondent at the time, and a consummation, though had failed, had such failure been attributable to the decision of the Respondent, the same was entirely within the rights of the Respondent, is that the Respondent is not required to sell to anybody that the Respondent does not choose to sell to, for any reason, and that the Respondent may have, or no reason at all. Further, that the specific statute under which the Respondent is being prosecuted in this action, expressly preserves the right of the Respondent to sell to its own customers. Further, that on the issue of discretion or injury to competition, the testimony of this witness can have no possible bearing. Note the end of the objection, and note on the record this request. The Respondent, at this time, requests of the counsel for the Commission, a statement as to whether or not the Government it taking the position in this proceeding that the Respondent is compelled by law, or that the Commission is attempting to compel the Respondent, for any reason, to sell to customers that the Respondent does not care to sell to, or transact business with.

Mr. Hanley: Off the record.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: Only as to the question, I will hear from counsel for the Commission. Not as to 826 the motion.

Mr. Austin: I don't care to answer any questions of law, such as that just proposed by Judge Hanley, but I will say that I think that Mr. Miller's testimony is material; first, upon the, or may be material—

Trial Examiner Ballinger: You need not discuss that question at all. Only the question propounded by counsel for Respondent.

Mr. Austin: Well, I feel that it is not my province at this time to answer questions of law, such as those proposed by Judge Hanley; as to what the issues of the case are, I think the complaint is fairly clear on that point, particularly in connection with the rather voluminous answer of the Standard Oil Company.

Mr. Hanley: I thought it was, too, but I am very much confused now.

Trial Examiner Ballinger: The motion to strike is denied.

827 A. He is the executive secretary; if that's what you want.

By Mr. Hanley:

Q. You testified, did you not, Mr. Miller, in a case in July, 1938, in Detroit, Michigan, in which the Defendants or the Defendant was the Standard Oil Company in a criminal action in the Court of Judge Gordon; did you testify in such a case?

A. Yes, sir.

Q. That was at the time that you had written this letter that you referred to, Mr. Miller?

A. Yes.

Q. Referring back to the letter, was that letter written as the result of conversations which you and other dealers had had with Mr. Rankin Peck?

A. Not this letter.

Q. Was any letter at that time written?

A. It seems to me there was another letter. I don't have no copy of it. There was several dealers wrote to Chicago.

Q. You mean by "Chicago" the Standard Oil Company?

A. Standard Oil Company; that is right.

Q. Now, those letters were written as a matter of agreement between dealers and at the instance of Mr. Peck, weren't they?

Mr. Austin: Between whom?

828 Trial Examiner Ballinger: Judge, how does this affect the credibility?

Mr. Hanley: Your Honor, it just simply shows the whole purpose of the Defendant—in respect of this claimed testimony—is to demonstrate that there never was any bona fide intention of this man to buy tank car on the basis that Standard Oil sells tank car.

Trial Examiner Ballinger: Subsequently he did buy it.

Mr. Hanley: He bought it from one of these companies, Your Honor, that we have been trying to show, over the objection of Mr. Austin, was in competition with the Standard Oil, namely one of these off-brand outfits, the Argo Oil Company, and he got a price, and they took him away from us. We say that is competition. We have been endeavoring to assert that position over the objection of counsel.

Mr. Austin: That has nothing to do with Mr. Peck, and this witness actually bought a tank. That is the whole point. He bought a tank. He had it there and that conclusively answers the idea that the request was not bona fide.

Trial Examiner Ballinger: I don't see that it affects his credibility.

Mr. Hanley: Well, I will get on this point that your Honor has in mind, if your Honor thinks it has any
829 materiality at all; the testimony of this witness.

By Mr. Hanley:

Q. At that time, Mr. Miller, was the Standard Oil Company delivering anybody gasoline by tank train?

A. I don't think so; to my knowledge.

Q. You know, don't you?

A. I can't answer, because they might have delivered somewhere and I didn't know it.

Q. I am asking you if you know it.

A. If they delivered to anybody by tank train?

Q. In Detroit, of course.

A. I don't think they did, only out of their own bulk plants.

Trial Examiner Ballinger: The witness has answered as far as he knows they were not.

By Mr. Hanley:

Q. Was anything said by you in your conversation with Mr. Blough as to the price which you wanted on this gasoline?

A. Well, inasmuch as it would be delivered at carloads, I figured I was entitled to a carload price.

Q. Is that what you said to him?

A. I presume; in that language.

Q. Tell me not what you presume, but what you know about it.

830 A. It has been three or four years ago, but we naturally talked in those lines. If it was delivered in tank trains I should be entitled to a carload price, inasmuch as they didn't have to send cars around the siding—it would be delivered from River Rouge, or wherever the big tanks are; they would bring it in.

Q. Did you tell Mr. Blough that?

A. Yes, sir.

Q. Did you make any mention of a specific price?

A. There was nothing said, right to the penny, for the simple reason, I believe the carload price at that time was a cent and a half below tank wagon.

Q. Did you say anything about that?

A. I don't know just what we talked about. We talked for some little time, but I can't say exactly.

Q. You don't know whether that was said or not?

A. Not exactly.

Q. Did he say anything about the fact of whether or not the Standard Oil Company was delivering anybody by tank train at that time?

A. I don't recall he said they did or didn't. I know—I think I talked to Mr. Raupagh at one time and he said they didn't deliver to anyone by tank train.

Q. You knew that at that time, didn't you?

A. I think this was later, but I am not sure.

831 Q. Did you have your tanks at that time?

A. Yes.

Q. Did you tell Mr. Blough you had them?

A. Sure. And he knew I had them.

Q. You were a retail dealer?

A. That's right.

Q. Did you want to buy on a tank car basis in order to get the benefit of that reduced price?

A. Sure.

Q. Do you think that a man with 500 gallon tank capacity should buy on the same price?

A. If he had the capacity to put it.

Q. I said 500 gallons. Do you think he should buy on the same price?

A. He can't take the deliveries.

Q. I didn't ask you that. Do you think he should buy on the same price?

Mr. Austin: I object to this on the ground it calls for the opinion of the witness which he hasn't shown he is qualified to give.

Trial Examiner Ballinger: Objection sustained.

By Mr. Hanley:

Q. What do you think entitles you to a cent and a half below the tank wagon price?

A. Simply that when they deliver in tank trains

832 they save all that expense of handling.

Q. And you think that is a good reason, don't you, Mr. Miller?

A. That applies all over, if you buy strawberries or eggs or anything. A man who buys a carload of strawberries gets it cheaper than a man buying a case or a quart.

Q. By the way, did I ask you just when that conversation with Mr. Blough took place?

A. You mean with reference to this?

Q. Yes.

A. I think it was in March or April; it was in the spring, anyway.

Q. That is as nearly as you can fix the time?

A. That's right.

Q. And where did it occur?

A. Up at my station.

Q. And was anybody else there besides you and Mr. Blough?

A. Not when we were talking. We were standing outside. I know it was warm.

Trial Examiner Ballinger: I understand he called on you?

The Witness: That's right.

By Mr. Hanley:

Q. Now, when you began to buy gasoline from the 833 Argo did you get a reduction below the then prevailing dealer tank wagon price?

A. Yes, sir.

Q. How much?

A. A cent and a half a gallon.

Q. Did you get any other concessions?

A. From that company?

Q. From that company.

A. No, sir.

Q. When you began to buy from the Cities Service Company what was your price in relation to the prevailing dealer tank wagon price?

A. One cent.

Q. One cent?

A. That's right.

Q. And did you get any other concessions?

A. No, sir.

Q. Has that been the price to you from that time on?

A. Yes, sir.

Q. Of Cities Service products?

A. That's right.

Q. And how do you get deliveries?

A. As I say, their tank that they haul from the Rouge is a 5,000 capacity and that's what they have been deliver-
ing in. The other company had an 8,000, which was
834 a tank train and trailer, but this company doesn't
have the trailer, so that makes the difference.

Q. I don't understand. What do you mean it makes a difference?

A. What I mean, it makes a difference in the quantity from 8,000 to 5,000.

Q. Does it have any reference in the difference of the price which you get, as between Cities Service and Argo?

A. No. My contract calls for 8,000 gallons, but they didn't have any 8,000 gallon tanks, and they said if it didn't make any difference to me, they would deliver in 5,000 lots, and I said, "That's O. K. with me."

Q. So they delivered to you in 5,000 lots at one cent below the dealer price?

A. That's right.

Q. And that has been going on for three years now, hasn't it?

A. A little over two years, isn't it; a year and a half —whatever it is.

Q. And going on to date; and still continuing; still continuing the arrangement?

A. That's right.

Q. Do you have a contract with them?

A. Yes, sir.

Q. A written contract?

A. Yes.

835 Q. Wherein they agreed to this arrangement on
price?

A. I can't answer that exactly. I would have to take a look at it.

Q. But the fact is you always get the one cent below the dealer price?

A. That's right.

Q. Is that right?

A. That's right.

Q. Now, on this conversation you had with Mr. Blough —returning to that—I would like to have you tell the Court what was said, if anything, about any credit arrangements or any other arrangement besides your storage, in connection with your buying tank car?

A. Credit never was mentioned.

Q. Now, you were permitted to say you had the money in the bank to buy tank car, and this occurred when, in July—

A. No, March, April, or May of 1938.

Q. How much money did you have in the bank?

A. I think there was around 1300, 1400, maybe $1500, around $1500. I don't know; something like that.

Q. What bank?

A. Detroit bank.

Q. You regard that as sufficient capital to go into the tank car business and gasoline?

A. That would buy a carload.

836 Q. Yes, I agree it would buy a carload. Now, you bought merchandise from the Merchant Supply Company, didn't you, Mr. Miller?

A. Yes; I still do.

Q. And were at that time, weren't you?

A. Yes.

Q. Do you know anything about your credit rating there?

A. They get their money—2% every month, right now, I know that.

Q. Do you know what they were getting at that time?

A. I don't know. Things were pretty tough in 1938. Maybe they weren't getting their money then.

Q. Do you know what investigation the Standard Oil Company made of you as a credit risk for a tank car buyer?

A. I don't know, but I know the money was there.

Q. You know the $1500 was there?

A. You bet your boots I do!

Q. What have been your prices in respect of the retail business that you do in relation to the prevailing retail price during the time that you have been in business at your present location?

A. The prices are the regular posted prices.

Q. Have you ever given any concessions or discounts or—discounts or rebates or premiums?

A. There was a time there when the so-called price
837 war was on, I gave—I think we had a phoney price up, like all of them did, but otherwise it [illegible] the regular prevailing price to customers.

838 Trial Examiner Ballinger: You say "A phoney price." What do you mean by that?

The Witness: A little lower than the prevailing price. They had all kinds of things up. They would change your oil free, and wash free, and all that stuff. That's what I mean by "phoney prices." Everyone had a different setup.

By Mr. Hanley:

Q. In your conversations with Mr. Blough, did you have some talk about a railroad siding?

A. I asked him—first, he said they didn't have nothing for me on the tank train, and I said, "If I get a railroad siding, will you shunt a car in on that," and he said they have nothing for me. He did not answer me yes or no.

Q. All you said to him was, if you get a railroad siding?

A. That's right.

Q. That's all you said to Mr. Blough?

A. That was the end of the conversation, because when he said he had nothing for me, it was no sense in going any further. We quit then, because that was the end.

Q. You didn't, at that time, tell him you had any railroad siding?

A. I didn't have it. There was one available over there, and I figured if he would say he would, I was going to get in touch with those people and get it.

Q. You mean, you thought it was available?

839 A. It was available because it was standing idle for five years, and anything standing idle for five years, it is available.

Mr. Hanley: I move to strike the answer as a conclusion of the witness.

Trial Examiner Ballinger: Motion denied.

By Mr. Hanley:

Q. Do you know, from any transactions you had with the owner of that siding, whether or not it was available?

A. I didn't right then, because—

Q. Just answer the question. Do you know, from any transaction that you had with the other of that siding, whether or not it was available to you?

A. I take it it was; because they corresponded with me, and wanted to sell me all the tanks on there.

Q. When?

A. That was in March.

Q. How much did they want for this siding and tank situation?

A. I am telling you, I never said anything about the siding. All they wanted to do was get rid of the tanks they had there. They had about fifteen of them.

Q. You weren't corresponding about the tanks?

A. Nothing was said about the siding. They had used it in years gone by.

840 Q. How much did they want?

A. I bought the one I got for $175.00. There were 16,000 there.

Q. Where were they in relation to your station?

A. About two miles.

Q. Did you have a truck?

A. No.

Q. A tank truck?

A. You mean, to haul this gasoline?

Q. That would be capable of hauling?

A. No, I was going to hire the gasoline hauled by one of the big tank trains at .2 of a gallon.

Q. Who was going to haul it for you for .2 of a cent a gallon?

A. Kaufman Cartage.

Q. Did you have that deal made?

A. Oh, yes.

Q. Did you say any of those things to Mr. Blough?

A. I told him if he could shunt the car in, I would take the gasoline out of it and move it over here.

Q. And what did he say?

A. He said, "We have nothing for you."

Q. And you interpreted that as meaning that the Standard Oil Company wouldn't do any business?

A. On that basis; certainly not.

841 Q. And as a result of that, you began to buy an off-brand gasoline, as you call it: the Linco?

A. I didn't call it an off-brand.

Q. I beg your pardon. I don't think you did; other witnesses did. But that was a price a cent and a half off the dealer's price?

A. That's right.

Mr. Hanley: That's all.

Redirect Examination by Mr. Austin.

Q. What are you charging for gasoline?

A. I think it is 16.3 on regular; seven for $1.14.

Q. Seven for $1.14?

A. Yes.

Mr. Austin: That's all.

Trial Examiner Ballinger: You are excused.

(The witness excused.)

Mr. Hanley: I renew my objection to this testimony, and renew my motion to strike, for all of the reasons originally assigned, and for the additional reason nothing has been since elicited in the testimony of the witness, that makes it material, relevant, or pertinent to any of the issues in this case, defined by the present pleadings, or by the pleadings as proposed to be amended by counsel for the Commission.

842 Trial Examiner Ballinger: The objection is overruled, and the motion is denied. You cannot properly, at this time, submit a motion to strike that portion of the examination pertaining to Mr. Peek. When the record is written up, if you will bring it to the Examiner's attention, he will entertain a motion to strike that portion of the cross examination, which counsel stated would run to the credibility of the witness.

Mr. Austin: I have no further witnesses this morning, and I move that we adjourn until Monday at 10:00 o'clock.

Trial Examiner Ballinger: Without objection, the motion is granted, and now, at 11:35 A. M., the hearing stands adjourned, to be reconvened at 10:00 o'clock A. M., March 17, 1941, in Room 859, Federal Building, Detroit, Michigan.

(Whereupon, at 11:35 A. M., March 15, 1941, the hearing in the above-entitled matter was adjourned.)

843 Room 859 Federal Building,
Detroit, Michigan,
March 17, 1941.

Met, pursuant to adjournment, at 10:00 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., Attorney for the Federal Trade Commission.

H. R. Hanley, Esq., 910 S. Michigan Avenue, Chicago, Illinois, on behalf of the Respondent.

844 PROCEEDINGS.

Trial Examiner Ballinger: Come to order, gentlemen.

The hearing of Docket No. 4389, the case entitled In the Matter of the Standard Oil Company is reconvened at 10 o'clock A. M., Eastern Standard Time March 17, 1941, in Room 859 Federal Building, Detroit, Michigan.

The last hearing was held in Detroit on March 15, 1941.

The reporter will note counsel for the Commission and Respondent present.

You may proceed, gentlemen.

ELMER E. LEDBETTER was thereupon recalled as a witness by and on behalf of the Commission, and, having been heretofore duly sworn, testified further as follows:

Direct Examination by Mr. Austin.

Q. Mr. Ledbetter, when you were on the stand before, I believe that I asked you some questions about your purchase of gasoline from the Standard Oil Company and the method in which it was delivered, and, to refresh my memory, when did you start buying gasoline in tank car quantities from the Standard Oil Company?

A. It was in August of 1935.

Q. And I believe you stated that for some time 845 after that, the Ethyl gasoline or so-called Solite Ethyl which you purchased was delivered to you by the Standard Oil Company in tank wagons and not in tank cars.

A. That is substantially the case. They delivered it to my stations or dealers.

Q. And how were those deliveries made?

A. Standard Oil tank wagon.

Q. Did you ascertain from your records what price you paid for that Ethyl gasoline that was so delivered?

A. I have sufficient records to make me absolutely positive as to the basis. I haven't all the records for the entire period. I wasn't able to find them in my files. They probably have been destroyed, some of them.

Q. To the best of your knowledge and belief, what was the price that you paid for Solite Ethyl purchased during that period, as compared with the posted tank wagon price for Solite Ethyl?

A. I paid the posted tank wagon price.

Q. Were there any exceptions to that, as far as you know?

A. I don't believe there were any exceptions to that.

Q. And did the Standard Oil Company deliver that gasoline in their own tank trucks?

A. That's right.

Q. How long did you continue to purchase the Ethyl gasoline in that manner?

846 A. July 3, 1936.

Q. In the case of the dealers whom you supply with gasoline for resale, was there Ethyl gasoline during that period received directly from the Standard Oil Company?

A. It was received by Standard Oil tank truck. I guess you would say it was directly from Standard Oil Company, yes.

Q. Did those dealers order the gasoline from you or did they order it direct from the Standard Oil?

A. It is my recollection—well, I wouldn't say. It might have been both ways. It is my idea that they would order through our office.

Q. And what price did those dealers pay for the Ethyl gasoline?

A. Exactly the same price I paid; the tank wagon price.

Q. Then you made no money on the sale of that gasoline?

A. That's right. It was handled with any profit, during that period.

Q. And how long did that continue?

A. Approximately 11 months.

Mr. Austin: I think that's all.

Mr. Hanley: No cross examination.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

847 Mr. Austin: Mr. Wotring.

JOHN H. WOTRING was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Will you give your full name to the reporter, please?

A. John H. Wotring.

Q. And your address?

A. 8270 Carlin, Detroit.

Q. What is your business, Mr. Wotring?

A. Automobile business and gasoline; parts and accessories.

Q. What automobile?

A. Chevrolet and Buick.

Q. Are you a Chevrolet and Buick dealer, then?

A. Yes, sir.

Q. Where is your store located?

A. 14700 Michigan Avenue, Dearborn.

Q. Do you have car showrooms and also a gasoline station at that address?

A. Yes, sir.

Q. How long have you been located there?

A. At that particular spot, I have been there since August 1st, 1936.

848 Q. Were you in the automobile or gasoline business prior to that date?

A. Automobile.

Q. You have only sold gasoline since you have been at that address?

A. Yes, sir.

Q. What brand gasoline did you start out with there?

A. Cities Service.

Q. And how long did you sell Cities Service gasoline?
A. One year.
Q. Then what change did you make?
A. Changed to Standard Oil.
Trial Examiner Ballinger: When was that?
The Witness: August 1, 1937.

By Mr. Austin:

Q. Since August, 1937, have you been selling Red Crown gasoline?
A. Yes, sir.
Q. And what other brands?
A. No other brands.
Q. Ethyl?
A. Ethyl.
Q. Just those two; Red Crown and Ethyl?
A. Yes.
Q. From whom do you purchase your gasoline?
849 A. Mr. Ledbetter. I think it is called the Wayne Oil.
Q. Wayne Oil Company?
A. Yes, sir.
Q. How long have you been buying from Mr. Ledbetter?
A. Since August 1, 1937.
850 Q. By what method is the gasoline which you purchased, delivered to your stations?
A. Tank trucks.
Q. And are those the Standard Oil Company tank trucks, or are they the Wayne Oil Company trucks?
A. The Wayne Oil Company trucks, as far as I know they have the Wayne Oil's name on them.
Q. Do you know what price you are paying today for Red Crown gasoline?
A. I could not tell you to the cent; I know I am paying the prevailing price.
Q. You don't recall the exact figure?
A. No.
Trial Examiner Ballinger: When you say the prevailing price, you mean the posted price?
The Witness: The posted price on tank wagon lots.

By Mr. Austin:

Q. And do you know, or is it a fact, to the best of your knowledge, that since you started purchasing gasoline from the Wayne Oil Company in 1937, you have always paid the posted tank wagon price?

A. Yes, sir.

Q. Do you know what price you are selling gasoline for today?

A. Well, sir, I really don't know. I know that we are selling it at the standard retail price.

851 Q. You mean the prevailing retail price in your neighborhood?

A. Yes.

Q. Do you give most of your time to the automobile business, or the gasoline business?

A. That is right, the automobile business.

Trial Examiner Ballinger: When you say the prevailing retail price, do you mean the prevailing retail posted price?

The Witness: Yes, sir.

By Mr. Austin:

Q. I assume by posted, Your Honor, you mean posted on the pumps at the stations?

Trial Examiner Ballinger: That is right. There has been some testimony here that there was a variation between the prevailing retail prices.

Mr. Austin: Yes, certain periods. Not during 1940, but during certain periods.

By Mr. Austin:

Q. And can you tell me what your retail selling price of Red Crown gasoline was in 1937, after you started handling it, or in 1938?

A. We have always retailed our gasoline at the set retail price. We have never—in other words, we have never discounted it. Our price is given to us by the Wayne Oil Company.

852 Q. Does the Wayne Oil Company tell you what the prevailing price is?

A. The Wayne Oil Company even paints the signs.

Q. Then, do you sell merely at the price which the Wayne Oil Company tells you, or do you know that that is the prevailing price sold at to the major brand stations?

A. Well, as far as I know, it is the same price that the other, my other, competitors, such as Hi-Speed—they are right next door to me, and there is a Texaco station right across the street from me.

Q. I suppose you observe their signs?

A. Same as mine, yes, sir.

Q. During 1937, or 1938, or 1939, did you ever change the price that you were charging for Red Crown gasoline at your stations, except when the Wayne Oil Company changed your tank wagon price to you?

A. No, sir.

Q. And as I understand it, you never cut your price on gasoline during that period unless there was a drop in the tank wagon price?

A. That is right.

Q. How near to you is the nearest store and gasoline station operated by Ned's Auto Supply Company?

A. About five or six blocks.

Q. Where is it located?

853 A. On the corner of Maple and Michigan.

Q. And you are also on Michigan Avenue?

A. Yes, sir.

Q. Are they on the same side of the street, or the opposite side of the street?

A. The opposite side of the street, from me.

Q. Is Ned's nearer downtown, or farther out?

A. It is nearer town, nearer the City of Detroit.

Q. Do you know whether that station of Ned's Auto Supply Company was selling Red Crown gasoline at a lower price than you were, during any period from 1937 to 1939?

A. According to their signs, in front, they were.

Q. When was that?

A. 1938 and, I believe, the early part of 1939.

Q. You mean that you saw some signs in their stations?

A. Yes.

Q. What did the signs say?

A. 'Two cents off per gallon.''

Q. Did you look at the price on the pumps, or see wha the two cents was off of?

A. No, I never bought any gas there. I just saw the big sign on the lamp posted out in front of their place.

Trial Examiner Ballinger: During what period?

The Witness: 1938, and I am pretty sure it was the early part of 1939.

854 By Mr. Austin:

Q. Is there a concern located near you, known as the Webb Lumber Company?

A. Yes, sir.

Q. Do they have lumber yards in the vicinity of your station?

A. Yes, sir.

Q. And where are the lumber yards located?

A. They are right across the street, in the same block from me.

855 Q. Who is the proprietor of that company?

A. Mr. Lowrie and Mr. Webb.

Q. Are you acquainted with either one of those gentlemen?

A. I know both of them.

Q. Did you ever solicit the business of the Webb Lumber Company—I mean the gasoline business of the Webb Lumber Company?

A. Yes, sir.

Q. Does the Webb Lumber Company operate trucks or what vehicles do they operate?

They operate both trucks and pleasure cars.

Q. Would you consider that a pretty nice piece of business if you could get it?

A. Absolutely. I imagine they operate about 20 pieces.

Trial Examiner Ballinger: When did you solicit them?

The Witness: About two months ago, right after the first of the year.

By Mr. Austin:

Q. Can you describe any conversation you had with Mr. Webb on that subject?

A. Well, I asked Mr. Webb for his gasoline business and he told me that he would be glad to give it to me, that I was much closer than Ned's Auto Supply Company, if I could meet the price of the Ned's Auto Supply Com-
856 pany, so I asked him what their price was, and he said two percent off per gallon.

Trial Examiner Ballinger: Did you say 2% off per gallon?

The Witness: I mean 2 cents off per gallon.

By Mr. Austin:

Q. Off what?

A. 2 cents off on a gallon of gas.

Q. Off of what? 2 cents off—did you tell him what your price was?

A. Yes, sir; my price was posted on the pumps.

Q. Did he tell you that Ned's was charging less than that?

A. Yes.

Q. How much less?

A. 2 cents less, and I told him I could not meet their price.

Q. And did he say he has been buying his gasoline at Ned's Auto Supply Company?

A. Yes, sir.

Q. And has he started buying any from you?

A. No, sir.

Q. Is the Webb Lumber Company closer to your station or to Ned's station?

A. It is much closer to me; about four blocks or five.

Mr. Austin: You may cross examine.

857 *Cross-Examination by Mr. Hanley.*

Q. Mr. Wotring, when you said your retail gasoline prices were given to you by the Wayne Oil Company, I presume you did not mean that they dictated to you what your price would be, did you?

A. No.

Q. You were at liberty to sell your gasoline at any price you wanted to, so far as the Wayne Oil Company is concerned, weren't you?

A. I imagine so. I pay them for it when I get it.

Q. And they just know what the prevailing retail price is and keep you advised about it?

A. Yes, sir.

Q. And you have used that price?

A. Yes, sir.

Trial Examiner Ballinger: You have no understanding with the Wayne Oil Company that you are to sell at the prices they designate?

The Witness: The only understanding that I have is that I sell at the posted price.

Trial Examiner Ballinger: And they furnish the posted price?

The Witness: They furnish the posted price; the same as the other Standard stations should sell it.

858 By Mr. Hanley:

Q. All we are seeking to learn here, Mr. Wotring, is whether you are at liberty, if you wanted to, to reduce your price of gasoline today, your retail price, a cent or half a cent or two cents or anything else you wanted, so far as the Wayne Oil Company is concerned.

Mr. Austin: I will concede that he may do that; if that will help? I don't believe it is material, and the only thing I am interested in is what Judge Hanley, apparently, by his question, has also conceded, and that is that the price the Wayne Oil Company suggested to Mr. Wotring is what we have referred to here as the prevailing retail price.

Mr. Hanley: I think that clears it up. I wanted it understood that this man owns his own gasoline and can sell at whatever price he wants to.

Trial Examiner Ballinger: There is some doubt in the Examiner's mind, but the statement of counsel for the Commission disposes of the matter.

Mr. Hanley: Very well.

By Mr. Hanley:

Q. The lumber company that you referred to, Mr. Wotring, you said operated about 20 pieces; that is, 20 vehicles, largely delivery trucks?

A. Delivery trucks and salesmen's cars.

859 Q. During 1938 and 1939 when you observed these signs at Ned's Service Station, was it not true that during that period the practice of giving 2 cents a gallon discount and giving other discounts, premiums, and that sort of thing, was very prevalent throughout Detroit?

A. Yes, sir, it was.

Q. You never did do that, yourself?

A. No, sir.

Q. You could have done it had you chosen to do it?

A. I imagine I could have, yes, sir.

Mr. Hanley: I think that's all, Mr. Wotring, thank you.

Mr. Austin: Thank you, Mr. Wotring.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Q. Now, toward the latter part of 1937 did other stations begin to advertise discounts in your neighborhood? A. Considerably.

Q. And did you lower your price to meet—or to the same price which was being charged at any of these other stations?

A. Not for about 30 days after our two nearest competitors had dropped their price.

Q. And who were the two nearest competitors?

A. White Star Station on the corner of Rochester and Linwood and a Cities Service, across the street from us.

886 Q. When was that?

A. That was in February—I believe the White Star first started in January.

Q. January of what year?

A. January of 1938, and "Curley" Knowles, the operator of the station across the street from us, called upon them to prevail upon them to—

Q. Just a minute. Did you hear the conversation? You are just talking about a conversation between two other people?

A. No. I said myself and "Curley" Knowles, the operator of the Cities Service Station across the street, attempted to prevail upon the White Star dealer to stay along in line with us. He refused to do so, and then Mr. Knowles dropped his price, and I believe that was in February, and it caused such a tremendous loss in gallonage that we were forced to drop our price in March.

887 Trial Examiner Ballinger: March what?

The Witness: Of 1938.

By Mr. Austin:

Q. Now, did the Citrin-Kolb station, either under their name, or whoever was operating it, from time to time, continue to distribute these discount cards you have described?

A. When they first distributed the cards, and then, after concerted efforts of various dealers in making calls to dealers who were discounting with signs out, we were able to clear it up temporarily, and it was just a temporary clearing up on the part of the Citrin-Kolb station, and then they came out with another discount card and distributed them throughout the neighborhood; not only discounting on gasolines, but motor oils also.

Q. When was that?

HAROLD LEFSTAD was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Will you state your full name?
A. Harold Lefstad.
Q. Your residence, Mr. Lefstad?
A. 11731 Nardin.
860 Q. Are you an operator of a gasoline station, retail gasoline station?
A. I am.
Q. Where is your station located?
A. 13100 Livernois, Buena Vista.
Q. That is in Detroit, is it not?
A. Yes, sir.
Q. How long have you been selling gasoline at that location?
A. Since October 1, 1936.
Q. Were you engaged in the gasoline business prior to that time?
861 A. Not just before that, no. I worked as a helper in a gas station before then, but not running one.
Q. Have you handled the same brand of gasoline since you have been at that station?
A. Yes, sir.
Q. At all times?
A. Yes, sir.
Q. And what brand is that?
A. Standard Oil.
Q. What different brands of Standard Oil gasoline do you sell?
A. Red Crown and Ethyl.
Q. Do you sell Ford Benzol or any other such brand?
A. No, sir.
Q. From whom do you buy your gasoline, Mr. Lefstad?
A. Wayne Oil Company.
Q. Is that the company which Mr. Ledbetter is president of?
A. Yes, sir.
Q. How is the gasoline delivered to your station?
A. Tank wagon.

Q. And by whose tank wagons?

A. Wayne Oil Company's.

Q. Are you familiar with the—or have you been at all times since you have been in business, been familiar with the posted tank wagon price of the Standard Oil Company?

862 A. Yes, sir.

Q. And can you tell me whether the price which you have been paying the Wayne Oil Company for gasoline, is the same as the posted tank wagon price of the Standard Oil Company?

A. Just exactly.

Q. Is there a gasoline station operated by Ned's Auto Supply Company in the same part of Detroit that you are located in?

A. Yes, sir.

Q. How far from your station is that station of Ned's Auto Supply Company?

A. About a mile.

Q. And exactly where is it located?

A. Corner of West Chicago and Grand River.

Q. Is there any through traffic from your station to or past Ned's station?

A. Yes, sir.

Q. How does that traffic run?

A. Livernois to Grand River, and Grand River, downtown.

Trial Examiner Ballinger: When you say there is some; is there a considerable volume?

The Witness: Yes, sir.

By Mr. Austin:

Q. Where does that traffic originate, or what suburbs or parts of the city does that artery serve?

A. Redford, northwest Detroit, Livernois.

863 Trial Examiner Ballinger: Is that street one of the main arteries?

The Witness: It is.

By Mr. Austin:

Q. Of course, I think we have already shown that Grand River was the main artery, but, as I take it from your testimony, do I understand Livernois runs into Grand River?

A. It crosses Grand River, yes, sir.

Q. Do you recall what price you were charging for Red

Crown gasoline in latter 1937 and the early part of 1938, or can you tell me what your margin was at that time?

A. About four and a half cents.

Q. Between your purchase price and your selling price?

A. Yes.

Q. I guess that's what margin always means.

A. Yes; about four and a half cents.

Q. At that time, do you know whether Ned's Auto Supply Company on Grand River was selling at the same price or higher or lower than you were?

A. They were selling lower than I was.

Q. How do you know?

A. Signs; there were signs up in front of Ned's.

Q. At their station?

A. That's right.

Q. Do you remember anything about those signs?

864 A. Just two cents off, is all I can remember.

Q. Did you notice the signs on their pumps?

A. No, sir.

Trial Examiner Ballinger: What period did you observe the two cents off at Ned's?

The Witness: It would be in 1938. I can't recall just when that started, but I know in the early part of 1938 they were up, the signs were up.

Trial Examiner Ballinger: Do you remember when it was discontinued, or has it been discontinued?

The Witness: Well, it was discontinued in 1939, in November, I believe. I am not sure of that, but I believe it was.

Trial Examiner Ballinger: Has it been renewed since?

The Witness: No, the signs aren't up now.

By Mr. Austin:

Q. You may look at that book, if it will help you in refreshing your recollection in answering it.

(A document was handed to witness by counsel for the Commission.)

Trial Examiner Ballinger: Handing the witness what?

Mr. Austin: A statement which he gave me, and which I hereafter intend to identify, Your Honor, but haven't reached that point now.

865 Trial Examiner Ballinger: You might identify it now.

Mr. Austin: It is a statement prepared by the witness.

Trial Examiner Ballinger: So that we will know what the witness is looking at, you may identify it now.

The reporter will mark it Commission's Exhibit 63, for identification.

(The document referred to was marked "Commission's Exhibit 63" for identification.)

By Mr. Austin:

Q. I will now show you Commission's Exhibit 63, for identification, and ask you if you will describe what that is.

A. Well, I have my daily gallonage for July, 1938, and, also, the daily gallonage for August of 1938, showing— well, our gallonage went down—

866 Q. Just a minute. Just state what it is.

A. It is the daily gallonage for the two months on the first page, and the monthly gallonage from 1936 through 1940.

Q. Who prepared those records?

A. I did.

Q. And from what source did your prepare them?

A. I have all my records.

Q. Are those the records maintained at your station?

A. Yes, sir.

Q. And do those records show your daily and monthly gallonage?

A. They sure do.

Q. These records are true, to the best of your knowledge?

A. They are.

Q. I believe you were asked by the Trial Examiner how long Ned's continued to post the 2 cent discount signs at their station.

A. That's right.

Q. And did you complete your answer to that question?

A. Well, I think I did. I think it is November of 1939.

Q. Now, after those discount signs were displayed at Ned's Auto Supply Company station on Grand River, did your volume of business increase or decrease?

A. It decreased.

867 Q. Did you have any conversations with any of your customers or former customers regarding the purchase of gasoline or discounts that they were receiving at Ned's station?

A. Well, I had several at the time, but I can't remember any particular person or persons.

Q. Can you remember any particular conversations?

A. Well, they asked for a discount. They would tell me they could get it at Ned's. Outside of that, I haven't any particular case.

Q. Did they buy at your station just the same, even though you didn't give them the discount?

A. No. Most of them didn't.

Q. You mean they would ask for a discount?

A. And leave.

Q. That's what I wanted to get at. If they bought from you, anyway, it wouldn't make much difference.

A. That's right.

Trial Examiner Ballinger: They asked for a discount and you refused to allow it and then they left, without purchasing?

The Witness: That's right.

Trial Examiner Ballinger: And that continued during the period that Ned's was giving the discount?

The Witness: Part of it.

868 Trial Examiner Ballinger: What part of it?

The Witness: Well, we met Ned's prices, I think, in August of 1938; August 4th or 5th, I believe, we also posted a sign to meet the competition.

By Mr. Austin:

Q. How much did you cut your price at that time?

A. We just met Ned's.

Trial Examiner Ballinger: How long did that continue?

The Witness: Do you mean at that particular price or—

Trial Examiner Ballinger: Yes, while you were cutting the price to meet Ned's.

The Witness: We met Ned's, then, until—I am not sure whether we met them all the time, but I know we tried to meet Ned's from then until 1939 when Ned's also took their signs down.

By Mr. Austin:

Q. Until what part of 1939?

A. November.

Q. Now, you stated that you reduced your price to the price that Ned's was charging on, I believe you said, August 5th?

A. I believe that is what it was.

Q. Does this first sheet in Commission's Exhibit No. 63, for identification, show the daily volume of gasoline 868½ sales at your station immediately before and after the time that you cut your price?

A. That is right.

Trial Examiner Ballinger: During the period when you met Ned's price, you didn't lose any customers, did you?

The Witness: No, sir.

Trial Examiner Ballinger: It was before you commenced cutting that you lost customers?

The Witness: Yes, sir.

By Mr. Austin:

Q. In the fall of 1939, in September, did you make a further price cut at that time? That is, narrowing your margin again?

A. Yes, sir.

Q. And are the dates of those price cuts which you have described, indicated on this volume chart which is marked Commission's Exhibit No. 63, for identification?

A. Yes, sir.

Mr. Austin: I will offer this booklet in evidence with the statement that it is only the first four pages that have anything on and the cover is no part of the exhibit. These pages, I assume, may be torn out by the reporter or cut out and properly marked. I think that could be done physically without in any way impairing the exhibit.

869 Mr. Hanley: Off the record.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Mr. Hanley: We haven't any objection and no objection to removing the sheets and marking that.

Trial Examiner Ballinger: Well, I suggest they be removed, now, and appropriately marked and they may be posted on cards.

(Thereupon Mr. Austin tore the sheets out of the Exhibit.)

Mr. Austin: I offer, your Honor, these exhibits and suggest that they be marked Commission's Exhibits 63-A and 63-B.

Trial Examiner Ballinger: How many pages?

Mr. Austin: There are two sheets, both written on both sides.

Trial Examiner Ballinger: Without objection Commission's Exhibit 63-A and B, for identification, are admitted into evidence.

(The documents referred to, heretofore marked "Commission's Exhibit 63," for identification, were marked "COMMISSION'S EXHIBIT 63-A and 63-B," for identification, and were received in evidence.)

Mr. Austin: That is all I have right now from
870 this witness.

Cross-Examination by Mr. Hanley.

Q. Mr. Lefstad, is there a service station near you on Livernois and Davison operated by the Royal Petroleum Company?

A. Yes, sir.

Q. And how long has that station been there?

A. I don't know. I believe it has been there as long as I have, or longer.

Q. It was there through 1936, 1937, 1938, and 1939?

A. Yes, sir.

Q. And it is still there?

A. That is right.

Q. What has been the price of gasoline as to whether it was higher or lower at that station than yours?

A. Well, the price is always lower.

Q. And what has been the price at that station in relation to the price of gasoline at Ned's Auto Supply station, the one near there, as far as you know?

A. I don't think I have ever compared them, because that station has never hurt me that I know of.

Q. You do know what their price is?

A. Well, I know they are lower. I have noticed that.

Q. What do they sell?

871 A. It is an off-brand of Ethyl, I believe.

Q. Is that all?

A. I believe so. I haven't paid much attention. I believe it is all Ethyl.

Q. Is there a Savage Auto Supply Company somewhere near you?

A. Yes. I don't know—I believe it still is the Savage Auto Supply Company.

Q. That is a Texaco dealer, isn't it?

A. Yes, sir.

Q. Now, during the period of time you have been at your location, what is the fact as to whether the Savage Auto Supply Company sold gasoline at a price higher or lower than you did?

A. They have been lower, too.

Q. Have they not also been lower than Ned's during the time that you have been there?

A. I really couldn't say whether they have been lower than Ned's or not. I believe they have pretty well met Ned's.

Q. They have what?

A. I think they have been about the same as Ned's.

Q. They sell Texas gasoline?

A. That is right.

Q. Is there a station known as Cora's Service Station near you?

872 A. No, not that I know of.

Q. It is on Fenkel Street.

A. Oh, that is a long ways from me.

Q. It is?

A. Yes.

Q. Well, you are just not familiar with this station?

A. No, I don't know.

Q. Now, you said that in August, 1938, you cut your price to meet Ned's; that is true, is it not?

A. Yes, sir.

Q. Is it not true, also, Mr. Lefstad, that at that time the generally prevailing price at many service stations handling various brands of gasoline in Detroit was 2 cents off the pump posted price?

A. That is right.

Q. So isn't it true that while you did meet Ned's, you were also meeting a generally prevailing competitive condition at that time?

A. Yes, at that time.

Mr. Hanley: I am not sure I understand all your notations, Mr. Austin, on Commission's Exhibit No. 63-A and B.

By Mr. Hanley:

Q. Does this exhibit indicate two reductions in price made by you, Mr. Lefstad?

873 A. Yes.

Q. That is in August of 1938?

A. Yes.

Trial Examiner Ballinger: Referring to what?

Mr. Hanley: Referring to Commission's Exhibit No. 63-A in evidence.

A. This is the gallonage at the same time.

By Mr. Hanley:

Q. This is monthly?
A. Yes.

Trial Examiner Ballinger: Referring now to Commission's Exhibit 63-B?

The Witness: That is right.

By Mr. Hanley:

Q. And there is one other on Commission's Exhibit 63-B?
A. That is right.
Q. Does that indicate an additional cut?
A. Yes, we cut to a lower price.

Trial Examiner Ballinger: When?

The Witness: September, 1939.

Trial Examiner Ballinger: And how long did that continue?

The Witness: Until November 17, 1939.

By Mr. Hanley:

Q. And did you raise the price on that date?
874 A. Yes, sir.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Hanley:

Q. When you talk about these price cuts that you noted on Commission's Exhibit 63-A and B as occurring in August of 1938 and in September of 1939, are you referring to a cut in your then existing retail price?
A. That is right.
Q. So the September, 1939, cut resulted in a lower per gallon price than you had cut to?
A. Before.
Q. Before in August of 1938?
A. That is right.
Q. And that last cut was just in effect a couple of months?
A. Just two months, yes.

Trial Examiner Ballinger: How much of an additional cut did you make, commencing in September, 1939?

The Witness: I think we cut to 12½ cents. I am not sure just what it was before that, but that is the last cut we had, I believe.

Trial Examiner Ballinger: How much of a cut per gallon was that?

The Witness: I really could not say for sure.

875 Trial Examiner Ballinger: 2 cents or more?

The Witness: Well, I wouldn't want to say for sure, because I don't really know what the last cut was.

By Mr. Hanley:

Q. Whatever it may have been, what is the general competitive situation in Detroit, was the general competitive situation in Detroit such that you thought you had to reduce your price again to meet that condition?

A. That is right.

Q. I want to make it clear as to your understanding of the fact that during that period of time, in 1938 and 1939, that there were just a great many service stations all over Detroit and handling all kinds and brands of gasoline who were making this discount of price; is that right?

A. Yes.

Mr. Hanley: That is all.

Redirect Examination by Mr. Austin.

Q. Mr. Lefstad, just one more question. In regard to the amount which you reduced your prices in September of 1939, there were numerous or at least more than one reduction in the tank wagon price at that time, were there not?

A. I don't quite understand you.

Q. Well, wasn't that period from September to

876 November the end of the so-called price war?

A. That is right.

Q. And didn't the Wayne Oil Company reduce its tank wagon price to you on certain occasions between the summer of 1939 and November of 1939?

A. Well, I don't remember. Yes, they must have reduced it some. I don't remember just what.

Q. Well, the record will show what the posted tank wagon price was during that period, but I want to bring out the fact, if it is a fact, that the amount which your price was reduced, the amount per gallon that your price was reduced in the late part, the latter part of 1939, would not be entirely a reduction which you were making in your margin.

A. Oh, no, not all of it.

Q. Part of it would be due to a reduction in the tank wagon price with you were paying?

A. That is right.

Q. Is that correct?

A. Yes.

Mr. Austin: That is all.

Recross Examination by Mr. Hanley.

Q. Mr. Lefstad, there are—there were only the two reductions made by you which affected your margin; is
877 that correct; or was only the first one such as to have any effect on your margin?

A. I don't know. I think they all had an effect on the margin.

Q. Well, I think what Mr. Austin and I are both trying to find out is whether or not your last reduction in September of 1939 was occasioned by a reduction in your tank wagon price that you had to pay.

A. I believe there was a reduction in the tank wagon price also.

Q. And you just passed that reduction on to your customers?

A. I am not sure whether there was any more besides the reduction in the tank wagon price or not that we passed on, but we passed it on, whatever it was.

Q. And you think you may have reduced a little more than that?

A. That is right.

Q. But you are not sure of that?

A. That is right.

Mr. Hanley: That is all.

Mr. Austin: That is all.

May we have a brief recess?

Trial Examiner Ballinger: We will take a recess for five minutes.

(Witness excused.)

(A short recess was had.)

878 Trial Examiner Ballinger: We will come to order.

Mr. Austin: Mr. Ferguson.

HOWARD A. FERGUSON was thereupon called as a witness for the Commission, and having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Will you give your name to the reporter, please?

A. Howard A. Ferguson.

Q. Where do you reside?

A. 12029 Wisconsin.

Q. Have you ever been engaged in the gasoline business, Mr. Ferguson?

A. Yes, sir.

Q. And when were you first engaged in that business?

A. Well, we took over on the Iowa Plan in May of 1936.

Q. Prior to 1936, what was your business?

A. I was working for the Standard Oil Company.

Q. In what capacity?

A. As assistant of the manager of the station at the corner of 2605 Boston.

Q. What kind of a station was that?

A. Standard Oil.

Q. And was a change in the operation of that station in 1936?

879 A. Yes, sir. We took over the lease of the station in 1936.

Q. Was that when the Iowa Plan went into effect here?

A. Yes, sir.

Q. I believe you said, "we took over." Who do you mean by "we"?

A. Mr. E. A. Bingham and myself, on a partnership setup.

Q. And how did you operate that station?

A. Under the name of Bingham & Ferguson Standard Service.

Q. Did you lease the station from the Standard Oil Company?

A. Yes, sir.

Q. And were you and Mr. Bingham in partnership?

A. Yes, sir.

Q. How long did you and Mr. Bingham continue to lease that station from the Standard Oil Company?

A. Until May 21, 1940.

Q. Did you sell all three brands of Standard Oil Gasoline during that time?

A. Yes, sir.

Q. And how did you receive delivery of your gasoline?

A. Through tank truck.

Q. From whom?

A. From the Standard Oil Company, Clay Avenue plant.

Q. Will you explain, briefly, why you happened to leave that station in 1940?

A. Well, we operated under a partnership setup, 880 and long in the time our lease was coming due in 1939, we were told by Mr. Hazel, our salesman, that it was the policy—a change in the policy of the Standard Oil Company, to discontinue partnership setups.

Q. Was Mr. Hazel a Standard Oil salesman?

A. Yes, sir, and we were called in to the office—

881 Q. What office?

A. Standard Oil Company's office at 4th and Lafayette, in regard to re-leasing the station for the coming year and through our conversation we were allowed to continue on as a partnership and then along in 1940 Mr. Hazel told us that they were going to discontinue the partnership at the termination of the lease, the 1939 lease; that they were only—there were only two stations under lease at the time, under partnership, and they were going to discontinue both of them and before the lease come up I was offered another station and we parted our partnership on the 21st of May, about five days prior to the time of the expiration of our lease.

Q. Then did you move to another Standard Oil station?

A. Yes, sir.

Q. When was that—first, where was that?

A. That was on the corner of Broad Street and Joy Road, 9201 Broad Street.

Q. And how long did you operate that station?

A. I was there from May 22nd, 1940, to October 9th, I believe of 1940.

Q. And why did you leave that station?

A. Because I found it unprofitable to operate.

Q. Now, when you took over the operation of the station—did you state on the record what the address 882 was of the station you operated from 1936 to 1940?

A. Yes; 2605 Boston.

Q. When you took over the operation of that station with Mr. Bingham, where was the nearest Standard Oil station to you?

A. A Citrin-Kolb station on the corner of Chicago Boulevard and Dexter.

Q. Was that a Standard Oil station?

A. Standard Oil; handling Standard Oil products.

Q. How do you know whether it was a Citrin-Kolb station?

A. A large sign board on the side of the station with the name "Citrin-Kolb Standard Oil Products."

Q. Was that station operating under those signs and with Standard Oil pumps at the time you took over the operation of the Boston station?

A. Yes, sir.

Q. Was that station as large then as it is now?

A. No, sir.

Q. I mean by that, in facilities; was it rebuilt, or what happened?

A. It was rebuilt.

Q. When?

A. I am not sure of the time, but it was either the latter part of 1936 or first part of 1937.

Q. Immediately after that Citrin-Kolb station was 883 rebuilt, did you see any advertising under the name of that station or the operator of that station?

A. Yes, sir.

Q. Advertising any discounts on Red Crown gasoline?

A. Yes.

Q. Will you describe any such advertising?

A. There was cards were put out under the windshields of automobiles throughout the neighborhood, along the streets; also on cars that were parked on our driveway, advertising 2 cent discount on Red Crown gasoline.

Trial Examiner Ballinger: When was that?

The Witness: That was at the opening, after the rebuilding of their station.

Trial Examiner Ballinger: What year and what month?

The Witness: I do not recall what year that station was rebuilt, but it was either the latter part of 1936 or the first part of 1937.

By Mr. Austin:

Q. And immediately following the time those cards were distributed, as you have just described, did the monthly gallonage of your station show any change?

A. Yes, sir.

Q. In what respect?

A. We had quite a drop.

884 Mr. Austin: If your Honor please, I would like to have this paper marked, for identification.

Trial Examiner Ballinger: The reporter will mark the paper, for identification, Commission's Exhibit No. 64.

(The document referred to was marked, for identification, "Commission's Exhibit 64.")

By Mr. Austin:

Q. I show you Commission's Exhibit 64, for identification, and ask you if you will describe its contents (handing document to the witness).

A. This is our monthly gallonage from May of 1936 through to the dissolving of our partnership of May, 1940; our gallonage per month from my sales tax record reports.

Q. And is that a true statement of the monthly gallonage of the Bingham and Ferguson station during that period, to the best of your knowledge and belief?

A. Yes, sir.

Mr. Austin: I offer this statement in evidence.

Trial Examiner Ballinger: Without objection that paper is admitted in evidence as Commission's Exhibit No. 64.

(The document referred to, heretofore marked, for identification, "COMMISSION'S EXHIBIT 64," was received in evidence.)

885 By Mr. Austin:

Q. Did other service stations in your neighborhood begin to offer discounts from the prevailing price in 1937?

A. Not outside of the Citrin-Kolb station. Also Abrams Service, across the street from the Citrin-Kolb Station and the Ned's Auto Supply on Grand River.

Q. Were those the first stations that you noticed which offered discounts in your neighborhood?

A. Yes, sir.

Q. Which ones of those three stations were the first ones whose advertising of discounts you noticed?

A. Ned's Auto Supply, Chicago nad Grand River.

Q. And which one was next?

A. Then the Citrin-Kolb Station immediately followed within a day or two by the Abrams Service across the street from them.

A. That was in 1938.

Q. Towards the end or the beginning of the year?

A. I think it was toward the latter part of the year.

Q. I will show you ~~this~~ card, marked Commission's Exhibit 38, for identification, and ask you if you can identify that card (Handing document to witness.)?

A. These cards, of this type, were put on cars along the street, under the windshield wipers, and, also, on some cars on our driveway.

Q. When?

888 A. I think this was the second card they sent out, which would be somewhere along in 1938 or, possibly, the first part of 1939.

Q. Is the address stated on that card, the address of the Citrin-Kolb station which you have referred to in your testimony?

A. Yes, sir.

Mr. Austin: I offer this card, marked Commission's Exhibit 38, for identification, in evidence.

Mr. Hanley: No objection.

Trial Examiner Ballinger: Without objection, the card is admitted in evidence as Commission's Exhibit 38.

(The card referred to, heretofore marked "COMMISSION'S EXHIBIT 38, for identification" was received in evidence.)

Mr. Austin: That's all.

By Mr. Hanley:

Q. Is there a Joy service station near the Citrin-Kolb station to which you have been referring?

A. Yes, sir.

Q. And was that there in 1938, and from that time on?

A. No. I won't say whether it was Joy or Zip, but it was there at that time, yes, sir.

Q. How close to Citrin-Kolb's station?

889 A. One block.

Q. What is the fact as to the prices, whether they were higher or lower at this Joy or Zip station through all the period while you were out there, than the prices were at the Citron & Kolb station?

A. To my knowledge, they have always been lower.

Mr. Hanley: I think that is all.

Mr. Austin: That is all.

(Witness excused.)

Mr. Austin: If Your Honor please, I have here a document which purports to be a copy of Chapter 282 of the Public Acts for the year 1937. I would like to offer this statute in evidence, with the understanding that I have not personally compared this copy with the official, with any official volume, and if it should appear from the check of Respondent's counsel, or myself, that there is any error in this, that any necessary correction may be made.

Trial Examiner Ballinger: You offer the copy which purports to be a copy of the statute?

Mr. Austin: Yes, and which I believe to be a true copy.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Mr. Hanley: I am afraid we will have an objection.
890 I don't care about its being a copy, but may I inquire
the purpose?

Mr. Austin: Yes. This statute is, I believe, what has been frequently referred to as one of the Fair Trade Acts of Michigan, Section 4 prohibits anyone engaged in the production, manufacture, distribution, or sale of bakery products, or petroleum products, from selling below cost, and there are definitions of cost, and there is a provision regarding sales in good faith, for the purposes of meeting prices of a competitor selling the same article in the same locality; and I have some doubt as to whether the words, "same articles" would apply to a gasoline of another brand. Maybe they would, or maybe they wouldn't. There is also a provision in Section No. 8, which refers to an established cost survey in the locality, and the vicinity, in which the offense is committed, as being competent evidence where someone is charged with a violation of the statute.

Trial Examiner Ballinger: Is there any allegation in the complaint that directly or indirectly refers to, or relates, to that statute?

Mr. Austin: There is nothing in the complaint which directly relates to the statute, but I expect to introduce at a later date a cost survey which was, I think will be shown, was prepared in an effort, at least, to comply with this statute in relation to cost surveys. Furthermore, I think
the statute is relevant, because it may be well argued
891 that with this statute in effect, dealers may have been
prevented, for fear of violation of the statute, from
cutting their price, for fear of violation for selling
892 below cost. However, the chief reason I am offering

it is as a partial ground for offering a survey which I expect will be offered later on.

Trial Examiner Ballinger: Well, just wherein does that statute relate to any matter contained in the complaint?

Mr. Hanley: Well, I don't think ~~it does~~, your Honor, and I would like to be on the record in formal objection.

Trial Examiner Ballinger: Let us first find out from counsel and ascertain his views.

Mr. Austin: Well, it does directly pertain, of course, to the matter in the complaint, in so far as it prohibits price discrimination under the law of Michigan. The primary paragraph prohibits unfair discrimination in bakery and petroleum industries and prohibits discrimination in price with the intent to destroy business of a competitor.

Trial Examiner Ballinger: You are proceeding here under a Federal statute.

Mr. Austin: That is right, but isn't it true that if a statute of a state prohibits selling below cost, then, your Honor, if one or two competitors, we will say, to be specific, if Ned's Auto Supply is buying—is paying a price of 6.6 cents a gallon for gasoline, and his competitor is paying a price of 8.1 cents, and thereby Ned's is offering to sell at a price which would be below cost of the competitor.
893 Now, the very fact that this statute is on the books here in Michigan may add to the effect of the discrimination in price which we are proving under the Federal statute, because, under this statute, it may be that the competitor may feel that he is not permitted to meet the price of Ned's.

Trial Examiner Ballinger: The only effect of such proof would be that one was violating the State law and there is no allegation in the Complaint to the State law.

Mr. Austin: No, but Ned's wouldn't be violating the State law. That is, Ned's could sell at a price, at the price at which he is selling, without violating the State law. He would not be selling below cost, whereas the competitor, of he sold at a cost as low as Ned's, he would be selling below the cost at which he could obtain the gasoline himself.

Trial Examiner Ballinger: My recollection is that the existing evidence here indicates that most of the dealers were selling on a 4½ cent margin; is that correct?

Mr. Austin: Yes, before then, 1936 and 1937.

Trial Examiner Ballinger: Ned's cut the price two cents, but would leave the margin 2½ cents, but the statute to which you refer prohibits the sale at less than a 3-cent margin; is that correct?

894 Mr. Austin: It doesn't fix it, but in connection with the survey, I think it does fix it, I think it does do exactly that, if an established survey can be proved.

Trial Examiner Ballinger: Well, I will hear from counsel for the Respondent.

Mr. Austin: Well, it seems to me that the introduction of this statute in the record can't possibly be harmful to the Respondent, and I think it will form some additional basis for argument in the Commission's case. I don't see how it can be harmful.

Trial Examiner Ballinger: Well, if it isn't material, it ought not to be in the record.

Mr. Austin: Well, I had a feeling in connection with the survey which I expect to offer later on, where I thought it might be material.

Trial Examiner Ballinger: If it isn't material, it will only clog up the record.

Mr. Austin: Well, your Honor, this does provide for the making of a survey of costs of distribution, and it seems to me that this is a rather proper and certainly relevant background for any evidence which I may wish to offer later on, that such a survey was made.

Trial Examiner Ballinger: Do you propose to introduce the survey?

895 Mr. Austin: Yes, I propose to offer it.

Trial Examiner Ballinger: Well, I will hear from counsel for the Respondent.

Mr. Hanley: To keep the record straight, I am objecting on the ground of materiality. In the first place, if as it now appears, maybe the purpose of counsel to use this as a foundation for an exhibit to get into this record of cost survey, it will be our intention to meet that issue at the time it arises, and we certainly do not regard any cost survey such as may have been made under this statute as being material in this case on any issue at all. The costs are material here and surely they are, but only the costs of the individuals concerned; namely, the Respondent and the four dealers who were granted the tank car prices. The costs of anyone else is not material at all, your Honor. I don't know on what theory they can be offered as being material. If these dealers have been hurt, as the Government has now spent days attempting.

to establish, and if the Commission and your Honor agree with the Government that they have been hurt, it is not necessary that they be hurt to a point where they were selling below their costs. It will be only material that they were substantially hurt. If I understand this Federal law at all, that is the whole story. As a matter of fact, this is a criminal statute, and we are not being
896 tried under it. We have been tried under it, and acquited, your Honor. The law itself, in every court that has had a crack at it so far has been found unconstitutional. It hasn't been passed on by the Supreme Court of this state. That is my present impression that it has not been, but the Trial Courts have always so found and it is just no good as a law itself. Now, it doesn't lend any credence at all to any survey that some economist may have made. I certainly think, your Honor, that if a survey is material here that it would be material whether this law existed or not. That is another question. The materiality of that survey, and we will meet that when the time comes, but this is entirely apart from any issue in this case so far as I am able to perceive.

Trial Examiner Ballinger: You may let the paper be marked Commission's Exhibit 65 for identification. The Examiner will withhold a ruling on the contents until he has an opportunity to examine the document.

(The document referred to was marked, for identification, Commission's Exhibit 65.)

Mr. Austin: May I suggest, your Honor, that the ruling be withheld until we are past the whole question of the survey. If I don't offer the survey which I have referred to, then I will withdraw the offer of this, and if the survey is offered, then your Honor can see whether this has any materiality in that connection.

897 Trial Examiner Ballinger: I was going to suggest that the tender of this be withheld until you are prepared to make a tender of the survey, and then the two of them be offered at that time.

Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

898 Mr. Austin: If Your Honor please, I have in my file what appears to be a carbon copy of a letter dated February 8, 1939, addressed to Honorable C. McCrea, Prosecuting Attorney of Wayne County, and signed by Herbert F. Taggert.

Trial Examiner Ballinger: Who is Herbert F. Taggert?

Mr. Austin: He is the economist who prepared the survey that we have been referring to. I have had a search made at the Prosecuting Attorney's office here of the original of that letter, and I have been advised that they can't locate the original.

Trial Examiner Ballinger: Do they admit receipt of it, or any knowledge of it?

Mr. Austin: No one who is there now does. I can produce the Prosecuting Attorney, or Assistant Prosecuting Attorney—I forget which he was, right now—at the time this letter was written, who will, I believe, recall its receipt, but what I wanted to find out now was whether in the event I should introduce this letter at a later date, identifying it through the writer, whether counsel for Respondent will make an objection upon the ground that the original should be produced as the best evidence, and if such an objection is made, then, while I am here, I would like to call someone from the office there to prove
899 that the original can't be found, and also, perhaps, prove that it was received.

Mr. Hanley: You say Taggert wrote it?

Mr. Austin: Yes.

Mr. Hanley: What is the important question; whether it was received or whether Taggert wrote it?

Mr. Austin: I think the important thing about it is whether Taggert wrote it. In fact, I am sure it is true.

Mr. Hanley: That is easy to prove with Taggart. If it should become important as to the fact whether it was received or not, then—

Mr. Austin: I just wanted to find out whether you were willing to agree. You wouldn't insist upon the production of the original if it is properly identified by Mr. Taggert?

Mr. Hanley: No, there is no objection on that.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record. Anything further, gentlemen?

Mr. Austin: Your Honor, I move that we adjourn until 2:00 o'clock.

Trial Examiner Ballinger: Without objection, the motion is granted. Now, at 12:05 P. M., the hearing stands in recess until 2:00 P. M.

(Whereupon, at 12:05 P. M. a recess was taken, to reconvene at 2:00 P. M.)

900 Afternoon Session

2 P. M.

Trial Examiner Ballinger: We will come to order. You may proceed.

Mr. Austin: Mr. Doster.

PAUL W. DOSTER was thereupon called as a witness by and on behalf of the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. Give your full name to the reporter, please.

A. Paul W. Doster.

Q. Where do you reside, Mr. Doster?

A. 1200 North Alexander, Royal Oak.

Q. What is your business?

A. I am connected with the Benzol Stations, Incorporated.

Q. What is your position with that corporation?

A. I have no official title.

Q. What are your duties, then?

A. Well, at the present time, I am taking care of the books.

Q. You are in the head office of the corporation?

A. Yes.

Q. And what is the address of that office?

A. 14318 Woodward Avenue, Highland Park.

901 Q. What is the business in which Benzol Stations, Incorporated is engaged?

A. We sell Ford Benzol. We buy the entire output from the Ford Motor Company and then distribute it as wholesalers.

Q. Do you sell or have you sold Ford Benzol gasoline to Ned's Auto Supply Company?

A. Yes, we do.

Q. And did you so sell to them in 1938?

A. Yes, we did.

Q. Are you familiar with the fact that Ned's Auto Supply Company constructed or leased a bulk plant in Dearborn in 1938?

A. Well—do you mind repeating that?

Q. Are you familiar with the fact that Ned's Auto Supply Company leased or constructed or acquired a bulk plant in Dearborn in 1938?

A. Yes, they had a plant there. I don't know when they got it.

Q. Then you know they did have a bulk plant there at that time?

A. A bulk storage place.

Q. For gasoline?

A. Yes.

Q. Before continuing with that: how do you de-
902 liver Ford Benzol to Ned's Auto Supply Company?

A. In tank trucks.

Trial Examiner Ballinger: When did you first commence selling to Ned's Auto Supply Company?

The Witness: I haven't the date with me on that.

Trial Examiner Ballinger: Can you approximate whether it was spring, summer or fall of 1938?

The Witness: We sold them Ford Benzol before 1938.

903 Q. I just wanted to ask you, whether at that time,
as well as now, you delivered direct to their service
station in the tank wagon?

A. Right direct to their station, yes.

Q. In other words, you don't deliver to their bulk plant?

A. No, sir.

Q. In 1938, were you engaged there by Ned's Auto Supply Company to haul gasoline from their bulk plant in Dearborn to their various stores?

A. Yes, we were.

Q. When did you commence to engage in that service for Ned's?

A. On March 7, 1938.

Q. And what gasoline did you haul for Ned's; do you know what it was?

A. I don't know what it was. I did not see any bill of ladings or bills, or anything, as to what plant or gasoline it was. I don't know.

Q. Well, what arrangements did Benzol Stations, Inc., make with Ned's Auto Supply Company at that time, with regard to the hauling of gasoline?

A. They made arrangements to haul for Ned's Supply Company at so much per gallon.

904 Q. Was Merchant's Supply Company the operator of the bulk plant?

A. Those are the ones we done business with, Merchant's Supply.

Q. And where was the hauling from to?

A. We hauled from their plant at Wyoming and I forget the cross street. It is the terminal warehouse.

Q. That is in Dearborn?

A. Yes, in Dearborn. To their stations located in various spots throughout the city.

Q. Four stations, then, was it not, or was it more than that?

A. It was four, I believe.

Q. Was the hauling done in your own trucks?

A. Yes, it was.

Q. And what did you charge per gallon for that service?

A. We charged the Merchant's Supply Company .0045 per gallon.

Q. That is of a dollar?

A. That is right, of a dollar.

Q. In other words, 45/100 of a cent per gallon?

A. That is right.

Q. Was that same price charged during all the period during which you hauled gasoline for them?

A. Yes, sir.

905 Trial Examiner Ballinger: And that extended over what period of time?

The Witness: That extended from March 7th to April 24th, 1938.

By Mr. Austin:

Q. Is Benzol Stations, Incorporated, in the business of delivering gasoline; that is, partially in the business, among other things, of delivering gasoline to people who desire it hauled from the bulk plant to service stations?

A. No; as a general rule, they are not.

Q. Why did you enter into this arrangement?

A. We were delivering from the Benzol to Ned's Auto Supply Company at the time and Merchant's Supply Company asked us for a bid to haul this gasoline at the time that they evidently started this bulk plant over there. We had a couple of trucks that wasn't doing anything at the present time and we gave them a bid and eventually got the business.

Trial Examiner Ballinger: When you say "at the present time" you meant at that time, did you not?

The Witness: Yes, sir.

By Mr. Austin:

Q. Have you any record of the amount of gasoline that you hauled for Ned's Auto Supply Company at that time?

A. Yes, I have.

906 Q. Would you please state any information of that sort that you have taken from your own records, the company's records, rather?

907 A. Well, our initial delivery was made on March 7th, and in March we delivered 194,233 gallons. From April 1st to April 24th, we delivered 193,022 gallons, for a total delivery of 387,255 gallons.

Q. What was the cause of your termination of that arrangement on April 24th?

A. That, I don't know.

Q. Did you have anything to do with the arrangements with Ned's Auto Supply Company at that time?

A. Very little: not enough to know the entire workings.

Q. Do you know whether they had their own trucks then?

A. I don't believe they did.

Q. Do you know whether they started hauling the gasoline themselves, when you stopped?

A. I could not say that; I don't know.

Q. Did you have any written contract with Ned's, covering that hauling service?

A. We had a purchase order on the delivery.

Q. A purchase order on what?

A. We had a purchase order of the Merchants Supply Company to haul the gasoline.

Q. Have you got a copy of that with you?

A. No, but I have their order number. We have no copy of this.

Q. What do you mean by a purchase order?

908 A. Evidently, they gave us a purchase order to haul this gasoline.

Q. Was the purchase order—

Trial Examiner Ballinger: It was an order for the gasoline, was it not?

The Witness: Order for the gasoline to be delivered, yes.

By Mr. Austin:

Q. I suppose that stated the price?

A. Yes, it did.

Q. Do you know whether Benzol Stations, Inc., made a profit on that transaction?

A. No, I do not.

Q. Was the charge the same per gallon for all the gasoline hauled during that period, regardless of where it was delivered?

A. Yes, it was.

Q. And when your trucks went to Ned's bulk plant, how was the gasoline moved from the bulk plant into the trucks?

A. We did business with Merchants Supply Company.

Q. I have been saying Ned's. I keep forgetting that it was Merchant's Supply Company, but I ask you the same question with respect to Merchant's Supply Company.

A. All the gasoline hauled was from their warehouse. What was that question again?

909 Q. The question was, how was the gasoline moved from the tanks to the trucks? Did they do that, or you; from the bulk plants into the trucks? In other words, you sent the trucks to the bulk plant, and in some way, the gasoline had to be pumped or moved into the trucks?

A. They loaded it themselves into our trucks.

Q. And then did your trucks empty it into the tanks at the stations?

A. Into the service station tanks, yes.

Q. So that they did the loading at one end and you did the loading at the other?

A. That's right, yes.

Q. Did Benzol Stations, Inc., propose to Ned's, or to Merchants Supply Company that they would raise the price for hauling, if they continued after April 24th?

A. That I don't know.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: That's all I have on direct examination.

Cross-Examination by Mr. Hanley.

Q. Mr. Doster, I think you stated that all gasoline which your company hauled for Merchants Supply Company was hauled at the same price per gallon of .45 of a cent?

910 A. Yes.

Q. Are you sure of that? The reason I ask you that, I am informed, Mr. Doster, that when you first began to move the gasoline, that the price was fixed at something higher than .45 of a cent, and then, at some period, while you were doing the hauling, the price was reduced to .45 of a cent. Do you recall any such facts as that?

A. No, I do not.

Q. It is your impression that it was the same price all the time?

A. That's right.

Q. Did I understand you to say that your company does not generally engage in the business of hauling gasoline for hire?

A. We do not.

Q. Were you hauling for anybody else at the time you were hauling for Ned's?

A. No, we were not.

Q. Was this just an unusual situation?

A. That's right.

Q. You do not have a license, I take it; that is, a public utilities license, as a common carrier?

A. No, we do not.

Q. Have you ever hauled gasoline under similar circumstances for anybody else?

A. Not to my knowledge.

911 Mr. Hanley: That's all, Mr. Doster.

Redirect Examination by Mr. Austin.

Q. Did you state whether these records as to prices and amounts were taken from the books at the office of your company?

A. They were taken from our books.

Q. And you went through all of the transactions with Ned's Auto Supply Company during that period?

A. Yes, sir.

Mr. Austin: That's all.

Recross Examination by Mr. Hanley.

Q. Mr. Doster, in addition to the business of your company in hauling Ford Benzol gasoline, do you also act as a jobber for Sinclair gasoline?

A. Yes, we are the agents for Sinclair Refining Company.

Q. Is that what is known as a commission agent?

A. I don't know what they call it.

Q. How do you do that? Do you haul out of the Sinclair bulk plants?

Mr. Austin: Your Honor, I don't see it is in any way relative to the direct examination.

Mr. Hanley: I don't think it is. I thought, to be quite frank about it, while the witness is here, to lay these 912 few foundational questions.

Trial Examiner Ballinger: Do you want to make him your own witness?

Mr. Hanley: I am perfectly willing to do that.

Trial Examiner Ballinger: The witness is now the witness for the Respondent.

By Mr. Hanley:

Q. Are you familiar with the arrangements which your company has with the Sinclair Company, Mr. Doster?

A. No, I am not.

Mr. Hanley: I think that ends it. That's all.

Mr. Austin: That's all.

Trial Examiner Ballinger: You are excused.

(Witness excused.)

Mr. Austin: If Your Honor please, having no more witnesses here now, I move that we adjourn until ten o'clock tomorrow morning.

Trial Examiner Ballinger: Without objection, the motion is granted, and now, at 2:30 P. M., the hearing stands adjourned until ten o'clock A. M. Eastern Standard time, March 18, 1941, to be reconvened in Room 859, Federal Building, Detroit, Michigan.

(Whereupon, at 2:30 P. M., the further hearing in the above-entitled matter was adjourned.)

913 Room 859 Federal Building,
Detroit, Michigan,
March 18, 1941.

Met, pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., Attorney for the Federal Trade Commission.

H. R. Hanley, Esq., 910 S. Michigan Avenue, Chicago, Illinois, on behalf of the Respondent.

914 PROCEEDINGS.

Trial Examiner Ballinger: We will come to order.

The hearing in Docket No. 4389, Case entitled In the Matter of Standard Oil Company is reconvened at 10 o'clock A. M., Eastern Standard Time on March 18, 1941, in Room 859 Federal Building, Detroit, Michigan.

The last hearing was held in Detroit, Michigan, on March 17, 1941.

The reporter will note counsel for the Commission and Respondent present.

You may proceed, gentlemen.

PAUL HENRY HARRISON was thereupon recalled as a witness by and on behalf of the Commission, and, having been heretofore duly sworn, testified further as follows:

Further Cross-Examination.

By Mr. Hanley:

Q. Mr. Harrison, at the close of your last appearance as a witness here, you were interrogated to some extent about your costs of doing business out of your terminal or bulk plant here in Detroit; that is, the Sun Oil costs.

A. Yes, sir.

Q. I want to call your attention to an answer which

you made at that time and perhaps I had better give
915 you the question. You were asked: "Can you state
how much it cost the Sun Oil Company per gallon to deliver gasoline from the bulk plant at Hamtramck to the Sun Oil Company stations, including the cost of operating the bulk plants?" There was some little discussion in between and then you gave this answer: "I think I am safe in saying definitely that it is less than half a cent a gallon including all costs of operating the bulk plant, that is, including the ordinary evaporation and spillage losses, the labor, operation of the warehouse, personnel, cost of the truck operation, the accounting going along with the operation, and a cost element for the amount of invested capital in the plant which constitutes practically all of the overhead connected with delivering the gasoline to the dealer—will be less than half a cent a gallon."

Do you recall that question and answer?

A. Yes.

Q. Now, in connection with spillage and evaporation losses, Mr. Harrison, is it true that the more rapid the turn-over of stock and the less handling of the stock, that normally the loss will be the spillage and evaporation loss?

A. That is, you say the more rapid the turn-over?

Q. Yes, sir. The faster you get the stock out of stor-
age and the less you have to handle it, given those
916 two conditions, doesn't it relatively reduce the amount
of loss from spillage and evaporation?

A. Yes, it does. If you handle it once, you have one loss for a given time, and if you handle it twice, your losses are probably doubled, and so on. Each time you expose gasoline to the air, you have evaporation and, also, every mechanical handling, you have some spillage or seepage.

Q. Now, having in mind these items that you included in your answer, Mr. Harrison, I want to discuss with you perhaps a more exhaustive break-down of items which I think you may have included. I would like to get your statement as to any that are included or are not included in what you have in mind in this answer. Have you given consideration to these items: drivers' salaries?

A. Yes, sir.

Q. Do you have any break-down in terms of cents per gallon as to the different items that you have included available to you now, Mr. Harrison?

A. Personnel.

Q. —personnel, but do I understand, now, that your company makes an allocation for advertising costs to this district?

A. Yes, sir.

Q. What personnel in your field office handles what I think you commonly designate as point of sale advertising; like signs and pump globes and maps and folders and little things like that, that you hand out.

A. If they are painted sign boards, we employ a painting contractor to do that. If it is a paper poster board, the usual advertising poster, advertising companies, we contract for that. The miscellaneous small advertising materials, folder, maps, and that sort of thing, is distributed by our salesmen to their dealers.

Q. And do you regard the cost of the materials, like the making of the maps; does that come in as an administrative matter in the field office, or is that one of
945 these things that the general office does, and then allocates to you?

A. That is done in the general advertising office at Philadelphia and cost of providing that material and service is charged to us on the gallonage basis.

Q. The costs of taking care of the signs of the station and so on, whether you use your own people or whether you employ regular bill posters, that is a charge against the doing of the business in the district?

A. Yes, sir.

Q. Now, have you any break-down in figures per gallon, Mr. Harrison, as between the direct costs of operating your field office and the costs of your general office, which may be properly allocated to your field office, or do you lump that all together?

A. I am trying to get that distinction clear in my mind. I gave you the items of cost we included in our warehousing and delivery.

Q. Yes, sir. Perhaps I had better ask you to go right ahead, now, and tell me what costs of doing business applicable to gasoline in your field office.

A. Yes.

Q. You have in addition to the .0036 that you have explained.

A. Yes, I have a schedule in that. It includes dispensing

A. Yes, sir.

Q. How much per gallon is allocated to drivers' salaries?

A. The break-down doesn't carry it into that detail. Our accounting report made to me gives it as trucking cost in fractions of a cent per gallon, and that includes
917 wages, depreciation of equipment, gas and oil, and tires and supplies used in the operation of the truck, insurance, license fees; every item of overhead connected with the operation of the truck.

Q. Perhaps it would speed the matter if I just ask you which items by name are included, and then you can exclude or include, as the fact may be. It is highly improbable that the items I have listed will be coincidental with your methods of keeping books, of course. You say you have included drivers' salaries?

A. Yes.

Q. Now, have you included salaries of warehouse labor at the plant? That is, accounting personnel and warehousemen and anyone else whom you may employ?

A. Under warehouse heading, it is in the cost figure.

Q. Do you include what might be termed the miscellaneous drivers' expense, that is, cash expense to which drivers may be put; telephone calls, luncheons, or anything of that kind, that they may incur?

A. Yes, sir.

Q. How about plant maintenance?

A. That is included in warehousing cost.

Q. Water, light; fuel; that's in?

A. That's in.

Q. Telephone, telegraphs?

918 A. Yes, sir.

Q. Any miscellaneous operating expense? I have in mind there a catch-all account like if you break up a driveway, a truck wheel went through it, or something of that sort; you would include that?

A. I haven't any experience in that, and I don't know whether an item of that nature would be included in the warehousing expense or in another phase of the business having to do with relations with the public.

Q. That isn't so important, as to what account you classify it in, if you can tell me whether or not it would be included in the half cent cost that you finally arrive at.

A. I can't. I don't know enough about their accounting system to pick out that one item.

Q. That item wouldn't be a large one, in any event, would it?

A. No. As I say, I have had no experience with it.

Q. Do you include general supplies, as forms, delivery tickets and that sort of thing?

A. Yes, sir.

Q. Do you include operating tools and equipment in use at the plant?

A. Yes, sir.

Q. Now, have you an inclusion for a cost of auditing the accounts at the plant? I assume you do do 919 that, in some manner.

A. Do you mean an audit of the individual customer account?

Q. No, I mean an audit of the terminal accounts themselves.

A. That would not be in my warehousing cost.

Q. That would not be included in this one-half cent item?

A. No, sir.

Q. Do you have an inclusion of any item for losses by accident to other than company property?

A. We carry public liability, public damage insurance, both on our automobile or on our automotive equipment of the plant, and also with regard to the service stations where we have any public liability. The insurance on the truck equipment would be included in this cost item.

Q. If there were any loss that was not referable by way of insurance, such as you have described, would you include that in the half cent item?

A. I don't think we would. I know of no case of that having happened, but I doubt if we would. We would probably place that under the head of legal expense.

Q. Do you have any item included covering direct miscellaneous losses to company property; from any cause?

A. You mean, for instance, the loss of a truck or damage to a building?

920 Q. Yes; knocking a corner off a door, or something of that sort.

A. That would be in this warehousing figure. This cost of warehousing and delivery; it would be included.

Q. You covered stock loss and evaporation, did you not?

A. Yes.

Q. That's included?

A. Yes.

Q. Do you include in the half cent any item for depreciation on the plant, machinery, equipment, and furniture and fixtures?

A. Yes, sir.

Q. On all of those items?

A. Yes, sir.

Q. And do you include a cost item for operation and maintenance of the trucks?

A. Yes, sir.

Q. And how about depreciation on trucks?

A. Included.

Q. Do you have, in the half cent, an item for real estate and personal property taxes and vehicle licenses and any licenses to operate the plant or any of the equipment?

A. All of those items are included, with the possible
921 exception of the license to operate the plant. That might come under general expense covering everything of our business in Detroit, to do business in Detroit, and might not be particularized as a warehousing item.

Q. But the real estate and personal property taxes and car licenses, which would be the big item there, are included, are they?

A. Allocated to that plant.

Q. Now, in your computation of the one-half cent, have you included old age and unemployment insurance applicable to drivers and all of the labor personnel at the plant?

A. Yes, that is included in the payroll costs and is included in the expense of the employees at that plant.

Q. That is, so it gets into the one-half cent?

A. It gets into the one-half cent.

Q. Do you carry insurance on the plant?

A. Yes, sir.

Q. Have you included your cost of insurance in the one-half cent?

A. Yes, sir.

Q. Now, Mr. Harrison, on your last examination, you made reference to an item of investment cost and interest which you had included in the one-half cent. Will you please explain just what you mean by that?

A. Yes. In the land and equipment of the plant,

equipment complete, we have a certain capital investment.
922 Our cost accounting—we are charged with an interest charge on that invested capital. We are also charged with an interest on the value of the inventory at that plant, and that is what I meant.

Q. Now, let me see if I understand you, Mr. Harrison. Your company keeps investment records on all of their property, no doubt?

A. Yes, sir.

Q. And a certain investment is represented by your Detroit terminal?

A. Yes, sir.

Q. In land and buildings and equipment.

A. Yes, sir.

Q. Now, in your cost accounting, if I understand correctly, based on the amount of that investment in the terminal, your office here is charged up with an interest rate which I think you said was 6 cents?

A. I think it is 6 cents.

Q. Now, whatever that amounts to in money, is that allocated to the cost of operating that plant?

A. Yes, sir.

Q. And you have given that item consideration in your one-half cent computation?

A. Yes, sir.

923 Q. Now, how much per gallon would that item amount to?

A. That interest item—I can't give you that offhand. I didn't bring any statistics along with me on that point. It is included in what we call the general district expense under warehousing, district operating cost, but to pick out the interest alone, I can't do that, because in the general expense, also, are the taxes, for instance, that are paid; real estate taxes.

Q. Are you able to give us just from your own knowledge of the situation any figure which we will understand will be an estimated figure, Mr. Harrison? I would like to get some idea of how much of this half cent is represented by that item.

A. Well, it would be the wildest kind of a guess, because I haven't got the figure in my mind of the total amount of invested capital on which the interest would be reckoned. I can't separate that particular item. That is, just from out of my head.

Q. Can you give us an answer to this: in your judgment, and compared with all of the rest of the costs that you have named, would that item be relatively trivial; per gallon?

A. Yes, it would be small. I might say that the group insurance, that item would be included; general district expense costs us .03 of a cent per gallon; .03 of a
924 cent per gallon.

Q. So it is really quite trivial?

A. It is a small item.

Q. Now, when you gave us the answer of the one-half cent cost, had you allocated your costs between products handled at the plant?

A. These figures are on gasoline only.

Q. That is what I am getting at. There are no inclusions in your cost of gasoline of one-half cent which apply at all to any other products that you may handle at your plant?

A. No.

Q. You do handle a number of other petroleum products, do you not, Mr. Harrison?

A. Yes, sir.

Q. Well, did you also separate your costs relative to this half cent on delivery of gasoline as between channels? That is, as between deliveries to consumers, as distinguished from deliveries to retail outlets?

A. No, we have practically none of the so-called commercial delivery.

Q. Your business is almost entirely to reseller outlets?

A. Yes, sir.

Q. Would the attempted allocation as between those channels in your business have any material effect on
925 the cost of one-half one way or the other, in your judgment?

A. It would be to the fifth or sixth decimal place, if it affected it at all.

Q. Now, out of the number of items that I have asked you about, you have indicated that you excluded two items in your one-half cent calculation; namely, an item for the auditing cost of the plant itself. That would also include that kind of an item, traveling expense and auditors or accountants, and the expense incident to their vehicles, would it not, Mr. Harrison?

A. None of the expense connected with the audit or getting the personnel to the plant and getting them away from it and whatever living expenses incident to the audit of the plant, would not be included in my warehousing cost.

Q. But you do have that kind of a cost in your operation?

A. In our over-all operation.

Q. Even though it is not included in the one-half cent?

A. Yes.

Q. And you have excluded the losses, if you have any, to other than company product resulting from accident?

A. In part. I include public damage and public liability in connection with the truck operations and
926 they are in there in our trucking expense. The cost of that insurance, for instance, is in the trucking expense. If we have a truck accident, that is included in the expense.

Q. Now, I wish you would tell us and give us per gallon figures, as best you have them, as to the classifications you have and the items that you have included in the one-half cent, Mr. Harrison.

A. I am very much embarrassed, sir. I will have to amend my figure when I give you this detail.

Q. I think you will. I think it is going to be less.

A. Under the bracket of district operating costs, item, warehouse, average for the year 1940, 4/100 of a cent, handling loss, including evaporation, if any, 4/100 of a cent; trucking costs, including all items of expense connected with the operation of a truck on the streets, 2/10 of a cent; office costs, accounting with respect to this warehouse, 3/100 of a cent; office costs, credit and collections, 1/100 of a cent; office costs, sales and operations, 1/100 of a cent; general district expense, 3/100 of a cent; total under district warehouse operating, 36/100 of a cent average for the year 1940 at Detroit, Michigan. That is all of that bracket.

Q. Now, do I understand that this is all of your inclusions in the items that you formerly said you thought would cost about a half cent?

927 A. Yes, sir.

Q. You now, based on your 1940 figures, find it to be 36/100 of a cent?

A. Yes, sir.

Mr. Austin: I think Mr. Harrison's testimony was before that it would be less than one-half of a cent. He could not remember the figure.

Mr. Hanley: He did say that, and don't understand I am questioning that at all. I used a half cent because it is easier to say.

The Witness: I used it because I always allow myself a little factor of safety.

Mr. Hanley: That's a good idea.

By Mr. Hanley:

Q. Now, your general office, Mr. Harrison, is in Philadelphia, is it not?

A. Yes, sir.

Q. And you have a district office here in Detroit?

A. Yes, sir.

Q. Which immediately supervises the operation of your company in the territory in and about Detroit, which you described?

A. Yes.

Q. Does the office here in Detroit administer the affairs
of your company over a considerable area other than
928 the immediate Detroit vicinity?

A. My office here in the National Bank Building is the general administrative office. There is another office for the district management, the district operations, which is on Brooklyn Avenue.

Q. Would that be Mr. Cunningham?

A. Yes, that is Mr. Cunningham.

Q. In your office proper, without reference to district personnel, have you a substantial personnel?

A. No, I would say not. It is a relatively small personnel.

Q. As compared, for instance, with a district office?

A. Yes, sir.

Q. Now, I want to ask you, Mr. Harrison, about certain items of the cost of selling gasoline to retail resellers, which apparently you have not included in this computation that you have made. Do you have a cost item of field supervision which would include the salaries of your manager, assistant managers, office managers, in this district?

A. In our selling expense, we would not include the office manager and the accounting, because that is not a selling expense. That is an accounting expense.

Q. You do have the item of expense irrespective of whether you call it accounting or selling; is that right?

A. Yes; and if you are going to ask for these
929 figures, I have got to tell you what is in these figures.

Q. I understand. I am going to ask you in the same way I did before, Mr. Harrison. I want to know what inclusions you make in the items I have in mind, and then I will ask you to give us the results as you keep your books.

Mr. Austin: What is this directed to?

Mr. Hanley: The cost of selling gasoline.

Mr. Austin: Your Honor, this is outside the scope of the direct examination, and if there is to be any questioning on selling, I request that Mr. Harrison, for that purpose, be the witness of the Respondent, and that I be given the right to cross examine.

Mr. Hanley: Well, if your Honor please, I have a statement on that that I would like to be heard on. In the first place, I don't know what it means in Commission practice whether a witness is the Government witness or my witness. They are just witnesses, as far as I know.

Trial Examiner Ballinger: The contention of counsel is that this matter was not dealt with on direct examination.

Mr. Hanley: Well, in response to that contention, if your Honor please, this witness testified to certain costs of delivering or selling gasoline in Detroit. It will appear on the Respondent's case, certainly, both with respect to the Respondent and with respect to the several
930 jobbers involved in the action.

Trial Examiner Ballinger: If you will separate your selling and delivery, I understood counsel has run to the cost of delivery and not to the cost of selling. Now, if you will separate them.

Mr. Hanley: We will not only separate them in so far as a separation is possible, but, your Honor will observe that I have been very careful with this witness to give him a full opportunity to separate them. I haven't any desire to confuse the two on anybody's system of bookkeeping, but the point is this: that it has already become apparent that different companies and operators keep their costs in a different way. For instance, Mr. Harrison has just said that his manager's cost in this district, in the office, he classifies as an accounting cost and not a sales cost. So, it is necessary, if this testimony is to be used for comparative purposes, and Mr. Austin has assured us that it is, that we have a careful analysis from this witness as to all he included in what he calls a delivery cost and what he excluded therefrom and what he include in and excludes from the additional cost of selling gasoline to a retail reseller. Otherwise all of this testimony becomes utterly valueless for comparative purposes. Of course, your Honor understands that it is the Respondent's position that costs of the Sun Oil Company or 931 any other company not involved in this action are not material and are not valid for purposes of comparison, but Mr. Austin has introduced that testimony over our objection, it has been received by the Court, and the statement of counsel is to be used for comparison, for comparative purposes. Now, the distinct function of cross-examination is to delineate the various items of cost that are in the mind of the witness and are used by his company and arrived at by his company and where they fit in this over-all cost of selling gasoline, which is the thing that they have got to be ultimately compared with, if they are going to be compared at all.

Trial Examiner Ballinger: I don't understand that during the direct examination there was any testimony adduced running to the cost of sale, and the testimony related solely to the cost of delivery. Therefore, the Examiner rules that your cross-examination will be limited to the cost of delivery.

Mr. Hanley: Well, does that mean, your Honor, that to continue with this examination, the Respondent is forced to make this its own witness?

Trial Examiner Ballinger: That has been the practice before the Commission, as I understand it.

Mr. Hanley: I don't understand what the significance of that is in the Commission practice. If this witness 932 is my witness, what difference does that make? I am just asking for information, your Honor, because I am ignorant of the significance of it in the Commission practice.

Trial Examiner Ballinger: Frankly, I do not attach so much importance to it, but it is a rule of practice.

Mr. Hanley: For ten years I have tried to rule on it myself, and never knew what it meant.

Trial Examiner Ballinger: And in conducting the hearings before the Commission, we try to conform, as nearly as possible, to the rules of Court.

Mr. Hanley: And that being the case, I am going to make this witness my witness, but I want to make a statement on the record to protect my own position in it, very briefly.

Trial Examiner Ballinger: With this witness it appears to the Examiner that it is wholly immaterial whether it is direct examination or cross examination. The witness is frank, has furnished all the information that he can, and it doesn't seem to me that it puts the Respondent to a disadvantage to make him his own witness or gives him any advantage by cross examination.

Mr. Hanley: Well, I quite agree, and I am going to make him my witness.

Mr. Austin: Yes, I feel inasmuch as the burden of 933 proof is on the Respondent, and I also want to ask the same courtesy which I accorded to Judge Hanley, and I may, at some later date, if we are back here, want to call Mr. Harrison for cross examination on my case.

Mr. Hanley: There will be no objection on that, and you don't have to make him your own witness, if you don't want to.

Trial Examiner Ballinger: The witness is now a witness for the Respondent.

Mr. Hanley: In making the witness a witness for the Respondent, counsel for Respondent states that such action became essential to the progress of the examination in view of the rulings of the Court if Respondent were to be permitted to continue the examination, and counsel for Respondent, at this time, requests a ruling of the Court to the effect that the Respondent, having made the witness his own witness, may be regarded as having done so on the Government's case and without prejudice to any motions that Respondent may make in respect to the Government's case exactly as though no evidence had been introduced on the part of Respondent. That is all for the record. Have I made it clear?

Trial Examiner Ballinger: Yes, and the evidence is being received without prejudice to the Respondent's case to the same extent as though this had been reserved 934 until the Commission closed its case.

Mr. Hanley: Very well. Thank you.

PAUL HENRY HARRISON was thereupon called as a witness by and on behalf of the Respondent, and, having been heretofore duly sworn, testified as follows:

Direct Examination.

Mr. Hanley: Will you read the last question back, please, Mr. Reporter?

(The last question was read as follows: "I am going to ask you in the same way I did, Mr. Harrison. I want to know what inclusions you make in the items I have in mind and I will ask you to give us the results as you keep your books.")

By Mr. Hanley:

Q. As you keep your books, just as I did in connection with these other costs. Now, with that understanding, the question is: you do have a field office expense for manager and assistant managers and office managers, don't you?

A. Yes. I will have to explain the way our accounting is set up.

Our office manager is purely an accounting man. He is not in any way a sales or operating man. Consequently that part of the office expense incident to the handling 935 of gasoline is in the accounting cost enumerated under the first bracket which came out to .36 of a cent overall. The manager for sales, the sales manager, assistant sales manager, the sales personnel salesmen, all expense connected with those individuals, the manager, assistant manager, and salesmen expense, including car allowances and incidental expense for telephone calls, street car fare, or what have you, are included in our selling expense; if that is the figure that your want.

Q. Well, I will reach it eventually, but I want to go through the items with you, Mr. Harrison.

Now, your managers and assistant managers have a clerical force working for them in your field offices, haven't they?

A. Not as such.

Q. Well, all right. They just work in the office, then?

A. That is right.

Q. And under your system some of them may be allocated to general accounting in the office and some may be to sales; however it works out in your own bookkeeping?

A. Yes, sir.

Q. Now, they have traveling expense, the executives, the managers, and supervisory executives have traveling expense?

A. Yes, sir.

936 Q. And how do you allocate that; just as a part of the general office expense?

A. No, that is included in the selling expense item.

Q. And they operate automobiles?

A. Yes, sir.

Q. At company expense, or company owned cars?

A. They are owned by the individual and allowance made for the use of the cars.

Q. Now, do you have, aside from this executive or supervisory force that we have been talking about, Mr. Harrison, a group in your field office that might be regarded as sales promotion personnel which has supervisory and directional duties over the salesmen?

A. No, sir; we have no such function in our set-up.

Q. Is everyone connected with sales and sales promotion, aside from your managers and assistant managers, designated just as salesmen in your organization?

A. Yes, sir.

Q. You have their salaries as an item of selling cost?

A. Yes, sir.

Q. And you have travel expense?

A. Yes, sir.

Q. And their car expense; operation?

A. Yes, sir.

Q. Do they use their own cars, as you described 937 about the other personnel just a moment ago?

A. Well, these are the same people I referred to; the salesmen; own their own cars. The company makes an allowance for its use.

Q. To clear the whole thing up in one question: in any of your personnel that I have already asked you about or will ask you about, do you furnish company owned cars to that personnel, or is it a rule of your company to have them operate their own car upon an allowance made by the company?

A. The only car furnished by the company is that to the district sales manager, who is the senior executive of the Detroit area; is the only one furnished a car by the company.

Q. And that car, its expense, operation, and depreciation, would constitute a cost of selling gasoline, somewhere in your figures?

A. Yes, sir.

Q. You pay Old Age and Unemployment Taxes on the salary of your sales personnel, I assume?

A. Yes, sir.

Q. And that also constitutes a cost of selling gasoline?

A. Yes, sir.

Q. Now, let it be understood, Mr. Harrison, that the costs I am talking about are the costs of selling
938 gasoline in all of these questions. I wish we may both make the same distinction that you have testified to that you made on the bulk plant; namely, we are disregarding any allocations of costs to other products than gasoline.

A. Yes, sir. These figures are exclusively relative to gasoline.

Q. Yes, sir. Do you have a field advertising personnel in your district office?

A. No, sir.

Q. Do you have anybody in your district office that does anything about advertising?

A. No, sir.

Q. So you have no district office expense in that regard?

A. For advertising.

Q. Yes, sir.

A. No, not under selling expense.

Q. Do you have a personnel or an operation in your district office connected with advertising under any designation or account?

A. No, sir.

Q. Your company has some method of lending or renting or furnishing dispensing equipment to service station dealers, have you not?

A. Yes, sir.

939 Q. You loan or furnish pumps or tanks for gasoline operation?

A. Yes, sir.

Q. You install that equipment?

A. Yes, sir.

Q. And have an installation cost, such as labor and piping and electrical connections, and so on?

A. Yes, sir.

Q. You also furnish compressed air stands and compressors?

A. Not to all of the stations; only where we have an interest in the real estate.

Q. But is it one item that you take into consideration in the over-all?

A. Yes; it is in the cost.

Q. Do you also supply your retail dealer stations with small tools and accessory equipment, like battery testers and radiator testers and things of that kind?

A. No, we do not.

Q. Your district office undertakes the maintenance of this loaned-out equipment, does it not, Mr. Harrison?

A. Yes.

Q. And you maintain a force of men and equipment to care for the maintenance of that loaned-out equipment, don't you?

A. Yes, sir.

940 Q. And that would be a cost of selling gasoline to retail dealers which would find its way somewhere into your accounts?

A. It would find its way into our accounts, but not under the heading of selling costs.

Q. Perhaps not. Understand me, again, because our discussions here have been denominated selling cost of gasoline, Mr. Harrison. I don't mean to be bound by your actual name of selling costs. I don't care what account you put it in if it is a cost along one of these items I am referring to, finds its way into your account somewhere.

A. Yes.

Q. You maintain an accounting personnel in your district office, do you not?

A. Yes, sir.

Q. And you have salaries for the various types of account?

A. Yes, sir.

Q. You have an item of office supplies, stationery, postage, whatever is needed to operate the office?

A. Yes, sir.

Q. Telephone, telegraph; you pay a bank exchange for handling your collections. I think you have already described your method of handling automobiles and vehicles. That applies to the accounting personnel equally with the sales personnel?

941 A. Yes, sir.

Q. Do you maintain a credit department or personnel in your field office?

A. Yes, sir.

Q. A credit man or manager, and assistants?

A. Yes, sir.

Q. Do you purchase credit information from various suppliers of that kind of information?

A. Yes.

Q. Do you have any outside collection expense?

A. Other than the use of these credit service companies, like Dun & Bradstreet, for instance.

Q. What I had in mind about the credit service company would be more investigation expense, Mr. Harrison, like a Dun & Bradstreet report rather than a lawsuit to try to collect a bill that had already been incurred.

A. Yes, we have both of those items. We employ the services of the credit information agency and we also have a collection attorney. We sometimes have the fees for those which are included in our credit and collections cost.

Q. You have some expense, of course, incident to these outside collections; collections that you have to make outside your own office?

A. Yes.

942 Q. Do you have any legal department or what you call a legal department, in your field office?

A. No, sir.

Q. If you had occasion to use lawyers in matters of that kind, it would be someone you would employ locally?

A. Called in for the individual case.

Q. Yes, sir. You have some expense or loss in the matter of charge-off of bad accounts, do you not?

A. Yes, sir.

Q. In respect, also, of these accounting and credit people you also have the item of Old Age and Unemployment expense, or tax, do you not?

A. Yes, sir.

Q. Do you have any real-estate department or personnel in your field office?

A. No, sir.

Q. No one who handles that particularly?

A. No, sir.

Q. A moment ago you were talking about this dispensing equipment and you said that you maintained a force of men as construction and maintenance men and they have equipment to do that in, trucks, or something of the kind?

A. Yes, sir.

Q. That is company operated?

A. Yes, sir.

943 Q. And you have an item of the cost of operation and depreciation on those vehicles?

A. Yes, sir.

Q. Do you have any personnel supervisor in your office?

A. No, sir.

Q. The district office?

A. No, sir.

Q. Of a safety supervisor?

A. No, sir.

Q. Where do you charge up the donations you make in the district? I assume you make them.

A. Unavoidable. I am not certain, but I doubt if that item of donations is in any way included in this figure in the cost of selling and delivering the gasoline and serving the dealer. I doubt if that—it would be another very small item, if it were in there.

Q. You think it would be just a general overhead, then; general overhead thing?

A. Yes, sir.

Q. Now, Mr. Harrison, I wish you would tell me if I have left out of the items that I have called to your attention any items of cost that you have, incident to the operation of your field division office?

A. I think you have covered everything that I can think of.

There is one item which possibly might be included 944 in selling expense, and that is the item of advertising. Our offices are charged for the advertising done in the marketing area of each office. Detroit is charged for the advertising done in the Detroit marketing area. There is an item of cost for that. I think that is the only one you missed.

Q. I asked you about the field advertising set-up, and you said you didn't have any—

equipment; the replacement of installation, of main-
946 tenance, of depreciation of dispensing equipment; a
selling expense and an advertising expense, which makes up our total costs for the selling to the dealer and the delivery of the product to him, including the advertising help that he gets through our general advertising, and his particular advertising at his station, in any form that he gets.

We had, in 1940, we had no replacement costs. Costs of installation, .01 of a cent; cost of maintenance of equipment, .05 of a cent; depreciation of equipment, .02 of a cent; selling expense, .06 of a cent; advertising, .21. I think that adds up to .35.

Q. Where in those items are your salesman's costs?

A. In the .06 selling cost.

Q. Does that include all of the salaries and expense incident to keeping your salesmen on the job?

A. Yes, sir; that is the manager, assistant manager, and the salesmen. There are incidental costs of travel expense, automobile allowance, salaries, and bonuses, if any.

Q. Now, in this advertising cost, see if certain of these figures that I have here agree with your recollection or knowledge, and tell me if they are included in the allocation of cost to Detroit. For instance, last year, newspaper
space, $37,090. Does that figure mean anything to
947 you?

A. No. Advertising space in Detroit newspapers—that's right?

Q. That's right.

A. It would be included in this cost.

Q. Radio, for time only, about $38,000, in round numbers; would that be included?

A. Yes.

Q. And outdoor advertising, something like $11,000 or $12,000?

A. Yes, sir; $11,000 or $12,000?

Q. Yes.

A. Yes, sir.

Q. That would be included?

A. Yes.

Q. Then, there is always a cost of mechanical and art work that runs around 15% for this kind of advertising, isn't there, Mr. Harrison?

A. I know practically nothing about advertising.

Q. You are fortunate.

A. I know practically nothing about the costs, except the costs they charge me.

Q. Is the cost of the talent that's used, advertising agencies and copy-writers, as well as radio singers and comedians and that sort of thing that you may use in 948 radio programs, charged up to you?

A. As far as I know, we haven't used any comedians as advertising. We may have some comedians, otherwise other than advertising.

Q. Whatever they are, whether they are funny or not, are they charged up to you, Mr. Harrison?

A. If they were used, they would be charged up pro rata on this figure, based on 1940 figures, at .21 of a cent a gallon, for every gallon I put through that plant.

Q. Now, in your general office—and I am talking now, Mr. Harrison, about your general office in Philadelphia, the over-all control of your organization, as well as at your office here in Detroit, your own office, as distinguished from the field manager's office, if any of my questions are applicable to your office here in Detroit—there is a cost allocable to the gasoline business in Detroit arising in the general office, a sales supervision standpoint, is there not?

A. Yes, there is a cost. What I would call an administrative cost.

Q. Yes, sir. And the same is true of accounting in the general office?

A. Yes.

Q. And also advertising; indeed, that's all done there?

A. Yes, sir.

949 Q. And in addition to these items of cost of space and talent and so on, there is the maintenance in the general office of the advertising personnel, supervisory personnel, is there not?

A. We can particularize on the advertising, because that would include the cost of management of the advertising department in Philadelphia, the personnel of the manager's office and the costs of preparing the advertising all would be included but, aside from advertising, the administrative cost would not appear; would not be a charge against me.

Q. Do I understand that in your operations you are able to and do lift advertising clear out of your other operations?

A. Yes, sir.

Q. And you keep your books on that basis?

A. Yes, sir, and it is budgeted every year.

Q. And that includes everybody that has anything to do with advertising?

A. Yes, sir.

Q. For instance, how do you get over this hill, Mr. Harrison: the directors' time, your president's time, Mr. Pugh's concern with advertising, and that general supervisory function? Do they pay no attention to the advertising operations?

A. They pay a great deal of attention to it; that is,
950 they pass on it after the advertising people have prepared what they call their copy on their slogans, or what have you. It is all finally passed on by the general sales executive, Mr. Eckert; he has the final approval of it.

Q. What consideration have you given in your cost analysis here to that item? Is that included in the cost of advertising as it is broken down for you?

A. No, it is not included beyond the advertising department itself. That is included in my pro rata share.

Q. But the general overhead supervision, administration, as you call it—

A. The Board of Directors and the administrators, the expense isn't in there.

Q. Now, you have a law department; the Sun Oil Company?

A. I don't know whether it is part of the company or not, but we have lawyers around.

Q. You have a lot of legal expense; you know that?

A. Yes.

Q. And that expense is reflected back out here in Detroit?

A. Yes.

Q. Whether your office keeps the records here or whether you don't?

A. I get a direct charge for any legal expense incident to any happening within this Detroit district—

Q. That is to say, that if it were a direct expense,
951 Mr. Harrison—

A. That's right.

Q. —but your general law expense, which has to do with general problems?

A. Yes.

Q. That wouldn't be charged to your district, here in Detroit?

A. No, sir.

Q. But it would be a cost of your doing business here in Detroit, none the less, wouldn't it; as well as elsewhere in the country?

A. Of course, it is a general company cost. It is a cost to the corporation. It is not definitely allocated down to this particular unit, or broken down to a cost of so much per gallon on this district. That is not done on the legal expense.

Q. Your company makes no effort to do that at all; is that right?

A. That's right.

Q. What is true with respect to your general office construction and maintenance personnel? You do have such a personnel or department in your general office, don't you?

A. Yes, we have a construction engineering department attached to my office that works for all districts. That is not allocated to the district.

952 Q. That means that you don't have that operation in Philadelphia, that is under your jurisdiction here?

A. I have an engineering office here and then they have a central engineering office in Philadelphia.

Q. Then those two work together in administering the construction, engineering and maintenance of all equipment problems of your company?

A. Not equipment, Judge, in the sense of equipment that is out with these dealers. The engineers have supervision over the planning and construction of plants, actual building of the plants, and building of service stations, but they have nothing to do with the maintenance of that equipment, either at the plant or at the dealers.

Q. What is done in respect of that cost, so far as your doing business in Detroit is concerned?

A. That is not allocated on these figures I have given you here.

Q. Not any place?

A. The district is charged on the profit and loss statements, but it does not appear on this break-down of gasoline handling costs.

Q. We have already mentioned, in connection with advertising, the general overhead administrative cost of your

general office, and this applies also to your office
953 here in Detroit, and by "yours" I mean yours individually as distinguished from the field office.

A. Yes.

Q. Is any effort made by your company to allocate such general overhead administrative costs; that is, supplies for your general office, salaries of your over-all executives, like the president and the management executives?

A. I don't know, of my own knowledge, that any such allocation is made. I have never seen it allocated at my office. That is a cost figure incident to the operation of the general office in Philadelphia.

Q. But that cost is there, isn't it?

A. That cost is in the over-all cost of running the corporation business, yes.

Q. Do you maintain in your office a sales research and development organization?

A. We have in Philadelphia a so-called sales promotion department.

Q. And what is the nature of the duties of that department?

A. They make market studies and prepare data and statistics and demonstration equipment for educational purposes of the education of our salesmen and the education of our dealer connections. They prepare the material for that type of schooling or education.

Q. Is that reflected in these figures you have given to us?

954 A. I can't say that it is or that it is not. I don't know. It is handled by the advertising department.

Q. You mean by that that they supervise the direction of that work?

A. Yes. The same individual is the head of the advertising department and the sales promotional group.

Q. Now, in your company do you have any plan for annuities and employee insurance or special allowances, death benefits, or things of that nature?

A. We have a group insurance. We have no retirement or annuity policy. We have a so-called Employees' Stock Purchase Plan through which the employees purchase stock in the company.

Q. Now, first, with respect to the group insurance: does the company bear any portion of the cost of that insurance to the employee?

A. The company furnishes the employee with $1,000 of insurance on which the company pays the premiums. Insurance over $1,000 is paid for by the employee at the group rate.

Q. In respect of the Employees' Purchase Plan for stock, does the company contribute anything toward the purchase price of the employees' stock?

A. Yes. It contributes for every dollar the employee puts into the plan, the company puts in 50 cents, and the stock bought by this pool, at the end of a 5-year

955 period, becomes the property of the employee.

Q. Well, do you have, in addition to those two plans, any other sort of annuities or special allowances to employees or death benefit plans?

A. No, not as such. Each case has been handled individually, and some superannuated employees or disabled employees are paid something, but it is not on a fixed schedule or fixed plan. It is individual.

Q. Are those plans optional in their operation so far as any employee is concerned? That is may he participate or not as he chooses?

Mr. Austin: Your Honor, perhaps I am rather slow in making this objection, but this is Respondent's case, and my contention is that no expense of the home office, either the Sun Oil Company or the Standard Oil Company, can possibly have any relevancy here in determining the differences in cost of sale and delivery between the different classes of customers we have to deal with here in Detroit, and I, therefore, object to this line of testimony as to what the Sun Oil Company does in Philadelphia, as having no possible bearing on the issue.

Mr. Hanley: I don't, either, but I am in the same situation I was before.

Trial Examiner Ballinger: The Examiner will re-

956 serve to counsel for the Commission his objection, which may be renewed at the conclusion of the witness' testimony, accompanied by a motion to strike. I am doing this in order that the testimony may be in the record, irrespective of whether the Examiner strikes it or not for consideration by the Commission and in order that the Commission may pass upon the correctness of any ruling made by the Examiner.

Mr. Austin: Yes, I would like to make, if I may, this one observation. If the testimony is not relevant and material, there is some extent to which Mr. Harrison should be questioned as to the internal workings of the company when the questions are coming from a competitor. And, of course, if the testimony is necessary and relevant and proper in this case, that is one thing, but if it isn't, that is another thing.

Trial Examiner Ballinger: The Examiner thinks that it is proper that the matter should be in such shape that it may be reviewed by the Commission. If the Examiner should sustain a motion to strike, the testimony would then be in the record, and the action of the Examiner would be subject to review by the Commission. If the Examiner should sustain a motion to strike, the testimony would then be in the record, and the action of the Examiner would be subject to review by the Commission. If the Examiner should sustain the objection now and the Commission should later overrule the Examiner, it would be necessary to come out here and take it over again.

Mr. Hanley: I don't think I need an answer to that
957 last question that I asked of Mr. Harrison.

By Mr. Hanley:

Q. I asked you as to whether this was an involuntary participation plan. I am not really concerned about that. I will withdraw that question.

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

By Mr. Hanley:

Q. I do want to ask you this question, Mr. Harrison: If the expense that your company is put to in respect to these contributions of insurance and purchases of stock for employees is allocated to your cost of doing business here in Detroit.

A. Not within the limits of those figures I have already given to you.

Q. That is what I mean.

A. They are not in those figures.

Q. But if you had one of your employees at the terminal in Detroit who was a participant in either one or both of these plans, and your company was contributing, as you have described, that cost to your company, while a cost in connection with that employee, is not reflected anywhere in these figures that you have given?

A. No, sir.

958 Q. Now, do you have a general office expense of taxes and insurance, Mr. Harrison?

A. Taxes and insurance are handled in the general office. We have ~~no~~ function of that nature out here, either in my office or in the district office.

Q. Taxes that run to—for instance, the terminal out here, the taxes that are paid on the terminal, are they paid out of your general office?

A. No, this is included in my expense.

Q. I know the taxes themselves are, but I am talking about the administration of your tax department, wherever it is. Do you have an accounting force in the field office or the general office to handle that?

A. The taxing matters are handled by the general office in Philadelphia.

Q. So the only items that you have here included are the taxes themselves?

A. That is right.

Q. Without any cost for administration of your tax personnel or department?

A. No.

Q. Do you have a real estate department in your general office or in your office here in Detroit, your own office?

A. No.

Q. Don't you have a real estate department any-
959 where in your organization?

A. A real estate department in the Philadelphia office.

Q. That is what I mean.

A. The general office, yes.

Q. They handle any real estate matters that may arise here in the Detroit area?

A. Practically, no. The papers are passed from this office to the general office, and papers from that office are passed here, but they perform no function in this area of mine.

Q. Where are your abstracts looked over and opinions written and your leases drawn and detail of that sort handled, Mr. Harrison?

A. All of the contractual documents are prepared in my office, lease purchase contracts, and so forth. They are sent to Philadelphia, and the examination of title is made through a regular title examining people, by contract with a local abstractor or title examiner or a title insurance company.

Q. Now, that expense is not reflected in your figures here?

A. Yes; it is reflected in there. It comes into a rental cost, a rental expense or a rental profit or loss on the real estate as it is in use, and the cost of acquiring the property would include all this title examination.

Q. Would there be a definite allocation of cost to 960 your district out here from the general office for that kind of cost?

A. Yes.

Q. And of the account that you have given us, would that be reflected in?

A. That is in what we call the dealer cost here, under lease station expense. May I be off the record for a few minutes?

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. I will ask you this, Mr. Harrison, is it not true that in your accounting practices within this company, your company, your Detroit office, in so far as it's practical from an accounting standpoint, is set up on a separate basis, and your general office is set up on a separate basis, and that your accounting practice is designed in so far as you can to keep separate records as between the two operations?

A. Yes, it is so set up.

Q. So that your costs in the districts are not regarded by the general office as its cost and you do not regard general office costs as your costs?

A. That is correct.

961 Q. Just one other general question along that line: Do you have any labor and public relations department in your business, Mr. Harrison, either here or in your general office?

A. There is what you might call a public relations. It is not a department. In fact, it is just one man with a stenographer.

Q. It wouldn't be very much, no matter how you figured that cost?

~~A.~~ That is right.

Q. It has been called to my attention that you may have overlooked mentioning accounting cost in the field division. I think we went into that quite fully. You maintain an accounting force in the Detroit office?

A. In the Detroit district office. And the costs of that are included in these figures.

Q. Now, have you included in those figures somewhere both the accounting cost that takes place right out at the terminal—

A. Yes, sir.

Q. —and the cost at the field office?

A. Yes, sir.

Q. That covers the point.

Now, reverting for a moment to the physical method of making deliveries here from your Detroit terminal,
962 Mr. Harrison, you operate, do you not, large trucks, as compared to trucks generally in use for gasoline delivery?

A. I think that generally speaking, our trucks have a larger load capacity than most other, although some other companies have the same size trucks, I believe.

Q. But you adhere pretty generally to the use of those trucks, uniformly?

A. Yes, sir.

Q. I think you said that you had 10 or 12 trucks operating.

A. I find it was 13.

Q. Do you have some routing plan in effect whereby you adhere, generally speaking, at least, to making only a certain number of calls a week or a month on a dealer?

A. Yes, sir, we have a routing plan, with that as an objective.

Q. Is the effect of that to limit the number of calls within a given time?

A. That is the purpose of it, to make as few deliveries as possible, delivering a maximum load each delivery.

Q. ~~Now,~~ as a part of that plan, you also have a minimum delivery figure, do you not, ordinarily in effect?

A. Yes. It is not particularly applicable to dealer deliveries, because practically all the dealers take a much larger delivery than that limit. That limit is on a so
963 called commercial delivery.

Q. That is designed for the same purpose, to increase the efficiency?

A. Yes, sir: to increase the efficiency and reduce operating costs.

Q. Now, Mr. Harrison, those figures, so far as you have been able to give them to us here, were derived from your operations in 1940; that is true, is it not?

A. Yes.

Q. It is true that your operations have increased so far as gasoline volume is concerned from year to year steadily over the last three or four or five years, have they?

A. Generally speaking, yes, they have increased.

Q. Isn't it also true that your costs, over-all costs, of sale and delivery to the retail reseller trade have decreased somewhat over the same period of time?

A. Yes, the unit cost, using the gallon as the measuring stick, the unit cost has gone down as the volume goes up.

Q. I don't think it is in the record from you, Mr. Harrison: You sell only one grade of gasoline out of your Detroit terminal, do you not?

A. That is correct.

Q. And that is the Sunoco gas?

A. New Blue Sunoco Motor Fuel.

Q. Just incidentally, would that not make some difference in the cost of the handling and operating the bulk plant as distinguished from handling, say, three different grades that had to be kept separated and handled?

A. I don't think but what there is any question that it is less expensive to operate with the one material than with three or four. Any duplication or, we will say, multiplication of grades or commodities is bound to run your cost up.

Q. And that is particularly true in the oil industry, isn't it, Mr. Harrison?

A. Yes.

Q. I would like to have the Court understand that while what you say might be true as regards different grades of molasses—

A. Yes, sir.

Q. —it is even more true, is it not, when you are handling products like petroleum products, like gasoline and naphtha and inflammable dangerous materials must not be permitted to mix?

A. It is, I think, the duplication, or multiplication, I will say, of commodities handled through a plant under the conditions under which petroleum has to be handled, would greatly increase the cost of plant operations.

Mr. Hanley: Now, I have a few more questions, your Honor, but they will be very few, but I would like to 965 take a few minutes' recess if we may have it at this time.

Trial Examiner Ballinger: All right. We will take a recess for five minutes.

Off the record.

(A discussion ensued off the record.)

(A recess was taken.)

Trial Examiner Ballinger: Come to order.

By Mr. Hanley:

Q. I think I am about through with this thing, Mr. Harrison, on costs, but recapitulating what I understand to be your answers, it appears that your organization generally is about like this: That you have here in Detroit your terminal, and you allocate to that what you call warehousing and delivery costs; and then you have a field office, and that is the office that Mr. Cunningham directs here in Detroit.

A. Yes.

Q. And that has direct charge of the operations out at the terminal and the business of selling here in Detroit?

A. Yes, sir, that is correct.

Q. And then you have a division office here in Detroit which you manage?

A. That is correct.

Q. And then you have the general office of the company in Philadelphia. You really have those four divisions 966 of operations?

A. Just three. Mr. Cunningham also is manager of the terminal as well as the sales office. There are just three divisions.

Q. So the field office and the warehouse are, in your mind, practically one unit?

A. One operation, yes, sir.

Q. Now, the costs that you have given us, generally, are the costs that you have allocated particularly to the warehousing and delivery operation out of the terminal and such additional costs as you think are applicable in the field office of Mr. Cunningham?

A. That is correct.

Q. And you have excluded costs that might arise in your own office and in the general office in Philadelphia?

A. That is correct.

Q. Now, in the over-all marketing cost picture, Mr. Harrison—and let me preface this question by saying I may have been—I may have inadvertently created a little confusion by saying cost of selling when I was maintaining and intending and meaning that you should understand the over-all cost of marketing gasoline, and in that over-all cost of marketing gasoline, to retail resellers, you do have costs, as you have indicated, in these other divisions of your business. That is, in your office and in the
967 general office in Philadelphia?

A. That is correct, which costs do not appear within these figures that I have given of recor.

Q. Now, directing your attention particularly to this item of 3/100 of a cent which you designated as your office accounting cost and your item of 1/100 of a cent, which I understand, you designated as your credit accounting cost, would you check that and see if I am right?

A. Yes, there are three items under office cost: accounting costs, such as the bookkeeping, invoicing, and so forth.

Q. And that was how much?

A. That was 3/100.

Q. Yes, sir.

A. And the office costs for credit and collection:

Q. Yes, sir.

A. That was 1/100 of a cent.

Q. Yes, sir.

A. And the office costs connected with the sales and operations of the plant and office, 1/100 of a cent.

Q. So you have there a total of 5/100 or 5/100 of a cent?

A. And then I have got general district expense which included the items of interest on invested capital in plant and inventory, 3/100 of a cent.

Q. That certainly would not come within what I
968 have in mind. I think it is within the three items:

A. In office costs?

Q. Yes.

A. And that is 5/100 of a cent.

Q. Now, I think that you have told us that you have included in that 5/100 of a cent some place the accounting at the warehouse physically, too, as well as the accounting in Mr. Cunningham's office?

A. That is correct.

Q. Now, in that figure of 5/100 have you given consideration to these items, if you have any cost of these items, the record of delivery by accounts at the warehouse? Do you keep a record by accounts?

A. Of the quantities delivered?

Q. Quantities delivered and to whom delivered, and when?

A. Yes.

Q. Have you included that?

A. That is in the cost.

Q. Do you keep an efficiency record on your trucks?

A. We keep a truck operation record which includes—well, we will say, the truck itself, the depreciation on that truck, the license, the taxes, the cost of gasoline used, oil used, tires used, and repairs are included in that.

Q. And do your keep records of just what that truck does?

A. We keep records of the gallonage delivered, the 969 miles run, the gallons delivered per mile run, and the gallons delivered per hour run.

Q. So you have an individual account with every truck?

A. Yes, sir, every truck.

Q. Is that included?

A. That is included.

Q. When I say from here on, "Is that included?" I am talking about this 5/100, Mr. Harrison.

A. Yes, sir.

Q. Do you keep a record of your sales by accounts?

A. Yes, sir.

Q. And is that included?

A. That is included.

Q. Do you have ledger accounts on each reseller that you serve?

A. Yes, sir.

Q. And do you keep retail accounts with each reseller?

A. Yes, sir.

Q. And that applies to both real estate and rental of the equipment, if you rent any equipment?

A. Rental of the plant, we say, and not equipment. The building where we rent it and where we own it and in both cases, have a tenant operator or, as generally known, as a dealer, that is all included in these figures.

Q. Now, do you keep a record on equipment at each place?

970 A. Yes, sir, we keep an inventory of every item of equipment that is placed with the dealer and where it is located.

Q. And that is included?

A. That is in there. That accounting is all in there.

Q. Do you have a check and record department taking care of all these sales tickets, delivery tickets?

A. Yes.

Q. Is that included?

A. That's included.

Q. Do you have any portion of your accounting department, which devotes itself to making compilations of sales reports, summaries, things of that sort?

A. The district office makes a summary report every week of the sales made during that past week, and that is sent in to my office and the cost of preparing that report is in that expense.

Q. That's done by the accounting force that you have referred to?

A. Yes, sir.

Q. Now, you have told us that your company credit records and credit costs, including investigation, collection, salaries, and the records in connection with that, that is included here, is it not, in one of those segregated items?

A. That's right.

971 Q. Now, your company issues credit cards, does it not, Mr. Harrison?

A. Yes.

Q. Do you have any personal set up to take care of credit on credit cards or the general handling of that business?

A. Not separated from the general credit and collection work.

Q. Is all of that work included in this .05 figure?

A. Yes, sir.

Q. Do you maintain an order department?

A. Yes, sir.

Q. And is that included?

A. That's included.

Q. Now, directing your attention not to the specific costs which you have outlined in figures here, but to the general cost of marketing gasoline to retailers in Detroit and immediate vicinity; has not that been generally, in the past several years, about 1½ cents per gallon, perhaps from 10 to 15 points or hundredths of a cent below that; hasn't that been your experience, Mr. Harrison?

A. I would like to have that question again.

Trial Examiner Ballinger: Read the question.

(The question was read.)

972 By Mr. Hanley:

Q. I will try to clarify that by perhaps less 10 or 15 points: Hasn't it been around approximately 1.35 or 1.40 cents, in your experience?

A. No, sir.

Q. Haven't you had a number of conversations with Mr. Raupagh and perhaps others, Mr. Harrison, in which you have generally discussed your over-all costs of marketing? Do you recall having such conversations?

A. Yes. I have discussed these marketing problems.

Q. And that has happened on a number of occasions when you would get together, in the past several years, has it not?

A. That is correct.

Q. Do you recall saying in those conversations that your over-all marketing costs approximate somewhere in the neighborhood of 1.30 or 1.35 or 1.40 cents a gallon?

A. I don't recall making such a statement.

Q. In this system of bookkeeping that exists between your Detroit marketing set-up and your general office, is it not true that the company allows a cent and a half as a mark to shoot at, at least in the marketing cost of gasoline to retail dealers?

Mr. Austin: Oh, I object, your Honor, on the ground that our statute refers only to cost of manufacture 973 and sale and delivery. There has been no question here of cost of manufacture. Therefore, this inquiry must necessarily, under the statute, be restricted to sale and delivery. Up to this time testimony has been restricted to sale and delivery. We are now confronted with the term marketing costs. If it means anything other than sale and delivery, it is improper and irrelevant and has no bearing upon the issues.

Mr. Hanley: I will say to your Honor it certainly does not mean manufacturing costs. I am not inquiring anything about manufacturing costs. I am talking about marketing costs which, I think, we all understand, now, in view of the explanation of the witness.

Trial Examiner Ballinger: Possibly the witness may have more knowledge than either of the attorneys.

Mr. Austin: Does marketing costs mean sale and delivery only?

Mr. Hanley: It certainly includes sale and delivery. We may be in dispute on the argument of this case as to whether it means anything about the president, Mr. Pugh, and Sun Company, but we want to reserve the right to argue about that, at least. It doesn't include manufacture. I can say that right now. My question isn't pointed to any inclusion of any manufacturing costs of gasoline.

974 Mr. Austin: Beyond that, my objection is based on the ground that marketing costs might be broader than sale and delivery, and I think we ought to continue to talk about sale and delivery, and not add on a term that might include something else. I don't know if it includes something more than that, or not.

Mr. Hanley: Isn't that up to the Commission, as to which of these terms may be included in sale and delivery, as the statute provides?

Trial Examiner Ballinger: The Examiner thinks the witness ought to be advised exactly what you mean.

Mr. Hanley: I have tried to advise him, but I will do so again.

By Mr. Hanley:

Q. I wanted you to understand, Mr. Harrison, through this I am asking you now I am not referring exclusively and explicitly to the division of costs you have given us figures on here, that is, your terminal and Mr. Cunningham's field house, I am referring to that plus over-all marketing cost for gasoline to resellers in Detroit, which cost may also arise and be applicable to marketing costs in your office in Detroit and in Philadelphia. Now, taking the whole picture but allocating now to marketing costs of the gasoline to resellers in Detroit, is it not true that in this bookkeeping set-up in existence in your company
975 that it is expected that that cost will be kept within a cent and a half?

Mr. Austin: Your Honor, I don't see that it is at all material as to what the Sun Oil Company's central office expects of its regional executives, or whether they expect to be below a cent and a half or not, or what it is. All these items, I agree with Judge Hanley, it may be a question for the Commission what items are properly included, or not, but I don't think this present question about what the Sun Oil expects is material, and I object on that ground.

Trial Examiner Ballinger: The Examiner doesn't perceive the materiality of it, but to save time and to afford counsel full opportunity, the witness may answer.

A. If I have a clear understanding of your question, you mean that there are costs in addition to those I have mentioned on the record incident to the expense of my office and of our general office in Philadelphia, which increment, added to the figures I have given you, would bring that cost up somewhere in the neighborhood of 1.35 or to one and a half cents?

By Mr. Hanley:

Q. Yes, sir.

A. My answer to that is no.

Q. How high would it bring it, in your judgment, then?

976 A. The addition of the administrative costs in my office and the general office would make a very small difference, relatively in the cost, and I am not qualified to say how much. I don't know the costs of the general office in Philadelphia that would be included in this bracket of costs.

Q. I don't want to press you, if you don't care to give a figure, Mr. Harrison, and if you don't, why, just say so, if you can be helpful.

A. It is not a question of my willingness to give it. I just don't know, and, consequently, I don't want to testify to something that I don't know.

Q. Very well. We will just leave it there.

Mr. Hanley: Now I have a few questions, your Honor, that are strictly cross-examination because they are just clarifications of a couple of questions in the examination of last week.

Trial Examiner Ballinger: Counsel for the Respondent may now recur to cross-examination, the direct examination having ceased.

PAUL HENRY HARRISON, was thereupon recalled as a witness by and on behalf of the Commission, and, having been heretofore duly sworn, testified further as follows:

977 *Further Cross-Examination by Mr. Hanley.*

Q. You will remember, Mr. Harrison, in your last examination that we were discussing the policies in effect by your company relative to your use of jobber distribution as distinguished from your own direct distribution, and you stated that elsewhere at certain points in this state—that is, elsewhere than in Detroit—and at certain other points in the state, you distributed through jobbers. Do you recall that testimony?

A. Yes, sir.

Q. It is not clear, from your testimony whether or not you stated that those jobbers which you used elsewhere in this state and elsewhere in the United States generally engaged in both direct retail operations themselves as well as supplying retail dealers who are independent operators. Is that generally the custom among your jobbers?

A. I think that all of them operate directly as their own station, one or more stations. I think the largest one operated by any one of our distributors is six stations of his own.

Q. As I recall your testimony, you did say that in the use of the jobber system, generally, by the whole industry, that it was your understanding that jobbers generally did engage in both retail operations directly, as well as in the wholesale operation to other resellers?

978 A. That's my understanding.

Q. Now, again directing your attention to your testimony on that general question of how you operated, as distinguished between jobbers and direct deliveries, I asked you this question, as to whether or not that was true throughout your operations. It is true, isn't it, Mr. Harrison, that in Detroit and in the fuel oil business that you use the resellers who are classified as both service station men or retailers and resellers who are classified as jobbers or tank car buyers, in the distribution of your fuel oil as well as distributing directly to consumers, yourself?

A. You are speaking of domestic fuel oil, furnace oil, to particularize?

Q. Yes.

A. Yes, we sell both by tank car to distributors who, in turn, deliver it to household by truck delivery. We sell to those people in tank car. We also operate our own truck delivery system of furnace oil in Detroit.

Q. And do you not also sell to service station operators?

A. By truck delivery, from our own plant, yes.

Q. You have a differential in price—I don't care to ask you what it is—between the tank wagon price to the resale dealers on fuel oil, as distinguished from the price you charge the tank car resellers, do you not?

979 A. Yes, there is a difference—

Q. And the tank car price is lower?

A. —between tank car price and tank wagon price, the tank car price being made to the distributor who operates a plant, and the truck delivery being made from our own plant.

Q. To the resellers?

A. To the reseller, in the case of a few service stations; by truck to the consumer, in the case of the domestic oil; that is, the oil burned in the domestic furnace.

Q. Excluding deliveries to consumers, because that apparently isn't in the picture, on gasoline here, that operation, so far as you indulge in it, in fuel oil, is just the same as the operation of delivering gasoline by tank wagon at a tank wagon price to a reseller, and delivering gasoline by tank car at a lower and tank car price to a jobber with a plant, the only difference being that in the one case it is gasoline and in the other case it is fuel oil; is that not true?

A. I think the two operations are comparable; that the actual operation of selling to the distributor by tank car and he, in turn, operating his truck, would be the same operation essentially as if we sold him gasoline in tank car, and he operated the plant and he sold it either to a retailer or to a consumer.

980 Mr. Hanley: You may take the witness. Thank you, Mr. Harrison.

Redirect Examination by Mr. Austin.

Q. Mr. Harrison, you came here on last Wednesday—I believe that was March 12th. Did you come under subpoena?

A. Yes, sir.

Q. Subpoena from the Federal Trade Commission?

A. Yes, sir.

Q. And did you receive that subpoena before you ever met me, or talked to me about this case?

A. Yes, sir. I received it by registered mail several days before I saw you.

Q. Prior to the time you were subpoenaed, had you ever discussed this case with any representative of the Federal Trade Commission?

A. Yes, sir.

Q. When I say "this case" I mean after the issuance of the Complaint against Standard Oil Company, which was in December of 1940?

A. No. I was called on by Mr. McDonald, I think, of the Federal Trade Commission, prior to the filing of this bill.

Q. That was 1939, was it not; around the fall of 1939?

A. Yes, sir.

Q. And did Mr. McDonald come to see you by your 981 request or on his own initiative, so far as you know?

A. I certainly didn't ask him.

Mr. Austin: That's all I wanted to ask. I don't believe I have anything further.

Mr. Hanley: That's all I have.

Trial Examiner Ballinger: Mr. Harrison, you are excused.

(Witness excused.)

Trial Examiner Ballinger: Is there anything further?

Mr. Austin: Yes, your Honor.

At an earlier period in the hearing, there was marked, for identification, a volume of invoices and acknowledgments from the files of the Standard Oil Company. It was admitted at that time that they were invoices and acknowledgments from the Standard Oil Company's files and I believe it was agreed that if I so desired, at a later time, I might offer certain of those invoices and acknowledgments in evidence, and at this time I have a few of those here which I have picked out of that file, Commission's Exhibit 20, for identification, which I would like to offer in evidence just so that the method of some of these shipments may appear.

Incidentally, five of these are shipments direct from Whiting, Indiana, of which I find that four are ship-982 ments which were covered by Commission's Exhibits 5-A to 5-J. There seems to be one here that is not so covered.

Mr. Hanley: Are you going to offer duplicate exhibits?

Mr. Austin: They are not the same sheets. This previous exhibit was bills of lading, apparently, or some railroad documents, but I would like to offer in evidence, I think, 14 of these invoices and acknowledgments taken from the file which I have just described.

Mr. Hanley: I don't understand the purpose, now, your Honor. Your Honor reserved the ruling on this whole file.

Trial Examiner Ballinger: The Examiner was under that impression.

Mr. Hanley: What is the purpose of introducing these exhibits, Mr. Austin, and, especially, duplicate exhibits? We just don't want to get this record too voluminous, your Honor. Do these things dispute any of the prices that we have admitted were charged?

Trial Examiner Ballinger: What do they pertain to? Do they pertain to the Interstate Commerce character of the business?

Mr. Austin: Five of them are on Interstate shipments;
there are three from Muskegon and one from River
983 Rouge; all show there was a 1% cash discount made
to tank car buyers, which Mr. Rampagh has testified
were not made to tank wagon buyers and while it is small, it is still an element in the case.

Mr. Hanley: Certainly it isn't disputed.

Mr. Austin: And, also, there are various sizes of tank cars there that I thought having those invoices in might show a pretty good picture of how gasoline was delivered. I am perfectly willing to withdraw four of those five from interstate shipments, because I think there is only one that is not included. That would reduce it down to ten.

Trial Examiner Ballinger: There should be no duplications.

Mr. Hanley: I want to object to this, in view of the statement of counsel, on the ground it is cumulative and encumbers the record. We have to buy this record, and photostats of all of these things, and Mr. Austin hasn't indicated a single thing that they prove. Everything that they prove is admitted on this record.

Trial Examiner Ballinger: Let us wait until there is a tender and then I will hear you fully on your objection.

Mr. Hanley: I am sorry. I thought he did make
984 a tender.

Trial Examiner Ballinger: Mr. Austin, I suggest you hand those to the reporter and let him put the identification numbers on them so that you may have the numbers when you tender them.

(The documents referred to were marked for identification, "Commission's Exhibits 66 to 74," inclusive.)

Mr. Austin: Now, your Honor, I will offer in evidence these nine invoices marked Commission's Exhibits 66 to 74, inclusive, for identification, which were withdrawn from the volume of invoices which was previously marked Commission's Exhibit 20 for identification, and I will point out that these are Standard Oil Company invoices showing shipments of gasoline to Merchant's Supply Company, Ned's Auto Supply Company, Wayne Oil Company, and Stikeman Oil Company.

These invoices are for various shipments of gasoline in different sized tank cars for different destinations and show the cash discount allowance and one of them marked Commission's Exhibit 66, for identification, is an invoice for a shipment from Whiting, Indiana, to the Wayne Oil Company direct, which does not appear to be included in the bills of lading put in in Commission's Exhibit 5—or freight bills, perhaps they were.

985 Mr. Hanley: Please note an objection on the part of the Respondent to the effect that the exhibits offered are cumulative; do not prove anything that is not admitted either in the pleadings or in the testimony, or both, and go to matters wholly undisputed. It may do me some good, if I ever have to print the record.

Trial Examiner Ballinger: The objection is overruled, and the documents, Commission's Exhibit 66 to and including 74 are admitted in evidence.

(The documents referred to, heretofore marked, for identification, "Commission's Exhibits 66 to 74," were received in evidence.)

Mr. Austin: Now, if your Honor please, I would like to make an offer of proof at this time.

I have called some 15 or 16 dealers here to the stand to testify to loss of business and to the customers of the Standard Oil Company named in the Complaint who have been buying gasoline in tank car quantities and to some of their subdealers. I have talked to a number of other dealers and have them available for testimony, but, in my opinion, any further testimony along that line would be cumulative, and, therefore, I will offer to call those dealers subject to your Honor's opinion or ruling as to whether additional testimony upon that line should be brought forward.

986. Trial Examiner Ballinger: The Examiner understands that the testimony that you have thus far introduced is typical of the testimony that would be given by other dealers if called, and that their testimony would merely be cumulative; is that correct?

Mr. Austin: That is my opinion.

Trial Examiner Ballinger: Upon that representation the Examiner declines to receive them.

Mr. Hanley: At this time the Respondent moves that the statement of counsel denominated an offer of proof, just made, by physically stricken from the record on the ground that the same is merely the hearsay, unsworn testimony of counsel who states that he has talked to certain unidentified witnesses whom he says will testify to the same things that certain witnesses he has already called have already testified to, and such motion is made for the reason that such statement of counsel cannot be binding in any manner upon the Respondent.

Further, that there is no occasion for an offer of proof as of the time it was made by counsel for the Commission in that he had not been precluded from offering any testimony from any witness that he might choose to call, and the Respondent is not entitled to be bound by the suggestion of counsel or anybody else that testimony is available and can be produced against the Respondent, unless 987 such witnesses are called and produced, and the Respondent has an opportunity to hear their testimony and cross-examine such witnesses.

Further, the reason that, if such testimony were admissible in this hearing, that the Respondent could and would offer to prove by as many as 15 or 16 witnesses in respect of service stations handling each of the products herein denominated as branded products and products in this case denominated as non branded products, were originators of price cuts in their various vicinities and were responsible, so far as such witnesses were concerned, for the necessity, on the part of such witness, to reduce his retail price and that indulgence in such offers of proof of controversial matters on the part of counsel for the Commission and counsel for the Respondent would amount to nothing but argumentative exchange based on no evi~~dence at all, and would dege~~nerate into a colloquy of unsupported bickering which could be of no aid to the Commission and certainly isn't binding upon the respondent.

Trial Examiner Ballinger: Judge, it is your contention that the testimony adduced was incompetent and immaterial.

Mr. Hanley: I understood I had that objection all along.

988 Trial Examiner Ballinger: That is a reserved objection.

Mr. Hanley: Yes, sir. This is a specific, additional objection. I don't think this kind of an offer ought to be made, Judge.

Trial Examiner Ballinger: Your motion now is to strike the statement of counsel for the Commission that he can or will, if permitted, introduce further evidence of the same nature?

Mr. Hanley: Yes. I don't want to be bound by that statement. If he can, I think he ought to do it, if he wants the evidence.

Trial Examiner Ballinger: It being apparent with somewhere between two and three thousand dealers in Detroit that similar testimony could undoubtedly be introduced, the Examiner being of the opinion that it is wholly unnecessary, it would merely be cumulative, the motion of counsel for the Respondent to strike the statement of counsel for the Commission is overruled and denied.

Mr. Austin: If your Honor please, I would like to say a couple words on the record, in view of this long statement of Judge Hanley's.

Mr. Hanley: You may talk the Court out of his ruling. It is all in your favor, so far.

989 Mr. Austin: I assume whatever counsel says on the record is not evidentiary, and, secondly, there was no intention on my part to try to testify for any supposed witnesses in here, but simply to say that I was making an offer to call future witnesses for the purpose of producing some testimony. I am sure I don't know what they would have said when they got here, so if I said that, you can ignore that, and I am sure the Examiner has already done so.

Trial Examiner Ballinger: Let us proceed. The Examiner has already ruled.

Is there any further business?

Mr. Austin: I have nothing further on the Commission's case in Detroit, your Honor, and, therefore, move that the hearings be adjourned until some future date. Perhaps your Honor can state what the further proper practice is. I am not ready to close the Commission's Case at the present time. I may desire to hold one further hearing at Washington, but I cannot set the date or ask the date be set definitely, for that at this time.

Trial Examiner Ballinger: Upon statement of counsel for the Commission, the case of the Commission is not closed, if he desires to call one or more additional witnesses and he is not prepared to fix a time when the hearing should proceed, the Examiner will adjourn the hearing subject to five days' notice to counsel.

990 Now, at 1:05 P. M., the hearing stands adjourned, to be reconvened upon five days' notice to respective counsel.

(Thereupon at 1:05 o'clock P. M., the hearing in the above entitled matter was adjourned to reconvene upon five days' notice.)

991 Room 332, Federal Trade
Commission Building,
Washington, D. C.,
Tuesday, April 8, 1941.

Met, pursuant to notice, at 10 a. m.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., appearing on behalf of the Federal Trade Commission.

H. R. Hanley, Esq. (910 South Michigan Avenue, Chicago, Ill.), appearing on behalf of the Respondent.

992 PROCEEDINGS.

Trial Examiner Ballinger: This is a reconvening upon notice at 10 a. m., Eastern Standard Time, in the hearing room of the Federal Trade Commission, Washington, D. C., of Docket No. 4389, in the case entitled in re Standard Oil Company. The last hearing was held at Detroit, Mich., March 18, 1941.

The Reporter will note Counsel for the Commission and the Respondent present.

You may proceed.

HERBERT F. TAGGART was thereupon called as a witness for the Commission, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Austin.

Q. State your name, please.

A. Herbert F. Taggart.

Q. Where do you reside, Dr. Taggart?

A. Ann Arbor, Mich.

Q. And what is your occupation or profession?

A. I am an accountant and also a professor of accounting.

Q. Where are you a professor of accounting?

A. At the University of Michigan.

Q. What are your present duties; that is, at this
993 time here in Washington?

A. At the present time I am on leave of absence from the University of Michigan. I am acting as chief of the Cost Accounting Branch of the Price Stabilization Division of the National Defense Commission.

Q. You say you are here on leave of absence from your position as professor at the University of Michigan?

A. That is correct.

Q. How long have you taught accounting at the University of Michigan?

A. I started teaching accounting at the University of Michigan in 1920, and I taught accounting there ever since except for 2 years spent at the University of Kansas, and two or three periods of several months to a year at a time down here in Washington. At those times I have been on leave of absence from the University.

Q. I assume you started in as an instructor in Michigan in 1920, and I believe you are now a full professor; is that correct?

A. That is correct.

Q. Having been an associate professor and assistant professor previously.

A. That is right.

Q. Have you specialized in cost accounting?

A. That has been my primary field for a consider-
994 able number of years, and when I first started out I
taught general accounting and economics, but as time went on I took over the cost accounting courses, and for the past 10 years, approximately, I have taught very little except cost accounting.

Q. What particular branch of cost accounting, or does cost accounting have branches?

A. Well, I teach, as a matter of fact, the general course in cost accounting, which is more or less similar to courses given in other universities. I also have one of the few courses in distribution cost accounting that are taught in the country.

Q. Are you a member of the American Accounting Association?

A. That is right.

Q. And any other associations of cost accountants?

A. I am a member of the National Association of Cost

Accountants. I am also a member of the Michigan Association of Certified Public Accountants.

Q. Do you have a particular position upon the board of directors of the American Accounting Association?

A. I am one of the two co-directors of research for the American Accounting Association.

Q. Now, you mentioned that you have been previously in Washington before your present experience. When was that?

A. On two different occasions during the N.R.A. I was here from the fall of 1933, full time, until the fall of
995 1934, and part time from then on until the Schechter
decision in the spring of 1935. At that time I was chief of the cost accounting unit of the Research and Planning Division of the National Recovery Administration.

The second occasion of my being in Washington was during the four months from February to June of 1938, at which time I was a consultant on distribution costs with the Bureau of Foreign and Domestic Commerce.

Q. Did you conduct or participate in conducting any cost surveys while you were here with the N.R.A.?

A. Yes, I did. It was necessary in connection with my duties on the N.R.A. to pass upon the results of cost surveys which had been made in various industries for the purpose of establishing minimum prices. There were a number of these surveys in which I had more or less part; perhaps the most extensive one was that in the paint industry, in which the members of the paint industry were attempting to establish a series of minimum prices for the various products of that industry.

At that time they proposed a cost survey and brought into my unit their questionnaires that they proposed to use, and we went over them carefully and discussed them with them and suggested changes, and so on, and when the questionnaires had been sent out to the industry and were returned we received them and checked them very care-
996 fully and analyzed them, tabulated the results, and
came to certain conclusions with respect to the minimum prices that had been proposed.

Q. Have you written any books or treatises on cost accounting, Dr. Taggart, which have been published?

A. Yes; the only one which is primarily on cost accounting is a publication by the Department of Commerce called "Distribution Cost Accounting for Wholesalers."

I have written, however, other books, two of them in particular, which came as a result of my N.R.A. experiences. One is called "Minimum Prices Under the N.R.A." and the other is called ~~"The Cost Principle in Minimum~~ Price Regulation." The later book was not confined entirely to N.R.A., but dealt also with such laws as with cost accounting problems, cost determination problems under such laws as the California Unfair Practices Act, and the so-called Michigan Fair Trade Act.

Q. Did you, in 1938, Dr. Taggart, have occasion to make a survey of the cost of selling gasoline by retail service stations in Detroit?

A. That is correct.

Q. Or in Wayne County, Michigan?

A. In Wayne County, including Detroit.

Q. Will you tell us how you happened to make that survey, or by whom you were retained to make it, if you were retained by someone, and the circumstances which
997 preceded your actual commencement of that work?

A. I came to make it because of the fact in my professorial capacity I was interested in such things. I had watched the growth of such legislation as this Michigan law, to which I referred, and was particularly interested in the provision in the law which provides for the establishment of a cost survey, and the reason I was interested in that, of course, was because of the fact that I had participated in certain cost surveys in the N.R.A., and I knew something about the problems and the technique involved.

Q. Well, who retained you to make the survey, or asked you to make it, or paid for the work?

A. Mr. Peck, the executive director of—oh, I forget the exact title. It is the Retail Gasoline Dealers Association, made the arrangement for the survey, and retained me for the purpose. The money for the survey was raised by the Association partly, I think out of their own treasury, and partly by subscriptions which they obtained from various sources.

Q. Were you reimbursed by the Association, or not?

A. Well, yes, broadly speaking, that is as I understand it the money that I received did not come out of the Association's normal funds, at least entirely.

Q. But it either came from the Association or was raised by the Association?

A. It was raised by the Association, yes, subscribed
998 as a result of their solicitation.

Q. Will you state broadly the purpose of the survey which you set out to accomplish?

A. The purpose of the survey was to conform with a provision of the law.

Q. Well, pardon me. I mean aside from that, what did you attempt to establish or find out through the survey?

A. Well, I attempted to find out what the cost of retailing gasoline was.

Q. In Wayne County?

A. In Wayne County.

Q. How was the survey commenced? I wish you would state from the beginning the means which you employed to make it.

A. The means that were employed was the questionnaire method. It was not felt that it was feasible to carry on a survey of such magnitude entirely by any other means. These questionnaires were rather extensive documents, were distributed among the gasoline dealers of Wayne County by a procedure which was carefully worked out and intended to furnish every gasoline station in the county with a questionnaire.

Q. Who did the distributing?

A. The distributing was done largely, if not entirely, by chosen members of the Gasoline Dealers Association who were assigned districts as nearly as possible to their—

Q. Well, who chose those members?

999 A. Why, I think they were largely chosen by Mr. Peck and the board of directors of the Association.

Trial Examiner Ballinger: You say "I think." Do you know? Have you any knowledge?

The Witness: Well, they could not very well have been chosen by any one else.

Mr. Hanley: I move to strike that, if the Examiner please.

Trial Examiner Ballinger: The motion is granted.

By Mr. Austin:

Q. Dr. Taggart, did you personally meet and instruct the people who made the distribution of the circulars?

A. Yes.

Q. So that regardless of who chose them, they came to you, did they not?

A. That is right.

Q. That is what I wanted to bring out.

And did you give them instructions regarding the distribution of the questionnaires?

A. Yes.

Q. And what were their instructions?

A. Their instructions were to leave a questionnaire blank at every gasoline station in the area to which they were assigned, and to make a record of leaving the blank on sheets which were specially ruled for the purpose 1000 of making such record. The record shows the date and the hour of leaving the blank, the name by which the gasoline station was known. There was a space also for the signature of the person who received the questionnaire. That space was not always used because signatures were not in every case obtained, but they were obtained in a very large majority of cases. At the bottom of each sheet was a space for a statement by the persons who distributed the questionnaire blanks to the effect that they had made the distribution, and that to the best of their knowledge they had covered every station in their assigned area.

Q. Were those sheets returned to you?

A. Yes.

Q. Did they remain in your possession?

A. They are still in my possession. I have had them continuously.

Mr. Austin: Your Honor, I request that this document be marked for identification as Commission's exhibit.

Trial Examiner Ballinger: The Reporter will mark the document "Commission's Exhibits 75-A, 75-B, and 75-C," for identification.

(The document was marked "Commission's Exhibits 75-A, 75-B, and 75-C," for identification.)

By Mr. Austin:

Q. I show you this document, Dr. Taggart, which 1001 is marked Commission's Exhibits 75-A, 75-B, and 75-C, for identification, and ask you if you will or can describe it.

A. This consists of three items, the one being the white original copy of the survey blank, the second being the pink duplicate copy of the survey blank which was furnished to all of the dealers in order that they might retain a copy of what they had sent in, and the third being an envelope which was supplied with the blank to the dealers for returning the completed survey to me.

Q. Did you prepare this survey blank?

A. I did.

Q. And were the returns upon which you made your survey returns made upon blanks identical with this?

A. That is right.

Mr. Austin: I offer this questionnaire marked "Commission's Exhibits 75-A, 75-B, and 75-C," for identification, in evidence.

Trial Examiner Ballinger: Is there any objection?

(Mr. Austin hands the exhibit to Mr. Hanley.)

Mr. Hanley: Commission's Exhibits 75-A, 75-B, and 75-C are objected to by the Respondent for the reason that the same are immaterial, irrelevant, incompetent, and impertinent in this action. They are not binding upon the Respondent, and is offered for the purpose of supporting any purported survey pointing to finding an average cost of selling gasoline in Detroit or elsewhere, that 1002 the same is immaterial for the reason that such survey is immaterial, incompetent, irrelevant, and impertinent. The only cost relevant in this case being the cost of the respondent and possibly the cost of the specific dealers named in paragraph 3 of the complaint; further, that the same is hearsay as to the Respondent, and no proper foundation has been laid for the reception of the exhibits.

Trial Examiner Ballinger: Have you concluded, Judge?

Mr. Hanley: Yes, sir.

Trial Examiner Ballinger: The objection is overruled. The documents are admitted in evidence as Commission's Exhibits 75-A, 75-B, and 75-C.

(The documents heretofore marked for identification "COMMISSION'S EXHIBITS 75-A, 75-B, and 75-C," were received in evidence.)

By Mr. Austin:

Q. Do you recall the time when you instructed these men to distribute these questionnaires, and the time when they were to be returned?

A. The time when the instructions were given was early in June, 1938. I can't recall the precise date.

Q. And was a date fixed either in the questionnaire itself, or otherwise, for their return to you?

1003 A. There was no date fixed in the questionnaire itself. However, after a certain time had elapsed every dealer whose name and address we had as a result of distributing the survey was sent a postal card indicating that surveys received after July 14, 1938, would not be considered.

Q. Now, do I understand you mean that every name on those lists which were returned to you were sent post cards?

A. That is right.

Q. And that is the list returned to you by the men whom you instructed to distribute the questionnaires?

A. That is correct.

Q. Who sent those post cards that you just referred to?

A. I did.

Q. Where from?

A. From Detroit.

Q. Were any returns received after July 14th used in your computations?

A. No.

Trial Examiner Ballinger: When did you say the survey commenced?

The Witness: Early in June of 1938, approximately—well, perhaps the middle of June, I don't remember the exact date.

By Mr. Austin:

1004 Q. For what period was the cost information obtained from the service station?

A. Partly for the month of May, 1938, and some data for the year preceding; that is, the year 1937.

Q. Did you attempt to establish retail selling costs for other than May, 1938, for any other period?

A. My intention was to establish the retail selling costs as of that date, but on such basis that it would be fairly representative of costs over a longer period, such as a year.

Q. Why did you choose the month of May, 1938, for the survey?

A. I chose the month of May, 1938, for the reason that we felt that that would be representative of a year's operations, and, if anything, on the conservative side; that is, May is a good gasoline month, generally speaking, the sales are relatively high, and I felt that it was desirable to choose such a month for obtaining the monthly costs and the gallonage in order that the survey should result in a conservative conclusion.

Q. I see that the survey, Commission's Exhibit 75-A—

Mr. Hanley: Do you mean the survey or the questionnaire?

Mr. Austin: Well, it is called a survey in one place and a questionnaire in another on the same document. That is the reason I identify it by the exhibit number.

This survey or questionnaire asks for a statement
1005 of the number of gallons of gasoline sold in each
month from January, 1937, through May, 1938.

The Witness: That is correct.

By Mr. Austin:

Q. Did you make any computation or comparison of the May gallonage in 1937 and in 1938, respectively, as compared with the average monthly gallonage for the whole year in the case of 1937 or for the first 5 months in the case of 1938?

A. I did.

Q. What was the result of that?

A. The result of that was that the gallonage in May, 1938, was, if I recall correctly, approximately 5 per cent higher than the average monthly gallonage for the first 5 months of 1938; furthermore, the gallonage for May, 1937, was found to be something like 9 percent higher than the average monthly gallonage for the 12 months of 1937.

Q. And in your opinion, based upon the results of your experience, and results of this survey, does the cost per gallon, distribution cost per gallon of retail service stations in selling gasoline increase or decrease with an increase or decrease in gallonage?

A. The cost per gallon decreases with an increase in gallonage in a given period.

Q. Then, accepting the statement which you have just
made that the average, or, rather, that the gallonage
1006 for May, the average gallonage for May was higher
for these stations than the average gallonage for the
balance of the year in so far as shown by these returns, would that mean that the average cost per gallon of selling gasoline through these stations would be higher or lower in May than for the balance of the year?

A. It would be lower.

Q. Now, this exhibit, Commission's Exhibit 75-C, is a return envelope addressed to Dr. Herbert F. Taggart, Post Office Box No. 31, Ann Arbor, Mich., was a similar envelope attached to each one of these surveys?

A. An envelope similar to that accompanied each survey blank.

Q. Did you receive these surveys or questionnaires filled out at Ann Arbor?

A. That is right.

Q. Did you receive any of them at any other address?

A. I did not.

Q. Then, do I understand that all of the filled-in questionnaires which were used by you in the survey were received by you direct by mail to Ann Arbor?

A. That is correct.

Q. Who opened these envelopes when they were received?

A. I opened a good many of them. My assistant opened also a considerable number of them.

Q. Who was your assistant?

1007 A. My assistant was a graduate of the School of Business Administration at Ann Arbor. His name was Gordon Roeglin.

Trial Examiner Ballinger: Were the replies you received under oath? Were they subscribed to before a notary public?

The Witness: They were.

By Mr. Austin:

Q. And where has been the physical location of these returns since you received them?

A. They have been in Ann Arbor.

Q. Have they been in your possession at all times?

A. Yes.

There is one slight exception to that, that is—well, two exceptions. In the first place, we took some of them, that is, on trips, field trips, in order to check them, so that they were out of Ann Arbor but not out of our possession. The second was that some of them were taken into court in Detroit in connection with litigation which followed this.

Q. Well, in that instance you have just mentioned, was that after the completion of your computations?

A. Oh, yes, entirely after.

Q. And all your computations made upon those returns?

A. That is correct.

Q. Now, you have just made a reference to a field check in Detroit. Before asking you about that, 1008 were some of these returns or questionnaires, when they came to you, obviously incomplete, or did some of them have defects of one sort or another, or lack of notarization, or errors in arithmetic, that sort of thing?

A. That is very true.

Q. Have you any idea what percentage of them would have such obvious errors?

A. It would be necessary to guess. I prefer not to— relatively a small percentage.

Mr. Hanley: May I have that question and answer, please.

Trial Examiner Ballinger: Read the question and the answer.

(Question and answer read.)

By Mr. Austin:

Q. Do your know definitely that it was a relatively small percentage?

A. Oh, yes, definitely.

Q. Now, what was done with those returns that had these obvious defects on them?

A. Each return that had an obvious defect was marked for further investigation.

Q. What was the nature of that further investigation; that is, what further investigation was actually made?

A. The returns were taken by myself, or by my 1009 assistant, to the station from which they originated, and there either the defect was remedied or we determined that the defect could not be remedied. In general, the defect was remedied.

Q. Suppose it was not remedied.

A. Then we threw the return out of the computation.

Q. Did you make a field check personally, or, through your assistant, under your direction, upon any returns which on their face did not appear to have any defect?

A. That is true, we did.

Q. In above how many of those returns were field checks made?

A. The total number of returns on which field checks were made for any reason was approximately one-third of the entire number received. I am sorry to be unable to give you an exact breakdown as to—

Q. I do not care for the exact percentage, Doctor. I expect your mind runs to exact percentages when I ask you these questions, and you dislike to answer them otherwise, but I want only an approximate answer.

I will ask you a farther question along that line. I am particularly interested in knowing what your field check was upon returns which did not have any ~~defects~~ upon their face?

A. In general, we found that they had been prepared very accurately and in almost no instances were 1010 changes in such returns found necessary.

Trial Examiner Ballinger: What does a field check consist of?

The Witness: We visited the stations and inspected their records. If they had a complete set of double-entry books, which was frequently the case, we examined those books to check the figures which had been reported against the books which they kept. Where they did not have a complete set of double-entry records, which was also frequently the case, we inspected such records as they did have for the purpose of checking the accuracy of the reports which they had made, and also for the purpose of supplying in some cases figures which they had not given us, or in a few cases where they had combined figures or failed to follow instructions.

By Mr. Austin:

Q. How many of these completed survey blanks were returned to you at Ann Arbor?

A. May I look at my report here?

Q. Yes.

(The witness examines a paper.)

A. 555.

Q. And how many of them were used in making your computations?

A. 489.

Q. What accounts for that difference?

1011 A. The 66 returns which were eliminated were those which were defective in one way or another, and from which it was impossible to remove the defect.

Q. Did you make any analysis of the distribution of these 489 stations throughout the County of Wayne?

A. Yes.

Q. How was that done?

A. We spotted each station which made the return on a map of Wayne County, and we divided the county up into five districts, then bounded by the city limits of Detroit, by the Detroit River and Michigan Avenue, and Woodward Avenue and Gratiot Avenue, so that four of the districts were within the city, and the fifth consisted of all of Wayne County outside of the City of Detroit. The number of stations in each of those districts ranged from 80 in the district outside of the City of Detroit to 121 in District 2, which was the district between Michigan Avenue and Woodward Avenue, running from the river out to the city limits.

Q. How many stations were located in each of the other three districts?

A. In District 1, 107; that was between the Detroit River and Michigan Avenue.

District 3, 82, which is between Woodward and Gratiot.

And District 4, 99, which is the district between 1012 Gratiot and the river.

Q. Among the 489 stations whose returns were used by you in making your survey computations, what was the range in the number of gallons of gasoline sold during the month of May, 1938?

A. The range was from 1049 gallons to 30,844.

Q. And how many major brands of gasoline were represented?

A. I think all of the major brands of gasoline were represented, and a considerable number of minor brands and unbranded varieties.

Q. Have you any record of the major brands which were represented?

A. Mobil Gas—

Q. And you might state the number of stations, also.

A. Mobil Gas, 102; Standard, 82; Sunoco, 52; High Speed, 42; Sinclair, 40; Shell, 39; Texaco, 31; Gulf, 29; Cities Service, 9; miscellaneous brands, 22; brands unreported, 107; total of stations all reports received, 555.

Q. About what percent of the service stations in Detroit sent in these questionnaires which you received at Ann Arbor?

A. Between 22 and 23 percent.

Q. From your experience in conducting the cost surveys by the questionnaire method, is that a high or a low return?

A. It is a very high return.

Q. What is your opinion regarding the accuracy 1013 of the cost survey, conducted by the questionnaire method, in so far as such accuracy is affected by the percentage of units, unit stores or stations sending in returns; that is, is 20 percent big enough representation to give reliable results, or would a lower or higher figure be better?

A. A lower figure, in my opinion, would give fully as accurate results. A higher figure is always preferable because it tends to create greater confidence. However, by a random sampling process I proved to my own satisfaction that a much smaller number of returns would have been entirely accurate and satisfactory.

Q. You mean by random sampling process of these returns?

A. That is correct.

Q. And were the results upon such a random sampling process substantially the same as by using all of them?

A. That is correct.

Q. Did you make separate computations of the retail selling cost of the service stations located in the various districts; that is, each of these five districts in Detroit that you have described?

A. I did.

Q. How much variation, if any, was there between the result for the different districts?

A. The variation in the average results of the average was two-tenths of one cent.

1014 Q. That is between the highest and the lowest?

A. No, four-tenths of one cent between the highest and lowest, two-tenths from the average in either direction.

Q. Do you mean that no one district varied more than two-tenths of a cent from the average?

A. That is correct.

Trial Examiner Ballinger: I understood you to say that four-tenths percent was the extreme variation.

The Witness: Of the average in these districts.

Trial Examiner Ballinger: Yes.

The Witness: Yes.

Mr. Austin: Well, my understanding was that the witness stated that two-tenths of one cent was the variation of any district from the average, but any district might have been two-tenths above the average to two-tenths below, so that the variation between the highest and the lowest district, there was four-tenths of a cent, but that no one district was two-tenths of a cent off the average; is that correct?

The Witness: That is right.

Trial Examiner Ballinger: That is what I understood him to say.

By Mr. Austin:

Q. In your opinion, Dr. Taggart, were the mechanics of this survey and its coverage and representation of the accounting procedures and methods used such as to
1015 produce reliable and conservative results as to the retail service station cost of selling gasoline in Wayne County, Michigan?

A. Yes.

Q. What conclusions as to the retail selling distribution cost of gasoline in Detroit did you reach as a result of your computations upon this survey?

Mr. Hanley: Just a moment, Doctor.

Is that intended to elicit what average cost the Doctor arrived at?

Mr. Austin: Yes.

Mr. Hanley: May I inquire, Your Honor, what is the status of the record in relation to this statute which was offered by the Government, section 282, wasn't it? Has that been excluded definitely?

Trial Examiner Ballinger: I do not recall.

Mr. Austin: If Your Honor please, that was offered in evidence, and Your Honor reserved the ruling on it. I believe I stated at the time that I thought it might have some relevancy as to a background for the survey. I think that perhaps the easiest thing will be for me to withdraw that offer because I am not approaching that survey from this angle at all. I am inquiring of Dr. Taggart, as an expert, and asking him—having qualified him—for his expert opinion on what he did, and I am not offering this testimony, nor will I offer the survey
1016 as in any way binding or relevant because of anything done under section 282 of the Acts of Michigan of 1937.

Trial Examiner Ballinger: The offer of that exhibit which was marked for identification is withdrawn.

Mr. Hanley: Now, as to this question, Respondent objects as follows:

Testimony sought to be elicited and the survey are irrelevant, incompetent, and immaterial, and impertinent to any matters in this litigation; that no adequate foundation and no foundation at all has been laid for the reception of the testimony; the same is not binding upon and is prejudicial to the Respondents; that it is an unwarranted and prejudicial encumbrance on the record; that it is unauthorized and not contemplated by any law under which Respondent is here charged; that if the purpose of the offer is to establish average cost of retailing gasoline in Detroit it is de hors the Robinson-Patman Act and is worse in that it is expressly contrary and antagonistic to the terms of the Robinson-Patman Act, which expressly makes material only the specific individual costs of Respondent in marketing; that if offered with a view to establishing or fixing prices in any manner, it is wholly outside the issues in this case, and invades a province ultra vires the powers of the Federal Trade Commission, and is not only unauthorized by the law under which this action is brought, but is directly derogatory of and offensive to such law;

that if offered for any purpose other than to establish
1617 average gasoline retailing costs in Detroit it is inherently incompetent for any such purpose, it now appearing from the testimony of the witness that the survey was and is exclusively concerned with such average costs determination and with nothing else; that if offered to make a comparison of the cost of any retail dealer, such comparison would not only be incompetent and immaterial but fails completely for the reason that no witness advanced by the Government has testified, and no evidence has been adduced, as to cost of any retail dealer; that if offered to prove average retail cost it is competent not only as offensive to the Robinson-Patman Act but because it now affirmatively appears that Respondent is not engaged in gasoline retailing operations in Detroit, and the only cost that is material under the law involved herein is the individual cost of Respondent in its sales to resellers of gasoline; further, that as to the survey itself, as to the testimony of this witness relative thereto, and as to the answer now sought to be elicited from the witness, it affirmatively appears that the survey and the results predicated thereupon is or are an indistinguishable inseparable conglomerate and composite hearsay, conjecture and transaction interalios than Respondent or any buyer specified

in this action; that it assumes to arrive at a so-called average cost totally unrelated to the actual individual cost of any dealer; that it is ineffective and insufficient to 1018 arrive any reliable average cost even if such were useful in this litigation, which it is not; that it fails to give any consideration at all to some essential element and factors involved in cost and as to other elements and factors it gives inadequate and erroneous consideration; that it does not appear that it was prepared from any adequately kept or complete records of the operations of the relatively few dealers who are assumed to be covered, or that the reports made by such dealers were complete, accurate, or competently made, or that they even substantially reflect the true costs of such dealers; that it does not appear that the computations and conclusions on the dealer reports were made by anyone familiar with the authenticity or accuracy or value of such material; that different factors and items were used in the case of some dealers than were used in respect of others, and that the so-called average is a resultant including of incomparables; that the coverage of the survey was inadequate and failed to provide opportunity for all retail operators to report their records; that the number of reports made by retailers was wholly inadequate in relation to the total number of retail outlets; that the number of reports and degree of coverage fails to reflect a fully representative cross-section of the retail business either from the standpoint of the number of outlets covered or the amount of gallonage involved, or the geographical area contem- 1019 plated, or with respect to the economic differences and functions involved in the varying character and types of retail outlets; that the survey makes no distinction between the classification of the many divergent and varying types and methods of retailing; that the survey purports to have been made in the middle of 1938, nearly 3 years ago, and is thus incompetent in point of time and there is no showing that conditions have been and now are substantially comparable, or comparable at all; that the survey assumes to cover a geographical area other and different than the area involved in this litigation; that the calculations employed in the survey involve arbitrary and dogmatic formulae at times applies to incomparable sets of factors and resulting in a purely arbitrary and forced uniformity; and that improper values and weights are

given to certain factors, and that any computation designed to arrive at an average must necessarily carry into such average arrived at any fundamental error which exists in the premises; that it does not appear that the alleged average cost asserted in the survey equals or even approximates the actual cost of any single retailer in Detroit or in the area covered now or at any time of the survey; that it affirmatively appears that the average arrived at by the method disclosed has inherent in it a necessary lack of coincidence with the actual costs of any given dealer; that the survey is particularly objectionable
in this case not only because it does not purport and
1020 cannot purport to give the actual costs of respondent,
or of any of the four denominated buyers in their operations, but because it does not appear that such operations, or any of them, were even considered in arriving at the average cost in the survey; that even if the survey were properly directed in point of time geographically, numerically, and representative coverage, and if its results were bottomed on sound predicates and acceptable accounting costs and allocation principles, none of which this survey is, it would still be impertinent in this case for the reason that the very fact that it deals with an over-all average cost precludes its competency to establish an actual individual cost of a specified business or of Respondent involved in this litigation, which latter is the only pertinent cost here; that hence this survey is useless in this case and is without probative value on any issue herein; and that likewise any answer that might be elicited from this witness as to his conclusion, as to what the average cost of selling gasoline at retail in Detroit or in Wayne County, whichever it may be, in the year 1938, is equally valueless and useless, and without any probative value in this action, and not binding on this Respondent.

Trial Examiner Ballinger: Have you concluded, Judge?

Mr. Hanley: That is all.

Trial Examiner Ballinger: Counsel's all-inclusive
1021 and exclusive objection is overruled.

Mr. Austin: Will you read the question, please?

Trial Examiner Ballinger: Read the question.

(Question read.)

A. My conclusions were as follows: First, that the average cost of retailing a gallon of gasoline in Wayne County was 4.8 cents; secondly, that the cost of selling gasoline tends to vary inversely with the number of gallons sold in a given period; third, that there seems to be a rather definite lower limit to the cost of selling gasoline per gallon, which limit is in the neighborhood of 3 cents; fourth, that the average cost of selling gasoline by the stations which were most efficient in that they sell within the lowest 25 percent in unit cost, is 3.5 cents per gallon; fifth, that factors other than gallonage sold, such as location within the county, status of ownership, and proportion of gasoline business to total business done have had no appreciable or determinable effect on the unit cost of selling gasoline.

Mr. Austin: If Your Honor please, I think that I would like to make a very brief statement for the purpose of this survey in view of the long statement which has been placed on the record by Judge Hanley, not in relation to his objection, but simply to clarify for the record the purpose for which this evidence is being offered.

Trial Examiner Ballinger: You may proceed.

1022 Mr. Austin: I will make it very brief.

Trial Examiner Ballinger: You may proceed. Off the record.

(Short statement off the record.)

Trial Examiner Ballinger: Proceed.

Mr. Austin: This testimony is offered as a part of the Commission's case in proving the effect upon competition by discrimination in price, by the Respondent, which I believe has been proved, and, in fact, has been admitted as to the difference in price charged to different customers. The foundation for this testimony has been laid by the introduction in evidence in Detroit of the price which service stations in Detroit, particularly the Standard Oil Service Stations, and also some others, have paid for gasoline, particularly during 1937, 1938, and 1939, at the time when this survey was compiled. Furthermore, by showing the prices at which gasoline was sold by Ned's Auto Supply Company, Citrin-Kolb Oil Company, and other customers of the Respondent who received a lower price, paid a lower price for their gasoline than was paid by other retail stations served by the Respondent, so that in determining whether or not a retail service station could sell gasoline at a profit for the service station and meet the price which was being charged by Ned's Auto Supply Company, for example, it is important to know what the

retail cost of selling gasoline is; in other words,
1023 several service stations, quite a number of them,
testified they, at certain times during ~~1938 in particular~~, they ~~reduced their price 2~~ cents a gallon to meet the price being charged at that time by Ned's Auto Supply Company and by some Citrin-Kolb station. It is therefore very easy to determine in the light of Dr. Taggart's testimony whether they could make a profit after reducing that price; or, in other words, if meeting the competition they were not selling gasoline at a loss, and that is the purpose of this testimony, because, if in order to meet that competition they had to take a loss, I think that brings out discrimination in price which is alleged in the complaint. In other words, it is one link—this evidence is one link in the chain of evidence, which we believe builds up a complete showing of injury to competition resulting from price discrimination.

Trial Examiner Ballinger: The Examiner had in mind the facts stated by counsel when he overruled the objection to the question.

Mr. Hanley: I do not know that it is necessary, Your Honor, but perhaps to be cautious I should say that I have no doubt, of course, that the purpose of Mr. Austin in offering this testimony is just as he has now stated, but the Respondent, of course, takes a view, and must necessarily proceed on the view that the material is in evidence
and may be used for any purpose that the Commission
1024 and the Examiner might find it useful for. Of course,
we do not concur in the statement of Mr. Austin at all; do not propose to be bound by it.

Trial Examiner Ballinger: The Respondents will not be bound by the statement of Counsel for the Commission.

We will take a recess for 5 minutes.

(There was a short recess taken.)

Trial Examiner Ballinger: Come to order, gentlemen. Proceed.

By Mr. Austin:

Q. Dr. Taggart, I believe you stated a moment ago that upon your survey you reached the conclusion that the average retail station cost of selling a gallon of gasoline in Wayne County in 1938 was not less than 4.8 cents per gallon?

A. That is correct.

Q. Did you make a separate computation for the City of Detroit upon the returns from stations that were located in the City of Detroit alone?

A. I did.

Q. What was the result as to unit cost for the City of Detroit?

A. The average unit cost for the City of Detroit was 4.8 cents.

Q. And did you make a similar computation for the stations reporting for Wayne County outside of Detroit?

1025 A. I did.

Q. What was the result there?

A. The average unit cost of selling gasoline in the stations reporting from Wayne County outside of the City of Detroit was 4.6 cents per gallon.

Mr. Austin: I would like to have a document marked for identification, if Your Honor Please, as the next Commission's exhibit.

Trial Examiner Ballinger: The Reporter will mark the document Commission's Exhibit 76, for identification, the document containing 25 pages.

(The document was marked for identification "Commission's Exhibit 76.")

By Mr. Austin:

Q. I show you Commission's Exhibit No. 76, for identification, and ask you if you can describe that document.

A. This is a copy of report prepared by me as a result of my survey of the cost of retailing gasoline in Wayne County, Michigan.

Trial Examiner Ballinger: Is that a carbon copy?

The Witness: It is made by a duplicating process, which is ordinarily described as dittoing.

Trial Examiner Ballinger: It is made from the same stencil that the original is made from?

The Witness: Oh, yes.

1026 By Mr. Austin:

Q. Did you have this particular document prepared?

A. Yes.

Q. Where was it prepared?

A. In Ann Arbor.

Q. Does this document marked Commission's Exhibit 76, for identification, contain a complete and accurate statement of the mechanics—well, I will remove the word "complete."

I will change that and ask you whether this document contains an accurate statement and description of the mechanics of the survey which you have described, of the coverage and representation of the survey, of the accounting procedures and methods used in the survey, of the results of the survey, and of the conclusions which you have already stated on the record?

1027 A. It does.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. Is this a report which you prepared upon your own volition?

A. Yes.

Q. For what purpose was it prepared?

A. It was prepared simply as a report of the results of my survey. I had it copyrighted with the expectation of protecting my rights and interests in the results of the survey.

Mr. Austin: I am not going to offer that in evidence at this time, if your Honor please, but I simply desire to have it marked and identified in case it may seem desirable to offer it later.

The purpose of the questions I have asked has been solely for the purpose of identification and description for laying the basis for offering it, but I do not feel that it is necessary to encumber the record with that document at the present time, in view of the fact that the conclusions reached by the witness have already been stated on the record.

Mr. Hanley: May I ask you if that is Wayne County Survey, the 555 stations, Mr. Austin?

Mr. Austin: 555, and a total of 489 returns were

1028 used in making the computation, 555 is the number of returns which the witness stated he received.

Mr. Hanley: 555 and 489?

Mr. Austin: That is right.

By Mr. Austin:

Q. Dr. Taggart, in the course of the survey did you direct any special attention to service stations which reported exceptionally low costs, and by exceptionally low costs I mean below 3½ cents a gallon, in order to determine whether such low costs of those particular stations were typical of their annual business, or were the results of unusual conditions during May, 1938?

A. I did.

Q. Just what check or analysis did you make of those stations, and how many of them were there?

A. There were 30 such stations, and we took the average gallonage of those stations for the first 5 months of 1938, and compared it with the gallonage for the month of May, 1938, in order to discover whether there was anything about the month of May as such which brought about this extraordinarily low cost, and in doing that, the cost was divided by the average gallonage for the 5 months as well as by the gallonage for May, and as the result these 30 stations whose costs for May are included in the survey, averaged 3.1 cents, their cost as found by the alternative procedure averaged 3½ cents.

1029 Q. How many of the 489 stations included in the survey computations reported a distribution cost unit cost of less than 3 cents a gallon for May, 1938?

A. 7.

Q. Did you make any particular analysis or study of the cost figures for those stations?

A. In each one of those stations we went through the procedure just described, namely, dividing the costs and their monthly operating costs by the average gallonage for the first 5 months of 1938. In every case but one the resulting unit cost from that computation was 3 cents or higher. We also in the case of each of these 7 stations went to the stations themselves, that is, they were included in the field check which we made in order to make sure that the figures which they had reported were correct.

Q. What relationship did you find upon your field check as to the relationship of the May gallonage of these 7 stations compared with their normal gallonage for the 5 months or the year and a half preceding?

A. In general it was substantially higher.

Q. You mean the May gallonage was higher?

A. Yes, the May gallonage was substantially higher; in the case of the lowest cost station, for example, the gallonage in May was approximately 100 per cent higher than it had been in any month for which this station had 1030 reported.

Q. How many of these 7 stations showed a substantially higher gallonage for May than their average for the year up to that point?

A. All of them.

Q. Wouldn't that be generally true that most stations would sell more gasoline in May than they sold in January, February, March or April?

A. Month by month, yes, that is true, as far as our—the figures which we obtained show.

Q. Well, then, why were these stations different, in what way were they different, if they were different, from the trend of the other stations for which the average had been made up?

Trial Examiner Ballinger: Read the question to the witness.

(Question read.)

A. The only difference which I could state is that their May gallonage was higher than their 5 months' average to a greater extent, to a greater degree than was true of the general run of stations as we found them.

By Mr. Austin:

Q. Do you have any specific figures as to the degree which the May gallonage increased on any of these 7 stations, compared with their average for the 5 months?

1031 A. One station, May gallonage was more than twice as high as its average gallonage for the year to date, that is the station to which I referred a moment ago. The next lowest station, the gallonage was 22.5 per cent higher than the average gallonage for the year to date.

Q. Did the average gallonage include May?

A. Included May, yes.

Mr. Hanley: Please let the record show that the witness is now referring to Commission's Exhibit No. 76 marked for identification, and has heretofore in many of his answers referred to the same exhibit.

Trial Examiner Ballinger: The record will so show.

Mr. Austin: I believe that is all I have on direct.

Trial Examiner Ballinger: Do you rest in chief?

Mr. Austin: Yes.

Mr. Hanley: At this time the respondent moves that Commission's Exhibit received in evidence, No. 75-A, 75-B and 75-C, being the questionnaire identified by the witness, be stricken on all of the grounds and for the reasons included in respondent's objection to the question immediately preceding the witness' testimony as to his conclusions reached on this survey, and for the additional reason that it now affirmatively appears from the testimony of the witness that such conclusions were based upon a survey in Wayne County as indicated by Commission's Exhibit for identification No. 76, and to which exhibit

1032 the witness referred in giving his conclusions in answer to the question objected to, and it affirmatively appearing that such survey pertains to Wayne County as distinguished from the City of Detroit and the area involved in this litigation.

Trial Examiner Ballinger: The Examiner inquires, what is the Commission's Exhibit 76, to which you referred?

Mr. Hanley: Exhibit 76, Commission's Exhibit, this last document.

Trial Examiner Ballinger: The motion is denied.

Mr. Austin: If your Honor please, may I ask one more question before the judge proceeds?

Trial Examiner Ballinger: You may.

By Mr. Austin:

Q. Dr. Taggart, in stating your conclusions based upon this survey you stated that there seems to be, or perhaps you said that there is a rather definite lower limit to the cost of selling gasoline per gallon which limit is in the neighborhood of 3 cents per gallon. Now, I would like to ask you whether that conclusion is based upon all of Wayne County or only upon the City of Detroit, and if upon the former whether there is any difference in the lower limit for the City of Detroit, in your opinion, and as determined by your survey computation and investigation?

A. The conclusion as stated in the exhibit is based—

1033 Q. There is no exhibit in evidence. I am just asking you your conclusion.

A. Oh, pardon me. The conclusion as stated is based on the survey both in the City of Detroit and in Wayne County as a whole.

Mr. Hanley: That is the—excuse me, that is the 3 cent minimum cost?

Mr. Austin: Yes, that is right.

By Mr. Austin:

Q. Did you make any separate report or compilation similar to Commission's Exhibit 76 for identification for the City of Detroit alone?

A. I did.

Q. As to the 3 cent minimum, did you reach any similar conclusion in the report for Detroit?

A. Exactly the same conclusion.

Q. One more question.

Can you tell me, Dr. Taggart, the geographical limits of Wayne County, or how much there is of Wayne County outside the City of Detroit? I do not want the geographical limits, but I want to know what towns, territories, or how much there is outside Detroit, for instance, I know it includes Hamtramck, and Dearborn, is that correct?

A. It includes Hamtramck, and Dearborn, and Highland Park; well, it includes a village, I think by the name of Flat Rock, Plymouth also, was that mentioned?

1034 Trial Examiner Ballinger: The Examiner would suggest that if that is material it can best be illustrated by a map.

Mr. Austin: Well, I won't pursue it further.

Trial Examiner Ballinger: And not have any guessing.

Mr. Austin: We have had testimony in this record regarding Dearborn at least, and I only wanted to bring out that Dearborn is in Wayne County. Beyond that I won't attempt to proceed.

Mr. Hanley: Have you finished now?

Mr. Austin: That is all.

Mr. Hanley: Your Honor, do you wish me to proceed at this time?

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

The hearing will stand in recess until 1:15 o'clock p. m.

(Whereupon, at 12:20 o'clock p. m. a recess was taken until 1:15 o'clock p. m.)

1035 Afternoon Session, 1:15 P. M.

Trial Examiner Ballinger: Come to order.

HERBERT F. TAGGART resumed the stand and testified further as follows:

Cross-Examination by Mr. Hanley.

Q. Doctor, you have been professionally engaged in accounting since about 1920; is that right?

A. Yes; accounting broadly defined.

Q. You are a general accountant as well as a cost accountant?

A. Oh, yes.

Q. Indeed, you are a certified public accountant, are you not?

A. That is correct.

Q. But, as I understand, you have specialized in cost accounting for a number of years, have you not?

A. That is true.

Q. Now, you made some reference to having given particular attention to what you characterized as distribution cost accounting. What do you mean by distribution cost accounting, Doctor?

A. The cost of selling goods, getting them into the hands of consumers, as opposed to the cost of manufacturing goods.

Q. Now, related particularly to the marketing of gasoline, what would distribution cost accounting
1036 mean?

A. Distribution cost accounting?

Q. Yes, sir.

A. It would be accounting for the costs beyond the refinery.

Q. That is to say—

Trial Examiner Ballinger: Pardon me. Off the record.

(Discussion off the record.)

By Mr. Hanley:

Q. Well, does it mean an allocation of the costs of marketing gasoline after it gets into the hands of the marketers from the refiner?

A. Not necessarily.

Q. In relation to gasoline.

A. It would include such distribution costs as the refiner himself might have, plus such costs as any jobber or wholesaler who handled the gasoline might have, plus such costs as the retailer might have.

Q. Well, in relation to the average cost which you had found for the retailing of gasoline in Detroit and vicinity, is that all of the costs that you distribute to gasoline marketers?

A. It is not all of the costs of marketing gasoline.

Q. What else is there?

A. Such costs as the refiner has and such costs
1037 as the jobber or wholesaler, if there is one—such costs as he has.

Q. You gave no consideration to those costs in this particular survey, as I understand it?

A. That is correct.

Q. I understood you to say that you made this survey because you were interested in it and interested in the laws which provided for surveys of this character; is that right?

A. That is how my connection with it originated, yes.

Trial Examiner Ballinger: I did not get the answer.

The Witness: That is how my connection with it originated.

By Mr. Hanley:

Q. Is it not true that you made this particular survey with particular reference to a law of Michigan known as Act 2-8-2 of the Public Acts of Michigan for the year 1937?

A. That is correct.

Q. And, indeed, that appears on the questionnaire, Commission's Exhibit No. 75-A, does it not?

A. That is true.

Q. Do you know Mr. Rankin P. Peck?

A. Yes, sir.

Q. Who is he, Dr. Taggart?

A. He is the executive director of the Retail Gasoline Dealers Association of Michigan.

1038 Q. Was it he who made the deal with you to proceed with this survey and make your report?

A. He was the principal one with whom I had dealings in connection with the survey, yes.

Q. And was it to him that you looked for your compensation?

A. Not to him personally. I looked to—

Q. I am not referring, Doctor, to where the money may have actually come from, but I am referring to the arrangement you had.

A. It was to him that I addressed my bills.

Q. I see.

And did you understand that he was representing this organization of dealers?

A. Yes.

Q. Was it your understanding at the time that the purpose in making this survey was to form the foundation of actions at law brought under Section 8 of Article 2-8-2 of the laws of Michigan for 1937?

A. Yes.

Q. And, in fact, certain prosecutions were instituted, were they not, to your knowledge?

A. They were.

Q. And you testified in some proceedings, didn't you?

A. That is true.

1039 Q. Now, you have stated that it was not feasible to make this survey other than by what you have characterized as the questionnaire method. Why?

A. Because it would take too long a time and be much too expensive.

Q. A matter of convenience, then?

A. A matter of practical necessity.

Q. Well, do you mean by that that it could not be done otherwise than by questionnaire?

A. Oh, it could be done by other means than the questionnaire if the conditions were suitable.

Q. As an accountant and an economist, Doctor, would you regard it as a more satisfactory method if you or someone qualified to do so were to have made a personal field survey of the records and data that form the foundation of your report?

A. Certainly, providing it would have been possible for him to make as wide a coverage.

Q. But for practical reasons you regarded that as not feasible, and you adopted the plan of using a questionnaire?

A. That is correct.

Q. Now, as I understand you, those questionnaires were distributed by individuals who were introduced to you by Mr. Peck; is that true?

A. That is true.

Q. How many were there?

A. There were approximately 40 districts, and
1040 one individual was put in charge of each of the
districts into which the county was divided.

Q. Do you remember any of those individuals now?

A. No.

Q. Did you meet them all?

A. I met them all as a group.

Q. Did you give the instructions to which you have testified to each of those individuals?

A. I gave them as a group.

Q. What were they? What was their business?

A. These individuals?

Q. Yes, sir.

A. Most of them, I was told, were gasoline dealers.

Q. From where?

A. Detroit and vicinity.

Q. You were told that?

A. Yes.

Q. By whom?

A. Mr. Peck.

Q. You did not know any of these people individually, I take it?

A. No.

Q. Did you ever see them after that one meeting?

A. Not to know who they were.

Q. Now, if I understand correctly, Mr. Peck
1041 arranged for a meeting and had in attendance some
40 persons, and you addressed those 40 people, giving them certain instructions as to how they were to distribute the questionnaires in Wayne County; is that true?

A. That is correct.

Q. And that is the only time you ever saw those individuals in connection with this matter?

A. So far as I know, that is true.

Q. Later you got back certain filled-out questionnaires through the mail?

A. That is correct.

Q. And you assumed that all were signed by these 40 individuals who distributed the questionnaires to dealers in the Detroit area?

A. I have the records which they prepared in the course of distribution. I have every reason to suppose that is correct.

Q. Well, they did not tell you that. You never saw them, did you?

A. No.

Q. But you did get questionnaires back?

A. That is correct.

Q. And you did get some kind of a statement from each of these 40 people—or did you?

A. I did.

Q. From all of them?

1042 A. Yes—a written statement.

Q. And just what kind of a statement was that?

A. I do not remember the precise wording—I am sorry that I do not have one of the sheets with me—but it was to the effect that they had covered all of the stations in their area, and they signed their names. In each case the primary distributor was accompanied by an assistant, in some cases his wife, in some cases an employee, and in some cases another gasoline dealer, and both of these individuals signed the statement.

Q. So, from your own knowledge, Doctor, you do not know who distributed these questionnaires, do you?

A. I did not see them distributed personally, no.

Q. You do not know whether it was the man addressed at the meeting, or whether it was his wife, or an employee?

A. Not of my own knowledge.

Q. You do not know what he said to the dealer to whom he handed the questionnaire, I suppose?

A. Not at all.

Q. Do you have those statements that were submitted to you by the distributors of the questionnaires?

A. I have them, but not here.

Q. All of them?

A. Yes.

Q. And how many would you say there are?

1043 A. Well, there was at least one sheet from each of the roughly 40 districts, and most districts had more than one sheet, perhaps, oh, 5 or 6 sheets in some cases. I do not know how many sheets that makes.

Q. Well, in the absence of that data, Doctor, just what was the nature of the information that was given to you on these reports made by the persons who distributed the questionnaires?

A. The sheets were specially printed and ruled for the purpose, containing a column for the date on which the questionnaire was distributed, and the hour at which the particular station was approached, and the name by which the station was known as, such as Ed's Service, or whatever it might have been, and the brand of gasoline sold at the station, and a space for the signature of the person receiving the blank, and also a space for remarks. I recite that from memory. It may possibly have contained additional information.

Q. Did some of the distributors make remarks in the space provided on your form?

A. Very, very few.

Q. Well, in those instances where remarks were made, did you give consideration to them?

A. Not at all.

Q. You paid no attention whatever to any remarks that these people made?

1044 A. That is correct.

Trial Examiner Ballinger: What was the nature of the remarks?

The Witness: Well, there were very few of them, and I do not recall, as a matter of fact.

Trial Examiner Ballinger: Do you recall what the remarks pertained to?

The Witness: Insofar as I have my recollection of the remarks, there were a few instances where the recipient expressed some commendation of the survey, or the idea of having a survey, or some willingness to furnish his figures.

Trial Examiner Ballinger: Is that typical of the remarks that appeared on the documents?

The Witness: Well, so far as I recall any remarks at all. In almost all cases the remarks column was simply checked or nothing at all appeared there.

Trial Examiner Ballinger: I say upon those that did contain remarks were the remarks that you have outlined here typical of them all?

The Witness: I think so, yes. As my recollection goes, that is true.

Trial Examiner Ballinger: Excuse me, Judge, for breaking in.

By Mr. Hanley:

Q. You have testified, Doctor, that you gave con-
1045 siderable time to cost accounting work in connection of the NRA setup?

A. That is true.

Q. You wrote a book, did you not, entitled "The Cost Principle in Minimum Price Regulation," published in 1938 by the University of Michigan Press as volume 8, No. 3? If you want to look at it (handing a book to the witness)—

Trial Examiner Ballinger: Witness is examining the book.

A. That is true.

By Mr. Hanley:

Q. That had to do primarily with the discussion of cost accounting and the elements of cost accounting and the procedures that you believed were proper in the matter of cost accounting, did it not, Doctor?

A. For the purpose under discussion, yes.

Q. I will ask you generally, first, Doctor, if it is not true, in your judgment, that cost accounting is a thoroughly inexact science?

A. Cost accounting is not an exact science.

Q. You are not willing to go quite as far as the question.

Well, I refer you, Doctor, to page 4 of the book which was just identified, wherein you state:

"A realistic approach to the problem of enforcing prohibitions of sales below cost requires some method
1046 of indicating to those at whom the laws are directed what cost is and how it is to be ascertained. The term "cost" is not self-explanatory. Cost accountants themselves differ widely in their conceptions of cost, and it is hardly to be expected that lawyers and judges without accounting training will agree any more fully, unless definitions and rules for the ascertainment of cost have been set up in advance and unless these definitions and rules are sufficiently precise to be capable of being followed and sufficiently reasonable so that neither seller nor buyer is injured by being forced to abide by them."

Do you recall that statement?

A. (After examining the book) Yes.

Q. That was your opinion when you wrote the book, I take it, Doctor?

A. That is true.

Q. Is it still your opinion?

A. It is.

Q. You refer to the proposition that lawyers and judges will hardly be expected to understand these various methods of cost accounting. Is it not true that accountants themselves differ?

A. I do not think I said that lawyers and judges could not be expected to understand them.

Q. Well, without some definite rules.

1047 A. Well, with that modification.

Q. With that modification, of course.

A. I think that is probably true.

Q. Is it not true that accountants are in the same fix as lawyers and judges without that qualification?

A. Well, yes, although I think accountants would tend to agree a little better.

Q. Do you think accountants agree?

A. No, not at all.

Q. Doctor, I am going to refer you to page 119.

Doctor, I am using the page numbers that appear in the brackets at the bottom of these pages.

A. Those are the correct pages.

Q. That is what I thought.

A. Yes.

Q. As follows:

"It is perhaps hardly necessary to restate the conclusion in the first chapter that any comprehensive effort to establish uniform methods of cost for purposes of forbidding sales below cost is bound to be a failure. To anyone who has examined the succeeding chapters, which point out specific problems and recount the extent to which these problems were not solved by the most earnest combined efforts of administration officials and industry representatives during the NRA period the reasons for this neg-
1048 ative conclusion will be plain. Simply put, the fact is that cost accounting does not consist of a set of fixed rules universally recognized and universally applicable. For one thing, cost accounting is too new a science—it is a long way from that degree of maturity which partially characterizes certain other branches of accounting. For another, and perhaps more important thing, trade and industry are far too complex to be neatly classified for the application of uniform costing rules, even if these could

be developed. The National Recovery Administration found the complexity of industry to be one of its most vexatious problems, not merely in connection with cost accounting, but for purposes of making wage and hour rules and all the other industry regulations."

Do you recall that statement, Doctor?

A. (After examining the book) Yes.

Q. Were you of that opinion when you wrote the book, Doctor?

A. I was.

Q. Are you still of the same opinion?

A. I am still of the same opinion.

Q. You have been of that opinion ever since 1938, have you not?

A. That is true.

Q. And were when you made this gasoline cost survey?

A. That is correct.

Q. I now call your attention, Doctor, to page 123
1049 of the book, wherein you state as follows—having to do with a discussion of provisions such as were contained in Section 8 of Article 282 of the Public Acts of 1937:

"This provision is intended to aid the prosecution of those accused of below-cost selling by making it necessary for the complainants to produce evidence of specific costs of the particular class of business complained of. It does not necessarily mean that such specific costs will be disregarded, but the defendant has to introduce them counter to the prosecution's evidence of 'average overall cost of doing business.' In other words, the burden of proof is placed on the defendant that he is not guilty; otherwise the prosecution would be forced to prove by the only evidence that is really pertinent, namely, specific cost, that the defendant is guilty. Thus if a defendant is not in a position to employ the accounting talent necessary to prove specific cost, he may be convicted on the basis of evidence that is not really germane to the proceedings. This provision was doubtless adopted because the law was found unworkable without it. 'Average overall cost of doing business,' it is needless to say, is seldom if ever a fair measure of the cost of selling particular commodities or transacting business with particular customers or in a given territory."

Does that appear, Doctor?

A. (After examining the book) Yes.

1050 Q. Were you of that opinion when you wrote the book, Doctor?

A. It was my opinion, yes.

Q. Has that been your opinion ever since?

A. That is true.

Q. I now call your attention, Doctor, to page 125 and page 126 of your book, wherein you are discussing particularly the Michigan statute under which you prepared this survey, as follows:

"In Michigan, especially, much reliance must be placed on this feature of the law"—referring, Doctor, to the provision authorizing a cost survey—"since both the trades affected offer exceptional difficulties in cost accounting and in both the science is in a highly undeveloped state."

Did you make that statement in your book, Doctor?

A. (After examining the book.) Yes.

Q. Were you of that opinion when you wrote the book?

A. Yes.

Q. Have you been of that opinion ever since, Doctor?

A. Yes.

Q. You believe it to be true, in respect of ascertaining the cost of selling gasoline, that there are exceptional difficulties involved?

A. So far as the individual dealer is concerned.

Q. Exactly.

1051 Now, on the same page, 126:

"In order to obtain the backing of public opinion the gasoline dealers point out evils which they claim result from price-cutting. They cite adulteration as having been forced on certain members of the trade in order to meet cut prices, and their implication seems to be that price-cutting is impossible without such practices. What objection can there possibly be to legislation which has the worthy object of eliminating these evils? The answer is two-fold: In the first place, the legislation may eliminate the good with the bad and prevent the public from gaining any advantage from efficient operation. At the same time it may destroy a strong inducement to efficient and inexpensive distribution techniques. In the second place, the law seeks to do by indirection that which should and presumably could be done directly."

Did you write that statement in your book, Doctor?

A. (After examining the book.) I did.

Q. Was that your opinion when you wrote it?

Mr. Austin: Your Honor, I fail to see the relevancy of that particular quotation to the witness' testimony regarding cost survey or cost accounting. It seems to me that has more to do with some economic desirability of the law against selling below cost.

I move that that quotation, if such it be, that has been
read by counsel for the respondent, be stricken from
1052 the record on the ground that it is irrelevant and
immaterial.

Mr. Hanley: Well, if there is any doubt in the Court's mind about admitting this, your Honor, I want to say now that I cannot prove everything in one question. This is the foundation.

Trial Examiner Ballinger: The Examiner is ready to rule.

Mr. Hanley: Sir?

Trial Examiner Ballinger: The Examiner is ready to rule on the motion.

Mr. Hanley: Very well.

Trial Examiner Ballinger: The motion to strike is denied.

Mr. Hanley: Is there an unanswered question?

(Last question read.)

A. It was.

By Mr. Hanley:

Q. Has that been your opinion ever since, Doctor?

A. It has.

Q. Now, adverting to page 123, on which you make the statement, which you have already seen, "In other words, the burden of proof is placed on the defendant that he is not guilty; otherwise the prosecution would be forced to prove by the only evidence that is really pertinent, namely, specific cost, that the defendant is guilty," you were refer-
ring there, were you not, Doctor, to these statutes,
1053 such as Section 282 of the Michigan Law under which
you prepared this survey?

A. That is true.

Q. And that is your view, is it not, that the only evidence of cost that is really pertinent is the individual cost in the case of any particular defendant?

Trial Examiner Ballinger: Judge, the statutes referred to were penal statutes, were they not?

Mr. Hanley: Yes.

A. I think perhaps that statement is broader than it should have been.

By Mr. Hanley:

Q. Have you changed your mind about it?

A. I do not think I changed my mind in any fundamental respect. Other evidence than the defendant's own individual cost has been made pertinent by statute.

Q. Oh, I understand, Doctor—

A. Or at least—

Q. —anything may by statute become pertinent. But as an economist and a student, I assume that you arrived at this conclusion, is that not true, irrespective of what statutes provide?

A. Furthermore, in addition to the fact that this has been made pertinent by statute, it is a fact that when one
is studying the cost of anything, be it steel or retail-
1054 ing gasoline, or what not, that evidence with regard
to costs generally, or cost of a group, is actually pertinent to arriving at some conclusions as to what the costs of an individual may be.

What I was referring to there was the fact that an individual who was accused under such a statute should, of course, be convicted, if at all, on the basis of the evidence of his own costs. However, the study of costs of others, if extensive enough—

Could I have a drink?

Trial Examiner Ballinger: Three minute recess.

(A short recess was taken.)

Trial Examiner Ballinger: Will you read the last part, please? I do not think he completed his statement.

(The record was read.)

Trial Examiner Ballinger: Do you care to complete that statement?

The Witness: The study of the costs of others, if extensive enough, is, in my opinion, sufficient to establish at least a prima facie opinion as to what the costs of the individual may be.

By Mr. Hanley:

Q. That is to say, Doctor, isn't it, that academically such a survey might establish something in the nature of an average cost?

1055 A. Oh, I think it will establish much better than that. Surveys are very commonly used for other purposes.

Q. Well, as an economist, and in the light of the statement which you have made on page 123 of your book, do you think that a conviction should be sustained on the basis of such an average cost as distinguished from the specific cost of the individual involved?

Mr. Austin: I object, your Honor, on the ground that that is directed to the question of how a conviction under the criminal statute should be obtained. Therefore, it has no relevancy. I object to that particular question.

Mr. Hanley: It goes to the witness' opinion as to the value of this type of survey.

Trial Examiner Ballinger: The objection is overruled.

The Witness: Would you mind repeating the question?

(Question read.)

The Witness: Would you mind letting me see the statement on page 123?

Mr. Hanley: Surely (handing a book to the witness).

Trial Examiner Ballinger: The question runs to the accuracy of the results obtained?

Mr. Hanley: Right.

A. I do not think any respondent ought to be—or
1056 defendant ought to be found guilty on the basis of an
average cost.

By Mr. Hanley:

Q. Now, Doctor, directing your attention to Act 282 of the laws of Michigan for 1937, I assume you were thoroughly conversant with that law, were you not?

A. I was at the time of the survey, and looked at it recently.

Q. Well, you have studied that law and others of similar character?

A. That is true.

Q. Now, is it not your opinion, Doctor, that that law and others of similar character are in fact price fixing laws?

Mr. Austin: Your Honor, I am forced to object again, this time on the ground that he is talking about a statute which is not in evidence, and which was objected to. I believe if we are going to have questioning about that statement, that Respondent's counsel ought to offer the statute so that we will see what he is talking about; otherwise I object to the question as directed to a statute which is not in the record.

Trial Examiner Ballinger: The Examiner will hear from Judge Hanley.

Mr Hanley: If your Honor please, I am not asking these questions, of which there will be a series, with a view to bringing this particular Michigan law into the case, but rather to direct the attention of the Court and the 1057 witness to particular statements which this witness has heretofore made relative to cost accounting and with particular reference to serving the purposes of statutes of this character, and, indeed, of the character of the Robinson-Patman Act, if this type of evidence that has been received is deemed to be pertinent in an action of this kind.

I do not think that the Michigan statute as such is admissible in this case, and I do not propose to draw that into the proceeding. It is just necessary to refer to it, to give the witness and the Court a background, a foundation for the statements which the witness himself has made, which go to the value and weight and propriety of costing on the basis that this witness himself has undertaken to do cost accounting in the survey which your Honor has received in this case.

I again say I can not ask all of these questions in one question, but they all will clearly be pertinent on what I seek to show relative to the value and pertinency of this survey in this type of an action.

It may be that some specific question which I ask does not appear on its face to have that pertinency, but it is an integral part of the whole, and it fits, as will appear when I have concluded the examination. There is, of course, no purpose in asking these questions unless 1058 that is the result. So it is pointed to that pertinent thing in this case.

Mr. Austin: Your Honor, my objection was not directed to the question of relevancy, but was directed to the fact that when we talk about a statute of that character, it is meaningless unless we know what the statute is. I do not think we can refer to a statute and ask the witness about a statute when we do not know the character of the statute.

Mr. Hanley: If that is the difficulty, perhaps I can straighten it out very promptly by the witness, your Honor, and I will be glad to do that.

Trial Examiner Ballinger: It is very clear to the Examiner that the statute referred to is a penal statute. Prosecution under such a statute requires much stricter proof than it does in a civil proceeding such as we are now engaged in.

Mr. Hanley: Oh, I appreciate that.

Trial Examiner Ballinger: And on account of that, Judge, I have been a little bit in doubt about the admissibility of some of this evidence.

Mr. Hanley: Oh, but, your Honor, it is not a matter of procedure?

Trial Examiner Ballinger: I want to incorporate into this record everything that is material to the defence or to the case of the Commission.

1059 Mr. Hanley: Well your Honor, I am fully appreciative of the fact that when there is any doubt in the prosecution of a defendant criminally that the burdens of the prosecution are very much more stringent than they are on the government in a proceeding of this character.

Trial Examiner Ballinger: Yes, and a conviction can only be obtained where there is no doubt.

Mr. Hanley: That is right.

Trial Examiner Ballinger: It must be beyond a reasonable doubt.

Mr. Hanley: This has nothing to do with that. The frailties, if they exist in a survey of the type offered against us, exist in the quantum that they may exist. Now, true, that quantum of frailty may be entirely insufficient in a criminal prosecution. Your Honor might regard it as not a degree so unsatisfactory as to exclude it in a proceeding of this character, but no matter what the proceeding is, be it criminal or civil, the fact remains there is a degree of frailty or strength, as the case may be, in the survey.

Now, as to its admissibility or weight in a criminal proceeding as distinquished from a civil proceeding is not of interest to us here. We are entitled to establish exactly what the value and merit and weight of that survey is, and then it becomes your Honor's duty and that of the Commission, in the light of that testimony to give this 1060 survey such value as you deem proper. That is all we seek to do here.

Trial Examiner Ballinger: Read the question, please, sir.

(Question read.)

Trial Examiner Ballinger: Now, Judge—

Mr. Hanley: If your Honor please, I want to make one further statement, which will aid in clarifying my position. This morning Mr. Austin made a statement as to why he was putting this survey in the record. If your Honor will recall, the respondent reserved, or, rather, declined to make any concurrence in Mr. Austin's statement of purpose. That was done for the reason that Mr. Austin simply is not in control of what use your Honor or the Commission may make of that evidence. It is in. Now, you can make, the Commission can make, any use you wish that you think might be pertinent of the evidence. Now, I do not know what use might be made of that evidence. Clearly it could be used, as I propose to show, as this witness has himself said, as a price fixing setup. Now, we are entitled to qualify this witness' own conclusions by his own views as to what those conclusions mean and how they can be used, what they are worth, what they do.

Trial Examiner Ballinger: We are not interested 1061 here particularly in the question of price fixing, Judge; we are interested in determining or ascertaining what the reasonable cost of operation is, and—

Mr. Hanley: I appreciate that, your Honor, but this witness himself, as will be demonstrated by his own work here, which I have been quoting, finds that the effort to determine the very thing that this proceeding is designed to find and determine is arrived at, as he views it, through the medium of what are in effect price fixing statutes.

Trial Examiner Ballinger: I understand that the same medus operandi or method of procedure is probably employed in ascertaining cost of operation and in price fixing, and to that extent his testimony may be pertinent.

The objection is overruled. The witness may answer.

Mr. Austin: If your Honor please, I think we have gotten clear off the point here. I am ready to concede all Judge Hanley said in his last statement. But he is arguing about the relevancy of this testimony. I am arguing about the question itself. The question refers to statutes—to this and other statutes of like character. I submit that that question has no meaning unless we know what kind of statute we are talking about. I am not objecting to this question on the ground of relevancy—I rather assumed your Honor overruled me a while ago—but I say this question means nothing unless the statute is in.

1062 Trial Examiner Ballinger: Gentlemen, let us have the question read again.

(The question was read as follows:

("Q. Now, is it your opinion, Doctor, that that law and others of similar character are in fact price fixing laws?")

Mr. Hanley: I will say, your Honor, if there is any question about the type of law I am referring to, I will be glad to clarify that, if that is the objection.

Mr. Austin: Well, my objection is that you are asking a question about a statute and statutes of similar character and we do not know what you are talking about, and neither will the Commission.

Mr. Hanley: I will clarify that.

Trial Examiner Ballinger: The question is withdrawn?

Mr. Hanley: Yes, I will withdraw the question.

By Mr. Hanley:

Q. You have stated, Doctor, that you are familiar with Act 282 of the laws of 1937 of Michigan.

A. In a general way, yes.

Q. And you have made a study of similar laws in other states, have you not?

A. That is true.

Q. Is it not true, Doctor, that those laws generally 1063 provide a prohibition against selling below a merchandiser's cost?

A. Some of them are more sweeping than that. They provide against selling even below a manufacturer's cost.

Q. But practically all prohibit selling below the merchandiser's cost, do they not?

A. I think that is true.

Q. And some of them, at least, provide, do they not, for the admission in evidence of an average cost applying to the sale of the commodities under question as competent evidence of the defendant's cost?

A. I would not be sure about that.

Q. Well, is that true of the Michigan law?

A. No.

Q. Doesn't the Michigan law make it competent evidence; that is, a survey and an average cost?

A. It makes a survey competent evidence. It says nothing about average cost.

Q. Do other laws of similar character make surveys competent evidence?

A. They do.

Q. Would a survey develop anything but average cost, Doctor?

A. It would.

Q. Have you ever made a survey, Doctor, that 1064 developed anything but average cost?

A. Oh, yes.

Q. But you did not make that kind of a survey in connection with the Detroit situation, did you?

A. Oh, by all means.

Q. Did you?

A. Yes.

Q. That is not the survey which you have testified to here today, is it?

A. Certainly.

Q. Well, just explain that, Doctor. Have you testified to any individual operator's cost—

A. No.

Q. —selling gasoline in Detroit?

A. Well, I have the individual operator's cost.

Q. Do you know the cost of any individual operator in Detroit for 1938 or any time since?

A. Yes, I think so.

Q. Well, what is it and whose?

A. It would be necessary for me to refer to my records, of course.

Q. So what you arrived at out of this survey was an average from all of the reports you got from individual operators; isn't that true?

A. That is one of the things I arrived at.

1065 Q. Now, again, adverting to this type of statute, such as the Michigan law, is it not true that you regard such a statute as a price fixing law primarily?

A. No.

Q. All right.

I refer you, Doctor, to page 7 of the book, which was identified a few minutes ago, page 7 and page 8, and I will ask you if you did not make this statement:

"It is the contention of this writer that the working out of such rules in any complete sense is impossible and that, therefore, the rule against sales below individual cost is chimerical and incapable of enforcement. The inevitable result is the substitution, at the best, of loss limitation, as seems to have been done in California, or, at the worst, of price fixing, which was done under the NRA."

Did you make that statement?

A. (After examining the book.) That is right.

Q. Was that your opinion then?

A. It was.

Q. Has it been your opinion ever since?.

A. My opinion on that particular point has been somewhat modified by rather more intimate acquaintance with attempts at working out this kind of statute in Michigan.

Q. You have had something to do with working out a new statute in Michigan; is that right?

1066 A. Working out a new statute?

Q. Yes.

A. Oh, they have introduced a new law.

Q. You have had something to do with that, did you not?

A. I have attempted a meeting at which that law was discussed.

Q. Well, we will reach that in a moment.

Referring you to page 22 of your book, Doctor, did you not make this statement:

"Legislators have not been made aware of the fact that such methods of analysis are in their infancy and, even if developed, probably could not be used by the great majority of member's of distributive trades because of prohibitive expense. This fact does not disturb the proponents of the legislation, since what they want is not what the law calls for but either loss-limitation or price-fixing."

A. (After examining the book.) Yes.

Q. Was that your opinion when you wrote the book?

A. Yes.

Q. Has it been your opinion ever since?

A. In a general way, yes.

Q. On page 23 of the book:

"Code authorities gave some lip-service to the other advantages of cost accounting, and some of them were sincere in their desire to help to improve management 1067 generally, but the more usual attitude was one of callous disregard of the virtues of cost accounting excepting only as it might furnish a basis for minimum prizes. As one code authority official wrote, "Unless selling below cost can be established as a code offense, there is little value to a uniform cost finding method.""

Trial Examiner Ballinger: Judge, I would like to hear from you as to the applicability of that.

Mr. Hanley: Well, on the next page he gives his opinion about that, Judge.

Trial Examiner Ballinger: I know, but that all relates to the NRA.

Mr. Hanley: No, it does not. You will find that it relates to all statutes of this class, including, Judge, the R.-P. Act. If this is admissible under the R.-P. Act—of course, you understand, your Honor, that we say this is not admissible, but it is admitted. Now, being admitted, we are entitled to show the opinion as to its value of the very man that made it.

Trial Examiner Ballinger: The Examiner is admitting it subject to a motion to strike.

By Mr. Hanley:

Q. Was that statement made by you?

A. It was.

Q. And that was true at the time?

1068 A. That was true at the time.

Q. And still is true?

A. No.

Q. No?

A. That referred strictly—what you are reading there referred strictly to uniform cost accounting systems as provided by codes and developed under the NRA. It has reference to laws of the type that you and I have been talking about.

Q. I see.

Mr. Austin: In view of the answer, I move to strike the last question and the last answer.

Mr. Hanley: It may be stricken.

Trial Examiner Ballinger: Motion granted.

By Mr. Hanley:

Q. I call your attention to page 24, on which you state: "This feeling on the part of those interested in the establishment of minimum prices should give pause to accountants who may be tempted to take pleasure in the passage of laws forbidding sales below cost. The establishment of cost systems for this purpose is an unhealthy growth. Cost accounting is not primarily a price-making device."

Is that your opinion as of the time you wrote the book?

A. It is very true.

1069 Q. Is it your opinion now?

A. It is.

Q. Was it your opinion when you made this survey in 1938?

A. It was.

Q. I call your attention, Doctor, to page 71 of your book, on which you make this statement:

"Such were the problems of determining the cost elements which might properly be introduced into a uniform cost formula for purposes of preventing sales below individual cost under the NRA codes. Such problems must inevitably arise in any such program, although they are blithely disregarded by the proponents of such legislation. The reason for this freedom from worry may be that these people do not seriously expect that the law will actually prevent sales below individual cost. Their real aim is something else, and the difficulties of cost accounting have no bearing on this aim."

Did you write that?

A. (After examining the book.) I wrote it.

Q. Was that your opinion at the time?

A. Yes.

Q. Has it been your opinion ever since?

A. Partly speaking, yes.

Q. What is the real aim to which you refer?

A. The aim is, in general, as I have stated it in 1070 other places there, namely, a limitation of loss selling. It is a loss limitation law, which is quite different from a law prohibiting sales below cost, or—

Trial Examiner Ballinger: Different from what?

The Witness: Different from a law prohibiting sales below individual cost, or in some cases it may actually be that the aim is price fixing.

Mr. Austin: Your Honor, I do not want to be obstructive here at all, but there is no charge in the complaint of anyone selling below cost and there is no charge of price-fixing, and this sounds to me like an inquiry into what is necessary to establish either one or the other of those things.

I have stated on the record what this survey is for, and, whether I have stated it or not, it certainly can not be used on something that is outside the issues in this case.

I object to a continuation of this line of questioning on the basis of the economics of selling below cost of price fixing, unless either one of those things has some bearing on the question of price discrimination and price competition.

Mr. Hanley: Your Honor, I have only three more of these references and I will be away from this thing. And I must insist, no matter what the degree of good 1071 faith of Mr. Austin and his purpose in introducing this evidence may be, he is just out of control, and I do not know what it may be used for, and I am certainly entitled to meet it on the theory that it may be used for any purpose in this case. But, in any event, I have only three more of these and then I will be away from this. I do think I am entitled to prove it, and the quickest way to prove it is by question and answer. I can make an offer of proof.

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Doctor, I refer you to page 120 of your book, on which you make the statement:

"There is no doubt, however, that proponents of price legislation are willing to accept the apparently innocuous provisions against sales below cost, not because they believe that cost can be defined fairly and the rule enforced literally, but because they see in the rule a club with which they can force recalcitrants into line. The threat of prosecution may be even more effective than prosecution itself."

Did you write that, and was it your opinion when you wrote it, Doctor?

A. (After examining the book.) I wrote it. It was my opinion at that time.

Q. Has it been your opinion ever since?

1072 A. ~~My~~ opinion since that time has been modified somewhat.

Q. What has changed your opinion since you wrote this book, Doctor?

A. My experience with the Detroit gasoline situation very largely.

Q. With what?

A. With the Detroit gasoline situation.

Q. Just one survey?

A. Yes, largely.

Q. It is the only one you ever made, isn't it?

A. It is the only one I made under this type of law, yes.

Q. Did you ever make any other survey at all of the Detroit situation relative to the cost of retailing gasoline?

A. No, of course not.

Q. Then, this is the only one, isn't it?

A. It is the only one I made of that particular situation.

Q. And that is what changed your opinion?

A. Yes.

Q. Did you make that survey after you wrote that book?

A. That is correct.

1073 Q. I call your attention to the following page, No. 121, in which this statement appears: "Voluntary education in cost keeping, tedious, expensive and apparently unremunerative though it be, offers much for the alleviation of industrial ills, including those relating to prices. The same cannot be said, however, with regard to authoritatively imposed cost accounting. Not the least serious aspect of the situation from the standpoint of the cost accountant would be the blighting effect of authoritarian codification of costing rules on the development of the science."

Did you write that?

A. I did.

Q. Is that your opinion now?

A. It certainly is.

Q. One other reference on this topic and we are through, Doctor.

(Page 122 of your book: "Authoritative imposition of cost accounting, it must be remembered, would be aimed at one thing only—namely, pricing policies."

Did you write that?

Trial Examiner Ballinger: Judge, what is the relevancy of that statement?

Mr. Hanley: It will appear, Your Honor. I assure you it will appear.

Trial Examiner Ballinger: This is all being 1074 admitted subject to a motion to strike.

A. I made the statement.

By Mr. Hanley:

Q. Was that your opinion when you wrote it?

A. Taken in its context, yes.

Q. Is that your opinion now?

A. Yes.

Q. Your survey of the gasoline industry in Detroit, 1938, has not changed your opinion about that statement, has it?

A. Not taken in its context.

Q. Well, now, Doctor, after all these quotations relative to your views of what these statutes are, and what their effect is, do you want to say to the court that you have any different opinion than those expressed by the quotations that have been read to you, which you say were and are your opinions?

A. May I recast my opinion? I think it will agree substantially with those quotations.

Q. Well, that is what I asked you to do, Doctor, is to just answer that question.

A. My opinion, in general, of this type of legislation,
as represented by the Michigan statute, is not favorable,
and has not been favorable, and probably will not be as
a general public policy. Such legislation may—it can, in
some cases, degenerate into price-fixing legislation, but the
aim of those who sponsor it may, in some cases, be
1075 such an aim; on the other hand it is entirely con-
ceivable that such legislation, through wise adminis-
tration and intelligent handling, and a reasonable attitude
on the part of the parties, might contrive a good deal of
good.

Q. Will you agree that that is a very optimistic and idealistic viewpoint, Doctor?

A. It is optimistic.

Trial Examiner Ballinger: Judge, since when did the wisdom of the Robinson-Patman Act become injected into this case?

Mr. Hanley: I did not ask about that, Your Honor. The witness just gave his voluntary statement about it. I have not questioned it.

The Witness: I said nothing about the Robinson-Patman Act.

Mr. Hanley: He said he wanted to express an opinion. I said go ahead.

Trial Examiner Ballinger: He is expressing an opinion of laws along the same line.

Mr. Hanley: I have asked no questions about their wisdom, Your Honor. That just appears in the statement of the witness.

By Mr. Hanley:

Q. You stated, Doctor, that you have had something to do with consideration of legislation in the State of
1076 Michigan along the line of the Act of 1937—282.
Have you given it consideration since that became law?

A. Yes.

Q. Have you consulted with Mr. Peck and others about it?

A. I have.

Q. Have you advised concerning the provisions that should go into a law of that character?

A. I have.

Trial Examiner Ballinger: Judge, I don't want to interrupt you, but where is there anything relevant in the questions you are asking, relevant to any issue in this proceeding?

Mr. Hanley: Your Honor, I do not know whether it will become relevant or not, except I know it is relevant on this issue, irrespective of what use the Commission may make of evidence, it is relevant on the issue of the value of this type of a survey.

Now, that is the announced purpose of Mr. Austin in putting this survey in. However, if the Commission seeks to use this testimony for any purpose other than that which Mr. Austin offers it for, which concededly the Commission has a perfect right to do, then the Commission also is entitled to have before it the opinion of the value of that testimony of the man who gave it.

Trial Examiner Ballinger: This is not running to
1077 the value of his testimony. This is asking him for
opinions with reference to the wisdom of certain laws that have been enacted.

Mr. Hanley: No, not the wisdom. I have not asked him any question as to the wisdom.

Trial Examiner Ballinger: But the effect.

Mr. Hanley: The effect. I have asked him about the effect.

Trial Examiner Ballinger: The effect.

Mr. Hanley: Not the wisdom.

Trial Examiner Ballinger: But that is not the issue here.

Mr. Hanley: It may be in issue. I do not know what the Commission will do with this survey. If the Commission says, as a result of this evidence in this case, anything that prevents a recovery of at least 4.8 cents by a retail dealer is essentially wrong, then it becomes pertinent to establish what the effect of the modus operandi is in arriving at the 4.8 cent figure. Now, of course, I propose to get into the mechanics of that figure. This is purely foundation.

Trial Examiner Ballinger: Well, you do not contend merely because this survey was made under a law that may or may not have been, or may have been declared unconstitutional, that it strips it of whatever evidentiary value it would have had if it had been made wholly independent of such a law?

1078 Mr. Hanley: Oh, not at all. I do not think the law has a thing in the world to do with it, Judge, just as I said in Detroit in objecting to the law, I think the thing has to stand on its own feet, but—

Trial Examiner Ballinger: Whatever merit it has.

Mr. Hanley: But the attitude of this witness toward these laws, which he is working under, his expressed opinion as to their effect, and the effect of his work in a survey under those laws, that becomes important irrespective of the law itself. After all, he has undertaken to say that in the City of Detroit it costs 4.8 cents on the average to market a gallon of gasoline at retail. He says that was true in the summer of 1938; presumptively, and without any foundation, as we say, Counsel for the Government is going to urge that that is true today.

Now, we are entitled to show just what this witness, who arrived at that conclusion, really thinks of his own testimony. He arrives at it, how, because it is a matter under laws which he just has said he does not think are very good, and that is his opinion. I did not ask him that. He arrives at it under these laws, and he admits that he does not think that they achieve the result and effect that they are intended to achieve; that they have frailties, in other words. Now, we are entitled to do two things. We are entitled to show his familiarity with the laws them- 1079 selves, with their operation, and his familiarity with the mechanics of making the survey and applying it. All I want to do now is to ask him—

Trial Examiner Ballinger: The Examiner agrees with you as to that statement. The only question is as to the accuracy of the result obtained.

Mr. Hanley: That is right. That is the ultimate.

Trial Examiner Ballinger: That is the ultimate.

Mr. Hanley: Without any question, that is the ultimate, Judge, but in order to reach that ultimate we have to learn the value of all this foundational stuff.

Trial Examiner Ballinger: I appreciate that some of the testimony that you have offered from the witness' book has direct bearing upon that point, but now, when we get fully into these statutes, it seems to me that we are getting far afield.

Mr. Austin: And, Your Honor, I would like to state on the record, if I may, that the Commission can't do whatever they please with this testimony, as Judge Hanley has said. The Commission cannot use it for any purpose outside the issues of this case, and I still do not see that the witness' opinion regarding these cost accounting statutes, and so forth, have any relevancy on the issues of price discrimination and effect of price discrimination, which are in this case. The Commission can't just take testimony here and say, as Judge Hanley did, that if a service
1080 station can't make below 4.8 cents a gallon on a gallon
of gasoline that Respondent is doing something, some other thing, or engaging in some unfair method of competition, or fixing prices, or something—this case is brought under section 2 of the Clayton Act.

Trial Examiner Ballinger: Mr. Austin, have you adduced testimony from this witness with reference to the cost of selling gasoline in Detroit?

Mr. Austin: That is right.

Trial Examiner Ballinger: Upon that question Counsel for Respondent has a right to test this witness' knowledge of what he actually did in making this survey, and some of the statements that he made in his book may or may not have a direct bearing.

I am going to ask Counsel to confine his cross-examination so far as he reasonably can to the one question.

Mr. Hanley: I will do it better than that, Your Honor. I will just make an offer of proof. I am practically through on this phase of the matter, anyhow.

Off the record, Judge?

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: At this time, and in view of the objections of Counsel for the Government, the Respondent offers to prove on the cross-examination of the Witness 1081 Taggart that he is a proponent of, a consultant concerning, and an advisor in connection with the support of Senate Bill No. 186, introduced in the Michigan Sixty-first Legislature, Session of 1941, which is a revised law of the same general character as Act 282 of the Public Acts of Michigan for the year 1937, and I will leave this subject then.

Trial Examiner Ballinger: The tender is rejected.

By Mr. Hanley:

Q. Now, Doctor, coming down to this survey which you made more in detail, I refer you to page 180 of your book, in which you outline the requirements which are necessary in connection with a questionnaire such as you used. I wish to call your attention particularly to the statement wherein it refers to the geographical distribution.

You said—

Mr. Austin: I object to Counsel's statement that that book sets forth the requirements for a questionnaire such as that which was put in evidence today as Commission's Exhibit 75-A, B, and C, unless the witness will verify that statement.

Mr. Hanley: I will ask him.

By Mr. Hanley:

Q. Doesn't your book generally outline what, in your opinion, are the principal elements and requirements to be considered in making a survey such as you made 1082 in Detroit in the summer of 1938?

A. Let me see the book.

(Mr. Hanley hands the book to the witness.)

Mr. Hanley: It is all there, Doctor; that's where I have it opened is one place.

A. There is in the book an appendix C, so-called, which is entitled "Note on the 'Established Cost Survey,'" which was written prior to my making the Detroit survey.

By Mr. Hanley:

Q. Well, did you not make this statement: "The returns from the questionnaires must be sufficiently numerous and sufficiently varied as to guarantee that the result is a representative cross-section of the trade or industry in the area covered. This is the hardest requirement to fulfill. The representation must be adequate (a) numerically and from the standpoints of (b) geographical locations within the area (c) size of enterprise, and (d) economic characteristics of the enterprise."

A. That is correct.

Q. That was your opinion at the time, wasn't it?

A. Yes.

Q. It was your opinion when you made this survey in Detroit?

A. It was.

Q. Is it your opinion now?

1083 A. It is.

Trial Examiner Ballinger: Did this survey meet all of those requirements?

The Witness: It did.

By Mr. Hanley:

Q. Now, you testified, did you not, Doctor, in a case held on September 17, 1939, before Judge Donald Van Lyle, in Detroit, which case is entitled the People against the Chicago Dexter Service and others.

A. If that is the correct date, the information—

Q. I took the date from the transcript.

A. I do not remember the date.

Q. You remember the incident?

A. Otherwise I remember the case.

Q. Now, I am referring to this, Doctor, because I am not clear on what you did in the way of elimination of stations that may have been involved in this survey other than those in the Detroit area.

Do you recall testifying that there were about 80 stations reported from the County of Wayne?

A. Well, somewhat more than 80.

Q. How many more?

A. Oh, ten or fifteen, roughly; I do not recall the precise number.

Q. Probably this will help you: Do you remember 1084 this question and answer:

"Q. How many returns did you receive from the county outside of Detroit?

"A. My recollection is 93."

A. That is probably true, then.

Q. Is that your best recollection now?

A. It is within the limit that I stated.

Q. Now, you said this morning that you received returns from approximately 555 stations.

A. That is true.

Q. And of those you used how many?

A. 489.

Q. And that applies to the entire county of Wayne?

A. That is correct.

Q. Are you able now to give any more definite answer as to what is included in the County of Wayne than you were this morning, Doctor?

A. No.

Q. Well, it includes Detroit proper, doesn't it?

A. Yes, that is what I understand.

Q. It includes Highland Park?

A. Yes.

Q. Dearborn?

A. Yes.

Q. Hamtramck?

1085 A. Yes.

Q. Now, does it also include the several Grosse Pointe areas?

A. I think it includes some and excludes others, but I—

Q. There are four or five of them, are there not, Doctor?

A. Well, there are Grosse Pointe Farms and Grosse Pointe Shores, I believe, and—

Q. Well, now, does it include a number of suburban places out substantially from what might be regarded as the metropolitan Detroit vicinity?

A. Why, I should think perhaps the best example of that would be Plymouth, although the area is built up now almost clear out to Plymouth, too.

Q. Was it in 1938?

A. Well, pretty much.

Q. How far away is Plymouth from Detroit, downtown Detroit?

A. Oh, I could not answer that; 15 miles, I suppose.

Q. Have you any idea?

A. Fifteen miles, I suppose.

Q. You said something about a place called Flat Rock; maybe I am wrong about the name.

A. I think I mentioned that, and then I was not sure whether that was one of the villages in the county or not.

Q. Don't you know whether it was included in the survey or not?

1086 A. Oh, I could not tell you offhand.

Q. Do you know any other places?

A. I think it was; that is my recollection.

Q. Do you know any other places?

A. I believe Ecorse was included.

Q. In any event, Doctor, your Wayne County survey included more territory, substantially, that Detroit proper, Hamtramck, Dearborn, and Highland Park, did it not?

A. Yes, it did.

Q. Now, when you made your analysis in respect of Detroit, what did you do in the matter of eliminations from your Wayne County survey?

A. I do not understand the question.

Q. Did you not undertake to find an average cost for Detroit?

A. That is true.

Q. Did you not do that on the basis of your survey of Wayne County?

A. Of the survey of Detroit and the survey of Wayne County, were made simultaneously.

Q. It was all one survey, wasn't it?

A. No, in a very real sense it was two surveys.

Q. Well, just explain that, please.

A. Because it was necessary for purposes of the case under Judge Van Lyle, whose jurisdiction is solely 1087 in the City of Detroit, as I understand it, to make a separate tabulation of the figures for the City of Detroit.

Q. Well, that was done at the same time that you made the general survey, was it not?

A. Yes.

Q. That is, you never made a speech to these distributors but once, did you—I mean, distributors of the questionnaires?

A. Oh, no.

Q. And you never sent them out but once, did you?

A. That is true.

Q. And they distributed these questionnaires in Detroit and elsewhere in the County of Wayne?

A. Yes.

Q. That is one proposition.

A. That is very true.

Q. Now, when you got the returns back you made a report relative to Wayne County, did you not?

A. Well, I made my first report relative to the City of Detroit and the balance of Wayne County separately; that is two reports.

Q. But you did it—you made both reports on the basis of the returns that you got from the one distribution.

A. Yes, that is true.

Q. Now, the report—

Trial Examiner Ballinger: Judge, I haven't 1088 understood the witness to so testify.

Didn't I understand you to state that you arrived at your conclusion of the cost in Detroit from the questionnaires that were received, or responses to the questionnaires received from the operators in Detroit?

The Witness: That is correct.

Mr. Hanley: Well, I do not have any different understanding, I do not think.

By Mr. Hanley:

Q. Doctor, the point is, you did not make separate surveys of Wayne County outside of Detroit and of Detroit?

A. In a very real sense I did. The mechanics of the two surveys were necessarily combined for the purpose of economy.

Q. Well, that is what I say, you got all these returns, but you segregated Detroit out of Wayne County?

A. That is correct.

Q. Now, was that segregation of Detroit, the City of Detroit proper?

A. That is correct.

Q. It did not include anything but Detroit; is that right?

A. That is correct, as far as we were able to make sure.

Q. So you never made a segregation, did you, of an area which would be inclusive only of Detroit, Dearborn, Hamtramck, and Highland Park?

A. No.

1089 Trial Examiner Ballinger: We will take a recess for 5 minutes.

(There was a short recess taken.)

Trial Examiner Ballinger: Come to order, gentlemen. Proceed.

By Mr. Hanley:

Q. Doctor, on September 8, 1938, do you recall making a speech before the Retail Dealers Association of Michigan at the Fort Wayne Hotel in Detroit, at which time you reported the results of your gasoline cost survey?

A. Yes.

Q. Do you remember the incident?

A. I remember the incident.

Trial Examiner Ballinger: And it was approximately the time mentioned?

The Witness: Yes.

By Mr. Hanley:

Q. At that time did you announce to the audience whom you were addressing that the average cost of selling gasoline per gallon in Detroit was 4.8 cents, as you have testified here?

A. I presume I did.

Q. And did you at that time state that the cost of selling outside of the City of Detroit was 4.6 cents per gallon?

A. I presume there probably I did.

Q. That concurs, does it not, with your present conclusion?

1090 A. Yes.

Q. And as you have testified here?

A. It concurs with the conclusion in the survey.

Q. Now, that conclusion, and your present one, are based on the analysis which you made out of the 489 stations in Wayne County that you analyzed?

A. That is true.

Q. Now, how many of those stations were used in the computation of the average cost outside of Detroit resulting in the 4.6-cent figure?

A. Eighty stations.

Q. How many stations in Wayne County are there outside of the City of Detroit?

A. I don't know.

Q. Did you know then?

A. Approximately.

Q. How many did you understand that there were at that time?

A. Well, somewhere between five and six hundred.

Q. Now, I am referring to that area including all of

Wayne County and exclusive of the City of Detroit, Doctor; is that what you understand?

A. That is exactly what I am referring to.

Q. Do you regard 89 stations reporting as a satisfactory cross section of that number of stations upon

1091 which to base a conclusion as to the average cost of selling in Wayne County exclusive of Detroit?

A. You told me a while ago it was 93 stations.

Q. I didn't tell you, Doctor. I don't know, it was a conclusion you used.

A. You read it from something you had there to the effect that I had 9? stations which I presume was the case.

Q. Well, I will ask you now how many stations did you use outside of Detroit?

A. The ones whose costs were included in the computation were 80.

Q. Well, that is what I am getting at.

A. Well, O. K.

Q. Now, do you regard 80 stations as a representative cross-section from all of the various angles that you think the cross-section should be taken of from five to six hundred stations?

A: I do.

Q. Were you then, and are you now satisfied with that number of stations as being a fairly representative sample?

A. Of that number of stations, yes.

Q. Were those 80 stations distributed all over the area in Wayne County outside of Detroit?

A. Yes.

Q. Did you make a map of that, too?

1092 A. I did.

Q. Do you have that map here, Doctor?

A. No.

Q. Is it available?

A. It is in Ann Arbor.

Q. I take it that all of this basic material is available some place, is it not?

A. Oh, yes.

Q. You have not destroyed any of it?

A. So far as I know, I have not destroyed any of it.

Q. And it all could be produced?

A. Yes.

Q. If the need arose.

A. Yes.

Q. Now, you have indicated that it is your opinion that there must be a sufficient numerical representation in a sample?

A. That is true.

Q. For a survey of this character.

A. Yes.

Q. All told in the County of Wayne how many service stations were there at the time that you made this survey?

A. The records of distribution of the questionnaires showed 2,242.

Q. Now, that is in Wayne County?

1093 A. That is right.

Q. Now, how many were there in Detroit, the City of Detroit?

A. I do not have the figure by which I could refresh my recollection, but it was somewhere in that neighborhood of 1880.

Q. Now, how many were there in the area comprised by Detroit, Highland Park, Hamtramck, and Dearborn?

A. I do not know.

Q. Did you know then?

A. I never took occasion to count them up. It could have been ascertained from my records.

Q. So you do not know how many total stations were in that area nor how many stations reported from that area?

A. Simply because I did not have any occasion to count them up.

Q. Well, you never did do that?

A. I never did do it, no; of course not.

Q. Now, do you regard the number of stations reporting, namely, 555, from the Wayne County area, as a sufficient numerical representation to give you a fair cross-section and sample of all of the stations in that area?

A. I do.

Q. How many stations reported from Detroit proper?

A. Well, if you subtract 93 from 555 that gives you 462, isn't it, 462; yes.

1094 Q. And how many of them did you use?

A. 409.

Q. Do you regard 409 stations as being a satisfactory sample, as representative of 1880 odd in the City of Detroit?

A. Yes.

Q. Do you care to make any estimate at all, Doctor, as to the number of total stations in Detroit, Dearborn, Hamtramck, and Highland Park at that time?

A. No, I do not care to.

Q. You just don't know that?

A. No, I do not know that.

Q. I will ask you if it is not a fact, or if it agrees with your best judgment, that there were approximately 2297 stations in that area in 1938, and in 1940 approximately 2533 stations?

A. I have nothing on which to base any judgment.

Q. You just don't know that?

A. That is correct.

Q. Well, now, assuming that those figures are correct for that area, namely Detroit, Hamtramck, Highland Park, and Dearborn, would you say that the use of 409 stations, all out of the City of Detroit proper, was a fair cross-section and sample of an assumed total of 2297 stations in the area which I have designated?

A. I should say the two figures are entirely incom-
1095 mensurate. You cannot asume that a thing is a
cross-section of something which contains a greater
totality than the sample covers very well.

Q. Well, that is what I think about this survey, Doctor. Then, you do not think that your survey relative to Detroit has any value in the consideration of the selling costs in an area comprised of the City of Detroit, Dearborn, Hamtramck, and Highland Park?

A. Oh, yes, very decidedly.

Q. Well, then, let me ask you the same question again. You have arrived at a cost by the use of 409 stations in the City of Detroit of 4.8 cents, haven't you?

A. That is an average cost.

Q. Now, asuming that in the City of Detroit and Hamtramck, Highland Park, and Dearborn there were in 1938 2297 stations. Are you willing to say on the basis of your survey of Detroit that the cost of selling gasoline in those 2297 stations in the area described equals 4.8 cents a gallon?

A. It is not necessary for me to draw any such conclusion out of my imagination. All that would be necessary would be to get the records, and that could be very easily tested.

Q. I am not asking you to draw it out of your imagination. I am asking you if you know the answer.

A. Would you mind repeating the question.

Trial Examiner Ballinger: Read the question.

1096 (Question read.)

A. I think there is every reason to believe from my survey that that is probably the case.

By Mr. Hanley:

Q. Are you willing to commit yourself to that proposition, Doctor?

A. I am willing to commit myself to exactly what I said.

Q. Well, I am not sure that that is clear.

Are you willing to say that the average cost of selling gasoline retail in 1938, in May, 1938, in Hamtramck. Dearborn, Highland Park and the City of Detroit was 4.8 cents a gallon?

A. That would be my opinion.

Q. Now, do you recall what the total gallonage was, of sales from the stations which you received as reported from May in the City of Detroit?

A. Not in the City of Detroit; I do not have that figure.

Q. Doctor, did you make a document entitled "A Supplement to Report Dated August 8, 1938 on Survey of Cost of Retailing Gasoline in the City of Detroit, Mich."?

A. Could I see it?

(Mr. Hanley hands a paper to the witness.)

A. Yes.

Q. Can you refer to that document and then testify as to the total gallonage which you considered in your

1097 survey as having been sold in the month of May, 1938?

A. It says here 3,187,534.

Q. Now, in 1938 how many gallons of gasoline were sold in total in the City of Detroit?

A. I do not know.

Q. Well, approximately?

A. I do not know that.

Q. Well, did you know in 1938?

A. No.

Q. Well, if you did not know in 1938 how did you know whether you had a fair sample or not?

A. Because of the number of stations covered.

Q. Well, would the number of stations have anything to do with it if it had no relation at all to the amount of total gallonage?

A. Oh, if it had all been very small stations selling a thousand gallons a piece, the number would not have been adequate.

Q. Well, do I understand you say, Doctor, that you accepted these reports as being a sufficient cross-section of the industry in Detroit without any knowledge as to the total gallonage that was handled in the City of Detroit?

A. I made some effort through the Gasoline Tax reports from Lansing to determine what the total gallonage in Detroit was, but those sales tax records were not
1098 adequate, or gasoline tax records were not adequate.

Q. What was the best information you got?

A. The best information I got was total gallonage in the State of Michigan.

Q. Well, did that help you in respect to Detroit?

A. Why, somewhat, but not—

Q. Well, however you got it, and however you figure it, Doctor, where did you arrive as to the amount of total gallonage handled in Detroit in 1938?

A. I did not arrive at it.

Q. You just never did figure that out; is that true?

A. That is broadly true.

Q. So you haven't any idea now and you had no idea in 1938 what the ratio in gallonage of your sample was to the total gasoline handled in Detroit; is that true?

A. I would not say I did not have any idea.

Q. Well, I have been trying to find out what your idea was, Doctor.

What was it?

A. I knew it was a very substantial gallonage. I also knew through tests which I made on my own, the questionnaires that came in, that a very much smaller sample would have achieved the same result since the very much smaller sample would have given the same ultimate figures, it would hardly seem necessary to worry about a larger sample.

1099 Q. Well, in that figuration, Doctor, you were just taking a sample of a sample, weren't you?

A. I was taking a sample of the returns that came in, yes.

Q. And that was a sample of a sample; isn't that true?

A. Oh, a certain sort of sense.

Q. Well, in an actual sense, isn't that true?

A. Well, a sample, of course, is ordinarily a deliberate predetermined affair.

Q. Well, let us get at it this way, Doctor. You had a sample of 409 stations, didn't you, in Detroit?

A. I had, yes.

Q. And you do not know how much gallonage they did in relation to the total gallonage in Detroit?

A. Well, not any exact knowledge.

Q. Well, do you have any approximate knowledge?

A. No.

Q. All right.

Now, you took a sample out of your sample of 409 stations, and you got a result similar to the result you got using the 409 stations, didn't you?

A. That is true.

Q. And therefrom you concluded that even though you had used fewer stations than 409 you would have gotten the same result; is that right?

A. I think that is true.

1100 Q. Now, Doctor, if there was any error in your premises on the 409 stations, that error would necessarily be included in and carried into any sample you took out of the 409 stations, wouldn't it?

A. Not necessarily.

Q. Well, what do you mean by that, if your premise is wrong to begin with what did you do in taking the sample of the sample to correct it?

A. Of course, I have not admitted that my premise was wrong to begin with.

Q. Well, assume that, assume that there was an error in your premise on the 409 stations. Now with that assumption any sample you took out of the 409 stations would have inherently the same error, wouldn't it?

A. It might.

Q. Well, what do you mean by that? Can't you say whether it would or not?

A. Well, in taking a sample out of the larger group I might possibly omit stations with certain characteristics. It was purely by accident—it was purely by accident.

Q. It would be accident, wouldn't it?

A. If I—

Q. Yes. Isn't it true that the more carefully you did your work, assuming a fundamental error, the more 1101 certain you would be to carry into the samples of samples of the original error?

A. Well, I presume it is true. If a sample taken at random out of the 409 stations actually contained a cross-section of those 409 stations, that is, stations with the individual characteristics of all of the types that appeared in the 409 stations, then necessarily the result would be the same.

Q. Now, does 600,000,000 gallons of gasoline in volume in total for Detroit for a year sound to you like a reasonable figure, Doctor?

A. I do not know.

Q. You have no idea at all about that?

A. No.

Q. Well, suppose that is the figure, would you still regard your sample as a fair and representative cross-section?

A. I do not see why not.

Q. Well, you may not see why not, Doctor, but do you see why? Why it is a fair sample, I mean.

A. Why, yes, of course.

Q. All right. You have stated the gallonage for May as 3,000,000,000—187,000—31,187,000, I guess you said, did you not?

A. No.

Q. Was it 3 million?

A. I think 31 million would be too many.

Q. I think it would. What did you say?

1102 A. 3,187,534.

Q. Now, 12 times that would be, oh, approximately 38 million gallons, wouldn't it, Doctor, just approximately?

A. O. K.

Q. Assuming that the annual total gallonage of business done in Detroit was, oh, instead of 600,000,000 gallons a year, say it was 400,000,000 gallons a year. Do you think you would then have a fairly representative cross-section from the standpoint of gallonage?

A. I should think so.

Q. At least, you are satisfied with it, Doctor?

A. Oh, yes.

Q. Now, just by way of summary on this numerical situation. As I understand your testimony, you did not know in 1938, and you do not know now, what the total number of service stations were in the area comprised by Detroit, Hamtramck, Highland Park, and Dearborn; is that right?

A. That is correct.

Q. You did not know then and you do not know now what the gallonage, total gallonage was in Detroit or in Wayne County; is that right?

A. The gallonage sold by all stations?

Q. Yes, sir.

A. That is correct.

1103 Q. And you did not know what the total gallonage was in the area comprised of Dearborn, Highland Park, Hamtramck, and Detroit?

A. No.

Q. Supposing, Doctor, that the number of stations in that last named area has increased since 1938 by some two or three or four hundred stations, would that fact in itself make any difference in your judgment as to the propriety of your figure of 4.8 cents now?

A. Not that fact in itself, no.

Q. Now, you have given some testimony here as to the minimum and maximum gallonage limits of the stations which you considered in your survey, and I understood that they ran from, roughly, about a thousand gallons to about 30,000 gallons.

A. Per month.

Q. Did you arrive at an average?

A. Yes.

Q. What was it?

A. The average in Wayne County was 7,917.

Q. And what was it for Detroit?

A. 7,793.

Q. Will you state those again, please, Doctor.

A. As in the report here, this Wayne County report, it says 7,917 for Wayne County.

Q. And for Detroit?

1104 A. 7,793.

Q. Now, again referring you to the address which you made on September 7, 1938, did you not at that time state that the gallonage in Detroit was 7,793 as you have now stated, and 8,549 in the county and surrounding trade area?

A. Oh, yes, of course.

Q. Well, now, I do not understand, Doctor, just what you meant by—

A. The figure I was reading here, 7,917, is the consolidated.

Q. Detroit and surrounding area?

7

A. That is correct.

Q. I see.

Now, what predominated in the returns that you got from service stations, large ones or small ones, on the basis of gallonage handled?

A. You will first have to define large ones and small ones.

Q. Well, you define them on the basis of the kind of reports you got. You have given two extremes. Now, what kind of stations predominated in reference to volume of gallonage?

A. Well, perhaps I can answer that. No, I guess perhaps I do not have the table that I thought I had. Obviously the number of individual stations that sold below the average number of gallons is going to be larger than the number of stations that sold more than the av-
1105 erage gallonage; precisely what those relationships are I do not know.

Q. And that factor in itself would tend to increase cost, wouldn't it?

A. To increase cost?

Q. Yes, sir.

A. Oh, I don't think so.

Q. Didn't you—

A. The average is simply a mathematical result of the factor. It is inevitable where you have a situation, where you are getting an average; using average gallonage, as I just did then, as a standard, that the number of small ones is going to exceed the number of those that are larger than the average. That is mathematically impossible that it should be otherwise.

Q. You now conclude, if I understand you rightly, Doctor, that there must have been a predominance of stations reporting to you which handled an amount of gallonage less than the average?

A. Less than the average as shown.

Q. As is shown by your survey.

A. That is probably true.

Q. You also reached the conclusion to which you testified this morning that the cost of selling gasoline decreases as the gallonage rises. Am I right about that?

A. Up to a certain point, yes.

1106 Q. Now, if both of those conclusions are true, then the result of your survey inasmuch as most of the reporting stations were small, were below the average arrived at in your survey, it would tend to increase the average cost?

A. Oh, no, not at all.

Q. It would not?

A. No, not in the slightest.

Q. Well, why not?

A. Because it is a weighted average.

Q. Well, it is weighted with all these small stations, isn't it?

A. It is weighted only with gallonage. It is not weighted by the number of stations at all.

Q. Well, the small number of gallons irrespective of the number of stations represented by that small amount of gallonage would represent a high cost, would it not?

A. Broadly speaking, that is true, that relatively high cost, high unit cost, goes along with relatively low gallonage.

Q. And that is reflected in your final average of 4.8 cents a gallon, isn't it?

A. Well, it is not reflected any more than the other end of the ladder, your relatively low cost stations.

Q. Perhaps we are not understanding each other, Doctor.

If you got a reporting station that had a low 1107 gallonage, as you say, approximately a thousand gallons as one extreme.

A. Yes.

Q. That station would have a relatively high unit cost, wouldn't it?

A. That is true.

Q. Then, if you got another station of approximately 30,000 gallons, your other extreme, you would have a station of relatively low cost per unit; wouldn't you?

A. Broadly speaking, that is true.

Q. Now, as I understand your testimony, you say that you got a predominate number of small volume stations with the result that it pulled your average gallonage down to somewhere in the neighborhood of between seven and eight thousand gallons per month; that is true, isn't it?

A. I do not know about this predominant business. I do not understand that; that is, we had stations that ranged all the way up and down.

Q. Well, I just asked you, Doctor, if you did not get—

or, first, I ask you what type of stations predominated in amount of gallonage sold that reported to you, and you told me that most of them must have been below the average that you arrived at in your survey.

A. You did not ask me how they predominated as to the amount of gallonage sold. You asked me how they 1108 predominated as to numbers, the numbers of individual stations. Obviously, there were more stations which sold less than the average gallonage than there were number of stations which sold more than the average gallonage.

Q. That sems to me to mean the same thing.

A. It does not predominate as to the amount of gallonage, though.

Q. There were a greater number of stations selling a small number of gallons per month than there were numbers of stations selling a high volume of gallonage per month?

A. That is true.

Q. And you took into your consideration all of the gallons from all of the stations.

A. Yes.

Q Those stations reporting low volume had a higher cost than the stations reporting a hign volume per unit; didn't they?

A. Oh, yes.

Q. So your final average of cost was weighted and reflects a predominating number of small stations handling a small volume of gasoline; isn't that true.

A. I can't agree to that statement at all. It does not reflect the number of stations in any way; the number of stations was not used as a factor in obtaining the unit cost.

Q. It does not make any difference, Doctor. Let me 1109 put it this way: Suppose that ten stations reported, two of them reported 30,000 gallons a month, eight of them reported 1,000 gallons a month. Now, you arrive at 60,000 gallons on the one hand and at 8,000 gallons on the other or a total of 68,000 gallons; didn't you?

A. Yes.

Q. Now, your cost as to the 8,000 gallons was weighted heavily by reason of a high unit cost; is that not true?

A. Well, not weighted heavily because after all the stations were very small, the total cost of operating that very small station is so small in comparison to the total cost of operating a large station, that the weighting is not as serious as it would seem to sound.

Q. Let us leave that for a moment. I think you have a table on it. We will go back to it, Doctor.

A. All right.

Q. Just now I want to ask you if in your judgment you satisfied the requirement which you have laid down in your book as to the size and character of the business represented.

A. I think I did.

Q. Now, in your judgment, did you satisfy the requirement which you, yourself, have laid down in your book relative to the economic characteristics of the enterprise?

A. As far as those could be judged on the basis of the information that we had, yes.

1110 Q. Well, do you know whether or not you had accurate information?

A. I had as accurate information as appeared on the questionnaire blanks.

Q. The fact of the matter is, Doctor, isn't it, that you depended on those questionnaires; if anything is wrong with them there is something wrong with your survey; isn't that true?

A. Remember, of course that those questionnaires were tested very thoroughly by field checks in sufficient number to satify me they were reliable.

Q. We will get into that, but irrespective of that is my postulate correct?

A. You mean if the survey blanks, even after our checking, were wrong then was I misled?

Q. Yes.

A. Well, presumably so.

Q. Well, to eliminate any onerous implications, whatever the survey blanks, questionnaires showed you predicated your survey on that information?

A. On that information plus the checking which we did in the field.

Q. Now, are you familiar with a gasoline outlet in Detroit known as Ned's Auto Supply Company?

A. I have heard of them.

1111 Q. Did you receive any data from that organization in connection with your survey?

A. I did not.

Q. Are you familiar with an organization in Detroit known as the Citrin-Kolb Oil Company?

A. I have heard of them.

Q. Did you receive any information from that organization in your survey?

A. I am not sure.

Q. You do not know whether you did or not?

A. I could not be sure.

Q. Do you know of Wayne Oil Company in Detroit?

A. I have heard of that.

Q. Did you receive any information from them in connection with this survey?

A. I could not tell you for sure.

Q. Are you familiar with an organization known as the Stikeman Oil Company?

A. Pardon?

Q. S-t-i-k-e-m-a-n Oil Company?

A. Never heard of them.

Q. Then, I suppose you did not receive any information from them?

A. I do not know.

Mr. Austin: If your Honor please, I would like to 1112 have it appear that the record shows that at the time this survey was taken, May, 1938, the Wayne Oil Company was operating no retail stations, and the answer states, Respondent's answer, that the Stikeman Oil Company did not operate any retail stations since early in 1938; so that there is no reason to believe that either one of those companies which has just been mentioned operated any retail stations which could have received these questionnaires.

Mr. Hanley: At this time the Respondent desires to add to its objection to the questions asked this witness as to his conclusions based on his survey in Detroit and to the motion to strike Commission's Exhibits 75-A, 75-B, and 75-C, the additional reason as now stated by Counsel for the Commission, namely, that the Wayne Oil Company and the Stikeman Oil Company were not engaged in retail gasoline retailing operations in Detroit in 1938.

Mr. Austin: I said May, 1938.

Mr. Hanley: May, 1938.

Trial Examiner Ballinger: Is this a further motion to strike?

Mr. Hanley: I am just adding that, Your Honor, to the motion.

Trial Examiner Ballinger: The addition is overruled.

By Mr. Hanley:

1113 Q. Now, in this survey, Doctor, did you get reports from operators who were running so-called curb pumps?

A. I do not know.

Q. Well, now, that is a common method of distributing gasoline at retail, isn't it?

A. Not in Detroit.

Q. It is not? Are there none in Detroit?

A. There may be some; I am not sure about that.

Q. Well, how many?

A. Well, I have no idea about that.

Q. Well, you have an idea that it is not a common practice; haven't you any notion how many there are?

A. No.

Q. Do you still think it is not common?

A. Yes.

Q. All right. You do not know whether any of them were represented in your survey?

A. No, I do not know that.

Q. Were any so-called drive-in stations represented in your survey?

A. What do you mean by drive-in stations?

Q. Well, just what the name implies; that is commonly used in the oil industry; aren't you familiar with it, Doctor, driveways to pumps?

A. A driveway from the street, is that all you mean by that?

1114 Q. Yes.

A. Why, yes, of course.

Q. Haven't you heard that expression frequently in connection with your gasoline retailing business?

A. Oh, yes, I have heard that, but I did not know what you had, whether some special type of station.

Trial Examiner Ballinger: Are there any service stations that are not drive-ins?

Mr. Hanley: Yes, a good many.

By Mr. Hanley:

Q. Some of them were represented, were they?

A. Drive-in stations?

Q. Yes.

A. Oh, yes, yes, sir.

Q. How many?

A. My impression is that most of the stations represented were of that type. There may have been some curb stations, too.

Q. Well, did you undertake to ascertain in 1938, on the occasion of the survey, how many there were?

A. No.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

1115 Q. Did you have some statement you desired to make about curb stations, Dr. Taggart?

A. When you asked me the question about curb stations, I thought only of stations where perhaps there was a single pump in front of a grocery store, directly on the street.

Q. Well, that is really what I did have in mind, that type of curb pump as distinguished from what has been now designated as a drive-in station.

A. Well, you mentioned further as included in curb stations stations which are located in parking lots.

Q. Well, I am going to ask you about that.

A. Well, all right.

Q. You have testified as to the drive-in stations. Now, are you familiar with the term super-service station?

A. I have heard the term, yes.

Q. What does it mean to you?

A. Why, to me it means a relatively large station that supplies gasoline and oil and washes cars, and possibly makes minor repairs, and sells perhaps tires and certain other types of merchandise.

Q. Were any of them included in your survey?

A. Yes.

Q. How many?

A. I do not know.

Q. Did you know in 1938?

1116 A. No.

Q. Were any auto dealers who sold gasoline included in your survey?

A. Yes.

Q. How many?

A. I do not know.

Q. Did you know in 1938?

A. No.

Q. Were any parking lots which sold gasoline included in your survey?

A. I am not sure about that.

Q. There are a good many of them, are there not, in Detroit?

A. Well, there are a good many parking lots; as to how many sell gasoline, I do not know.

Q. Well, as a matter of fact, don't most parking lots sell gasoline?

A. Oh, I should not like to make a statement on that; I do not know.

Q. Well, do you know?

A. I do not know.

Q. Do you know what the fact is in Detroit?

A. No.

Q. As of 1938?

A. No.

Q. You made no investigation of a station of that kind?

1117 A. That is correct.

Q. A little while ago in your testimony you made reference to the number of stations reporting that handle major brands of gasoline. What do you mean by a major brand?

A. Well, nothing more than the man on the street would mean by the same expression.

Q. Well, I have not the faintest idea of what he means. Just what do you mean?

A. Generally speaking, a brand which emanates from one of the large companies in the industry, such as Red Crown, for example, Shell.

Q. Well, what makes it major as distinguished from something that is not a major company in your mind?

A. Why, in general, presumably the size of the company that produces it.

Q. Does the amount of gasoline sold in the City of Detroit have anything to do with your characterization of a company as a major or a non-major?

1118 A. Oh, not the amount that they sell in Detroit, no, I would not think so. Major in that particular area, of course, it might be very large as compared to somebody else in that particular area. I am speaking of major in terms of the national picture.

Q. Solely the national picture without any reference to Detroit?

A. I think that is the common definition, just a purely a curbstone definition without any particular significance.

Q. That had no reference in your mind or in your classification to the amount of gallonage that such a so-called major might have done in the city of Detroit in 1938?

A. No, I don't think so.

Q. So it may be true that some company which you classified as a non-major, or unbranded dealer actually sold more gasoline in Detroit than what you characterize as a major?

A. It could be.

Q. Now, did you include in your survey what you have characterized as major as well as non-major or unbranded?

A. Yes.

Q. Did you make any classification with respect to the prices charged by the various vendors of gasoline?

A. No.

Q. Now, in your consideration of these costs, as reported to you, did you deal at all with any operations
1119 where the retailer hauled his own gasoline from bulk
storage, as in the case of a wholesale dealer, or a jobber on gasoline? Do you understand that question?

A. I understand that question. I did not know that retailers did that very frequently. I do not know.

Q. You do not know whether you had any of that in your survey or not, is that right?

A. Well, I am not sure. It may have been, it may not have been.

Q. Now, I wish you would consider this situation, Doctor: Assume that a service station operator acquired a location of ground at a low price some years back, and established a service station on it, and that land values in that locality became greatly enhanced, as much as seven or eight or ten times as great as they were when the first operator obtained his location. First, that is true in certain localities in Detroit, is it not?

A. I do not know.

Q. Don't you know whether land values have increased, multiplied many times in business areas in Detroit?

A. I have heard that that is true, yes. I have no reason to doubt it.

Q. Well, you do not know it?

A. It increased from a point of time, like when Detroit was settled by the French, presumably.

1120 Q. Well, speaking of the last few years, four or five or six years, ten years?

A. I would be inclined to question it for four or five or six or ten years for that matter.

Q. Well, assume it then, if you do not know, Doctor, suppose that such values did increase and that some service station operator purchased on the high value across the street from the first operator at the high value.

A. Yes.

Q. What consideration did you give to that difference in investment cost in your treatment in this survey?

A. Insofar as there was investment in land, the only difference it would have made is in the fact that a 5 per cent interest rate was computed, 5 per cent interest on the actual investment.

Q. But as between those two operators under the assumptions which I have made, there would be a difference in their cost of retailing the gasoline, would there not?

A. Oh, I think so, all other things being equal, of course.

Q. Yes, assuming other things being equal.

Now, when you arrived at their cost, at an average cost, such as you arrived at in this survey, as between those two dealers, it would not be the cost of either one of them, would it?

1121 A. Oh, if you added their gallonage and their cost together, and divided by the total gallonage, it would not be the specific cost to either one.

Q. It would be higher than one and lower than the other?

A. Yes, that is probably true.

Q. That is actually true, isn't it?

A. Well, again, everything else being equal, of course.

Trial Examiner Ballinger: Doctor, do I understand that in computing costs you took the value of this land or station, that is, the cost value to the property irrespective of what it was worth at the time this survey was made?

The Witness: That is correct.

By Mr. Austin:

Q. Well, you took 5 per cent of that, didn't you, that is as interest?

A. For the purposes of computing it, yes.

Trial Examiner Ballinger: That forms no basis for valuation.

By Mr. Hanley:

Q. Now, Doctor, I am going to use an example in the city of Chicago, because I do not know enough about Detroit; at what is known as Clark and LaSalle Street in Chicago there is a service station upon which is located a small service station building, and maybe a dozen or fifteen pumps, and that service station does a tre-
1122 mendous gallonage of gasoline; it does not have any places that are commonly called stalls for greasing, washing cars, or changing tires, and that sort of thing. They do not do that kind of business. The investment in the buildings and equipment is relatively low for the amount of gasoline sold. On what is known as Ridgeland Avenue in Evanston is a very large service station, I think it has four stalls. Its predominating business is greasing, lubricating cars, washing cars, tire, battery service, things of that nature as distinguished from selling gasoline. Both are located on very prominent traffic arteries. In Detroit it is true, is it not, that they are similar kinds of business?

A. That is probably true.

Q. Now, what consideration did you give the difference in the economic characteristics of those kind of places in your survey, if indeed any of them answered your questionnaires?

A. All of them were included. I did not discriminate against either variety of operation.

Q. Well, then, you did not classify them, did you?

A. Classify them?

Q. Yes, that is to say, you treated everybody alike, you took his costs and his gallons of gasoline sold and reached your average, isn't that right?

A. Reached my average with the rest of the con-
1123 clusions that I reached.

Q. Yes, so you made no special treatment by classification of any of these different economic types?

A. No, I suppose not.

Q. Now, that is true all the way through your survey, isn't it, Doctor, in reference to the two types of stations that I have just outlined, and with reference to the curb pumps and garages, and parking lots, trackside service stations, branded and unbranded, cut price and regular price, and everything else, you took them just as they came, didn't you?

A. That is correct.

Q. And you lumped them all together?

A. For the purpose of obtaining the average.

Q. And your factor was gallons sold and cost of doing business irrespective of how they did it, or where they did it, or irrespective of any other economic factors, isn't that true?

A. Insofar as the obtaining of that grand average is concerned, yes.

Q. Now, I want to refer you, Doctor, to your book again, page 181, in which you state: "The economic characteristics of especial importance are chiefly those concerned with the types of business done. For example, the retailing of gasoline is usually accompanied by a greater or 1124 smaller amount of sales of oil, grease, tires, and automobile accessories and by the rendering of services, such as washing, greasing, tire and battery repairs, and the like."

That is your understanding of the usual business of retailing gasoline, isn't it, Doctor?

A. Yes.

Q. And was in 1938?

A. That is true.

Q. Now, do you think that a method of attempting to ascertaining costs of retailing gasoline is adequate that fails to take into consideration a classification of the economic characteristics of gasoline retailing as you have defined those characteristics in the quotation just read to you?

A. I have no doubt but what all of those different varieties of stations were represented.

Q. You think they were, but do you know?

A. I do not know because I did not see every station that is included. I saw a number of them.

Q. Was there anything to indicate on the questionnaires what the economic characteristics of the outlet were?

A. There were in a good many cases; there was one very important fact, and that was the relative amounts of money involved.

Trial Examiner Ballinger: The what?

A. There was one very important fact, and that is 1125 the relative amounts of business done.

By Mr. Hanley:

Q. But as I understand your testimony, Doctor, you did not in 1938 make any effort to ascertain, and you did not ascertain, and you did not know how many of these various classifications of retail gasoline businesses were represented in your survey?

A. Not how many, we saw something like a third of the total number of stations that were included, and of those stations that we saw some were very small, and possibly this curbside variety, some were almost purely gasoline stations, some were those large super-service variety station that you refer to, some were connected with automobile salesrooms, and so on.

Q. Did you yourself look at the third?

A. No, not all of them.

Q. How many did you look at?

A. Oh, it is hard to say exactly how many I did look at. I had an assistant who covered the major portion of that field work. I covered part of it with him.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Hanley:

Q. Can you give me any number of stations that 1126 you personally saw?

A. I do not think I personally saw more than 25 or 30. I did see, however, a very considerable variety in that relatively small list.

Q. Well, now, as to the stations that you personally saw or as to the third that somebody else may have seen, and I suppose talked to you about, is that true?

A. That is correct.

Q. Did you make any effort to classify from the standpoint of economic function even that third of the stations?

A. I do not know just what you mean by classify.

Q. I mean as between these various types of outlets like curb pumps, or garages, or auto dealers, or drive-in stations, parking lots, super-service stations, trackside stations, just the different kinds?

A. Do you mean check them off and add up the numbers of such stations?

Q. Well, classified. I don't know. You are the economist, Doctor, and I want to know if you made any classification and gave any particular consideration to what you have referred to as an essential in a survey of this kind, namely, the economic characteristics of the enterprise, the size of the enterprise, the function that it discharges, just, I want to know whether you did give any consideration to it or not. If you did not, say so. If you did, 1127 tell us what it was.

A. I did say I did give consideration to that.

Q. You gave consideration to that gallonage?

A. Oh, yes, and to other things, too.

Q. And you arrived at their cost of selling gasoline on the basis of their gallonage, didn't you?

A. Yes.

Q. And you did that by the same process in connection with a little service station that sold nothing but gasoline and only about a thousand gallons of that a month, in the same way that you did it in reference to a super-service station, for instance, that sold 30,000 gallons of gasoline a month, and did a tire business, and a battery business, and accessory business, greasing business, and all these other services?

A. Substantially, yes.

Mr. Hanley: I think your Honor, that that reaches a point where we can stop at this time, if you desire to adjourn.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

Now, at 4:35 p. m. the hearing stands adjourned to reconvene in the hearing room of the Federal Trade Commission Building, April 9, 1941, at 1:30 p. m.

(Whereupon an adjournment was taken to April 9, 1941, at 1:30 p. m.)

1128

Room 332, Federal Trade
Commission Building,
Washington, D. C.,
Wednesday, April 9, 1941.

Met, pursuant to adjournment, at 1:30 p. m.

Before: Webster Ballinger, Trial Examiner.

Apearances:

Cyrus B. Austin, Esq., appearing on behalf of the Federal Trade Commission.

H. R. Hanley, Esq. (910 South Michigan Avenue, Chicago, Ill.), appearing on behalf of the Respondent.

1129

PROCEEDINGS.

Trial Examiner Ballinger: This is a reconvening at 1:30 p. m., April 9, 1941, in the hearing room of the Federal Trade Commission of Docket No. 4389, in the case entitled in re Standard Oil Company.

The last hearing was held in Washington, D. C., April 8, 1941.

The Reporter will note Counsel for the Commission and for the Respondent present.

You may proceed.

HERBERT F. TAGGART, resumed the stand and testified further as follows:

Cross-Examination by Mr. Hanley (Continued).

Q. Doctor, I assume that this survey which you have prepared does not purport to fix the costs of any individual dealer; is that right?

A. To fix the costs.

Q. Yes.

A. I do not understand what you mean by "fix."

Q. I mean to establish what the actual cost is of any individual dealer.

A. The costs of all of the individual dealers were established—were determined in my survey.

1130 Q. Well, so you will understand it, let me approach it this way: You have arrived at an average cost of 4.8 cents a gallon. Now, I am asking you, Doctor, if that figure purports to be the cost, the actual cost, of any individual dealer in Detroit?

A. It might coincide with the actual cost of some individual dealer, or possibly a considerable number of individual dealers.

Q. It might, but you do not know that, do you, Doctor?

A. Oh, well, there were cases among the 489 whose costs were 4.8 cents.

Q. There were some that were as high as 15 cents, too?

A. Oh, yes, that is very true.

Q. What I am seeking to learn now is whether or not the average which you arrived at purports to be pointed to the actual individual cost of any particular station operator.

A. I must say I do not just understand the question.

Q. Well, I will try and make it more specific. You have testified that you are familiar with the fact that there is an organization in Detroit retailing gasoline known as Ed's Auto Supply Company; that is true, isn't it?

A. I have heard of it, yes.

Q. Would you say that your figure of 4.8 cents a gallon has any reference to the actual cost of retailing gasoline by Ned's Auto Supply Company?

1131 A. "Any reference" is a very broad term. I should hate to say that it had no reference whatever; on the other hand—

Q. All right, Doctor. Do you know what Ned's costs are?

A. No.

Q. You do not know whether they are one cent or six cents a gallon, do you?

A. I think I have an opinion, which would fall somewhere in between those two extremes.

Q. What is your opinion based upon? You have testified you did not get any figures from them.

A. That is correct.

Q. Well, then, how do you have an opinion?

A. I have an opinion because I saw the costs of a very large number of gasoline dealers.

Q. Did you ever see their costs?

A. No, I never saw their costs.

Q. Do they handle bicycles and roller skates, and batteries and washing machines, and dozens of items, do they not?

A. That is what I understand.

Q. And gasoline is just one of the items among many which that organization sells; that is true, isn't it?

A. I presume that is true.

Q. And you have never seen their costs about anything; have you?

A. I have never seen any of their figures at all.

1132 Q. Now, on that basis of lack of knowledge, Doctor, do you care to express an opinion as to what their cost is relative to selling gasoline?

A. Based on the results of the survey, I think I could at least have an opinion within certain limits.

Q. All right. What is Ned's cost?

A. Well, I should say it probably lies within the limits that you suggested, between 1 and 6 cents in all probability.

Q. Doctor, I am not suggesting anything. I am asking you. I do not know. What do you say Ned's costs are?

A. I am quite willing to say that I think that is probably where they lie.

Q. Where?

A. Somewhere between—

Q. Name a figure.

A. I would not care to.

Q. Then, do I understand that you just don't know and don't care to express an opinion as to what their cost is?

A. I think it would be extremely rash for anyone to express an exact opinion as to what anybody's costs are.

Q. So do I.

A. Without having seen their books.

Q. Now, Doctor, your survey gave consideration to some four hundred odd stations in the City of Detroit, and on that you reached an average cost; that is true, isn't it?

1133 A. That is true.

Q. Now, isn't it inherent in any such average that it condemns the efficient operator and blesses the inefficient operator in this, that your average cost is higher than that of the efficient operator, and lower than that of the inefficient operator?

A. I do not see that that necessarily condemns anyone, either the efficient or the inefficient.

Q. Well, is what I have said true as to the cost itself, the average cost, just factually; it is higher than the efficient operator and lower than that of the efficient operator; isn't it?

A. Oh, yes, of course.

Q. Now, if you impose it as an arbitrary cost does it not have the effect of condemning the efficient operator who can operate for less, and, I will say, blessing the inefficient operator whose cost is higher?

A. I should rather put it that it handicaps the efficient operator, may handicap him very seriously.

Q. All right. It handicaps him?

A. That is correct: I thoroughly agree with that.

Q. Doctor, did you experience any difficulty in getting accurate data from these various service stations that you surveyed?

A. Any difficulty?

1134 Q. Yes, sir.

A. Why, I suppose probably I did in certain cases; in fact, of course I did in certain cases, those stations that we attempted to get the cost information from.

Q. I call your attention, Doctor, to a paragraph on page 181 of your book, as follows: "The necessity of including both large and small enterprises as well as all the gradations in between is obvious since unit costs of operation have a tendency to vary inversely with the size of the establishment (assuming that they are comparable in other ways). This characteristic is not likely to be easily attained since the only concerns with relatively large volumes of business are apt to have the accounting and statistical records necessary to supply required information."

Did you write that, Doctor (handing book to the witness)?

A. Yes.

Q. Was that your opinion at the time you wrote it?

A. Yes.

Q. Is it your opinion now?

A. It is.

Mr. Austin: I suggest that the witness should be asked as to whether that is his opinion regarding retail gasoline stations.

Mr. Hanley: All right.

1135 Mr. Austin: Otherwise it has no applicability.

Mr. Hanley: I will do that.

By Mr. Hanley:

Q. Is that your opinion in reference to the gasoline retailing industry?

A. In general the larger stations tended to have somewhat more complete and accurate records than the smaller stations.

Q. Has that continued to be your opinion since you wrote this statement in relation to the gasoline retailing industry?

A. That is true.

Q. I call your attention to a statement on page 71 of your book, as follows:

"Once the questions as to cost elements have all been answered, however, the cost formulae are only begun. The problems of the application of these elements to particular products and transactions are far more numerous and difficult of solution. At this point we are in the position of a cook who knows only that a cake is composed of flour, eggs, shortening, sugar, salt, leavening agent, milk and flavor, without having the least idea how much of each ingredient to use or how to commingle or to bake them."

Did you make that statement in your book (handing to the witness the book)?

A. Yes, that is true.

Trial Examiner Ballinger: Judge, the Examiner 1136 wants to know the relevancy of that type of testimony.

Mr. Hanley: Judge, the relevancy is this, that this witness has admitted now affirmatively that he has mixed up all these elements in the gasoline business. He has pointed out in his own work, this book, the fraility of that approach.

Trial Examiner Ballinger: Doesn't it fall of necessity without any proof, that if the witness considered entire overhead of the service station, and only a part of the business was the sale of gas, that his report as to the cost of selling the gas of that station would be under and not over?

Mr. Hanley: Judge, if there were a norm—you have said a service station. If there were any such thing perhaps this survey would be not open to at least question as it is, but there is not any such thing. This witness has conceded that there are all kinds of outlets of different economic status; as, for instance, drive-in stations, garages, curb pumps, parking lots, track side stations, and so forth.

Now, we say, Your Honor, that he has taken the ingredients of the cake to which he alludes in the reference that I have just now made in his own book, and he has put them together, and he has baked up something. Now, we want to illustrate the fallacy that exists in just indiscriminately putting those ingredients together and getting your results without a classification from an economic functional standpoint of the various ingredients that he considered.
1137 He treated them all as one thing. He has said that all he was interested in was gallonage.

Trial Examiner Ballinger: I appreciate that, but doesn't it stand to reason that he included costs in that survey that are not properly chargeable to the sale of gas?

Mr. Hanley: He did, and I propose to illustrate that, Your Honor, later this afternoon.

Trial Examiner Ballinger: Is it necessary to illustrate it? He has admitted the inclusion of these items in his costs are rather its—

Mr. Austin: What costs? I do not understand there is any such admission.

Trial Examiner Ballinger: I understood the witness yesterday to admit that he did not take into account whether the service station confined its sales strictly to the sale of gas, or whether it included oil, all automobile accessories, washing cars, and it might have also run a mercantile store.

Mr. Austin: Well, Your Honor, on the contrary, he has made an analysis of that very thing. There is a whole schedule right in that survey which demonstrates that the stations are divided up as to amount of gallonage, whether their business was mostly gasoline or clear down to the ones that were mostly the other way, and demonstrated conclusively it makes no difference in the results.

1138 Trial Examiner Ballinger: I have not seen his survey, but his testimony would control, and if I am in error I would like the witness to correct me because that was my understanding yesterday.

Mr. Austin: Well, then, he should, because the survey, as he has already testified, shows what he actually did.

Trial Examiner Ballinger: Well, the survey would fall in view of his testimony, if I have correctly quoted the witness.

Have I correctly?

The Witness: I certainly did not intend to convey that impression, Your Honor, because I did take into consideration the sales of other commodities.

Trial Examiner Ballinger: Other commodities?

The Witness: Oh, yes.

Mr. Hanley: Judge, in fairness to the witness, and by way of explanation to the Court, this witness has in his survey, as relates to the City of Detroit alone, made an effort to take into consideration and devalue it, the gasoline sales as contrasted with sales of service and accessories and other things. Now, he has done that in his survey. I propose to reach that later in this examination, and I think the question that is in your Honor's mind will 1139 be fully developed with the witness.

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. I would like to call attention to these two references—maybe I have already done so as to one.

What is the record as to this page 71?

(Question read.)

Q. Does that statement apply to the gasoline industry as well as to industry generally?

A. It does.

Q. I call your attention to the last one of these in the book, Doctor, on page 77, you make this statement:

"This completes the story of application of cost formulae to direct labor and materials. It can be seen that even in these fields which are relatively free of controversy, problems do exist in some industries whose only solution on a uniform basis seems to involve a degree of arbitrary allocation which may result in a divergence from the principle of individual cost and an approach to an artificial or uniform cost."

Did you make that statement in your book?

A. I did.

Q. Was that your opinion at the time you wrote it?

A. It was.

Q. Is it your opinion now?

1140 A. It is.

Q. Does it apply to the gasoline retailing industry?

A. I do not think it applies to the matter that we are talking about because what is being talked about here is uniform cost accounting systems for industries.

Q. Well, isn't the sale of gasoline an industry?

A. There is nothing in this survey about the Michigan law under which the survey was conducted which requires the gasoline dealers to keep books on a uniform basis.

Q. Well, irrespective of how they keep their books, does your statement apply to the gasoline industry?

A. Well, if a uniform system of accounts and cost accounting were to be developed for the gasoline retailing industry, this statement would apply.

Q. As a matter of fact, you did not find any uniform system of keeping books; did you?

A. Oh, no, of course not.

Q. You found about 409 different systems, didn't you, Doctor?

A. Not quite that many.

Q. Didn't you find a different system in practically every station you investigated?

A. Oh, that is much too broad a statement. The Standard Oil Company of Indiana, for example, has tried to assist its dealers from time to time by making
1141 suggestions as to how they should keep their books,
and I do not know whether they provided them with sample forms or not, and we found in a good number of cases that dealers were following some variety of more or less standardized systems.

Q. You did not mean to infer, did you, Doctor, that the Standard Oil Company of Indiana has imposed upon these dealers any method of keeping books?

A. Oh, of course not.

Q. And, they may have followed suggestions, and most of them did not; isn't that what you found to be the facts?

A. I found the first part; I should hate to subscribe to the last part.

Q. Now, Doctor, there are all kinds of methods, are there not, of cost accounting in the matter of including certain things and excluding certain factors; didn't you find that true in your efforts when you were working for the Government in connection with many cost accounting formulae under the N.R.A.?

A. Yes, I think that is probably a fair statement.

Q. I call your attention, Doctor, to a list which you have prepared on pages 69 and 70 of your book. I have checked them in red for your ready reference, and ask you if those are not items of cost which are controversial and which you excluded, or which were excluded under the N.R.A., and which you have in part excluded and in part included in your analysis of the cost of retailing 1142 gasoline in Detroit?

A. You mean these that are checked in red at the left?

Q. Yes, particularly those that are checked in red.

A. There are a number of them that are checked in red here; at least one, of course, which obviously does not fall under that classification.

Q. What is that?

A. You have here checked in red, for example, this statement: "The basis for the cost of raw material is actual cost or current replacement value; whichever is lower." That does not indicate any element of cost.

Q. It is a controversial question among cost accountings, anyway, isn't it?

A. Oh, cost accountants do argue about it.

Q. Yes. All right.

Go ahead.

1143 A. Then we have—do you want me to read these?

Q. Look at them, Doctor, and if you disagree with my question as to their—controversy about their inclusion or exclusion, please explain.

A. If there hadn't been any controversy about any features of them they wouldn't have been included in the list here at all.

Q. Well, that is what I thought, but I want you to say so, Doctor, if that is true.

A. Obviously, these reflect problems which came up during the NRA in connection with these uniform cost formulae or uniform cost accounting systems which the codes were intended to provide.

Q. Well, isn't it true that there are ten or a dozen of those controversial items checked which were all or in part considered by you in your survey of the cost of marketing gasoline?

A. Presumably all of these—well, now, wait a minute. No; not all of them were given any consideration at all, as a matter of fact. Some of them were; some of them weren't.

Q. In any event, wherever they were given consideration, Doctor, it was your conclusion and judgment that prevailed as to whether they should be included or excluded? Is that not true?

A. Yes; that is true.

1144 Mr. Austin: I would like to ask what it was you referred to as the subject of that question. I am not quite clear in that connection.

Mr. Hanley: Perhaps it would be better if that were in the record, your Honor. I am perfectly willing that it go in the record. May it be understood that there will be copied in the record the items under the title "Exclusions from Cost" on pages 69 and 70 of the book written by Professor Taggart entitled "The Cost Principle in Minimum Price Regulation," which items are numbered as follows: 3, 4, 5, 6, 7, 9, 10 and 11.

Mr. Austin: Off the record.

(Discussion off the record.)

Mr. Austin: Your Honor, I object to putting this sort of thing in, aside from the context. I suggest this book be offered in evidence, it has been quoted from so many times. If the Judge doesn't offer it, I shall.

Mr. Hanley: All right. You offer it if you want to. I don't care to offer it, your Honor. I could read these things. I thought it would shorten it if I did it this way.

Trial Examiner Ballinger: This is off the record. Strike it.

(Discussion off the record.)

Trial Examiner Ballinger: Then, is there an objection to the—off the record.

1145 (Discussion off the record.)

Trial Examiner Ballinger: You withdraw your objection to it?

Mr. Austin: Yes.

Trial Examiner Ballinger: Counsel for the Commission withdraws his objection to the inclusion in the record of the matter indicated, and the matter is to be included—shall be included in the record.

(The material referred to is as follows:)

"3. For the avoidance of handicapping the production and marketing of new products, no research, developmental, or extraordinary sales promotional or advertising expenses may be included.

4. In order to avoid handicapping such activities, the cost of voluntary employee welfare, group insurance, or similar activities, and donations to charity or for similar purposes are to be excluded.

5. Any amount of depreciation shown on the books in excess of that allowable for Federal Income Tax purposes must be excluded.

6. Any uniform minimum rates of depreciation, overhead, or other factors will be disregarded. Such items must depend on facts and experience of each concern.

7. All depreciation, insurance, and taxes, and all expense of protecting and maintaining plant and 1146 property completely inoperative, must be excluded from cost.

9. No interest of any kind is to be included in cost for this purpose. This involves disregarding interest as such and also the interest element in plant rentals.

10. No reserve for contingencies or similar item which does not represent reasonably ascertainable cost, but merely an estimate of uncertain eventualities, is to be included.

11. Federal or State income and profits taxes shall be excluded."

By Mr. Hanley:

Q. Doctor, I hand you what is entitled "A Supplement to Report Dated August 8, 1938, On Survey of Cost of Retailing Gasoline in the City of Detroit, Michigan," and I handed this to you once before and I am not sure I asked you if you were certain that that is a copy of what you prepared on that subject.

A. I prepared such a report with such a title, and this has the general appearance of being a ~~copy.~~

Q. Will you take a moment to satisfy yourself that that is a copy of what you prepared?

A. I should hate to say it was an accurate copy.

Q. Well, can't you look at it for just a moment and determine whether or not it is a copy?

1147 This is off the record.

(Discussion off the record.)

A. It isn't a complete copy.

Q. What is short?

A. There were, I think, four appendices or supplements to the report originally—

Q. Well—

A. —which were important, as a matter of fact, for purposes of judging the adequacy of the report.

Q. Judge, insofar as the report does portray anything, is it a copy of what you wrote? Irrespective of whether there was something else or not, does what appears there coincide with what you originally reported?

A. Those supplements that I referred to, as a matter of fact, or appendices were rather an important component part of the entire report.

Q. Well, Doctor, maybe they were. I am not asking you about them. I am asking you if what appears in this document is a copy of what you wrote, so far as this goes?

A. It seems to be, as far as it goes. As I say, I reserve a right to check the accuracy.

Mr. Hanley: May I now have it marked, your Honor, for identification?

Trial Examiner Ballinger: The reporter will mark the document—this is off the record.

1148 (Discussion off the record.)

Trial Examiner Ballinger: The reporter will mark the document Respondent's Exhibit 2 for identification.

(The document was thereupon marked "Respondent's Exhibit No. 2," for identification.)

Mr. Hanley: May it be noted that it is on the cross-examination of the witness?

By Mr. Hanley:

Q. Now, I will leave this with you, Doctor—

A. O. K.

Q. —because I am going to ask you some questions about it.

Now, as I understand it, Doctor, this report, Respondent's Exhibit No. 2, is the report which you prepared relative to the city of Detroit alone, is that right?

A. With the usual exception, that there were supplementary matters contained in the report, that is true.

Q. So whatever appears in this report has to do with the city of Detroit, excluding all other territory?

A. That is true.

Q. Now, will you please look at page 4? It appears that you considered 409 stations in the city of Detroit for the purposes of making your conclusions; that is right; isn't it?

A. I considered more than that.

Q. Well, let me state it this way: You used 409?

1149 A. In preparing the final computations.

Q. Yes, sir. Now, how many did you consider on the city of Detroit. You will find it on page 4, Doctor.

A. It is also at the top of page 3. 462.

Q. Now, tell us what became of the difference between the total of 462 returns and 409 returns.

A. What became of them?

Q. Yes, sir. What did you do with them?

A. They are in my files in Ann Arbor.

Q. I know, but why didn't you consider them?

A. For the reason that they were either inadequate or unsatisfactory, or one reason or another.

Q. You say "inadequate or unsatisfactory." Now, in whose judgment were they inadequate or unsatisfactory?

A. Mine.

Q. Why?

A. Because in some cases we were unable to check figures which appeared on them and in certain cases the station operator reported on the wrong period of time, in spite of the fact that the questionnaire was very clear on that point. And there were certain cases where the reports were not notarized and the operator was either unable or unwilling to remedy that fact.

Q. Isn't it true, Doctor, that these 50 or 60 odd reports that you eliminated appeared on their face to be
1150 improper for your use?

Trial Examiner Ballinger: What do you mean by the word "improper"?

Mr. Hanley: Well, I don't know, Judge. I am asking the witness. Perhaps it is unfortunately framed. I will reframe the question.

By Mr. Hanley:

Q. Is it not true, Doctor, that you discarded from your consideration these 50 odd or 60 stations for reasons that appeared to you to be sufficient and which reasons were apparent on the face of the questionnaires themselves?

A. I think in most cases that would be true. I should hate to say that it was uniformly true that the reasons for discarding them appeared on the face of the returns.

Q. Do you think it is true in most cases?

A. I think, broadly speaking, that is true.

Q. Now, Doctor, you received 462 returns. I am talking about Detroit alone now.

A. That is right.

Q. And you say in your report on page 4 that you found it necessary to eliminate 53. Do you not regard 53 stations out of 462 as a high percentage of faulty returns?

A. Not at all.

Q. You don't think so?

A. No.

1151 Q. Now, you say, beginning at the bottom of page 3:

"In some cases it was necessary for the station operator to make out a complete new return which was duly notarized and used in place of the original return, but in most cases it was necessary only to fill in missing figures or to alter figures which were faulty."

Do you find that statement?

A. That is here.

Q. Now, did you do that?

A. Did I do that?

Q. Yes.

A. It doesn't say that I did anything.

Q. Well, I am asking you now, Doctor, did you?

A. Such action as was taken and described here was taken by the station operator.

Q. Well, did you fill in missing figures or alter figures?

A. No.

Q. Who did?

A. The station operator or in some cases my assistant, while he was at the station under the station operator's own eye.

Q. How do you know that? You weren't there; were you?

A. Those are the instructions I gave.

Q. Are you satisfied that they were followed, Doctor?

A. I certainly am.

Q. That is what you think; isn't it?

1152 A. That is what I believe.

Q. But where figures were filled in or altered you personally had nothing to do with it; was that true?

A. I didn't fill in or alter any figures on the returns.

Q. Any that were filled in or altered came to you without any knowledge on your part as to the basis for that filling in or that alteration; is that true?

A. No, I don't think that is true.

Q. Well, what did you know about it?

A. Because in such cases as I personally went on these field trips, where any figures were needed to be supplied, they were supplied by the station operator.

Q. I asked you that, Doctor, if there were any instances where you personally filled in figures or altered figures, tell us about it.

A. I filled in no figures on any returns and altered no figures on any returns.

Q. Well, did anybody do it in your presence?

A. Oh, undoubtedly in—in some of the—well, this was three years ago. In some of these details precisely what happened on some returns and some field trips are a little bit difficult to recall.

Q. I appreciate that, Doctor, but it is important that you remember if you can. You have reached a conclusion here which is, assumably up to this time binding upon 1153 a defendant in this lawsuit.

Now, I want to know in how many instances you filled in or altered figures.

A. I have already answered that question.

Q. Well, you haven't given us a figure. Can you?

A. I answered the question "no."

Q. You don't know?

A. I did not say that.

Q. Well, tell me how many figures—

Mr. Austin: He said "no." He said he never did.

By Mr. Hanley:

Q. Well, did you do it in the presence, or did anyone do it in your presence?

A. It might have been done in my presence by the station operator.

Q. Have you any notion how many stations that might have happened at?

A. Very few in my presence.

Q. Well, three or four or ten or a dozen?

A. Oh, more likely three or four.

Q. I see. So, as a matter of fact, if any figures were filled in or altered, as you have stated on page 4 of Exhibit 1, it was done by someone other than yourself and not in your presence; is that right?

A. In general, that is right.

1154 Q. Now, in the last paragraph on page 4 you say: "After the returns had been completely checked computations were made of the cost of selling gasoline by each individual gasoline station."

What do you mean by the term "completely checked"?

A. Checked to such—that is, completely checked as far as the procedure seemed to demand.

Q. Well, we don't know what that means, Doctor. Tell us what you did.

A. Well, as the returns came in each one was carefully inspected by me.

Q. By whom?

A. By me.

Q. Everyone of them?

A. Everyone of them.

Q. All right. Go ahead.

A. I went over them with great care, and all of those which appeared to be or actually were defective on the face of them were checked in the field with the station operator out of his records. A considerable number—a considerable number of additional returns which did not appear to be defective on the face were also checked in the field in the presence of the station operator.

Q. All right. Taking the total of those returns that were checked in the field, irrespective of whether you
1155 thought they were defective or not, how many out of the 409 stations did you check in the field?

A. Did I check personally?

Q. That is right.

A. Well, that is one of the details that I can't recall precisely. I suppose perhaps, oh, between 10 and 20, say.

Q. That is, you examined between 10 and 20 out of 462?

A. In the field; yes.

Q. In the field?

A. That is true.

Q. Now, did somebody else check some more in the field?

A. Oh; yes.

Q. Who was that?

A. That was my—one of my assistants.

Q. And how many did he check, if you know?

A. I think the figure here is 183. That is—that is—

Q. Do you know that?

A. —that is the total number that were checked.

Q. Do you know that?

A. He reported to me that he checked them.

Q. All you know about it is what he told you; is that right?

A. Also in the case of those that were—

Q. Well, is that right, Doctor?

A. Oh, no, of course, it isn't right.

1156 Q. Well, then, tell me what the fact is. You can answer it yes or no, you know, if you want to.

A. Well, insofar as returns were defective on their face, that is, perhaps they didn't report certain important figures such as the total number of hours worked, for instance, which was necessary; and he took them out in the field. They were brought back with such—in general with such figures supplied or without them, in which case they were discarded.

Q. That is to say, Doctor, he took certain reports out and he came back with certain figures, and that is all you know about it; isn't it?

A. I wasn't with him.

Mr. Austin: Your Honor please,—

By Mr. Hanley:

Q. Do you know where he got the figures?

Mr. Austin: —I think this line of questioning is going pretty far. It is perfectly obvious nobody can make a survey on gasoline stations in an area as large as Detroit and do it personally, unless it is done under supervision. The witness has testified it was done, in his opinion, according to proper accounting principles. He has testified who his assistant was, and so forth, and this seems to be more or less quibbling upon whether or not he knows what was done. I don't think this is at all a question of hearsay evidence when you are talking about an economic report.

1157 Trial Examiner Ballinger: Apparently counsel for the respondent is merely endeavoring to ascertain just what knowledge this witness had of the facts—or the statements embodied in his report.

Mr. Hanley: Exactly.

Judge, I am going to give you now the basic theme in this examination. It may be that Dr. Taggart did a careful job in his report. I don't know. I am not an economist myself. I think there are fallacies in it, but irrespective of that fact, Dr. Taggart has just reached a wrong answer. Now, that much I know. And I want to find out where the difficulty is, why he got that wrong answer, because, Judge, he got it. That is all there is to that.

Trial Examiner Ballinger: Proceed.

1158 Mr. Austin: Well, starting out on the assumption he got a wrong answer, of course, there could be an awful lot of questioning, and after it is all over it may turn out the answer is right; we don't know.

Mr. Hanley: Well, if we know anything in our shop, we know the oil business.

Trial Examiner Ballinger: That is the province of the cross-examination, to find out if he can.

Mr. Hanley: May I have the record as to the last question and the answer, please?

(Question read.)

By Mr. Hanley:

Q. Now, will you answer that, please?

A. Which figures were these?

Q. The figures that were supplied or altered in the field.

A. My instructions to him were to—

Q. I did not ask you that, Doctor. Do you know where he got the figures that were filled in or altered?

(There was a short lull.)

Q. Don't you understand that question, Doctor?

A. I understand it very well, indeed.

Q. Can you answer it?

A. I am trying to formulate my answer.

I know where he got them so far as any accountant or
statistician or economist knows where figures were
1159 obtained by someone under whose direction they
were—

Q. Do you mean by that he told you where he got them?

A. Yes.

Q. I am not interested in what he told ~~you~~. I am interested in what you know about it.

Do you know that?

A. Not in any absolute sense, no.

Q. Doctor, just to clarify this thing, if you will, please, refer to page 5 of that Exhibit 1, and to page 2 there seems to be a discrepancy in the number of stations considered, 1886 on page 2 and 1879 on page 5. That may be typographical. Can you clear it up for us.

A. It was not precisely typographical, as a matter of fact, but it amounted ~~to that~~. It was matter of the failure to count the individual stations on these sheets that we talked about yesterday correctly.

Q. Now, on page 9 of your report you have indicated that it was impracticable on account of the large expense, and so forth, to make a survey of these stations individnally. I think you have testified, Doctor, that that would have been the preferable method if you could have employed it.

A. That is true.

Q. And this is the next best method that you could devise; is that right?

A. That is very true.

1160 Q. Will you please turn to page 15. I find this statement, Doctor:

"Many of the returns bore evidence that certain of the figures had been estimated rather than taken from books of account."

Did you reach that conclusion after your review of the returned questionnaires?

A. Yes.

Q. Did you have any information as to the basis for the estimation of any of those figures?

A. We did in those cases where they were checked, where those estimates were checked.

Q. Now, you mean by that, as I understand you, Doctor, that you sent somebody into the field with instructions to find out about these questionnaires, and he came back and reported certain things to you and you are just presuming, are you not, now, that he learned from the station operator the basis of the estimation?

A. That is what he reported to me.

Q. And that is all you know about it, isn't it?

A. That was enough to satisfy me.

Q. Well, you are satisfied, Doctor, because you believed the man you sent into the field, now, isn't that the fact?

A. I should not have hired him if I had not thought he was trustworthy.

1161 Q. Well, I understand, but you believed him, didn't you?

A. Of course.

Q. And all you know is what he told you?

A. In the absolute sense in which you are using that term.

Q. Right.

A. Yes.

Q. Now, so far as you know all he knows or knew was what the service station operator told him; is that no true?

A. Well, he was instructed to look at the service station operator's records.

Q. I don't care what he was instructed to do, Doctor. Isn't it a fact, so far as you know, that all he knew was what a service station operator may have told him?

Mr. Austin: I object, Your Honor. That is a conjectural question. The witness has stated what his instructions were, and he stated he only knows what report was brought back pursuant to those instructions.

Mr. Hanley: I think that is sufficient.

I will withdraw the question, Judge.

Trial Examiner Ballinger: The question is withdrawn.

By Mr. Hanley:

Q. Now, Doctor, on the same page 15, you make this statement:

> "Wherever we found that an estimate was either
> 1162 too high or was not founded on reasonable demonstrable facts, we eliminated the figure from the computation."

What do you mean by "we"?

A. Well, that might be an editorial "we." As a practical matter of fact, I should have used "I."

Q. All right, you did it. Now, on what basis did you do it?

A. On the basis I felt the figure was not reliable, therefore it should not be used.

Q. In other words, you used your own judgment?

A. That is correct, I used my own judgment.

Q. In other words, you took these returns and you put them into shape that you think they ought to have been in; is that right?

A. It is not precisely correct.

Q. Well, explain.

A. I took the returns as they came in, checked them to such extent as seemed necessary under the circumstances, and in general accepted the result.

Q. In general?

A. Yes, in general.

Q. You accepted the result?

A. That is true.

Q. Now, if there was something out of line with the "in general conclusion" that you reached, you just
1163 fixed it up; is that right, Doctor?

A. Fixed it up might be in either direction.

Q. Well, I suppose so.

A. What is said here is that the figure was eliminated.

Q. Yes, sir. When you eliminated it, what was the result after that, did you use it at all?

A. In some cases—do you mean use that figure?

Q. Let me understand you, Doctor.

Did you eliminate some figures on some questionnaires and then used that questionnaire in your survey?

A. Yes.

Q. So you took out of some of these questionnaires the figures that had been put in there by the service station operators?

A. That is correct.

Q. And you did that on your own judgment; is that true?

A. I doubt if any figures were eliminated unless we had attempted to check them in the field and found that the service station operator either could not substantiate them, or that he had misunderstood or in some other way we discovered the figure was not a satisfactory figure.

Q. I see. But, Doctor, however you may have eliminated the figure, you did use the questionnaires from which you eliminated certain figures?

A. That is correct.

1164 Trial Examiner Ballinger: Doctor, except where you made a recheck back against the books of the service station owner, what basis could you have had for the elimination of any figures?

The Witness: Well, I do not think that as a matter of fact that we did eliminate any figures except in those cases where we did make some attempt to check them with the station operator.

Trial Examiner Ballinger: Well, you say you do not think you did. Is that your best judgment?

The Witness: That is my best judgment, yes. As I say, this was 3 years ago, and some details of the operation have escaped me which I should have remembered if this examination had taken place—

Trial Examiner Ballinger: Could you conceive any other basis for elimination of figures other than the one I stated?

The Witness: No, no reasonable basis; that is true.

By Mr. Hanley:

Q. Are you willing to say positively, Doctor, that you did not eliminate any figures from any of these questionnaires except where you checked in the field?

A. I should hate to make that statement with complete positiveness. I think it is a bare possibility that we 1165 might have found a figure, for example, which obviously did not belong in the picture which perhaps was labeled in such a way as to indicate that it was not a proper figure, and under those circumstances we would eliminate it.

For example, certain station operators are purchasing equipment or purchase their stations under contract, and once in a while we found a case where the operator indicated on the face of his return, contract or payment on contract so much, $89.50, or whatever the amount might be. Now, under those circumstances that is obviously a figure which we did not ask for, which did not belong in the computation, and, therefore, we eliminated it, and would eliminate that without any reference to the dealer himself; that is, he was simply mistaken in believing that that was part of his operating costs.

Q. So you did eliminate figures without reference to the service station operator himself?

A. It could have happened under those circumstances.

Q. Now, on page 18, Doctor, at the top of the page, you make the statement: "Miscellaneous expenses were accepted as reported with the exception of certain cases where they appeared to be obviously too high."

What do you mean by "obviously too high"? Too high to whom?

A. Too high in view of the character of the opera- 1166 tion, and the station, and the volume of gas sold.

Q. What do you mean by that, in your judgment they were too high?

A. They appeared to be too high and that was one of the circumstances we would take the return back to the operator, try to get an explanation.

Q. Now, did you revamp any figures of that character that you did not take back to the service station operator himself, could you say that positively?

A. It indicates here that there were some cases where an explanation of the miscellaneous expense items which we requested indicated clearly that it did not belong there.

Q. That is what I am asking you about, Doctor. Is that statement, Doctor,—and I am asking you now if you did it in any case where you did not take it back to the service station operator?

A. And in those circumstances where the explanation indicated clearly that the expense item, so-called, did not belong, we may have eliminated it without taking it back to the service station operator.

Q. You may have done so?

A. We may have done so.

Q. You are not able to say whether you did do so; is that right?

A. I am not able to say that we did. It is entirely
1167 possible.

Q. Now, doctor, you knew yourself to be a much better bookkeeper than any one of these service station operators, didn't you?

A. Well—

Q. We concede that, Doctor. You do not need to be modest about it.

A. I do not think that is true. As a matter of fact, we found some of these service station operators that were very good bookkeepers.

Q. You had a most unusual experience.

A. I said bookkeepers, of course.

Q. But you could tell, so you thought, could you not, the proper relations of these various items of expense that came in in the questionnaires, so that if one was abnormally high or abnormally low it registered on your mind; isn't that true?

A. That is broadly true, yes.

Q. And you fixed it up; isn't that true?

A. After the proper checking and consultation with the station operation and other examination.

Q. And in some cases without consultation with the station operator; isn't that true?

A. Only where it was indicated on the fact of it that the item was improper.

1168 Q. Are you sure of that?

A. I answered that question before.

Q. Well, answer it again, Doctor.

What I am trying to find out is a very simple thing, Doctor. I want to know if you altered, entered, or eliminated any figures on any of these questionnaires without consultation with the service station operator for any reason?

A. That has been answered in the affirmative.

Q. Now, you considered in your analysis certain cost factors based on whether a service station operator owned his property or leased it; that is true, isn't it?

A. That has been answered in the affirmative.

Q. Now, you considered in your analysis certain cost factors based on whether a service station operator owned his property or leased it; that is true, isn't it?

A. That is true.

Q. And you accepted the statement of the operator in his questionnaire as to the facts relative to his leasing or owning his property?

A. That is true.

Q. On page 19, Doctor, in the second paragraph, the second sentence, you make this statement: "the rate used, namely, 5 percent, was thought to be conservative and was also very convenient for purposes of computation."

Now, you are referring there, are you not, to a 5 percent interest rate which you allocated as a cost in cases where property was owned by the operator?

A. That is true.

Q. Now, did you use 5 percent because it was con-
1169 servative or convenient?

A. Primarily because it was conservative.

Q. Ten percent would have been more convenient than 5 percent, wouldn't it?

A. It certainly would have, very much more.

Q. But 5 percent was sufficiently convenient?

A. That is the case.

Q. Now, Doctor, I would like to have you tell the court in how many instances you personally looked at the basic records of service stations in Detroit in 1938?

A. I have already testified that I do not remember the exact number of stations which I visited at that time; in fact, I unfortunately did not keep a precise record in those cases where I did visit; however, I saw such books and records as the station operators had.

Q. And your best judgment as to the number?

A. I think I testified a few minutes ago that it probably was somewhere between ten and twenty.

Q. Now, isn't it a fact, Doctor, that service station operators do not keep adequate records of their business, generally speaking?

A. It depends on what you mean by "adequate." It depends entirely on what your standards are.

Q. Well, I will let you define the word "adequate," in

your judgment as an economist, and a bookkeeper,
1170 and an accountant. Is it or is it not true that service
station operators generally keep adequate records of
their business?

Trial Examiner Ballinger: Now, when you say "adequate," you mean a record that fairly reflects their expense and income?

Mr. Hanley: Right, Judge, fairly reflects the whole complexion of their business.

Mr. Austin: I object to that question unless it is restricted to whether they keep adequate records for the purpose of obtaining information used in this survey. The Doctor prepared a questionnaire. He may have prepared that questionnaire with some knowledge of what kind of records service stations keep and have asked for cost items which he thought they could supply. I don't know, but I just—I feel that the word "adequacy" of the records of a service station from the standpoint of an expert accountant may be one thing, and their adequacy for the purpose of a cost survey may be something else. If you restrict it to the question of cost—

Trial Examiner Ballinger: The sole purpose of the examination is to elicit whether from their records they could have prepared and furnished the information that was later included in this report.

Mr. Austin: Yes, the information asked for in these questionnaires.

Mr. Hanley: Right. Of course, Judge, I do not
1171 expect this witness to place upon the filling station
man the standard or yardstick of accountancy that
he, himself, might use. I am asking him if they had adequate records of their business. He knows surely what that means, a reflection, a true reflection of what they did.

Trial Examiner Ballinger: The objection is overruled. The witness may answer.

A. In so far as we had opportunity to examine their records, we found that in most cases they were adequate for the purpose of supplying the information which was contained on the blanks that they filled out.

By Mr. Hanley:

Q. Well, isn't it true, Doctor, that service station operators, generally speaking, keep very incomplete and inadequate records of their business?

A. They keep incomplete records, that is the impression that I have. As far as inadequacy is concerned, you again must define the term "inadequate." They keep such records as generally satisfies them.

Q. Does it satisfy you?

A. And if it satisfies them that is one test of adequacy.

Q. Well, does that satisfy you?

A. It might or it might not.

Q. That is to say, Doctor, if they had expense ac-
1172 counts for the month of February and did not have any for the month of May, that might be entirely adequate to satisfy the service station operator as to what his cost was, but did you accept that kind of a record?

A. Oh, no, of course not.

Q. That would not be adequate to satisfy you, would it?

A. Obviously not.

Q. Now, with at least that much of a definition, did you find or has it been your observation and experience that service station operators generally keep complete and adequate records of their business?

A. Our observation in those cases where we observed was to the effect that their record were not complete.

Q. As a matter of fact, Doctor, the only business place handling gasoline at retail that kept reasonably good and complete records were large outlets, were they not?

A. I would not say that.

Q. Haven't you so stated in your book?

A. Where?

Q. Well, I am sorry. I gave it to the Reporter but didn't you make a statement to the effect that it was difficult to find adequate and complete records of a bookkeeping nature in small businesses, and that statistical data could only be acquired in reasonably complete form from large outlets? That is not your language, Doctor, but I am
1173 trying to give you the substance of what I think you said in your book.

A. I may have made some such statement as to the first part of that. The second part obviously might or might not be true depending on what kind of statistical data you wanted and how complete the statistical data had to be, and for what period, and so on and so forth; that is, there are small businesses which might be able to furnish certain data quite satisfactorily, many of them.

Q. Now, Doctor, I ~~do not want to pursue this any fur-~~

ther. I just want a candid answer from you for the aid of the Court in just a layman's terminology: Isn't it true that these small retail outlets do not keep good records, whereas the big outlets may do so?

Trial Examiner Ballinger: Restricting it now to the area in which your survey was made.

A. I think if you qualify that statement by saying generally or broadly speaking.

By Mr. Hanley:

Q. I wish to qualify it that way, Doctor.

A. It is true that the records of the larger stations, as we found them, were generally more complete, and, if you please, more adequate, and for more purposes than the records of the small stations.

Mr. Hanley: Off the record, please.

Trial Examiner Ballinger: Off the record.

1174 (Discussion off the record.)

Trial Examiner Ballinger: On the record. We will take a recess for five minutes.

(There was a short recess taken.)

Trial Examiner Ballinger: Come to order, gentlemen. Proceed.

By Mr. Hanley:

Q. Doctor, adverting to the time contemplated by your survey, which was the month of May, 1938, please tell us just why you chose May.

A. For two reasons: One was that May was a suitable month for this purpose, in my judgment.

Trial Examiner Ballinger: Now, you say "suitable." What do you mean?

The Witness: I mean that it is a fairly representative month in the gasoline business, that sales are relatively high in comparison to the general average of sales, and that business is presumably fairly normal at that time, that expenses might be expected to be more or less normal, and so on and so forth.

By Mr. Hanley:

Q. Have you concluded your answer?

Trial Examiner Ballinger: What is your second reason?

The Witness: Oh, my second reason. As a matter

1175 of fact for choosing May, rather than June, for instance, which would have been equally good, for the reasons that I have stated, was that it was desired to get the survey started and under way and completed in as expeditious a manner as possible in view of the local situation.

By Mr. Hanley:

Q. Now, Doctor, is it not true that the year 1938 was a bad year in the oil business? I mean by that, there were abnormally reduced sales of petroleum products, including gasoline?

A. That is entirely out of my territory.

Q. Well, don't you know that?

A. No.

Q. Didn't you undertake to learn anything about that in choosing a time for developing a general cost survey, Doctor?

A. No.

Q. You just ignored that?

A. I ignored it.

Q. I will ask you if it is not a fact that in 1938 the consumption of gasoline in the State of Michigan declined 5.1 percent from that of 1937?

A. Are you asking me if that is a fact?

Q. I am asking you.

Trial Examiner Ballinger: Have you any knowledge?

The Witness: I have no knowledge.

1176 By Mr. Hanley:

Q. Did you undertake to learn anything about that when you made your survey?

A. At the time, of course, it was impossible to learn about that because the year had not passed yet.

Q. Well, did you know anything about the situation in 1938 as compared with other years?

A. No.

Q. And you didn't undertake to learn?

A. That is true.

Q. Is it not a fact that gasoline consumption in 1938 was 8.6 per cent below the accomplishments of 1939 in Detroit?

A. Are you asking me if that is a fact?

Q. Yes; I am asking you.

A. I don't know.

Q. Have you made any effort to ascertain?

A. I don't see that that has any bearing on the survey, as a matter of fact.

Q. Well, irrespective of your judgment in that respect, just please answer the question. Have you made any effort to ascertain?

A. I have not.

Q. So you just don't know; that is right, isn't it?

A. That is correct.

Q. Well, isn't it true that sales levels were abnormally low in 1938 in respect of sales of gasoline
1177 in Detroit?

Trial Examiner Ballinger: Have you any knowledge on it?

The Witness: No.

By Mr. Hanley:

Q. Did you undertake to learn anything about that in connection with your survey?

A. No.

Q. Is it not true that there was a general business recession in 1938, including commerce, in sales in gasoline?

A. There was a general business recession which started, presumably, along in the fall of '37. The production indices, and so on, indicates that, and which presumably wasn't entirely passed in the spring of '38.

Q. Wasn't that recession more severe in the City of Detroit than elsewhere in the country?

A. I don't know as to that.

Q. Have you any familiarity at all with the automobile industry in the City of Detroit?

A. Oh, I know where the large units of the automobile industry are located in Detroit; yes.

Q. Detroit is essentially a producer of automobiles; is it not?

A. Well, I wouldn't go so far as to say that. There is quite—

1178 Q. Well, it is a large producer of automobiles?

A. Oh, it is a large producer of automobiles; yes.

Mr. Hanley: May we have this marked as an exhibit, Your Honor?

Trial Examiner Ballinger: The Reporter will mark the document Respondent's Exhibit 3, for identification.

(The document was marked for identification "Respondent's Exhibit 3.")

By Mr. Hanley:

Q. Doctor, I hand you what has now been marked Respondent's Exhibit 3, for identification, which purports to show, in graph form, the automobile production in this country, seasonally adjusted, and which purports to show the nadir of the line in the summer of 1938, including May of 1938, and will ask you to examine it and state whether or not, in your judgment and knowledge as an economist, it fairly and accurately portrays the trend of the automobile business?

A. I couldn't venture an opinion.

Q. You just don't know anything about that; is that true?

A. I have seen charts like that, and I know that they are prepared by statisticians and others, and presumably very capable ones, but that doesn't indicate who prepared it or where or when or by what method the figures were arrived at, or anything of the kind. I have no way of knowing that.

Q. Doctor, I am asking you—just assume the office boy made it. I am asking you if it correctly portrays the fact, in your judgment and opinion as an economist? Can you answer that question? 1179

A. I haven't followed the industry with any such care.

Q. You don't know, then; is that true?

A. That is true.

Trial Examiner Ballinger: The Reporter will mark the document Respondent's Exhibit 4, for identification.

(The document was marked for identification "Respondent's Exhibit 4.")

By Mr. Hanley:

Q. Are you able to say, Doctor, out of your own knowledge, without reference to any figures, that automobile production was abnormally low in May, 1938, as compared with a couple of years before and after May, 1937?

A. No.

Q. You are not able to say that?

A. That is correct.

Q. Doctor, do you regard the Standard Oil Company of Indiana as a fairly representative marketer of gasoline in the City of Detroit?

A. I should think so

Trial Examiner Ballinger: Judge, merely for the purposes of the record, when you refer to the Standard Oil Company of Indiana you are referring now to the Respondent?

1180 Mr. Hanley: That is true, Your Honor.

By Mr. Hanley:

Q. I show you what has now been marked Respondent's Exhibit, for identification, No. 4, which purports to show the variance of sales of gasoline in the City of Detroit, and call your attention particularly to the point that is represented by the month of May, 1938, and will ask you if you think that that is fairly representative of the trend of sales of gasoline in Detroit for the years 1937 through 1940.

Mr. Hanley (To Mr. Austin): I will give you copies.

Mr. Austin: Your Honor, the witness has already testified that he doesn't know how '38 compares with other years.

Trial Examiner Ballinger: Well, if he has any knowledge—

Mr. Austin: And obviously he doesn't know anything about it, Judge.

Trial Examiner Ballinger: —basic knowledge—knowledge upon which he can base an answer, he may answer.

Mr. Hanley: Of course, I think that is the fault in this survey, that he doesn't know.

By Mr. Hanley:

Q. Can you answer that question, Doctor?

A. I can't answer it, and, furthermore, it couldn't have been answered in 1938.

1181 Q. Well, it could have been answered in 1938 as related to previous years, couldn't it, Doctor?

A. Oh, as related to previous years; yes.

Q. Did you make any effort to learn what the facts were in connection with previous years?

A. It was entirely unnecessary to make any such study for purposes of the survey.

Q. That is your opinion?

A. That is my opinion.

Mr. Hanley: May we have this marked Exhibit 5?

Trial Examiner Ballinger: The Reporter will mark the document Respondent's Exhibit 5, for identification.

(The document was marked for identification "Respondent's Exhibit 5.")

By Mr. Hanley:

Q. Doctor, I hand you what has now been marked Respondent's Exhibit No. 5, for identification, purporting to show, in graph form, the total consumption of gasoline in the State of Michigan from the year 1933 through the year 1940, and will direct your attention particularly to the situation as disclosed for the year 1938, and, more particularly, for the month of May, 1938, and will ask you if it isn't a fact that consumption of gasoline in the entire State of Michigan, including Detroit, declined materially in May, 1938?

Trial Examiner Ballinger: Is his answer to be 1182 based on the information contained in the document?

Mr. Hanley: No. No. I am just asking him, Your Honor. If he gets any aid from the exhibit, all right, but I am asking him.

A. Of course, you realize I know nothing about this exhibit, who prepared it, what it is—

By Mr. Hanley:

Q. I am not asking you about the exhibit.

Will you read the question, please.

Trial Examiner Ballinger: Have you any personal knowledge, independent of that document, or does that document refresh your recollection?

The Witness: The personal knowledge that I have, independent of this document, is in connection with the stations whose returns we got, and in the case of those particular stations the gallonage in May was higher than it had been, on the average, in the preceding months of 1938.

By Mr. Hanley:

Q. Do you conclude from that fact, Doctor, that there was an increased consumption of gasoline in Detroit in the year 1938, or, more particularly, in the month of May, 1938, as contrasted with prior periods?

A. Of course not.

Trial Examiner Ballinger: Judge, what is the materiality of that question?

1183 Mr. Hanley: The materiality, Your Honor, is that the witness chose a bad month. It doesn't reflect the facts. This is one reason for it. There was a depressed market.

By Mr. Hanley:

Q. Now, Doctor, is it not true that the period of heaviest gasoline consumption or sale occurs over the week ends?

A. That is true, of certain types of gasoline consumption or sale. That is for—

Q. I am referring to total consumption.

Trial Examiner Ballinger: Have you any knowledge about the consumption of gasoline over the week ends?

The Witness: I do. I do have a certain amount of knowledge of that because, of course, I know in general who consumes it. It is consumed by pleasure cars and by cars used for business and by delivery trucks and for commercial purposes generally, and so on.

Now, some of those uses obviously would be more heavy in the week end and others would be lighter.

By Mr. Hanley:

Q. Well, can you make a direct answer to the question, Doctor: Is it not true that the peak period of gasoline sales occurs on the week ends, as contrasted with other days in the week?

A. Some types of sales, yes. Other types of sales, no.

Q. In relation—

1184 Trial Examiner Ballinger: Upon the whole, have you any knowledge that would enable you to answer the question?

The Witness: I couldn't answer that, on the whole.

By Mr. Hanley:

Q. Doctor, is it not true that during May, 1938, the precipitation in Detroit was abnormally heavy, being 4.42 inches as against a normal of 3.21 inches? Do you know?

A: I don't know.

Q. Did you make any effort to find out?

A. No.

Q. Did you give any consideration to that subject when you made this survey?

A. I did not.

Q. Is it not true that on the week ends for May, 1938, in Detroit the record of participation is as follows—

A. The record of what?

Q. Precipitation.

A. Oh, excuse me.

Q. —is as follows: May 1st, Sunday, no rain; May 7th, Saturday, .01 inch; May 8th, Sunday, .22 inches; May 14th, Saturday, 1.04 inch—

Mr. Austin: Your Honor, I object to reading these figures.

Mr. Hanley: Let me finish my question.

Trial Examiner Ballinger: One moment. Let 1185 counsel finish his question.

By Mr. Hanley:

Q. —May 15th, Sunday—

Mr. Austin: Well, it just goes in the record, is all.

Q. —.35 inch; May 21st, Saturday, a trace of rain and threatening; May 22d, Sunday, a trace of rain and threatening; May 28th, Saturday, .02 of an inch; May 29th, Sunday, a trace of rain and threatening?

Do you know?

A. I don't know.

Q. Did you make any effort to find out?

A. No.

Q. Did you give any consideration at all to the fact when you made your survey and chose the month of May?

A. I did not.

Mr. Austin: Now, Your Honor, I move to strike physically from the record the reading of what Counsel purported to be weather reports, upon the ground that it is prejudicial and improper to read into the record material which is presumably correct and yet which it is obvious at the time it is put in that witness knows nothing about.

Trial Examiner Ballinger: It has no evidentiary value.

Mr. Austin: It has no evidentiary—

1186 Trial Examiner Ballinger: It is in the record, but it has no evidentiary value.

Mr. Hanley: I just asked a question. Unless we prove it—

Mr. Austin: Therefore, I move to strike it physically because I think it has a—conceded it is not evidence, but I do not think it is proper to read material into the record for the purpose of having it on the record.

Trial Examiner Ballinger: The Examiner cannot very well direct that it be stricken physically. The only thing he could do would be to direct that it be stricken, and it would be in the record the same.

Mr. Austin: That is why I object to it.

Trial Examiner Ballinger: It has no value, evidentiary value.

Mr. Hanley: We understand that.

Trial Examiner Ballinger: And the Respondent is paying for this record largely, so—

Mr. Hanley: Yes; unless we prove it it has no probative value. We concede that.

Mr. Austin: Well, I still wish to have my protest recorded against reading material into the record which has no evidentiary value, which it is known in advance that the witness cannot affirm.

Mr. Hanley: I am going to prove it. I will—

1187 Trial Examiner Ballinger: Unless Counsel is a mind reader he couldn't very well know in advance that the witness had no knowledge.

Mr. Austin: The witness so testified.

By Mr. Hanley:

Q. Now, Doctor, you undertook, by your use of the month of May, to get a figure which would be representative of a normal month over a long period of time; did you not?

A. That is very true.

Q. Is it not true that gasoline sales during the month of May represent a higher proportion of total income at a service station than does the average month of the year?

A. I have no knowledge of that.

Q. Didn't you undertake to prove it in your survey by a reference to the first five months of 1938 and by a reference to the year 1937?

A. No revenue figures were obtained for other months, as a matter of fact, on the basis of which such a conclusion could have been reached. I—such a conclusion may possibly be true but—

Q. Didn't you reach it, Doctor? Look at your report.

A. Pardon?

Q. Look at your report. Didn't you actually reach that conclusion?

A. You better restate the question. Not as I 1188 understood you.

Q. All right.

That gasoline sales during the month of May represent a higher proportion of total income than does the average month of the year?

A. Gasoline sales during the month of May represent a higher proportion of income—you mean a higher proportion of total revenues of the gasoline station?

Q. That is right.

A. I don't see why they should.

Q. Well, didn't you reach a conclusion of that kind in your report, Doctor?

A. Oh, no. Not at all.

Q. Well, assuming that that is true, if you don't know, would not the use of a ratio of 80.75 percent as a means—that is, percent of total revenues—as a means of determining the proportion of expense assessable to sale of gasoline be high as compared with a corresponding figure based on annual dollar volume?

A. Of course, I didn't use that ratio, as a matter of fact. The ratio—

Q. Well, look at your report. It is on page—

A. —actually used—oh, excuse me. Yes.

Q. Page 14.

A. I was thinking of the Wayne County report. I am sorry.

1189 Q. You did use 80.75 percent as a ratio; did you not?

A. That is what the ratio was in the month of May.

Trial Examiner Ballinger: In the Detroit report?

The Witness: In the Detroit report; that is correct. That is what the ratio was during the month of May, 1938.

Mr. Austin: Ratio between what, may I ask?

The Witness: Gasoline sales and total sales.

Mr. Austin: In dollars?

The Witness: In dollars.

Mr. Austin: Dollar sales.

By Mr. Hanley:

Q. Now, is it not a fact, Doctor, that the so-called spring or summer service on automobiles is largely completed through the month of April and prior to the month of May? For your information, I mean by that the change-over from winter conditioning to summer conditioning of cars; that is, changing of oil and grease and anti-freeze solution and new tires, and so on.

A. I don't know that.

Q. You didn't give any consideration to that fact in choosing the month of May?

A. If it is a fact, I didn't.

Q. Is it not a fact that change-over period results in a high revenue during the months of April and March at service stations in relation to the amount of gasoline sold?

1190 A. It might represent a fairly substantial amount of revenue in whatever period it takes place, whether it would be—

Q. Well, do you know whether it would be—

A. Whether it would be high in comparison to the normal ratio of gasoline sales, I don't know.

Q. I am just asking you, Doctor. If you don't know, say so.

Trial Examiner Ballinger: He says he doesn't know.

Mr. Hanley: I want it on the record, Doctor.

By Mr. Hanley:

Q. Do you know or don't you?

The Witness: Would you repeat the question?

(Question read.)

A. I don't know.

Q. Very well.

Are you familiar with the fact, Doctor, that in 1938 there was in Detroit in the retailing of gasoline what was known at the time as a price war?

A. I understood that that was true, yes.

Q. And the retailing business in gasoline was highly depressed? Did you so understand?

A. I didn't understand that; no.

Q. Didn't know that was true? You gave that no consideration in your survey?

A. Wasn't necessary for purposes of the survey.

Q. Well, irrespective of that, did you or did you
1191 not give it consideration, Doctor?

A. Survey was intended to find costs—

Q. Can you answer that "yes" or "no"?

Trial Examiner Ballinger: Doctor, you could answer the question "yes" or "no."

A. No, for the reason that the survey was intended to determine the costs—

Q. I don't care what it was intended for.

Trial Examiner Ballinger: One moment. The witness may explain his answer.

A. —for the reason that the survey was intended to determine costs as they actually existed at the time. The fact that there may have been a depression in the gasoline industry generally during 1938 has no bearing on the validity of the survey.

Mr. Hanley: I move to strike the voluntary speech of the witness for two reasons: First, it is immaterial, and, in the second place, the witness has already stated that he doesn't know that there was any such situation.

Trial Examiner Ballinger: Motion is denied.

By Mr. Hanley:

Q. Now, Doctor, how did you treat the item of depreciation?

A. How did I treat it?

Q. Yes, sir. What did you do with it in your analysis of costs?

1192 A. I included it in the computations.

Q. How?

A. It was ascertained for—on an annual basis, since depreciation is normally so stated. The amount was—together with other similar annual expenditures—was divided by twelve for purposes of reducing it to a monthly basis.

Q. How did you happen, Doctor, to arrive at the percentage of 5 percent?

A. Which 5 percent is that?

Q. That you used for depreciation, if you used that?

A. I used it in certain cases; yes.

Q. How did you happen to arrive at that?

A. That was the depreciation rate which was used as a standard in connection with depreciation on buildings.

Q. And that was the rate that was generally used in your work as you observed the N.R.A. cost set-ups; was it not?

A. Oh, not necessarily at all.

Q. Well, generally speaking?

A. No, no, no. Not at all. Not generally. Some buildings.

Q. Was there any reference at all to the allowance by the Internal Revenue Department on income taxes?

A. Oh, it has a reference to it, of course.

Q. Well, how does it relate?

A. Well, the Internal Revenue Bureau permits a reduction for depreciation on buildings, machinery, equip-
1193 ment, and similar assets, which allowance is commonly determined by applying some rate to the cost value.

Q. And what rate?

A. Oh, the rate varies, according to the nature of the—

of the asset. There are rates of one percent; there are rates of fifty percent, and probably rates higher than fifty percent, even, depending entirely on the nature of the asset and the circumstances under which it is used.

Q. How did you happen to arrive at 5 percent in connection with the particular property that you were dealing with in this survey?

A. It is a rate very commonly used by gasoline dealers in making up their income tax returns.

Trial Examiner Ballinger: Doctor, was it merely arbitrarily adopted by you, or did you have some basic reason?

The Witness: It was not adopted arbitrarily. It was adopted—

Trial Examiner Ballinger: State the basic reasons for the adoption of the rule.

The Witness: It was adopted after consultation with gasoline dealers and others who knew about gasoline dealers' operations, and I found that—

Trial Examiner Ballinger: Well, what factors entered into it?

The Witness: The two principal factors entering
1194 into all depreciation rates. One is wear and tear,
and the action of the elements; that is, physical wearing out of the assets which makes it necessary to replace them. Another is the complex of the economic results which are commonly known as obsolescence and inadequacy, and so on, and every depreciation rate, practically speaking, that is in actual use both for accounting purposes, for purposes of determining costs; and for purposes of the income tax computations, are based on those two principal factors. I found that gasoline dealers very commonly used a rate of 5 percent on their buildings, as a matter of fact. In a great many cases I actually found that they used higher rates than that. In relatively few cases where they actually made income tax returns did they use a lower rate than 5 percent.

Trial Examiner Ballinger: You are speaking now of the Wayne County District?

The Witness: Of the Detroit and surrounding area; that is true.

By Mr. Hanley:

Q. Were you not influenced to a considerable extent by reason of the fact that they used that 5 percent rate in income tax reports, Doctor?

A. Yes, I think I was influenced by that fact.

Q. I call your attention, Doctor, to page 42 of your book, on which you make this statement:

1195 "For the most part"—you are talking about depreciation—

"For the most part, the N.R.A. authorities attempted to settle comfortably back on the rules as to both factors developed by the Bureau of Internal Revenue, even though it was recognized that rules satisfactory for income tax purposes might not be entirely suitable for cost accounting."

Again quoting:

"A few codes contained a provision which purported to be an acceptance of the income tax basis for depreciation, but which was, in fact, a joke to anyone who read it with care and an elementary knowledge of federal income tax practice. This provision specified 'depreciation * * * computed according to the maximum rates of the Income Tax Procedure.' It ignored the fact that the rates must be applied to some base, in order to obtain any result, and assumed that there were such things as 'maximum rates of the Income Tax Procedure.' The Bureau of Internal Revenue has never committed itself to any generally applicable rates of depreciation, maximum or otherwise, and presumably never will."

Again quoting:

"Strict adherence to the income tax return might, in some cases, produce no depreciation at all, either because the concern has failed to take advantage of the deduction through ignorance or inertia, or because an industry

1196 member, seeing an opportunity to 'chisel' the cost formula, might deliberately fail to take a depreciation allowance in years when, on account of being in the red anyway, he could afford to neglect it. The income tax law does not force the taking of depreciation, if the taxpayer chooses to ignore it, and there are many concerns which are not earning their fixed costs, including depreciation, and can disregard depreciation without increasing their taxes."

Did you make these statements?

1197 Mr. Austin: Your Honor, I object to this question which includes what has been read into the record on the ground that it is irrelevant and immaterial, and that the witness, while he said he was influenced by the practice, the existing practice of using 5 per cent in return of these gasoline dealers, that is a fact and has nothing to do with what the practice of the Internal Revenue Bureau is, or what the witness' opinion of the practice of the Internal Revenue Bureau is.

Trial Examiner Ballinger: The examiner is of the opinion that it has some possible connection, and accordingly the objection is overruled.

The Witness: Your Honor, this series of quotations which Judge Hanley has just read is taken out of the context of a discussion of the depreciation for NRA purposes which runs over a total here of some 10 or 11 pages, which does not fully express my views on the subject of depreciation. He has omitted between the sentences which he chose to quote a considerable number of sentences which further clarify what I was talking about at the time, which make it obvious that—without which the quotations which he had read are not completely understandable—

Mr. Hanley: Now, just a moment, Doctor.

I move to strike all of the voluntary statement of the
witness. I asked the question of the witness as to
1198 whether he made certain statements. That is the
only question on the record. If the witness has any explanation of those statements either the court or his own counsel can give him an opportunity to make such explanation, and it is entirely improper for the witness to inject a voluntary statement on the record having reference to some treatise that he wrote and without reference to his present opinion.

Trial Examiner Ballinger: The Trial Examiner does not agree with counsel.

The Trial Examiner is of the opinion that the witness is strictly within his rights. He claims that the question did not fairly portray what he had, or his position.

Mr. Hanley: I am willing to give him that opportunity, Judge, if he will just answer the question now.

Trial Examiner Ballinger: And the Trial Examiner will afford the witness the opportunity to mark the portions in the book that he thinks fairly portray his position and will direct the inclusion of those portions in the record.

Mr. Hanley: Very well.

By Mr. Hanley:

Q. Can you mark them, Doctor?

A. I certainly can.

Q. Will you do so?

A. I think this entire section on depreciation belongs in the record just as much as the portions which you
1199 read. It is necessary as a practical proposition for understanding the expenses.

Q. Well, let me get your—

A. Which you—see what I am talking about.

Q. Let me get your opinion now, Doctor.

Do you think now that the use arbitrarily of a rate of depreciation that is accepted by the Internal Revenue Department is a fair and reasonable cost depreciation figure to use in such a cost analysis as you made in 1938?

A. Entirely fair and reasonable.

Q. Do you think so?

A. Yes, sir.

Q. Notwithstanding what you said?

A. That is correct.

Q. In your book?

A. What I said in my book was that depreciation for income tax purposes might not be satisfactory income basis for cost purposes. In general my opinion is precisely the opposite, namely, that depreciation for tax purposes having been developed over a series of years by the taxpayer, by the Internal Revenue Department, oftentimes in controversy as to precisely what the rate ought to be, is a fair measure of the actual operating costs of a taxpayer and therefore is properly usable for cost accounting purposes, just as much as it is properly usable for income tax purposes.

1200 Q. Now, that necessarily goes back, does it not, Doctor, to the type of property involved, and the amount of valuation placed upon that property?

A. The income tax rules, of course, have only one primary basis for valuation, for depreciation purposes, and that is cost.

Q. I am not referring to income tax now. I am referring to the propriety of the use of an arbitrary base, such as you used in your cost survey.

A. It was not arbitrary.

Q. Didn't you use 5 per cent throughout?

A. That is not the base; that is the rate.

Q. Well, didn't you use that rate throughout?

A. No, sir.

Q. Well, what other rates did you use?

A. I used the figures in general that were supplied by the gasoline station operators.

Q. So you may have depreciated on the basis of 5 per cent or 6 per cent or 7 per cent, or any per cent, whatever was reported, is that true?

A. Well, not any per cent, not whatever was reported.

Q. Well, did you change the rate that was reported in some instances?

A. Only in certain cases where consultation was had with the gasoline station operator, and then only downward.

1201 Trial Examiner Ballinger: Then only what?

The Witness: Only downward. What I was seeking for was a conservative statement of his costs without any overstatement of cost. In cases—

By Mr. Hanley:

Q. But you did change the rate?

A. Where he showed a figure which would be based on substantially what appeared to be a high rate, that was one of the reasons why we carried the return back to him, to make sure that he had actually taken that rate of depreciation for tax purposes, and thought it was correct. In those cases we consulted with him, we thought his tax return in general, or a copy of it, would be retained, of course. In general we found that that higher rate was justifiable because of peculiar circumstances; occasionally it was a matter of the building having been erected on leased land which had to be returned to the owner of the land at the end of a specified period, such as 50 years. In those cases obviously 5 per cent is not enough. You have to use a rate that is just and commensurate with that 50 year lease period, where the return showed a lower rate than 5 per cent it was not questioned, because we felt then that that was a satisfactory figure.

Q. In any event, you changed it where you thought it did not reflect the proper depreciation charge?

1202 A. That is not true.

Q. Isn't it true at least as respects those instances where you consulted with the station operators?

A. There may have been a few instances where we saw a depreciation charge which appeared to be large, and where we consulted the station operator and found that he had either made an error in computation or had failed to understand the instruction with regard to reporting depreciation, and in those cases his depreciation figure would be revised downward in accordance with what we felt was the proper procedure.

Q. Now, you used that 5 per cent on buildings and land, is that right?

A. No, sir.

Q. On what?

A. On buildings.

Q. On buildings. All right. You used 10 per cent on what?

A. On machinery and equipment.

Q. Now, you asked in your questionnaire that the operator tell you the cost of buildings, land and equipment, that is true, isn't it?

A. That is correct.

Q. What costs did you understand you got from the reporting operator?

A. The amount he had actually paid or agreed to pay for the property.

1203 Q. So the figure you got denominated no reference at all to the then value, is that not right?

A. If the then value was different from cost, that certainly is possible, that the value would be different from cost.

Q. Well, in any event, the figure you got or thought you got represented what the operator spent to get the property under consideration?

A. That is true, and that is the commonly accepted method of determining depreciation.

Q. That did not have any reference to when he got it, how long he had it, or what the replacement value was, or what its existing value was?

A. That is true, because the commonly used method of determining depreciation is precisely that, namely, original cost is used regardless of whether the property was bought yesterday or last year, or 10 years ago, and regardless of current value which in a great many cases is wholly unascertainable, and which is not ascertained normally for depreciation purposes.

Q. Now, you charged 5 per cent interest, did you not, on land, buildings, and equipment owned by the operator?

A. That is true.

Q. Why did you do that?

A. Because I felt that that was necessary in 1204 order to place the—well, there are two reasons, one, that I felt that it was necessary to place the operators of owned stations, that is people who had made their own investment on an equal footing as far as possible with those who rent their stations from others; in the second place, interest on owned capital is a well recognized element of cost by a great many accountants, and especially for this purpose where comparisons are to be made of the costs of one operator as against another, or one group of operators as against another group, or for one period as against another period.

Q. All right, Doctor.

Assuming the propriety of an interest charge at all, would it not have been more conservative and more in line with fact if you had calculated interest on the present value of the properties?

A. I do not think so.

Q. Is it not true that under your method of calculation you may have a service station loaded with a cost for interest charge calculated on the basis of an investment which no longer exists?

A. That is the common method of—to calculate interest.

Q. I did not ask you that, Doctor.

Will you please read the question?

Trial Examiner Ballinger: Read the question.

(Question read.)

1205 A. That is possible; it is equally true also that you may in a goodly number of cases have interested computed on the basis of a cost figure which is very much less than the current value of the property as a practical proposition; furthermore, this interest was computed on the actual investment of the station operator in every case in order to put them as far as possible on an equal footing.

By Mr. Hanley:

Q. That is to say, you think it is; you took the figure you got on the questionnaire, didn't you?

A. In those cases where we checked them in the field, we found that—

Q. Didn't you take those figures, Doctor?

A. We took those figures, and where we checked them in the field we found them entirely accurate and satisfactory.

Q. At least they suited you?

A. They certainly did,

Q. And you do not know whether they were high or low on the basis of actual present value in any instance, do you?

A. Presumably in some cases—

Q. I did not ask you presumably; do you know, Doctor? Please try to answer these questions. We are working to a deadline, Doctor.

A. I do not know, but undoubtedly—

Q. That is all right, if you don't know.

1206 A. Undoubtedly, if you do not mind me adding a little further—in some cases the amount that the man had actually paid for it was less than the present value, in fact we talked with some people in whose case that certainly was true, and in other cases probably the amount that they paid for it was more than they would have had to pay at the particular time.

Q. Now, Doctor, on your questionnaire you asked the station operators to list certain taxes, notably the sales tax and the Social Security tax. Did they do so on these reports which you received?

A. In general, yes.

Q. In 1938, in May, how many different taxes were there, and in what amounts, applicable to gasoline?

A. Well, there was a state gasoline tax which at that time was 3 cents.

Q. Now, that is an excise tax as distinguished from a sales tax, isn't it, Doctor?

A. I think that is true.

There was a Federal tax of 1 cent per gallon at that time. The state sales tax—

Q. Now, that 1 cent government tax would also be an excise tax, wouldn't it?

A. I think it was so called, yes.

Q. Well, it is not very important. I just wanted to clearly distinguish it from the sales tax in Michigan.
1207 Doctor. There was a sales tax, wasn't there?

A. Of course, you are getting into territories there where I do not pretend to be an expert as to the precise terminology as to how taxes ought to be described.

Q. I just want to have it clear for our own purposes, Doctor.

A. I know that there was—

Q. There is a sales tax, so called?

A. I know that there was a Federal tax of 1 cent, and also a state tax of 3 cents, whether they be excise taxes or what they be, they exist.

Q. Let us just call them that to distinguish them from the Michigan sales tax; there was a sales tax?

A. There was a Michigan sales tax also applicable.

Q. Of how much?

A. That was 3 cents.

Q. And that 3 cents was based on the volume of sales, dollar volume?

Trial Examiner Ballinger: Was that 3 per cent?

The Witness: 3 per cent, that is 3 per cent on the dollar volume of sales.

By Mr. Hanley:

Q. Now, please explain exactly what your method was of handling those taxes.

The Witness: Could we have a little recess?

1208 Trial Examiner Ballinger: We will take a recess for 5 minutes.

(A short recess was taken.)

Trial Examiner Ballinger: Come to order, gentlemen. Proceed.

Mr. Hanley: Is there a question on the record, please?

(Question read.)

Trial Examiner Ballinger: Do you understand, Doctor?

The Witness: I think I understand enough.

Trial Examiner Ballinger: What taxes you are referring to?

The Witness: The taxes we were talking about.

By Mr. Hanley:

Q. The three, Doctor, to summarize, the 3-cent state tax which we are calling for convenience the excise tax, the 1-cent Federal tax, which we called for convenience an excise tax, and the 3-per cent Michigan tax which I think is denominated as a sales tax. Now, it is the treatment of all those three categories that I want to develop.

A. In the case of the state and Federal taxes on gasoline, which you denominate as excise taxes, those two taxes

were handled precisely alike. That is, they appear as
1209 on the records of the gasoline dealers, as in the first
place, part of his cost of gasoline, and in the second place he collects those taxes along with the rest of the price of the gasoline from the customer; in the case of the state sales tax, the state sales tax of course is not a part of the cost of gasoline, but is essentially, in my estimation, a direct deduction from sales, that is the theory I think under which most businessmen in Michigan operate, although some consider it as an operating expense and would prefer to include it in their income statements as an operating expense. I did not so treat it in this. I considered it as a direct deduction from sales, and therefore the expenses per gallon do not include any allowance for sales tax.

Q. Now, let me see if I understand thoroughly about it, Doctor, as to the 3 per cent Michigan sales tax, you just eliminated that from the calculation; you did not use it as a cost?

A. I did not treat that Michigan sales tax as a cost.

Q. But as to the 3-cent per gallon Michigan excise tax and 1-cent per gallon Federal tax that appeared in the price of the gasoline as sold, you did include as a part of the price of gasoline sold, and it is reflected in the total revenues of each of the service stations which you considered; is that right?

A. Yes, that is true.

1210 Q. Now, Doctor, there of course is no markup at all on the part of the service station operator on these taxes; there is a 4-cent total excise tax which he collects, is it?

A. I do not know about that; the markup is on the gallon of gasoline as such. Whether he considers that is a markup on only a part of his purchase price or on all of his purchase price, I do not know. I suppose some dealers would think of it one way and some another.

Q. In any case it is immaterial, isn't it, merely a matter of trading dollars; isn't it true that the service station operator pays these taxes to the taxing authorities, and then in turn when he sells a gallon of gasoline he collects an equal amount from the purchaser of that gasoline?

A. In general, the ordinary retail dealer pays an amount to his supplier which includes these taxes as well as what you choose to call the price of the gasoline.

Q. Yes.

A. To the retailer it makes no difference whether the money that he pays out for the gasoline ultimately finds its way to the tax collector or whether it is retained by his supplier.

Q. That is right.

A. That is, it is all cost of gasoline to him. Now, whether he considers his markup on gasoline to be a markup on the totality of that amount or whether he considers it to be a markup on only part of that total amount is
1211 also of no significance.

Q. All right. Doctor, now, just taking your statement as it stands, it is of no concern to the retail dealer what becomes of that 4 cents ultimately. He ~~pays~~ it out when he buys a gallon of gasoline, doesn't he?

A. He does.

Q. And subsequently he collects it from the purchaser of that gallon of gasoline?

A. He tries to.

Q. Well, he does normally, doesn't he?

A. Well, that depends. What he tries to collect, what he wants to collect from the purchaser of gasoline is the totality of the selling price.

Q. Well, he always adds his taxes to the selling price, does he not?

A. In self protection a dealer frequently at least has a listing of the prices somewhere about his station which is intended to indicate to the ultimate consumer what the component parts of that price are. The purpose of that very largely in a great many cases, was especially during, shortly after the imposition of these taxes, was to protect the dealer against accusation of raising his price of gasoline unnecessarily. He felt that the purchaser of the gasoline should know why the price of gasoline had gone up 3 cents, for example after the state of Michigan had imposed a tax.

1212 Q. Doctor, without reference to the refinements of handling the thing, it is true, isn't it, that a retailer of gasoline collects the excise taxes from the consumer to whom he sells?

A. He collects the amount which he is charging for gasoline as a dealer.

Q. Which includes the tax, does it not?

A. He hopes that it will include the cost of the gasoline as such, and also the excise taxes, and also the sales tax, and also something to cover his overhead and expenses, and perhaps a little something besides.

Q. It always does include the tax, doesn't it, Doctor? Have you ever seen an instance where gasoline is sold at a price less than the cost of the gasoline plus the so called excise taxes?

A. I should think such instances would be quite rare.

Q. Well, do you know of any?

A. I did not see any in the course of the survey.

Q. All right. Now, Doctor, what excise taxes, if any, apply to services such as are rendered in service stations like lubrication, fixing tires, cleaning spark plugs, that sort of thing; are there not?

A. You are referring solely to the labor element of those services?

Q. Yes.

A. None, unless the Social Security tax is an ex-
1213 cise tax. I do not suppose it is.

Q. Well, of course, you gave Social Security tax consideration in your costs, didn't you?

A. Oh, yes, of course.

Q. I am referring now to a tax which would be comparable to the 1-cent federal and 3-cent state on a gallon of gasoline.

A. As far as I know there were no such.

Q. And there were none in 1938?

A. No, I don't think so.

Q. At least, you gave no consideration to any, did you?

A. Well, no, I certainly was under the impression that there were none.

Q. Now, with respect to other commodities like tires, batteries, lubricating oil, grease, windshield wiper blades, and Coca-Cola, the accessories that are sold at a filling station other than gasoline, what excise taxes are these on those commodities comparable to the 3-cent state and 1-cent federal tax on gasoline?

A. There is an excise tax on lubricating oil. I think it is 1 cent a quart.

Q. All right. On anything else?

A. There have been federal taxes on tires and radios and so on at various times.

Q. Were there in May, 1938?

A. I am not sure whether there were in May, 1938, or not.

1214 Q. If there were, you gave them no consideration?

A. They did not enter into the computations.

Q. Now, in determining your ratio of cost, Doctor, you took first the total dollar revenue of the station, didn't you?

A. That is true.

Q. Then, you took the total dollar revenue from sales of gasoline at that same station, didn't you?

A. Yes.

Q. Then you determined what the percentage of the total dollar sales of gasoline was to the total revenues of the station, is that true?

A. Let's see, the percentage of the total sales of gasoline to the total revenue of the station?

Q. Yes, sir.

A. Yes, sir, that is true.

Q. And you arrived, did you not, so far as the city of Detroit is concerned, at a percentage of 80.75 per cent?

A. That was the average.

Q. That is what I am asking.

Mr. Austin: Judge Hanley, just to keep the record straight, didn't the witness testify that in taking total sales of gasoline for that purpose that he deducted the sales tax?

Mr. Hanley: Well, I will develop it. I thought it was clear.

1215 By Mr. Hanley:

Q. Now, in that total sales of gasoline, Doctor, you did deduct the 3 per cent Michigan sales tax, that is true, isn't it?

A. No, I don't think it is.

Q. Well, did you include that?

A. As all other elements which compose the price.

Q. Well, then, in your total figure of gasoline sold, there was included three tax items, one the 3 per cent Michigan sales tax, 2, the 3-cent per gallon so called Michigan excise tax, and, 3, the 1-cent per gallon so called Federal excise tax, is that right?

A. What was included in sales was simply the amount received by the station operator for the gasoline sold, whether that covered those tax items and whether it covered the cost of his gasoline, whether it covered his overhead and so on, was not taken into consideration.

Q. I will get at it through the back door, Doctor.

In arriving at your total dollar value of gasoline sold you did not eliminate from that value any one of these three tax items, namely, the 3 per cent Michigan tax, the 3-cent per gallon Michigan tax, and the 1 per cent federal tax?

A. That is correct.

Q. Yes, sir.

1216 A. No reason why I should.

Q. Now, the whole heart of your survey, Doctor, centers around that percentage which you arrived at by determining the ratio of gasoline sales to total dollar sales at the station, doesn't it?

A. That is a very important element of the computation.

Q. Isn't that percentage factor that you used to determine out of total costs at the station the amount of costs which you allocate to gasoline and from which calculation you arrive at your figure of 4.8 cents per gallon?

A. Did you complete your question?

Mr. Hanley: Will you read it?

The Witness: I am sorry. I missed the question.

Trial Examiner Ballinger: Read the question.

(Question read.)

A. I did use that ratio for that purpose.

By Mr. Hanley:

Q. Well, that is to say, Doctor, that you found on averaging the 409 stations in the city of Detroit that those stations had a certain total revenue from all thing sold and services rendered, and they had a certain total revenue from the sale of gasoline and the percentage of the total revenues from gasoline of the total overall sales, was 80.75 per cent, that is right, isn't it?

A. That is correct.

1217 Q. Then, you had a calculation of the total cost of doing business at those stations as reflected by the questionnaires which you sent out?

A. That is correct.

Q. And you took 80.75 per cent of that total cost of doing business as the cost allocable to the sale of gasoline, is that right?

A. That is true.

Q. Now, in that 80.75, Doctor, is this figure of 4 cents a gallon taxes plus 3 per cent on the sales price of the gasoline, that is true, isn't it, at least it was not eliminated?

A. It was not eliminated, but it is no more true that that is there than is true that there is also there something for the gasoline and something for the stations' overhead expenses, and possibly in some cases something for the station's operator's profit.

Q. All right. Doctor, there was not any tax load like that on even the lubricating oil that was sold by this station, was there, you say it was 1 cent a quart, that is the only other thing you have indicated as having a tax in 1938?

A. It may not have been the only thing.

Q. Well, it is the only one you gave any thought to at the time, isn't it?

A. Well, I didn't give any thought to that.

Q. I see. There was no tax added to services ren-
1218 dered on the sale of tires, and that sort of thing, was
there?

A. Not so far as I know.

Q. So Doctor, isn't it true, that where you took a dollar revenue originating from the sale of gasoline and balanced that dollar revenue from the sale of gasoline against a dollar revenue obtained by the station through the sale of services and other merchandise, that you have that gasoline dollar loaded with taxes that you do not have in the other commodities?

A. I do not think that is necessarily true, or if it is, it is not important.

Trial Examiner Ballinger: Doctor, will you answer the question yes or no?

The Witness: It is not a type of question that can be answered, your Honor.

Trial Examiner Ballinger: You may answer it yes or no, and then offer any explanation that you may have.

The Witness: Would you please repeat the question?

Trial Examiner Ballinger: Read the question.

(Question read.)

A. Well, the answer is yes, but the explanation is simply that the breakdown of the total revenues of the business includes necessarily certain taxes, and it also includes other operating costs of various kinds. It includes the cost of
the gasoline and of the oil and of the grease.

1219 Trial Examiner Ballinger: Doctor, he is speaking
now of taxes only. The question was directed to
taxes only.

The Witness: Well, I think it is true that it is commonly considered the gasoline is weighted with taxes; that is very true, I should agree on that point.

By Mr. Hanley:

Q. It is largely a mathematical matter, Doctor, and perhaps I can speed the thing along by speaking to the arithmetic of it. It happens that there was 4 cents a gallon tax on gasoline plus the 3 per cent Michigan sales tax. You have said you do not regard the addition of that tax in the total revenues from gasoline as important. Now, just suppose instead of that being 4 cents plus, that that tax was 10 cents a gallon, assume that, Doctor, and assuming it, doesn't it necessarily follow that arithmetically you would get a much higher percentage of gasoline revenues to total revenues than 80.75 per cent with a consequent higher unit cost for the sale of gasoline under your method of calculation in this survey? Is that clear, Doctor?

A. That is true, providing the dealer's price is sufficiently raised to pass on this 10 cents tax.

Q. And I think you have said you know of no instance where it was not at least that high?

A. There is also another consideration.

Q. Well, can't you answer that last question, Doctor?

1220 A. Well, I answered it.

Q. You say you do not know of any instance?

A. Pardon?

Q. You say you do not know of any instance?

A. Which question is this?

Q. I asked you if you knew of any instance where the price of gasoline that is sold by the retailer was not sufficiently high to include the cost plus the taxes?

A. No, I saw no instance of that.

Q. Now, Doctor, assume that you had eliminated from gasoline revenues these taxes as they are eliminated from all other services, and revenues which you included with the possible exception of the 1 cent a quart on lubricating oil, then does it not follow arithmetically that the percentage of 80.75 which you reached on page 14 of your Supplemental Report would be materially reduced resulting in a material reduction of the unit price or unit cost of marketing gasoline in Detroit?

A. Arithmetically that is true. However, the substan tial increase or the substantial decrease of an excise tax on gasoline unquestionably affects the demand for gasoline and affects the difficulty of selling gasoline and affects the cost of selling gasoline.

Q. Oh, but Doctor, that does not cut any ice about this 4.8 cents, does it?

1221 A. Just in the same way that an increase in the cost of gasoline, in the price charged for gasoline by the refiner also increases the difficulty of selling gasoline because it is necessary for consumers—

Trial Examiner Ballinger: Doctor, that is not involved here, about the sale of gasoline. It is a direct question which you have answered.

A. The point I was trying to bring out, your Honor, is the fact that although arithmetically the answer to the—

Trial Examiner Ballinger: That is all he asked you about, was arithmetically.

Mr. Hanley: That is all, Doctor.

1222 Q. Now, I assume, as you have found in your survey, that these stations were doing on the average approximately 8,000 gallons of gasoline a month at a unit cost of sale, as you find, of 4.8 cents a gallon. If you had either eliminated these taxes from gasoline revenues or, on the other hand, had added a comparable amount of taxes to all other revenues, would you not in either instance have gotten a result for the cost of sale of a unit of gasoline less by a considerable amount than 4.8 cents a gallon?

A. Arithmetically, the result would have been less, but by how much I don't know.

Q. Now, Doctor, will you please explain, if you can, why you used two incomparables such as revenues plus taxes and revenues exclusive of taxes, in undertaking to get a constant or a factor upon which your whole survey is dependent?

A. In answering that question, in the first place, I don't think that the figures that you say are incommensurable are actually incommensurable. It is my studied opinion that the gasoline dealer, like anyone else, should consider the amount which he pays for gasoline or any commodity as its cost. Certainly, the fact that these taxes were a part of the costs of the gasoline to him is no different economically in any way than the fact that the amount he paid to the refinery was of such and such an amount. The addition of excise taxes, as I was saying here a while 1223 ago—I was really answering this question a moment ago. The addition of excise taxes to any particular commodity necessarily changes competitive relationships between the commodity and other commodities, other uses to which the consumer might put his money. In precisely a similar way an increase or a decrease in the price of the gasoline as such would have the same effect on the consumer. For that reason the marketing of gasoline costs what it costs partly, at least, because of the existence of these taxes. In other words, if these taxes did not exist it is a fair assumption that more people would be able to take Sunday afternoon rides, that more commercial transportation would be carried on by means of motor trucks as opposed to railroads, for instance, and that the gasoline business would be— would be importantly affected. For those reasons the mere fact that a part of the cost of the gasoline to the gasoline dealer is tax does not justify deducting that tax from the selling price.

Q. All right, Doctor. Accepting arguendo your metaphysical analysis, do you think that the additional cost of selling gasoline because taxes are added to it amounts to as much as approximately 1¼ cents a gallon?

A. It wouldn't be greatly surprising.

Q. Are you willing, Doctor, as a responsible economist, to state that the cost of selling gasoline in Detroit is increased by as much as approximately 1¼ cents a gallon because there is a State tax and a federal tax on gasoline?

1224 A. I should state as my opinion that the cost of selling gasoline is substantially increased by those taxes. Whether the amount—

Q. Well, is it 1¼ cents? That is what I asked you.

A. Whether the amount is actually 1¼ cents or not I don't know.

Q. Well, how much?

A. I don't know.

Q. Haven't you any idea?

A. There is absolutely no way of finding out.

Q. I didn't think there was, Doctor. As a matter of fact, the 4 cents plus the 3 percent sales tax constitutes about 25 percent of the sale price of a gallon of gasoline; does it not?

A. And for that very reason—

Q. Well, does it or does it not, Doctor?

A. It does, and for that very reason—

Q. All right. Then it costs 4.8 cents per gallon to sell that gallon of gasoline, according to your survey?

A. That is the average, as shown by the survey.

Q. Now, if you eliminate 25 percent of the revenues by which you reach that 4.8 cents figure, you eliminate approximately a cent and a quarter of your costs; do you not?

A. That may be true: I haven't figured it out.

Q. Well, approximately, Doctor. I am not asking
1225 you to make the arithmetical calculation in detail. It
is approximately true; isn't it?

A. Arithmetically, I think that is true.

Q. Yes.

Now, just one other question on this tax matter: On page 17 of your report, Doctor, you refer to Social Security taxes, old age benefits, and so on. You indicate that there was a considerable lack of uniformity in the returns that you got from the service station operators. Did you consider that class of taxes in some instances and disregard them in other instances?

A. Where they reported no such tax I did not consider them.

Q. And contrariwise, where they did report it, you did consider them?

A. That is right.

Trial Examiner Ballinger: Excuse the Examiner just a moment.

(There was a short pause.)

Trial Examiner Ballinger: Proceed.

By Mr. Hanley:

Q. Doctor, in your returns you found some stations having an extreme high of 15 plus cents cost per gallon and an extreme low of 2 plus cents cost per gallon; didn't you?

A. That is true. You are referring to the Detroit situation only?

1226 Q. Yes; that report you have in your hand.

A. May I glance at those?

Q. Yes; [illegible]ely.

A. The low was 2.3 cents per gallon, and the high was 15.4 cents per gallon.

Q. Now, refer to that a moment, Doctor: I want to ask you what did you do in reference to the premiums that were given by service stations in Detroit in May of 1938 and free gasoline given away by those stations?

A. In so far as there were any premiums given away by any of the reporting stations, or free gasoline, they were included in advertising costs.

Q. Did you just assume that they were included in that item?

A. I think in the cases where we checked with the station operator for any reason upon advertising expense and his other expenses, we found that to be true.

Q. Did you do that yourself in any instance?

A. I don't think I visited any station myself where premiums were being given away.

Q. So you don't, yourself, know what may have been done in so far as the inclusion of that item is concerned?

A. No; any more than I know what was done with regard to any of the items on any of the questionnaires.

Q. For which in the main you relied entirely on the reporting operator, as I understand it?

1227 A. I relied on the reporting operator in the main because the check that I performed convinced me that the returns had been adequately and honestly prepared.

Q. Out of the ten or twenty stations that you visited?

A. Out of the ten or twenty that I visited and the considerably greater number that my assistant visited.

Q. Now, Doctor, it is true, is it not, that during that period of time, May, 1938, it was a very prevalent practice in Detroit to give away premiums and free gasoline at service stations?

A. Well, I don't know how previlent. I know it was being done.

Q. You weren't familiar with that in detail?

A. Not in detail.

Q. Compared to now, for instance, what was the fact?

A. I—I haven't been in the City of Detroit to—in—to observe any such thing as that, oh, for a considerable period; so I don't know what is going on in the premium business in Detroit.

Q. At any rate you didn't give it any particular thought at the time; did you? At the time you made the survey?

A. No; no.

Q. I neglected to ask you, Doctor, and I want to, if on this tax matter which we were discussing a moment ago relative to the elimination of the total of the 4 cents excise

taxes and the 3 percent sales tax, if that problem oc-
1228 curred to you at all in May or June, 1938, whenever
you made up this survey,—

A. Oh, certainly, it occurred to me.

Q. —did you deliberately take the line of procedure that you have followed in your report?

A. Very deliberately, because I was convinced that that was the only proper method of doing it, after giving it very careful thought and consideration.

Q. So you did consider the problem of excluding these taxes from gasoline returns?

A. I did consider it.

Q. Now, Doctor, assume that one station operator is working alone at a station on an 8-hour shift, and that during that 8-hour shift that operator greases cars and services tires, and so on, for 7 hours, and that for one hour he pumps gasoline. Now, it is true, is it not, that that operator will pump enough gasoline in an hour so that it will result in a far higher dollar return to the station than will the efforts of that operator in connection with his greasing services, and so on, during the other 7 hours? Is that not true?

A. That may be true.

Q. Well, Doctor, I am using an 8-hour shift because it is a convenient length of time. As a matter of fact, the proportion is probably more nearly ten to one, but if you don't know all I am permitted to do is to ask you to assume it.

1229 Now, assuming that in the hour that attendant will pump more dollar value of gasoline than he can earn for the station in the other 7 hours in greasing services, and so on; is it not true that under your system of accounting by which you have arrived at this figure of an average of 4.8 cents per gallon as a marketing cost, that you have taken the revenues from the gasoline that that attendant would pump in one hour and used that total revenue as a percentage against the total revenue that that attendant earned during the entire 8 hours? That is true, isn't it?

A. If I followed you, I think it is true, providing your assumption can be properly—

Q. Well, I am asking you to assume that.

A. —can be properly made.

Q. Then you have in that set-up, Doctor, more of that man's labor allocated to gasoline than you have allocated to other services, notwithstanding that that man labored for 7 hours on things other than gasoline and for only one hour on gasoline; is that not true?

A. I don't think so.

Q. Isn't that mathematically true under your method of figuring?

A. It is not mathematically true because I did not apply the ratio to which you refer to any single expense item. I applied the ratio to the combination of expense 1230 items.

Q. All right.

Doctor, we will take it the way you want to take it. When you got the report from that station you got an item of labor, didn't you?

A. Yes; an item of labor.

Q. And that attendant's 8 hours of labor and the money he was paid for it was in that cost item, wasn't it?

A. It was included in the total.

Q. At least you think it was. Now, when you undertook to allocate costs to gasoline you took that item of labor and you applied against it 80.75 percent, which was the relation of total gasoline sold to the total revenues of the station. You did that, didn't you?

A. No, sir.

Q. Didn't you do that?

A. I did not.

Q. All right. What did you do?

A. I applied the ratio of total gasoline sales to total revenues of the station to the totality of all of the costs.

Q. That is just what I asked you, Doctor.

A. I am sorry; you asked me if I applied it to the labor.

Q. Wasn't the labor included in the items of expense?

A. It was.

Q. So it formed a part of what you termed the totality of expense; didn't it?

1231 A. It did.

Q. So when you apply 80.75 percent against it you got 80.75 percent of the labor that is included in the totality; don't you?

A. No, I am sorry to say that I don't. Now, that answer needs explanation, I understand, for the reason that arithmetically that sounds very plausible. Precisely the same question came up in connection with the Standard Brands case before this Commission, and I had occasion in writing

about the Standard Brands case to comment on that theory—on that very matter in which Counsel for—in which Counsel on one side or the other—I forget which tried to carry out that same line of reasoning, but, as a matter of fact, it really is a very different thing to apply a ratio of this sort to total expenses than it is to apply a ratio of this sort to any individual expense. Now, it might not be the opinion—it might not be true that such a ratio applies uniformly all the way down the line to every one of those expense items. I doubt very much if it does. However, some of these expense items, as a practical proposition, are more largely allocable to gasoline than they are to the rest of the business per dollar of sales. Some of the items are more largely allocable to the rest of the sales than they are to the gasoline. Now, in order to do a careful and detailed job on all of the items individ-
1232 ually, it would be necessary to carry out procedures which, in view of the purpose of the survey, of its effect on the situation, in view of the time and money limitations which were extremely stringent, were utterly

Q. I understand that, Doctor.

A. —were utterly impossible.

Q. What you are saying, Doctor, is that you did the best you could with the tools that you were given to work with. We fully understand why you used the method of the questionnaire and so on.

To summarize this thing, arithmetically, what I stated to you in this hypothesis is true, isn't it?

A. I am sorry to have to disagree with you

Q. Isn't it true—

A. —but to me—

Q. —arithmetically, Doctor?

A. It isn't true arithmetically. To me that just simply is not the case. In other words—

Q. You mean when you take 80.75 percent of a figure that you don't result in 80.75 percent?

A. Mathematically; you—the result here is that the figure which is arrived at as a cost of gasoline sales is 80.75 percent of the total cost of operating the stations.

Q. Exactly, and—

A. It is not necessarily 80.75 percent of any one single cost item.

1233 Q. Doctor, in that total cost of operating the stations is the total paid this attendant for 8 hours' service; isn't it?

A. It is there.

Q. Now, no matter what else is in that total, if you take 80.75 percent of that total don't you just necessarily get 80.75 percent of the amount paid that individual for his labor?

A. Mathematically, that is not correct.

Q. Well, I give up. That isn't—

Trial Examiner Ballinger: Judge, you needn't proceed any further.

Mr. Hanley: Sir?

Trial Examiner Ballinger: You needn't proceed any further with this question.

By Mr. Hanley:

Q. Now, Doctor, what was your treatment of withdrawals of merchandise by owners? What did you do with that?

A. I eliminated it from the computations entirely.

Q. You mean you took it clear out?

1234 A. It wasn't considered.

Q. In every instance?

A. That is correct.

Q. And you used a figure of 2 per cent on bad debts. Do you recall that?

A. In some cases that is true.

Q. Where did you get that figure of 2 per cent?

A. I advised with various members of the Retail Gasoline Station Operators, with various operators, and they told me that in their estimation that was a very low and conservative estimate of bad debts of total credit sales. My own experience over a considerable period of years with a large variety of business concerns would lead me to believe that under the operating conditions existing in the gasoline station industry that undoubtedly is the case.

Q. So it is your best judgment?

A. That is correct.

Q. On your questionnaire, Exhibit 75, Doctor, under E-4, you requested the reporting operators to give certain information and explanations. Will you look at this? (Handing document to the witness.)

A. That is true.

Q. Did you receive certain comments from the operators under that request?

A. Frequently.

1235 Q. Did you give them consideration in making your survey?

A. Wherever pertinent.

Q. Did those comments vary the figures as were disclosed by the balance of the questionnaire in any particulars?

A. They assisted me in a good many cases in determining whether or not to use them. I called your attention to one of those cases a little while ago where, for example, included under "miscellaneous expense" would be something that just did not belong, and the explanation which I asked the operator to give under E-4 would disclose the facts.

Q. Some reporting operators didn't make any comment, I suppose, Doctor?

A. Oh, frequently they didn't use that space.

Q. Now, in making a survey of this kind or solving a problem such as was presented by this survey is it not usually true, and was it not true in this instance, that you got reporting stations which showed very abnormal extremes at both ends? I mean by that abnormally high unit costs per gallon and abnormally low unit costs per gallon?

A. I would agree on the abnormally high in a certain sense, although I think those high costs are probably fairly typical of some marginal or sub-marginal stations as a practical proposition. As far as abnormally low is concerned, yes, I think probably in some cases there were probably abnormally low costs, for the reason that the month of May in those particular cases happened to
1236 be an extremely high month so far as gallonage was concerned.

Q. Doctor, isn't it regarded by economists and accountants as the most reliable and conservative practice in problems of this kind when an average is sought to eliminate as much as 10 per cent on either end of the list in order to eliminate the abnormal extremes?

A. Frequently in the compilation of data for the purpose of obtaining averages, that is done, as a matter of fact. It depends on the circumstances, depends on what use the average is to be put. Personally, I wasn't greatly concerned with the average.

Q. You didn't adopt that practice in your survey; did you?

A. No, I didn't.

Q. Referring to page 6, Doctor, of the Supplemental Report, Table 1, you have set out there the number of stations, by brands, that were reported to you?

A. That is true.

Q. Now, as to Mobil gas your report shows that 17.97 per cent of the stations reporting handled Mobil gas; Standard 14.51 per cent; Sinclair 6.71 per cent; Shell 6.06 per cent; Sunoco 6.28 per cent; Texaco 5.41 per cent; Hi-Speed 6.06 per cent; Gulf and all of the balance of the column 37.01 per cent. I think those are accurate percentages, Doctor. I will just ask you to assume the
1237 correctness of the arithmetic.

A. They sounded fairly reasonable as you went along.

Q. Assuming it to be true that the consumer use of these brands of gasoline in Detroit runs in this percentage: Mobil gas 14.40 per cent; Standard 18.10 per cent; Sinclair 3.70 per cent; Shell 4.50 per cent; Sunoco 16.40 per cent; Texaco 2.80 per cent; Hi Speed 13.20 per cent; and Gulf and the other items in the column 26.90 per cent. Assuming that, Doctor, do you think that your distribution sample, as indicated in your table 1, is an adequate, fair and representative sample?

A. I don't see why not, and furthermore I don't see that it makes any difference.

Q. Very well. Please refer to table 11 in the Supplemental Report on page 29.

A. Page—oh, oh, page 29. Excuse me.

Q. Page 29, Table 11.

A. Yes.

Mr. Hanley: I am hurrying this just as much as I can, Judge, trying to get through promptly.

By Mr. Hanley:

Q. Have you found it, Doctor?

A. Yes.

Q. In that table you have broken down these reporting stations with reference to the amount of gasoline
1238 that they handled in 5 per cent divisions; is that right?

A. That is with reference to the proportion of gasoline sales to total sales.

Q. That is right. Now, you have concluded that the relation of gasoline sales to total sales hasn't any par-

MICRO CARD
TRADE MARK ®

282-57

MATTHEW BENDER & COMPANY
MB

icular importance so far as your conclusion as to the cos f selling gasoline is concerned; that is true, is it?

A. Not the proportion of gasoline sales to total sales s such. However, it is true that there seems to be a sort f tendency not—certainly not very well discernible, for he stations who have a very high ratio of gasoline sales o total sales to be small stations. It is hardly true, to the ontrary, that those that have a low proportion of gasoline ales to total sales are necessarily large stations, although hey may be; but it is generally true that those who have very high proportion of gasoline sales to total sales unning above 95 per cent, are likely to be rather smal tations, in the sense that their total sales of gasoline are mall.

Q. Well, you reach a general conclusion, do you not, in our report, Doctor, that there isn't any particular trend ne way or the other, so far as cost of selling gasoline is oncerned, which is predicated on the factor of gasoline ales to total sales?

A. That is the conclusion I reached, based on the information available.

239 Q Now, you have—

Trial Examiner Ballinger: Judge, you are stil eferring to the report in the Detroit area?

Mr. Hanley: Yes, sir. This Supplemental Report, so alled, Judge, is all on Detroit. This is the only one I have never saw—

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

y Mr. Hanley:

Q. I am now referring and have been referring in these u tions as to tables and conclusions to the Supplementa eport identified as Respondent's Exhibit No. 2 for lentification. Now, on page 29, Table 11, of Exhibit 2 octor, you have made that demonstration by using 5 per ent groups of your total of 409 stations?

A. Yes; that is true.

Q. Do you find that? Is it not true that some of those per cent groups reflect a number of stations that is holly inadequate as a sample? For instance, one station, 3, 3, and so on.

Mr. Austin: Which table is that, please?

Mr Hanley: Page 29, table 11.

A. I shouldn't like to take those numbers as an ade uate sample.

By Mr. Hanley:

1240 Q. Now, Doctor, if you, instead of using 5 per cent, use 10 per cent; that is, if you combine each of the pairs as you do down the list—

A. Yes.

Q. —would it not give you a better sample, a better scatter, as you people call it?

A. Well, in the cases that you refer to, of course, you would double an extremely small number, and I question even whether that would be a thoroughly adequate sample.

Q. Well, in the first place, you double 19 and 75 stations; don't you?

A. Yes; that would make 94.

Q. And then you would double 93 and 96 stations, or add them?

A. You would add them; yes.

Q. That would give you a fairly representative sample out of your 409 stations; wouldn't it?

A. Well, no. You see, when you talk about a sample out of the 409 stations you should, strictly speaking, take stations at random, for example, not stations specially chosen for some particular characteristic.

Q. Well, now, these stations 93 and 96 have an average gallonage, if you will note, of from 7,736 to 8,046 gallons per month. You find that?

A. That is true, one group has an average gallon-
1241 age of 7,736 and the other has an average gallonage
of 8,046.

Q. Now, that checks, doesn't it, approximately, with the average gallonage that you found on the overall test?

A. It was somewhat lower; but that is not far away.

1242 Q. Now, if you use that method of calculating, that is, on the basis of 10 percent samples, is it not true that you would get for the first group a cost of 5.2 cents, for the second, and at least the largest numerical group, 4.6 cents, and for the next group 4.7 cents, and for the next 4.6 cents, and for the next group, which includes only seven stations, 6.4 cents cost?

A. You have made the computation. They sound—they look, from the appearance of these figures, to be approximately correct.

Q. Assuming the correctness, Doctor, and then 4.6 cents is the cost you would arrive at on the basis of those tables calculation; isn't it?

A. I do not follow you at all.

Q. That refers to the second group of 93 plus 96.

A. That is the average cost of those 189 specially picked stations.

Q. That is right.

A. Yes.

Q. The average may be around 8,000 gallons a month, which is the general average of your survey, isn't it?

A. Oh, yes, for those particular stations, yes.

Q. Now, so far as the tables as a whole is concerned, Doctor, it fails to give consideration to all of the other variable factors, doesn't it, which appear in your table
1243 No. 3 and No. 4, being all of the expense items?

A. Fails to give consideration?

Q. Total of those variable items, the only thing you are considering on table 11 is the relation of the gasoline sales to the total sales without reference to any other variable factors?

A. Table 11 is a classification of these gasoline stations on that basis—namely, the ratio of gasoline sales to total sales. I also have other tables where I classified them on the basis of geographical location and on the basis of the size of the station as represented by gallonage, and so on.

Q. Doctor, are you familiar with the organization known as Dan and Bradstreet?

A. I have heard of that.

Q. Do you regard them as a reputable and competent organization for the purpose of making a business analyses and reports?

A. I think they are generally so regarded, and I have no reason to suppose that they are not.

Q. I think you have testified that you did not make any survey of the cost of selling gasoline other than this particular one made for May, 1938, in Detroit; that is true, isn't it?

A. I have never personally made any other survey. I have participated in one survey which was made subsequent to this in the City of Lansing.

1244 Q. Did you examine any surveys, or the results thereof at the time that you made your survey in 1938?

A. I attempted to locate anything that was in readily available published form, which would be in any way comparable, and I found very little.

Q. Are you familiar with the fact that Dun and Bradstreet makes a survey yearly on this subject of the cost of retailing gasoline?

A. No, I am not.

Q. You do not know that?

A. No.

Q. Have you ever examined any of them?

A. No.

Q. Do you know it to be a fact that reports made for 1940, concerning retail operations of filling stations, that the unit cost of selling gasoline figures 3.8 cents a gallon?

A. I am not familiar with that.

Q. Are you familiar with a survey of this character made by the Petroleum Administrative Board?

A. Petroleum Administrative Board?

Q. Yes, sir.

A. Who are they?

Q. I don't know. Don't you?

A. Could it have been in connection with the N. R. A. Code Authority?

1245 Q. I would not be a bit surprised, but I do not know.

A. I know that they did make a survey of the sort, or attempt one.

Q. Are you familiar with it?

A. Not in detail.

Q. Do you know whether it is not a fact that that Board reported on August 22, 1936, that the actual cost of selling a gallon of gasoline through the average service station is 3.6 cents?

Trial Examiner Ballinger: Did you know that?

The Witness: Not in detail, no. I knew that they had made a survey. I was not familiar with the details of it, however.

By Mr. Hanley:

Q. Now, are you familiar with hearings that were held in the United States Congress relative to this question of cost of retailing gasoline at which time a Mr. Richard F. Cleveland testified concerning a survey which had been made of trackside stations made September 21, 1934; do you know anything about that?

A. No.

Q. Have you ever seen anything to the effect that that survey disclosed that the average cost of selling gasoline is from 2.78 cents to 3.16 cents covering every cost?

A. No, I am not familiar with that.

1246 Q. You are familiar, are you not, Doctor, with the fact that there was a cost survey made, or an attempt to make one in Detroit also prior to the one you made?

A. That is correct.

Q. You are familiar with that one, aren't you?

A. Yes.

Q. Is it not true that that survey indicated a cost of about one-half cent per gallon less than you show in this present survey?

A. I think that is true. However, I am so familiar with that survey that I should certainly place no reliance on it.

Q. Well, surveys are sometimes like that, aren't they?

A. Oh, surveys are sometimes like that, of course.

Q. But so far as your own survey is concerned, you show a difference of two-tenths of a cent a gallon as between the City of Detroit and the balance of the County of Wayne; do you not?

A. Yes, I think that is true.

Q. Now, Doctor, are you familiar with the reports of the Dun and Bradstreet organization in connection with various types of business organizations which reports disclose the number of such businesses that are operated on a profitable basis?

A. Why, I have heard of such reports. I am not familiar with Dun and Bradstreet's. I have seen reports gotten out by other agencies.

1247 Q. Well, I will ask you this, Doctor: If the reports which I shall now read and which are prepared and published by Dun and Bradstreet accord with your own knowledge and views as an accountant and economist, such reports relating to the year 1940, as to retail filling stations the proportion of profitable concerns reporting are 71 percent; as to the automotive, accessory and parts concerns, the proportion of profitable concerns reporting, 75 percent; as to—

Mr. Austin: Is this a hypothetical question, Judge?

Mr. Hanley: No; I am asking for his judgment. I am going to predicate another question on it.

Mr. Austin: I mean, you are reading those things into the record. Is he supposed to assume that they are correct?

Mr. Hanley: Now, let me repeat—

Will you read the question?

(Question read.)

Mr. Hanley: I am asking his—

Mr. Austin: You say if they accord with his views, and then you are reading them. I do not know whether it is supposed to be conceded that those are correct figures. I just want it to appear.

Trial Examiner Ballinger: They have not been proven.

Mr. Austin: No.

Trial Examiner Ballinger: And they are not being 1248 accepted as correct until they are proven.

Mr. Hanley: Will you read my question again as far as I got.

(Question read.)

By Mr. Hanley:

Q. —as to hardware and farm implement concerns, 54 percent; farmers supply stores, 73 percent; farm implement dealers, 52 percent; country general stores, 66 percent; motor vehicle dealers, 65 percent; garages, 63 percent.

A. Now, what am I supposed to do, please?

Q. Does that accord—do those figures accord with your knowledge and views as an economist?

A. It is certainly an extremely vague question.

Trial Examiner Ballinger: Well, if you cannot answer—

Mr. Hanley: If you cannot answer it, that is all you need to say, Doctor. I do not care whether you know or not, if you will just tell me which it is.

A. Well, if I could express it this way, I should not be inclined to doubt that the results actually obtained by Dun and Bradstreet in whatever mode of inquiry they followed, have been correctly reported. I am not greatly surprised, as a matter of fact, at any of the figures; I would not be surprised, either, at quite different figures, as a matter of fact—

1249 Mr. Austin: I suggest the witness state whether he knows.

Trial Examiner Ballinger: I have asked him; if he does not know he has no business guessing.

The Witness: I certainly do not know whether those figures are representative.

By Mr. Hanley:

Q. Now, then, Doctor, assuming that they are right, it does appear to you, does it not, that the filling station businesses are relatively profitable concerns?

Mr. Austin: I object to that question.

Mr. Hanley: All right. Perhaps it is objectionable.

Trial Examiner Ballinger: The question is withdrawn.

Mr. Hanley: In view of the witness' testimony.

By Mr. Hanley:

Q. I will ask you this question, Doctor: What was the average gross margin of the stations reporting on your questionnaire? I mean by gross margin the difference between the cost of gasoline and the sale price of gasoline?

A. I can't answer that for the Detroit survey. That figure may have been computed but it was not included in this particular report. On the other hand, for the Wayne County survey, I can give you an answer.

1250 Q. What was it for the Wayne County, if you have that?

A. I mean for the county as a totality, not for the balance outside of Detroit.

Trial Examiner Ballinger: We will take a short recess.

(There was a short recess taken.)

Trial Examiner Ballinger: Gentlemen, please come to order.

Proceed.

By Mr. Hanley:

Q. Doctor, you were about to give us the gross margin as figured by you in the Wayne County survey.

A. Yes, as I figure it, it is 3.63 cents.

Q. But you did not figure it for Detroit alone?

A. Well, I might have figured it, but it is not included in this report, and I have forgotten.

Q. Well, in your judgment would it be somewhere in the neighborhood of 3.63?

A. Oh, I should think so. I have no reason to suppose it would be.

Q. In any event, it would be substantially less than 4.8 cents, wouldn't it?

A. Oh, yes, I am sure of that.

Q. Now, that being the case as reflected by your study of this matter, Doctor, as an economist, how do you

1251 think it possible that these service station dealers have been able to remain in business in Detroit?

A. Two reasons for that: One is, of course, that in the first place a very considerable number of them haven't been able to remain in business. Mortality among gasoline stations is notoriously high as it is among a great many types of retailing businesses; and, in the second place—

Q. Just a moment there, Doctor, permit me to interrupt you, please.

If you assume the correctness of these Dun and Bradstreet reports that I read to you, doesn't the filling station business enjoy a particularly high place in the field of profitable businesses?

Mr. Austin: I object to that, Your Honor. I objected to the same question a while ago and it was withdrawn.

Trial Examiner Ballinger: Well—

Mr. Hanley: Well, the witness has now characterized this business as having a high mortality.

Mr. Austin: That is asking for an assumption of correctness of figures which have not been proved, and as to which the witness states he has no knowledge, so I do not think the witness—

Trial Examiner Ballinger: The objection is sustained.

By Mr. Hanley:

1252 Q. All right, proceed with your answer.

A. In the second place, it is important to recognize that no small part of the gasoline station operators' expenses are non-cash costs; that is, they do not involve paying out of money. Ordinarily speaking, those costs are, as a matter of fact, rather important; that is true with depreciation. For instance, he does not have to pay out money except when he purchases property. It is true of interest on investment except to the extent where he has actually borrowed money and has to pay out interest there, and, after all, the interest that he actually has to pay out must be taken into account as an offset to the non-cash character of the interest on investment. In the third place, his own wages which were necessarily included in the cost computations are a pretty flexible item; that is, in other words, he would like to make as high a wage as possible for his services. He is entitled to a wage, in a social sense, of an amount equal to whatever value his services may have to society. He can probably get along in a good many cases on the 40-cents-an-hour wage which was used

in these computations; he can probably get along, as a matter of fact, in a great many cases, especially where his family is small, and his wants are small, on even a smaller amount than 40 cents an hour. For those reasons, the fact that some of these marginal people who stick in business claim to whatever hold they have on the gasoline
1253 business is not at all remarkable. They can, so long as the direct cash outlay does not exceed the intake over a considerable period, a good many of them, of course, also keep in business because of the fact either that they had a considerable capital to start with and were able to live on their fat, as the saying goes, or that in some cases they have other sources of livelihood, such as the ownership of rental property, for instance, or perhaps their relatives are able to support them in some cases, and so on; all of those factors have an important bearing on the apparently rather surprising thing that this margin is substantially lower than the average cost.

Q. But it is a losing game in the long range, isn't it?

A. Well, that depends on your definition of losing.

Q. Well, my definition of losing is 4.8 cents minus 3.63.

A. Well, someone else's definition might be different.

Q. Well, that is what I am asking you; those are your figures.

Now, can a business indefinitely continue under that disability, assuming that the business is not provided for by some angel with more money than brains?

A. No, presumably an individual business under those circumstances could not continue indefinitely; it could continue for a very long period of time, surprisingly long.

Q. And in point of fact these businesses have continued and are continuing in Detroit, the same operators,
1254 over many, many years; isn't that true, within your knowledge?

A. I presume that is true. I talked with some who have been in the gasoline station business for 10 years, or 15 or 20 years, some of them quite old hands. Of course, the gasoline station, as you know very well, is not a very old business as businesses go.

Q. Isn't it true that these operators, on the average, make more money for themselves now than service station managers made when the service stations were operated by the supplying companies?

A. Well, you are asking me there for something that is entirely outside of the scope of the survey and also outside of my knowledge.

Q. If you don't know, that is all right, Doctor. But you do know, I take it, that these businesses, many of them, have continued for a substantial number of years notwithstanding the disability that you have arrived at in your survey?

1255 A. A substantial—

Trial Examiner Ballinger: Judge, the witness has answered that question once or twice.

Mr. Hanley: If he has that is sufficient.

By Mr. Hanley:

Q. I think I did ask you, Doctor, if an average such as you have arrived at in your survey necessarily is not coincidental with the actual cost of any service station operator?

A. Not necessarily coincidental, no, that is true.

Q. It just might be in some few instances?

A. Oh, yes, undoubtedly so.

Q. But doesn't the term "average", and the very method of finding the average, tend to reach a middle ground which does not reflect the actual cost of any service station?

A. Well, it reaches a middle ground, it may actually reflect, of course.

Q. In some instances?

A. Oh, yes.

Q. That happens—

Trial Examiner Ballinger: Judge, you went into that very thoroughly.

Mr. Hanley: I was not sure I did.

Mr. Hanley:

Q. I want to ask you specifically this: Do you know anything about the costs of the Standard Oil Company, the respondent in this action? 1256

A. Nothing at all.

Q. Relative to its marketing of gasoline in Detroit?

A. Nothing at all.

Q. Do you know anything about the marketing costs of any one of the following organizations, Ned's Auto Supply Company, Wayne Oil Company, Stiteman Oil Company, or Citrin-Kolb Oil Company?

A. I know nothing about the marketing—

Mr. Austin: Do you mean the retail marketing costs?

Mr. Hanley: Any costs.

Mr. Austin: All right.

A. I know nothing about the marketing costs of any of them unless they were included in the survey except as I have some knowledge of marketing costs of retailing gasoline generally.

Q. Which information you have from the survey, is that right?

A. Well, that, plus the survey that was made in Lansing subsequently.

Q. All right. Now, Doctor, does this 4.8 per cent figure purport at all to reflect the cost of respondent, Standard Oil Company, or any of those other four named organizations?

A. No.

1257 Mr. Hanley: I think I am through, if you want to go ahead you take the witness, Mr. Austin, and if I do have another question—

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record. Proceed.

Redirect Examination by Mr. Austin.

Q. Dr. Taggart, you were just discussing the question of the ability of a gasoline station to continue in business at a unit cost of marketing the gasoline of, say, averaging around 4.8 cents per gallon running down perhaps as low as, I believe your survey shows, as low as 3 cents a gallon on more efficiently operated stations, but assuming that the cost of many stations is 4½ cents a gallon or more, I believe also you referred to some figure of 3.63, of Judge Hanley, or as to the margin between what the gasoline pays and what it sells, and is that a figure which came from your report somewhere, or where did that 3.63 come from?

A. That figure came from my Wayne County report, that is the report on the totality of Wayne County.

Q. Now, it however has been proved in this record that current margin between cost and selling price during 1940

and 1941 to date in Detroit has been 3.1, that is on
1258 major brands of gasoline, and on prevailing retail
prices, was that 3.63 somewhat that you ascertained to be the fact in 1938?

A. That was the way it actually averaged out at that time, on the basis of the 489 stations that reported.

Q. Do you know whether the average margin of profit of the station in Detroit previous to that time was larger, or lower?

A. I was told that margins had been higher prior to that time. I had no personal knowledge of it, however.

Q. In explaining why a service station, gasoline station might continue in business, even though its margin of profit was less than its average cost per gallon of selling gasoline, you said nothing, I believe, about the possibility that the gasoline station might be engaged in selling other things besides gasoline. Is it true that the majority of gasoline stations, in fact nearly all of those covered by your survey sell other things than gasoline?

A. That is literally true. I thought of that particular point which, in some cases certainly is a very important one, after I finished answering Judge Hanley's question.

Q. Well, might it not be that the gasoline station operator may show a profit on his entire business even though he sells gasoline at a loss?

A. Oh, entirely possible, entirely.

1259 Q. Do you know whether that is true in many instances, or did you make any study of that?

A. I should not like to say that that was true in many instances.

Trial Examiner Ballinger: Is it true in any instance that came to your notice?

The Witness: Yes, it was, because we did in some cases see the books sufficiently so that we saw the entire sweep of their operations, the revenues and the expenses over a sufficiently long period and the net profit.

By Mr. Austin:

Q. Is it or is it not true to your knowledge as to your experience that many people who come into a gasoline station buy gasoline and also buy accessories and other things, whereas if they could not get gasoline there they would not stop for the accessories?

A. Why, I should think that is probably true. That certainly is the theory on which many gasoline stations operate, that the gasoline and the accessories and the other things go together, that is, one works as against and for the other, that is the theory, I think, on which the so called super-service station is based.

Q. Now, a question on taxes. You stated that in taking the figure for total sales of gasoline, and the figure for
total sales of other merchandise and accessories for
1260 the purpose of making an allocation of the sales of
gasoline as to the total expense, rather an allocation
of overhead costs as between gasoline and the total expense, that you did not deduct the Michigan sales tax.

A. That is true.

Q. On the total for gasoline?

A. That is true.

Q. Is there a Michigan sales tax on accessories and other articles sold?

A. Oh, yes.

Q. In gasoline stations?

A. Oh, yes, it applies to all merchandise of all sorts and kinds.

Q. And did you deduct the sales tax from the total for sales of other things besides gasoline?

A. Of course not.

Q. Who pays the federal and state gasoline taxes, what has been referred to here as excise taxes?

A. Do you mean who actually writes out the check payable to the government?

Q. Yes, who pays the tax?

A. Well, it is not the retail dealer, it is—

Q. Well, who pays, is it some—

A. I think it is the refiner or—the refiner who pays the tax.

1261 Q. Well, that is a sufficient answer for what I
am leading up to. Therefore, when a retailer gasoline dealer buys a truckload of gasoline and pays for it, does he pay taxes, or does he pay a price of so many cents?

A. I think the proper way to look at it is that he pays a price of so many cents a gallon.

Q. Is he responsible in any way for what is done with the money which he pays for that gasoline?

A. Not in any way.

Q. And when he sells that gasoline to the automobile owner, does he collect a price, or does he collect a tax?

A. He collects a price in my estimation. That too is what the consumer thinks he is paying, is a price, at least that is the way I feel about it.

Q. If I understand you correctly, in using the total selling price of gasoline in your figures, you treat that as simply an article of merchandise for which the dealer has paid a price and which he sells for a price, and no part of which includes tax, as the sales tax?

A. I think that is a fundamentally sound way of looking at it; as a matter of fact, I think you can look at the sales tax situation in exactly the same way.

Q. Well, however, the dealer does pay the sales tax out of—.

A. Oh, yes, in that respect, the sales tax is dif-
1262 ferent, the dealer does turn a certain amount of
money over to the state government, which may or
may not be the amount which he collects from customers.

Q. Aside from the sales tax, does he pay any taxes with the rest of that money he gets for the gasoline, I mean any gasoline tax?

A. No, oh, no!

Q. Now, let us assume that the retail gasoline dealer is currently at a particular time selling gasoline for 2 cents a gallon more than he pays for it?

A. Yes.

Q. Including sales tax, if you wish. Would it not be just as correct to say that that total price which he receives for gasoline, and assuming that his cost of selling is, we will say, 4.8 per gallon, would it not be just as correct to say that that price, that number of cents per gallon that he receives covers his overhead costs of operation including the amount he originally pays for the gasoline, the depreciation, interest on investment and other items which you have included in cost, but does not cover the amount of the 4 cents state and federal tax, would that be as correct as to state that it included 4 cents federal tax but did not include all these other things?

A. I think so.

Q. Is that what you had in mind when you stated
1263 that it did not necessarily follow from the price re-
ceived by the station that he always collected the
federal and state tax in the price he sells for?

A. That is exactly what I mean. I felt that a breakdown of that price in terms of receiving some items of his cost and not receiving other items of his cost is highly artificial. It is done very frequently, as a matter of fact, in business analyses, and sometimes it is done one way and sometimes another, depending entirely on what the person that is making the analysis is trying to bring out.

Q. Now, if you will turn to page 20 of your Wayne County report, which was marked for identification as Commission's Exhibit 76, I believe that you stated that there were, that special attention was directed to stations which exhibited especially low costs. How many service stations were there whose average cost for the period of the survey, average unit cost of selling gasoline was less than 3½ cents a gallon?

A. 30.

Q. And what was the average cost, unit cost of selling gasoline for those 30 stations during the month of May, 1938?

A. 3.1 cents.

Q. How many individual stations were there who showed a cost of less than 3 cents a gallon?

1264 A. 7.

Q. I believe you said yesterday that a field check was made by you or your assistant of all of those 7 stations?

A. Yes.

Q. Do you know whether those 7 stations turned out to be any particular kind of a station, having any special economic characteristics as it was referred to by Judge Hanley, were they curb stations, or were they automobile garages, or what were they?

A. Now, are you referring to these 7 stations only?

Q. Referring to the 7 stations only.

A. Well, I do not recall that they were any particular variety of station, so far as curb station or drive-in, or what not.

1265 Q. How about the 30 stations that had the lowest unit cost, was there any indication that they were stations of a particular kind?

A. I would be quite sure that they would not be.

Q. So that regardless of the various types of stations, or the various characteristics of the stations included in this report, doesn't the survey show that the lowest unit cost shown for any group of stations in the survey was above 3 cents a gallon other than these seven stations?

A. For any grouping that was actually made for any purpose, that is true. Well, yes, except for those seven, any grouping above that point of course would show an average; that is, leaving out those seven.

Q. Well, the point I want to make is that this survey covered the stations who received questionnaires and who sent them in, as I understand it, regardless of their so-called economic characteristics of type of station?

A. Yes, that is true.

Q. And so is it not true that the minimum shown in your survey for any station or group of stations covers stations of all types? Now, that is not very well stated, but regardless of the type of station, would you include in here, and if there were any stations of a particular type with a low average cost, they are included within the analysis made?

A. That is true; we actually had at least one
1266 trackside station which I personally visited, included
in the survey. You mentioned those a moment ago.

Q. And I believe you stated yesterday on the record that you found special reasons for all of these seven stations, as to why they happened to run below 3 percent during May, and I think you found, was it in all cases or all cases but one, that their average for the first five months of 1938 was above 3 cents? I am not trying to testify, but I think that was the answer yesterday.

A. The figure computed the way it is stated in this report, yes.

Mr. Austin: The point I am trying to make, Your Honor, is that there is a minimum here which applies over all stations, so that regardless of what argument may be made about classification, as to the different kinds of stations, where they may come, whether they are up in the 5-cent range or down in the 3-cent range, they are all of them above 3 cents, and, to my opinion, the minimum cost is perhaps more important than the average cost.

Trial Examiner Ballinger: I think the record fairly portrays the situation.

By Mr. Austin:

Q. Will you turn to page 15 of your Wayne County report, Dr. Taggart, table 6.

A. Yes.

1267 Q. Will you describe what that table is?

A. That table is a compilation which classifies gasoline stations included in the survey in accordance with their gallonage, beginning with stations which sold from zero to 2,000 gallons, and proceeding from that point up by 2,000-gallon intervals to the largest station included in the survey.

Q. What trend does that table show?

A. It shows a fairly clear though not entirely uniform trend in the direction of lower costs as the gallonage increases.

Q. Does the trend toward lower costs slow down, if I may put it that way, as the gallonage increases above a certain point?

A. Yes, it does.

Trial Examiner Ballinger: Has the document to which you are now referring been admitted in evidence?

Mr. Austin: No, Your Honor; it has been identified.

Trial Examiner Ballinger: Then, please—have you referred to it?

Mr. Austin: Yes, I referred to it as Commission's Exhibit 76, for identification.

Trial Examiner Ballinger: Unless it is included in the record these questions will be meaningless.

Mr. Austin: Well, I am going to offer it, but I
1268 thought perhaps, for Your Honor's benefit, I would go
through the questions first.

By Mr. Austin:

Q. Have you an opinion, Dr. Taggart, as to whether there is any minimum cost below which a gasoline station would not go even though gallonage was increased indefinitely, or would it simply be a gradual reduction of unit cost of selling gradually tapering off more slowly as gallonage increased more rapidly?

Trial Examiner Ballinger: Would you say a point below which it could not go? Do you mean below which it could not go without losing money?

Mr. Austin: No. I mean as to whether or not, would it be true that indefinitely, considering a station's gallonage, get greater and greater, would the costs of sales per gallon always get less and less.

A. My opinion is that that is not the case, that there is a more or less indefinite lower limit to which cost must necessarily arrive and there stop. As a matter of fact, it might very well be that beyond the lower limit the unit cost might actually rise, because of the very large size of the organization which frequently is not as efficient as medium-sized establishments.

Q. Is it true that it would be impossible for any survey
to actually, no matter how classified, or how large a
1269 survey, to conclusively fix such bottom price due to
the fact that as to two stations selling gallonage at
the same time one is always going to be more efficient than
the other?

A. I don't know that I got the first part of that question.

Q. In other words, is it possible to fix minimum—possible to fix the minimum cost of selling gasoline based on gallonage alone?

A. Oh, no, because other factors enter into it.

Q. And one of those factors is the efficiency of the station, is it not?

A. A very important factor.

Q. You were questioned regarding certain questionnaires which were returned to you and which were found to be defective, and were not remedied, or could not be remedied; and those returns were discarded in making your final computation; is that right?

A. That is correct.

Q. Did you, for test purposes, make a computation, so far as possible, just using those discarded returns?

A. For what it was worth I did make such a computation.

Q. And what result did that show?

A. Well, the result it showed, that the figures as given, with the figures as given, was an average cost for those discarded returns of 5.3 cents.

Q. That is higher than your average for the other
1270 stations, is it not?

A. Yes, it is a half cent higher than the general average.

Q. I don't believe I asked you yesterday regarding your assistant except as to his name, and I think you said he was a graduate of the University of Michigan.

A. That is true.

Q. He was a student in your classes?

A. Yes, sir.

Q. What degree did he receive?

A. He received a Master of Business Administration degree at the University of Michigan in June, 1938, prior to my employing him on this survey.

Q. Had he been in any of your classes before that?

A. He had been in my classes during the preceding two years. I had ample opportunity to observe him. He made a very good record with me, and in the school generally, and he had specialized in accounting, taken very extensive courses in accounting, including courses in auditing and public accounting procedure.

Q. Where is he now?

A. He is located in Detroit.

Q. Do you know with whom?

A. He is with a—he is, or was at least, the last contact I had with him, which was some months back, the principal accountant for a publishing house there in Detroit.

1271 Q. When these field checks were made on the some 108-odd returns, or, I think you said it was about a third of the total, you stated that you went out to somewhere from ten to twenty stations with your assistant; is that right?

A. That is correct.

Q. And did you give him instructions as to checking, that he was to do, and how he was to do it at stations that he went without you?

A. Yes, we talked that matter over carefully, and I pointed out the figures which would require special attention, of course; indeed, all of the figures required attention, and told him in general what the type of questions to ask the station operator, and on what information he should base his conclusions.

Q. Now, going back to some of those returns which did not appear to be entirely correct, or where there were revisions made after you got them. Did you supply any figures in any of the returns used in the computation where there was no figure on the return when you received it without—that is, without a field check on consultation with the service station operator?

A. Yes, I did.

Q. And what type of figures were those?

A. The figures on depreciation, primarily. Of course, also the figure of interest on investment, and what wages were computed, figures based on—figures supplied to
1272 me by the station operators.

Q. Now, will you explain what you mean by supplying the figure on depreciation?

A. Where the station operator did not show—well, first, where he showed that he did own buildings and equipment, which are depreciable assets, and gave the cost, and still down below in the questionnaire did not show any depreciation charge whatever, then and only then I supplied a depreciation figure based on the 5 percent on the cost of buildings, and 10 percent on the cost of equipment.

Q. Those are the figures that you previously testified to, are they not?

A. That is correct.

Q. And if I understand that on wages, and interest, they were simply figured upon the number of hours worked by the operator,—I do not mean wages generally,—I mean operators' compensation.

A. Yes, that is true.

Q. That was figured on total hours shown to have been worked by the operator?

A. That is right.

Q. And in that case was the figure submitted by the service station always used?

A. Oh, yes, if the service station did not supply that figure of course that was the occasion for going back
1273 and checking on the return.

Q. Do you mean to find out whether or not the operator did put in any time himself?

A. Yes. We always inquired into that particular matter.

Q. Well, did you ever supply any time for an operator unless that was reported by the service station?

A. Oh, no, of course not.

Q. Now, I asked you about supplying figures. Let me now ask whether any figures of cost, expenses, were ever eliminated by you from these returns because they were, in your opinion, too low to be correct?

A. No.

Q. I think you stated that where you did have some too high to be correct, that you then eliminated or reduced after checking?

A. Where figures appeared to me to be too high we ordinarily checked and the result was either elimination of the figure or modification of the figure.

Q. But did you ever eliminate a figure because it appeared to you to be too low?

A. No, not at all.

Q. Were there some figures which did appear to you, such as depreciation, perhaps, or other things, which appeared to you to be too low?

A. There were figures which were ridiculously low.
1274 As a matter of fact a depreciation is perhaps a good
example where the station operator would show, oh, perhaps one percent depreciation. In those cases, unless we had other reason to question the return, we simply accepted the figure as his without any further checking.

Q. And if you had other reason to question the return, do you mean by that that you gave it a field check?

A. Yes, oh, yes.

Q. Were any figures which were given in the return ever revised upward as contrasted with—eliminated—were any of them ever revised upward without checking with the service station?

A. No.

Q. Were any returns used in your final computation returns which were in any respect inaccurate or incomplete, in your opinion, except in such cases as you have just mentioned, where an expense figure was probably too low?

A. No.

Q. I would just like to ask you one question about the questionnaires as reporting gallonage. Well, the questionnaire is in evidence, Commission's Exhibit 75-A, B, and C. I believe it shows that the service station operators were requested to report the number of gallons of gasoline sold for each month during 1937 and for the first 5 months of 1938, and did you make a computation to compare the
month of May, 1938, with the average 5 months, and
1275 the Month of May, 1937, with the average for the 12
months?

A. I did.

Q. Do you have the percentages which resulted from that comparison?

A. Which report would you like percentages from?

Q. Wayne County.

A. Wayne County. The May gallonage in 1938 based on the reports received was 5 percent higher than the average monthly gallonage for the first 5 months of that year, including May. The May gallonage for 1937 was 9.22

percent higher than the average monthly gallonage for the entire year 1937, for those stations reporting gallonage for the entire period.

Q. Then, does that give your results of your survey a margin of accuracy, or, rather, a lowness of result below the average for the months reported which might offset certain other factors which might, if taken into consideration, have resulted in a lower cost?

A. The fact is the final result has what is known among statisticians and economists as a bias downward, which would not have existed if a less prosperous month in the gasoline business had been chosen, and that bias created by that fact would definitely offset any opposite bias to a large extent which might be created by some other factors which for one reason or another affect May, as compared with other months.

1276 Q. Will you turn to page 21 of your Wayne County report? That table marked Table 10, is that the table corresponding to table 11 in the Detroit report which you were referring to a while ago?

A. Yes, it is.

Q. Will you describe ~~the~~ contents and purpose of that table?

A. This table contains a tabulation of all of the 489 stations which were included in the computations for Wayne County classified for purposes of this table according to the percentage of gasoline sales to total sales.

Q. Total sales of what?

A. Of all commodities and services by the station, the intervals chosen more or less arbitrarily were 5 per cent ~~intervals beginning with those stations whose bias was~~ 95.01 per cent gasoline and higher, and proceeding with groups of stations at 5 per cent intervals down from that figure.

Q. How many stations were there that reported that their business was less than 50 per cent gasoline?

A. Just one in this tabulation.

Q. And is it not so that the table indicates that the majority of the stations reporting it, that is, that their gasoline business was from 65 per cent to 95 per cent of their total business?

A. By far the majority, yes.

1277 Q. And over half of them ran from 86 per cent to 90 per cent, is that right? I guess it is not over half, but it is a little less than half.

A. Yes, it is somewhat less than half.

Q. Did you conclude as a result of this tabulation or otherwise, that there would be, that the percentage of gasoline sales to total sales had any constant effect upon the unit cost of selling gasoline?

A. There is no discernible effect at all. I should like to call attention not only to the last column in the tabulation which certainly does not appear to have any definite trend, but also to the third from the last column which is entitled "range of unit costs," and in that you will find low cost stations as well as high cost stations in every category excepting only the last two, where the numbers are so small that the range is not of any consequence.

That particular column, a column similar to that, does not appear in Table 11 of the Detroit report.

Q. Now, Dr. Taggart, you were questioned to some extent regarding the propriety of including in total dollar sales of gasoline the 4 cents federal and state taxes when making an allocation of overhead costs on the dollar value basis as between gasoline and other sales, and I believe Judge Hanley pointed out that the taxes were some 25 per cent of the total sales price of gasoline.

1278 Now, I assume that we can eliminate sales tax because that was on everything, whether it was gasoline or something else, so that the 4 cents would be perhaps a little under 25 per cent of the total received for gasoline by the retail service station operator. However that may be, let us take 25 per cent as a round figure for the proportion of the tax, even though they are not paid by the retail operator, the proportion of the taxes to the total price, and let us assume that on $100 worth of business, that $80 of that business is gasoline, including gasoline taxes, and $20 other things, so you would have a figure of 80 per cent. On that basis you would allocate 80 per cent of total overhead expense to total sales of gasoline, is that right?

A. That would be the procedure that I followed.

Q. Now, let us assume we take out that 25 per cent, so we will say that you have $60 for gasoline, and we will leave the entire 20 in for the rest, even though there may be some taxes there, so now by leaving out 4 cents from your computation, you get a figure of 60 and 20, or 75 per cent for your proportion of gasoline sales, that is correct, isn't it—it is 60 and 20?

A. Yes.

Q. Now, do you follow me that far, Doctor, that on the figures I have given based on $100 if the 25 per cent for tax was eliminated from gasoline sales, we would 1279 now have, after eliminating the sum of $20, we would now have a total of $80 out of which this $60 is gasoline and $20 is sales of other articles?

A. That is correct.

Q. So that on that basis the proportion of the cost to be allocated to gasoline would be 75 per cent instead of 80 per cent, is that correct?

A. That is correct.

Q. Now, going on with your computation, you then apply 75 per cent instead of 80 per cent to the expenses of overhead costs which you are attempting to allocate?

A. Yes, that would be the procedure.

Q. And having obtained a result there you would then divide that into the total number of gallons of gasoline, is that correct?

A. That is correct.

Q. Now, let me ask you at that point, is there anything else which is divided into the total gallons of gasoline which is not subject to this allocation based upon dollar sales? I do not know. I just want to find out whether all the costs which go into your total for the station have been put through this percentage allocation or whether there is something else.

A. All the costs have been put through that computation.

Q. Therefore, after having a percentage of 75 1280 per cent instead of 80 per cent computed against your total costs, you now divide your resulting figure into your total gasoline. Is that correct?

A. That is correct.

Q. Now, I understood you to say a while ago, that the result of deducting the amount of those taxes, in other words 25 per cent of the gasoline price, which only results in a 5 per cent difference on your allocation, would result in reducing your net unit cost by the sum of 25 per cent, in other words from 4.8 down to 3.6.

Now, I want to know whether this is so, and whether you still make that same answer, and if your have any doubt about it, I would like to have you do a little arithmetic on some round numbers.

A. Well, it is rather obviously not so. As a matter of fact, I did fall into that arithmetical delusion in the heat of the moment, but it certainly is quite obviously not mathematically correct.

Q. Would it be anything near that reduction?

A. Oh, nothing like it, nothing like it, as your reduction
is made 80 per cent of your hypothesis, which is very close,
of course, to the percentage which was actually used down
to 75 per cent, that is a reduction of 5 out of 80 points,
which is in the neighborhood of a 6 per cent reduction. Now,
6 per cent applied to 4.8 cents, or to any other figure—
1281 well, 6 per cent applied to 4.8 cents, well, runs roughly
3 tenths of one cent, so that on that basis the 4.8
cents would be reduced to 4.5 cents.

Q. Then, in other words, the only effect, is this not true, that the only effect it would have upon your result, if you had not included those $4 taxes in your computation, that is in computing this allocation of total costs, and that is the only place you did use it, isn't it?

A. Yes.

Q. If you had not used it there, wouldn't that result have been merely, that you would have perhaps gotten a result 4.5 cents instead of 4.8 cents?

A: That is substantially true.

Q. I wish to recall again that in stating the question I did not make any tax reduction whatsoever from the other items besides gasoline.

A. Yes.

Q. Although there undoubtedly would have to be some corresponding tax reduction made there as much as a dollar a quart that you mentioned—not a dollar a quart, but how many cents a quart?

A. One cent.

Q. One cent a quart on oil?

A. Yes, in order to be comparable with the gasoline station.

1282 Trial Examiner Ballinger: Do you now desire to correct your former testimony?

The Witness: I most certainly do.

By Mr. Austin:

Q. Judge Hanley, if you will let me have that book that you were reading from a while ago.

(The book referred to is handed to Mr. Austin.)

Mr. Austin: I do not believe this was ever marked for identification, but it is a pamphlet or book entitled "The Cost Principle in Minimum Price Regulation," by Herbert F. Taggart, and I believe it will be stipulated that there have been a number of quotations from this book read into the record by counsel for the respondent.

Mr. Hanley: I will agree that that is true.

Mr. Austin: For the purpose of having this book available so that the opinions of the witness which he has stated were still his opinions and which were quoted from this book may be read in the context, I offer the book in evidence.

1283 Mr. Hanley: Just before the court's ruling on the objection, please.

Trial Examiner Ballinger: Let the book be marked for identification as Commission's Exhibit No. 77.

(The document was marked for identification "Commission's Exhibit No. 77.")

Mr. Hanley: The exhibit, Commission's Exhibit No. 77, offered, is objected to for the reason that it is immaterial and irrelevant in substantially all of its parts and merely is an encumbrance upon the record. There is no objection to an offer of any portions of the book which the witness may say are necessarily a part of his opinion as reflected by any portions that were quoted by Counsel for Respondent.

Trial Examiner Ballinger: For the purposes for which the document is tendered, the objection is overruled and the document is admitted in evidence as Commission's Exhibit No. 77.

(The document heretofore marked for identification "COMMISSION'S EXHIBIT 77," was received in evidence.)

Mr. Austin: Off the record.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

It is understood that the document now tendered 1284 which contains some mutilation may be withdrawn and a complete copy substituted therefor.

Mr. Austin: Your Honor, I marked for identification yesterday Commission's Exhibit No. 76, and I think that the witness testified at some length as to what it contained, and it shows the procedures used, and the mechanics, and so forth, in this survey.

Trial Examiner Ballinger: Frequently referred to in the testimony and extracts read therefrom.

Mr. Austin: I had better ask the witness a couple of questions on that.

By Mr. Austin.

Q. Mr. Taggart, you have answered quite a number of questions on cross-examination which were directed to the report referred to as the City of Detroit report, and which was marked for identification as Respondent's Exhibit No. 2. Were the conclusions reached and stated in the report identical with the ones stated in the Wayne County report?

A. They are substantially identical.

Q. Aren't they identical word for word?

A. They may be word for word. I should have to compare them.

(The witness is making a comparison between the two papers referred to.)

A. There are only two differences, both very
1285 minor. One is in the fifth line from the bottom, the
fourth conclusion, where the Wayne County report says that the average cost of selling gasoline by the stations which are most efficient in that they fall within the lowest 25 percent in unit cost is 3½ cents, the Detroit report says instead that that unit cost ranges from 3½ cents to 3.7 cents. Then, in the fifth conclusion in the Wayne County report, I have used the term "location within the county" and in the Detroit report I used the expression "geographical location.'

Q. Are those the only differences, in the conclusion?

A. Those are the only differences.

Q. Referring to the tables in the respective reports, are the tables in the Wayne County report in general the same, or do they correspond to the tables in the Detroit report, except that there are 80 more stations included in the Wayne County report than in the Detroit report?

A. In general they do; that is true.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: I offer this in evidence, Commission's Exhibit No. 76, for identification.

Trial Examiner Ballinger: Is there any objection?

Mr. Hanley: Yes. The Respondent objects to the offer of Commission's Exhibits 76 upon the grounds set 1286 out in the objection to the question propounded to this witness which sought to elicit his conclusions from his survey, which objection appears, which objection begins on page 1016 of the transcript of testimony, and for the additional reason that it now appears from the testimony of the witness that he does not regard the results of the report on the territory covered by the report as comparable to the territory under consideration in this action as follows: Question propounded to the witness, page 1094 of the record: "Well, now, assuming that those figures are correct for that area, namely, Detroit, Hamtramck, Highland Park, and Dearborn, would you say that the use of 409 stations, all out of the City of Detroit proper, was a fair cross-section and sample of an assumed total of 2297 stations in the area which I have designated?

"A. I should say the two figures are entirely incommensurate. You cannot assume that a thing is a cross-section of something which contains a greater totality than the sample covers very well."

It now appears that the offer has to do with a report which covers the territory entirely other and different even though it may be inclusive of the geographical territory involved in this action.

Trial Examiner Ballinger: Have you concluded, Judge?

Mr. Hanley: That is all.

1287 Trial Examiner Ballinger: The objection is overruled.

The document is admitted in evidence as Commission's Exhibit No. 76.

(The document heretofore marked for identification "COMMISSION'S EXHIBIT 76," was received in evidence.)

Trial Examiner Ballinger: Have you concluded, Mr. Austin?

Mr. Austin: Yes, I think that is all.

Trial Examiner Ballinger: Have you anything further, Judge?

Mr. Hanley: I will be through very shortly, indeed.

Recross Examination by Mr. Hanley.

Q. You did include operators' time as a cost on the basis of wages assigned to that time in preparing your survey, didn't you?

A. That is correct.

Q. Do you regard this survey made as of May, 1938, covering first the County of Wayne over all, and, secondly, the one covering the City of Detroit proper as being applicable today in 1941 to the territory comprised by Detroit, Hamtramck, Highland Park, and Dearborn?

1288 A. No, I should not expect it to be entirely applicable today, to today's conditions, even to the territories.

Q. That it purports—

A. That it covered in 1938.

Q. Within your knowledge did any survey or report of gasoline retailing costs portray a cost figure as high as the one which you reached in your 1938 survey?

A. Do you mean as to the average?

Q. Yes, sir.

A. No, I do not think I have ever seen one where an average cost was arrived at that arrived at a figure quite as high as that.

Q. Some discussion was had by you and Mr. Austin as to the reason for the choice of May. It is true, isn't it, Doctor, that irrespective of any month and its representative character it would be a safer, more reliable procedure if you could have annual figures rather than monthly figures?

A. It would be a better procedure if it were possible to carry out to have complete figures over an entire year.

Q. Now, on this tax thing, Doctor, did you assume to give an exact figure in relation to how much your cost would be reduced if you eliminated the excise taxes?

A. No, we were talking in approximations.

Q. Have you in mind an exact figure?

A. It would be very easy to derive an exact figure,
1289 but, of course, I do not have an exact figure.

Q. I am wondering if there is enough data, Doctor, in either one of these reports to enable one to calculate the difference that would arise?

A. Oh, yes, I think the data exists.

Q. I am unable to find in your report the total amount of gasoline sales and the total amount of all sales.

A. Those figures probably are not in the Detroit report. They are, however, in the Wayne County report.

Q. Now, Doctor—

Mr. Austin: May I state, Judge, that they are on page 6 of Commission's Exhibit No. 76.

By Mr. Hanley:

Q. Well, if there is enough to give us the arithmetic that is all right.

So far as the Detroit report is concerned, Exhibit 2, Doctor, it would amount to multiplying by 4 cents the May gallonage of 3,187,534 gallons, and deducting the result from the figure that you used as total gasoline sales, wouldn't it?

A. Total dollar sales; yes, sir; that would be the way it would be arrived at.

Q. And that would necessarily reduce the percentage of 80.75 in some degree?

A. It would reduce it in some degree.

1290 Q. Now, you think there are enough figures in the Commission's Exhibit 76 to enable one to make that arithmetical calculation?

A. The figures are here on page 24 of Commission's Exhibit No. 76.

Mr. Hanley: All right. I think that is all.

Trial Examiner Ballinger: Gentlemen, is there anything else?

Mr. Hanley: Yes, I have one other thing on the record.

The Respondent now moves to strike from the record the answer of the witness to which objection was made beginning at page 1016 and to strike from the record Commission's Exhibit No. 75-A, 75-B, and 75-C, and Commission's Exhibit 76 for all of the reasons set forth in the objection referred to and for the additional reasons set up in the objection made to Commission's Exhibit No. 76.

Trial Examiner Ballinger: The Examiner will take the motion under consideration and announce a decision at the convening of the next hearing.

Mr. Hanley: I think that is all I have.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

(Witness excused.)

Mr. Austin: The Commission rests, Your Honor.

1291 Mr. Hanley: Well, then, I will have some motions, Judge; but I will send you those, both of you.

Mr. Austin: You can make them at the next hearing before the start of the witnesses.

Mr. Hanley: That will be fine for me.

Trial Examiner Ballinger: What is that?

Mr. Hanley: I say I will have some motions that will properly come at the conclusion of the Commission's case.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

Now, at 7:35 o'clock p. m., the hearing stands adjourned to be reconvened at 10 a. m., Eastern Standard Time, April 21, 1941, in Room 859, Post Office Building, Detroit, Mich.

(Whereupon, at 7:35 o'clock p. m., April 9, 1941, the hearing in the above-entitled matter was adjourned.)

1292

Room 859, Post Office Building,
Detroit, Michigan,
April 21, 1941.

Met pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold A. Hanley, Esq., 910 South Michigan Ave., Chicago, Illinois, and

Arthur J. Abbott, Esq., of the firm of Abbott, MacMahon, and Roberts, 2230 Buhl Building, Detroit, Michigan, on behalf of the Respondent.

1293

PROCEEDINGS

Trial Examiner Ballinger: We will come to order. This is a reconvening, April 21st, 1941, at the hour of 10 A. M., Eastern Standard Time, at Detroit, Michigan, of Docket No. 4389, case entitled in re Standard Oil Company.

The last hearing was held April 9, 1941, at Detroit, Michigan.

The reporter will note counsel for the Commission and Respondent present.

Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: I will return this, Mr. Austin, (handing bound document to counsel for the Commission).

Mr. Austin: Oh, yes.

I think you have pretty complete copies, but I brought the original of it along.

Mr. Hanley: Yes, we will need some of them. I will have to ask for those invoices, to take photostats. We can't locate our originals for copies of them, so I will want them.

Mr. Austin: I think everything is here; supposedly.

If your Honor please, I would like to state that I received informal notice on Saturday that the Commis-
1294 sion had granted the motion made by the attorney
for the Commission to amend the Complaint, a copy of which motion was served upon counsel for the Respondent, and I assume that both counsel for the Respondent and myself will receive formal service of the Order amending the Complaint, but I wish to state on the record at this time that the motion has been granted; that is, the amendment has been granted in the form in which it was moved.

Trial Examiner Ballinger: The Examiner should have been advised, and a copy of it furnished him so that it might be inserted in the record. When it is received, if counsel will present the Examiner with a copy, he will discuss its inclusion in the record.

1295 Mr. Austin: Yes, I mentioned that now because
I believe the action taken by the Commission was last Friday, and therefore I don't believe any of us have had time to receive copies.

Trial Examiner Ballinger: I appreciate that. Counsel for Respondents having been fully advised may govern themselves accordingly.

Mr. Hanley: We are willing to proceed on that basis, your Honor.

Your Honor, may the record show at this time that Mr. Arthur J. Abbott of the Detroit Bar is formally appearing of record as counsel for the Respondent.

Trial Examiner Ballinger: Proceed. On the record.

Mr. Hanley: The Respondent objects to the amendment of the complaint filed by the Commission for all of the reasons set up from time to time during the course of the trial.

Trial Examiner Ballinger: Let me interrupt you. Off the record.

(Discussion off the record.)

Mr. Hanley: What was the last I said?

(The last statement of Mr. Hanley was read.)

1296 Mr. Hanley: Denominated both general and specific objections made to the reception of evidence which goes to explaining or outlining the disposition of gasoline in the hands of someone to whom Respondent has sold the same, and relating to such disposition after sale and after such gasoline has become the absolute property of the vendee.

1297 It is understood that the proposed amendments go entirely and exclusively to the question of the matter of pricing of gasoline after the same has been sold by the Respondent and after Respondent has lost control over the disposition or pricing or sale of such gasoline and it is re-asserted as a ground and reason for this objection that the Respondent has neither the right nor the obligation to police gasoline after it has been sold by Respondent and does not and cannot control the disposition thereof, the manner of sale or the pricing policies which may be used or adopted by any resellers of gasoline or others who may have purchased such gasoline from the Respondent.

The Respondent does not object to the form of the amendment and concedes that on the Commission's theory of trial that the amendment does conform to the proof that the Commission has adduced and which has been received by the Court on the theory of trial adopted by the Commission.

Trial Examiner Ballinger: The objection being to the action of the Commission, the Trial Examiner has no power but to refer the matter back to the Commission for appropriate action.

Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: Upon request of the Examiner, Respondent will first urge a series of motions which already

1298 appear on the record, having to do with striking from the record the testimony of Herbert F. Taggart, and Exhibits 75-A, B, and C, Exhibit 76, and Exhibit 77.

At this time the Respondent renews its motion to strike all of the testimony of Herbert F. Taggart relative to a survey of cost of selling gasoline in the city of Detroit at retail during May, 1938, and to strike Exhibits 75-A, B, and C, 76, and 77, offered ~~by the~~ Government and received in evidence on the examination of said Taggart, for reasons and upon the grounds as follows, but without limitation—

Trial Examiner Ballinger: If I can interrupt you, and off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: —but without limitation to such specified reasons:

First, for all of the reasons set forth in the objection to the question asked of Professor Taggart, which objection begins on page 1016 of the record; and for the additional reasons added to such objection during the course of the examination of said Taggart, and for all the reasons assigned in a similar motion to strike made at the close of said Taggart's testimony. And for the additional specific reasons set forth as follows, including
1299 such specified reasons but without limitation thereto.

2. That it now affirmatively appears from the testimony of the witness Taggart that the surveys which were discussed in his testimony and the only surveys which he made were (a) one dealing with Wayne County, Michigan, as a whole, and (b) a segregation therefrom of the city of Detroit proper and that in no instance did the said Taggart make a survey of the geographical territory that has been covered in this proceeding, namely, the cities of Detroit, Hamtramck, Highland Park, and Dearborn, and that, hence, said survey does not apply geographically to the territory involved, and that the witness Taggart has affirmatively testified that his survey is inapplicable to the territory involved in this action.

3. That said survey deals with a time involving May, 1938, whereas the point of interest in this action is directed to the present time, and it affirmatively appears by the testimony of the witness Taggart that he regards his survey made in 1938 inapplicable, even to the geographic territory which it presumed to cover in 1938, which inapplicability is to a point of time in the present, and that it obviously follows that the survey which was made

in 1938 and is deemed by the witness himself as inapplicable to the geographic limits of the territory covered in this action, even as of May, 1938, it obviously follows—and the witness has so testified—that it would
1300 have no validity at all when such inapplicable geographic survey of 1938 is now proposed to be directed in point of time to 1941 and covered a different geographic territory.

4. That it appears from the affirmative testimony of the witness Taggart that he altered figures on the questionnaires that he received. That he does not know to whom the questionnaires were distributed except by indirection, implication, or self-serving hearsay. That he has no knowledge and did not undertake to obtain knowledge as to the accuracy of the figures presented in the questionnaires. That he arbitrarily assumed the existence of values upon which he predicated interest and depreciation charges. That he regarded certain items of cost in connection with some service stations because they appeared on the questionnaires and disregarded said items of cost in connection with other service stations because they did not appear.

That he was totally without information and did not undertake to obtain any information as to the total amount of gasoline sold in the month of May or even the year 1938 at retail in Detroit, and had in May, 1938, no knowledge and has no knowledge now of the relation of the sample in gallonage which he obtained, to the total
1301 gallonage.

That by his own test and testimony he has failed to establish that he had a fair and sufficient sample upon which to predicate any conclusion.

That his numerical sample on the basis of total service station survey is not sufficient; that he does not even know now, and did not know in May, 1938, what the numerical total of service stations was in the territory involved in this action; that he made no effort to functionally classify service stations with reference to their economic functions and purpose, size, and method of operation; that he made no effort to determine the essential influential factors relative to the gasoline business in the month of May that would have been essential to determine in order to properly evaluate the month of May, 1938, as a proper sampling month; that he made an arbitrary allocation of

expense to gasoline without any fair consideration of other functions performed at service stations, and without any fair consideration of the ratios of expense that should be allocated to gasoline and to other products sold, and service rendered at service stations; that he repeatedly admitted that cost accounting is an inexact science, and that cost accountants disagree; that he admitted affirmatively that many items of cost were left out of his plan
of survey that oftentimes were included in cost sur-
1302 veys, and that he included in his survey items of
cost that were frequently left out of cost surveys;
that he affirmatively admitted that in a proceeding which had to do with the cost of any individual Defendant or Respondent, that the only evidence that is really pertinent, namely, specific cost, is the actual cost of the Respondent or the Defendant involved, and made the specific answer beginning at page 1055 of the record: "I do not think any Respondent ought to be, or Defendant ought to be found guilty on the basis of an average cost."

That the witness affirmatively admitted that his survey had to do with averages only; that he made a fatal blunder in allocation of expense to gasoline, which is indicative of the unfairness and unsatisfactory character and invalidity and lack of value appertaining to the entire survey, in that he admittedly and affirmatively testified to the fact that he overloaded revenue receipts from the sale of gasoline with excise taxes and sales taxes, which were not made applicable in like amount, or in some instances at all to sales of products and services other than gasoline; and that such method of allocation violently distorts the percentage ratio figures which form the heart and basis of the conclusion reached by the witness as to average cost; that in respect of this particular defect in
the survey, the witness Taggart affirmatively demon-
1303 strated that he is without knowledge as to the mathe-
matical effect of such tax overloading, and that in
one instance he testified that it might affect costs as much as 1¼¢ per gallon of gasoline, and later in another instance testified that it would amount to approximately .3 of a cent per gallon of gasoline, but he was unable to state any positive figure as to how much it would, in fact, affect his conclusion as to the cost of sale of gasoline; that the results of the Wayne County survey, as testified to by the witness Taggart, indicated that the overall margin be-

tween cost of gasoline and sale price of gasoline was 3.63¢ per gallon, and that when asked as to how service station operators could survive when they had a cost of 4.8¢ per gallon to sell gasoline and only had an overall margin of 3.63¢ per gallon, that he answered, among other things, that the mortality is high among service station operators, but immediately thereafter testified that he had known of many operators who had been in business for a period of many years and sought to further explain his answer by such reasons as the fact that service station operators might have rich relatives; and as to the surveys made by Taggart, he found different conclusions as to cost relating to Wayne County, in that he arrived at a
conclusion of 4.6¢ on that survey, and then by some
1304 means of segregation, which is not entirely clear
from his testimony, he arrived at a conclusion that the cost in the city of Detroit proper was 4.8¢ per gallon; and such attempts as the foregoing to support a cost survey by a reputedly responsible cost accountant and economist are sufficient in themselves to render such a survey invalid and valueless for any purpose, and to demonstrate its uselessness and absurdity in an action of this character.

5. That irrespective of the validity or invalidity of the survey, as such, it concededly purports to show nothing except an average cost of sale of gasoline, and was concededly made under what the witness Taggart has admitted is essentially a price fixing statute, and necessarily condemns the efficient operator and blesses the inefficient operator; that unless by pure accident or coincidence such average cost does not equal or even approximate the actual cost of any operator; that certainly it does not purport to be the actual cost of any operator; that it affirmatively appears in the Wayne County survey that the lowest cost which Taggart said was reported to him was slightly in excess of 2¢ per gallon, and that the highest cost reported to him was in excess of 22¢ per gallon; that in the attempted segregation by the witness Taggart of the city of Detroit, he stated for reasons best known to him-
self, and which are not clear in the testimony, that
1305 the lowest cost reported to him was slightly in ex-
cess of 2¢ per gallon, and the highest cost something in excess of 15¢ per gallon; that the absurdity of such figures are patent upon their face; that nothing was done

to alleviate the improper and erroneous defect of the inclusion of such figures in the analysis made by the witness Taggart and the resulting conclusions upon his survey, in that he affirmatively testified that he took into consideration the highest and the lowest costs and lumped them altogether and averaged them, but conceded that good accounting practice in a survey of this character would indicate that perhaps as much as 10% of the two extremes, namely, the minimum and the maximum, at either end of the list of reporting stations, should have been eliminated before arriving at the average in order to escape the distorting influence of abnormal lows and highs.

6. That irrespective of the validity or invalidity of the survey, the witness Taggart testified that it does not even include figures from Ned's Auto Supply Company, and that he has no knowledge of whether it includes the costs of any of the other wholesale dealers involved in this action or the costs of any dealers which may have been, in May, 1938, supplied by any of the wholesale dealers involved in this action.

1306 7. That the witness Taggart has affirmatively testified that it does not purport to show the cost of any of the four dealers in either their wholesale or retail operations, if any, and indeed the witness testified that he did not now and never did know anything about the costs of said four dealers.

8. That the witness Taggart affirmatively testified that he never knew and does not now know anything about Respondent's costs of marketing gasoline, and that his purported survey does not even pretend to know anything in respect thereto.

9. That the survey is wholly immaterial and valueless in this action in that the only costs that are of any value herein, or of any pertinence, are those of the Respondent which are clearly not considered in any manner or affected in any manner in 1938 or now by the surveys made by the witness Taggart and he has so affirmatively testified. Further, that if any of the costs of any or all of the four wholesale dealers involved in this action are material at all for any purpose, that the survey is equally valueless to establish anything as to them in that the witness Taggart has affirmatively testified that the survey does not establish

and does not purport to establish their costs or that their costs were even considered in the compilation of the survey and in his arrival and his conclusions as to costs.

1307 10. That the witness Taggart affirmatively testified that this was the only gasoline cost survey that he had ever made and it appears that he has no knowledge or connection with the oil business or the gasoline business except the one relative to the making of this survey. That his conjecture and guess as to the mortality among service station operators is without value. That the witness has affirmatively shown by his own testimony his lack of familiarity with what the real rate of mortality is among service station operators. Further than that he has demonstrated a lack of that knowledge which, as a responsible economist, he should have, in that he knows nothing about the rate of mortality or the degree of profitable operation, not only of service stations, but of allied businesses.

That the witness affirmatively admitted that while he knew of other cost surveys in relation to the sale of gasoline, he did not take the trouble to examine any of them before making his own survey, nor did he trouble to check his conclusions with any other survey.

That the witness affirmatively admitted that in the case of all of these other surveys, it was his understanding that a lower unit cost of sale had been reached and affirmatively stated that to his best knowledge—whatever that is worth—his survey arrived at the highest cost per
1308 unit of sale that he knew anything about.

Trial Examiner Ballinger: Have you concluded?

Mr. Hanley: Yes.

Trial Examiner Ballinger: The Trial Examiner will hear from counsel for the Commission.

Mr. Austin: If your Honor please, I have listened with interest to Judge Hanley's statement of the grounds of his objection to Dr. Taggart's testimony and survey. I don't agree with all that he said. I don't know that it was entirely correct in his reference to the statements of the witness, but I will not attempt to answer the objection at length because I think there is a very complete answer to the entire objection, which I think can be very briefly made.

Dr. Taggart, of course, was qualified as an expert, and his testimony was opinion testimony and opinion evi-

dence. He was very completely and eminently qualified to give his opinion upon this subject and to make the survey which he stated that he made. That is completely brought out in his testimony, both as to his experience as an educator and professor and also as to his experience with the NRA and other undertakings, where he either made or participated in the making of cost surveys. He has specialized in distribution cost accounting. Therefore, there could be no question as to his qualifications
1309 . At page 1014 of the record, immediately preceding the statement of his conclusions, I asked Dr. Taggart this question:

"In your opinion, Dr. Taggart, were the mechanics of this survey and its coverage and representation and the accounting procedures and methods used such as to produce reliable and conservative results as to the retail service station cost of selling gasoline in Wayne County, Michigan?"

His answer was: "Yes." So that as a well qualified expert, he has testified that the results of this survey were reliable and conservative.

Now, that being true, the testimony and the survey are unquestionably competent evidence. They are unquestionably relative and material in this case.

On the question of materiality, I refer to the statement which I made as counsel for the Commission on page 1022 of the record, as to the purpose for which Dr. Taggart's testimony was offered. Now, returning to the objection just stated by counsel for the Respondent, his objection, I submit, goes almost entirely to the weight of Dr. Taggart's testimony and not as to its competency, its relevance, or its materiality. I think the question of weight to be given to Dr. Taggart's testimony is one for the Commission. Whether the Commission decides later on to make a finding that Dr. Taggart correctly
1310 determined the cost of selling gasoline at retail in Detroit, is another question, but I think we are only concerned here with the competency, relevancy and materiality of the testimony, and in view of Dr. Taggart's considerations and the fact that he has given his opinion as an expert, I don't believe that can be in any way shaken by statements of counsel in the respects he disagrees with the experts who testified for the Commission.

Trial Examiner Ballinger: Are you ready for a ruling?

Mr. Hanley: I want to refer, very briefly, if your Honor please, in answer to a situation which was presented by counsel for the Commission.

In the first place, I am very sure, indeed, that I haven't overlooked in any of the motions, the objection as to the relevancy of this survey in this action, irrespective of its weight or its character. Always, we have taken the position, and now take it, that no matter how good the survey might be, whether done by Professor Taggart or someone else, and irrespective of the care with which it were prepared and the accuracy with which the calculations were made and the conclusions reached, that it still just doesn't belong in this proceeding.

Now, that is the primary basis of this objection. It was the basis of the objection before it developed that
there were as many defects in this survey as there
1311 are; because we had to assume, at least arguendo,
that the Government might put on a competent economist, and he might prove that he had made a good survey, so our objection then went to its relevancy, as such, in this action, and not to its weight or validity as a survey at all.

Now, your Honor, the thing is in, and Dr. Taggart has testified, and your Honor heard him testify; saw him on the witness stand, and I take violent exception to the statement of counsel that the survey now presents a question of weight that is for the Commission alone. I grant, your Honor, certainly it is a rule of law in a proceeding of this kind that if competent evidence is offered and there is some reasonableness as to its degree of weight, if it is competent and relevant, the ultimate trier of the fact must essentially determine how much weight to give that thing, but I submit, your Honor, that in any trial court, when evidence is offered that is so patently without any weight, that it becomes the duty of the trier of the immediate fact to exclude that, not on the basis of the fact of how much weight it has, but one basis of fact that it doesn't have any weight, and I say to your Honor that it is just an outrage, in my view, that this Respondent is forced in this action to meet a thing like that. I
think it is just totally unfair that we should be put
1312 up against the burden in the expenditure of time and

money and effort to have to meet a thing which
this witness himself has said, in so many words, is not
applicable.
1313 He said it is not applicable geographically and to
the territory involved in this action, and furthermore
he said "My own survey made in 1938 wouldn't be applicable
in my judgment to this same territory in 1941."

Trial Examiner Ballinger: Wasn't he testifying then as to a question of law and not fact?

Mr. Hanley: No.

Trial Examiner Ballinger: Wasn't the question of applicability one of law?

Mr. Hanley: No, sir, it was not, your Honor. If I can find the quotation I will call it to your attention. He was expressly asked about that very thing.

Trial Examiner Ballinger: That is a question for the Commission, not for that witness to determine.

Mr. Hanley: If it were a matter of law, but he is testifying as an economist, and he was asked if in his judgment a survey that he made covering a certain territory would be applicable to some other territory, and he said no. Then he said, "I don't think it would be applicable even to the same territory several years later."

Now, that is his judgment as an economist that had nothing to do with the law of the case.

Mr. Austin: The territorial question, the average which
he found, was the average for all of Wayne County and
Detroit separately, and there was .2 of a cent dif-
1314 ference outside of Detroit. There is absolutely no
evidence here that there was any variation in the
results for any particular district.

Trial Examiner Ballinger: The Examiner is prepared to rule unless counsel desires further argument.

Mr. Hanley: If there is any question in your mind about whether he was testifying on the question of law or question of fact as an economist, I want that clearly in the record.

Trial Examiner Ballinger: His testimony as to whether or not a survey made in '38 was applicable to the conditions at the time he was testifying in a question of fact and not of law, upon which his testimony is valuable. But as the Examiner understands the survey made in '38 may on certain aspects of this case have some bearing.

Unless counsel desires to be heard further the Examiner is prepared to rule.

Mr. Hanley: I don't care to be heard further, if that matter is clear on their record.

I now assert that the witness himself condemned the value of his testimony in this: That he testified, first, that his survey was not applicable—testified in substance to this: First, that his survey was not applicable to a territory other than that it purported to cover; and second, that it was not applicable in 1941 to the same territory which is covered in 1938, and that such answers were given as answers to questions eliciting statements of fact
1315 from an expert witness who himself prepared the
surveys and was testifying as an expert on their usefulness in respect of the questions which he was being asked and was not being asked, and he was not testifying in respect of any question of law.

Trial Examiner Ballinger: Counsel for Respondent has moved to strike from the record Commission's Exhibits Nos. 75-A, 75-B, 75-C, and 76, for the reasons advanced at the time said documents were admitted in evidence, and which reasons appear in the record pages 1001-2, and 1285-6 and for the further reasons assigned this morning; and to further strike from the record all of the testimony of the witness Taggart for the reasons stated by counsel, and appearing on pages 1016-20, both inclusive; and supplemented by the additional reasons assigned by counsel this morning.

Commission's Exhibit 75-A is a questionnaire distributed under the direction of the witness Taggart to 2,442 gasoline stations in the locality and vicinity of Detroit as a basis for a survey to determine the marketing cost of gasoline during the month of May, 1938. Exhibit 75-B is a duplicate, except as to the color of the paper, of Exhibit 75-A, and was designed to be retained by the owner or operator of the station who filled out the questionnaire, Commission's Exhibit 75-A. Commission's Exhibit 75-C is a sample envelope delivered with Commission's Exhibit 75-A to be used in the transmission of said exhibit to the witness Taggart when filled out by the service
1316 station operator.

489 service station operators responded to the said questionnaire and their returns were used in the final computation. On the basis of the 489 returns the witness Tag-

gart prepared a report showing the cost per gallon of marketing gasoline in the month of May, 1938, the testimony of the witness Taggart sought to be stricken embodied the basis for and his conclusion set out in the report with reference to the cost per gallon of marketing gasoline in Wayne County, Michigan, in May, 1938.

1317 "Without attempting to consider each of the separate objections urged by counsel for Respondent, it is the opinion of the Examiner that Commission's Exhibit 75-A, B, and C, and Commission's Exhibit 76, taken together, form some evidentiary value as tending to establish the cost of marketing gasoline in Wayne County in the month of May, 1938, and were properly admitted in evidence; that the testimony of the witness Taggart sought to be stricken, was competent as tending to establish the cost of marketing gasoline in the month of May, 1938, which is material to the issues here joined. The Examiner is of the opinion that said evidence tending to establish the cost of marketing gasoline throws some light upon the effect of discrimination in prices charged in the complaint; that said exhibits and said testimony are therefore competent, were properly admitted in evidence, and the motion of counsel for Respondent to strike said exhibits and said testimony of the witness Taggart referred to are each separately accordingly denied.

Mr. Hanley: I don't know how to designate these motions, your Honor; I have a series of them. Perhaps for quick reference on the record, I can use letters, A, B, C, if that is satisfactory.

A. The Government having rested its case, the Respondent now moves for a dismissal of this action
1318 against the Respondent on the ground, and for the
reason, that there is a total failure on the part of the Government to establish that the transactions involved in the action and complained about by the Government involve interstate commerce; and, further, that it has been affirmatively established on the government's case and by their own witnesses, that the transactions complained of, and that the course of dealing referred to in the Complaint and concerning which the Government complains, were all and are all intrastate in character, and that the Federal Trade Commission is wholly without jurisdiction to proceed further in this action except to enter an order of dismissal thereof.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Does counsel for the Commission desire to be heard?

Mr. Austin: I don't believe so, your Honor. I think our position is sufficiently clear in the testimony that has been brought out, and allegations of the Complaint on interstate commerce.

Trial Examiner Ballinger: The motion just made is one that is properly directed to the Commission. The Examiner has no power to pass on it other than to deny it.

1319 Mr. Hanley: Mr. Reporter, will you please denominate this motion B.

The Respondent at this time, the Government having rested its case, moves for a dismissal of the action on the ground that the Government has failed to establish a prima facie case in that it has not overcome the assertion of right, and the existence of right, and the legal presumption of legal right in the Respondent to bona fidedly select and to functionally classify Respondent's own customers, and to grant price differentials placed upon such functional differences and classifications.

Trial Examiner Ballinger: The same ruling.

Mr. Hanley: Motion C.

The Government having rested its case, the Respondent moves for a dismissal of the action on the ground of—on the ground that the Government has failed to show prima facie, or at all, that any of the practices or transactions of Respondent complained against have had any material or substantial effect whatsoever upon either interstate or intrastate commerce of an injurious nature, or that such practices and transactions have created or tended, or tend to create any monopoly in gasoline commerce in Detroit, either of an interestate or itnrastate character, and the Government has failed to show any injury or tendency to injure competition in either interstate or intrastate commerce in gasoline in Detroit, or elsewhere, or at all.

1320 Trial Examiner Ballinger: Same ruling.

Mr. Hanley: Motion D. The Government, having rested its case the Respondent moves for a dismissal of this action on the ground that if there has been any prima facie case made by the Government by either the admission on the part of Respondent of the existence of a differential in price, or adduced in this case, such prima facie case has been fully overcome and met by a fair preponderance of

the evidence; although that would not be necessary to entitle Respondent to a dismissal, but that such evidence overcoming any such prima facie case has been introduced and developed in the Government's own case, and it has been affirmatively established that such differentials in price were fully justified on the part of Respondent on two grounds regularly recognized expressly by the statute under which the complaint is made, namely: One. It has been affirmatively shown that there was a necessity imposed upon Respondent to meet competition, which was done bona fidedly by Respondent, and was done by the granting of terms and prices no greater than were essential to enable Respondent to retain its customers, and in some instances such competition was not fully met by Respondent, and that Respondent has been shown in no instance to have gone beyond meeting such competitive offers and efforts on the part of suppliers competing with Respondent, and
it has been affirmatively shown that all of the efforts
1321 of Respondent and the differentials granted were
done bona fidedly to meet an equally low or lower price
offered by competing suppliers.

2. That it affirmatively appears on the Government's own case that the differential in price granted by Respondent to tank car buyers is fully justified in that it makes only due allowance for savings in cost to Respondent in methods of delivery and sale of gasoline insofar as such costs are reasonably and physically calculable.

Trial Examiner Ballinger: Same ruling.

Mr. Hanley: E. The Government having rested its case the Respondent moves for a dismissal in this action of the complaint wherein it refers to transactions alleged to have taken place between Respondent and the Wayne Oil Company, and between Respondent and the Stikeman Oil Company, and to dismiss and preclude any further consideration of any of such transactions, for the reason that there is an absolute failure of proof to establish first, that there was any use made by either of said buyers of any differential which may have been granted to them to depress or otherwise influence the prevailing retail market of gasoline in Detroit at any time; second, that there is no evidence that either of said buyers at any time ever undercut or depressed the prevailing tank wagon price of gasoline in Detroit at which price they supplied certain retail resellers who were customers of said buyers.

1322 3. That there is no evidence at all in the case. That the transactions between the Respondent, on the one hand, and said two buyers on the other hand, had the slightest deleterious influence upon commerce of either intra or interstate character in the city at any time or that said transactions in any wise at any time injured competition in either inter or intrastate commerce in gasoline in Detroit.

4. That all of the foregoing affirmatively appears by affirmative evidence adduced by the Government on its own case and that such evidence is undisputed on the record..

Trial Examiner Ballinger: Same ruling.

Mr. Hanley: Motion F.

The Government having rested its case, the Respondent at this time renews its motion to strike all of the testimony on the record which has to do with alleged reduced prices offered by retailers supplied either by Respondent or by any of the four tank car buyers, for the following reasons:

1. Respondent has never had, and does not now have any obligation, duty, or right to police the disposition, manner or terms of sale or prices, once gasoline is delivered to a purchaser, whether he be a retail purchaser buying on a tank wagon basis, or a wholesale buyer purchasing on a tank car basis.

1323 2. That it has been affirmatively shown on the Government's own case, and it is undisputed, that in any of those instances where it has been shown that any of such purchasers operating at retail, whether they bought from Respondent or one of the four wholesale buyers, such retailers were reducing prices in a competitive market, which reduction was being participated in generally by retail markets of gasoline throughout the city of Detroit and that there is no evidence in the record upon which a reasonable man could conclude that such price cuts or reductions, or any of them, were induced, caused, influenced or occasioned by any of the operations or transactions of Respondent, or by reason of any prices granted to anyone by Respondent.

Trial Examiner Ballinger: This motion is directed to the sound discretion of the Trial Examiner and is by the Trial Examiner, accordingly, overruled.

Mr. Hanley: Motion G.

The Government having rested its case, the Respondent, then, moves to strike all the testimony tending to show that any retail outlets directly operated by Ned's Auto Supply Company, and Citrin-Kolb Oil Company sold at prices less than the alleged prevailing retail prices of gasoline in Detroit, for the following reasons:

1. That there is no obligation upon the Respond-
1324 ent to police the sale or disposition of gasoline sold
to any of its customers, either retailers or wholesalers. That the title to such gasoline sold passes absolutely. That the Respondent has neither the right nor the obligation to control methods, manner, terms, or prices of the reseller of such gasoline.

2. That it affirmatively appears on the Government's own case, and is undisputed on the record, that in those instances where said two wholesale buyers, to-wit, Ned's and Citrin-Kolb, were directly operating retail outlets reduced the retail price below the alleged prevailing retail market price in Detroit, that the same was made necessary and occasioned by the general competitive situation in the city of Detroit, and that such operators were justified in meeting that situation and that such situation was entirely without the control of the Respondent and the manner of meeting the same, if met at all by said two operators, was without the control of the Respondent, and that such competitive conditions were generally prevailing and universal at Detroit at the times when it was indicated that said operators may have made a price reduction and that there is no evidence showing or tending to show that any of the activities, transactions, or prices done or given by Respondent had any causal effect resulting in said reduced prices by said operators in their retail opera-
1325 tions or had any influence whatever, substantial or
otherwise, upon other intra or interstate commerce in gasoline in the city of Detroit, or upon competition in either intra or interstate commerce in such gasoline.

Trial Examiner Ballinger: The Examiner is of the opinion that discrimination has been shown and that the question of justification is not sufficiently established by the record to absolve Respondent from the duty and obligation of establishing same. The motion is, accordingly overruled.

Mr. Hanley: Motion H. The foregoing motion, denominated Motion G, was made with respect to the retail operations of Ned's Auto Supply Company and Citron-

Kolb Oil Company. The Respondent now moves the same motion, the Government having rested, in respect of the transactions of a wholesale character or tank wagon character indulged in by all of the four wholesale buyers named in this action; to-wit Ned's Auto Supply Company, Stikeman Oil Company, Wayne Oil Company, and Citrin-Kolb Oil Company, it being the purpose in this motion, without repetition to my motion G, applicable to such wholesale and tank wagon operations.

Trial Examiner Ballinger: Is this a motion, now, to dismiss, or is this a motion to strike testimony?

Mr. Hanley: This is a motion to strike testimony.

1326 Trial Examiner Ballinger: The motion is denied.

Mr. Hanley: Motion I.

The Government having rested, the Respondent now moves for a dismissal of this action on the ground and for the reason that if it has been shown that there were any cuts in price, or reductions in price of gasoline below the alleged prevailing retail market in gasoline in Detroit, that if the same had any effect whatsoever on commerce in the city of Detroit, that such effect was upon intrastate commerce in gasoline in Detroit, as distinguished from interstate commerce, and that if there was any such effect on intrastate commerce, that such effect constitutes no burden upon interstate commerce, and has no influence whatsoever thereupon and even though it were assumed that there were some influence upon gasoline commerce in the city of Detroit, by virtue of reduced retail prices, which the Government may contend existed, the existence of which the Government may assert it has proved, as having been offered by either Ned's Auto Supply Company or by Citrin-Kolb Oil Company operating retail outlets directly or offered by dealers supplied by any of the four wholesale buyers named in this action, that the same is a matter wholly without the jurisdiction of the Federal Trade Commission in that it has been affirmatively established on the Government's own case that all of such transactions
1327 involve intrastate commerce only and that in the event the Government has totally failed to sustain its obligatory burden of establishing that there was any burden cast upon interstate commerce, either because the commerce involved is interstate commerce, or by reason of the influence that intrastate commerce might have upon interstate, and it affirmatively appears that whatever the rec-

ord may disclose as to price differentials, reductions, and competitive activities, in the city of Detroit, that none of it tends to show and, taken as a whole, it fails to show any burden or influence whatsoever upon interstate commerce or competition in interstate commerce.

Trial Examiner Ballinger: The foregoing motion is properly directed to the Commission, the Trial Examiner having no power to do other than to deny it.

Mr. Hanley: I think that concludes these motions.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

On the foregoing rulings of the Examiner, exceptions are automatically allowed, which applies to all rulings heretofore and that may hereafter be made by the Examiner.

At this time we will take a five minute recess.

(Thereupon a five minute recess was taken.)

1328 Trial Examiner Ballinger: On the record. Reconvening.

Mr. Abbott: It now being 12:02 o'clock p. m., may I make the suggestion that we now adjourn until 2:00 o'clock p. m.

Trial Examiner Ballinger: In the absence of objection, the suggestion is adopted by the Examiner, and the hearing now stands in recess until 2:00 p. m.

(Whereupon, at 12:02 p. m., a recess was taken until 2:00 p. m.)

UNITED STATES COURT OF APPEALS

For the Seventh Circuit.

I, Kenneth J. Carrick, Clerk of the United States Court of Appeals for the Seventh Circuit, do hereby certify that the foregoing printed pages contain a true copy of Volume I of the printed transcript of the record, filed in this office on July 12, 1948, in:

Cause No. 9215.

Standard Oil Company,
Petitioner,
vs.
Federal Trade Commission,
Respondent,

as the same remains upon the files and records of the United States Court of Appeals for the Seventh Circuit.

In Testimony Whereof I hereunto subscribe my name and affix the seal of said United States Court of Appeals for the Seventh Circuit, at the City of Chicago, this 25th day of May, A. D. 1949.

Kenneth J. Carrick,
Clerk of the United States Court of Appeals for the Seventh Circuit.

COMMISSION'S EXHIBITS.

No. 1-A to D—Standard Oil Lease with Charles Dameron, dated June 28, 1939 4702
No. 2—Standard Oil Dealer's Agreement with Joseph Leerhuber, dated Aug. 31, 1938 4713
No. 3-A & B—Statement of Dealer Tank Wagon Prices, etc., prevailing retail prices on Standard Red Crown Gasoline from Jan. 1, 1937 to Mar. 1, 1941 4715
No. 4—Statement of posted retail prices on Red Crown and Solite with Ethyl at retail service stations directly operated by the Stikeman Oil Co., from Jan. 1, 1937 to Feb. 14, 1938 4716
No. 5-A to J—Prepaid Freight Bill and Bills of Lading of Elgin, Joliet and Eastern Railway Co. 4717
No. 22—Showing Ned's posted prices on Standard Red Crown for various periods from Sept., 1936 to Nov. 24, 1939 4727
No. 25—Sample of Ned's saving stamps and statement 4727
No. 27—Printed envelope container of Ned's Auto Supply Co., for gasoline saving stamps, with instructions printed thereon 4728

No. 29—Letter dated Aug. 6, 1937, to dealers, signed by James J. Bright & Son, Firestone, Ned's and Stark Hickey 4728

No. 30—Newspaper ad of the four Dealers signing the letter (Ex. 29) 4729

No. 31—Receipt of Ned's Auto Supply Co., dated May 9, indicating 2 oz. Pyroil free 4730

No. 32-A, B & C—Statement showing retail prices at stations operated by Citrin-Kolb Co., exclusive of 3¢ tax, during various periods 4730

No. 33-A & B—Letter Mar. 8, 1941, Citrin-Kolb Oil Co., to Austin 4732

No. 34—Card issued by Citrin-Kolb at Jefferson and Nottingham station 4734

No. 35—Same card for station at Linwood & D. T. R. R. 4735

No. 36—Same type of card for station at 8620 Linwood, Jack Katz, Manager 4736

No. 38—Special discount card issued by station at 9705 Dexter and Chicago Boulevard—Maurey Scholnick 4736

No. 50—Gasoline savings container envelope issued by Ned's Auto Supply Co. 4737

No. 51—Receipt from Ned's for purchase of gas Oct. 18, with 12¢ savings stamp attached 4737

No. 54—Statement of Wayne Oil Co., covering retail service station price on Red Crown and Ethyl at all stations directly operated by Wayne from Sept. 8, 1939 to Dec. 31, 1940 4738

No. 55—Monthly gasoline sales for the years 1937 to 1940, inc. 4739

No. 56—Similar statement to Ex. 55 for Chet's Service Station at Collingwood and Warwick 4739

Vol. I, pages 1 to 850; Vol. II, pages 851 to 1736; Vol. III, pages 1737 to 2586; Vol. IV, pages 2587 to 3454; Vol. V, pages 3455 to 4298; Vol. VI, pages 4299 to 5046; Vol. VII, pages 5047 to 5288.

No. 57—Same information for Hawley's Super Service at Grand River and Warwick.................4740
No. 58—Same type of information as previous exhibits showing monthly station gallonage......... 4740
No. 59—Monthly gallonage figures at witness' station 4741
No. 60-A & B—Statement containing monthly gallonage volume similar to preceding exhibits.......... 4741
No. 61—Monthly gallonage for station at Fourth and Warren similar to other exhibits................ 4743
No. 63-A & B—Exhibit A shows daily sales during July and August, 1938, at Harold's Super Service, 13100 Livernois, and B shows monthly gallonage from October, 1936, through Dec., 1940............ 4744
No. 64—Monthly gallonage of station from June, 1936 to May, 1940...................................... 4746
No. 74—Invoice dated 4-14-39 to Stikeman Oil Co., Detroit, f. o. b. destination, one tank car Ethyl.... 4747
No. 76—Survey on gasoline retailing costs in Wayne County, Michigan, by Herbert F. Taggart, containing explanation of the survey, mechanics, coverage and numerous tables and charts................ 4748
No. 80—Standard Oil Co., Form No. 385, Equipment Loan Agreement of the Sales Department, in blank 4766
No. 81—Breakdown of Account 1066, "Miscellaneous Operating Expense" of Standard Oil, submitted in Respondent's Ex. 31-H............................ 4769
No. 82-A—Breakdown of Account 1004, "Salary Salesmen, Detroit Field—June, 1937, and explanation of method.................................... 4770
No. 82-B—Breakdown of Subaccount 7004, being Salary expense, salaries of salesmen for June, 1937, in the Detroit field............................. 4771

No. 83—Statement of Standard Oil showing distribution of time—salesmen—method—class of product, showing hours and percentages of various types of salesmen and allocation between tank wagon reseller, tank wagon consumer, other methods, and as to various products........................ 4773

No. 84-A—Statement on breakdown of Account 1075, advertising for the year 1937, with explanatory material as to allocation of various types of advertising costs to the various products and channels.. 4774

No. 87—Statement showing total gallonage for the year 1940 to tank wagon resellers, to tank wagon consumers, to the four jobbers, and all other methods; also showing sales of motor oils and greases to the four jobbers for 1940........................ 4776

No. 88—Statement showing distribution of time of the various kinds of salesmen as to method and class of products for June, 1940 (same form as Com. Ex. 83, which was for the month of March, 1941)......... 4777

No. 89—Same information as Ex. 88, except it shows this information for the month of September, 1940. 4778

No. 90—Same information as Ex. 88, except this is for the month of December, 1940........................ 4779

No. 91—Statement of Standard Oil types of reseller service station accounts in Detroit metropolitan area for 1937........................ 4780

No. 100—Statement of gasoline gallonage sold to each of the four Detroit jobbers for the years 1937 to 1940, inclusive, as to each of the three Standard grades of gas........................ 4780

No. 109-B—Statement of account numbers, name of dealer and address, in territory covered by the aforesaid three salesmen, in District 65, Detroit, 1937........................ 4781

No. 116—Breakdown of expenses, "Salaries and Commissions," in Detroit field for the year 1940 as between tank wagon reseller, tank wagon consumer, and other methods 4782

No. 119—Standard Oil Co., Form G. O. 189, "Comparative Statement of Expenses" filled out for the year 1940 4783

No. 120—Recapitulation of tank wagon reseller volume delivered by commissioned agents and drivers, Detroit field, 1940 4785

No. 128-A & B—Letter, Mar. 18, 1942, from Mr. Hanley of Standard Oil to Mr. Austin of the Commission, clarifying the information in Commission's Exhibits 91 and 98 as to the number of outlets served by Standard Oil Co., and the four jobbers in December, 1937, and December, 1940 4785

No. 129—Calculation of average salesman's cost per gallon of gasoline sold to Standard Oil stations in Detroit other than Ned's and served by same salesmen as called on Ned's stations during 1937 4787

No. 130—Statement showing analysis of charges to marketing expense account of losses by dismantling (other than E. L. A.) for the Detroit field for the year 1940 4788

No. 131-A, B & C—Statement showing the methods of allocating salesmen's salaries and expenses 4789

No. 132—Tabulation of credit card expense (including coupon book expense) in Detroit field for 1940 4791

No. 133—Re-listing of a large number of accounts taken from Respondent's Ex. 101, purporting to show average unit or gallonage cost on all such accounts for the tank wagon reseller channel and for the jobber channel 4792

RESPONDENT'S EXHIBITS.

No. 3—Graph showing automobile production, seasonally adjusted for the years 1936 to 1941 4795

No. 5—Graph showing total gasoline consumption in the State of Michigan for the years 1933 to 1940, inclusive 4796

No. 6—Operating set-up of Citrin-Kolb Co., as of 12-31-40 showing by addresses stations owned and operated—owned and leased—leased and operated—leased and subleased—dealer contracts 4797

No. 18-O—Premium advertisement of Liberty Service Stores (Fleet Wing dealers in three locations) 4808

No. 18-Q—Advertisement of March 19, 1940, of Fleet Wing dealers on how to win a new 1940 auto 4809

No. 18-R—Separation sheet labeled "E. Jefferson & Nottingham" 4811

No. 18-U—Separation sheet headed "Dexter and West Chicago" 4811

No. 18-Z-1—Profit-Sharing Coupon issued by Dexter-Buena Vista Service Station (Sun Dealer) 4813

No. 18-Z-3—Receipt from Chicago Dexter Service dated 1-9-41 4814

No. 18-Z-4—Receipt from Frank J. Casey Super Service Station at 2304 Vernor Highway 4815

No. 18-Z-5—Receipt from Station at Dexter and Tuxedo 4816

No. 18-Z-10—Profit-Sharing Coupons issued by Dexter-Buena Vista Service (Shell gasoline) and also receipt of 3-28-41 4817

No. 18-Z-11—Separation sheet labeled "John R. and Euclid" 4819

No. 18-Z-17—Separation sheet labeled "W. Warren & Brooklyn" 4819

No. 18-Z-21—Separation sheet labeled "Linwood & Pingree" 4819

No. 18-Z-27—Cash discount card on Blue Sunoco issued by Linwood Tire & Battery Service, Linwood at Grand, March, 1940 4820

No. 18-Z-30—Separation sheet labeled "Linwood & D. T. R. R." 4821

No. 19—Flow chart of gasoline from refiner to consumer—describes the various methods employed in distributing gasoline 4823

No. 20—Operating setup of Wayne Oil Co., as of 12-31-40, showing by street addresses and names stations leased and operated, those leased and subleased and those with dealer contracts 4824

No. 23—Chart compiled by Mr. Marshall on 4-15-41 showing dual operations of the following supplying companies; Standard Oil, Socony Vacuum, Texas Co., Phillips, Shell and Mid-Continent, and showing percentage of distribution both direct and through jobbers and or resellers in various cities.. 4825

No. 24—Chart and map showing refineries, terminals and pipelines serving Michigan, Indiana and Illinois 4826

No. 25-A—Graph of Michigan refinery capacity prepared by U. S. Bureau of Mines charting thousands of barrels per day for the years 1935 to 1940...... 4827

No. 25-B—Accompanying figures on Michigan refineries showing in figures the information portrayed by the graph (Ex. 25-A) 4828

No. 27—Chart showing volume of Zip and Joy gasoline and price differential below price maintained by Standard dealers from 1936 to 1940. 4829

No. 28—Chart showing (1) gasoline prices maintained by Standard Oil Company dealers compared with those maintained by leading cut-price markets in Detroit from March 1938 to March 1941 and (2) Standard Oil Company's retail market position compared with the per gallon price advantage maintained by leading cut-price marketers............ 4830

No. 29-A—Chart showing Standard Oil Co., retail market position as related to differential between its retail price and that of cut-price and local brand marketers in metropolitan Minneapolis-St. Paul during same period as in Ex. 28................. 4831

No. 29-B—Similar chart for City of Milwaukee...... 4832

No. 29-C—Similar chart for City of Chicago.......... 4833

No. 30—Table showing gasoline volume (from Michigan Tax Inspection Report) for the years 1935 to 1940 for Sunny Service, Puritan and Charles E. Austin companies 4835

No. 31-A—Table showing difference in marketing costs between distribution through regular reseller outlet versus distributing through Ned's Auto Supply Co., for 1937 4835

No. 31-B to Q—Being a table of 16 pages, each page marked as a separate alphabetical 31 exhibit, all dated 4-30-41, with further explanations and breakdowns of respondent's cost justification on the ½c differential allowed Ned's from September 1936 to March 1938 on tank wagon deliveries off the tank wagon price 4836

No. 33-A—Cost justification of the 1½c differential between jobbers and tank wagon dealer price in Detroit per gallon for the years 1939 and 1940 4852

No. 33-B—Explains the method used in arriving at a tank wagon reseller marketing cost in Detroit for the year 1940 4853

No. 33-C to E—Three separate sheets, each marked as an exhibit, explaining the procedure in reaching the jobber marketing costs on the basis of the 1939 Oklahoma survey 4854

No. 36-B-C-D—Pages from printed booklet containing the Wayne County list of registered wholesale gasoline distributors 4857

No. 37-A to D—List of Wayne County wholesale distributors as of Feb. 1, 1941, showing for each the date of his registration record, each page being a separate alphabetical exhibit of Series 37 4860

No. 38-A to E—Typewritten list, each page having an alphabetical exhibit number of the 38 series, listing information as to 42 Wayne County gasoline wholesale distributors, compiled from the records of the Gasoline Tax Department for the year 1941 as to retail stations and bulk plants and for the month of March, 1941, as to gasoline suppliers............ 4864
No. 45—Letter Aug. 27, 1936, Ned's to Standard Oil Co., at Detroit regarding intention to accept a competitive offer carrying a larger margin............ 4868
No. 46—Letter Feb. 19, 1938, Ned's to Standard at Detroit advising of offer from Red Indian Oil Company and from Shell Petroleum Co., requesting tank car price or threatening to acceptive competitive offers 4868
No. 47—Letter Apr. 30, 1941, Red Indian Oil Co., to Ned's, confirming proposed price on Fleet Wing gasoline of discount off tank wagon price and additional advertising and hauling allowances......... 4869
No. 48—Letter Dec. 23, 1940, from Ned's to Standard at Detroit, confirming quotation from Gulf Refining Co., on their brand name gas delivered at Ned's bulk plant 4870
No. 49-A—Letter Mar. 23, 1940, from Ned's to Standard Oil at Detroit requesting opportunity to discuss situation at earliest convenience................ 4871
No. 49-B—Promotional letter from Langer's Auto Supply enclosing two pennies and offering saving of 2¢ a gallon 4871
No. 52-B—Statement of dealer tank wagon prices—jobber retail prices—retail wagon margins, on Standard Red Crown gasoline from 1-1-37 to Mar. 6, 1941 4872

No. 53—Chart showing total gasoline sales volume in gallons and ratio of retail and wholesale sales to total sales of each of the four Standard Oil jobbers for the years 1936 to 1940, inc. 4873

No. 54—Chart showing volume of gasoline in gallons of the four Standard Oil jobbers for the years 1936 to 1940 with number of retail outlets supplied by each 4874

No. 55-A & B—Gasoline sales in the Detroit area of wholesale licensed jobbers and distributors of branded gasoline, being a 2 page statement for the years 1936 to 1940, inc., showing the name of the jobber, when he received his wholesale distributor license, his supplier and his gallonage for each of said years 4875

No. 57-A & B—Two page statement showing the gasoline sales in gallons in the Detroit area of licensed wholesale jobbers and distributors handling non-brand gas for the years 1936 to 1940. This is substantially the same type as Ex. 55-A & B, except it covers non-brand instead of branded gas and does not show the source of supply nor the year when the distributor became a licensed distributor 4877

No. 58—Chart showing for the years 1936 to 1940, inc., the total sales in the Detroit area, the total Standard Oil in said area and its percentage of total sales, Standard Oil sales exclusive of jobbers and percentage, Standard Oil jobber sales and percentage, sales of licensed jobbers other than Standard Oil handling branded gas and percentage, sales of licensed jobbers handling non-branded and percentage, sales of all licensed jobbers and percentage and sales of all other companies and percentage 4879

No. 59—Table showing yearly increase or decrease in gasoline sales for the years 1937 to 1940, inc., for the State of Michigan and the Detroit area, showing total Standard Oil sales, Standard Oil jobbers, branded jobbers, non-branded jobbers, all jobbers, and all others 4881

No. 60-A to D—Four page statement, each page marked alphabetically in the 60 series, showing continuous record from June, 1936 to November, 1940, of the retail gasoline price situation in Detroit as reflected by Standard Oil Co., surveys in the dates indicated on each of premium, house brand and third grade gasolines, showing for each the prevailing retail service station price, the dealer tank wagon price, the margin, the number of service stations selling below prevailing retail price and the average amount below the prevailing retail market price.... 4883

No. 63-A, B & C—Three page list, each page alphabetically marked as an exhibit in the 63 series, showing the brand names for gasoline marketed in the Detroit area for premium, house brand and third grade by the various companies.................. 4885

No. 96-A—Modification of Ex. 31-A to exclude newspaper and billboard advertising.................. 4886

No. 96-B, C & D—A three page explanation of this modification 4887

No. 99—Supplement to distribution cost analysis, tank wagon reseller channel versus jobber gasoline sales, explaining regular costing procedure in the Detroit field for 1940. This exhibit contains 33 typed pages, explaining and giving examples of the company's regular accounting procedure and method of allocating costs between channels under the following

12 schedules giving account numbers and explanations as to each:

1. Salesmen and Sales Promotion Expense.
2. Advertising Costs.
3. Delivery and Warehouse Cost.
4. Income and Expense Incurred at Leased Retail Outlets Served by Tank Wagon.
5. Marketing Expense Items Incurred at Privately Owned Stations Not Leased But Engaged in the Distribution of Our Products.
6. Credit Information—Bad Debts and Recovery.
7. Field Office and Accounting Cost.
8. Supervision Cost Incurred in Sales Field.
9. Losses—Taxes—Insurance and Additional Salary Considerations.
10. Miscellaneous Marketing Expense Items.
11. Marketing Expense Items on Lubricating Oils.
12. General Office Marketing Costs. 4889

No. 100—Distribution cost analysis, tank wagon reseller channel versus gasoline sales, Detroit field, 1940. This exhibit contains 133 pages showing the actual allocations and figures in carrying out the work explained in Ex. 99 under each of the 12 schedules referred to therein, with numerous sub-schedules under each and explaining exactly what was done in each case 4914

No. 101—Standard Oil Company Form G. O. 189 Long, being the Sales Department Comparative Statement of Expense, Detroit field, year 1940, completely filled out and reflecting the results and processes set forth in Ex. 99 and 100 5043

No. 103-A, B, & C—Letter Feb. 2, 1942, Mr. Hanley of Standard Oil to Mr. Austin of FTC 5045

Trial Examiner's Report, dated June 25, 1943 5047

Exceptions of Commission to Trial Examiner's Report, dated July 12, 1943 5128

Petition for Review, filed Oct. 4, 1946 5270
Statement of Points 5276
Cross Petition of Federal Trade Commission, filed Nov. 18, 1946 5280
Stipulation re Exhibits, etc. 5281
Designation of Record 5285
Respondent's Designation of Record 5287

Vol. I, pages 1 to 850; Vol. II, pages 851 to 1736; Vol. III, pages 1737 to 2586; Vol. IV, pages 2587 to 3454; Vol. V, pages 3455 to 4298; Vol. VI, pages 4299 to 5046; Vol. VII, pages 5047 to 5288.

1329 Afternoon Session.

2 P. M.

Trial Examiner Ballinger: We will come to order. You may proceed.

Mr. Abbott: Mr. Biber.

MAX BIBER was thereupon called as a witness by and on behalf of the Respondent, and, having been first duly sworn, was examined and testified as follows:

Direct Examination by Mr. Abbott.

Q. State your full name.

A. Max Biber; B-i-b-e-r.

Q. You are identified, Mr. Biber, with the Citrin-Kolb Oil Company of Detroit?

A. I am.

Q. In what capacity?

A. General manager of the company.

Q. And how long have you been with the company?

A. In this capacity since the late part of 1935.

Q. You are also a member of the State Bar of Michigan, aren't you?

A. Yes, I am.

Q. When were you admitted to the practice of law?

A. In 1923.

1330 Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Abbott:

Q. And are you acquainted with the history of the Citrin-Kolb, since the time that you became identified with it?

A. Yes, I am.

Q. How many bulk plants has the Citrin-Kolb Oil Company?

A. Two.

Q. Where are they located?

A. One is located at 14481 Livernois, and the other at 1445 Linwood, both in Detroit.

Q. And have you figures there showing the total investment of the company in each one of your bulk plants?

Trial Examiner Ballinger: The Examiner inquires how that becomes material in this proceeding.

Mr. Abbott: Well, the purpose of that is, your Honor, to show that the tank car customer here is required to go to considerable expense in maintaining the facilities which enable it to take delivery in tank car as distinguished from tank wagon, from the Respondent.

Trial Examiner Ballinger: It just runs to the question of cost?

Mr. Abbott: Yes.

A. The investment in the plant at Livernois is $42,160.

1331 Q. And Linwood, at the Detroit Terminal Railroad?

A. $43,762.28.

Q. What is the approximate total investment in the company, Citrin-Kolb Oil Company?

A. You mean in these two bulk plants?

Q. No, I don't mean that. I mean the approximate total investment.

A. Approximately $250,000.

Q. Is Citrin-Kolb—

Mr. Austin: Just a minute. Will you give me that first figure again, please?

The Witness: $42,160.

Mr. Austin: That was for the Livernois plant?

The Witness: That is right.

Trial Examiner Ballinger: What other activities does the company carry on besides these two plants?

The Witness: They have service stations.

By Mr. Abbott:

Q. These two plants that you have mentioned have what gallonage capacity; I mean, for storage, what storage capacity?

A. 260,000 gallons.

Q. At the Livernois and Linwood plant, how many tanks have you?

A. Three tanks.

1332 Q. And those are each of 20,000 gallon capacity, are they?

A. That's right.

Q. And how many at the Linwood and D. T. Railway?

A. There are ten 20,000-gallons.

1333 Q. Total of 200,000 gallons?

A. Yes, 200,000 gallons.

Q. When I say D. T. Railroad, I mean Detroit Terminal; is that the location of your Linwood plant?

A. That's right.

Q. It is on a railroad sidetrack, is it not?

A. That's right.

Q. At both of these plants do you have sidetrack facilities for receiving tank cars?

A. At both plants we have our spur tracks off the railroad.

Q. Now, what was the volume, if you have the figures, of the gasoline sold by you at wholesale from the years 1936 to '40 inclusive?

Trial Examiner Ballinger: What do you mean by wholesale?

Mr. Abbott: I mean gasoline sold by them otherwise than at their own retail stations.

Trial Examiner Ballinger: Would that include retail?

Mr. Abbott: No. I say exclusive of retail operations.

A. The figure for 1936, 1,420,524.

Q. Is that gallons?

A. That is gallons. 1937, 4,594,917 gallons; 1938, 5,501,243 gallons; 1939, 4,593,088 gallons; 1940, 4,931,481 gallons.

1334 Q. Now, the figures for 1939 show a decrease of approximately 90,000 gallons compared with 1938; is that correct?

A. That's right.

Trial Examiner Ballinger: The sales you have referred to were sales to retailers, were they?

The Witness: To other retailers, yes.

Q. Now, will you state the same years and give the figures including retail sales at stations which are operated by you as wholesale—as retail outlets?

Trial Examiner Ballinger: Wouldn't it be better to have him give the figures of the deliveries to his retail stations? Or is that what you are asking?

Mr. Abbott: Yes, but it would be very difficult.

Q. How many have you—57 altogether, haven't you, 57 stations that you operate in all ways, by all methods I mean?

A. Does the Examiner mean the total delivered to the retailer?

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

Q. Will you give the total sales in gallonage of gasoline, including not only wholesale sales but also sales at retail stations operated by your company?

A. For 1936, 2,014,359 gallons; for 1937, 5,435,419 gallons; 1938, 5,967,638 gallons; 1939, 5,172,992 gallons; 1940, 5,305,880 gallons.

1335 Q. This likewise shows that in 1939, as compared to 1938, you had approximately sales of 800,000 gallons less than the preceding year?

A. That's right.

Trial Examiner Ballinger: Off the record.

(Discussion off the record.)

Trial Examiner Ballinger: On the record.

Q. The question was: Can you give, Mr. Biber, separately the retail sales for each year?

A. For 1936, 593,834; for 1937, 840,502; 1938, 466,593; 1939, 579,906; 1940, 374,399 gallons.

1336 Q. What is the business set-up of the Citrin-Kolb Company? Is it a corporation or co-partnership?

A. Co-partnership.

Q. Consisting of whom?

A. Consisting of Jacob A. Citrin and Nathan Kolb and Barney Citrin; the interest of Nathan Kolb being held jointly by Mr. Kolb and Mollie Kolb, his wife.

Trial Examiner Ballinger: As trustees?

The Witness: No; just joint tenants.

By Mr. Abbott:

Q. In other words, one-third partnership interest is held by husband and wife jointly?

A. That's right.

Q. And has Citrin-Kolb Oil Company been a customer of the Standard Oil Company of Indiana for a very long period of time?

A. I would say 20 years.

Q. And to your knowledge, how have they been purchasing gasoline from the Standard Oil Company during that period—on a tank wagon basis or tank car basis?

A. Well, originally on a tank wagon basis, and since 1926 on a tank car basis.

Q. And during the time that they have been on a tank car basis, have they had separate facilities set up for receiving delivery on that basis?

A. They have.

1337 Q. When was there a change made from receiving deliveries on a tank car basis and receiving deliveries on what is known as a truck-train basis?

A. I believe it was in 1940; the early part of 1940.

Q. Well, that is close enough if you don't know the exact month.

A. I think it was February of 1940.

Q. And what facilities were changed at that time in order to receive deliveries on a truck-train basis, as distinguished from a tank car basis?

A. Well, the unloading facilities had to be changed. The unloading pipes and hoses and the accommodation for the pipes and hoses had to be changed.

Trial Examiner Ballinger: Now, will you explain the difference between those two systems?

The Witness: Yes. Formerly, when unloading from tank cars, there were facilities in order to conform to the Detroit Safety Code which provided for pumping units which pumped the gasoline from the top of the car into the underground tank.

Trial Examiner Ballinger: That's in the tank car?

The Witness: That's in the tank car. The tanks were connected to these unloading devices providing for unloading from tank cars.

When the method of delivery was changed, it was 1338 necessary to create fill pipes running to the tank to accommodate the large hose; I believe it is a 2-inch hose, that runs from the tank car directly into the tank. In other words, the tank truck loads into the tank itself and necessitated a different sized opening, different kind of opening, and different kind of hoses.

Trial Examiner Ballinger: A large hose?

The Witness: That's right.

By Mr. Abbott:

Q. What can you say as to the comparative volume of delivery as between the tank car and truck-train method of operation which has been in effect since February, 1940?

A. Well, the truck-train, each individual truck-train brings in about as much as a tank car.

Q. That is to say, in the vicinity of from eight to twelve thousand gallons?

A. Gallons.
Q. At a delivery?
A. At each delivery.
Trial Examiner Ballinger: And it is unloaded much sooner, is it?
The Witness: I would say it is unloaded sooner, from the tank truck.

By Mr. Abbott:

Q. During the time Citrin-Kolb Oil Company has 1339 been purchasing from the Standard Oil Company on a tank car or truck-train basis, do you know at what prices it had purchased the gasoline, according to that method?
A. I couldn't tell you the price—
Q. I don't mean as to what the price was, but I mean whether it was at the tank car price or what price?
A. Since they have been receiving gasoline in tank car or truck-train, they have paid the tank car price for gasoline.
Q. And has there ever been, to your knowledge, any deviation from that?
A. No, there hasn't been.
Q. And do you know what, for the most part, has been the differential during the period from 1936 to 1940, as between the dealer tank wagon price and the tank car price?
A. I would say from 1¼¢ to 1½¢.
Q. And do you know what it is at the present time? And what it has been for the past year?
A. 1½¢.
Q. 1½¢.
Mr. Austin: What gasoline is that?

By Mr. Abbott:

Q. Is that on any particular kind of gasoline?
A. Red Crown.
Q. House brand?
1340 A. House brand Red Crown gasoline.
Q. What can you say as to the differential on Stanolind and Ethyl, as compared with house brand?
A. The differential is higher on Ethyl and lower on Stanolind.
Trial Examiner Ballinger: How much lower?
The Witness: I don't remember exactly how much that is.

Mr. Abbott: We will introduce testimony on that, if the Court please.

I believe the last Respondent's Exhibit was 5. I would like to have this marked, for identification as Respondent's Exhibit 6.

(The document referred to was marked, for identification, "Respondent's Exhibit 6.")

By Mr. Abbott:

Q. Mr. Biber, I show you Respondent's Exhibit 6, for identification, and ask you to state what that is (handing document to witness).

A. This exhibit is a chart showing the set-up of the stations serviced by Citrin-Kolb Oil Company as of December 31, 1940.

Q. And is that substantially the same set-up as you have at the present time?

A. I think it is exactly the same as it is at present.

1341 Q. Exactly the same.

A. Yes.

Q. Now, Mr. Biber, Respondent's Exhibit 6, marked, for identification, has on it five vertical columns which have these headings: first, "Owned and operated." Will you state what that column means?

A. That column refers to stations in which we own the property and operate the retail business.

Q. And that consists of three stations?

A. That's right.

Trial Examiner Ballinger: Those are retail stations?

The Witness: That's right.

By Mr. Abbott:

Q. The second column is headed, "Owned and leased." What is the significance of that heading?

A. Those are locations which the company owns and are operated by independent operators.

Q. And that consists of seven stations designated by street number?

A. That's right.

Q. And the third column is headed: "Leased and operated." Will you state what that signifies?

A. Those are locations which the company holds as lessee and operates as a retail business.

1342 Q. And the vertical column 4 is headed: "Leased and subleased."

Will you state what that signifies?

A. Those are locations in which the Citrin-Kolb Oil Company are the lessee, and, in turn, sublets these stations to independent operators.

Q. That consists of 13 stations that are designated by street and number.

A. That's right.

Q. And vertical column 5 is headed: "Dealer contracts." Will you state what that signifies?

A. They are locations in which the Citrin-Kolb Oil Company has no interest, as far as lease or real estate is concerned, but are merely operated under a dealer contract relationship.

Q. This vertical column 5 has 32 stations, according to my count, designated by street and number.

A. That's right.

Q. Is that the number of stations which you supply which are not leased by you; in which you have no ownership of the land? You merely supply the person that operates the station?

A. That's right.

Q. And this accounts for how many stations, altogether,
that you either own and operate or lease and operate,
1343 and those that are operated by others?

A. 58.

Q. 58 stations within the Detroit area; is that correct?

A. That's right.

Trial Examiner Ballinger: What date does Respondent's Exhibit 6 for identification relate to?

Mr. Abbott: December 31, 1940.

Trial Examiner Ballinger: Is that correct?

The Witness: That is correct, up to this present time.

Mr. Abbott: I also asked the witness if that is the same set-up that obtains today, and he said it was.

I offer this exhibit in evidence.

Mr. Austin: Do I understand that these dealer contracts, Mr. Biber, are—these are a different list of stations than these other four columns?

1344 A. That's right. There is no repetition.

Trial Examiner Ballinger: When you say "these are," what column do you refer to?

Mr. Austin: Dealer contracts in the fifth column, your Honor.

Does this statement as to operated stations correspond with the statement which was previously put in, Mr. Biber, when you were on the stand as a witness for the Commission, showing operated stations?

The Witness: Yes, it does.

Trial Examiner Ballinger: Both as to stations and as to dates?

The Witness: That's right.

Mr. Austin: Well, this only has one date, whereas the exhibit that was put in previously showed the stations operated over a period of years, but I just wanted to know if this is consistent, if it covers the same date.

The Witness: These six locations are on the other exhibits I furnished as of the date of 1940.

Mr. Austin: I have no objection.

Mr. Abbott: Very well.

Trial Examiner Ballinger: Without objection Respondent's Exhibit 6 for identification is admitted in evidence.

(The document referred to, heretofore marked for identification "RESPONDENT'S EXHIBIT 6", was re-
1345 ceived in evidence.)

Q. Referring again to Exhibit 6, Mr. Biber, do I understand that the stations which are in columns one and three are the only ones that are operated by your company?

A. That's right.

Q. And all the others, including vertical column two, four, and five, are the stations that are not operated by your company; is that correct?

A. That's correct.

Q. Will you state what the policy of the Citrin-Kolb Oil Company is with reference to the operation of stations itself?

A. Well, the Citrin-Kolb Oil Company is not interested in operating retail stations; the only occasion upon which they operate retail stations is when they are responsible on a lease, or own a piece of property for which they cannot secure an operator, and during the period which there is no other operator to put into the station Citrin-Kolb Oil Company operates the retail station.

Q. And does that explanation apply to all of these six stations that you have mentioned and which appear in columns one and three of Exhibit 6?

A. Yes, it does.

Q. One of these stations, however, is one that is located at your Linwood Avenue bulk plant, is it not?

1346 A. That's right, it is.

Trial Examiner Ballinger: What has been its policy in the past, for the past four years?

The Witness: Relative to operating retail stations?

Trial Examiner Ballinger: Yes.

The Witness: That has been the policy of the company for the past four years. As a matter of fact, these stations listed here have not been operated consistently by the company for the past four years; some of them have been operated by the company only for the past few months, because they lost the former operator.

Q. Then I understand from that that during the past four or five years the number of operator operated stations have gone up and down, depending upon conditions; is that true?

A. That's right. At times we operated only one or two.

Q. You mean to say that within the last four or five years you have operated as low as one or two stations?

A. Yes.

Q. Has there been any time when you have only operated one station?

Mr. Austin: Your Honor, I would like to call Mr. Abbott's attention to the fact that—as well as your own attention, of course—that there is a statement which was submitted by this witness in the record showing the list of all stations operated by the Citrin-Kolb Oil Com-
1347 pany during the past five years, and the addresses and the length of time as to which they were operated, so it seems to me that it is unnecessary to go over that ground again with the same witness unless there is something—they desire to correct an error.

Mr. Abbott: I want to bring out here just the matter of policy of the company with reference to whether they are predominantly wholesale or a retail organization.

Trial Examiner Ballinger: Hasn't the witness fully covered that?

Mr. Abbott: I think he has now, yes.

1348 Q. Now, Mr. Biber, in your capacity as general manager of the Citrin-Kolb Oil Company, have you prepared a survey as to the cost of handling gasoline delivered in tank cars or truck-trains over the past five years, from 1936 to 1941, inclusive?

A. I don't think I understand the question.

Q. The question is—

Mr. Abbott: ~~Will you repeat that, please?~~

Trial Examiner Ballinger: Read the question.

(The question was read.)

A. No; the figures I prepared were the costs of delivering gasoline from our bulk plant by train truck to service stations.

By Mr. Abbott:

Q. Well, maybe the question is confusing. The question I meant to ask was this: Have you prepared a survey showing the cost of handling gasoline in the operation from the time it leaves your bulk plant until the time that it is placed in the tanks at the filling station?

A. Yes, I have.

Q. Has that survey been prepared in itemized form for all those years?

A. Yes, it has been.

Trial Examiner Ballinger: Did you personally prepare the statement?

1349 The Witness: It was prepared under my supervision.

Mr. Abbott: This is Exhibit 7, please.

(The document referred to was marked, for identification, Respondent's Exhibit 7.)

Trial Examiner Ballinger: The Reporter will mark the document No. 7, for identification.

By Mr. Abbott:

Q. I show you the exhibit in question, Mr. Biber, and ask you what that is.

A. That is a schedule showing the operating costs, overhead costs and the gallons handled during each year from 1936 to 1940, and then computing the rate per gallon for the years from 1937 to 1940.

Q. Now, take the first column "Year", 1936—there appears to be nothing in that but the gallons handled?

A. That's right.

Q. What is the explanation of that?

A. Well, it was my understanding that the only information wanted was from the beginning of 1937 to date.

Q. And from 1937 you have in the first column what figure?

A. The first column, the operating cost of the business.

Q. The second column?

A. The overhead costs.

Q. And the third column?

A. The total costs.

1350 Q. Which appears as what amount?

Mr. Austin: Your Honor, this is not in evidence yet; I would rather object to anything further here than is—

Trial Examiner Ballinger: Objection sustained.

Mr. Abbott: Very well.

By Mr. Abbott:

Q. And the next to the last column?

A. Is the number of gallons handled during that year.

Q. And is that in accordance with the statement you have already put in evidence as the number of gallons handled during the year 1937?

A. That's right.

Q. And the last column is what?

A. Shows the rate or cost per gallon for delivery of gasoline.

Q. Now, for the year 1938, do the respective columns show the same information as for 1937?

A. They do.

Q. And what does the last column show?

A. The last column also shows the rate per gallon for the delivery of a gallon of gasoline.

Q. Now, the figures for the year 1939, which is line No. 3, in the compilation, does that show the same data with reference to each column?

A. Yes, it does.

1351 Q. As for the other years?

A. Yes.

Q. And the last column, for the year 1939 purports to show what?

A. Also shows the rate for the delivery of a gallon of gasoline.

Q. For the year 1939?

A. That's right.

Q. Now, for the last line of the survey, line No. 4, does that show for each column the same figures as are shown for the other years?

A. It does.

Q. And the last line of the column shows what?

A. Shows the rate and cost for the delivery of a gallon of gasoline in 1940.

Mr. Austin: Are you offering this?

Mr. Abbott: I offer the exhibit in evidence.

Trial Examiner Ballinger: Does the statement cover the entire calendar years '37, '38, '39, and '40?

The Witness: That's right, it does.

Mr. Austin: Mr. Biber, this last column ~~here under~~ rate per gallon, is ~~that dollars~~ or cents or what? It isn't marked.

The Witness: That is cents.

Mr. Austin: Is that first figure in that column—
1352 would that mean that that was 1½ hundredths of a
cent?

The Witness: No, it means 1½¢.

Mr. Austin: That is dollars?

The Witness: From the first decimal point is dollars.

Trial Examiner Ballinger: The Examiner suggests that before it is admitted in evidence that it be so marked that we can tell the difference—the cents and the dollars.

Mr. Austin: You ought to have a dollar sign here.

Mr. Abbott: Yes.

Trial Examiner Ballinger: Let the witness make appropriate changes so that the exhibit will speak for itself without further explanation as to dollars and cents.

Mr. Austin: Mr. Biber, who prepared this schedule?

The Witness: Well, the girls in the office prepared it, the actual physical preparation.

Mr. Austin: Take this column here "operating costs.," I assume that involves a lot of items?

The Witness: It does.

Mr. Austin: Who segregated those various items making up the total to determine what each of them should be?

The Witness: The auditor and myself segregated them.

1353 Mr. Austin: And how about items comprising over
head costs?

The Witness: The same thing is true on overhead costs.

Mr. Austin: You said the auditor and yourself. Who is the auditor?

The Witness: Well, there are several. There is—that is, the auditors in our office, Mr. Manning and Mr. Axelrod.

Mr. Austin: Did you say that was done under your supervision?

The Witness: Yes, it was.

Mr. Austin: You testified you were a lawyer, Mr. Biber. Have you had any accounting experience? Are you a certified public accountant?

The Witness: I am not.

Mr. Austin: What accounting training have you had?

The Witness: I wouldn't say I had any actual accounting training.

Mr. Austin: Your Honor, I am forced to object to this on the ground the witness hasn't shown qualifications to make up such a survey, and that the figures here are total figures for operating costs and totals for overhead costs, and it is not shown as to what items were included in
making up those totals, or as to what accounting prac-
1354 tices were used or how those various items were
arrived at. These totals are, it necessarily seems to me, more in the nature of a conclusion, and we have no expert testimony here to say they were correctly arrived at according to accounting principles. And I think on that basis the statement is not admissible. I object to it.

Mr. Abbott: I may say on that: we have other tabulations which break down these items, if the Court please; there are about 10 or a dozen schedules that itemize each one of these columns and explains just what items go into them.

Trial Examiner Ballinger: The Examiner will reserve his ruling on the objection until the other evidence is introduced?

Mr. Abbott: Very well. Exhibit 8, for identification, please.

(The document referred to was marked, for identification, "Respondent's Exhibit 8.").

Trial Examiner Ballinger: The reporter will mark the document Respondent's Exhibit 8, for identification.

By Mr. Abbott:

Q. Mr. Biber, I show you Exhibit 8, for identification, and ask you to identify that, and state what it is.

A. That is a schedule showing the actual operating costs
or the costs of distributing gasoline at wholesale for
1355 the years 1937 through 1940, and itemizes the items
which go to make up these costs.

Q. Does that explain the second column on Exhibit 7, for identification?

A. Yes, it does.

Q. Now, Exhibit 8, for identification, Mr. Biber, has 15 items in the first column; are those numberings of the items which appear in the second column?

A. Yes, they are.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Abbott:

Q. What does the second column consist of?

A. The second column consists of a list of items which we have taken as expense items or operating cost items charged against the delivery of gasoline.

Q. The third column is what?

A. In the amount for each of the numbered items for that year.

Mr. Austin: Pardon me—

By Mr. Abbott:

Q. For what year?

A. 1937.

Mr. Austin: It would be a great deal more helpful if I have something like that in front of me. I don't
1356 know what you and the witness are talking about.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Abbott:

Q. Now, the fourth column, Mr. Biber, is what?

A. The fourth column shows the amount of each of the numbered items for 1938.

Q. And the fifth column?

A. Shows the same thing for 1939.

Q. And the sixth column?

A. The same thing for 1940.

Q. Now, the totals at the end of each column represent what?

A. The total operating cost for the year in that column.

Q. And that includes the sum total of 15 items which appear in each column; is that right?

A. That's right.

Q. Those items are the ones that enter into actual operating costs; is that correct?

A. That's correct.

Q. Now, there is a deduction on the bottom of the exhibit which is—what does that deduction represent?

A. That deduction represents the amount of this operating cost which we allocate to products other than gasoline.

1357 Q. And what product is that?

A. Motor oil.

Q. Motor oil.

Mr. Abbott: I offer the exhibit in evidence.

Trial Examiner Ballinger: Is there an objection?

Mr. Austin: Well, yes, your Honor, but I would like a moment here, if you please.

(Counsel referred to document.)

Mr. Austin: Mr. Biber, does this statement here, Respondent's Exhibit 8 for identification, cover costs of distributing all gasoline by Citrin-Kolb, including that sold at retail stations as well as that sold to other dealers?

The Witness: Yes. All gasoline.

Mr. Austin: For instance, on this No. 1, advertising. Is that your entire advertising expense for the year?

The Witness: That's our entire advertising expense. That does not include advertising at retail stations.

Mr. Austin: It does not?

The Witness: No.

Mr. Austin: And does any of this other, heat and water and electric current, and so forth, does that include any expenses—

The Witness: No, those are expenses entailed in the delivery of gasoline from the bulk plant to our operators or to our retail stations.

1358 Mr. Austin: Are the records of your company, Mr. Biber, upon which these figures were obtained, available so that an accountant for the Commission could inspect them?

The Witness: Surely.

Mr. Austin: Make a check, if desired, and would the company be willing to have that done?

The Witness: Certainly.

Mr. Hanley: We might be willing to use the Taggart survey on this matter?

Mr. Austin: Well, your Honor, I make the same objection to this exhibit that I made to the previous one: That there is no showing, here, that this has been prepared by an expert accountant and, subject to verification, I would like to have the objection stand.

Aren't there certain items on here, Mr. Biber, such as interest and insurance, which are allocated as between your wholesale and retail stations?

The Witness: I don't know what you mean by "allocated."

Mr. Austin: This wouldn't be your total interest charge for the year on the interest of the entire company, would it?

The Witness: No. Any item here is only on the wholesale operation. The retail operation is entirely separate, on a separate balance sheet and set of books.

1359 Mr. Austin: Isn't there necessarily some separate allocations between wholesale and retail on some of these figures? Didn't you have to divide up certain figures and allocate certain parts, such as insurance, for instance, to wholesale, and certain to retail; or as to interest?

The Witness: No, I don't believe so.

Mr. Austin: How about taxes, telephone expenses? Were those already segregated?

The Witness: Yes.

Mr. Austin: They were segregated on your books, no doubt, but how were they segregated as between wholesale and retail?

The Witness: As an example, the taxes we figured on the wholesale were personal property real estate taxes and Social Security taxes and other government taxes on the property, real estate, personal property or covering the employees operating out of the bulk plant and bulk stations for the office.

Mr. Austin: Were there any joint costs incurred as between the wholesale and retail operation?

The Witness: No, I can't conceive of any joint costs.

Mr. Austin: Well, do I understand, then, that you can testify from your own knowledge that these are actual expenses? Is this on a cash basis, I assume; actual ex-

1360 penses that were paid for these various items?

The Witness: That's right. My job was to ask for the items which I thought were the actual cost and distribution and the auditors' job was just to give me the figures that were prepared over the years, in the books.

Mr. Austin: Did your calculation of these figures involve any joint cost calculations or allocations?

The Witness: You mean both; between wholesale and retail?

Mr. Austin: Yes.

The Witness: None.

Mr. Austin: Now in deducting this five per cent, here, for oil. What was the basis of that deduction? How did you arrive at the five per cent?

The Witness: That is five cents per gallon.

Mr. Abbott: Not five per cent; five cents.

Mr. Austin: That is a deduction of five cents per gallon?

The Witness: Per gallon, for every gallon of motor oil sold.

Mr. Austin: And how is that arrived at?

The Witness: It was a calculation that we arrived at from our experience, there being no absolutely positive way of knowing what part of the expense to be allocated to motor oil, because there are instances where a gaso-
1361 line truck also carries motor oil.

Mr. Austin: How did you arrive at the figure five cents a gallon?

The Witness: From our experience we were able to compute the cost of delivering motor oil when it was not involved in a gasoline delivery. We knew the cost of our stake trucks or other vehicles which do not carry gasoline. We took the items of insurance. Allocated to those trucks the salaries. Allocated the salaries to men who load and unload motor oil and those that deliver motor oil and that figure was very close to five cents a gallon and we thought that would be a fair figure to use throughout that period.

Mr. Austin: Is this figure for oil the same each year? I notice it is based on 75,000 gallons, apparently.

The Witness: Because that is very close to what it is.

Mr. Austin: You mean you sold practically the same amount for each one of these years?

The Witness: 1937 to 1940.

Mr. Austin: Isn't that somewhat unusual; there should be almost the same amount of oil sold each year?

The Witness: No. Your oil is pretty well determined by your gasoline sales and your—

Mr. Austin: They varied, didn't they?

The Witness: They didn't vary enough in pro-
1362 portion to vary the oil sales, very much.

Mr. Austin: Your Honor, I have no objection to this schedule, so far as it covers these fifteen items and what the expenses of the company are, with the understanding that the figures are available for check, but as to the allocation of five cents a gallon for oil, I don't know whether that is correct or whether it is not correct and I don't think this witness is qualified to say whether or not that is a proper amount. Maybe it is too low and maybe it is too high. I don't know.

Mr. Abbott: He is the only one that is qualified in his company to make that allocation; from his own testimony.

Mr. Austin: It seems to me that is a matter that requires the opinion of an expert accountant to know how that allocation should be made. All that has been said here is that the witness thinks that it was done fairly. I have no doubt he thinks it was done fairly, but I don't know whether he knows.

The Witness: Mr. Austin, this amount, if it were eliminated—if it were doubled or eliminated altogether, would hardly alter the overall costs at all. The amount is so small and insignificant, compared with the total, that I don't think it would alter the cost. If we left the whole thing in I don't think it would alter the cost of rate per gallon by 1/10 of a cent.

1363 Mr. Austin: I haven't figured that through, Mr. Biber. Maybe that is correct. It appears to me quite a difference in the total of operating cost, but perhaps, applied to the gallonage cost, it may not. I don't know.

Trial Examiner Ballinger: Does counsel for the Commission desire an opportunity to examine and inspect the books, or do you intend to avail yourself of the opportunity which has been offered?

Mr. Austin: Well, your Honor, I would like to say yes to that; that we do expect to avail ourselves of the opportunity, provided it seems necessary to do so, after the figures have been reviewed by the Commission's accountants.

Trial Examiner Ballinger: Then after that inspection do you desire to reserve cross-examination of this witness until that is done?

Mr. Austin: Oh, yes, absolutely.

1364 Trial Examiner Ballinger: With that understanding, the Examiner will reserve his ruling upon the admissibility of Respondent's Exhibit 8 until a later date.

Mr. Abbott: Very well.

I would like to have these documents marked, for identification.

Trial Examiner Ballinger: The reporter will number the documents handed to him by counsel for the Respondent's Exhibits 9 to 15, respectively, for identification.

(The decouments referred to were marked, for identification, "Respondent's Exhibits 9 to 15.")

By Mr. Abbott:

Q. Mr. Biber, I show you Exhibits 9 to 15, inclusive, marked for identification, and ask you to state what they are.

Starting with Exhibit 9, which is headed "Schedule of Operating Costs." Is that heading correct?

A. It should be "Schedule of Overhead Cost" in the form of Exhibit 6.

Q. I will make that correction. That should be "overhead" instead of "operating"?

A. That's right.

Q. And what does that Schedule 3 consist of, Exhibit 9, for identification?

1365 A. That consists of a schedule of overhead costs chargeable to the distribution of gasoline at wholesale.

Q. And is that a break-down of a figure which appears on Exhibit 6?

A. Yes, it is.

Q. What figure is it that appears on Exhibit 6 you have there, of which this is a break-down?

Mr. Austin: What is Exhibit 6? Which is Exhibit 6?

A. It is Exhibit 7. That is in the fourth column, under "Overhead cost."

Q. This Exhibit 9, then, is a break-down of the items which enter into that column?

A. That's right.

Trial Examiner Ballinger: What column of Respondent's Exhibit 7, for identification?

The Witness: Fourth column of Exhibit 7.

By Mr. Abbott:

Q. And that consists of 10 items, does it not?

A. That's right.

Q. As shown by Exhibit 9?

A. That's right.

Q. And the totals at the end of the column for each year. Are those the same as appear in the totals in column 4 of Exhibit 7, for identification?

A. They are.

1366 Q. Referring to "Overhead costs"?

A. That's right.

Q. Now, referring to Exhibit 10, for identification, will you state what that consists of?

A. Exhibit 10 is a schedule of depreciation taken from the income tax return of the company on those items applicable to the distribution of gasoline at wholesale.

Q. And are the totals shown for the years 1937, 1938, 1939, and 1940, the same as appear on Exhibit 7, which was introduced for identification?

A. No, these totals appear—

Q. They appear on a previous exhibit. Will you state which one?

A. On Exhibit 9.

Q. And this shows the depreciation on real estate, does it not?

A. That's right.

Q. On how many locations?

A. There are three locations mentioned, but inasmuch as we only use two for bulk plant facilities, we have only taken the depreciation on the two bulk plant locations.

Q. And the one at Meyers and Lyndon, you have taken no depreciation on?

A. No.

Q. Exhibit 11, for identification, shows what?

1367 Mr. Austin: Will you pardon me, Mr. Abbott?

Mr. Abbott: Do you wish to ask a question?

Mr. Austin: Yes.

On this one it says: "Warehouse, land, and building," on this No. 10, for identification. Is that Linwood?

The Witness: That's Linwood, yes.

Mr. Austin: In other words, if the top one says Livernois and Linwood—

The Witness: That's the address. That is the Linwood and Detroit Terminal Railroad warehouse.

By Mr. Abbott:

Q. In other words, there is no warehouse at Livernois and Linwood: is that right?

A. There is, but we don't call it a warehouse.

Q. Go to Exhibit 11, for identification. What does that xhibit purport to represent?

A. A schedule of depreciation of equipment or personal property used by the company in the distribution of gasoline at wholesale.

Q. And does that show the depreciation there for each of the years, for 1937, 1938, 1939, and 1940?

A. Yes, it does.

Q. And that also ties in with the previous exhibit, showing depreciation?

A. That's right: on Exhibit 9.

1368 Q. On Exhibit 9, for identification.

A. Yes.

Mr. Austin: Mr. Abbott, would you mind asking him if that was taken from depreciation figures from the income tax returns?

By Mr. Abbott:

Q. Is that rate taken from the rate you took on your income tax returns?

A. That's right.

Mr. Austin: Federal Income Tax?

The Witness: It is.

By Mr. Abbott:

Q. Figured at 6%?

A. That's right.

Q. Exhibit 12 represents what?

A. It is an obsolescence estimate of items used in the distribution of gasoline at wholesale.

Q. Showing for each of the years 1937, 1938, 1939, and 1940 the same figures that appear on Exhibit 9, for identification?

A. That is correct.

Q. And Exhibit 13?

A. Exhibit 13 is a schedule showing interest on money used and invested by the company in order to operate the distribution plants for the distribution of gasoline.

1369 Q. And does this show those items for all of the four years in question?

A. 1937 through 1940.

Q. And reflects the totals as shown on Exhibit 9 of those items?

A. That's right: they do.

Q. This covers the matter of interest on the use of money invested?

A. That is correct.

Q. Exhibit 14 shows what?

A. Exhibit 14 is a schedule showing the cost or interest on money invested for the purchase of personal property by the company, which said personal property is used in the distribution of gasoline at wholesale.

Q. And does it also reflect for each of the years in question the same items as are shown on Exhibit 9, for identification?

A. It does; from 1937 through 1940.

Q. Exhibit 15?

A. Exhibit 15 is a schedule showing the interest on the investment of real estate used by the company in the distribution of gasoline at wholesale covering the bulk plants and bulk plant property.

Q. And is that shown for each of the years 1937, 1938, 1939, and 1940?

1370 A. Yes, it is.

Q. And those totals on the last column, are those a tie-in with Exhibit 9, for the same item? Namely interest on the investment of real estate?

A. Yes, they are.

Q. Yes.

Mr. Abbott: I offer the Exhibits 9 to 15, inclusive, in evidence.

Mr. Austin: May we make the same objections I made to Respondent's Exhibit No. 9, and request that the same ruling be made? In other words, that ruling be reserved pending an opportunity to cross-examine and to check these figures.

Trial Examiner Ballinger: The Examiner withholds his ruling as to the admissibility of Respondent's Exhibits 9 to 15, for identification, until Counsel for the Commission has had opportunity to examine the records and further examine the witness.

Mr. Hanley: If your Honor please, do we understand that the Government is going to cross-examine twice on this thing? They have already been cross-examining this witness. Are they going to cross-examine to predicate an objection and then cross-examine after the exhibit is admitted? What is the procedure here?

Trial Examiner Ballinger: Judge, there is a serious 1371 question in the mind of the Examiner as to whether these exhibits have been sufficiently authenticated.

and if you desire to press that question at this time, the Examiner is prepared to rule.

If, on the other hand, any possible defects may be cured, completely cured, by affording the Commission an opportunity to examine the records, it may save an immense amount of time.

Mr. Hanley: We don't want this witness on for direct, having Mr. Austin objecting and cross-examining as he is giving his direct examination, and that's what the Government has just been doing right along, here, this afternoon.

We haven't any objection to producing the information or the witness being subjected to cross-examination, but we think that he ought to be permitted to give his direct examination without continuous interpolation of cross-examination.

Mr. Austin: I only intended, when these papers were offered for identification—I assume I am entitled to ask some questions with regard to identification of the document. I hadn't intended to go beyond that, Judge.

Trial Examiner Ballinger: It is the intention of the Examiner to permit the cross-examination to proceed as though these papers had been admitted in evidence and if, subsequently, an investigation discloses that the pa-
1372 pers have not been sufficiently authenticated, or they
are inaccurate and should not be admitted in evidence, to then deny the admission of the documents in evidence and strike the witness' testimony predicated thereon.

With that understanding, you may proceed.

Mr. Abbott: Will you mark these documents, for identification (addressing the reporter)?

1373 Trial Examiner Ballinger: The Reporter will mark the documents Respondent's Exhibits 16 and 17 for identification.

(The documents referred to were marked "Respondent's Exhibits 16 and 17" for identification.)

Q. Mr. Biber, I show you Respondent's Exhibit 16 for identification and ask you to state what that is?

A. It is a computation or breakdown of gasoline sold during each year from 1938 to 1940, inclusive, showing the number of gallons sold at retail and the number of gallons at wholesale and number of gallons sold to consumers on wholesale accounts; showing the total wholesale and retail sales and percentages of each.

Q. Showing the wholesale and retail operation and percentages, ratios of each?

A. Yes.

Q. This is broken down to five years; 1936 to 1940, inclusive, is it not?

A. Yes.

Q. And it has seven horizontal columns, and what does each one of those columns show?

A. Column 1 is the retail sales through outlets operated by the company.

Q. That is the figure that the Examiner asked you to give once before?

1374 A. That's right. Column 2 is wholesale sales to retail outlets.

Column 3 are wholesale sales to consumers.

Column 4 is a total of items 2 and 3, or the total wholesale sales.

Column 5 are the total sales.

Column 6 is the percentage of retail sales through outlets operated by the company and column 7 is the percentage of total wholesale sales.

Q. To the total sales?

A. Percentage to the total sales.

Mr. Abbott: I offer Exhibit 16 in evidence.

By Mr. Abbott:

Q. Is this exhibit compiled from data under your supervision in the office of the company?

A. That is right, it is.

Mr. Austin: No objection, your Honor.

Trial Examiner Ballinger: Respondent's Exhibit 16 for identification is admitted in evidence.

(The document referred to, heretofore marked for identification "RESPONDENT'S EXHIBIT 16", was received in evidence.)

By Mr. Abbott:

Q. I show you Respondent's Exhibit 17 marked for identification, and ask you what that is?

1375 A. That is a further breakdown of the distribution of gasoline per station and per gasoline pump.

Q. Now, Exhibit 17 shows the records for each year, 1936 to '40 inclusive, does it not?

A. That's right, it does.

Q. And is it compiled from records in the office of the company?

A. Yes.

Q. Under your supervision?

A. Yes, it was.

Q. It shows not only the gallonage for each year but also the number of pumps that were operated?

A. That's right.

Q. And in the last column it shows the average gallonage per pump?

A. That's right.

Mr. Abbott: I offer the Exhibit in evidence.

Trial Examiner Ballinger: Any objection?

Mr. Austin: I don't see the materiality of this, your Honor, and I would like to ask—because this simply shows the total number of stations, and the total number of pumps, average gallonage sold per station, and average gallonage sold per pump. It says "To the outlets of Citrin-Kolb Oil Company"; does that include retail outlets?

The Witness: It includes them all.

1376 Mr. Austin: It includes all stations operated or supplied by Citrin-Kolb?

The Witness: Yes.

Trial Examiner Ballinger: You mean all retail stores?

Mr. Austin: Retail and wholesale.

They are all retail stations, yes, your Honor, but they are the stations to whom Citrin-Kolb sells, as well as the ones Citrin-Kolb operates.

By Mr. Abbott:

Q. This includes all the 51 stations?

A. Yes.

Mr. Austin: Regardless of whether Citrin-Kolb operates them or sells the gasoline to the operator?

Trial Examiner Ballinger: Does this relate to retail, or does it take in—strike that out.

This relates exclusively to retail establishments either operated or served by Citrin-Kolb?

Mr. Austin: That's right.

Mr. Abbott: That's right.

Mr. Austin: I object to it upon the ground that it is irrelevant and immaterial.

Trial Examiner Ballinger: Do you consider it material to your case?

Mr. Abbott: Yes, we do.

1377 Trial Examiner Ballinger: Objection is overruled and the document is admitted in evidence as Respondent's Exhibit 17.

(The document referred to, heretofore marked for identification "RESPONDENT'S EXHIBIT 17", was received in evidence.)

By Mr. Abbott:

Q. You heard the testimony, I believe, Mr. Biber, which was introduced in the Government's case of the witness Paul Harrison, regional director of the Sun Oil Company, relative to the cost of handling gasoline; did you not?

A. Yes, I did.

Q. And the figures as shown on Exhibit No. 7 for the rate per gallon of distributing gasoline at wholesale of the Citrin-Kolb Oil Company for the year 1937 shown as .0154, or approximately 1½¢ per gallon?

A. That's right.

Q. I believe the testimony of Mr. Harrison given in his testimony was that the cost of handling gasoline at wholesale in the Detroit area is .76¢ per gallon; do you recall the testimony to that effect?

A. Yes, I do.

1378 Q. How do you account, if you do account, for the difference between your handling costs and Mr. Harrison's testimony as to such handling costs?

Mr. Austin: I object to that, your Honor, upon the ground that this Respondent's Exhibit 7, for identification is not in evidence; counsel has read a figure from it, and upon that he predicates the difference between that figure and Mr. Harrison's figure, and it is not apparent that any difference exists until this figure, as offered today, is established.

Mr. Abbott: I understand—

Trial Examiner Ballinger: The Examiner has announced that he will permit an examination of this witness based upon these documents to the same extent as though they had been admitted in evidence, reserving to counsel for the Commission the right to move to strike at a later date; if the exhibits marked for identification should be excluded from the evidence then the testimony of the witness based upon those exhibits will likewise be stricken.

Mr. Austin: Very well, your Honor. Then, I would like to have—

Trial Examiner Ballinger: And then Examiner adopts that course, believing it will save time.

Mr. Austin: I would like to have an exception noted to any line of testimony based upon these exhibits.

1379 I understand that that is noted.

Trial Examiner Ballinger: Certainly this line of testimony is now being permitted subject to an objection and later to a motion to strike.

Mr. Austin: Yes.

Trial Examiner Ballinger: The Examiner believes that such a course will greatly facilitate the expedition of the case.

Mr. Abbott: Will you repeat the question to the witness, please.

(The question was read as follows: "How do you account, if you do account, for the difference between your handling costs and Mr. Harrison's testimony as to such handling costs?")

Mr. Austin: Your Honor, I will have to object to that question, perhaps, upon the further ground that that calls for a conclusion of the witness upon questions of accounting as to which it appears he is not qualified to answer. Both of those cost items were made up of a great many components.

Trial Examiner Ballinger: Even though he is not an accountant, isn't he fully qualified to explained the basis upon which this statement is made up, and the difference between that and the basis of the statement made up by the accountants?

1380 Mr. Austin: Well, I don't think he knows how Mr. Harrison's statement is made up. I don't know how it is made up. And I don't believe that this witness' conclusion as to the difference between Citrin Kolb operating cost and Sun Oil operating cost is of any materiality.

By Mr. Abbott:

Q. Mr. Biber, you are familiar with the testimony of Mr. Harrison given at the previous hearing, are you not?

A. Yes.

Q. In the month of March?

A. I am.

Q. And the question as I am asking you is how you account, if you do account, for the difference between Mr. Harrison's statement as to hauling and handling cost and your statements as you have just stated it in your testimony based on Exhibit 7, for identification.

Trial Examiner Ballinger: You were present and heard Mr. Harrison's testimony, weren't you?

The Witness: Yes, I did.

A. Mr. Harrison testified—

Mr. Austin: Did your Honor rule on that? I want to press the objection that this witness isn't qualified to draw a conclusion as to what Mr. Harrison said about the Sun Oil Company, and what he knows about Citrin-Kolb.

1381 Mr. Abbott: We are not asking for him to express any conclusion, we are merely asking him to state what the difference is, or if he accounts for the difference between Mr. Harrison's testimony and his testimony, based upon any factual situation which exists.

Trial Examiner Ballinger: Objection is overruled. The witness may answer.

Mr. Austin: Exception.

A. Mr. Harrison testified that they delivered one brand of gasoline, Blue Sunoco, and our cost includes the delivery, the loading and unloading at the station and at the bulk plant, of three separate brands of gasoline.

By Mr. Abbott:

Q. Would that account for any difference?

A. I would say it would, in that it takes three operations or three pumps to load a truck rather than having it loaded from one pump; it also means we have to unload the gasoline into three separate tanks at the service station, rather than unloading one load into one tank.

Q. But the loading operation and the hauling operation in your case involve the same truck, or could it be done on one truck?

A. It can be done on one truck.

Q. For all three brands?

A. Yes. But it sometimes has to be done on more than one truck, if the compartments do not accommodate

1382 the order.

Trial Examiner Ballinger: That is, a truck has more than one compartment?

The Witness: Yes. And Mr. Harrison testified that there were no administrative costs or executives' administrative costs allocated to the cost of delivery of gasoline in the figures which he produced. And our figures include salaries to the partners, and other administrative costs, as well as depreciation, obsolescence, and so forth, and the adding of those figures to any figures that Mr. Harrison has given would account for a difference.

By Mr. Abbott:

Q. Anything else in the factual situation as you see it?

A. Mr. Harrison testified to the fact that they made deliveries on a certain schedule or route, and that his trucks ran for 18 hours a day.

Q. What is the situation in your picture?

A. We deliver only upon order, and our deliveries are much smaller than the minimum that Mr. Harrison says—I believe he says he placed the minimum of 2,000 gallons. Our minimum is anywhere from 250 to 400 gallons.

Q. Is the cost of handling 400 to 500 gallons orders larger proportionately than the delivery of 2,000 gallon orders?

A. Not only is the cost of handling it more, but it
is obvious that if you deliver 300 gallons to a station,
1383 he is probably going to order gasoline every day,
where if you deliver 2,000 gallons, you won't have to
make that call again for a week or two weeks.

Q. That is, assuming that the station has a gallonage—

A. I am assuming that they have—

Q. —of what average?

A. Of equal volume to our stations.

Q. What would you say that is?

A. I would say an average gallonage per station of around eight to 10,000 gallons a month.

Q. Of course, if the gallonage of a station was 8,000 gallons a month, and deliveries of 2,000 gallons at a time, you are assuming that there would only have to be four deliveries a month?

A. That's right.

Q. And would that have any appreciable effect on the cost of handling?

A. I think it affects the greatest item in the cost of handling, the delivery cost.

Q. And you referred also to the fact that he testified that deliveries of Sunoco was made on schedule?

A. That's right. He testified—

Q. Are your deliveries made on schedule?

A. No. We deliver only on order, 'phone order.

1384 Q. In other words, whenever the filling station man wants gasoline, he telephones your station, does he, your bulk plant?

A. That's right.

Q. And when he telephones your bulk plant, do you send him his order of gasoline?

A. That's right, we do.

Q. Do you regulate the amount of delivery, or does he?

A. He regulates the amount of delivery.

Q. By that you mean that the filling station operator tells you how much he wants?

A. That's right.

Q. Now, you testified when you were on the stand last month that you gave certain discounts to three retail dealers, serviced from your bulk plant. Those dealers—one of them was Langer and Cohen; how many stations do they operate?

A. Five.

Q. And one other was Ferguson and Coury; how many stations do they have?

A. One.

Q. Where is it located?

A. 8501 Gratiot Avenue.

Q. And the other was who?

A. The other was Sid's Superservice on Chicago and Dexter.

1385 Q. What did the discount or preferential treatment consist of in the latter case, the Chicago and Dexter location?

A. It was the waiver of rent for a period of three months during the gas war, during a period when Cities Service station directly across the street had instigated a gas war in the neighborhood. And in order—

Q. Was there any preferential given in the price of gasoline to that station?

A. To the station at Chicago and Dexter?

Q. Yes.

A. There was not.

~~Q. Merely the preferential consisted only in the cancellation of three months rent?~~

A. That's right.

Q. What rate per month?

A. $235 per month.

Q. What was the reason for that cancellation, if any?

A. Well, the operator, in order to maintain his business, had to meet competition of the station across the street, and he came into the office and told us he would not be able to operate—not be able to pay his rent, or not be able to exist in business if he had to continue the same overhead and sell at the cut-rate prices. So in order to keep him in business, we waived that rental for the period of three months.

1386 Q. Was there any other competition that he had had, or that he mentioned, except the Cities Service station across the street?

A. Yes. He had Zip station just one block away.

Q. That is at the corner of Dexter and Boston?

A. That's right.

Q. And do you know how much they were selling for at that time?

A. 10 gallons for $1.

Q. How much per gallon, if you remember, or if you know, was that under the prevailing filling station rate at that time?

A. I believe it was 5½¢ under the prevailing rate.

Q. So from the Cities Service station across the street, the station at Chicago and Dexter had to compete with a 2¢ discount?

A. That's right.

Q. Per gallon?

A. That's right.

Q. And on the Joy stations, they were required to compete with a 5½¢ discount per gallon?

A. Yes.

Mr. Austin: He said Zip station.

The Witness: Zip station.

Mr. Abbott: I stand corrected on that question. It 1387 was a Zip station instead of a Joy station.

By Mr. Abbott:

Q. Now, with reference to Langer and Cohen, you say that they were operating five stations at the time when you gave them preferential treatment with reference to the price of gasoline—and what year was that?

A. 1936.

Q. At that time did you give them any preference based on volume?

A. Yes. Preference was based on volume.

Q. What was the volume they were consuming at that time at the five stations they operated?

A. They had a volume of a million gallons a year.

Q. And was there any other feature that entered into the question of—or the matter of giving them preferential treatment?

A. Yes. The real reason for giving them this treatment in the beginning was to meet the competition of other offers which they had.

Mr. Austin: Your Honor, I object to the question, any further questions as to the reasons for Citrin-Kolb giving preferential treatment to a service station on the ground it is immaterial and irrelevant to any of the issues in the case.

Mr. Abbott: There have been questions, to which we have objected, as to the relevancy of this, but we have
1388 to meet it because of the fact that they have introduced testimony to show that there has been some preferential treatment given by the jobbers whom we supply to resellers whom they, in turn, supply. And I think we have to show the justification for the preferential treatment given by the jobber to his retailers, in order to meet the Government's case.

Mr. Austin: My theory there is if the preferential price which the customer, such as Citrin-Kolb, receives, enables him to pass part of it on, that that is the end of the matter. And as to whether he has also some other reason for passing it on, or why he decided to pass it on, is immaterial, as long as it actually was passed on.

Mr. Abbott: It was done in order to meet the competition in the neighborhood where the reseller is located. I think that is material under the Act.

Trial Examiner Ballinger: The Examiner is under the impression that the main question here is whether or not the Respondent was giving preferential to customers. In other words, discriminated in the prices in selling to its customers, and the effect of that. Isn't that the only question?

1389 Mr. Abbott: If you are getting into the effect of that, we have to go into this line of inquiry. We have ~~got to show that the reason why the reseller is given preferential treatment, so-called, by the so-called jobber.~~ If you are going to present the whole picture, then we have got to go into this situation to show that this whole thing is occasioned by the necessity for meeting competition in the particular neighborhood where the retail station is being operated.

Mr. Hanley: Isn't the short answer to this objection, why did the Government prove it in the first place if it isn't material? Having proven it, aren't we under an obligation to answer it?

Trial Examiner Ballinger: Did the Commission in its case in chief go any further than to offer testimony tending to show the prices at which gasoline was being sold to the retailers, and the cost of marketing the gasoline, and the effect upon the retail trade?

Mr. Abbott: Well, the effect which they claim was that it caused price cutting. Now, we are attempting to show by this testimony that the reason for the preferential treatment brought out by the Government itself on its case in chief was that it was necessary for the reseller, the retailer, to meet competition in the neighborhood. Now, they brought it up; we have to meet that.

1390 Trial Examiner Ballinger: But here is a retailer that is both a jobber and a retailer, and do you think that it is proper for you to show that it was necessary for you to sell to this jobber and retailer at a price so that he could retail in his retail stores gasoline to meet the competition of some other competitors?

Mr. Abbott: This doesn't involve stations where he retails himself. This is a case where he sold to the Langer and Cohen, one of his retailers.

Your Honor, you see, this doesn't involve one of our company operated stations, one of Citrin-Kolb operated stations—

Trial Examiner Ballinger: I think you are a step removed from any question there is in this case.

Mr. Abbott: Well, I think we have to show that in order to rebut the Government's case. Because if they hadn't gone into it, of course, we wouldn't be required to meet it at this time.

Trial Examiner Ballinger: What testimony do you think the Government admitted that renders this testimony—the Government offered, that you think renders this testimony necessary?

Mr. Abbott: They brought it out themselves that we made—there were three cases, Langer and Cohen, Ferguson and Coury, and Chicago and Dexter, known as 1391 Sid's Super Service Station, where there were discounts or some preferential given by Citrin-Kolb Oil Company in 1936, 1937, and 1938.

Now, there has been testimony here already—

Trial Examiner Ballinger: Citrin-Kolb Company isn't the Respondent.

Mr. Abbott: I know, but these are not stations, if your Honor please—these three stations are not stations operated by them, these are all stations operated by resellers whom they supply. Now, the Government has sought to show by other testimony of people who complained about these stations as to which preferential treatment was given, that they were instigating price cutting in those communities.

Now, we have a right to show what the competitive situation was around these stations which made it necessary, or any other fact which made it permissible under the act for these people to be given preferential treatment.

Trial Examiner Ballinger: You mean you are going to try to show by this situation that rendered it necessary for the Respondent to sell to them at tank car rates?

Mr. Abbott: No, not made it necessary to sell to them, that wasn't the reason why we sold to them.

Trial Examiner Ballinger: If it doesn't run to that, the objection is sustained.

Mr. Hanley: Doesn't it, your Honor, go to the effect of
what the Respondent did on competition and on gaso-
1392 line commerce? We are in this position, if your
Honor excludes this testimony, of being charged by the Government with having done a thing which they say is wrong, and they were permitted to put in evidence of this thing over our repeated and strenuous objections, as your Honor knows. Now, it is in, and they say it proves we are guilty. Certainly we are entitled to put in a defense. We still say it is not material, and the Government now seems to be taking a similar position. But it is in here, and certainly we are not to be forced to stand mute, are we, and permit the Government to say, "You are guilty, but we won't let you put in a defense"?

Trial Examiner Ballinger: Judge, so that we may know definitely and certainly what we are talking about, what evidence do you refer to?

Mr. Hanley: I refer, your Honor, to all of the evidence, whether it had to do with Citrin-Kolb, or whether it has to do with the Ned's Service Stations, wherein the Government undertook to prove:

1. That certain of these wholesale customers of the

Respondent gave a price to some of their customers less than the tank wagon price that was prevailing in Detroit at the time.

2. I refer to that evidence wherein the Government
sought to prove that in direct operations of retail
1393 stations wherever that occurred in the case of these
wholesalers, that there was or were instances of sales
of gasoline below the prevailing retail market in Detroit.

Now, that fact coupled with the fact that "you, Respondent, gave a preferential, that is tank car as distinguished from tank wagon, results in an injury to competition, and a violation of this law." We say, "No, it does not." Because even if true, that these preferential tank wagon prices and preferential retail prices, if you please to call them that, given by any of these four wholesale buyers, were justified by those wholesale buyers, and if they were justified in doing what they did we can't be guilty of any violation of this law.

Trial Examiner Ballinger: Judge, I understand the position of the Commission to be in substance this: That in three instances the Respondent sold to companies operating both a jobber's business, and also retail stores at a preferential price over that which the other retail stores obtained from Respondent. The mere fact that it gave these four stations a preferential rate placed in the hands of those stations an opportunity to afford to sell at a reduced price. And that the testimony goes a step further and shows that they actually availed themselves of the opportunity. Now, with that situation I don't see that this testimony is material.

Mr. Hanley: We say yes, admitting that the Gov-
1393½ ernment did pull that a step further, which we say
they had no right to do, but that is an issue ultimately
in the case. They did go that step, the evidence was received. Now we say all right we have got to meet it. They
were justified in availing themselves of what your
1394 Honor has said is an opportunity to make a lower
price, but if they were justified in making that lower
price, then we say, first, we cannot be held responsible in any event for what they did; but if justified, secondly, and surely there has been no injury to gasoline commerce and competition in Detroit. The opportunity, your Honor, certainly isn't a sufficient thing to establish our guilt under this statute. A man has a jack knife in his pocket, he has

the opportunity to cut somebody's throat, but he is not a murderer until he does.

Trial Examiner Ballinger: What counsel is now attempting is justification for the acts of one of the customers.

Mr. Hanley: Exactly.

Trial Examiner Ballinger: (Continuing.) Of the Respondent company, in selling gas at a reduced price.

Mr. Hanley: Exactly.

Mr. Austin: That is just the point, your Honor, the statute makes that sort of justification a defense to the Respondent, because the statute says that, and the statute doesn't go any further, so it is not a justification.

Trial Examiner Ballinger: That is the view the Examiner takes, and the objection is sustained.

Mr. Hanley: I want to make this statement on the record, if it please your Honor. It now appears that the Government, having introduced evidence of the use
1395 by the four wholesalers involved in this action of a differential, which use was, according to the Government's proofs, or claimed proofs, to depress the tank wagon market to the customers of such wholesale dealers, and in some instances where such wholesale dealers operated service stations at retail directly, it is claimed by the Government that the margin of differential had by such wholesale customers was used to depress such retail market for gasoline in Detroit. The Government advanced this proof, and it was received over the objection of Respondent, and upon motion of the Respondent to strike it from the record, such motion has been denied, and all of that testimony stands in the record.

Further, that the Respondent conceives it to be its duty primarily to justify its own prices, irrespective of anyone else's prices, and has repeatedly asserted that position upon the record, and insisted that the Respondent did not have either the obligation or the right to police the disposition or pricing of gasoline once it was sold to Respondent's customers, but Respondent having been consistently overruled in that position, Respondent now asserts that it has the right, certainly, if not the absolute duty, to meet the testimony which has been admitted and stands in the record in support of the Government's contention that Respondent has violated the law.

Further, it is the position of the Respondent that
1396 it assumes and discharges the burden of justifying

such prices as may have been made by Respondent's four wholesale customers, that whatever effect, in fact, the making of such prices by said four wholesale customers may have had, relieves that effect of any legal onus or oprobria, and that Respondent cannot be held liable for a violation of a statute prohibiting an injury to competition, when it is factually demonstrated that the results of Respondent's conduct and actions utterly failed to have any such injurious effect upon competition, which would necessarily be the result from a legal standpoint if it is shown that the prices paid by the customers of Respondent claimed to have been given a preferential price did not improperly or illegally use that preferential price to injure competition or restrain trade in any substantial degree. And at this time Respondent offers to prove by question and answer by this witness, and by others, that in every instance in which any of these wholesale customers extended to their customers a tank wagon price below the prevailing tank wagon price in Detroit, that such extension of price was fully and legally justified.

And further offers to prove by this witness, and other witnesses, and by competent evidence, that in every instance where these wholesale customers of Respondent operated any service stations directly and sold gasoline
at below the prevailing retail price in Detroit, that
1397 such reduction was fully and legally justified, and
that in turn that fact cannot be used against the
Respondent in this action.

1398 Trial Examiner Ballinger: Judge, if you will make
a proffer of what you propose to prove by this witness,
the Examiner is prepared to rule and that will put the question square to the Commission and to the Courts.

Mr. Hanley: The best way we can make the offer of proof is by question and answer. I know of no fair way to make an offer of proof except by question and answer.

Mr. Abbott: May I also make this suggestion: Do I understand that the last objection has been sustained?

Trial Examiner Ballinger: Yes.

Mr. Abbott: I want to say this, in addition to what Judge Hanley has said: That a great deal of testimony will be offered along this line, and it seems to me that with all deference to your Honor's ruling that it might be handled in this way: that the Examiner take the evidence and then, if, at the conclusion of the Respondent's case, it should be determined that it should be stricken, then it may be stricken, but if it is ruled out at this time, it will result in not taking the evidence.

Trial Examiner Ballinger: If the Examiner entertained any doubt in his own mind, I would adopt the course suggested by counsel, which is the safe way where it admits of doubt, but the Examiner is of the opinion that under the applicable law under which we are proceeding, when discrimination, commerce, and competition are shown, 1399 that it is unnecessary for the Commission to proceed further. That then it is up to the Respondent to show justification, not justification for the acts of those to whom the Respondent sells but justification for the acts of the Respondent in selling to those parties, and here you have a situation where the Respondent is dealing both with retailers and with jobbers and with jobbers also engaged in jobbing and in retailing and selling to those jobbers who are performing the dual business of both retailing and also jobbing at the jobber's rates.

Now, the Examiner is of the opinion that it is too plain to admit of doubt. It is incumbent upon the Respondent to justify its act in selling to those customers who are conducting a dual business of retailing and jobbing at a preferential price.

Mr. Abbott: It is our contention, of course, that we were not under the duty to police the jobber and superintend the disposition of the product after it came into his legal custody and after the title passed to him, but we were overruled on that and now we are put in the position of not being able to answer the conditions which have been established upon the Government's case in showing justification for the very things that they have claimed and brought up in the testimony. They were the ones that brought up the matter of these three preferences.

1400 Trial Examiner Ballinger: It is the opinion of the Examiner that it was unnecessary for the Commission to have gone any further than to have shown discrimination. I think the Commission could have properly stopped there.

Mr. Abbott: Then, it is up to us to show justification.

Trial Examiner Ballinger: But the Commission went a step farther in order to be on the safe ground and did show a utilization by the customer of that preferential price to the detriment of competitors. Now, the matter is in the record and probably may be essential.

Mr. Abbott: On the question of detriment to competitors, the thing we are trying to show by this testimony is that this situation was just necessitated by competition in the neighborhood and we are going to show that by competent testimony; both pictorial and by buys. It is going to invade the entire testimony; not only of this witness, but of other witnesses.

Trial Examiner Ballinger: The Examiner is of the opinion that when discrimination was shown, and the sale of gasoline to these three or four jobbers who were also engaged in retail business, at a preferential price, that that requires justification on the part of the Respondent, if Respondent can show it.

Mr. Abbott: I will proceed, then, by question and
1401 answer.

Trial Examiner Ballinger: You may proceed so that we may get the matter squarely on the record, because I want to afford you a full opportunity to present this case, both to the Commission and to the Court.

Mr. Hanley: I would like to make a motion, if your Honor please.

At this time, and in view of the statements of the Examiner to the effect and in substance that the evidence adduced by the Government relating to the utilization, if any, that was made by the four wholesale customers of the differential in price granted to them by Respondent is, in the judgment of the Examiner, immaterial and a non-essential part of the case and inasmuch as the present ruling of the Examiner precludes the Defendant or the Respondent from what would apparently seem to be Respondent's normal right to defend against anything that is in the record against it, and especially in view of the now announced view of the Examiner as to the immateriality of this class of testimony, the Respondent now renews its motion to strike from the record in this case all of the testimony of every witness and all of the evidence of every character that relates to or tends to have to do with the prices, either tank wagon or retail, which were made by any of the four wholesale customers named in the Complaint, or any
1402 of their customers at any of the times set forth in the Complaint.

Trial Examiner Ballinger: The motion is denied.

Mr. Austin: I would like to say on the record, please, that I don't understand at all that the Examiner said that he didn't consider the testimony of injury to competition which the Commission introduced to be material. That the Examiner was discussing a question of law as to whether, as a matter of law, it was necessary to introduce such testimony to make a prima facie case. It is entirely different from you saying that any such testimony is immaterial.

Furthermore, I think we are still discussing the question of law and, as the Examiner said, it is one thing for the Respondent to attempt to justify its own acts by showing that it was meeting competition, and it is another thing, as a question of law, as to whether such justification proved as to a customer is any defense, and I understand it to be, on the question of law, what may be relevant as to the Respondent may be a defense as to the Respondent, is, as a matter of law, not a defense to a Respondent when merely proved as to a customer.

I would like to say further at this point, if your Honor please, I made a statement awhile ago in referring to Section 2-b of the Robinson-Patman Act making evidence of justification on behalf of the Respondent admissible
1403 with reference to meeting competition and it may be
that my language, as it appeared on the record, might be subject to misconstruction, so, without going back to it, I want to say I made no concession as to the meaning of the Section 2-b of the Robinson-Patman Act beyond the concession that under that section evidence tending to show that a lower price of the Respondent was made in good faith to meet the equally low price of a competitor may be introduced. I made no concession as to the effect of any such testimony or as to whether or not it is or is not a complete justification after it is introduced.

Now, if your Honor please, getting back to this point where we are: I believe it is suggested here that questions be asked so that an offer of proof may be made. That might go to a great deal of length and require an objection to every question, either by me, or at least a ruling by the Examiner—on every question, and if the Examiner has ruled, as he has, as I understand, as a matter of law, that an attempt to justify the acts of a customer by showing that the customer was meeting competition, is inadmissible, that then these future questions that are going to be asked in the way of offers of proof, ought to be limited.

Trial Examiner Ballinger: The Examiner will permit counsel to proceed, at least for a while, along this 1404 line.

Mr. Hanley: We can make the offer of proof, your Honor, if that is the way the Court desires.

Trial Examiner Ballinger: You may do it either way. You may proceed, as you are, sufficiently far to fully develop the rulings of the Examiner, or you may make a proffer of proof which the Examiner is prepared to rule on.

Mr. Hanley: Maybe we can save some time on this thing. We are prepared to make an offer of proof, but before I go to the trouble of making an offer of proof by statement to the record, any further than I have made it—and I should want to make it in considerable detail, if it is done that way, of course—I understand it to be the rule and that it will be the rule here that the offer as made will be accepted as fact in this court and in the Commission and that it will turn purely on a question of law.

Trial Examiner Ballinger: That is correct.

Mr. Hanley: So we can make an offer of proof, if your Honor prefers us to make a statement in connection with all of this class of testimony, without the necessity of going through the question and answer method, if that is agreeable to you (addressing Mr. Abbott):

Mr. Abbott: Yes. I think we can do it that way.

Mr. Hanley: We can do it that way a lot shorter, 1405 of course.

Trial Examiner Ballinger: If you can do that, and if you want time to consider your proffer of proof, and submit it, we will take an adjournment and afford you an opportunity.

Mr. Hanley: ~~I would like~~—and I'm sure Mr. Abbott joins me in this—we would like to prepare a careful offer of proof, because that is going to be the facts on this question in this lawsuit from now on, if I am correctly informed, as to the law.

Mr. Austin: It won't be the facts; because I am not going to admit—an offer of proof must, as I understand, if the Examiner refuses the offer, why, then, you are in a position to argue that you could have proved that if you had been given the opportunity, but it does not bind me to the point that if it had been admitted I wouldn't have an opportunity to rebut. You realize that.

Mr. Hanley: I understand that.

Trial Examiner Ballinger: Counsel for the Commission will be afforded a full opportunity to make any objections to the proffer of proof.

Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Abbott: The nature of the offer which we are 1406 prepared to make is to show that other oil companies, other suppliers made offers to Langer and Cohen and made actual sales of supplies to Langer and Cohen at a reduction in price which it was necessary for Citrin-Kolb to meet in order to keep their trade and their patronage, and I am prepared to make an offer of testimony to that effect showing offers made by other oil companies to sell to Langer and Cohen, which made it necessary for Citrin-Kolb Oil Company to sell to them at a 1¢ discount from the tank wagon price, beginning in 1936.

Trial Examiner Ballinger: And you make a proffer of such proof?

Mr. Abbott: I do.

Trial Examiner Ballinger: Do I hear from counsel for the Commission?

Mr. Austin: I object to that, your Honor, upon the grounds we have stated: that it is an effort to show meeting of competition by Citrin-Kolb and not by the Respondent, and that by meeting competition, they—the evidence of meeting competition by a customer of the Respondent is not available to the Respondent as a defense in this case.

Trial Examiner Ballinger: The Examiner rejects the offer.

By Mr. Abbott:

1407 Q. Now, in the case of Ferguson and Coury, they have only one station; 8500 Gratiot Avenue?

A. That's right.

Q. When did you first solicit their account?

A. In 1936.

Q. They operate a boat works, don't they?

A. Yes; motor boat works.

Q. And they have a filling station in connection with it?

A. That's right.

Q. Now, you made a discount on their account of ½¢ from the tank wagon, did you not?

A. That's right.

Q. And was that done in order to meet the competition of Gulf Refining Company?

Mr. Austin: I object, your Honor.

Trial Examiner Ballinger: Objection sustained.

By Mr. Abbott:

Q. In order to make the record clear, I want to ask you this: did Fergtison and Coury, in 1936, take up with you the matter of having been made an offer by Gulf Refining Company, a supplier of gasoline, to sell gasoline to them at a discount of ½¢ from the tank wagon price?

Mr. Austin: I object to that on the same ground.

Trial Examiner Ballinger: Objection sustained. This Citrin-Kolb Company is not a Respondent here.

1408 Mr. Abbott: This all goes to the question that your Honor has often mentioned; the potentiality in the situation. The fact that the Government claims that by reason of selling gasoline to Citrin-Kolb Oil Company at a differential of 1½¢ from the tank wagon price, a potential situation is presented which makes it possible for them to offer gasoline to their customers at less than the tank wagon price.

It is our contention, and we have a great deal of evidence along this line, that that situation on the part of Citrin-Kolb, in being required to make a preferential rate in some cases to these few instances which have been brought out by the Government, can be justified upon the ground that it was done in order to meet the competition of some supplier of gasoline of a comparable grade to that supplied by the Standard Oil Company, the Respondent.

I think that brings the question before the Commission, and, as I say, the door has been opened by the Government in insisting upon having that testimony be in the record. I am merely referring to cases that they themselves brought out in the Government's case; that is, these three instances.

Now, your Honor says that that is redundant on the record on the part of the Government; that they didn't need to show those cases.

Trial Examiner Ballinger: The Examiner expected 1409 the opinion that was unnecessary, but that is, however, a matter for the Commission.

Mr. Abbott: If it is redundant, then I say Judge Hanley's motion should be granted, and it should be stricken, and if it is not redundant, and it shouldn't be stricken, then I say we should be permitted to answer it on the record.

Trial Examiner Ballinger: That question shows that the opportunity afforded these four companies was utilized by them as against their competitors.

Mr. Abbott: And I say we have a right to show the circumstances under which it was utilized and which made it necessary to utilize it, namely, they were merely meeting competition of some larger gasoline company, in the latter case, the Gulf Refining Company, to sell at a 1½¢ reduction from tank wagon price at Ferguson and Coury at Gratiot Avenue.

Trial Examiner Ballinger: It certainly afforded them an undue advantage over other retail gasoline stations who were buying from the Respondent the same gasoline at a higher price.

Mr. Abbott: We had better work out the offer and present it in the morning, I suppose, because there is a great deal more along this line.

Mr. Austin: It seems to me, your Honor—it is probably unnecessary to say anything further—but the statute 1410 specifies that certain things constitute a violation of the law; that is, discrimination in price and a certain effect. Until you get the discrimination and the effect, you don't start talking about justification. As soon as you start talking about justification, you assume that the elements of the offense are there. The statute says that is a violation of law. Therefore, you can't go outside the statute in looking for what constitutes a justification and the statute says certain specific things may be shown, and you cannot go outside the statute in looking for what may be shown in the way of justification. What the Respondents are seeking to show is clearly outside the statute, and if it is not in the statute, it can't be there, because it simply is no defense. The statute itself outlines and states specifically what justifications there are to a price discrimination having an effect on competition. That is the Examiner's ruling. It is unnecessary for me to elaborate on it, because that's what I understand the Examiner said.

Mr. Abbott: Are you referring to the proviso of Section 2-b of the Robinson-Patman Act?

Mr. Austin: Sections 2-a and 2-b.

Mr. Abbott: "Provided, however, that nothing herein contained shall prevent a seller from rebutting a prima facie case, this is made by showing his lower price 1411 or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor or the services or facilities furnished by a competitor."

Is that the language?

Mr. Austin: Yes. I thought there were some more words in it.

Mr. Abbott: That is the end of the sentence.

Mr. Austin: That is just one clause. There are several things in 2-a and 2-b that the statute says may be shown by way of justification, but what you are offering is not one of them.

Mr. Abbott: I still say that the Government has gone into this, and I think we are obligated, in order to discharge our duty, to show the reason why these discounts from the tank wagon price were made by the Citrin-Kolb Oil Company. I think we have a right to show the circumstances under which those discounts were made; otherwise the record merely will show that they were made and will not give us any opportunity to rebut that evidence.

Trial Examiner Ballinger: This record will contain an offer of the Respondents to show the facts. If that offer should be accepted, it will cover everything that you could prove in evidence. If it should be rejected, then you
1412 will be afforded an opportunity to bring your witnesses in here and ask them questions, and we will pass upon the questions as and when propounded.

Mr. Austin: May I go off the record a moment?

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By agreement of counsel, the hearing is now, at 4:30 P. M., adjourned to reconvene in Room 859 Federal Building, Detroit, Michigan, at 10 o'clock A. M., April 22, 1941.

(Thereupon at 4:30 o'clock P. M., April 21, 1941, an adjournment was taken to reconvene on April 22, 1941, at 10 o'clock A. M.)

1413

Room 859, Federal Building,
Detroit, Michigan,
April 22, 1941.

Met, pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold A. Hanley, Esq., 910 South Michigan Ave., Chicago, Illinois, and Arthur J. Abbott, Esq., of the firm of Abbott, MacMahon and Roberts 2230 Buhl Building, Detroit, Michigan, on behalf of the Respondent.

1414 PROCEEDINGS.

Trial Examiner Ballinger: This is a reconvening at 10 A.M., April 22nd, 1941, in Room 859 Federal Building, Detroit, Michigan, on Docket No. 4389 in the case entitled Standard Oil Company. The last hearing was held in Detroit, April 21, 1941.

The reporter will note counsel for the Commission and Respondent present.

Off the record.

(Discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Abbott: I wish at this time, on behalf of the Respondent, to make an offer of proof that we discussed last evening at the conclusion of the hearing.

In the Government's case testimony was adduced over the objections of Respondent as shown by record page 303 to the effect that Citrin-Kolb, a tank car customer of Respondent, in 1938, 1939, and 1940 gave a preferential price to Langer and Cohen, operating five stations which are identified in the record by their street numbers in the city of Detroit, of 1c per gallon less than the prevailing dealer tank wagon price as shown by record page 302 and 303 and Commission's Exhibit 33-A.

In the Government's case testimony was also adduced
over the objection of Respondent that Citrin-Kolb
1415 Oil Company, in 1938, 1939, and 1940, gave to a station operated by Ferguson and Coury, at 8501 Gratiot Avenue, Detroit, Michigan, a discount of ½¢ per gallon off the dealer tank wagon price as shown by the record pages 302 and 303 and Commission's Exhibit 33-A.

In the Government's case testimony was also adduced over the objections of Respondent that as to the stations supplied by Citrin-Kolb Oil Company at Chicago Boulevard, at Dexter Boulevard, in the City of Detroit rent was waived for the months of August, September, and October, 1939, for the reasons as stated in Exhibit 33-B, shown on record pages 302 and 303, and Commission's Exhibit 33-B.

For the purpose of showing that the practice of Respondent of supplying gasoline to Citrin-Kolb Oil Company during said period at the regular tank car price was a discrimination, so-called, the effect of which was not "substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them," Respondent offers to prove as follows:

1. That the discount offered and allowed by Citrin-Kolb Oil Company to Langer and Cohen was done in order to
meet the competition of Cities Service Oil Company,
1416 which offered in said year of 1936 to sell gasoline to
Langer and Cohen at a discount of 1¢ per gallon off the regular dealer tank wagon price, and that the discount offered and placed in effect by Citrin-Kolb Oil Company was for the purpose of meeting the competition of Cities Service Oil Company, and also other supplier oil companies hereinafter mentioned.

2. That Langer and Cohen in 1936 and in subsequent years bought a volume of 1,000,000 gallons of gasoline per year and upwards.

3. That Langer and Cohen, in consideration of receiving said discount from Citrin-Kolb Oil Company agreed to take deliveries in minimum of 1500 gallons at a delivery.

4. That Langer and Cohen, in addition to receiving deliveries of gasoline from Citrin-Kolb Oil Company, purchased from other suppliers, among which were Victor Oil Company, Fleet Wing Gasoline, and Plymouth Oil Company Dixie Gasoline, and that on January 25, 1940, Victor

Oil Company sold 1500 gallons of Fleet Wing gasoline to Langer and Cohen, of which 744 gallons of 74-76 octane gasoline was sold at 10.75¢ per gallon, and 850 gallons of Ethyl gasoline was sold at 12¢ per gallon, both of which prices included state and federal taxes, which prices repre-
sented a discount in excess of 1¢ per gallon from the
1417 regular dealer tank wagon price at said time. Also
on November 25, 1940, Plymouth Oil Company sold to Langer and Cohen 790 gallons of Dixie gasoline at a price of 11.25¢ per gallon, which was a discount in excess of 1¢ per gallon from the dealer tank wagon price in effect at that time. And that by reason of such competitive situation it was necessary for Citrin-Kolb Oil Company, in order to retain Langer and Cohen's patronage, to sell to them at their various stations gasoline at a discount of 1¢ below the regular dealer tank wagon price prevailing at the time of sale.

Respondent further offers to prove with reference to Ferguson and Coury, 8501 Gratiot Avenue, that their business was solicited by Citrin-Kolb Oil Company in 1936, and that in order to secure their business, it was necessary to meet a price representing a discount of ½¢ per gallon from the regular dealer tank wagon price offered Ferguson and Coury by Gulf Refining Company, and that the price representing a discount of ½¢ per gallon from the regular dealer tank wagon price for gasoline delivered in tank wagons to 8501 Gratiot Avenue was made by Citrin-Kolb Oil Company to Ferguson and Coury for the purpose of meeting the price of Gulf Refining Company at the times mentioned in Exhibits 33-A and B; that with reference to
the waiver of rent referred to in Commission's Ex-
1418 hibit 33-B, Respondent offers to prove that said rent
was waived for a period of three months in order to keep the station in operation. This, for the reason that the station across the street selling Cities Service gasoline was selling gasoline at a discount of 2¢ per gallon.

And for the further reason that a Zip station at the corner of Dexter and Boston Boulevard, one block away, was selling gasoline at the price of 10 gallons for $1.

And that by reason of such competition, and further by reason of litigation in the Circuit Court of Wayne County for injunctive relief filed by the Standard Oil dealer at the Chicago Boulevard and Dexter, he lost considerable of his business, and that in order to keep the tenant in business, Citrin-Kolb Oil Company decided to waive the three months' rent in order to enable the tenant to rehabilitate himself and to keep him in business.

Now, the testimony that we offer to meet by this offer of proof is contained in the record at the pages indicated, and also on Exhibits 33-A and B, consisting of a letter written by Citrin-Kolb Oil Company to Cyrus B. Austin, Federal Trade Commission, and is made not for the purpose of rebutting the prima facie case which has been made by showing that the lower price of Respondent for the furnishing of services or facilities to any purchaser or
purchasers was made in good faith to meet an equally
1419 low price of a competitor, but is made for the purpose
of meeting the evidence which is in the record, and which was placed in the record by the Commission over the objection of the Respondent. And in order to dispel the effect of the testimony to the effect that Citrin-Kolb Oil Company did grant these preferential prices to Langer and Cohen, Ferguson and Coury, and to the station at Exeter and Boston Boulevard, for the purpose of showing that such discrimination on the part of said oil company as alleged in the Complaint herein was not—did not have a potentiality of operating substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition, for the reason as we shall show by this testimony, if it is received, that it will appear from such testimony that the competitive situation was such in the city of Detroit that the operations in question could not have the effect substantially of lessening competition or tending to create a monopoly or tending to injure, destroy or prevent competition.

Now, I wish to make that plain, because it seems to me that yesterday the Examiner based his ruling on the other section of the Robinson-Patman Act which refers to showing that a lower price is made in good faith to meet an equally lower price of a competitor. I wish to make it
clear in making this offer that the offer is made for
1420 the purpose of showing that the discrimination, so-
called, of Standard Oil Company has no tendency, under the circumstances, to create a monopoly or to injure, destroy, or prevent competition in the Detroit area.

Trial Examiner Ballinger: Anything from counsel for the Commission?

Mr. Austin: Well, I feel that this offer of proof should be rejected for the same reasons which were specified yesterday. It may be that the offer is now made as an answer or in reply to evidence of the Commission tending to show injury to competition resulting from discrimination of the Standard Oil Company. Whether this is in direct reply or directly counter to evidence upon the question of injury to competition or whether it is intended as a justification, I think it is clearly inadmissible and does not constitute a defense as a matter of law upon either ground.

On the question of injury to competition, if the discrimination in price by the Standard Oil Company is proved, as it has been, and that the Citrin-Kolb Oil Company received a lower price than certain other buyers, the Citrin-Kolb Oil Company is thereby enabled to charge its customer a lower price than the Standard Oil Company is charging the retail stations to whom it sells direct, then the question is whether or not there is a resulting injury to
1421 competition as between the purchaser from the Citrin-Kolb Oil Company, in this case Langer and Cohen being one of those referred to, and retail stations who buy directly from Standard Oil Company or from other major oil companies. Evidence that there has been such resulting injury to competition cannot be rebutted or overcome by showing someone else was not injured, and it seems to me that if such injury resulted from the fact that lower price was charged by Citrin-Kolb to its stations than was charged by Standard Oil Company in sales direct to its retail stations—meaning the retail stations which it served—it is no answer to explain or prove the reasons which prompted the Citrin-Kolb Oil Company in a particular case to charge a lower price than it charged to its other stations.

Now it is clear here that Citrin-Kolb Oil Company, in many cases—I believe in the majority of cases—charged its subdealers the same price for Red Crown gasoline which Standard Oil Company charged at stations buying from it direct.

Now, in certain cases there was a lower price charged by the ~~Citrin-Kolb~~ Oil Company. The effort here is simply to show what the reasons were that prompted the Citrin-Kolb Oil Company from charging that lower price at certain stations, all of which, I submit, is entirely

1422 immaterial, the only reason being what the effect was
of the lower price and not the reasons why it was charged.

I think that is sufficient, your Honor.

1423 Mr. Abbott: I want to say this, additionally: I
think Mr. Austin has hit the nail right on the head when he says that the inquiry here, as to whether the practice in question operated to lessen competition, tended to create a monopoly or to injure competition with any person who either grants or knowingly receives the benefit of discrimination. I think it would be very regrettable, your Honor, if this record should be made without the inclusion of this evidence which is necessary to rebut the effect of exhibits 33-A and 33-B. Here it is. It is right here in the record. It shows a preferential treatment by Citrin-Kolb Oil Company of these three customers of Citrin-Kolb Oil Company without any explanation excepting in the case of the station at Chicago and Dexter. There is no explanation in Exhibit 33-A or 33-B of the reason why—or the effect of the granting of that preferential treatment to Langer and Cohen and Ferguson and Coury.

Now, Mr. Austin also hits the nail on the head when he says that the question is not as to the meeting of competition but is as to the effect of the giving of this preferential treatment to these two stations, or those two dealers; it relates to the effect, and that is the thing, if anything, that is to be brought out and shown by this rebutting testimony; the effect upon the competitive situation in the Detroit
area and, particularly, with reference to the situation
1424 around the stations in question; five stations of
Langer and Cohen and the one station of Ferguson and Coury at 8501 Gratiot Avenue and the one station at Boston and Dexter which happened to be the only one in which Citrin-Kolb Oil Company made any preferential allowance upon the sale of gasoline supplied to it by the Respondent.

Now I want to say very earnestly that it seems to me that it would be regrettable if this record were made without allowing the Respondent to show the effect of that preferential treatment upon competition, the purpose of it being to show that by reason of the general competitive situation here in Detroit, the granting of those preferences by our jobber-customer could not have the effect of lessening competition or injuring, destroying or preventing competition with other persons in the community, and I think, for that purpose, the testimony has the tendency and, without any question, has the effect of dispelling the effect of Exhibits 33-A and 33-B which, under the circumstances, we really are obliged, here, to rebut because the Government puts those in evidence and they are, up to this time, unexplained by any testimony offered in this case and I earnestly represent, your Honor, therefore, that in order to make a complete record we need to have this testimony in evidence. Without it the record will be incomplete and, as I stated to your Honor yesterday, I think it is your

1425 practice in these cases, in a case of doubt—and your Honor stated yesterday that there has been no adjudication upon this particular point—I think in a case of doubt it ought to be in the record for the Commission to consider and leave it up to the Commission. With all deference to your Honor's ruling, I say this: I think it should be in the record for the Commission to decide as to its relevancy.

Trial Examiner Ballinger: The Examiner is of the opinion, and so rules, that the proffer of proof, if established by proper evidence, would constitute neither a defense nor justification. The proffer is rejected.

Mr. Abbott: I will recall Mr. Biber.

MAX BIBER resumed the stand and testified further as follows:

Direct Examination (Continued) by Mr. Abbott.

Q. Mr. Biber, in connection with Exhibits 7 to 15 for identification, offered yesterday, you testified that these exhibits were prepared under your supervision, is that correct?

A. That is correct.

Q. As a matter of fact did you participate in the preparation of these exhibits?

A. I did.

Q. And did anybody assist you in their preparation?

1426 A. Yes; the auditors and bookkeepers of the Company assisted in the preparation of this.

1427 Q. Do you have an auditor from outside who comes in and works on your books?

A. From time to time, yes, we have.

Q. And you also have bookkeepers in the plant?

A. That's right, we have.

Q. Do you have more than one bookkeeper?

A. Yes, we have.

Q. Now, what professional training, if any, have you had in accountancy yourself?

A. Just that training which goes with the pre-law training of two semesters in accountancy at Wayne University, in Detroit.

Q. What is Wayne University?

A. Wayne University is the municipal university owned and conducted by the Board of Education of the City of Detroit.

Q. And what courses did you take in accountancy and when did you take them in Wayne University?

A. In 1931, accountancy 1 and 2 constituting two semesters.

Q. And what did accountancy 1 and 2 consist of?

A. It consisted of the elementary accountancy and carrying through a set of books during the period of one semester.

Q. By a semester you mean a half year?

1428 A. A half year, and at the end of the year, after carrying the books through the scheduled semester, drawing a profit and loss statement and balance sheet of the business, for which the books were run.

Q. That was accountancy 1, was it?

A. That's right.

Q. And what was accountancy 2?

A. Accountancy 2 was a further instruction on balance sheet and profit and loss statement, elementary cost accounting, and, I believe, some mathematics. I don't know exactly what the other courses were.

Q. You did have, then, some training in cost accounting, did you?

A. Whatever there was in that course; I did have that training.

Q. As a result of this training in Wayne University, do you possess knowledge as to the fundamental principles of accounting and cost analysis?

A. I would say from that training and from subsequent experience, I have the knowledge of the fundamentals of accounting.

Q. You took that accountancy work in Wayne University before you went to law school, did you?

A. That's right.

Q. And at that time did you anticipate taking a 1429 business administration course instead of law?

A. Yes, that was one of the things I considered when I took that course.

Q. And what year was it that you took this course in cost accounting and accountancy 1 and 2 in Wayne University?

A. 1930 or 1931; I am not certain.

Q. And subsequent to that time did you go to the University of Michigan?

A. No, I didn't.

Q. Was it before then that you went to the University of Michigan?

A. That's right.

Q. Your work, then, at the University of Michigan was prior to the accountancy courses that you took in Wayne University?

A. That's right.

Q. And subsequent to that, subsequent to taking the accountancy work did you go to the law school at Wayne University?

A. Yes, I did.

Q. In addition to the theoretical knowledge that you have of cost accountancy, what practical experience have you had in accounting practice and cost analysis?

A. Well, I have had the experience of being very close to the books and accounting of the Citrin-Kolb Oil 1430 Company and, before that, I had considerable experience as trustee and receiver in bankruptcy in several cases issued out of this court, of the United States District Court and Federal Court Judge Ernest A. O'Brien.

Q. And did you get those cases by assignment from the Court?

A. That is right; I did.

Q. And did they involve accountancy and the analysis of costs for the firms that were involved?

A. Yes, they did.

Q. Now, as a result of the combination of theory and practice along this line, do you feel that you know the elements which enter into an analysis of the cost of business operations?

A. I feel I do, or I wouldn't have undertaken this analysis of these exhibits.

Q. And in particular, do you, by reason of this study and experience, know the elements which enter into an analysis of the cost of handling gasoline in the wholesale operations of Citrin-Kolb Oil Company?

A. I believe I do.

Q. In the preparation of Exhibits 7 to 15, for identification, inclusive, did you apply ~~the~~ knowledge of which you have testified, both theoretical and practical?

1431 A. I did; I needed all of it.

Q. And do Exhibits 7 to 15, for identification, inclusive, accurately reflect the cost per gallon of handling gasoline in the wholesale operations of Citrin-Kolb Oil Company for the years 1936 to 1940, inclusive?

A. They do.

Mr. Austin: I assume you mean in his opinion?

Mr. Abbott: Yes.

The Witness: That's right, they do.

By Mr. Abbott:

Q. Your testimony is they do so reflect?

A. That's right, from the figures that I compiled and from the evidence taken, I say, in my opinion, it does.

Trial Examiner Ballinger: You wouldn't have compiled them otherwise, would you?

The Witness: They would have been useless, wouldn't they?

By Mr. Abbott:

Q. Were these Exhibits Nos. 7 to 15, for identification, inclusive, prepared by you with care?

A. I would say they were prepared with the utmost care.

Q. And you vouch for their accuracy, do you?

A. Yes, I do.

Q. You recall that in the Government's case relating to preferential prices given by certain of your retail
1431½ stations, which were suplied by Citrin-Kolb Oil Company, particularly in the years 1938 and 1939, that there was complaint made by certain station operators in the vicinity as to price cutting operations at those particular stations.

A. That is right.

Q. Will you name those stations based upon your recollection of that testimony?

A. You mean those stations which Government witnesses said were cutting prices?

Q. Yes.

A. I believe there was—

Q. Just a moment. I want to give you something to refresh your recollection on that.

A. I think I have a list here, Mr. Abbott.

Q. Name the stations.

A. Station at East Jefferson and Nottingham; Dexter and West Chicago; John R and Euclid; West Warren and Brooklyn; Linwood and the Detroit Terminal Railroad; and Linwood and Pingree.

Q. Are those all the stations that were referred to in the testimony of Government witnesses with reference to the complaints of nearby operators who testified as to the alleged price cutting of these locations?

1432 A. Those were all the locations, either serviced or owned by Citrin-Kolb that were mentioned in the testimony.

Q. I see. Now, as to all these stations complained about by Government witnesses in this case, have you prepared a pictorial survey showing the general competitive conditions surrounding these stations for 1938 and '39, and during the time intervening until the present time as to the stations in question?

A. Yes, I have.

Mr. Abbott: Will you mark this as an exhibit, please?

Trial Examiner Ballinger: The reporter will mark the documents Respondent's Exhibits 18-A and then go on through.

(The documents referred to were marked, for identification, "Respondent's Exhibits 18-A through 18-z-51.")

1433 Q. Now, Mr. Biber, I show you Respondent's Exhibit 18, which has been numbered as 18-A to 18-z-51 and ask you to identify these exhibits and state what they are?

A. These exhibits are photostats or photographs, cards, advertisements, letters, literature and purchase receipts showing price signs and sale prices of gasoline at stations in and about the vicinity of the five stations mentioned before, or having been testified to in the Government's case, and showing the competition around those stations.

Q. You mean five stations, or six stations?

A. Six stations.

Q. And those stations are the ones that you have testified to as located at the locations appearing on the cover of those exhibits?

A. That's right.

Q. Now will you state what these exhibits consist of, from Exhibit 18-A through Exhibit 18-Q?

A. Exhibits 18-A through 18-Q are discount cards, letters and advertisements sent out by chain stations, or operators who operate more than one station and thereby are considered competitive with all stations in the City of Detroit.

Q. And was that material from Exhibits 18-A to 18-Q compiled by you, personally?

A. Yes, it was.

Q. And were the purchases that appear in there 1434 made by you personally?

A. Yes, they were.

Q. And they were made for the purpose of showing the competitive situation as relating to Exhibits 18-A to 18-Q, generally, or with reference to particular locations?

A. Well, these 18-A to 18-Q were actually made, generally.

Q. Generally. To show the general competition; general competitive situation?

A. That's right.

Q. Now referring to Exhibits from 18-R to 18-U, inclusive, will you state what those exhibits cover; within those limits?

A. Those exhibits are photographs of stations in the vicinity of the station at East Jefferson and Nottingham, showing price signs and the price at which gasoline was sold at those stations.

Trial Examiner Ballinger: And the time on the signs appear?

The Witness: And the time, and the date, of the photographs.

By Mr. Abbott:

Q. Now referring to each one of the exhibits within those numbers and letters, will you state what it shows with reference to the prevailing price at the time in question; as to each of the exhibits?

A. The photographs on 18-S—

1435 Mr. Austin: Your Honor, I object to that question. I don't know that that is proper as a question of identification. It seems to me that the document would speak for itself if it were introduced.

Mr. Abbott: What I want to show is that it appears on all the exhibits and I am merely having him state what the exhibits show collectively. I don't want to put them in evidence until I make the offer.

Trial Examiner Ballinger: You may give the general description of them.

By Mr. Abbott:

Q. State generally what is included on those exhibits?

A. The Exhibits carry the prevailing retail prices at the time that the photographs were made of premium, house brand and third grade gasoline. Shows the price of gasoline sold at the station shown in the photograph and it shows the amount of cut of this gasoline below the house brand gasoline of the prevailing retail prices at the time the photographs were made.

Q. When you say "cut," do you mean the amount of discount which is—

A. The amount of discount below the prevailing retail price.

Q. When you say "cut," do you mean the prevailing retail price.

Q. As shown by the photographs?

A. That's right.

1436 Q. Now, is that the general plan of all the exhibits between 18-R and 18-U?

A. Yes, it is.

Q. Now, taking up Exhibits 18-V to 18-z-11, inclusive: Will you state what the general plan is with reference to those exhibits? What do they show?

A. These exhibits also show photographs and price signs and also show the prevailing retail prices of premium, house brand and third grade gasolines and also show the amount of cut or discount off the prevailing retail price at which gasoline was sold at the stations shown in the photographs.

Q. And at the time that the photograph was taken?

A. At the time that the photograph was taken.

Q. And is that shown to each one of the pictures that is included within the limits that I mentioned?

A. Yes, it is.

Q. Now, referring to the exhibits between 18-z-12 and 18-z-17, will you state what the exhibit consists of, as to those particular exhibits?

A. These exhibits consist of photographs at stations and information showing the prevailing retail price of premium, house brand, and third grade gasolines, and also the price at which gasoline was sold at the station shown in the photograph, and the amount of discount off of the prevailing retail price.

1437 Q. As to each of such stations?

A. As to each of such stations.

Q. And those were stations in the vicinity of what station that was referred to in the Government's testimony?

A. John R and Euclid.

Q. And all those photographs, as I understand it, are of stations in the vicinity of John R and Euclid; is that right?

A. That is correct.

Q. Now, referring to Exhibits between 18-z-17 and 18-z-21, will you state what those exhibits show?

A. Those exhibits show photographs and advertisements showing the price at which gasoline was sold at the station shown in the photographs, and also the prevailing retail price, the prevailing retail price per gallon, the price in the picture, and the break-down of the price per gallon in the picture, and the per gallon difference, or discount, and also shows a premium given at the station indicated in the photograph.

Q. Now, you are referring to Exhibit 18-z-18?

A. 18-z-18.

Q. With reference to the general plan, though, will you state what the exhibits show within those numbers that are mentioned?

A. The exhibits show the prevailing retail price of 1438 gasoline for the three brands, premium, house brand, and third grade, and show the price at which gasoline was sold at the station shown in the picture, and the difference or discount below the prevailing retail price.

Q. Now, referring next to Exhibits 18-z-22 to 18-z-30, inclusive, will you state with reference to what station referred to in the Government's testimony those exhibits are intended?

A. These Exhibits are in relation to the station at Linwood and Pingree, and show photographs of stations showing the price at which gasoline was sold at those stations, and also show the prevailing retail prices of premium, house brand, and third grade gasolines, and further showing the discount or cut below the prevailing retail price at the stations shown pictorially.

Q. And are all those stations in the vicinity of this station at Linwood and Pingree?

A. Yes, they are.

Q. Now, referring to Exhibits 18-z-31 and 18-z-51, will you state what those exhibits show?

A. Those exhibits show pictures of stations showing price signs.

Q. In the locality of what station?

A. In the locality of the station of Linwood and the Detroit Terminal Railroad, show price signs indicating the price at which gasoline was sold at the stations,
1439 and also showing the prevailing retail prices of gasoline and the per gallon difference or discount of the prevailing retail price.

Q. Now, those pictures which constitute the exhibits in question over what period of time as to the entire exhibit?

A. Cover from 1937 to 1940, through 1940.

Q. Through 1940?

A. Yes.

Q. And I will ask you this: the buys that appear, the vouchers for purchases made, were those all made by you personally?

A. Yes, they were.

Q. And the data—

Mr. Austin: Where are these vouchers, if I may interrupt?

Mr. Abbott: There are a number of vouchers.

The Witness: Page 23 is one of them.

Mr. Abbott: They are on your copy. I think the originals are only shown.

The Witness: They are photographed.

Mr. Abbott: Yes, they are photographed.

Trial Examiner Ballinger: By page 23 you mean Exhibit 18-z-18, don't you?

The Witness: For Mr. Austin's information. I
1440 don't think he has them marked as an exhibit.

By Mr. Abbott:

Q. They appear on what exhibit?

A. 18-z-6 is one of them; 18-j is another; 18-z-10 is another.

Q. When you say another, you refer to—

A. Another buy.

Q. Vouchers for purchases made by you?

A. That's right. Here is another buy on 18-z-51.

Q. Now, Mr. Biber, are all these exhibits proposed to be introduced for the purpose of showing the competitive situation adjacent to the stations referred to in the Government testimony?

A. Yes, they are.

Mr. Austin: I object to that, Mr. Examiner, and I move the answer be stricken. Counsel is asking the witness the purpose of the introduction.

Trial Examiner Ballinger: Objection sustained, and the answer stricken.

By Mr. Abbott:

Q. Now, were all these pictures and all the exhibits which is included in Exhibit 18 to 18-z-51, prepared by you or under your supervision?

A. Yes, they were.

Mr. Abbott: I offer the Exhibits from 18 to Exhibit 18-z-51 in evidence. 1441

Mr. Austin: I would like to ask a few questions of the witness, your Honor, before making any comment on the offer.

Mr. Abbott: I understand—off the record.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: You may proceed.

Mr. Austin: There are a number of photographs here, Mr. Biber; who made the photographs?

The Witness: Most of them were made by myself, and a few were made by commercial photographers on my order.

Mr. Austin: There are a lot of photographs; I assume those are photostats of material that you had in your possession?

The Witness: That's right.

Mr. Austin: And did you compare them with the originals?

The Witness: Yes, I did.

Mr. Austin: They are correct copies, are they?

The Witness: Yes, they are.

Mr. Austin: 18-B, that appears to be a photostat of a card, Lee's Grosse Pointe Service; is that a photostated card you have in your possession?

The Witness: Yes.

1442 Mr. Austin: Where did you obtain the card?

The Witness: It was furnished by the service station dealer at Kercheval and St. Clair, Standard Oil dealer.

Mr. Austin: To whom was it furnished?

The Witness: To me.

Mr. Austin: You collected it personally?

The Witness: That's right. No; it was brought to me.

Mr. Austin: By whom?

The Witness: By the dealer.

Mr. Austin: At your request?

The Witness: No; just in answer to a general request to all dealers that they turn in any such information during that period of time that they might acquire.

Mr. Austin: What dealers brought it to you?

1443 The Witness: The dealer that operates the station at Kercheval and St. Clair.

Mr. Austin: Is that a station that is supplied by Citrin-Kolb Oil Company?

The Witness: No, it isn't.

Mr. Austin: Now there is a typewriter notation at the top of that exhibit. Was that placed there by you?

The Witness: Yes.

Mr. Austin: And does that state your conclusion regarding the card?

The Witness: That's right. It is an explanation of the card.

Mr. Austin: I notice on Exhibit 18-C for identification: it appears to be from Rantanen & Bicknell Oil Company. There is a notation there that that was supplied by Gulf Refining Company during 1936. What is the meaning of that?

The Witness: That is our notation that that is the product that they distributed. That was not part of the original letter.

Mr. Austin: You mean, there, that this station sold Gulf Gasoline?

The Witness: That's right.

Mr. Austin: To whom was this letter addressed?

The Witness: It wasn't addressed to any particular
1444 party. The greeting is: "Dear Friend:" It was sent out on a mailing list, I understand.

Mr. Austin: Where did you get it?

The Witness: I got it from one of the dealers who received it at his home.

Mr. Austin: From one of the dealers?

The Witness: Yes.

Mr. Austin: Have you any personal knowledge that that was a letter that was circulated or distributed by this station?

The Witness: Only what the letter purports to show.

Mr. Austin: Off the record, please.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

May I inquire of counsel for the Respondent the object and purpose of the tendered exhibits 18-A through 18-z-51?

Mr. Abbott: There was testimony adduced by the Government in its case in chief of operators of stations adjacent to Citrin-Kolb Oil Company-supplied stations at East Jefferson and Nottingham, Dexter and West Chicago Boulevard, John R and Euclid; West Warren and Brooklyn; Linwood and the Detroit Terminal Railway and Linwood and Pingree relative to price cutting at those
1445 stations which were complained of and which was claimed by the Government in its case in chief was the result of the alleged discrimination in price allowed by the Respondent to the Citrin-Kolb Oil Company and which is claimed had the effect of substantially lessening competition and of injuring, destroying or preventing competition in that particular area with which we are here concerned and with particular reference to the area around these six stations supplied by the Citrin-Kolb Oil Company.

Now, the purpose of these exhibits 18-A to 18-z-51 is to show the competitive situation from 1937 to 1940, inclusive by pictures, by evidence of the prevailing prices at the time the picture was taken, and by showing the price that was advertised as being charged at the station adjacent to these six locations supplied by Citrin-Kolb Oil Company and by showing, also, the price differentials which were being allowed to the public at these various stations which are pictorially illustrated in these exhibits adjacent to these six stations supplied by the Citrin-Kolb Oil Company, so as to show that the result of the alleged discrimination to the Citrin-Kolb Oil Company could not be substantially to lessen competition or tend to create a monopoly or to injure, destroy or prevent competition.

1446 In other words, we propose to show by this exhibit, or by these exhibits, the competitive situation in each of these locations in order to show the price cuts which were being allowed the public by other stations adjacent to the stations complained of. This is merely for the purpose of meeting and rebutting the testimony offered by the Government as to each of these six stations as shown by the record.

Trial Examiner Ballinger: As the Examiner remembers —and if he is in error, I request counsel to correct me—the object and purpose of the testimony offered by the Commission was to show or tend to show that the four companies receiving preferential rate from the Respondent and operating service stations, commenced the reduction in price; am I correct or—

Mr. Austin: I wouldn't want to say that the purpose of it was to show that they commenced it, but regardless of who commenced it, the purpose was to show that an injury resulted to the stations that were paying a higher price from the Respondent and to the major oil companies.

Mr. Abbott: May I interrupt here, in this connection, that the competitive situation in all of these locations, by the testimony of the witness, was something which was not initiated by the person supplied by the Citrin-Kolb

1447 Oil Company, but that the situation which is shown by these pictorial exhibits and by the buys was one which has existed in these locations for a long period of time, even previous to 1936 when the pictures and other evidence was collected and taken.

In other words, this testimony is offered in rebuttal of the testimony which was offered by the Government as these six stations, and the conditions surrounding them.

Trial Examiner Ballinger: Did not the Government's testimony establish or tend to establish that after the war started, everybody got into it; all the stations? They had to? All of them had to, in order to do business; they had to meet the price of their competitors?

Mr. Abbott: Of course, we have a right to show that these stations did not instigate the war, as you refer to it.

Trial Examiner Ballinger: That's what I am trying to get at. Do these exhibits you are now offering establish or tend to establish that Citrin-Kolb Oil Company, and its stations, did not have anything to do with the precipitation of these price wars?

Mr. Abbott: I will say this: that they do, in connection with other testimony which will be adduced from this witness and which is, necessarily, bound up with these exhibits.

1448 Trial Examiner Ballinger: I haven't had an opportunity to examine the exhibits, and before I would care to pass on them, it would be necessary for me to personally examine them and to hear from the counsel with reference to each one.

Mr. Austin: If your Honor please, at this point I would like to make a general objection to the production of any of this group of exhibits numbered 18-A and various letters and numbers thereupon, upon the ground that they are inadmissible because they are incompetent, irrelevant, and immaterial, upon the same ground that was discussed yesterday afternoon, and, to some extent, this morning, upon the offer of proof made by Respondent.

In other words, it seems to me that the purpose of all of these exhibits, photographs and so forth, is to try to show that these Citrin-Kolb stations were meeting competition in the prices that they charged, or that there were other stations around them which were selling at as low a price or at a lower price than the price charged by the Citrin-Kolb stations, or perhaps lower than the prevailing price, because there are numerous notations here on the prevailing price and on the difference between these prices shown in the photographs and the prevailing price.

Now, I submit it is not a defense and is not relative
1449 in this case for the Respondent to attempt to show
that stations operated by Citrin-Kolb Oil Company or stations operated by Ned's Auto Supply Company were selling at a price which was not lower or perhaps not as low, in some cases, as other gasoline stations in the vicinity. I believe that the Respondent's defenses here, as stated in the statute, Section 2-a of the Robinson-Patman Act, and 2-b of the Robinson-Patman Act, are that the—that is, the Respondent may show that the difference in price charged these four so-called jobbers and its other retail stations was justified by differences in cost; that is, Respondent's costs within the proviso of Section 2-a, or that the Respondent's

price to these four jobbers, or any of them, was made in good faith to meet an equally low price of a competitor of the Respondent, but whether there were other stations in the vicinity of these Citrin-Kolb and Ned's stations which were selling gasoline at as low or lower price than the Ned's stations or Citrin-Kolb stations were charging, it seems to me is immaterial and does not constitute a defense and I do not see that it is in answer to evidence introduced by the Commission to show injury to certain stations in the neighborhood.

Now, the situation is this: we have, say, a Citrin-Kolb station in a location. There is, maybe, testimony in the record—we will assume that there is testimony in the
1450 record from some other retail station in the neighborhood that the Citrin-Kolb station was underselling the other retail stations, and that the other retail station suffered loss of business.

Now, the Respondent comes and offers to show that aside from these two stations, there were a lot of other stations in the neighborhood selling lower than the Citrin-Kolb stations were selling at. I can't see that that is any answer to the injury sustained by the particular station who, perhaps testified in this case.
1451 If the Citrin-Kolb station as a result of the price which Citrin-Kolb gets from the Standard Oil Company is enabled to undersell a single station in the same locality, I don't believe it is any defense to show this with a lot of other stations in that same locality who were reselling gasoline as low or lower price than that which was being given by the Citrin-Kolb station. So that I think here again we are one step too far down in the line of competition, and I believe that evidence of competitive prices may be admissible under certain circumstances within the statutory defense, when we are talking about competitors of the Standard Oil Company, but I don't believe that all of this material is admissible as to the prices charged at different times by various and sundry other retail stations. And if this kind of testimony could go in it would be almost an endless proposition.

Now, true, on the Government's case, the Commission's case there was a good deal of testimony regarding the competitive situation at different times, and the fact that there was more price cutting openly advertised at certain times than there was at other times, and that was in con-

nection with the showing of cut prices and reductions in prices by some of the station operators who were on the stand. And I wouldn't want to go so far as to say that
Respondent couldn't introduce some evidence to show
1452 what the competitive situation was in Detroit during
the last four years, but I object to the admission of all these exhibits here upon the ground that it is no defense to show these specific prices charged by other stations in the neighborhood of these Citrin-Kolb stations which were mentioned in the Commission's case.

Mr. Abbott: Now, we are concerned here, your Honor, with the effect of the discrimination, so-called—

Trial Examiner Ballinger: Can you furnish the Examiner with exhibits, please?

Mr. Abbott: Yes.

(The witness handed the Examiner the exhibits in question.)

Trial Examiner Ballinger: You may proceed.

Mr. Abbott: I say, we are concerned here with the effect of the so-called discrimination price between the tank car method of delivery, and the tank wagon method of delivery which amounts to a differential of a cent and a half to the four jobbers who are involved in this case, and as to whether the effect of such so-called discrimination is substantially to lessen competition or tends to create a monopoly, or to injure, destroy, or prevent competition with any person in the area which is involved in the territory around these six stations which were brought out in the Government's testimony in their case last month.

Now, Mr. Austin says he doesn't pretend to claim
1452 that we haven't any right to show the competitive
gasoline situation in the City of Detroit. I claim we have a right to show that competitive situation. We have a right to show whether the Citrin-Kolb supplied stations, which are included in this exhibit, were responsible for instigating the price cutting which was complained about by the Government witnesses who testified in the month of March in this case. This testimony is intended to rebut their testimony, which testimony was to the effect that they operated stations which were adjacent to Citrin-Kolb Oil Company supplied stations, at the addresses given on this exhibit, which has now been offered in evidence, and that their business suffered from the competition which was offered by these six stations in question.

Now, it certainly is material in this case to show that that was not the situation that existed as to these six stations.

This exhibit is offered for the purpose—Exhibits 18 to 18-z-51—are offered for the purpose of showing as to all the localities in question; namely, in the locality immediately adjacent to those six locations which are involved in the testimony adduced by the Government, what the competitive situation was. We don't pretend to go over the entire Detroit area for that purpose, because the Government has focused their testimony on these six loca-

1454 tions which are referred to in this exhibit, and it certainly is material for the Respondent, as a part of its case, to show what the competitive situation was around those stations, and to show in connection with this exhibit, and testimony that will later be adduced, to the effect that the situation shown by this exhibit was not instigated nor caused in its inception by the operation of the Citrin-Kolb Oil Stations in question.

That is the purpose of this exhibit. And it is a very important part, I may say, not only in connection with this witness, but in connection with other witnesses that will be called in connection with the competitive situation in Detroit to show just what was the reason for price cutting at the Citrin-Kolb Oil stations; that it was purely defensive, and that it was caused by the price-cutting of the stations which are shown in Exhibits 18 to 18-z-51.

Why, there are illustrations in this book of exhibits which show that adjacent to the Citrin-Kolb stations they had competition which had existed for a long time, and which was the cause of this price war; stations which gave a differential to the buying public of in excess of five cents per gallon on sales of gasoline, which Citrin-Kolb Oil Company never could hope to meet, and which it never has met in all the time covered by this exhibit; differentials in price so far below what Citrin-Kolb Oil Company charged at those stations, and which they have always charged, as they had no hope of meeting that competition. And that

1455 the situation that is complained about in the testimony of the Government's witnesses is one which the Citrin-Kolb Oil Company did not instigate in the first place, and which its preferential treatment of the public has merely been made necessary by ruinous competition which has been made possible by the stations which are shown in that exhibit, and which show much larger differentials than offered by the Citrin-Kolb Oil Company supplied stations. Now, we only limit this to the six stations that are in the exhibit. We want to be orderly about it. We want to present it in such a way so that it will not involve endless testimony. And that is the reason it is presented in these books, so that it could be easily referred to, and in an orderly way, as to each of the six stations involved. We have a right, I think, to show merely to rebut the Government's case, and in line with the phraseology of the Robinson-Patman Act which relates to the question as to whether the discrimination allows a potentiality for substantially lessening competition, or tends to create a monopoly, or tends to injure, destroy, or prevent competition. That thing is material to our case. It is very necessary that we be permitted in this case to show what the competitive situation was in those localities.

Trial Examiner Ballinger: Well, let us see if
1456 there is any difference of opinion between counsel
for Respondent and the Examiner with reference to the provisions of this statute, and what is necessary for the Respondent to establish.

The Section 2-a first prohibits discrimination in commerce and then provides, "And where the effect of such discrimination may be substantially to lessen competition, or tends to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person, who either grants, or knowingly receives the benefits of such discrimination, or with customers, or either of them."

Mr. Abbott: That's right.

Trial Examiner Ballinger: Now, as the Examiner recalls, testimony was introduced first establishing the fact that four companies who were, at least to some extent, engaged in the retail business, were receiving a preference price of 1½ to 1¾c per gallon for gas. There was a potential power placed in the hands of those companies.

Now, the Commission went one step further and offered testimony to show that those companies exercised and utilized that potential power. Now, you propose to show here by some exhibits that those companies were forced, I presume, to resort to that method or reduction in price
in order to meet competition elsewhere. And how
1457 do you propose to show that? By some photographs
taken around at different times; some of which were

not even taken by this witness; by letters written, which were not received—purported to be written by companies, which were not received by this witness; and other evidence of which this witness has no personal knowledge that it ever emanated from the source which it purports to have emanated.

The Examiner is very strongly of the opinion that, first, he is doubtful whether such evidence is admissible at all; and, secondly, if it is admissible, then you will have to establish it by competent testimony.

I don't want to pass on these exhibits tendered in block as they are, without first scrutinizing them carefully.

Mr. Abbott: I can offer them singly if the Examiner insists upon it, but it will take a long time to do it.

Trial Examiner Ballinger: I take it that will be necessary, and that opportunity should be afforded counsel for the Commission to inquire fully of the witness with reference to his knowledge of each one of the exhibits, if you care to proceed that way.

Mr. Abbott: I am willing to go ahead on that basis, if the Examiner wishes to have it done that way.

Trial Examiner Ballinger: I think that is the only
1458 way possible to dispose of the exhibits.

Mr. Austin: If your Honor please, it wouldn't be necessary to do that if the Examiner should rule on the general objection that these are not admissible. And I would like to say a word or two more on that.

After hearing what Mr. Abbott says, it gets back to meeting competition, not by Respondent, but by customers of the Respondent. And I think your Honor very correctly stated the question here is as to the differential—the effect of the differential given to Respondent's customers as against other retail customers of the Standard Oil Company.

Now, if these Citrin-Kolb stations were selling gasoline at a certain price, and if another Standard Oil Company station, we will say, in the neighborhood suffered injury as the result of the lower price which Citrin-Kolb received from the Standard Oil Company, and, as you say, the Commission went a step farther to show that that benefit of a lower price was utilized, now, it seems to me that this testimony, the purpose of it, is simply to say: "Well, if this retail station buying direct from Standard Oil, if that station lost business to Citrin-Kolb, why, it must have lost business to a lot of other people in the neighborhood, too, because they were all selling at the same price."

1459 And I don't think that that aids the Respondent at all.

Now let's assume they were all selling at the same price; we have a Citrin-Kolb station, and we have a lot of photographs and things which we will say indicate other stations in the vicinity were selling at as low or lower price as the Citrin-Kolb station, and let's assume there is a station buying direct from the Standard Oil Company in the neighborhood, and it sells at the same price as the others. Well, if the Standard Oil direct station is selling, we will say, at a margin of 2¢ a gallon, that means if it is selling at the same price at the Citrin-Kolb station, that the Citrin-Kolb station at that point has a margin of 4¢ a gallon, less whatever the expense may be involved in the operation of the bulk plant. But that is something besides.

1460 Mr. Abbott: You are assuming the differential is two cents?

Mr. Austin: I will change that, because it wasn't two cents, it was a cent and a half. Thank you, Mr. Abbott. On the Red Crown.

Mr. Abbott: That is assuming also they are selling at their own retail station?

Mr. Austin: That's right. That is what these six stations are, are they not?

Mr. Abbott: I will ask the witness that.

The Witness: No, they aren't.

Mr. Abbott: Not one of them.

The Witness: One of them is; the first one.

Mr. Abbott: Just the bulk plant at Linwood and D. T. Railroad.

Mr. Austin: I was under the impression that these six stations were all operated stations by Citrin-Kolb.

Mr. Abbott: They are not.

Mr. Austin: If they are not stations operated by Citrin-Kolb, are they stations which were mentioned in that letter? That is, are they Langer and Cohen stations or Sid's Service?

The Witness: I believe there are two Langer and Cohen stations, and one operated station. I believe the other three are just independent dealers. Let's see the addresses.

1461 (Witness refers to paper.)

Mr. Abbott: State which one is which.

The Witness: East Jefferson and Nottingham was operated by the company; Dexter and West Chicago is Sid's Service.

Mr. Abbott: Is that operated by the company?

The Witness: No. John R and Euclid and West Warren are Langer and Cohen stations; and Linwood and the Detroit Terminal Railroad, and Linwood and Pingree were independently operated.

Mr. Abbott: I just wanted to correct the impression.

Trial Examiner Ballinger: The Examiner is not sufficiently familiar with the various documents tendered in block or separately, and he would not care to rule upon them in block.

If it is desired, we will take the time to consider each one of them. There may be some of them that wouldn't fall within the general objection; there may be some of those about which this witness has personal knowledge.

Mr. Austin: Mr. Biber, these last two here, Linwood and Pingree, and Linwood and the Detroit Terminal Railroad, did you testify on direct examination regarding the prices charged to those stations by Citrin-Kolb Oil Company? Do you recall?

The Witness: Prices charged to these stations by
1462 Citrin-Kolb Oil Company?

Mr. Austin: Yes.

The Witness: Yes.

Mr. Austin: I believe you have been familiar at all times since 1937 from time to time with the posted tank wagon price of the Standard Oil Company?

The Witness: Yes, I have been.

Mr. Austin: And at any time from January 1, 1937, to date was the price charged by Citrin-Kolb Oil Company to either of these stations any lower than the posted tank wagon prices of Standard Oil Company?

The Witness: They were not.

Mr. Austin: Were they always charged to posted tank wagon prices?

The Witness: Yes, they were.

Mr. Austin: Your Honor, I think that disposes of these last two pages marked for identification 18-z-21 to 18-z-51, inclusive.

Trial Examiner Ballinger: How do you think it disposes of them?

Mr. Austin: I think because there has been no testimony in the case that either of those two stations were either operated by the Citrin-Kolb Oil Company.

That is correct, isn't it, Mr. Biber?

The Witness: That's right.

1463 Mr. Austin: Were either of them operated by Citrin-Kolb during this period?

1464 The Witness: I don't believe they were, during the period of that previous testimony. They are now. We got them back.

Mr. Austin: Since when?

The Witness: I don't know. If it is before, it is on your list. I don't remember the date, and if it is not—

Mr. Austin: Were either of those stations on the list of operated stations that you submitted here last month?

The Witness: I don't remember whether it was. It was just about that time. The list would show that.

Trial Examiner Ballinger: What opportunity, Mr. Austin, for cross-examination would these documents afford? The witness has no personal knowledge with reference to many of them.

Mr. Austin: He has, with reference to some of them.

Trial Examiner Ballinger: Some of them, he has personal knowledge of. I don't know how far his personal knowledge extends with reference to them.

Mr. Austin: Well, I wouldn't object on that point, if the witness actually made buys at a station, or actually was handed out a card at a station so that he could testify of his own knowledge that that station was advertis-

1465 ing a lower price. I mean, aside from other objections, I wouldn't object on the ground of personal qualifications, provided he could testify to that.

Mr. Abbott: We can take up each one of them separately, but it will take a long time to do it.

Mr. Austin: Let me proceed on this line, if your Honor please.

Trial Examiner Ballinger: This is a rather important case.

Mr. Abbott: That is true.

Trial Examiner Ballinger: I am not going to act on these unless counsel agree. If they will agree, I will go along with them.

Mr. Abbott: It may be that the Government would be willing to take this exhibit and indicate to us which of the pictures and other data he is willing to admit in evidence.

if the general objection is ruled on to the effect that if properly identified they may be received in evidence, and then, as to the others, we can decide which ones we want to have testified to separately and in that way possibly shorten the procedure.

Trial Examiner Ballinger: The Examiner is of the opinion that this may be shortened by our taking an adjournment for lunch, provided you will furnish the Examiner a copy of these exhibits so that he may examine
1466 them and counsel for the Commission may have an opportunity to examine them during the same period.

Mr. Abbott: Yes, we will give you a copy.

Mr. Austin: Your Honor, may I proceed just for a moment along this line of thought I was on here?

Trial Examiner Ballinger: You may.

Off the record.

(Discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Austin: May I ask you, Mr. Biber, in these exhibits which have been marked, for identification, beginning with 18-z-22—do you have a copy there?

The Witness: No, I haven't.

(The witness was handed documents.)

Mr. Austin: Beginning with 18-z-22, is there any material from that point on, which refers to a date in connection with the Linwood and Pingree station on or after September 27, 1940, and as to the Linwood and Detroit Terminal on or after October 15, 1940?

Mr. Abbott: Now, just what does that date refer to; the time that they took the station over themselves?

Mr. Austin: That's right.

Mr. Abbott: I fail to see the materiality of that, if your Honor please, and object to the question on the ground it is irrelevant and immaterial.

1467 Mr. Austin: I am asking him what is in there at the present time, and then I will try to bring out why it is material.

The Witness: What page did you start with?

Mr. Austin: Those last two sheets.

Trial Examiner Ballinger: Will you state the materiality of the question as asked?

Mr. Austin: I think it is material, your Honor, because I believe that if there is nothing in these offered exhibits, that is, these two sheets, relating to the Linwood and Detroit Terminal station, and the Linwood and Pingree station which relates to them at any time while they were being operated by the Citrin-Kolb Oil Company, and there is no evidence in the case that they ever got a preferential price from the Citrin-Kolb Oil Company, I don't think it is responsive to anything in the Commission's case. I think it is entirely immaterial.

Trial Examiner Ballinger: Is it true that the record now portrays the Citrin-Kolb Company took over these two stations on the dates you have given?

Mr. Austin: That I just mentioned, yes.

Trial Examiner Ballinger: And thereby operated them?

Mr. Austin: Yes. From October, 1940.

Trial Examiner Ballinger: Prior to that they were 1468 leased or operated by independent operators?

Mr. Austin: Yes.

Mr. Abbott: You see, if the Court please, the testimony in the Government's case involved complaints by different station operators in the vicinity of these stations relating back to 1937, 1938, and 1939, as to alleged price cutting by these stations, so I don't think it makes any difference whether at a subsequent time the stations were taken over and operated by the Citrin-Kolb Oil Company. As a matter of fact, according to the Government's theory, the fact that they were company-operated would give them still greater opportunities for discriminating in the pricing to the public.

Mr. Austin: That's what I contend.

Mr. Abbott: So it is just in the inverse of what you contend.

Mr. Austin: On the other hand, I agree with what you have just said.

Mr. Abbott: I understand it is the Government's contention that if any one of these four jobbers operates a station itself, that increases the potentiality; is that right?

Mr. Austin: Oh, certainly.

Mr. Abbott: So I don't understand that it makes any difference whether these exhibits refer to a period 1469 before 1940 or after 1940. As a matter of fact the testimony that they are intended to rebut is testimony of witnesses as to conditions which obtained previous to 1940. Therefore, the exhibits are equally material and the question is irrelevant.

Mr. Austin: My position on that is—I don't think I made it clear, perhaps—that as to the period prior to the time when these stations were operated by Citrin-Kolb Oil Company, if there is no evidence in the record that those stations paid any lower price for their gasoline than were being paid by other stations buying direct from the Respondent, that as to competition with those stations there is no evidence of any injury resulting from any discrimination by the Standard Oil Company. I am making an admission, really, in your favor, Mr. Abbott.

Mr. Abbott: There is a claim, though, in the record of injury, and we have a right to rebut that.

Trial Examiner Ballinger: In view of the admission of counsel for the Commission, that he makes no claim of injury prior to the time the Citrin-Kolb Oil Company took over and operated these two stations, do you agree with counsel that a certain portion of those exhibits pertaining to those two stations now become immaterial?

Mr. Abbott: I will ask him this: are you willing to
strike out all the evidence in the record of the wit-
1470 nesses who complained of these two stations? If you
are willing to do that, then we don't need to meet it.
I will ask the Government's counsel if he is willing to do that.

Mr. Austin: I would have to go back to the record, Mr. Abbott. My recollection is any testimony of that kind must have come in incidentally, with some other stations. It probably would be inseparable.

Mr. Abbott: Would you look up the testimony and decide whether you are willing to have it stricken as to these two stations?

Mr. Austin: I couldn't answer that without reviewing the testimony.

Mr. Abbott: Linwood and Pingree, and Linwood and Detroit Terminal Railroad.

Mr. Austin: That would take a lot of time, to hunt through the record and find out where they came in. I don't know where they came in.

Trial Examiner Ballinger: Gentlemen, to save time, we will take a recess until 2 o'clock, during which time counsel may examine the exhibits and the Examiner also will examine them.

Mr. Abbott: I may say, in that connection, your Honor, that Judge Hanley may have a witness from out of town that he may wish to put on at 2 o'clock and I assume that will be satisfactory to the Commission.

1471 Trial Examiner Ballinger: We will try and accommodate counsel and not hold anyone over.

Mr. Abbott: Yes.

Trial Examiner Ballinger: Now, at 12:05 P. M., the hearing stands in recess until 2 P. M.

(Thereupon at 12:05 o'clock P. M., an adjournment was had until 2 o'clock P. M.)

1472 Afternoon Session.

2 P. M.

Trial Examiner Ballinger: We will come to order. Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record. You may proceed.

Mr. Hanley: On the record, please.

As I understand, your Honor, Mr. Abbott has advised the Court we would like to put on a witness who comes from New York and is anxious to get back tonight, and if we may have permission of the Court to interrupt the other witness, we would like to put him on now.

Trial Examiner Ballinger: That privilege will be accorded counsel.

Mr. Hanley: Mr. Dyer, please.

JAMES E. DYER was thereupon called as a witness by and on behalf of the Respondent, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Hanley.

Q. Mr. Dyer, will you please give your name with initials to the reporter, and your place of residence?

A. My name is James E. Dyer. My home is in New York.

1473 Q. As I understand it, you desire, if possible, to complete your appearance here today and get back this evening.

A. I would be very grateful if I could complete my work here to day. I would like to go back tonight.

Q. Mr. Dyer, what is your present occupation?

A. I am assistant to the vice president and general sales manager of Sinclair Refining Company. Sinclair Refining Company is a corporation engaged in the manufacture of petroleum products, whose operations in the United States generally are in the territory east of the Rocky Mountains.

Q. How long have you been engaged in the oil business; associated with it, Mr. Dyer?

A. I have been in the oil industry for 26 years.

Q. Now, will you please tell the Court what your first association with the oil industry was and what steps were they you have taken in the industry up to the present time?

A. Yes. I started—my first job in the oil industry was with the firm called Cudahy Refining Company. The position which I first held was that of a general utility man in a bulk plant operated by that company in Kansas City, Kansas, and the general character of my duties there was to do all of the work that is usually done around those plants; the receiving of merchandise, the recording of the
1474 stocks as they were received and disbursed, the loading of trucks, the taking of orders over the telephone, and, as time went on, and as our business grew, I went from one position to another through the warehouse, in the office, then out into field work, and in 1916 the company, the Cudahy Refining Company was taken over by the Sinclair Refining Company, with which concern I have been continuously ever since, and from 1916 on, as the Sinclair Refining Company grew and expanded throughout this territory east of the Rockies, I have had occasion to work in all of the parts of the country in which our company operates and from one time to another to have occupied almost every position in the distributing end of the business. I have worked in all phases of the sales and the marketing, the operating end of the business and have occupied positions from the most modest, in those capacities, to through the position of district manager, on through to my present assignment.

There were some interludes to my employment that I might mention. During the days of the National Recovery Administration—that is, from 1933 until the NRA was invalidated in 1935—I was farmed out, so to speak, to the Code Authority for the Oil Industry under the National Recovery Administration, and I had charge of the administrative work of the Code in what was known as District

No. 1, with headquarters at New York. I might ex-
1475 plain that that work brought me in very intimate asso-
ciation with marketers in all phases of the marketing end of business with the major companies and smaller companies, dealers and retailers, and in every phase of the operation.

After the invalidation of the Petroleum Code, I spent some two years with one of the Sinclair Companies, whose business is confined almost entirely to jobbers; the jobbing business.

1476 Q. What was the name of that company, please?

A. That is the Richfield Oil Corporation of New York.

Q. And what was your designation in that company?

A. I was executive vice-president of that company.

Q. And generally what business did that company engage in?

A. The company was engaged in the business of, well, I would say it might be called a cargo marketer; we bought gasoline, fuel oil and other petroleum products in cargo lots, handled them through deep water marine terminals, and resold those materials to jobbers and distributors located throughout New England and along the Atlantic seaboard as far south as North Carolina.

Q. What territory generally does the Sinclair Refining Company operate in from a marketer's standpoint, Mr. Dyer?

A. Our company operates in all of the states east of the Rockies; that is to say, New Mexico, Colorado, Wyoming, Idaho, and then going east to the Atlantic seaboard, and then from the Canadian line down to the Gulf.

Q. Is it not true that your company advertises its products nationally and markets them nationally?

A. Well, I would say that is correct, except that our products are not marketed directly by our own company west of the Rocky Mountains.

Q. How long have you held your present position?

A. I have been in my present position since the fall of 1937.

1477 Q. And just generally, what are your duties in your present position?

A. My duties as assistant to the vice president and general sales manager are to generally supervise the sales operations, initiate the sales policies of the company, personnel and operating policies, for the marketing end of our company's operations throughout the territory in which we operate.

Q. Now, have you actually worked as a service station operator or attendant?

A. Yes, sir.

Q. Mr. Dyer, if there are any, what functions in the marketing of gasoline have you not had experience in?

A. Well, I can't recall any right now. I have worked in every department of our own company's business, and I would say that I have pretty well covered the field.

Q. You have made reference to working with the Code Authority under the NRA. What was the nature of your work during that period?

A. I had charge of the administration of the Code which had been approved by the president pursuant to the provisions of the National Recovery Act.

Q. Now, did that have reference to marketing, Mr. Dyer?

A. Yes. And I might say by way of explanation, that
I handled the administration in other phases of the
1478 business as well, but the principal importance of the
Code in the area in which I worked was that of the
marketing side of the business.

In the administration of the Code, we had the responsibility of organizing Code Authorities in the States comprising the regional District No. 1. Regional District No. 1 included New England, New York State, Pennsylvania, Delaware, Virginia, and West Virginia, and the District of Columbia.

In addition to seeing that the rules were properly understood by the industry, which was a sort of educational function of the Code Authority, we were required to receive, investigate, and act upon complaints of violations of the provisions of the Code, not only as to the marketing provisions, but as to the labor provisions as well. We also acted as a sort of conciliation agency where there were labor difficulties.

Trial Examiner Ballinger: May I inquire the relevancy of this line of testimony?

Mr. Hanley: If your Honor please, we propose to show by this witness the position of the jobber in the oil industry.

Trial Examiner Ballinger: Not under the NRA, but generally?

Mr. Hanley: Just generally. I am simply qualifying the witness as an expert on marketing, that's all. 1479

Trial Examiner Ballinger: Proceed.

The Witness: That, I think, in a general way, summarizes my work with the Code Authority.

By Mr. Hanley:

Q. You have made some reference to work on the TNEC, Governmental agency; what was the nature of that, Mr. Dyer?

1480 A. Well, by the TNEC, I suppose you mean to the Temporary National Economic Committee?

Q. That's right.

A. I did not work on that. I merely observed the proceedings in the hearings that related strictly to the oil industry.

Q. Now, Mr. Dyer, does your company, the Sinclair Company, operate in the State of Michigan and the City of Detroit?

A. Yes, sir.

Q. What is the fact relative to whether or not in the oil industry the use of jobbers as a system of distribution is widely employed? And just amplify that on the basis of your knowledge and understanding of the situation.

A. Well, it would be my suggestion, if I may be permitted to do it, to attempt to define what I mean by a jobber.

Q. Perhaps that would be best. The word, I might say, has been used in evidence here rather interchangeably with tank car buyer, wholesale buyer, and bulk quantity buyer; and just what is a jobber as you propose to use the term?

A. In order to give a little background for the definition, I would like to read into the record, if I may, a definition of the word jobber, distributor, or wholesaler, as those words were defined in the National Code of Practices for marketing refined petroleum products, which was authorized by the Federal Trade Commission on June 12, 1931. That Code of Practices carried the following definition of jobber, distributor, or wholesaler:

1481 "One who carries a stock of petroleum products to sell to retail dealers or others for resale, but who may sell direct to consumers."

I would like also to read into the record the definition of bona fide jobber, jobber, distributor, wholesaler, as it appeared in the Code of Fair Competition for the petroleum industry under the National Recovery Administration.

1482 Mr. Austin: Pardon me, please. I fail to see why that should be read in, unless that document has some materiality.

I don't object to the witness giving his opinion, but I object to having a quotation from some other document, in the absence of any materiality of the document itself, as to the authority.

Trial Examiner Ballinger: The Examiner is in doubt as to the materiality.

Mr. Hanley: Perhaps I can straighten that out right away.

By Mr. Hanley:

Q. Mr. Dyer, do you agree with the definitions you are now reading?

A. Yes, sir.

Mr. Hanley: I think that covers it.

Trial Examiner Ballinger: What application has that to this case?

Mr. Hanley: Well, if your Honor please, this case involves a charge against the Respondent, specifically, but actually this case involves an attack upon the oil industry and upon the economic structure of the distribution of petroleum products, not merely in Detroit, but in the United States. Now, we propose to show in the record of evidence in this case exactly what the effect of any
1483 rule be that is made by the Commission as a result
of this lawsuit.

We propose to show by this witness what jobbers are, and what they do, and how they do it, and why they do it, and what the effect is of their activity and what the effect would be if there were an adverse ruling in this particular proceeding. We think we are entitled to do that.

It has been observed here throughout the record that a jobber may not be a retailer. We say he is, in the contemplation of the economic structure in the oil industry; that there is no narrow definition of that term. We think we are entitled to show that. We want that on the record.

Trial Examiner Ballinger: What you are now attempting to show is, I take it, that a person who buys in tank car or jobber lots may be engaged in retail; that is, actual operation of retailing the products to the public, as well as the sale and resale of the product to retailers.

Mr. Hanley: That's right. And that is the Federal Trade Commission's definition with which this expert has said he agrees.

Trial Examiner Ballinger: You may put it in the record.

By Mr. Hanley:

Q. You may proceed.

Mr. Austin: I don't believe there has been a
1484 ruling, yet, on my objection.

My objection is, your Honor, I don't object to this witness giving his opinion as to what a jobber is. I do object to him reading that from an identified document.

Trial Examiner Ballinger: Well, without identifying the document?

Mr. Austin: If he simply replies to a question as to what, in his opinion, is a jobber, I am not objecting to that.

Mr. Hanley: Very well. I will undertake to surmount that difficulty and technicality.

By Mr. Hanley:

Q. Mr. Dyer, please state your definition or definitions of a jobber, as an expert. You may refer to any document that you have. You may read from any document you have. Please do not give any source, other than your own opinion.

A. In my opinion—and I think that I may say that this is a very widely-accepted definition in the industry—a jobber, or a distributor, or a wholesaler, or a bona fide jobber is one who is engaged in the purchase and sale of a petroleum product and who operates a storage tank or tanks of tank car capacity in conjunction with facilities for the storage of lubricants and greases and this bona fide jobber, jobber, distributor, or wholesaler will sell a substantial part of his petroleum products direct to re-
1485 sellers or consumers, but he may supply his own or
controlled service stations or filling stations.

Now, that opinion, or that definition is, in my opinion, about as good a definition as I can think of, and one that has been accepted, to a large proportion, of the oil industry.

Mr. Austin: I move that last part be stricken, your Honor, as unresponsive.

Trial Examiner Ballinger: The motion is granted.

Mr. Hanley: Is that unresponsive; on the ground that it is unresponsive?

Mr. Austin: Yes. Where he says it is accepted by a large proportion of the oil industry.

Mr. Hanley: That's all you moved to strike?

Mr. Austin: Yes.

By Mr. Hanley:

Q. I will ask you whether in your knowledge that definition of a jobber is generally accepted in the oil industry?

A. It is.

Q. I will ask you if you are able to state, from your knowledge and experience with the NRA Codes, if that was a definition that was generally accepted by the United States Government through the agency of the NRA set-up?

Mr. Austin: I object to that question, your Honor.
1486 I think it is immaterial as to what was accepted during the NRA. I have some doubt as to materiality as to what the oil industry accepts now, but I didn't object to that.

Trial Examiner Ballinger: The objection is sustained.

By Mr. Hanley:

Q. Now, Mr. Dyer, I advert to the question which I asked you a few minutes ago, and having in mind the definition of a jobber or wholesale buyer which you have now given, will you please state on the basis of your knowledge and experience the degree of prevalence that that system of distribution has in the United States in distributing petroleum products, including gasoline?

Mr. Austin: Pardon me. I would like that question re-read.

Trial Examiner Ballinger: Read the question, Mr. Reporter.

(The question was read.)

Mr. Austin: The question there is directed to a system of distribution. I don't believe that the witness has done anything more than what he understands a jobber to be. Now, I certainly don't understand what is referred to here by a system of distribution, and I think that the question is entirely too indefinite, and has no meaning, as
1487 referring to previous testimony. I object to it on that ground.

Mr. Hanley: I will develop it if there is any question in your Honor's mind.

Mr. Austin: I sincerely don't know what you are referring to, Judge.

Mr. Hanley: Is there any question in your Honor's mind?

Trial Examiner Ballinger: The Court isn't entirely certain on it.

Mr. Hanley: I will develop it, then.

By Mr. Hanley:

Q. Mr. Dyer, how do you get gasoline? Where does it come from?

A. Gasoline usually and ordinarily comes from the refinery where it is manufactured.

1488 Q. Who uses it?

A. Gasoline is used by the owners and operators of automobiles, trucks, busses, marine motors; for illuminating purposes, in a restricted way; in some cases for heating purposes. That, generally, suggests the uses.

Q. How does the gasoline get from the refinery where it is manufactured to the individual or the place where it is used in the various ways that you have indicated?

A. The movement of gasoline from the refinery to the ultimate consumer is through a wide variety of channels and methods and functions.

I think perhaps by illustration I might convey the idea more clearly.

When gasoline has been manufactured—and this is true of other petroleum products, such as fuel oils and lubricants—when the gasoline has been manufactured and made available at the refinery, it starts on its transportation to the ultimate destination of the consumer.

Some gasoline that starts through that pattern of distribution will be loaded into cargo vessels, if it happened to be a tide-water refinery. It will be transported in those cargo vessels to a bulk deep-water terminal, which is a location of a rather large storage vessel which will accommodate the contents of one of these large vessels.

From the bulk water terminal the material may be loaded into barges to then be sent on to smaller water 1489 boat plants or it may be loaded into tank cars and transported by rail to bulk plants, or it may be loaded into trucks of large capacity, frequently referred to as transport trucks, and transported to bulk plants or directly to retail outlets.

After the material has reached a bulk plant by one of the processes to which I have referred, the material then is transshipped or transdelivered by tank truck, usually, if it is bulk merchandise, either directly to the consumer—for instance, in the case of a truck fleet operator who has the facilities for the accommodation of a truck load of gasoline or storage or dispensing facilities for it, or it is delivered into a storage system of a gasoline and oil service station and the next move through this latter course to the consumer is for the consuming motorist to drive into the station and have the material pumped through the dispensing facilities into the storage tank on the consumer's motor vehicle. From then on the gasoline moves through the circulatory system of the automobile to the motor, where it is consumed and dissipated and its value destroyed.

Q. Now is the process which you have generally described the means by which somebody in Detroit can buy five gallons of gasoline at a service station that came out of the ground as crude oil, perhaps in Texas, and was refined in Illinois or Indiana and was transshipped to Detroit as a finished product?

1490 A. Yes, sir.

Q. Is that process one which you describe generally by the term distribution of gasoline?

A. Yes, sir.

1491 Mr. Hanley: May we have this marked Respondent's Exhibit 19, for identification?

Trial Examiner Ballinger: Respondent's Exhibit 19, for identification.

(The document referred to was marked, for identification, "Respondent's Exhibit 19.")

By Mr. Hanley:

Q. Mr. Dyer, I hand you what has now been marked Respondent's Exhibit 19, for identification, entitled Flow Chart of Gasoline from Refiner to Consumer, and I will ask you if you have ever seen it before.

A. Yes, I have seen it.

Q. Did you have anything to do with the preparation of that chart?

A. Yes, sir.

Q. What?

A. It was prepared generally under my direction and with my collaboration for the purpose of showing the flow of gasoline from the refiner through the various channels and functions of distribution to the consumer.

Q. Does that graphically portray the system of distribution which you have just orally described in a general way?

A. Yes, sir.

Q. In your judgment, and from your experience, will you tell us what your opinion is as to whether or not the system of distribution of gasoline is an intricate, 1492 involved, and complicated one?

A. It is my opinion, and I think it can be demonstrated from the facts, that the distribution of gasoline is an intricate, complex, complicated system, with many functions, and many inter-relations of functions, and employing numerous types and methods of distribution.

Q. When was the chart, Exhibit 19, prepared, Mr. Dyer?

A. Well, it was completed in May of 1939, but we were working on it for some months prior to that.

Q. And will you tell us, please, the primary purpose of the preparation of the chart?

A. Well, the very complexity of the processes was the reason why we got it out. There were so many people in our organization, which is a large organization, who were not intimately acquainted with these various processes, and we made it up for the information of our own people. We have with our affiliated companies, men who are engaged in the production of crude oil, the transportation of it by pipe lines, and the manufacture of it at the refineries, and those men, of course, are interested in our marketing picture, and we made up this map largely for the information of those people.

Q. That is to say, Mr. Dyer, that the distribution of gasoline takes such varied forms, and is so complex that you, as a marketing supervisor, found it necessary to educate your own marketers, is that true?

1493 A. Yes, sir.

Mr. Hanley: I offer Exhibit 19 in evidence.

Trial Examiner Ballinger: Let counsel for the Commission examine it.

(The document was handed to Mr. Austin.)

Mr. Austin: I would like to ask just one question, please.

Mr. Hanley: Very well.

Mr. Austin: Do the size of these various rectangles in the chart enclosing the various names, do the various sizes here have anything to do with the amount of gasoline going through those?

The Witness: By no means. They are just accidental in their size, more or less to fit into the picture, and there is no attempt made in here to weight the value or importance of these particular channels.

Mr. Austin: I have no objection.

Trial Examiner Ballinger: Without objection, Respondent's Exhibit 19, for identification, is admitted in evidence.

(The document referred to, heretofore marked, for identification, "RESPONDENT'S EXHIBIT 19," was received in evidence.)

By Mr. Hanley:

1494 Q. Now, having covered to some extent, the A, B, C's of this distribution question, Mr. Dyer, I will again advert to the question I asked you a little while ago: basing your answer on your experience in the oil industry, what is the degree of prevalence of the use of jobbers or wholesale buyers of gasoline, bearing in mind your definition of such a buyer, throughout the United States, in the distribution of gasoline?

A. The jobber's place in the distribution of gasoline is portrayed on this Flow Chart, and I would say that the operation of the jobber, his importance is known and felt in every section of the country. With our company, we operate some 2000 bulk plants; we have some 500 jobbers. That is an indication of the importance of the jobber, as far as our own company is concerned. There are thousands of jobbers, and when I say thousands, I would like to be more precise, but there are no data available where I could give you a specific number. But my estimate based upon data which has been accumulated by sources that I have thought to be probably the most reliable, gives me the opinion that there are not less than 10,000 jobbers in the United States, and that there are probably a very much larger number, because of the fact that the census data on which many of these estimates are based includes a large number of concerns who were engaged in the jobbing of petroleum products in connection with other

1495 lines of business; for instance, lumber business, grain elevator business, grain and feed and coal and so on, where I am of the opinion that the predominating business of that particular marketer probably determined the classification in which he is put, and it is my own opinion, which I am sorry to say I can't support beyond what I have said, that there are probably 10,000 jobbers, and very probably many thousands more than that whose identity is more or less merged or submerged, you might say, in their other lines of activity.

Q. Now, with regard to the operations of large oil companies generally—when I say large oil companies, I mean companies, Mr. Dyer, which are generally comparable in size and operations with your own company; in respect of their distributing methods, what is the fact as to whether or not they use a substantial number of jobbers in a substantial portion of the territory in which they operate?

Mr. Austin: I don't object to that, your Honor, provided that witness will state what he means by a substantial number of jobbers. Otherwise—if Judge Hanley will amend his question.

Mr. Hanley: I can't put the figures in my question, because I don't know them. But I will ask the witness to try to meet the objection which counsel is making, be as explicit as I can.

1496 The Witness: May I ask that that question be read?

Mr. Hanley: I will withdraw the question and try and frame it so it won't be subject to any objection.

By Mr. Hanley:

Q. Is it or is it not true, Mr. Dyer, that oil companies, generally, employ the jobber system of distribution of gasoline in the United States, including Michigan and Detroit?

A. Yes, sir.

Q. Within your experience and observation, to what extent is that method used? And just amplify your answer to any degree you wish, based on your knowledge and experience?

A. Well, the jobber has a very wide, and I would say comprehensive place, in the market structure; he is found wherever petroleum products are marketed in this country. The degree of density, I don't believe very much from the Rocky Mountains to the Seaboard. It is a well-known and well-accepted method that has been in the industry ever since I have been in it. It has always been an important part of the distribution set-up, and I would say that almost without exception marketers of petroleum products, refiners of petroleum products use the jobber as a part of their distributing function.

Q. Since you have been acquainted with the oil business, Mr. Dyer, what is the fact relative to
1497 whether or not that system of distribution has been increasing or decreasing?

A. Well, ever since I have been in the industry and have had particular occasion to observe, and opportunity to observe, the jobbing functions closely, and that has been, I would say, some twenty years, the jobber has, I would say, grown in extent of numbers, and in importance, and I would say as of today that that trend has rapidly accelerated.

I would say that the jobbers' importance in the marketing picture is more inclined to grow today than it has at any time in my experience, and there are a number of reasons for that.

Q. What would you say as to whether or not it has increased in terms of money invested in jobber business?

A. I would say that it has increased in amount of money invested as well as in number of jobbers engaged in the industry.

Q. And the same question, Mr. Dyer, in respect of the number of persons employed by the jobber industry?

A. That number has also substantially increased.

1498 Q. Now, if I understand you correctly you have indicated that the jobber system of distribution was employed by oil companies generally?

A. Yes.

Q. Large and small; am I right about that?

A. Yes.

Q. There are some companies, Mr. Dyer, which are designated as being integrated companies; what is your understanding of that term?

A. Well, as the term is usually used in the industry, it means a concern that embraces a number of the functions in one ownership and management.

A completely integrated company would be a company which was engaged in the exploration for oil, the drilling for oil, the production of oil, the transportation of the oil by pipe line, tank ship, the refining of the petroleum into its various refined products, the marketing of those products through its own facilities and through jobbers and dealers, and all of the other avenues of distribution as is shown in the flow chart from the refinery to the consumer.

Q. Is it not true that generally speaking the companies which you have described are the larger oil companies?

A. Yes, sir.

Q. Are they not what some people sometimes loosely describe as major companies?

1499 A. Yes, I think that name applies.

Q. Now, in respect of those companies, do they not generally have well known brands of gasoline?

A. Yes, sir.

Q. Some of them are nationally advertised, are they not?

A. Yes, sir.

Q. Is it not true that many of those companies in many territories in which they market sell their gasoline directly to retail operators, filling stations I mean?

A. Yes, sir.

Q. Is it not true that they have bulk plant facilities, and a set up which enables them to make deliveries of gasoline directly to retail outlets which are operated by independent sellers of gasoline?

A. Yes, sir.

Q. What is the fact with reference to whether or not those companies—confining your answer now to this class of companies which we have just now been discussing—what is the fact as to the extent that that class of companies uses the jobber system of distribution?

A. Well, they generally employ the system of distribution through jobbers. It is a generally accepted method, and is not confined to large or small refiners, nor to integrated, semi-integrated, or any other division of the industry.

Q. Now, at the other end of the scale, Mr. Dyer, 1500 isn't it true that there are a large group of refiners which are just refiners? They just make gasoline?

A. Yes, sir.

Q. Is it not true that many of them have no distribution system of their own at all?

A. Yes, sir.

Mr. Austin: Judge, would you mind not making those questions so leading.

Mr. Hanley: I won't lead, if you prefer. But this witness is highly intelligent, he isn't going to let me trap him into any answer he doesn't think is the truth. But I will try not to lead so much.

What was the last question?

(The last question and answer were read by the Reporter.)

By Mr. Hanley:

Q. In respect of that class of refiner, what generally is the method of distribution that they employ?

A. The usual and ordinary method that a refiner having no direct marketing facilities of his own uses—is to either sell all or a part of his refinery output to other concerns in the industry who do have such facilities, or to sell these products to jobbing companies who buy the material from the refiner and resell it to resellers and to consumers and to their own service stations.

1501 Q. Is it or is it not true, in your judgment, that there are many, many millions of dollars invested in the jobbers' business in the United States?

A. Yes, sir; I know that there are many, many millions, many tens of millions of dollars invested.

Q. Is it not true that there are many, many thousands of individuals employed in the same industry?

A. Yes, sir.

Q. Now, with respect to all of these jobbers, whether they handle a branded product or whether they handle an unbranded product, what is the fact, generally, as to whether they engage in a direct retail operation as well as in the operation of wholesaling gasoline to other retailers?

A. Well, it's a very common and, I might say, usual thing for a jobber to be engaged not only in the resale to retailers, but also to own and operate retail outlets of his own.

I might say, just to amplify that, if I may, that a more or less typical jobber set-up, in the way of facilities, would be something like this: a bulk plant which has storage capacity for at least a carload of the respective grades of products that are handled in bulk and a warehouse which will accommodate a carload or at least a full truckload of lubricants in packages, from one to two or three motor vehicles, say two ordinary tank trucks, one of them a 1502 stake truck, a number of dealers, it may be large and small—and by dealers, I mean individual business men—who own and operate a service station to which or to whom the jobber resells the merchandise he obtains from his supplier and who, in return, retail directly to the consuming trade and usually from one up to, sometimes, a much larger number of retail stations which are owned by the jobber himself and to which he delivers the material from his bulk plant, and which he operates usually through employees, though sometimes these stations are, in turn, leased to dealers who operate a station.

Q. Is that typical set-up which you have described generally prevalent throughout the United States?

A. Yes.

Q. You live in New York, Mr. Dyer. What is the situation in that respect in New York City?

A. Well, the situation with respect to jobbers in New York City, I think, is probably a little bit unique. That is to say it is different from the pattern that we find in other parts of the country because, as you know, Manhattan, which is a part of New York, is an island. Long Island, which has the Boroughs of Brooklyn and Queens is also an island. It is necessary, to be in that market down there, to be able to accommodate very large in-bound cargoes of petroleum products and because of the aggregation of 1503 capital required, the jobber, as we encounter him out in this part of the country—he just isn't known, simply by reason of the fact that the average individual wouldn't be able to go into that market with such facilities, so that the jobbers down there are almost entirely jobbers of what you referred to as major company products. As a matter of fact, if they didn't have the major company products, they wouldn't be able to get any, in that particular market. That's what I meant by its being unique. The functions aren't any different, but it just so happens because of that structure I referred to that the jobbers who are in business are jobbers of the major companies' merchandise.

Q. Mr. Dyer, I am now going to use the term dual operation. I will mean by that an operation where a jobber or any gasoline supplier or seller indulges in both the retail operation directly and in the business of selling wholesale to a reseller. Is that clear?

A. I am not so sure that I do understand that point, Mr. Hanley.

Q. First: such a purveyor of gasoline sells through his own retail outlets?

A. Yes.

Q. Secondly: he also sells gasoline to other and independent retail resellers of gasoline; that's what I 1504 mean by the use of the word "dual." Is that clear now?

A. You mean is there a situation where a supplier, let us say—

Q. No. I am just trying to define the word that I want to use. I mean by the word "dual" that kind of an operation.

A. Where a man is engaged in two functions?

Q. In those two functions.

A. Yes, that is very common.

Q. That is clear to you?

A. Very common; yes.

Q. Do these jobbers in New York, which you have just been describing, engage in that dual operation?

A. Yes, sir.

Q. And I think you have already explained that it is a common practice for jobbers everywhere in this country to engage in that dual operation.

A. Yes, sir. I would say that is the usual situation.

Q. Is it or is it not true that sometimes these jobbers engage exclusively in a retail operation?

A. Yes, that is more rarely the situation.

Q. Does it happen with some incidence all over the United States?

A. Yes, you find them here and there.

Q. There are some situations within your experi- 1505 ence where some companies have observed the policy of not supplying retail resellers directly, where they have a jobber?

A. Yes. There are some companies who follow the practice and the policy in those areas in which they have established their own distribution, they do not sell to jobbers in that same area. It would be almost impossible, I think, to say what the balance is between those who do and those who do not, but I would say that the balance is pretty substantially on the side of those who do. Our own company does not. Where we have a jobber, we do not operate directly, or, conversely, if we are operating directly, we do not supply jobbers in that same marketing area.

Q. I don't think I understand just which practice you think may be the more predominant.

A. Well, I would say that the practice that is the opposite of our own practice is the predominating practice.

Q. That is to say, the dual operation by the supplying company is more predominant than the exclusive operation?

A. That is true.

Q. Now, assuming an exclusive operation of a jobber supplied by some company, what is the general practice as to whether that jobber engages in a dual operation in his business, in his own business, that is, operates as a retailer as well as a wholesaler?

1506 A. It is generally the practice that he operates in both capacities.

1507 Q. Suppose, Mr. Dyer, that in any given territory where a supplying company was selling to a wholesale buyer that for some reason that company were prevented from continuing to sell to that wholesale buyer what, in your judgment, would be the result in respect of the ability of that wholesale customer to obtain gasoline on the same or better terms?

Mr. Austin: I think that question is too hypothetical, your Honor. It involves too many questions of a credit rating, of the jobber customer's credit rating, and other brands of gasoline available, and all sorts of things.

Mr. Hanley: That's exactly what I want to prove: the availability of gasoline.

Mr. Austin: The question was, as I understand it, if one company refuses to further sell, or is prevented from selling to the jobber, what would be the fix the jobber is in, and could he get gasoline from somebody else. It seems to me it could be readily shown, and perhaps has already been shown, what sources of gasoline are available in the given territory.

Trial Examiner Ballinger: It would depend upon the territory; it would depend upon the financial condition of the jobber—many elements would enter into it, would they not, Judge?

Mr. Hanley: All right. I will withdraw the question and fix it up.

1508 By Mr. Hanley:

Q. Assuming this, Mr. Dyer: It has been proved in this case that there is a jobber in the City of Detroit known as Ned's Auto Supply Company which buys in the neighborhood of four to five million gallons of gasoline a year. The credit rating of that company is excellent. They have their own storage facilities. They have their own delivery trucks and distribution system. They have outlets at which they sell gasoline. They have been in the gasoline business for twenty-odd years. Their business has consistently increased right up until the present time.

That company is being supplied by the Standard Oil Company, the Respondent in this action.

Suppose further, that the Federal Trade Commission issued a cease and desist order against the Standard Oil Company from selling to Ned's Auto Supply Company on the basis of any differential below the ordinary tank wagon price to dealers. What, in your judgment, would be the ability of Ned's Auto Supply Company to obtain gasoline on a tank car basis and at a price less than the ordinary tank wagon basis?

Mr. Austin: I object to that, your Honor. In the first place I think it is irrelevant and immaterial and, in the second place, even aside from that I would object more or less, unless the witness could state that he had some means or facts at his disposal upon which he could base a
1509 reply, and I believe he hasn't.

Mr. Hanley: This man is the best qualified expert that has appeared in this case yet, Judge. I don't know what else you would want.

Mr. Austin: I am not questioning that but I don't think this man would contend that he knows, as an expert, of Ned's Auto Supply Company; what Ned's Auto Supply Company could buy in Detroit.

Trial Examiner Ballinger: Do you mean, Judge, could he buy from another company provided he continue in his dual operation? That's what you mean, is it not, by the question?

By Mr. Hanley:

Q. Mr. Dyer, I mean could that buyer, Ned's Auto Supply Company, on the basis of the facts that I have just stated, buy gasoline on terms less than the ordinary tank wagon price in Detroit? That's all I mean.

A. He would have no difficulty at all in obtaining a source of supply on the basis that you cite. As I mentioned before, our own company, because of its particular policy, wouldn't be interested in that business but—I don't know

Ned's Auto Supply, either; I might add that—but assuming the facts to be as he gave them to me, he would have no difficulty in obtaining supplies.

Q. And would it make any difference what he did 1510 with the gasoline; whether he sold it at retail or wholesale—

A. No, sir.

Q. —or threw it in the river?

A. Well, I wouldn't include throwing it in the river but I will go along to that point.

Trial Examiner Ballinger: Do I understand you to state that in the event a cease and desist order should issue against this Respondent, that Ned's Auto Supply Company would have no difficulty in going to another oil company and obtaining from them exactly that which the Federal Trade Commission had prohibited this company from delivering him?

The Witness: Well, my answer to that would be yes, if the same prohibition didn't extend to other marketers.

Trial Examiner Ballinger: Don't you know, as a practical man, that if it did, a proceeding would immediately follow against the company that did deliver to him?

Mr. Hanley: If your Honor please, I am sorry but I think I must object to your Honor's question, for this reason: That it places the witness at an unfair disadvantage is that it requires the witness to determine a matter of legal policy on the part of another oil company without the witness having been advised that if a cease and desist order were introduced against the Standard Oil Company in this case, that that cease and desist order would not be binding upon any other oil company in the world.

1511 Trial Examiner Ballinger: Yes, but this witness has had vast experience in operations and he knows, or at least should know, that that which one company was prohibited from doing, the Federal Trade Commission would prohibit another company from doing.

Mr. Hanley: Well, if your Honor please—and in explanation of my objection—the difficulty with this whole proceeding is it doesn't get that result. The only result that can be obtained in this proceeding is that there is: first, a dismissal of the Respondent, or; second, a cease and desist order which is binding only on the Respondent and the only penalty is a contempt proceeding and the only company that can be guilty of the contempt is the Respondent in this action. That is, your Honor, is one reason we are putting in this general character of proof.

We say this: That you have brought a proceeding here which is bottomed in inequity, in that you are doing a thoroughly inequitable thing and you are aiming at a point which is directly antagonistic to the purpose of all of the laws which the Federal Trade Commission is charged with administering; namely, promoting the public interest. If you prohibit us in this proceeding from selling gasoline as it is generally sold throughout the country and you turn our competitors loose, but put us in a particular pen, and restrict us—and there isn't any punishment for these
1512 other companies—you put us under a rule that nobody else in the industry is under and, your Honor, make no mistake about it, competition is such in the oil industry that any time any company can get one of our customers, they take him, and we are no lily in that regard, ourselves. We hire salesmen in our efforts to gain business.

Now, when you ask this witness what some other company would do, without explaining to him the consequences of their action, I just say it is an unfair question. The worst that could happen to another company that took over this business would be that a complaint would be filed and they would go through this kind of a proceeding and they would be prohibited in the future from repeating that operation and they would not be punished for anything that they had done in the past and if they can get five million gallons of gasoline a year, as long as they can get it, they just take it.

Trial Examiner Ballinger: The question, if it had been propounded to a witness of less experience and less intelligence than this witness, might have been considered unfair but I am sure this witness understood it, and I am sure understood the consequences of the acts of any other company which undertook to do that which the Respondent here was stopped from doing by the Federal Trade Commission.

1513 Now, with reference to other competitors, I take it it goes, of necessity, that if an order should issue against the Respondent company, and the other companies didn't follow suit and get in line, that proceedings would immediately commence against all violators.

Mr. Hanley: Well, I haven't your Honor's sanguine attitude toward that. I don't think we would complain so much if the rule were universal. I am just afraid it might not be. I think, however, this witness has answered that question "Yes," that there would be other suppliers who would take on the business.

By Mr. Hanley:

Q. Is that right?

A. Yes—and I would like to explain to his Honor that when I answered that question—I am not an attorney, by the way—I had in mind the intense competition in our industry. There are many engaged in it. It is the business of—a business of intense competitive effort. There is a constant struggle going on to obtain new business and, particularly, business of large volume with accounts that can pay for the merchandise which they get, and what I had in mind in the question put to me was the idea of the availability of this merchandise at these prices, thinking of the condition as I know it every day when people are out struggling to get that very type of business.

1514 As I say, our company wouldn't take it, because it conflicts with a fundamental policy of our marketing problem, but I realized there are many hungry mouths in the oil industry that would be wide open for, generally speaking, that type of business.

I am sorry I conveyed the impression to you that I would be attributing motives to other people in the industry that they would go out and violate the law. That never even entered my mind when I answered the question. It would be an impertinence, had I had that in mind, but—

Trial Examiner Ballinger: You still think there are some in business who would take the chance?

The Witness: I think that is a realistic viewpoint. I think that is a realistic viewpoint based upon observation. I say that regretfully, too, because I am proud of the industry and what it has done, but I think that is a realistic answer.

By Mr. Hanley:

Q. Mr. Dyer, we have been discussing jobbers and tank wagon buyers and so on, and I haven't developed with you the question of price. Is it or is it not true that these so-called jobbers or wholesale buyers ordinarily buy at some price less than what is commonly known as the tank wagon price?

A. Yes, sir. I think I can explain that in this way:
1515 those people—when I refer to these jobbers and bona fide jobbers, I refer to the people in the industry who perform a certain function of taking this merchandise away from the refinery and delivering it either to resellers or to consumers through their own stations, and they are performing a function to which a cost attaches. In other words, a refiner who is marketing through a jobber in a given area is having that jobber perform a function in the handling of this merchandise from his refinery to the ultimate consumer that must be done at a cost. If he undertook to do it direct, it would cost him a certain amount of money, depending upon the circumstances in the case. So that every jobber who is in business buys at a price less than the price at which he resells it. Otherwise he couldn't stay in business.

Now, that price varies throughout the country. I couldn't give you market quotations, but I would say that generally speaking it will range from a cent and a half—very frequently below that, although under some conditions it has been less—and it will run up in some parts of our country today to 2½¢.

Q. In your judgment a cent and a half is about as low as the margin ever gets?

A. That is just about low ebb. There have been cases when it has been less than that, but it was due to
1516 immediate market conditions. I would say that a cent and a half is rather on the low side.

Q. Would it follow, in your judgment, Mr. Dyer, that the general average of the size of the margin throughout the United States will be something above a cent and a half?

A. Yes; it would be 2¢ or more, if you struck averages. It would be above 2¢.

Trial Examiner Ballinger: What would the maximum be?

The Witness: The maximum, your Honor, that I know of at the moment, is 3¢. 2½¢ is not uncommon in certain sparsely populated parts of the country. 2¼¢ is the generally prevailing difference that you will find along the Atlantic Seaboard. In the interior here frequently it runs around 2¢ or a little bit less or a little bit more.

Trial Examiner Ballinger: Depending upon the population, does it not?

The Witness: Yes; usually in a populous area the margin will be less, because really the employment—you might say the employment of a jobber by a marketer who is going from his refinery to the consumer is based more or less on what it would cost him to do the job himself. In populous areas the cost of marketing is usually less on a per gallon basis. So that you will find jobber margins in populous areas usually less than in less populous 1517 areas. And the thing that keeps it more or less in equilibrium is if the refiner is selling through to the consumer, employing jobbers, and he finds out he can perform that function at a less cost himself, he will do it himself.

By Mr. Hanley:

Q. Mr. Hanley, suppose that for some reason the refiners of the generally known brands of gasoline were prohibited from selling to jobbers on a jobber basis in territories in which those suppliers also sold on a tank wagon basis; in your judgment what would be the result on the jobber business?

Mr. Austin: Would you mind having that question re-read, please?

Trial Examiner Ballinger: The reporter will please read the question.

(The question was read.)

Mr. Austin: I don't think that is based on any set of facts in this case; it is hypothetical and doesn't relate to any situation present in this proceeding. I object to it.

Mr. Hanley: It is the hypothesis that your Honor assumed would occur if there were a cease and desist order entered in this case; namely that these suppliers would respect such an order, notwithstanding the order was not entered directly against them. Now, this witness is an 1518 expert and is entitled to testify as to what the result would be on the jobber business if these jobbers could not select their suppliers.

Trial Examiner Ballinger: The objection is overruled. The witness may answer.

A. Well, in many—or I would say in some cases, it would mean that the jobber would simply have to go out of business; he would have no source of supply.

Trial Examiner Ballinger: Wouldn't it, as a matter of fact, mean that he would have to elect whether he would stay in the retail business or whether he would confine his business exclusively to that of a jobber?

The Witness: Well, he no longer would be able to continue to function in the—

Trial Examiner Ballinger: Dual capacity?

The Witness: In the matter which he had before.

By Mr. Hanley:

Q. Mr. Dyer, irrespective of his decision as to how he would operate his business, he still couldn't buy from one of these makers of the well known brands of gasoline unless that refiner also elected as to which class of customers it would sell; isn't that true?

Mr. Austin: Now, that is why I objected to the question. The question was so broad, you see, that it covered—there was a possibility which isn't concerned in 1519 this case at all, which refers to an order preventing an oil company from selling to a jobber, where it also sells to retailers in the same territory. And that question isn't involved in this case, except where the jobbers may resell at a lower price, or where the jobber resells at retail. But unless you put in both of those qualifications, the question is meaningless as to this case.

Trial Examiner Ballinger: The Examiner was under the impression that counsel for Respondent had included both stipulations in his question.

Mr. Hanley: Well, I moved for two hours, your Honor, trying to get one of those situations dismissed yesterday morning, and the Government said it belonged in the case. Now, I think I am entitled to meet it.

Trial Examiner Ballinger: Proceed.

Mr. Hanley: Will you read the question, please?

(The question was read.)

Mr. Austin: I object to that as a leading question, your Honor.

By Mr. Hanley:

Q. Is it or is it not true?

A. Well, I must confess I am a little bit bewildered on that question. I am not sure I know precisely what you mean.

Mr. Hanley: I will withdraw the question and reframe it, Mr. Dyer.

1520 By Mr. Hanley:

Q. If these makers of the better known brands of gasoline were prohibited, for any reason, from conducting the dual operation, as that has been explained, and declined, for any reason, to sell to jobbers, would that or would that restrict the business of jobbers, irrespective of how one jobber might conduct his own business with reference to whether he conducted a dual operation or otherwise?

1521 A. Yes.

Q. Now, will you amplify that and explain why.

A. Well, I think the most convenient way to explain it will be to refer to this situation that I spoke of as obtaining in the New York area. In that area, because of the conditions that I referred to, the only—well, I won't say the only, but the completely preponderant market there is served by these companies to which you refer. And if they were precluded for any reason from selling to a jobber, the jobber would have no source of supply. And that was the reason why I said yes. He wouldn't have an available source of supply.

Trial Examiner Ballinger: Wouldn't that of necessity force the jobber to elect as to which line of business he was going to continue in?

The Witness: Well, it would force him out of business as a jobber, your Honor.

Trial Examiner Ballinger: Well, would it necessarily, if he saw fit to give up his retail end of it?

The Witness: Well, to that extent he would be out of what is now considered a part and parcel of the jobbing function.

Mr. Hanley: Let me understand your Honor. Is it your Honor's position that it is the character of the jobber's business that is controlling here, rather than the character of the ~~Respondent's business~~?

1522 Trial Examiner Ballinger: You have this situation present, where this Respondent is selling to certain customers engaged in both the retail and the jobbing business.

Mr. Hanley: Right.

Trial Examiner Ballinger: (Continuing.) At a lower price than he is selling to those, his other customers, engaged in strictly a retail business.

Mr. Hanley: Yes, sir. Now, is it your Honor's position—

Trial Examiner Ballinger: Now, that is what is complained of.

Mr. Hanley: Is it your Honor's position that if these jobbers were not engaged in any degree in retail operations, that there would be no basis for this complaint?

Trial Examiner Ballinger: I don't know that it is proper for me to attempt to pass on that. But I take it that if the retail end of it was eliminated this complaint would never have issued.

Mr. Hanley: On the basis of the statement of the Examiner, I renew the motion to dismiss from this action any further consideration of the transactions between the Wayne Oil Company and the Stikeman Oil Company on the one hand, and the Respondent on the other hand.

Trial Examiner Ballinger: The motion is denied.

Mr. Austin: I would like to amplify—rather, make 1523 a statement on behalf of the Commission.

Your Honor said that possibly if there had been no retail selling by these jobbers this complaint wouldn't have issued. That is not the only thing involved in the complaint. It is, perhaps, the principal thing involved, and in point of size of transactions involved, but the sales by the so-called jobbers to the dealers are involved to the extent that some sales may be made by the jobbers at a price below the posted tank wagon price of the Standard Oil Company.

Trial Examiner Ballinger: That naturally followed.

Mr. Austin: That is the amendment to the complaint which we just made.

Trial Examiner Ballinger: That was the natural consequences of the first preferential—of the first step; namely, the preferential rate obtained by these four parties engaged in these dual operations.

Mr. Austin: That's right. But even if one of those jobbers was not involved in the dual operation—in other words, one of them sold, as the Stikeman Oil Company does now, sold only to other dealers, the complaint would still apply if it were shown that the Stikeman Oil Company was selling to some of its dealers at a lower price than the Standard Oil Company posted tank wagon price in Detroit.

Mr. Hanley: That hasn't been shown.

1524 Mr. Austin: I know. I am not speaking—I am speaking generally here, because there has been some attempt to outline what the case covers. I want to make this statement very definitely, though, that insofar as a

jobber resells in territory, such as Detroit, where the Standard Oil Company sells direct to retail service stations, if the jobber also sells to retail service stations in the same territory, and at a price equal to or higher than the posted tank wagon price of the Standard Oil Company, then so far as this complaint is concerned there is no allegation of any violation of the law in that method of doing business.
1525 And I think that is what the Trial Examiner had in mind when he says that the jobber could remove himself from any prohibition that might be issued in this case by restricting himself to a jobbing business.

I am only adding to what the Trial Examiner has said by saying if he restricted himself to a jobbing business and did not sell to his customers at a lower price than the oil companies sold directly to its customers in the same territory.

Mr. Hanley: On the basis of that statement, and on the basis of the Examiner's statement, what is the resistance to our motion to dismiss the Wayne Oil Company and the Stikeman Oil Company here?

Mr. Austin: They are not Respondents. I don't understand the motion.

Mr. Hanley: Well, the motion was to eliminate from this proceeding any transactions between the Stikeman Oil Company and the Wayne Oil Company, on the one hand, and the Respondent, on the other hand.

True, they are not charged as Respondents, but you seek to prove us guilty because of certain transactions we had with them.

Now, you say those transactions are all right. If they are all right, why leave them in the case?

Trial Examiner Ballinger: The only power the
1526 Examiner would have would be to strike out all testimony relating to the transactions.

Mr. Hanley: In view of the statement of the Examiner, I now move to strike all of the testimony in the record relating to transactions between the Stikeman Oil Company and the Wayne Oil Company, on the one hand, and the Respondent, on the other hand.

Mr. Austin: Well, I would just as leave your Honor would rule on that. But let me say that I rather recall the fact that both of those companies are admitted to have operated retail stations themselves since 1936. So I don't—

Trial Examiner Ballinger: The motion is denied.

Mr. Hanley: Is there any unanswered question on the record, please?

(The record was read.)

By Mr. Hanley:

Q. Mr. Dyer, irrespective of the type of business that the jobber chose to engage in, would not that restriction materially confine him in his ability to select his supplier?

A. Will you read that question, please?

(The question was read.)

Q. Maybe I am confusing you by the word "restriction" in that question, Mr. Dyer. I mean by restriction the
1527 prohibition upon these better known branded companies to sell to the jobber.

A. Well, I would say it would impose a very definite restriction upon him; if part of his existing functions were taken away from him, to a large extent his usefulness as a market outlet might be impaired.

Q. Now, Mr. Dyer, directing your attention to another line of thought—

Mr. Austin: Judge Hanley, since you are stating you are moving to another line of thought, I want to make one statement here again with reference to the last question and answer. Because I think it is important, and it seems to me that there has been rather consistent attempts here to create an impression by questions and answers that have been going into the record that there is an effort by the Commission in this case to obtain an order which would prohibit the Standard Oil Company from selling to jobbers in territories where the Standard Oil Company also sells to retailers. And I wish to state for the benefit of the witness and all concerned, that there is no attempt in this case to obtain an order which would prevent Standard Oil Company from selling to a jobber in territories where it also serves retailers.

Mr. Hanley: You mean if we sold them in tank wagon?

1528 Mr. Austin: Yes, where you also serve retailers at tank wagon prices.

Mr. Hanley: You say it is all right for us to sell a bulk buyer who buys four or five, six million gallons a year and has his own storage and runs his own set-up, so long as we sell him at a tank wagon price?

Mr. Austin: No, I didn't say that. There is no attempt here to prevent the Standard Oil Company from selling to jobbers at a so-called jobbers' differential or functional discount of a cent and a half, or whatever it may be currently in territories where at the same time he sells to retail dealers at its posted tank wagon price, if—or so long as—the jobber engages solely in the business of reselling the gasoline that he buys to his sub-dealers or retail dealers, at a price as high as the Standard Oil Company's posted tank wagon price. In other words, there is no conflict, as I see it, in the issues of this case between a company selling to jobbers and the retailers in the same territory, at different prices, so long as the jobber does not engage in the resale of that gasoline at retail, nor does he pass along any of his jobbers' margin to his retail dealer customers.

Mr. Hanley: On this statement of counsel for the Commission, I renew the motion to strike from the record all testimony relative to the transactions between the Wayne Oil Company and the Stikeman Oil Company, on the 1529 one hand, and the Respondent, on the other hand, and to dismiss from further consideration in the hearing, and in the Complaint, all reference to any transaction between the Stikeman Oil Company and the Wayne Oil Company, on the one hand, and the Respondent, on the other hand.

Trial Examiner Ballinger: Without an opportunity to examine the record and know what there is in the record, the Examiner couldn't entertain the motion, and it is, therefore, denied.

Mr. Hanley: I think there is no question now, Mr. Dyer.

By Mr. Hanley:

Q. From your general experience and observation of marketing generally in the United States with reference to all consumer commodities, are you able to state whether or not the jobber's system of distribution is commonly used in connection with the distribution of a very great many consumer commodities?

A. Yes, I know that to be a fact. It is common and usual and a widely accepted means of distribution of all commodities. Particularly consumer goods.

Q. And is it not true that the jobbing of gasoline as you have described it today is generally of the same type and character as the jobbing of a great many consumer commodities?

1530 A. Yes, in a broad, general way.

Q. Mr. Dyer, what are some of the reasons, based on your experience and in your judgment, why the jobber belongs in and fills a place in the distribution of oil products?

A. Well, I think there are a number of reasons which make the jobber, or that puts the jobber in a peculiarly advantageous position in the marketing system or marketing structure. I think it can be said and proven that a local business man who is engaged in the jobbing business, who has reasonable capacity and reasonable and adequate capital behind him, enjoys a number of natural advantages which are just almost inalienable, that nobody can take away from him, and under present conditions, he enjoys certain artificial advantages, you might say, in the fact that there are many laws to which he is not—he is either not amenable or not answerable, which gives him a substantial advantage in many cases as against a large company operating as his competitor. I don't mean to say that every jobber takes advantage of all of these natural advantages that he has. I don't mean to say that he has the competency always to do it, or if he has the competency he has the will and energy to do it. But I mean he does have certain natural inherent advantages in his set-up that put him in a very favorable position in the marketing scheme.

And I would like to enumerate some of those ad-
1531 vantages.

Q. I wish you would, please.

A. I believe they are self-evident to anyone who has had any experience and any observation of marketing generally in our country.

In the first place, the local jobber is usually a long-time citizen in the community, went to school there, belongs to the churches, belongs to the societies, and the clubs, and the organizations, and he is a part and parcel of the community in which he lives. Due to that fact, if he is a business man with any capacity at all, he knows local values thoroughly; if he goes to buy a piece of property, he can buy as advantageously, and usually more so, than some large company that comes in from the outside. If he is engaged in the leasing of property, he can usually negotiate a more advantageous lease. I can say, as a matter of fact, based on my observation, that ordinarily he doesn't have to pay as much in taxes on similar properties, due to the fact that he is on the job there watching his interests day in and day out, and the absentee landlord frequently doesn't have the same care in watching those things.

He is usually able to make a better selection of his employees. He is able, by reason of his proximity to them and his association with them, to get a higher degree of 1532 loyal and cooperative response. He frequently doesn't have to pay the general market level of wages; and frequently doesn't pay it. He frequently works his employees longer hours than his large competitor. He is able to use to the very utmost the considerations of prestige and reciprocity, and to use his interests in other lines of activity to help promote his oil business.

And just to sum up those advantages which I think are natural and inherent and inalienable, that just can't be taken away from him, if he recognizes them and takes advantage of them, there is the fact that he is not amenable or answerable to many laws. For instance, chain store tax laws. Now, the laws apply evenly where they apply. But they don't start to apply until you get over a certain number of stations, so that actually although he is amenable, he isn't answerable to it, because ordinarily the number of stations he has wouldn't make ~~him~~ amenable.

The Social Security Tax doesn't apply to many a jobber operation because of the small number of employees that he has.

The Robinson-Patman Act, which has been the bane of most marketers' lives since it was passed some years ago, rests very lightly upon the local independent jobber.

I probably elongate that list, but those of us who are familiar with the complex laws that effect large business today know that there is a disproportionate burden 1533 put upon the back of large aggregations of capital operating over large territory that in no way touches, and really confers a preferential advantage upon a local business man.

I don't think I am doctrinaire on the idea at all, but I believe the jobber's place in the business is there simply because it is entitled to be there. It isn't a hypothetical situation. He always has been there; he is here today, in a very important fashion. As I have said, many of the trends indicate that his place in the picture in the future is going to be more important than in the past.

I don't know the issues in this case very well. I have

amplified a little more than I was asked to do, because I would like to see this record freighted with something to be said upon the contribution which he is making to this industry. And, furthermore, I don't think we should overlook the fact that the public has a very real interest at stake here, because, as I said, the jobber comes into the picture, and has to stand on his own bottom; he has to do a better job than some large aggregation of capital can do itself directly. And when he does that job well, and when his costs are on such a basis that he is able to affect the price structure, he makes a contribution there in our competitive system in the matter of keeping the equilibrium of prices that is a very genuine and very real con-
1534 tribution. And I think that in any discussion we have of a jobber's place in the picture, we should have that fact in mind.

Q. Do I understand you to mean, Mr. Dyer, that these advantages which the jobber has enables him, in your observation, to reduce his costs and thus pass on the benefits of lower prices to the public?

A. Yes, I mean that is in the chain of consequences.

Q. What is the fact in your observation as to the effect of that kind of competition upon a large supplier of gasoline operating in the same territory, even though it be the same supplier that is supplying the jobber?

A. Well, I would say that it is self-evident that where jobbers, for one reason or another, are able to translate into lower prices advantages which they have in costs, or regardless of what enables them or what motivates them in reducing their price, that over the long pull the market in that territory must—is going to be affected. And everybody who is in the market is going to feel the effect of that condition.

Now, it is difficult to measure it over a short range, because there are too many other factors. But projecting that over a period, there is no question but that the question of prices is very substantially affected by the operations of jobbers.

Q. In your judgment and observation has that in
1535 the past, and does it now redound to the benefit of the public?

Mr. Austin: I object to that question, your Honor. In the first place, I don't know whether the witness is talking about the jobber cutting his price to the retailer or whether he is talking about a jobber who is a retailer. In the second place, he talks about benefiting the public by some method of lowering prices, and unless we are talking—at least, I would like to know whether we are talking about wholesale or retail. I don't know that, and I don't think the witness knows it.

Trial Examiner Ballinger: Objection sustained. Counsel will reform the question.

Mr. Hanley: What was the last statement of the Court, please?

(Last statement of the Trial Examiner was read.)

By Mr. Hanley:

Q. What is the fact, Mr. Dyer, in your observation and experience, with reference to whether or not the presence of the jobber system in the gasoline distributing picture has any effect of lowering prices of gasoline to the ultimate consumer of gasoline?

A. Well, I would say that it has made a contribution to that end. The facts of the matter are, the presence of the jobber in the picture from the public standpoint, in my opinion, is a very wholesome and a very useful
1536 influence in the pattern of prices over a long pull.
As I say, you can't measure that from one day to another. But if you have some vigorous, aggressive jobbers—and many of them are—engaged in the oil business, and taking advantage, even to a partial extent, of these undoubted advantages, that they have, marketing on a lower cost basis, and bidding for business, either from the retailer or from the dealer, on a lower price basis, that over the long pull there is a substantial contribution to the public in the fact that the public's interests are subserved by having a free competitive market based on open competition.

1537 Q. Now, to summarize, Mr. Dyer, when you used the word "jobbers", in the answer to this last question, and as you have used that term throughout your testimony, do I correctly understand that you mean the type of wholesale buyer that you defined in the early part of your testimony who engages in the dual operation of selling both at wholesale to other retailers and also directly operating retail outlets?

A. Yes, sir.

Q. Does it apply also to those wholesale buyers or jobbers who engage exclusively in operating their own retail outlets?

A. I would say yes to that, also.

Trial Examiner Ballinger: We will take a two-minute recess.

(A two-minute recess was taken.)

Trial Examiner Ballinger: We will come to order.

By Mr. Hanley:

Q. Mr. Dyer, just another question or two.

You will recall that in the course of your examination the operation of what is known as Ned's Auto Supply Company in Detroit was explained to you.

A. Yes.

Q. And it was stated that that organization is engaged primarily and almost exclusively in the retailing of gasoline through its own outlet. Its supplier is the Standard Oil Company, the Respondent in this action, and
1538 Ned's sells the brand of products of the Standard Oil Company and has delivered those products for many years.

Assuming that a cease and desist order were entered against the Standard Oil Company preventing the Standard Oil Company from selling to Ned's Auto Supply Company and assuming that such an order were either introduced against other refiners handling well known brands of gasoline or that, as a matter of policy, other refiners of well known brands of gasoline refused to sell Ned's on the tank car or jobber basis on which that customer is now buying; in your judgment, and based upon your experience and observation of the oil industry, what would be the situation of Ned's Auto Supply Company with reference to their ability to obtain gasoline competitively?

A. May I ask you to amplify that question to the extent of telling me what you mean by "competitively"?

Q. I mean by that, what would be their situation in respect of their ability to compete in an open market as a retailer of gasoline to the degree that they would be able to compete if they had the right and opportunity to select their own supplier?

A. Well, I can say they would be affected. I don't know that I could presume to say the degree to which they would be affected because I don't know what other materials they might obtain. I am assuming that under this question that they would not be able to purchase from

any supplier in tank cars? Is that pre-supposed in
1539 this: That they could not obtain from any supplier in tank car lots?

Q. Suppose they could obtain in tank car lots. Who, in your judgment, would be in a position to sell them in tank car lots, assuming that the makers of the better known brands of gasoline were prevented from selling?

A. Well, I am not sure that I precisely understand that question.

Q. I will state it this way: Is it or is it not a fact that under that situation a purchaser such as Ned's would be largely restricted to buying from small refiners or buying an unbranded type of gasoline?

A. Obviously. If he couldn't buy the branded gasoline, he would have to buy unbranded gasoline.

Mr. Hanley: You may take the witness.

Cross-Examination by Mr. Austin:

Q. Mr. Dyer, supposing that the Federal Trade Commission did issue an order against the Standard Oil Company prohibiting it from engaging in some practice in connection with the sale of gasoline, such as prohibiting it from selling at tank car prices to purchasers who resold at retail and to the extent that they resold at retail. Then suppose that that order was in full force and effect and had been upheld by the courts. Would the Sinclair Oil Company then, not being subject to such an or-
1540 der, then proceed to engage in that same practice?

Mr. Hanley: That is objected to as calling for a conclusion of the witness for which no foundation has been laid and asking for the policy of the company concerning which it has not been demonstrated the witness has been qualified to testify. It has to do with a future situation and involves elements and questions of policy that have not been adequately expressed in the question.

Mr. Austin: Well, that is exactly the very similar question to what was asked by Judge Hanley, I believe,—I believe he asked the witness whether if the Standard Oil Company was prevented from selling to such a reseller, whether other oil companies wouldn't take the business.

Trial Examiner Ballinger: This witness is an exceptionally capable witness. The objection is overruled. He may answer, if he can.

Mr. Hanley: If you can.

A. Well, I think that I explained before that our company, which markets directly in this market in which Ned's, I understand, markets, as a matter of practice does not now and has not sold to jobbers in the territory in which it markets directly, so that if our policy continued to be that—and I know of no reason why it should not continue—we would not sell Ned's or any other jobber
1541 in this Detroit market as long as we operate directly.

By Mr. Austin:

Q. That is why I framed the question that way, Mr. Dyer. I am not referring to the Detroit market. You do sell to jobbers in some markets, don't you?

A. Yes.

Q. And you said a jobber may be someone who sells at retail?

A. Yes.

Q. You said if another company were prohibited from selling in a territory where you do sell to jobbers engaging in that practice, would your company then attempt to get that business?

A. Where our company was not prohibited?

Q. Where you had not been prohibited but where you knew there was an order prohibiting that practice by someone else?

A. I don't believe that I can answer that question. I am not competent, based upon my experience, to tell what the effect upon us, legally and morally, would be, if there was a rule of some character that prevented another marketer from selling to a particular account. I don't think I have ever encountered that and I don't believe I am immediately prepared to give you the answer to that. I would like to, but I can't answer it.

Q. Didn't you say a while ago other oil companies would rush in and get that business?

1542 A. I said I was afraid they would and I rather regretted that, regretted to make that admission. I know from a realistic standpoint in the industry that there has always been somebody available to take on every piece of business available and it has always been a rea[illegible]ussel between competitors for existing outlets.

Q. Are you referring to a case where there has been an order of the court or the Federal Trade Commission declaring a practice unlawful?

A. That is a point where I do not have the experience. I do not recall a single case where any company has ever been prohibited from satisfying any function in the industry. It would be wholly unprecedented, I think. I can't recall any such case.

Q. Then do you know whether or not the retailer who was buying as a jobber would be able to buy as a jobber from some other company if his supplier were prevented from selling him?

A. Well, if the same prohibition applied to others, I would say no.

Q. You would say no to what?

A. In other words, let us take the case of the Standard Oil Company. If they were prohibited and the same law applied to everybody else who was marketing gasoline, and it was enforced against them, I doubt that the
1543 business would be taken on by anyone else.

Q. By "law" you mean the law under which the order was issued, do you not?

A. I am not competent to deal with that question; really.

Q. Are you prepared to say that the Sinclair Oil Company would engage in a practice which had been declared unlawful by an order of the Federal Trade Commission?

Mr. Hanley: That is objected to as unfair to the witness; calling for a conclusion; that no witness ought to be asked to testify to.

A. I have no objection to saying our company does not violate the law and will not violate the law; hasn't any intention of violating the law, but to make the specific application you asked me to make, I must protest that I am just not competent to do it. There has been no body of experience that I know of, or any such prohibition issued and it would be a wholly unprecedented thing for a marketer to be prohibited from selling anybody in the chain of the market. While we have refrained from selling jobbers in the territory, I would feel very much astounded if we were told, by law, we couldn't sell.

Q. Would you feel astounded if you were told you couldn't sell to a retailer at a lower price than you sold to others?

A. I have already been told that. That is already the law of the land.

1544 Q. We are talking—here, at least, you have been talking about jobbers who may be solely retailers.

A. I have been talking about people who are primarily in the function of jobbers.

Usually the business of becoming a jobber is a matter of evolution.

Many a jobber started off with a curb pump, or with one service station. Then he has gone into the business, usually, of establishing storage for taking carloads of supplies. When he does that, he invades the function of the jobber but he doesn't give up his retailing; he continues to be a retailer. He continues to be a jobber and the pattern of experience in the industry is that, almost without exception, the jobber is a retailer. He is—to borrow your expression—in a dual capacity. He functions in a dual capacity. That is just the fact. Whether it might be challenged, or otherwise, that is the basis on which the business is built. That is the basis on which most jobbers operate.

Q. Would you consider that it would be very upsetting, in any way, to the distribution of gasoline which you have described, if one of these so-called jobbers, exercising his dual function, was required to pay a higher price for the gasoline he resold at retail than for the gasoline he resold at wholesale?

1545 A. Yes, I would say that that would have a very serious effect.

Q. That would affect only the retail business of that jobber, wouldn't it?

A. It would affect his whole function in this dual capacity. I don't know how you would make any general rule that would enable you to separate a function that has started out and grown into a new function.

Q. Well, is the retail business of that jobber, the sale of gasoline at a retail service station, is that a part of his jobber's function?

A. As such, as a retailer, but if he is also a jobber he is functioning in a dual capacity. In other words,—I don't know that I follow you.

Q. Just let me pursue that a moment.

When you talk about a dual capacity aren't you talking about two functions? Isn't that what you mean by dual capacity?

A. Yes. There are two functions, both of which have become integrated to such an extent that, as my definition earlier indicated, they are really referred to, generally, as one function. In other words, the jobber who follows the definition, that, I would say, would accurately define a jobber, is one who is a buyer in tank cars and who resells to resellers and who also delivers materials to his 1546 own retail station and retails them through his own retail station.

Trial Examiner Ballinger: Could you tell me how long that latter definition has been in use?

A. Well, it was approved by the Federal Trade Commission in 1931 and as a matter of fact, that has been the fact as far back as I can recall, but it has had that definition, as I said, has had two sanctions, you might say, or two blessings put upon it; one by the Federal Trade Commission and the other by the approval, generally, of the industry and by the President under the NRA. I think it has always been the fact.

Q. Ordinarily a jobber was known as a wholesaler, was he not?

A. That term has been used. I don't think it is used so much in our industry, though.

Q. A wholesaler is just the reverse of a retailer, isn't he?

A. Yes—not exactly the reverse, but it is certainly a separate function. They both sell, but they sell in different functions.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Austin:

Q. You stated that a jobber performed a very 1547 definite function or, rather, the jobbers in the exercise, in the carrying out their link in the chain of distribution, perform a function which is a public contribution, is that right?

A. That is my opinion, yes, sir.

Q. Now what function does the jobber perform to the extent that he sells through retail service stations?

A. Well, where he sells through a retail station he has performed two functions in the industry. He has performed the function of getting the material from a refinery to a bulk plant and he has performed the function, beyond that, of getting the material to a service station and he has performed the function of retailing the material through the service station.

Q. Well, he could get his delivery at his retail service station directly from his supplier, couldn't he, without operating the bulk plant?

A. He could, yes.

Q. Well, what public benefit is there in the fact that he operates a bulk plant and takes his own delivery instead of getting his deliveries from his supplier by tank truck right at his service station?

A. Well, he performs that very function.

I think I can illustrate it in this way:

Assume I am a refiner in Michigan and I am making gasoline and I would like to have my gasoline sold at
1548 retail stations in Detroit. I might come down to Detroit and pick out some man who looked like he was competent and well-financed and ask him if he wouldn't provide a bulk plant down here, go into the jobbing business and take these materials that I was manufacturing; handle them through his bulk plant and, in turn, deliver them to the service station. Now that is the function that the jobber plays in the illustration that you just make.

Q. Now suppose you already had your own bulk plant here in Detroit and were delivering through your own trucks, through numerous retail service stations. In that case what advantage is there to you to have the one man who operates a retail service station buying through his own bulk plant instead of buying direct from your trucks?

A. Well, one of the considerations in distribution is volume distribution and it is not likely that a man who just operated one service station would provide for you the volume of outlet that a man who had a bulk plant and, possibly, several stations of his own and who is serving, in turn, many dealers. Many times that business is already built up so that if you wanted to expand your business without a great outlay of capital, you would want to take on that man even though he was carrying on a function that you were carrying on in the same market.

Q. Then it is just a matter of getting business from an existing source, is it not?

1549 A. In that illustration I mentioned, that would be the case.

Q. What I want to get at is what different function this jobber performed by selling at retail than any other retailer who buys in the tank wagon quantity, so far as his function in the operation of his retail stations? Isn't he performing a retailer's function, insofar as he sells at retail?

A. Yes.

Trial Examiner Ballinger: Every instrumentality that assists in getting the gas to market is a public benefactor, isn't it?

The Witness: I think so, and the better the job is done and the more economically it is done, the more it contributes to the public benefit.

By Mr. Austin:

Q. Do you know, Mr. Dyer, what proportion of Sinclair Gasoline is sold by the Sinclair Oil Company to jobbers?

Mr. Hanley: May I have that question, please?

(The question referred to was read by the Reporter.)

A. I can make a guess that is not far off. I would say 20 per cent.

Q. And I understand you to say that where you sell to jobbers you don't sell direct to retailers, in the same territories?

A. That is correct. Where we are operating 1550 directly, we do not sell to jobbers.

Q. Do you know whether that percentage is representative of the general percentage of gasoline of other major oil companies?

A. It is pretty much on the same order, yes. That is, if you take the average and throw it all together. We might top the average, somewhat, but—you see I have no reliable data on which I can base what other people are doing but I have had occasion to refer to information that pretty well substantiates, to me, that the average in the country of business going through jobbers is around 17 per cent. That would be, I think, a reliable indication. It probably might be more than that, if we could isolate all of these jobbers that are submerged, as I explained, in other businesses, but where you can reach out and lay your hands on jobbers and check figures for the jobbers, the average throughout the country is 17 per cent and ours, I would say, 20 per cent.

Q. Does that 17 per cent include jobbers that purchase from the refineries you spoke of that don't have their own retail distribution system?

A. Yes, sir.

Q. Then if you were to be asked the percentage of the gasoline of major oil companies which sold to jobbers, I assume, of course, that all so called major oil companies have their own means of distribution down to the retail station?

1551 A. Yes.

Q. I think that is true; isn't it?

A. Yes, sir.

1552 Q. And taking the case of a major oil company which does not have your policy of not selling to jobbers and direct to retailers in the same territory; in other words, a company which, wherever it operates, sells direct to retailers, wouldn't the percentage of its gasoline to jobbers probably be lower as a result of that different policy?

A. Yes. You have pretty nearly every different shade in the industry from those companies who, as a matter of fact, market their material directly. I think there are some companies who market their entire output directly. They don't have any jobbers. They feel they can do a sort of streamlined job directly to the consumer and they do not have any outside intermediaries. They do the whole job themselves.

Then you have companies whose entire output is marketed through jobbers and that is true of some major companies. When I say the entire output, I mean the overwhelming preponderance of their business is through jobbers.

Then you have other companies, like our own company, who more or less work on this basis: that based, on experience, there are some areas and territories in which we know that a jobber can do the job better than we can. That is our opinion, of course, and in those territories we have always tried to keep our jobbers—some of them have been with us 20, 18, 19, 17 years—we try to have them stay

1553 on in the business as jobbers. When we go into new territories of that same type, we try to go in there through jobbers. In other territories we feel it is better for us, or more proper for us, not to do that, so we just fit the jobber into our pattern where he is more likely to do the job the way we think it ought to be done.

Q. You referred a while ago to a 2c differential. You said that the differential in some parts of the country went up higher than that, 2½, 2¼, or higher?

A. Yes.

Q. Tell me just what you were speaking of. I am not sure I understood clearly at that time. The differential between what?

A. Between the price that the jobber pays, and the price at which he sells to dealers in the market in which he is operating.

To put it another way, the difference between the tank car price and tank wagon price.

Q. That is something different from what you just said. You said a minute ago the price at which the jobber resells—

A. The jobber resells at that price.

Q. Well, he may or may not; isn't that so?

A. He usually does—he buys at the tank car price and resells at the tank wagon price.

Q. That is the usual thing, isn't it, Mr. Dyer?

1354 A. That is the usual situation. He buys at one price and resells at another price. He resells to dealers at the tank wagon price and he resells to consumers—if he is also in the retailing end of the business—at a retail price which may or may not be the same price as others, in the same market, are selling.

Q. Did I understand you to say that the tank wagon price to which you have referred, in other words, the jobber's tank wagon price, is generally the same as his supplier's tank wagon price where the supplier sells to retailers in the same territory?

A. I would think that that probably was the situation. I think it would be more or less natural situation for it to be in that grade.

In some cases I know jobbers really, for business, have been known to go out and make inducements for business at lower prices, but I would say, as a matter of common practice, the man is buying at one price. He is trying to make a profit and retailing at the best price he can. He can't sell at a profit any higher than the material is being sold by somebody else.

Q. And that being true, can you conceive of a situation where an oil company is selling direct to retail stations in a territory and also has a couple jobbers, we will say,

in the same territory? Could you conceive of a situ-
1555 ation where the jobber offered generally, in that ter-
ritory, a lower price to retailers than his supplier was offering?

A. No.

Q. Then it is true, is it not, that there are some limitations upon the amount of price-cutting, or price-reducing, that the jobber can do?

A. Yes, there are very definite limitations as to that. He has to pay a certain price for his merchandise and he has to pay all of his expenses, and he certainly must recover, in his resale price, the cost of his material plus his expenses plus a profit. That is a very definite limitation.

Q. And that uses up, does it not, that margin we were talking about, in most cases? That is, including a reasonable profit?

A. Yes, I would say that it does; generally speaking.

Q. What I have in mind now is the fact that you were referring to certain competitive advantages that a jobber has, perhaps, over a major oil company because of the fact he is a local man and doesn't perhaps have to be bothered so much about the Robinson-Patman Act and so forth, and you mentioned you thought a jobber had some competitive advantage, did you not?

A. I said that he had certain—I called them natural advantages. It is all the same, to me. He just had them,
and there they were, and there wasn't anything to be
1556 done about it. They were his more or less by nature.

Q. That is always limited, isn't it, by the margin that the jobber has, because he is always limited by the fact that he can only buy his gasoline at a cent and a half to 2c or 2½c, but certainly not over that, generally, below the price that other people can buy it for?

A. I think I might illustrate the situation this way: as I told you, I know of jobbers who started in, initially, with a curb pump. One case it was a curb pump in front of a livery stable.

The man went from the business of putting in the curb pump business into the bulk plant operation business.

Then he established some service stations, and after he had done that, he established a water bulk plant, so all of the time working further and further back toward the supply source, so that in the difference between the cost of the merchandise to him and what he could realize in the market he had this continuing spread as he built himself up higher and higher in the business. That is the evolution of most of the major companies. Most of them started off small and many of them started off, if you can trace them right back to their very beginning, they started up in some such way and then, by building back, and accretion and mergers and consolidation, and so on, they built up their present marketing picture.

1557 Q. Have you had any experience, Mr. Dyer, with competition between refiners and jobbers in territory where the refiner sells to the jobber and both the jobber and refiner sell to retailers? In other words, where the refiner in a territory sells both to jobbers and to retailers; in that case, I suppose it might be said that the jobber handling the same brand of gas as the refiner, having bought it from the refiner, was in competition with the refiner in selling to retailers?

A. Yes, he conceivably could be. That, by the way—if I may interpolate,—is the reason why our company has not seen fit to go into business that way, because we have always felt that if we were doing business with an enterprising, aggressive jobber, which is the type of jobber we like to have, and if we had an organization of our own which was enterprising and energetic, that sooner or later, if you were working in a small territory, you would reach the point where you might have some conflict. That conflict would just be the competition for business. We encounter that every place that we operate. I don't mean within our own organization, but every place in every locality in the country where we do business there are jobbers of companies who are handling the same material as some major supplier in that territory.

Q. And they are competing for your business and
1558 you are competing for theirs; isn't that right?

A. That is right.

Q. But if you had a jobber there whom you supplied, do you think that would be a healthy situation for you two to be competing for the same business on the same brand of gasoline?

A. Well, practically, we would have the business that the jobber has, so that the area of conflict would be minimized, but from a practical standpoint, I can see where a man who is a jobber and feeling that he has more or less worked up to a saturation point, what he can get without moving in on his supplier, that sometime there would be an element of conflict there, but I am speculating there, because we have not had to deal with that situation because of our policy.

Q. Wouldn't the supplier have the advantage if there was a question of competition there, assuming that the supplier would continue to sell the jobber? Would the supplier have the advantage or the jobber, if either one tried to get stations from the other?

A. There is a sort of general identity of interest there, that I think would pretty well take care of that sort of situation.

Q. Isn't it true, Mr. Dyer, that there would be certain fields of activity that would have to be more or less
1559 marked out and adhered to in order to permit that
situation?

A. I would think, from a practical standpoint, that there would have to be.

Q. I should think so, too.

A. I can't imagine people—as a realistic proposition, I can't imagine two people, one buying from the other, going out fighting with each other, when they both are trying to sell as much as they can—

Q. And where one buys from the other.

A. Yes. That is the practical side of it.

Q. Do you know—or did I ask you this—I am not sure: whether you know what percentage of operators, we will call them, buying at tank car lots—or we will refer to them as jobbers, in the way you have referred to them as jobbers—what percentage of those jobbers engage partially or wholly in the operation of retail service stations?

A. I couldn't give you a precise figure, but I would say that the overwhelming majority of them do.

Q. Partially or wholly?

A. Partially. Usually the picture is that they operate a bulk plant, make tank wagon deliveries to commercial customers and to dealer stations and to their own stations. I might just amplify that by saying that I have had occasion recently to look over some 20 jobbing operations of the oldest jobbers we have had; jobbers who have been
1560 with us during all the long period of the depression
during the thirties and who have survived the thing and are still with us, and we are very proud of the relation we have had with them, and I find in every single case that

the pattern I have just given to you applies; namely, they have a bulk plant, they are serving dealers, serving commercial customers, farmers, and have their own service stations.

Q. Mr. Dyer, in that connection there has been testimony here by at least two jobbers to the effect that they are engaged chiefly in the business of reselling at wholesale to retail dealers. They, perhaps, own some stations as property of the station; others they hold leases on. Occasionally it is impossible for them to find a satisfactory dealer to operate those stations so they take over the operation temporarily. The testimony has been that they don't desire to operate those stations themselves, but occasionally it becomes necessary so that the property shall not remain idle or operated by someone who is inexperienced and it becomes necessary to take over the operation and they do so and operate those stations for a few months or maybe over a period of years, at times, but that that is incidental to their wholesale business and engaged in more or less as a matter of necessity rather than as a matter of desire. Now, I think I have stated correctly what has
been testified to in this case here, by two jobbers.
1564 I would like to ask you whether that is or is not the
usual situation and the usual reason why the jobber operates frequently, or most of the time, as you say, operates some retail stations of his own?

A. Well, no doubt that has been, in a great many cases, applicable. I wouldn't say that was in the majority of cases, however. You might take what I said about the advantage the jobber enjoys, the natural advantage, and the incentive he has to do a good job in the function of taking the material from a bulk plant and delivering it to a retail station and say those same things could almost be said word for word in respect to a neighborhood location, neighborhood operator of a service station, and since the functions are competing—if the jobber feels he could do a better job by getting a Polish man in a Polish neighborhood, rather than sending some of his help over there to run his station, he would prefer to have a dealer lease that station from him and operate it as an independent dealer. There are all of those considerations that flow through this, and I don't mean to say it is just a rigid matter, if a man owns a station that he must necessarily hire the men who are at that station. That doesn't always follow.

Q. I am trying to get at the question as to whether or
not it is the usual thing for the jobber to carry on
1562 where he owns or leases service station properties,
whether it is the general rule that he operate those
himself, or does he try to lease them out, or do you know?

A. I couldn't tell you the percentage but he certainly does both of them.

Q. How many cases do you know of where a so-called jobber engages in no business except the sale of gasoline at retail?

A. I know of very few; very few that I could name where a jobber delivers—you mean to his own stations?

Q. Yes. I mean where he has a bulk plant but delivers only to his own stations and doesn't sell to other dealers.

A. I would say those cases are relatively few.

~~Trial~~ Examiner Ballinger: Do you know of any precise cases?

The Witness: Yes, I do, but I must say that the ones I do know of I look upon as rather unique. I wouldn't predicate any rule—I would say that that type of operation is a very unusual one; a man who has a bulk plant and who is the usual, energetic business man, would, it seems to me, seek ~~to~~ get a larger usefulness for that bulk plant, and that's exactly what he does, but I do know of that type of operation that you speak of.

Q. Now, are you familiar with the business of the Sinclair Oil Company here in the Detroit area?

1563 A. Just in a broad, general way.

Q. Do you sell here through jobbers or do you sell direct to retail service station operators?

A. We sell direct. We have no jobbing representation. That applies in Detroit, as well as elsewhere.

Q. When you say you have no jobbing representation, do you mean that the Sinclair Oil Company does not sell to anyone here on a tank car basis?

A. That is correct.

Q. Doesn't the Sinclair Oil Company sell to a service station or stations operated under the name of James J. Bright and Sons here in Detroit?

Mr. Hanley: That is objected to as immaterial and irrelevant and not material on the direct examination and outside of the scope of the cross-examination dealing with a specific operation in the city of Detroit, which was not gone into on direct examination, and is immaterial in the case.

Trial Examiner Ballinger: Objection sustained.

Mr. Austin: If your Honor please, may I state that this witness was asked on direct some questions about Ned's Auto-Supply Company. He stated that his company was not in a position to take that type of business over in the Detroit area.

The Witness: I did not say we were not in a position to do it. I just said we would not, as a matter of policy,
1564 do it. Nothing to prohibit our doing it.

Mr. Austin: I understood that was the policy of your company.

The Witness: Yes.

Mr. Austin: It seems to me it is within the scope of cross-examination to ascertain whether or not the Sinclair Oil Company is engaging in the selling to a retailer in Detroit in the same manner as the Standard Oil Company sells to Ned's Auto Supply.

Trial Examiner Ballinger: I understand the witness to answer apparently the same question, in a little different form, two or three times.

The Witness: I don't know the names of our customers here in Detroit, so I can't be very specific on those things, but I will say this, and, as I say, it is more or less repetitious, that we do not sell in Detroit to any jobbers. I say that just because I know that our policy is applicable in Detroit as it is elsewhere.

By Mr. Austin:

Q. And by that you mean you do not sell to anyone in—

Trial Examiner Ballinger: In tank car lots?

The Witness: I am talking about resellers. We may have the business of the United States Government or some large automobile—

By Mr. Austin:

1565 Q. I am talking about resellers, too, Mr. Dyer.

A. No, we do not.

Q. I was under the contrary impression, and that is why I asked you, but I won't pursue the matter farther, if that is the case.

A. I hope you have my limitation in mind in answering your question because I don't know these things, but based upon my knowledge and the instructions of the company and the information that has gone out with respect to that type of procedure, we do not. If it has been, it is a violation of our rules, and it is beyond my knowledge. I have no knowledge of it.

Mr. Austin: That's all.

Redirect Examination by Mr. Hanley.

Q. Mr. Dyer, you were asked a series of questions relative to the ability of a jobber to compete in price with a supplier, which supplier was both selling the jobber and selling tank wagon in competition with a jobber in the same territory, and I understood you to say that, generally speaking that price would probably be the same; tank wagon?

A. I think that would probably be correct.

1566 Q. Now, averting to the natural advantage which you have stated the jobber has, I refer you to a question Mr. Austin asked you to the effect that the supplier in that situation would have the competitive advantage over the jobber. Is it not true that over the long haul, the natural advantages of the jobber will affect the tank wagon price that any supplier or any jobber could get in a given territory?

A. Yes, I think so.

Q. And wouldn't that reduced cost and efficiency of operation be reflected to the advantage of the public in a lower price to the ultimate consumer of gasoline?

A. Well, that is my opinion. Awfully difficult to demonstrate, but that is my opinion.

Q. You were asked if in your experience you had known of many set ups like that of Ned's Auto Supply where most all of the gasoline was disposed of at retail. Your answer was that you knew of some, but that it was not a general type of operation, and that usually a man with a bulk plant sought to get outlets so that the growth was often from a bulk plant to the retail operation; is that right?

A. Yes.

Q. Is it not also true, Mr. Dyer, that the reverse operation occurs where a man develops retail outlets and retails a high volume of business and works back to the obtaining of bulk supplies, or builds or obtains a bulk plant and

1567 buys in tank car quantities?

A. Yes.

Q. So the integration, if you call it that, may occur from either end; is that not true?

A. Yes, sir. Some years ago, when I was a little more acquainted with Detroit, and had occasion to come here more often, I can recall there was an operation that grew up along the lines that you latterly suggested, and it finally wound up where this man's business became so large—I can't recall his name right now—but he is probably well known to other men here—so large that he imported gasoline from abroad in cargo lots.

Q. We have painful recollections of it, Mr. Dyer.

A. I don't know whether he is still in business here or not. I haven't heard recently.

Mr. Hanley: That is all.

Mr. Austin: That is all I have.

Trial Examiner Ballinger: You are excused, Mr. Dyer.

The Witness: Thank you for permitting me to testify this afternoon, Judge.

Trial Examiner Ballinger: What is your pleasure, gentlemen? Do you desire to proceed further this afternoon or take an adjournment until tomorrow morning?

Mr. Hanley: That is all I have. I will let Mr.
1568 Abbott answer that.

Mr. Abbott: I suggest, your Honor, that we adjourn to tomorrow morning at ten o'clock.

Trial Examiner Ballinger: The suggestion meets with the approval of the Examiner, and now at 5:10 p. m. the hearing stands adjourned to be reconvened at 859 Federal Building, Detroit, Michigan, at 10:00 a. m., April 23, 1941.

(Whereupon, at 5:10 p. m., April 22, 1941, the hearing in the above-entitled matter was adjourned, to reconvene April 23, 1941, at 10:00 a. m.)

1569 Room 859, Federal Building,
Detroit, Michigan,
April 23, 1941.

Met, pursuant to adjournment, at 10 A. M.

Before:

Webster Ballinger, Trial Examiner.

Appearances:

Cyrus B. Austin, Esq., attorney for the Federal Trade Commission.

Harold R. Hanley, Esq., 910 South Michigan Avenue, Chicago, Illinois, and

Arthur J. Abbott, Esq., of the firm of Abbott, MacMahon, and Roberts, 2230 Buhl Building, Detroit, Michigan, on behalf of the Respondent.

1570 PROCEEDINGS.

Trial Examiner Ballinger: We will come to order.

This is a reconvening at 10 A. M., April 23, 1941, in Room 859 Federal Building, Detroit, Michigan, Docket No. 4389, in the case entitled: In the Matter of the Standard Oil Company.

The last hearing was held in Detroit, April 22, 1941.

The Reporter will note counsel for the Commission and counsel for the Respondent present.

Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

ELMER E. LEDBETTER was thereupon called as a witness on behalf of the Respondent, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Abbott.

Q. State your full name.
A. Elmer E. Ledbetter.
Q. What is your occupation, Mr. Ledbetter?
A. I am in the jobbing business, Petroleum products.
Q. What is the name of your company?

A. Wayne Oil Company.

1571 Q. Is that a corporation?

A. Yes.

Q. Who are the stockholders?

A. Myself and wife and son and a couple of the employees.

Q. That is practically a family corporation; is that right?

A. Yes.

Q. Now, in July, 1931, what was your occupation; previous to the time you went in the oil business?

A. For four months previous to the time I went in the oil business I had none.

Q. Were you ever with the Everhot Heater Company?

A. I was.

Q. And what was your office in that company?

A. Vice president and treasurer.

Q. And as treasurer of the Everhot Heater Company, were you in charge of its financial affairs including its accounting affairs, keeping of its books?

A. Well, I was in authority, I guess.

Q. Were you the treasurer?

A. I was.

Q. As treasurer?

A. Yes.

Q. What was the nature of the business of the Everhot Heater Company?

1572 A. Manufacturing water heaters.

Q. About the month of July, 1931, did you embark in the oil business?

A. Yes.

Q. And how did you do so?

A. I purchased a little gas station at Six Mile and Evergreen Road in Detroit.

Q. At the time that you purchased this gasoline station was it being supplied by Standard Oil Company as a tank wagon customer?

A. It was.

Q. On a tank wagon basis?

A. Right.

Q. And after you purchased the gasoline station at Six Mile and Evergreen Road in Detroit, did it continue to be supplied by the Standard Oil Company?

A. It did.

Q. On what basis?

A. Same basis; tank wagon basis.

Q. And at tank wagon prices?

A. Right.

Q. Later did you purchase two other stations, one at 19111 Grand River, and one at 8400 West Chicago Boulevard?

A. Yes, that same year.

1573 Q. And did you have those stations supplied by the Standard Oil Company?

A. I did.

Q. And were they supplied on the tank wagon basis also?

A. Yes.

Q. And you paid the regular dealer tank wagon price for all the three stations?

A. That's right.

Q. Now, by July, 1935, how many stations did you have in operation, approximately?

A. I should say about 12.

Q. And were they located all in the city of Detroit?

A. Well, either in the city of Detroit or adjacent suburbs.

Q. And to what extent had your gallonage increased up to about 1935?.

A. I believe I was up to about a million gallons a month --a year, rather.

Q. Was that all being purchased from the Standard Oil Company or from other suppliers?

A. Not all from the Standard Oil.

Q. All that was purchased from Standard Oil was being purchased on what basis, when you had 12 stations?

A. Up to August, 1935, all of the gasoline I purchased was purchased on a tank wagon basis.

1574 Q. And was it all purchased at the regular prevailing tank wagon prices?

A. It was.

Q. Now, when the volume increased to aproximately 1,000,000 gallons per annum, what did you do with reference to the continuation of your business? The Wayne Oil Company?

A. In August, 1935, I became a Standard Oil jobber.

Q. Well, had negotiations been pending previous to that time?

A. I had been trying to get Standard Oil to let me go on that basis for probably two years prior to that time.

Q. Well, what was the reason that two years was taken after your application was made to go on that basis, if you know?

A. Well, the reason I got on that basis, or the principal reason, I believe, was the fact that I succeeded after two years' effort in selling them on the idea that I could do a better job for less money.

1575 Q. Well, at that time, when you first applied to them for a tank wagon basis, did you have bulk storage facilities?

A. No, I didn't have, but I could have secured it immediately.

Q. You mean by leasing them?

A. Surely.

Q. At that time did you have any hauling facilities?

A. No, but I likewise could have obtained them instantly.

Q. Then it took two years for you to convince the Standard Oil Company that you should be placed on the tank car basis, is that right?

A. I think it was—well, at least a year, or two years. It was a long time, a long period of time, I know, that I was trying to sell them on the idea.

Q. What was the particular reason why you wanted to go on the tank car, as compared with the tank wagon basis that you had been on for several years?

A. Well, I found it very difficult to make a living; trying to skim out a little of the profit for a retail operation for myself; even though I had twelve stations.

Q. And even though you had a million gallon capacity. Now what did you then do, in August of 1935?

A. I became a Standard Oil jobber.

Q. And did you acquire bulk plants?

A. I did.

Q. And did you acquire hauling facilities?

1576 A. I did.

Q. In 1935 did you have a gasoline filling station at Vinewood and the Boulevard in Detroit?

A. Yes.

Q. I mean by that, for the record, Vinewood Avenue and Grand Boulevard.

A. That's right.

Q. And how did you acquire that station?

A. Lease.

Q. From whom?

A. Highland Oil Corporation.

Q. And they are suppliers of Hi-Speed Gasoline in Detroit, or were, at that time?

A. That's right.

Q. And until September of 1935 did you buy gasoline for that station from the Highland Oil Company?

A. Yes.

Q. On what basis?

A. My recollection is it was about a cent a gallon below the regular prevailing tank wagon basis.

Q. And it was on the tank wagon basis, was it, that you purchased the gasoline for that station from the Highland Oil Corporation?

A. Well, there was a concession there of about a cent beyond the prevailing tank wagon basis.

1577 Q. How long was it that you were purchasing gasoline for that station from the Highland Oil Company handling Hi-Speed Gasoline at one cent below the prevailing dealer tank wagon price; how many months?

A. Oh, I would be guessing at it. Probably six or seven months, I think.

Q. Did the Standard Oil Company ever sell gasoline to you at any price below the regular tank wagon basis during the time that you were a tank wagon customer?

A. No.

Q. Now after you acquired your bulk plant and your tank truck delivery equipment, you began to receive tank car deliveries, did you?

A. I did.

Q. And was that at Grand and Wyoming?

A. That's right.

Q. And you leased that bulk plant from whom?

A. Central Detroit Warehouse Company.

Q. And have you leased it from them ever since?

A. Yes.

Q. And you are at the present time occupying that bulk plant as your place of receiving truck-train shipments, is that right?

A. That's right.

Q. When did you change from the tank wagon shipment basis to the truck-train basis?

1578 A. That was some months ago. I expect about a year.

Q. What change was necessary in your facilities to change over from the tank car basis to the truck-train basis?

A. We had to enlarge our yard gates and do some piping; re-arrange our piping connections to the meters and pumps, and so forth.

Q. You have always had a side track there, haven't you?

A. Yes; still do.

Q. And is that a side track from the Detroit Terminal Railroad, or from some other railroad?

A. Yes; the Detroit Terminal.

Q. The truck-train delivery obviates the necessity of using the spur track, does it not?

A. Yes.

Q. Because the truck-train travels on the street?

A. That's right.

Q. And not on the track.

A. That's right.

Q. Did you at the time you went on the tank car basis in August of 1935 arrange to sell tires and other accessories as well as gasoline?

A. I believe we have always sold a small quantity of that kind of thing.

Q. But the predominating character of your business is the sale of gasoline; is that right?

1579 A. That's right.

Q. And did you, after you went on the tank car basis, disposed of your retail outlets?

A. Yes.

Q. And did you do that to the extent of 100%?

A. I did.

Q. From October 1, 1935, until September of 1939, will you state whether you were on a hundred percent wholesale basis?

A. I was.

Q. Since 1939 what can you say relative to the station at 8400 West Chicago, in the city of Detroit?

A. I took that over in September, 1939, and operated it since.

Q. And what was the occasion of your taking it over?

A. Well, the station became insolvent, the dealer became insolvent; I was on the lease and subleasing to him, and in order to keep him eating, I took him over.

Q. And has he been an employee of yours?

A. He has.

Q. Ever since?

A. Yes.

Q. And with reference to the station at 10618 West Jefferson, River Rouge, suburb of Detroit, what can you say as to that station?

1580 A. Same identical situation, except that that happened last June, June 1940.

Q. June of 1940?

A. Yes.

Q. And did that station also go insolvent?

A. Yes.

Q. What have you been doing with reference to that station since it became insolvent?

A. It has been a company-operated station, and the former dealer is an employee.

Q. So at the present time you are operating two retail stations?

A. Yes.

Q. Would you say that that more or less was an emergency situation?

A. Yes, I would say that is what it was.

Q. Well, do you intend when and if you can to put those stations on a wholesale basis?

Mr. Austin: I object, your Honor; irrelevant and immaterial as to what the witness intends to do.

Trial Examiner Ballinger: Objection sustained.

By Mr. Abbott:

Q. Now, at the present time, I believe you have a total of 24 stations; is that the number?

A. Well, it might be 23 today.

1581 Q. Well, somewhere approximately 24?

A. Yes.

Q. Of which all but two are operated by others; is that correct?

A. That's right.

Q. Am I correct in stating that the capacity of your bulk plant is 104,000 gallons, approximately?

A. Well, I believe that is the total tank capacity on there. Although, I generally considered it as being 87,000—rather, 84,000.

Q. You have four 15,000-gallon tanks?

A. Yes.

Q. And six 4,000-gallon tanks?

A. Right.

Trial Examiner Ballinger: Pardon me. How many service stations are you operating today?

The Witness: Two.

By Mr. Abbott:

Q. And you have one 20,000-gallon tank?

A. Yes, there is a 20,000-gallon tank.

Q. Yes.

Trial Examiner Ballinger: At the time the Respondent's Answer was filed, you were operating three, were you?

The Witness: No; I think it was two.

1582 By Mr. Abbott:

Q. Did you have three at any time in the last year?

A. Yes, I have.

Q. Where was the other one that you were operating within the past year in addition to the two that I have mentioned?

A. There has been a total of five or six since September, 1939.

Q. But you have been able to place all but two back on a wholesale basis; is that correct?

A. That's right.

Trial Examiner Ballinger: One other question. As to the volume of gallons handled, what does that aggregate now per annum?

The Witness: 1940, I believe it was close to two and a half million gallons total.

Mr. Abbott: We are going to put in gallonage per year. Mark this an an exhibit, please.

(The document referred to was marked, for identification, "Respondent's Exhibit 20.")

By Mr. Abbott:

Q. Mr. Ledbetter, I show you Respondent's Exhibit 20, for identification, and ask you to identify it.

A. Well, that is the sheet showing as of December 31
1940, the station—the stations with the names and
1583 addresses leased and operated by the Wayne Oil Company, leased and subleased by the Wayne Oil Company, and simply supplied as independent, wholly independent dealers by the Wayne Oil Company.

Q. Have you got another copy of that in your book?

A. Yes, I have.

Mr. Abbott: I want to give a copy to Mr. Austin. It is just a photostat of the set-up of the stations supplied by the Wayne Oil Company, showing the two that are operated by the company, and the rest being leased and subleased or dealer contracts.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Abbott:

Q. Will you verify Exhibit 20, for identification, and see whether there are not, in fact, 24 stations that are on that photostat?

A. There are 24.

Mr. Abbott: I offer it in evidence. I offer Exhibit 20 in evidence.

Trial Examiner Ballinger: Any objection?

Mr. Austin: No objection.

Trial Examiner Ballinger: Respondent's Exhibit 20, for identification, is admitted in evidence.

1584 (The document referred to, heretofore marked, for identification, "RESPONDENT'S EXHIBIT 20," was received in evidence.)

By Mr. Abbott:

Q. Mr. Ledbetter, will you state by years from 1936 to 1940, inclusive, the gallonage of gasoline that you handled in the business of the Wayne Oil Company?

Mr. Austin: If your Honor please, that has already been placed in evidence by the records of the Secretary of State on behalf of the Commission, the Commission's Exhibits 6 to 17, inclusive. Now, I believe Mr. Ledbetter was here at the time that those exhibits were introduced, and I believe—at least, I request that he state at this time whether those figures previously introduced are correct or not, and if not, I am perfectly willing, of course, to have any corrections made. On the other hand, if they are correct, then I think it should appear there in a duplication.

1585 Q. Well, I will ask him this: Do you remember, Mr. Ledbetter, whether there was any evidence put in as to the gallonage delivered by you during these years—and when I say "you" I mean the Wayne Oil Company?

A. It seems to me like there was.

Q. And do you remember whether the figures given were correct?

Mr. Abbott: I think I ought to read the figures.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

By Mr. Abbott:

Q. Don't the state record, Mr. Ledbetter, show a deviation of 3 per cent from the amount of gasoline actually sold by you? In other words, would they be the same?

A. Well, the state record shows the 3 per cent, but it don't show any deviation of 3 per cent.

Q. What I mean to say is don't the state records show a reduction of 3 per cent from the actual gallonage which was handled by the Wayne Oil Company during those years?

A. I don't think that is exactly correct because it shows the net gallonage and the 3 per cent. You can add the two together, if you want to, and get the total. It shows both.

Q. You have your gallonage, haven't you, handled by the Wayne Oil Company, in your records, there, so
1586 that you can just dictate them into the record and
then, if there is any difference, why, we can check that and reconcile it? What is the 3 per cent that I have mentioned, Mr. Ledbetter?

A. I beg your pardon?

Q. What is the significance of the 3 per cent that I have mentioned in my question to you?

A. That's what the state allows for shrinkage and loss in handling.

Q. Evaporation?

A. You don't have to pay the highway tax on 3 per cent of the gallonage we have.

Q. That is for spillage—

A. Yes.

Q. —evaporation, loss in handling?

A. That's right.

Q. Can you state those figures, Mr. Ledbetter, by word of mouth?

A. Yes, I can.

Q. Very well. 1936?

A. 1,348,348.

Q. 1937.

A. 1,686,637 gallons.

Q. 1938.

A. 1,825,038 gallons.

Q. 1939.

1587 A. 2,226,177 gallons.

Q. And 1940?

A. 2,340,394 gallons.

Q. I have that figure 2,341—

A. Maybe it is 1. Yes, it is 1.

Q. 2,341,394 gallons.

A. That's right.

Q. Have you, since the time that you went on the tank car basis—when I say "you," I mean the Wayne Oil Company—always paid the regular tank car charge for gasoline delivered to your bulk plant from the Standard Oil Company?

A. Yes.

Q. There has been no deviation from that at any time?

A. No.

Q. Now in reselling to the retailers supplied by you, on what basis have you sold the gasoline?

A. At the tank wagon price; prevailing tank wagon price. Always the same prices at which Standard Oil sold their gasoline to the retailers throughout the city.

Q. And you don't make any reduction to any of the stations that are shown on Exhibit 20?

A. No.

Trial Examiner Ballinger: And haven't.

The Witness: And haven't, is right.

By Mr. Abbott:

1588 Q. Now with reference to the cost of handling gasoline delivered to your bulk plant by the Standard Oil Company by tank car or truck-train: When you receive the gasoline at your bulk plant do you do the hauling to the 24 stations that you testified about?

A. Yes.

Q. And you do that by what means?

A. Tank truck.

Q. Do you have more than one of those?

A. Two.

Q. And what is the average delivery that you make to resellers from your bulk plant?

Trial Examiner Ballinger: Per day, week, month, or year?

By Mr. Abbott:

Q. No. I mean the average delivery in gallons.

A. You mean individual delivery.

Q. Yes.

A. I haven't compiled any statistics but I have a pretty good idea.

1589 Q. I mean just the approximate average.

A. It would be around 500 gallons.

Q. Just as bearing on other testimony in the case, would hauling in quantities of a thousand, 1500, or 2000 gallon lots, reduce the cost of handling? Would that operate to reduce the cost of handling, if gasoline were delivered in those quantities rather than in 500-gallon lots?

A. Surely.

Mr. Austin: I object to the question, your Honor, on the ground the witness has not been qualified to answer that question. It calls for a conclusion.

Mr. Abbott: Well, he is pretty well qualified to answer the question based on his experience.

Trial Examiner Ballinger: Well, the Examiner thinks the witness is sufficiently qualified to answer the question.

A. Why, certainly it would reduce the cost.

Trial Examiner Ballinger: It stands to reason, does it not, that dealing in larger quantities would be at a lesser cost than in smaller quantities?

Mr. Austin: Well, how much less would be another question. And there might be a lot of other factors.

Trial Examiner Ballinger: We haven't come to that yet.

By Mr. Abbott:

1590 Q. Do you know, of your own knowledge, the differential which is given by many major oil companies, do you or do you not know this, between the tank wagon and tank car price, which, in the case of Standard Oil Company, is 1½¢ at the present time, is more than 1½¢ in the case of many other major oil suppliers; is that or is that not a fact?

Mr. Austin: Would you mind repeating that question, please?

(The question was read.)

Mr. Austin: I would first like to know whether the witness knows. And I would like to know whether the question is limited to Detroit.

Trial Examiner Ballinger: The question, in the opinion of the Trial Examiner, is somewhat ambiguous.

Mr. Abbott: I will withdraw it and reframe it.

By Mr. Abbott:—

Q. Mr. Ledbetter, do you know, of your own personal knowledge, whether other major oil companies in the Detroit area allow more than 1½c differential as between tank wagon and tank car deliveries of gasoline.

Trial Examiner Ballinger: Do you know that of your own knowledge?

The Witness: Can I make an answer off the record?

Trial Examiner Ballinger: I am afraid—

1591 Mr. Abbott: Make it on the record, whatever it is, base it on your personal knowledge.

A. Well, my answer to that would be that while I am about as certain that that is true as that I am sitting here, I have never seen it actually done.

By Mr. Abbott:

Q. So you have nothing in your own personal experience which would enable you to answer ~~that~~ question positively; is that right?

A. I have enough in my personal experience to make me certain that it is true.

Mr. Austin: Your Honor, I move to strike the answer of the witness. He has testified that he has no personal knowledge of the price charged by any oil company here other than the Standard Oil Company, if I understand him correctly. I, therefore, move to strike his answer regarding his personal certainty, which he states himself is only his own conclusion and not based upon any facts.

Trial Examiner Ballinger: The motion is granted. Undoubtedly, if it is a fact, it can be proved by witnesses who have personal knowledge.

By Mr. Abbott:

Q. What personnel do you have at your office?

A. Well, I have a little office force and a little shipping force, and a little sales force.

1592 Q. And what is the nature of your duties?
A. Everything from president on down.

Q. And do you do anything with the auditing of your accounts, the keeping of your books?

A. Well, I supervise it.

Q. And have you made an analysis of the cost of handling gasoline during the period from 1936 to 1940, inclusive?

Trial Examiner Ballinger: What do you mean by handling it? Commencing at what point and ending at what point?

By Mr. Abbott:

Q. From the time that the gasoline arrives at your bulk plant until the time that it is placed in the tanks of the outlet?

A. I know what the cost is per gallon of gasoline to run my business.

Q. Well, will you answer the question as to whether you have made an audit of the cost of selling and transporting gasoline in your business from the years 1936 to 1940, inclusive?

A. Well, I don't know just what you mean by audit, to tell you the truth.

Q. A survey.

A. I have computed the cost per gallon of gasoline handled for running my business, covering all of
1593 the expenses of business operation.

Q. I see.

Mr. Abbott: May I have this marked as Exhibit 21, for identification?

Trial Examiner Ballinger: The reporter will mark the document Respondent's Exhibit 21, for identification.

(The document referred to was marked, for identification, "Respondent's Exhibit 21.")

By Mr. Abbott:

Q. I show you Exhibit 21, for identification, and ask you what that is, Mr. Ledbetter?
1594 A. That is the operating cost of selling gasoline by the Wayne Oil Company.

Q. For what period?

A. For the years 1936, '37, '38, '39, and '40.

Q. And is that based on the gallonage that you previously testified you handled during those five years?

A. It is.

Q. Can you vouch for the accuracy of this statement or survey?

Trial Examiner Ballinger: Let's find out whether or not he prepared it himself.

By Mr. Abbott:

Q. Was it prepared under your supervision?

A. Yes, under my supervision and with my help.

Q. And in your office?

A. That's right.

Q. Is that right?

A. That is right.

Q. And based on that can you vouch for the accuracy of the figures stated on there?

A. I can vouch for the accuracy of these figures.

Mr. Austin: Your Honor, I object to any further questioning on this matter. In the first place, the cost of the wholesaler in distributing gasoline from his bulk plant to the dealer to whom he sells is entirely immaterial
1595 and irrelevant in this case, and I object to it on that ground.

If there is any relevancy in the cost of the Wayne Oil Company at all, it would be in the cost of the bulk plant and the delivery operation in connection with retail operated stations, of which there are at the present time only two. And which there were none, as I understand it, during part of this period.

In the third place, Mr. Ledbetter has not been qualified as an accountant, and this sheet here simply states a conclusion as to operating cost per gallon, doesn't state the figures upon which it is based, and the witness has not been in any way qualified to reach such a conclusion, either upon his own figures or any other figures.

Mr. Abbott: Now, if the Court please, this exhibit is offered in the case for the purpose of tending to show that the differential between the tank car and the tank wagon basis, which is a cent and a half is made in good faith, and that it is justified by the difference in the cost of manufacture, sale or delivery resulting from the different methods or quantities in which the commodities are sold or delivered to the purchaser. That which I have just now read is from the Robinson-Patman Act itself. And I say that the testimony of Mr. Ledbetter as to his costs of selling and transporting gasoline from his bulk plant

to the retail outlets, including the cost of administra-
1596 tion of his business, has a probative value in this
case, as showing the differential of one and a half
cents between the tank wagon and tank car price is reason-
able and justified under the Robinson-Patman Act.

As to Mr. Ledbetter's qualifications to make this survey or audit or statement, it is ridiculous, of course, to suggest that he has to be a public accountant, or even an accountant to do that, because he has testified that he has been the treasurer of the company that he was with before he became identified with the oil business. And since he has been in the oil business, ever since more than seven or eight years ago, he has been actively identified with the keeping of the books of his company, and has been almost the sole stockholder in the company, and has testified that this statement or audit was prepared not only under his supervision, but also by him personally, that he participated in the preparation of it.

I don't think there is any question that the exhibit is admissible.

Of course, the Government will have a right to examine
him as to its authenticity and as to the reliability of the
figures which appear upon it, if they wish to do so.
1597 Trial Examiner Ballinger: I desire to ask counsel
for the Commission a question.

What is the object and purpose of Taggart's testimony? Is it not to establish cost of marketing?

Mr. Austin: The object of Taggart's testimony was to establish the cost of distributing gasoline by retail service stations in Detroit.

Furthermore, Dr. Taggart was thoroughly qualified before he was asked any conclusion.

Trial Examiner Ballinger: I am not speaking about conclusions.

Mr. Austin: The object of the testimony was to establish the cost of distribution of the gasoline at retail at service stations in Detroit.

Trial Examiner Ballinger: This statement, as I understand, relates only to the cost of distributing from the bulk plant to the retail station; is that correct?

Mr. Abbott: That is correct.

Mr. Austin: To retail stations to whom this wholesaler sells, and in respect of which he is engaged in business as a wholesaler, and I contend that that is entirely immaterial

to any issue in this case, and that the only place where distribution costs are admissible or in any way relevant is where they are so set up as to show the difference between the cost of distributing gasoline to retail sta-
1598 tion, that is, the operation of the bulk plant and de-
livery, in the one case, as against where a retail station buys directly from the oil company. Any additional costs which result from the fact that the supplier buys by tank car instead of by tank wagon, I think, are admissible, but I don't think that this is admissible at all, unless it is separated and unless Mr. Ledbetter could testify and show that he had made an allocation of his costs so that he was prepared to state the cost per gallon of distributing gasoline to retail stations which he operated and state that those were costs which he would not have had if he had taken delivery at those stations directly from the Standard Oil Company. In other words, if a man operates a retail station, and, as a result of operating the bulk plant and making his own deliveries, he has certain expenses which he would not have, had he taken delivery from the oil company directly at the station, then I think that is probably a proper subject of proof because that is an expense which he incurs by operating the bulk plant and making his own deliveries.

Mr. Abbott: I want to ask you, then, Mr. Austin, what was the purpose of Mr. Harrison's testimony in which he testified that the cost of selling and delivering gasoline by the tank wagon method was .76¢ per gallon over
the tank car method. Now, this, if you see, your
1599 Honor, is directly on that point; as to the difference
between the cost of handling by the two methods.

Trial Examiner Ballinger: There are two questions here that the Examiner has in mind: first, whether or not this testimony, if proper, is pertinent, germane, and admissible.

Secondly, the Examiner is in serious doubt as to the admissibility of the document; there is no break-down, there is nothing to indicate what items of expense enter into the cost.

Mr. Abbott: That is a matter that can be gone into.

Trial Examiner Ballinger: Those matters will have to be gone into before, certainly, this document could be admitted in evidence.

Mr. Abbott: We are willing to do that, if the Examiner wishes to have it done.

Trial Examiner Ballinger: Then we will first dispose of this question as to whether or not evidence of the cost of delivery from the bulk plant to the service station is material.

Mr. Abbott: That is just the thing that Mr. Harrison of the Sun Oil testified about in the Government's case.

Trial Examiner Ballinger: The Examiner was un-
1600 der the impression that that was the subject of a
part of Mr. Harrison's testimony which was considered material by counsel for the Commission. Am I not correct?

Mr. Austin: You are correct, your Honor, to the extent that the Sun Oil Company is not a jobber; it is a refiner, and so is the Standard Oil Company, and I am not saying that the cost of the Standard Oil Company, both selling in tank wagon and tank car quantities is not admissible. That is comparable to Mr. Harrison's testimony, but this is the testimony of a jobber. If the purpose of this testimony is in some way to compare Mr. Ledbetter's costs with the Standard Oil Company costs, to say: This is what it cost the Standard Oil Company to operate a bulk plant and deliver gasoline; if that is the purpose of this testimony, then I would have to concede it might have some relevancy—I won't concede it has any relevancy, but I would concede that the offer was proper to the same extent that the offer of Mr. Harrison's testimony was proper.

I don't understand, Mr. Abbott, you are offering this testimony of Mr. Ledbetter for the purpose of proving what the Standard Oil Company's costs are.

Mr. Abbott: We intend to show it two ways. We intend to show not only the difference from the standpoint of the Respondent, but also the difference from the standpoint
of the jobber, because they both have a tendency to
1601 show the same result under the Robinson-Patman Act,
as to the difference between the cost of sale and delivery under the two methods and also this is offered for the purpose of showing that the testimony of the witness Harrison is not accurate when he says that the difference in cost is .76¢ per gallon, because we claim that that does not include certain items which ought to be considered in such a computation, Mr. Harrison having testified that in a great many respects his method of delivering gasoline is different than the method which Mr. Ledbetter uses.

In connection with that, I want to say that Mr. Ledbetter has already testified that his average delivery is in lots of 500 gallons whereas Mr. Harrison testified that he delivered in much larger lots.

This is testimony which I think is necessary to rebut Mr. Harrison and also as having a tendency to show that the differential between the tank car and tank wagon price is justified, under the Robinson-Patman Act itself.

Trial Examiner Ballinger: Is this testimony designed to establish the cost of marketing gasoline?

Mr. Abbott: Yes, it is for the purpose of showing the cost of marketing gasoline, so far as it relates to the cost of sale or delivery as between the tank car and the tank wagon method of delivery.

Trial Examiner Ballinger: Then, in order to pre-
1602 sent the entire picture, you should have the cost of
delivery to the jobber plus the cost of the delivery of
the jobber to the service station, plus the cost of the opera-
tion of the service station, should you not?

1603 Mr. Abbott: Well, not as far as this witness is
concerned, because he hasn't any cost except at the
time it is delivered to him. We can't prove it all by him.
There are a great many other elements, of course, which
enter into the matter, when we come to the costs of the
Standard Oil Company, the Respondent, which is something
entirely different.

Trial Examiner Ballinger: What is bothering the Examiner is for what purpose has this evidence been offered?

Mr. Abbott: First, for the purpose of rebutting the testimony of Mr. Harrison which your Honor has already referred to. I think when you mentioned Taggart, possibly you intended to refer to Mr. Harrison, because, as Mr. Austin has stated, Mr. Taggart testified on a somewhat different subject than Mr. Harrison.

Trial Examiner Ballinger: Mr. Taggart made a survey or claimed to have made a survey of this area to determine the cost of marketing gasoline.

Mr. Abbott: Yes; of the retail operator.

Trial Examiner Ballinger: Mr. Harrison testified, as the Examiner recalls, with reference to the cost of delivery of the gasoline from the bulk plant of the—was it the Sun Oil Company?

Mr. Abbott: Yes; Sun Oil Company.

Trial Examiner: —Sun Oil Company, to the jobber. Am I correct?

1604 Mr. Abbott: No. He testified with reference to the cost of delivery from the jobber to the retail outlet; just what Mr. Ledbetter is proposing to testify to.

Mr. Austin: I don't think either of you stated that correctly, if I may respectfully state so. He stated the cost of delivery from the bulk plant of the Sun Oil Company to the retail station, including the operation of the bulk plant.

Trial Examiner Ballinger: That's as I understand it.

Mr. Abbott: That's what I meant to say. Whether it is one bulk plant or the other, doesn't make any difference.

Trial Examiner Ballinger: This testimony, if admitted, wouldn't prove nor tend to disprove the statements of Mr. Harrison. There is an entirely different situation.

Mr. Abbott: I certainly differ with the Examiner, because it makes no difference what bulk plant you take, if you are making deliveries by tank wagon out of a bulk plant to a retail station the costs are comparable. I don't care whose bulk plant it is; whether it is the Sun Oil Company or Mr. Ledbetter's; because the gasoline comes to rest in the bulk plant and from there is put into a tank wagon and then delivered to a retail outlet. That is the same situation and the same process, no matter who operates the bulk plant.

Mr. Austin: If the Standard Oil Company wants to 1605 prove what it costs it to deliver gasoline from its own bulk plants to the Standard Oil service stations it certainly has that material and those figures at its command and it seems to me that the only proof in that respect is direct proof of its own costs. Why it should want to come in for that purpose and show what it costs a jobber like the Wayne Oil Company are, to carry out that same operation, I don't quite understand.

Mr. Abbott: We propose to show in this case, your Honor, as to the various jobbers, what their gallonage cost is for selling and transporting gasoline from the bulk plants to the retail outlet, and that is the purpose of this testimony and it was introduced also in connection with the testimony of Mr. Biber. All the exhibits that were put in evidence there, were for the same purpose; to show the same cost with reference to the Citrin-Kolb Oil Company and we now ask leave to introduce that testimony on behalf of the Wayne Oil Company for the purpose of showing the incidence of the costs of such operation with the figures which will be introduced to show the costs involved for the Standard Oil Company itself.

1606 Mr. Austin: If your Honor please, those papers that Mr. Biber had are not exhibits; they were offered, and your Honor reserved his ruling on them, and so far they have not been admitted, and I may say they were in probably a good deal better shape than this statement.

Mr. Abbott: If the Court please, I want to say that in order to save time, I will ask that the Court reserve ruling on this offer in order that we may proceed, and if it later appears that it is not proper, of course, it can be stricken. I would like to get along with Mr. Ledbetter's testimony and put in whatever testimony I have for him to answer with reference to this exhibit, and if it should later appear irrelevant, your Honor, of course, can strike it.

Trial Examiner Ballinger: You think it is material to the Respondent's case?

Mr. Abbott: It is very material. It is one of the principal defenses we have, to show that nothing—the Act says: Nothing herein contained shall prevent differentials which make only due allowance for the differences in the cost of manufacture, sale, or delivery, resulting from the different methods or quantities in which such commodities are to such purchasers sold or delivered.

Trial Examiner Ballinger: You think that extends not only to the Respondent, but also to the jobbers who 1607 buy from the Respondent? How far down the line do you think that projects?

Mr. Abbott: I don't say that. I say this testimony here that is offered in evidence has a tendency to prove just what that section of the Robinson-Patman Act provides, in connection with the testimony which will later be introduced to show the cost to the Standard Oil Company.

I am reading now, if the Court please, from the Robinson-Patman Act proviso, starting with the words: "Provided that nothing herein contained shall prevent differentials which make only due allowance for differences in cost of manufacture, sale, or delivery, resulting from the different methods or quantities in which such commodities are to such purchasers sold or delivered." The wording of the Clayton Anti-Trust Act is somewhat different from that. Of course, my brother, Mr. Austin, knows what the difference is.

Trial Examiner Ballinger: Well, the Examiner is of the opinion, and so rules, that that section or the proviso to which counsel has directed the Examiner's attention is not applicable to this situation, and accordingly sustains the objection to the exhibit, Respondent's Exhibit 21.

Mr. Abbott: If the Court please, I earnestly ask that the Examiner reserve ruling on this exhibit, because
1608 we concede it is very essential to the Respondent's case that this schedule of costs be placed in the record in this case. If this evidence is not to be taken, then I certainly submit that the testimony of the witness Paul Harrison should be stricken, because that testimony is to the same effect, only it presents a different figure, namely, a figure of .76¢ per gallon, instead of the figure which is submitted by Mr. Ledbetter, and which averages one and forty-three hundredths cents per gallon as his cost.

And if your Honor is to rule that this evidence shall not be admitted, then I move to strike the testimony of the witness Paul Harrison on that point, which was taken the last day—

Trial Examiner Ballinger: The Examiner couldn't entertain such a motion unless counsel referred with particularity to the page and lines of the record which he desires to have stricken.

Mr. Austin: If your Honor please, I would like to point out a very important difference between this proposed—

Trial Examiner Ballinger: Just a moment.

Mr. Abbott: I have the record here, your Honor.

Trial Examiner Ballinger: So that the record may be clear, let us find out what testimony you propose to strike.

Mr. Abbott: Very well. It will take about ten
1609 minutes to get it here.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Abbott: I made a motion, if the Court please, to strike all the testimony of the witness Paul Harrison in relation to the cost of sale and delivery from bulk plant to retail outlet of gasoline from the Detroit area at the present time. I believe his testimony related to the current situation in that respect. I make this motion upon the ground that the Court or Examiner has ruled that the Respondent's Exhibit 21, relating—

Trial Examiner Ballinger: For identification.

Mr. Abbott: —for identification, relating to the unit cost of the Wayne Oil Company is not admissible, under that section of the Robinson-Patman Act which provides, "That

nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the different methods or quantities in which such commodities are to such purchasers sold or delivered." It being my contention that if Exhibit 21 should be refused admission in evidence, then, by the same token, the testimony of Mr. Harrison on the same question should likewise not be in the record,
1610 and should be stricken from the record. I, therefore,
make the motion that Mr. Harrison's testimony on that point be entirely stricken. And for the purpose of the motion, I say that I shall be able to give you the pages of the record on which Mr. Harrison's testimony so appears.

Trial Examiner Ballinger: Will you furnish those to the reporter so that he may include them in the record at this point?

1611 Trial Examiner Ballinger: I will hear from Mr. Austin.

Mr. Austin: If your Honor please, just to point out a very distinct difference between Mr. Harrison's testimony, that is, the subject covered by it, and the subject matter of these figures which have been offered through Mr. Ledbetter, Mr. Harrison was asked what the cost of the Sun Oil Company was of delivering gasoline from bulk plant to the service station, including the operation of the bulk plant.

Trial Examiner Ballinger: To where?

Mr. Austin: From the bulk plant to the retail service station. Including the operation of the bulk plant.

Now, this statement of costs offered by the Respondent is a statement showing the entire operating cost to the Wayne Oil Company. It is not restricted to the cost, unit cost per gallon of delivering gasoline including the operation of the bulk plant.

Trial Examiner Ballinger: I will ask you to confine your remarks here between the distinction of the Wayne Oil Company and the Sun Oil Company's deliveries.

Mr. Austin: That is exactly the point. This includes a lot of other things besides operation of a bulk plant and delivery of the gasoline from the bulk plant to
1612 the retail station. Mr. Harrison's costs, which he
introduced, were restricted to that.

I will concede on behalf of the Commission that it would be relevant for the Respondent to produce figures for the purpose of showing any additional cost which a jobber incurs as a result of operating retail stations resulting from the fact that he buys in tank car quantities and not directly by tank wagon.

1613 Mr. Abbott: My understanding is that the additional cost which a jobber incurs by buying in tank car quantities as to his retail operations is the operation of the bulk plant and the delivery of the gasoline in his own trucks, because he wouldn't have to do that if he bought directly from his supplier by tank wagon delivery.

Mr. Austin: Now, consequently my objection to this exhibit is based upon the fact that it includes the entire operating cost of the Wayne Oil Company, and in that respect it is different from what Mr. Harrison was asked and covers different operations and different costs than those covered by Mr. Harrison's answer. For that reason I contend that the two are not comparable.

Mr. Abbott: If the Court please, I contend they are strictly comparable because this only purports to cover the operating costs of the bulk plant and the cost of delivery by the delivery facilities from the bulk plant to the gasoline filling station.

Trial Examiner Ballinger: But the statement contains no breakdown to indicate what items enter into it.

Mr. Abbott: We propose to introduce further evidence to show what the breakdown is.

Trial Examiner Ballinger: Well, you certainly would be required to do that before that statement would be admissible.

If you think you can establish those figures, furnish 1614 proper background for the admissibility of that document in evidence by this witness, the Examiner suggests you withdraw the tender until that is done, and then the Examiner will pass on it.

Mr. Abbott: I would like to clear up this point. Does the Examiner claim that evidence of the jobber's cost in this operation is admissible if properly established in the way you have indicated?

Trial Examiner Ballinger: Apparently counsel for the Commission concedes that.

Is the Examiner correct?

Mr. Austin: Well, I will be bound by the statement I made on the record. I think that statement very clearly—

Mr. Abbott: Would you just as soon answer the question I asked the Commissioner, and which he asked of you?

Mr. Austin: You will have to restate the question.

Mr. Abbott: Will you repeat it, Mr. Reporter.

Trial Examiner Ballinger: Read it, please.

(The record was read by the Reporter.)

Mr. Abbott: Instead of by reference, would you just as soon put it on the record directly.

Mr. Austin: I will state again I have no objection to the introduction of cost of any one of these four jobbers, costs which are costs incurred in the connection with the operation of retail service stations, and which costs 1615 result from the fact that the jobber obtains his gasoline for those service stations through his own bulk plant delivery, rather than by delivery through the Standard Oil Company.

Mr. Abbott: That is not the question. What if you had a situation where the jobber didn't have any retail stations; would you then contend that his cost of operation of the bulk plant for delivering gasoline to retail outlets is admissible?

Mr. Austin: To bring it to a specific case, I contend that the present costs of the Stikeman Oil Company, assuming that they do not operate retail stations, was entirely inadmissible.

Mr. Abbott: Inadmissible?

Mr. Austin: Yes.

Mr. Abbott: That is the very point, if the Court please, as to whether those costs, assuming that the jobber has no retail stations, as in the case of the Stikeman Oil Company, and which might be the case with the Wayne Oil Company, conceivably, whether that cost is admissible under this section or proviso of the Robinson-Patman Act.

1616 Trial Examiner Ballinger: To avoid further discussion, in order that we may progress, the Examiner will permit the introduction of the testimony, reserving to counsel for the Commission a motion to strike at the conclusion of the testimony.

Mr. Abbott: That is just what I asked the Commissioner to do, because I think it should go in, and then if it is found to be irrelevant, then it can be cured by motion.

Mr. Austin: May I ask your Honor to please explain that ruling for my benefit. I don't understand, do I, that this exhibit is admitted?

Trial Examiner Ballinger: No. That exhibit in the opinion of the Examiner, has not been sufficiently authenticated.

Mr. Abbott: Very well.

I want to say that Judge Hanley has a witness from Chicago, and we wish to interrupt in order to have his testimony considered at this time.

Trial Examiner Ballinger: And withdraw the present witness?

Mr. Abbott: Yes.

Trial Examiner Ballinger: It is agreeable to the Examiner. The witness is withdrawn. Call your next witness.

(Witness temporarily withdrawn.)

1617 Mr. Hanley: Professor Clark, please.

FRED EMERSON CLARK was thereupon called as a witness by and on behalf of the Respondent, and, having been first duly sworn, testified as follows:

Direct Examination by Mr. Hanley.

Q. Professor Clark, will you please give your full name and your address to the reporter?

A. Fred Emerson Clark; 1602 Ashland Avenue, Evanston, Illinois. That's my home address.

Q. And what is your present occupation, Professor?

A. I am a teacher; I am professor of economics and marketing, Northwestern University; Chairman of the Department of Marketing and Director of the graduate division of the School of Commerce of Northwestern University.

Q. Beginning with your formal schooling, after high school, will you please tell us what colleges or institutions you have attended?

A. Do you want the degrees, too?

Q. Yes, sir.

A. I got my Bachelor of Arts Degree at Albion College, 1912; Master of Arts Degree in Economics, University of Illinois, 1930; Degree of Doctor of Philosophy in
1618 Economics from the University of Illinois in 1916.

Q. When you obtained your degree as a Master of Arts, Professor, were you required to write a thesis, and, if so, what was the subject of that?

A. Yes. The thesis of my Master's Degree was a cooperative grain elevator movement in Illinois dealing primarily with the marketing of grain by cooperative grain elevators.

Q. During the period when you were attending school, did you also do any work as an instructor?

A. Yes. I was a Teaching Fellow at the University of Illinois one year and then one year, or the years 1913, 1914, 1915, I was instructor in economics at the University of Arizona.

Q. Now, beginning in 1916 after you had received your Doctor's Degree in Economics, what teaching experience did you have?

A. Well, the school years of 1916 and 1917 I was instructor in Commerce and Industry at the University of Michigan, teaching marketing, foreign trade, industrial organization, and management. The following year, 1917 and 1918, Professor of Business Administration at the University of Delaware.

I taught accounting, industrial organization, and management, and marketing.

1619 The following year I went back to the University of Michigan as Assistant Professor.

Q. In what subject?

A. Commerce and Industry, which was in the Economics Department, and I taught there again Marketing, Industrial Organization, and Management, and Foreign Trade.

Then, in the fall of 1919 I went to Northwestern University, Associate Professor of Economics and Marketing in the School of Commerce.

In 1923 I was made a Professor of Economics and Marketing. 1927 I became Chairman of the Department of Marketing, and in 1937 I became Director of the Graduate Division of the School of Commerce, and am still those three things at Northwestern University.

Q. Are you a member of any organizations of economists or men in related professions?

A. Yes. I don't know that I can remember all of them. I belong to the American Economics Association; American Farm Economics Association; American Management Association; and I am also a member of the American Marketing Association.

Q. Is there an organization known as the National Association of Teachers of Marketing and Advertising?

A. Well, it is not known as that name now. There was
such an organization until 1938. I was president of
1620 that organization in 1929.

Q. Is there a publication known as the American Marketing Journal?

A. Yes, there is.

Q. Have you had any connection with that?

A. I was associate editor of the American Marketing Journal ~~from 1924~~ to 1926.

Q. I think you have referred to the American Marketing Association.

A. Yes. The American Marketing Association was organized in 1928, bringing together the American—bringing together the National Association of Teachers of Marketing and Advertising, which was made up primarily of teachers of marketing and the National Marketing Society, which was made up primarily of business men interested in marketing. Those two were joined in 1937, I believe, and I was made president for the year 1938.

Q. Have you had occasion to write any articles or books dealing with the subject of marketing, Professor?

A. Yes, I am author of "The Principles of Marketing" published in 1922, revised in 1932.

Q. Now, is that book rather widely used among teachers of marketing?

A. Yes, that book has been very widely used over the
last, well, approximately 20 years, and also two other
1621 books "The Readings in Marketing," an editorial job
published in 1924, revised in 1933, and then I am co-
author with L. D. H. Weld "Marketing Agricultural prod-
ucts in the United States" published in 1932. That's also
very widely used as a text and reference.

1622 Q. Now, in addition to these books have you had
occasion to write articles for technical or trade jour-
nals or magazines?

A. Yes. Articles, a number of them, but from the scientific point of view, the "American Economic Review," and the "Harvard Business Review," the "Journal of Marketing," and bulletins of the "American Management Association."

Q. I presume, Professor, that in the course of your work you have had occasion from time to time to write up various studies of the marketing business?

A. Yes, and supervised many.

Q. Have you had any connection with the University of Chicago?

A. Well, I taught marketing and sales administration there one summer session. Also at Columbia University and at the University of Wisconsin.

Q. All of that experience, Professor, had had to do with the broad question of marketing and economics, has it not?

A. Yes. With the marketing of various types of products to consumers of industrial goods.

Q. I wish you would just explain, please, what is meant by this term marketing as you have used it in connection with your work?

A. The term marketing covers all the operations involved in taking goods and services from producers to consumers. It includes buying and selling, the physical
distribution of goods; that is, the transportation
1623 and warehousing and financing of marketing activities, standardization operations in marketing, risk-taking operations in marketing and general aspects of market news service, and things of that type.

Q. Professor, are you connected in any way or have you ever been connected in any way with the oil industry?

A. No.

Q. I suppose it is true that you have given consideration to petroleum products as a commodity which was marketed, in the economic structure in this country?

A. Oh, yes.

Q. Have you any interest in any oil company?

A. None.

Q. I will ask you particularly, have you any interest in the Standard Oil Company of Indiana?

A. No, I have none.

Q. Have you any interest at all, of a personal nature, or financial nature, in the outcome of this action?

A. This action?

Q. Yes.

A. None.

Q. Professor, have you read, this morning, the testimony of Mr. James E. Dyer given in this case yesterday afternoon?

A. Yes, I have read it.

Q. ~~In~~ that testimony did you read the definitions 1624 of the term jobber or wholesaler or distributor which Mr. Dyer made?

A. Yes.

Q. I will ask you if it is your opinion, and if you agree with the accuracy of the definition of the term jobber, wholesaler or distributor, as given by Mr. Dyer?

A. Those are the definitions that are commonly understood by those terms.

Q. One of those was a definition approved by the Federal Trade Commission in 1931, was it not?

A. Yes.

Mr. Austin: I object, your Honor. I don't think the record shows that.

Mr. Hanley: I am very sure that it does.

Mr. Austin: The objection was made and sustained yesterday by the Examiner and Mr. Dyer was told to give his own opinion.

Trial Examiner Ballinger: The objection is sustained and the answer is stricken.

Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: On the record.

Mr. Hanley: In order to save time and inasmuch as we are now being tried by the Federal Trade Commission and inasmuch as the term jobber, or the definition thereof, is highly material in this action, the Respondent now 1625 offers in evidence the definition of the term jobber, distributor or wholesaler as the same appeared in the National Code of Practices for Marketing Refined Petroleum Products, authorized by the Federal Trade Commission June 12, 1931, and which definition is as follows: "—

Mr. Austin: Pardon me, your Honor. I don't know whether that was so approved, or anything about it.

Mr. Hanley: You can find out. I am making an offer of proof, here.

Mr. Austin: I object to that being read into the record except upon proper identification.

Trial Examiner Ballinger: The tender will be received subject to check and it is not in conformity with the action of the Federal Trade Commission, it will be stricken from the record.

Mr. Austin: Does that make it incumbent upon me to check it after it is in rather than incumbent upon the party offering it to properly identify his offer?

Mr. Hanley: Well, Mr. Austin, if I offered something that your own outfit did, I take it you ought to be able to check that without placing that burden on us. We say you made this definition. Now if you didn't, you are entitled to point out our error.

Trial Examiner Ballinger: The Examiner will admit it subject to check.

1626 Mr. Hanley: May I finish my offer, please?

I started to quote, after the word "Which definition is as follows: Jobber, distributor or wholesaler. One who carries a stock of petroleum products to sell to retail dealers or others for resale, but who may also sell directly to consumers."

The Examiner having requested a reference to the record as to the testimony of Mr. Dyer wherein the definition of the term jobber, distributor or wholesaler as approved by the Federal Trade Commission became a part of the evidence, I now refer to page 1480 of the record of testimony and to the following answer given by the witness Dyer:

"In order to give a little background for the definition I would like to read into the record, if I may, a definition of the word jobber, distributor or wholesaler, as those words were defined in the National Code of Practices for Marketing Refined Petroleum Products, which was authorized by the Federal Trade Commission on June 12, 1931."

Further, that on page 1481 of the record the witness then quoted the definition as it appears in the quotation just above made.

Mr. Austin: I don't want to quibble about that, Judge, but I don't think he quoted anything. I think he gave his opinion and, otherwise, I would have objected to it. As a matter of fact I did object to him giving anything ex-
1627 cept his own opinion. I believe he did state that he approved of that document.

Mr. Hanley: I am just assuming that the opinion of the Federal Trade Commission has some weight in this proceeding.

Mr. Austin: That is the whole point. I am not conceding it is the opinion of the Federal Trade Commission but I am not making any further objection as to the inclusion of that at this time.

1628 By Mr. Hanley:

Q. You have stated, Professor, that you have read all of the testimony of the witness Mr. Dyer.

I will ask you, based upon your experience as a marketing economist, if you agree with the answers which Mr. Dyer made to the questions which were propounded to him?

A. Yes, I agree with the answers as to principle and as to nature of the wholesale operations involved. Of course, I don't pretend to the knowledge of the oil industry which Mr. Dyer obviously had, although I am somewhat acquainted with it.

Q. With reference, Professor, to the function of a jobber, wholesaler, or distributor, generally, in the distribution of goods, please explain just what that function is; how such an operator works, and what he does, and what service, if any, in your judgment, he performs. Now, I am referring to all goods, Professor, including gasoline.

Trial Examiner Ballinger: Are you referring strictly, now, to the services of the jobber there?

Mr. Hanley: Jobber, wholesaler, or distributor.

A. I suppose it would be a little better if we would confine it to manufactured products?

By Mr. Hanley:

Q. Yes; that is all right.

A. The operations are rather technical, if you 1629 covered all of them.

This type of jobber, distributor, or wholesaler, the terms, unfortunately, are used somewhat synonymously, and, used in different terms, covers what we normally call the wholesale function. That is the operation in the case of consumers' goods between the producer of the goods, the manufacturer, normally, and the retailer.

The general function of the jobber is to pick out those goods which he thinks his retail customers will desire to buy; to purchase them in large quantities, if possible, from the manufacturers; to store them and, likewise, he operates in a financial way, because he normally pays cash for those goods, or pays for them within a relatively short time, and, on the other hand, he very commonly gives credit, and frequently rather long credit to the retail dealer.

He also sells the goods and usually delivers them to the retail dealer. In other words, he performs all the operations which are involved in getting the goods from the manufacturer to the retailer. We sometimes call him merchant middleman, meaning by that he takes title to the goods and then resells those goods as his own.

Q. Now, again referring to manufactured products, consumer-commodities of that type, what is the fact with reference to whether or not the so-called jobber, whole-
1630 saler or distributor not only distributes to retail resellers, but also distributes at retail to ultimate consumers?

A. Well, there are a great many jobbers, probably, in most lines of trade, who not only resell to retailers, but also have a small or a larger number of retail stores of their own through which they sell to the retailers, and then we have a similar operation which is performed by a good many types of organization, the department store, for example. The larger ones really perform a combined jobbing and retailing operation; that is, they buy in large quantities and store them and deal them out to their retail store or stores. The large chain stores perform a similar operation in that they cover both jobbing and retailing, but the individuals that we normally call jobbers or wholesalers or distributors, as the terms are used here, do frequently sell through their own retail stores.

Q. Do you know that to be true in reference to gasoline, as well as to other commodities?

A. Yes.

Trial Examiner Ballinger: Of your own knowledge?

The Witness: Yes, sir, of my own knowledge.

By Mr. Hanley:

Q. And is that true, generally, throughout the United States?

A. I don't know, from my own experience, that that is true, but from the information that I have in reading
1631 about the oil industry, I assume that it is true.

Q. Now, ordinarily, Professor, is it or is it not true that the so-called jobber or distributor bears the expense of storing and distributing the goods, either to a retail reseller or to the ultimate consumer, and relieves the manufacturer of that expense?

A. Yes, that is true of the great number of jobbers and distributors. There are a small group, of course, of what are sometimes called limited function wholesalers, who, possibly, perform only the selling operation and usually the collecting operation, too; I mean, collecting accounts. The normal jobbing function, however, is to buy the goods in quantity, store them, and redistribute them to the retailers as they sell them to them.

Q. In respect of the matter of price, what is the general rule and practice as to the jobber or distributor receiving a lesser price than a retailer receives from the supplier or manufacturer?

A. You mean by that he pays a lesser price?

Q. Does he pay a lesser price, generally speaking?

A. Generally speaking, he does. We have what we sometimes call a functional discount, meaning by that the jobber would pay a lower price than the retailer does, because the jobber performs these functions which we have just enumerated.

Q. In your opinion as a marketing economist, what
1632 have you to say as to whether or not that practice is
justified?

A. Well, it is very definitely justified. In the first place, obviously the jobber couldn't perform those operations if he weren't paid for it. They cost him money, and, consequently, he has to have a lower price in order to resell at a price which will give him—at least covers his cost and, presumably, a profit on his operations.

It is justified also because if the jobber didn't perform that function, then, in normal operations, the manufacturer would have to do it; and it would cost the manufacturer money, and, of course, in any given case—it depends on which seems the more economical method—which one will be used. By and large, jobbing is considered to be a very economical method of marketing, because, normally, the jobber handles either in large quantities or a number of articles, and the expense of his operation can be spread over all these various articles. That, of course, varies with industries, but the operation ~~is~~ thought to be economical because of the intensification of his work in a given area, and the saving in cost in handling a wide volume of goods.

Q. Is it or is it not true that, generally speaking, jobbers of manufactured commodities, including gasoline, take an absolute title to the property and dispose of it at their
own pleasure and in their own methods, without re-
1633 ferring to the supplier?

A. That is the normal operation. They are, as we say, merchants. They buy, and goods are theirs, and then they resell them.

Q. What is the fact, professor, as to whether or not there are many millions of dollars invested in the United States in the jobbing business of commodities, including gasoline?

A. Well, there are no figures as to the investment, but you can get some idea of the investment from the fact that the United States Bureau of the Census, in its figures on census distribution for 1939, show that what they call full function and limited function wholesalers, is their term for these jobbers, distributors, and so on, did over $23,000,000,000 worth of business in 1939, and the same source, I believe, shows in the neighborhood of $4,000,000,000 on what they call bulk tank stations in the petroleum industry.

1634 Q. With reference to the gasoline marketing industry, particularly, is it or is it not true that there are many millions of dollars invested in that jobbing business, and that there are many thousands of persons employed in the jobbing business?

A. It definitely is true.

Q. Would you say, Professor, that a necessary and integral part of the marketing structure for consumer commodities, including gasoline, in the United States involves the use of jobbing or wholesale or jobber or bulk buyer function?

A. Well, you say "necessary"; if you mean necessary from the point of view of economy and service to retailers and consumer, the answer is definitely yes.

Q. Without any reference to necessity at all, is it not a fact that the jobber system of distribution is an integral part of the distributing system?

A. It is, yes.

Q. As a matter of fact, Professor, that function that is performed by the jobber just has to be performed by someone, doesn't it?

A. Yes, someone; by the manufacturer or the jobber or the retailer, somebody has to perform that function.

Q. And whoever does it has to pay for it?

A. It costs money to perform that function, definitely.

1635 Q. So in any instance where a jobber buys gasoline by tank car from a supplier, and thereafter undertakes all of the burdens of distributing that gasoline, whether he sells it to other retailers or whether he retails it himself, is it not true that he bears a substantial burden of the cost of distribution that in turn his supplier is relieved of bearing?

A. Yes.

Q. Now, Professor, I assume that this is true, that all that you have said about the United States and marketing set up in the United States, is equally true of the State of Michigan and the City of Detroit?

A. The general pattern is the same.

Q. And applies to the marketing of gasoline and other petroleum products?

A. Yes, the pattern is the same.

Q. Now, supposing, Professor, that if for some reason it became improper, or at least the custom were abandoned, to use the type of buyer we have been discussing, and that is the jobber or distributor, would it or would it not, in your judgment, have a serious economic effect upon our national economic existence and marketing and distributing structure?

A. Yes, I think it would have a very unfortunate effect. In the first place there are many cases in which that is the most economical method of selling commodities, and consequently the general public benefits from using that method.

In the second place, it is a method of distribution or
1636 marketing, as we call it, which is competitive. It competes with other methods of distribution, so that over a period of years the better methods normally work out.

It would be unfortunate in many cases, because there are many manufacturers who do not have the ability or the financial resources for marketing their own products.

Q. Is it or is it not true that many producers of goods rely almost entirely upon the jobber method of distribution?

A. Many of them do, yes.

Q. And many rely on both the direct and the jobber method of distribution?

A. Very common method of distribution.

Q. The use of the two together, that is to say?

A. Yes; in some areas through jobbers and others through their own methods, and other areas through both.

1637 Q. From your experience, Professor, what have you to say just as a ~~practical matter as to the ability~~ of some manufacturers to market their goods, if they were deprived of the right to use these various means of operation, both direct operation, and in conjunction with the jobber operation?

A. To use both methods, you say?

Q. Yes.

A. Well, if they couldn't use both methods, it would probably mean a curtailing in their sales operations, because they normally use the jobber when he can do a selling job better than they can and ~~or~~ combined with that usually if he can do it more cheaply than they could.

If you were to destroy the jobber's operation, it would not only interfere with his operation, but would tend to increase the price of the product to the final consumer, because of the more expensive marketing method.

Q. And supposing for any reason a manufacturer of gasoline were deprived of the right to use both methods jointly, that is, the direct supplying of retailers, as well as the supplying of jobbers, what in your judgment would be the result so far as the public is concerned in connection with the price of gasoline?

A. You mean any one manufacturer or all manufacturers? I didn't get that.

1638 Q. Suppose all manufacturers were under that prohibition.

A. Well, I would expect it would tend to raise the price of gasoline, because presumably the jobbers are used where it is more economical to use them. Consequently, if the public that is supplied through those jobbers had to obtain gasoline without the jobber, more expensive methods of distribution will have to be used, and the public will have to pay for it.

Q. Now, Professor, suppose that just one supplier of gasoline were prohibited from indulging in this universal practice as you have described it, I will ask you what is your judgment as an economist relative to the effect of that on that particular supplier?

A. Well, it would tend to do one of two things: it would either reduce the volume he sold in that area, or else, in order to continue to sell the volume he had before, he would probably—I say probably, because presumably he has been selling to the jobber because it is cheaper—his expenses of marketing would increase, if he couldn't sell through the jobber.

Q. Well, suppose, Professor, that some one manufacturer or producer of gasoline was required to desist from the use of the jobber system of distribution as you have described it, what, in your judgment, would be the result as to whether the former customers of that producer
1639 could continue on in that function as wholesale buyers
or jobbers in the matter of getting their supplies from other producers of like products?

A. Well, I think other producers would probably be very glad to sell them. It is a highly competitive industry, and they would be glad for more outlets. I don't mean all of the producers, but many of the producers, they would be tickled to get a chance.

Q. Is it not true, Professor, that such a thing as that would simply result in a shifting of the source of supply, without changing the distributive factor in the slightest?

A. Yes, that would be just handicapping the one manufacturer, and the others would still have the other jobbers open to them. It would simply mean the jobbers would be buying of other manufacturers.

Q. So that if there is any detriment to the public, Professor, in one supplier indulging in this practice which you have described, is it not true that the interest of the public would be in no wise served by placing a prohibition upon that one supplier?

A. The answer is yes. But I don't want to be put in a position by saying that method is a detriment to the public.

Q. I don't want to put you in that position. Understand
1640 your opinion is the reverse, Professor.

But just assuming that the Federal Trade Commission thought that the jobber structure which you have described is an improper one for some reason, and suppose that they applied a rule to just one supplier of gasoline: in your judgment, as an economist, would that have any effect at all in eliminating the evil of the practice?

A. No.

Q. Assuming that it is an evil practice.

A. No. If I understand, it would be just the same, because the other manufacturers could still sell through the jobbers.

Q. Now, I think you better make it entirely clear, Professor, as to what your opinion is relative to the propriety and the good effect and the beneficial interest that is involved in the use of this jobber system of distribution.

A. Well, the justification of the jobber system of distribution from the economic point of view, and from the social point of view, is that it leads to more economical distribution. The jobber operates on a large scale. He buys products in large amounts; he represents, if you will, the way the retailers are making contact with various manufacturers who might have products that the retailers want to distribute; the expenses of carrying on his
1641 wholesale operations are normally spread over a considerable variety and volume of products. So that in many cases this wholesale function is carried on more cheaply by the jobber than it can be carried on by the manufacturer. And particularly the function of buying and storing and delivery is carried on much more cheaply than the ordinary retailer could operate if he had to perform his own wholesale functions.

Then there is another economy that for many manufacturers is important, and that is the manner of credits. The jobber is right on the ground, frequently is usually able to keep in close contact with his retail customers, he sees them frequently, and he can check on their credit, make collections; whereas the manufacturer is usually a distance, frequently selling a small number of products, and his costs of investigating credit and making collections would be much higher than are those of the jobber.

The general justification for the jobber, to summarize, is that it results in an economical method of distribution, a method which is frequently more economical than either direct sale by the manufacturer or direct purchase by the small retailer.

Q. Professor, in your judgment does the jobber system of distribution, as you have described it, tend to contribute to or lead to monopolistic tendencies or restraint of
1642 trade, in any community or territory in which it is used?

Mr. Austin: I object to that question, your Honor. It is a conclusion of law.

Mr. Hanley: I am not asking him his opinion as to the law. I am asking him now a question of fact, your Honor.

Trial Examiner Ballinger: Read the question.

(The question was read.)

Trial Examiner Ballinger: The objection is overruled.

A. Why, definitely the use of the jobber brings in another competitive factor in the marketing picture. So that it leads away from monopoly. Certainly not toward it. Without the jobber you would have a very much smaller number of competitors in the field.

Trial Examiner Ballinger: That is assuming that some other activity didn't take the place of the jobber?

The Witness: Well, if some other activity took the place of the jobber, you mean by that, the manufacturer, for example, might sell? You still would have a smaller number of operators in the field, presumably, because in many lines of industry now the manufacturers are selling, and they are also selling through jobbers, so that you have even the same product going through two or more points.

1643 Trial Examiner Ballinger: When that happens does that happen in the same districts?

The Witness: Frequently, yes.

Trial Examiner Ballinger: The larger companies?

The Witness: Larger companies, yes; many of them sell, for example, large accounts directly, and the jobber sells the smaller accounts. It is an economical distribution of their operations, and sometimes they both compete for the same accounts.

Q. Professor, is it not true that jobbers do have certain economic advantages in their own community, small locality in which they do business, as contrasted with the large company which may do business over a very extensive territory?

A. Yes, they do have economies. I don't know whether you want it repeated or not, but the testimony which was referred to before covered many of those items, which economy recognizes.

Q. I don't care to have you repeat it. I just want to lay the foundation for another question.

A. Yes.

Q. Is it not true that those economies are ultimately reflected in the price which the entire public pays for gasoline, for instance, irrespective of who supplies that gasoline?

A. Yes, they are a competitor in this field, and if their costs of operation are lower in a competitive market that tends naturally, to the reduction of prices. And the
1644 fact that they are there and can, if they do reduce prices, means that others eventually must follow suit.

Q. I show you, Professor, what has been marked Respondent's Exhibit 19, entitled Flow Chart of Gasoline from Refinery to Consumer and I will ask you if you have examined that exhibit?

A. Yes, I have.

Q. In your judgment, does that fairly portray the general system of distribution of gasoline in this country?

A. Yes, it does.

Q. Is it not true that that chart might apply to other commodities, as well as gasoline?

A. Well, yes. Not in detail, of course, but in general complication and methods of distribution it could apply to many industries.

Q. Suppose, Professor, that the Federal Trade Commission or some other authority were to fix the channels of distribution in that a supplier could not sell in the same territory to different types of buyers at different prices, please give us your opinion as to what the economic result of that canalization of industry would be.

Mr. Austin: I object to that question, your Honor, and any questions based on what the Federal Trade Commission might do. I think it is highly speculative.

Mr. Hanley: I withdraw that portion of the question.

Mr. Austin: And outside the issues of the case.

1645 Trial Examiner Ballinger: Let's see what portions of the question remain. Read the question.

(The last question and the record were read by the Reporter.)

Mr. Hanley: I withdraw my offer to withdrew. The question is all right.

Trial Examiner Ballinger: Objection sustained.

By Mr. Hanley:

Q. I will ask you, Professor, what your judgment is as to the economic result in commerce in gasoline, assuming that channels of distribution were fixed or canalized in such a way that a distributor or maker of gasoline could not sell in the same territory to different types of buyers at different prices, specifically if he could not sell in the same territory to what you have described as a jobber, and at the same time sell to a retailer at a higher price?

A. Well, in the first place I think it would very likely lead to higher costs of marketing.

In the second place, however, from a little longer run point of view, it would be very unfortunate because it is through selling to different types of buyers in this way that competition is continued, and methods of marketing are improved. Whereas if channels of distribution were frozen, there would be no opportunity for experimentation or improving channels of distribution.

1646 Q. Professor, it has been established in this law-
suit that the Respondent, the Standard Oil Company,
is selling to four jobbers or distributors in Detroit known
as Ned's Auto Supply, Wayne Oil Company, Citrin-Kolb
Oil Company, and Stikeman Oil Company. Generally
speaking, the price to those four distributors is about one
and a half cents per gallon below the usual tank wagon
price, which the Standard Oil Company charges to retail
dealers or service station operators, and the Standard Oil
Company is engaged in selling gasoline by tank wagon to
retail filling station operators. Each of these four dealers
has his own bulk storage which he maintains at his own
expense, he has his own trucks for delivery of gasoline, he
operates his entire business at his own expense, the Stand-
ard Oil Company does not participate at all in the main-
tenance of his establishment. One of those distributors,
Ned's, disposes of practically all of the gasoline purchased
at retail through its own retail outlets, supplying its own
retail outlets from its own bulk stations by means of its
own trucks; one of the distributors, namely, the Stikeman
Oil Company, does not do any retail business at all, it sup-
plies other independent retailers exclusively; the two others,
namely, Citrin-Kolb and Wayne, supply mostly retail
dealers who are independent, but on some occasions,
1647 and from time to time, those two last named com-
panies operate retail service stations directly. In the
aggregate, those companies buy somewhere in the neigh-
borhood of fourteen to fifteen millions of gallons of gasoline
a year, and the companies respectively handle from ap-
proximately 2,000,000 gallons each up to 5,000,000 gallons
a year. Basing your answer on your experience and knowl-
edge as an economist, state whether or not in your view
~~there is~~ anything economically unsound in that set-up and
system of distribution.

A. Well, the set-up seems entirely sound to me. All of these organizations, as you enumerated them, are performing what we call the wholesale function, and would be justified—in fact, they would have to obtain a functional discount on that basis, because of the expenses of operation. And that it is quite possible also that they might be justified in some or all of that lower price because of the quantities in which they purchase.

Q. Is there anything in that set-up as it has been outlined in the preceding question, which, in your judgment, as an economist, tends to create a monopoly, tends to restrict or injure competition, or tends to lessen competition or restrain trade in any particular?

Trial Examiner Ballinger: Or injure a competitor?

By Mr. Hanley:

Q. Yes, or injure competitors in the gasoline business?

1648 Mr. Hanley: You better read that question now.

(The record was read as follows: "Question: Is there anything in that set-up as it has been outlined in the preceding question, which, in your judgment, as an economist, tends to create a monopoly, tends to restrict or injure competition, or tends to lessen competition or restrain trade in any particular?

"Trial Examiner Ballinger: Or injure a competitor?

"Question: Yes, or injure competitors in the gasoline business?")

A. Why, the answer to the first part of the question is definitely no. That tends to increase competition, having these various methods of selling.

Now, as to injuring a competitor, it depends on what you mean by "injure." If a company in this way distributes more effectively than a competitor that distributes in some other way, probably they will outsell him on the market. But I see nothing that could be construed as unfair about it.

By Mr. Hanley:

Q. Well, Professor, if any distributor can reduce his cost and distribute more efficiently, in your view as an economist, isn't that exactly what competition means?

A. That is what we want to get from competition.

Q. Does not that result, in your view, to the benefit
1649 to the public?

A. Very definitely a benefit. The lower prices and better service.

Mr. Hanley: You may take the witness.

Trial Examiner Ballinger: Off the record.

(A discussion ensued off the record.)

Trial Examiner Ballinger: Now, at 12:50 P. M., the hearing stands in recess until 2 P. M.

(Thereupon at 12:50 P. M., an adjournment was taken to 2 o'clock P. M.)

1650 Afternoon Session.

2 P. M.

Trial Examiner Ballinger: We will come to order.

Mr. Hanley: I released Professor Clark, but, your Honor, I do have one or two other questions I would like to develop with him.

Trial Examiner Ballinger: Proceed.

FRED EMERSON CLARK resumed the stand, and testified further as follows:

Further Direct Examination by Mr. Hanley.

Q. Professor Clark, this morning in your testimony you referred to the fact of large department stores—you may have mentioned chain stores, but I will include chain stores in my present question—as indulging in the retail operation; that is, selling to the ultimate consumer, and also indulging in the wholesale operation; that is, selling at a lesser price to either large consumers or other resellers. I would like to clarify that. Just what type of business did you have in mind when you gave that testimony?

A. Well, I had in mind, so far as department stores are concerned, what is ordinarily considered as a department store, such as Macy's, Hudson's, Marshall Field's,
1651 Carson-Pirie-Scott, all of whom not only sell to the ordinary consumer at retail, but—I am not sure of this, although I assume this would be true—because most all department stores have what they call a contract department, selling to hotels, clubs, places of that kind, or even handle the decoration of large homes through their contract department, and they also sell to other retail stores, and that is done by the chain stores, particularly in the food fields, and to some extent in the drug field, so that they are carrying on, at least, the two types of operation.

Q. This morning you referred at length to the expense of conducting the jobber operation, which expense must be borne by someone in the distributing gasoline and other commodities. Now, I will ask you, Professor, if the following items might be fairly considered or should be fairly considered in the list of expense items that apply to the jobber operation: advertising discounts, and insurance?

A. Yes, at items, yes.

Q. Gasoline and other commodities used by the company in its operations?

A. Oh, yes, that is part of the expense.

Q. Interest on money borrowed or invested?

A. Yes.

Q. Heat and water?

1652 A. Yes, used in their wholesale operations or in the office.

Q. The same with reference to electric current?

A. Yes.

Q. Licenses for cars or licenses to do business of any kind which may be required?

A. Yes.

Q. Repairs on equipment and facilities?

A. Yes.

Q. Supplies—I mean by that any kind of supplies that are necessary to the operation of the office or the operation of the facilities?

A. Yes.

Q. Telephone, telegraph expense, postage?

A. Yes.

Q. Wages and salaries paid personnel, employees?

A. Yes.

Q. Taxes of all kinds?

A. Yes.

Q. Charge-off of bad debts?

A. Yes.

Q. Depreciation of real estate and equipment?

A. Yes.

Q. Obsolescence of equipment and properties?

A. Yes.

1653 Q. Interest on cash capital invested?

A. Yes.

Q. This may be a similar item, but would not interest on personal property invested in the business be an expense?

A. You mean like office equipment and things of that kind?

Q. Yes; be in the same category as cash invested?

A. Yes, used in the business.

Q. In addition to these particular items, is it not true that there are certain miscellaneous items that cannot be definitely allocated to any one of these particular accounts that do form a part of the expense of operating the business?

A. Yes. Either cannot be allocated or are not allocated.

Trial Examiner Ballinger: Or if allocated, allocated in part?

The Witness: Yes, that would be true.

By Mr. Hanley:

Q. It has been called to my attention that I may have overlooked salaries. I thought I asked you wages and salaries, if they were not included as proper expenses.

A. Yes.

Q. Now, Professor, is it not true that all of the administrative expense, some of which has been itemized in this list which I have given you, as well as all of this out-of-pocket expense of handling the jobber functions is 1654 properly given consideration in determining what the cost of a jobber is in performing his function as a distributor?

A. Yes, of course.

Q. Professor, what is competition?

1655 A. Well, competition, in the business sense, is a striving after business with the attempt, normally, to obtain as much as you can and it involves striving with others, each of whom are trying to obtain some business or all business that you are attempting to obtain.

Q. The term has been used in connection with your testimony and otherwise in this case and, indeed, appears in the statute under which the Respondent is charged here, namely: "Injury to competition." Is it not true that whenever anyone, for any reason, is able to sell more efficiently than his competitor, and reduces the price of a commodity, that that results in an injury to the competitor in the sense that the competitor must reduce his price?

A. Yes. It results in injury to the competitor in that he must reduce his price or if he doesn't reduce his price, he is likely to lose business. Of course, the very essence of competition is that that sort of thing will happen and those competitors who can't meet competition on a price or service or product basis, are either forced out of business or else they will have to improve their own service so that they can compete again and it is this change of competition that keeps on improving our system of marketing as well as our system of production.

1656 Q. As an economist, do you think there is anything unsound about the idea of competition?

A. No, it is the thing that we think characterizes the effectiveness of our present economic system and we pass many laws in order to keep competition going so that we will gain the advantages which result.

Q. Does it not result ultimately in the benefit of the public in the price of commodities which they have to buy?

A. Yes, it is the interest of the public that we have primarily in mind in urging the advantages of competition; that it results in lower prices and/or better service and improved products and the whole net result of competition is felt by the consumer advantageously.

Mr. Hanley: That is all. You may take the witness, Mr. Austin.

Cross-Examination by Mr. Austin.

Q. Are you familiar with the Robinson-Patman Act, Mr. Clark?

A. I am familiar with it. I am not an expert on it. All American students are interested in it.

Q. You probably read it very shortly after it was passed, didn't you?

A. Yes.

Q. And have you read any of the decisions that have been issued under it?

1657 A. Some of them, yes.

Q. Have you ever written any books or treatises on the Robinson-Patman Act, or on the price discrimination provisions of that Act?

A. No, I haven't. I am revising my own "Principles of Marketing" now, and I probably will be, but I haven't done it yet. I have the material ready for it.

Q. Have you ever written anything treating with the exercise of what has been called, here, a dual function by a jobber or wholesaler; that is, treating, for instance, allocation costs of business as between the retail and wholesale end of the business where a wholesaler also operates a retail store?

A. I haven't written anything on the cost aspects of that. You can't write on marketing, hardly, without discussing that type of operation, of course.

Q. Can you refer me to anything that you have written that has been published on that type of operation?

A. Yes; Chapters 8, 9, and 10 in my "Principles of Marketing" discuss in various places that subject and, also, Chapter 12, which deals with, among other things, the department stores and chain stores, which touches on that.

Q. Anything else that you think of at the moment?

A. No, I think not. Of course, you have the same type of operation in marketing farm products, too, and I
1658 have touched on it in the book on marketing farm products.

Q. You mean wholesalers also selling at retail?

A. Yes; you have that type of operation, and then, of course, you have also another mixture of function where wholesale receivers receive from the country, also, sometimes carry on the jobbing function.

Q. Well, that is more or less of a producing and wholesaling mixture, isn't it? Not producing, but—

A. In agricultural marketing, you have two types of wholesaling; you have one which is a collection of commodities at central markets which in a sense would correspond to your manufacturer. Then you have another wholesaling function of re-distributing those products. And those two functions are sometimes combined in a marketing of farm products.

Q. Two bites to the wholesale cherry, you might say?

A. How is that?

Q. Two bites to the wholesale cherry, you might say?

A. Well—

Q. At least, two types of middlemen; would that be right?

A. Yes, yes.

Q. Now, we have referred here—you have referred in your testimony to jobbers, and sometimes to wholesalers or wholesaling, and to retailers and retailing; are wholesaling and retailing two separate functions in the marketing picture?

1659 A. Yes, they are two separate functions in the marketing picture, although, of course, they are functions which are frequently combined in one organization.

1660 Q. Well, if one organization was engaged in both, would that organization be performing just one function or two functions?

A. It would be performing both the wholesaling and retailing operations.

Q. Then the wholesale function, referring to that, or to the jobbing function, is it true that you are referring to one thing, and if you refer to the function of a retailer, you are referring to something else? That is, is there a line of division where you can say one stops and the other begins? That is what I mean.

A. Well, there is a line of division. Of course, it is a hazy line of division at some points. But there is a pretty definite line of division, we distinguish between wholesaling function and retailing function. Now, in operation there frequently will be, as we said before, one organization performing both.

Q. I believe you said, Professor, that the normal function of a jobber is to resell to retailers; is that correct?

A. Yes, that is what we consider the normal function.

Q. That is, as I understand you, the wholesaler or jobber is a middleman who gets the goods from the manufacturer to the retailer, when we are talking about manufactured products?

A. That's right. Of course, I also indicated in my testimony that many wholesalers do also retail.

1661 Q. Yes. But when they also retail, then they are performing the retailing function, are they not?

A. Then they are performing both the jobbing function and the retail.

Q. But it is still two functions, isn't it?

A. That's right.

Q. Then is it correct to say that in the case of a jobber who also sells a portion of the goods which he buys as a jobber, at his own retail stores, that his wholesale function ceases when the goods reach the retail store? I should say his wholesale function in connection with the marketing of those goods.

A. Well, when the goods reach the retail store?

Q. Reach the retail store, yes.

A. Yes, I should say they do end then, yes.

Trial Examiner Ballinger: His control over and connection with those goods cease when they reach the retail store, is that it?

Mr. Austin: I didn't say that, your Honor, because he operates the retail store. I am trying to find out when he ceases to be a jobber and becomes a retailer.

Trial Examiner Ballinger: Now, I am speaking of a case in which he is selling to a retailer.

Mr. Austin: Well, that is another question.

Mr. Hanley: In view of the statement of counsel, 1662 the question is objected to for the reason that it implies a definition of jobber which is in the mind of counsel and is no where in evidence.

Mr. Austin: I think there is no question pending now, Judge, except one by the Examiner. We are going to get mixed up here.

The Witness: May I clarify my testimony on that point?

Trial Examiner Ballinger: Yes.

The Witness: If I understood your question, you were asking about the jobbing function?

By Mr. Austin:

Q. As respect to a particular goods or lot of goods that is starting from the manufacturer, purchased by the jobber, and thereupon transported by him to his own retail store.

A. But not as to what that man might be known as in the trade or what he might be defined as?

Q. That's right. I am talking about the exercise of the function.

A. Yes.

Q. Then, did I understand your answer to be that when the goods reaches his retail store, from that point on, as to those goods, he becomes a retailer and is no longer a jobber?

A. Well, of course, you can't say that, because he is a jobber. From that point on he is performing the retail functions.

1663 Q. As to those goods?

A. Yes.

Q. Of course, he may be at the same time, of course, a jobber bringing along some more goods?

A. That's right.

Q. Down the stream of distribution?

A. Yes.

Q. Now, you made some references to functional discounts, and perhaps you better define that again:

A. The term functional discount is a term which is applied to a discount which is given to a particular middleman because of his position in a channel, of distribution; for example, a wholesaler in a particular line of business, you might give a 30 per cent discount off of list, whereas if you were selling to a retailer in that line, you might give him 20 per cent off of list. The functional discount is given on the assumption that the particular middleman who is given the discount performs certain operations, and the discount is for the purpose of covering his expenses of doing that thing.

Q. Well, you mean, do you not, operations which the retailer does not perform?

A. Well, that depends on which function. You will give functional discounts to retailers too.

Q. Yes, but I am now referring to the wholesaler function.

A. Take in the case I mention, I mentioned 30 per
1664 cent to the wholesalers and 20 per cent to the retailer;
now, that is 10 per cent additional, 10 per cent that is given to the wholesaler on the assumption that will cover his cost of operation, and then he will give approximately the 20 per cent discount to the retailer, and it is given to him to cover his wholesaling operations, the costs of his wholesaling operations.

1665 Q. Well, that's what I understood you to mean,
Professor Clark, and is it not true, then, that properly defined, a functional discount is given for the purpose of covering and should cover—and I am still referring to the wholesale function—such a discount should cover only functions which are not performed by a retailers; that is, a function which is in addition or apart from or precedes the retail function?

Mr. Hanley: Are you asking his opinion as an economist as to what should be included?

Mr. Austin: I am asking him whether functional discount, as the term is generally understood and used, is an additional discount given to a wholesaler or a jobber for performing a wholesaling or jobbing function, as distinguished from retail functions.

A. If I understand your question, the answer is yes. In other words, he would get from the list price the whole discount which the retailer would obtain plus an additional discount for performing his wholesaling operations.

Q. So that if he resold those goods to the retailer, he would have a 10% margin to cover his expenses and profit; is that right?

A. As a wholesaler.

Q. As a wholesaler.

7

A. And the remainder would be to cover his expenses
1666 and profits as a retailer.

Q. You are assuming, when you make that statement, are you not, that he will resell to the retailer at a discount of 20% from list?

A. Not necessarily. He may resell, himself, as a retailer. Department stores get that type of discount, for example.

Q. If he resells to a retailer?

A. If he resells to a retailer, he would get the 10% and give the remainder to the retailer.

Q. Now, if the wholesaler instead of reselling to the retailer, resells the goods at retail himself, you would still treat the 10% as the functional discount, would you not?

A. Well, in that case I suppose you could treat that as a functional discount, or treat the whole thing as a functional discount. It amounts to the same thing in the end. He would be getting 10% covering his wholesale operations and he would sell at the retail price and the remaining 10% would cover his retailing operations; if I understand your question.

Q. Well, suppose that the manufacturer was selling direct to retailers in the same territory, as you said, he may do, with 20% off list, and—

Mr. Hanley: What is "list"? Just a moment, please.

1667 Mr. Austin: The witness said 20% off. I can ask him what he meant: off of what?

By Mr. Austin:

Q. I ~~presume you~~ meant manufacturers' list, did you, Professor Clark?

A. I said off the list price. Of course, you don't always have the list price. Sometimes they are built up.

Q. No; but we have got to start some place.

A. Yes.

Q. If the jobber is operating his own retail store in a territory where the manufacturer sells direct to retailers at 20% off and the jobber gets 30% off—

Mr. Austin: I will withdraw that. I am afraid I am getting into a question which I would have to make so many qualifications with that it might not be intelligible after I finished it.

By Mr. Austin:

Q. Getting back to the question of the limitation of the functions, Professor Clark, which was what I was pursuing. When you said that the jobber's function is a necessary function in marketing, were you referring to retail resales by the jobber in the cases where the jobber makes such sales at retail, or were you referring only to the middleman function?

A. Well, I believe I covered that in two ways. Of course, the main part of my testimony was with re-
1668 gard to the function performed by the middleman
by resale at retail is often necessary or desirable on the part of the jobber. It is the type of organization which frequently leads to more flexibility in marketing, and, of course, carried into some of our well-known retail fields, we find that this is the basis of our chain store operation and, to a considerable extent, the basis of some of our department store operation.

Q. By that, do you mean the department store or chain store may do their own warehousing and buy on the jobbing basis?

A. Yes.

Q. And are you familiar with the limitation in the Robinson-Patman Act regarding price discriminations and cost justification?

A. Yes, I believe I am. You mean on the basis of cost or selling or service or physical distribution.

Q. Do you consider that that proviso in the Act regarding differences of cost in manufacture, sale, or delivery resulting from the differing methods of sale and delivery, of different methods of which goods are sold and delivered; are you familiar with the proviso?

A. Yes.

Q. Are you of the opinion that that is an economic limitation upon the benefits which department stores and
chain stores customarily get, or should get, as dis-
1669 tinguished from retailers who do not do their own
distributing?

Mr. Hanley: That is objected to as incompetent, primarily for the reason that it refers to cost without any definition of costs being given to the witness. There is an evident purpose and effort on the part of the Commission to limit costs as referred to in the Robinson-Patman Act to certain out-of-pocket costs without giving consideration to the costs which this witness has testified may be properly taken into consideration as being a cost of the jobber function. This question entirely disregards the scope of the term "cost" as used in the statute.

Further, that it calls for a legal conclusion on the part of the witness as to what the Congress of the United States meant when they passed the Robinson-Patman Act.

Mr. Austin: I don't think it calls for a legal conclusion. I asked the witness whether or not, referring as he has to department stores and chain stores, whether he thought that the statutory proviso is a proper economic limitation upon the extent of the advantage that these jobber retailers, such as department stores and chain stores, should be entitled to, due to the fact that they perform both functions.

I would first like to ask the witness whether he understands the question.

1670 Trial Examiner Ballinger: Do you understand the question?

The Witness: Well, I think I do. I wish I knew what the next one was going to be.

Trial Examiner Ballinger: Do you understand what he means by the word "costs"?

The Witness: As I understand it, you mean a lower price which stores ~~of~~ this type have to pay for the goods they purchase. Is that justified, economically. Is that your point?

By Mr. Austin:

Q. First, is it your opinion that there should be some limitation upon the price benefits or lower price to which they are entitled because of their size, and the fact that they perform certain jobbing functions?

A. Yes, I think there should be some limitation.

Q. Now, having reached that conclusion, I ask you whether you think the statutory limitation is a proper one based upon your opinion as an economist?

Don't answer, because I am trying to clarify the question and there is an objection pending.

Mr. Hanley: That is objected to as calling for a legal conclusion on the part of the witness; not a matter of expert testimony, not a matter within the knowledge
1671 of the witness, and is argumentative. It goes to the wisdom of the statute rather than any question of

fact which might be determined on the basis of knowledge of economics.

Mr. Austin: I think a great many questions on direct examination went to just that same sort of thing, and the only objection that I could see that there would be to that question would be the question as to what the statute means by "cost". I am perfectly willing to let the witness answer it on his own idea of wholesale and retail cost.

Trial Examiner Ballinger: The objection is overruled.

The Witness: Would you read the question again?

(The question was read as follows: "Now, having reached that conclusion, I ask you whether you think the statutory limitation is a proper one based upon your opinion as an economist?")

Mr. Hanley: Just a moment, Professor Clark, I would like to ask a question as a foundation for the objection.

Trial Examiner Ballinger: You may.

Mr. Hanley: Professor Clark, do you know what the statutory limitation as to cost is?

The Witness: Well, if I understand the question he
asked, it has to deal with the section that says that
1672 lower prices must be justified by savings in selling
costs, service costs or delivery costs; is that right?

Mr. Austin: That's right; which results from the differing methods or quantities in which the goods are sold or delivered.

Mr. Hanley: Do you understand, Professor Clark, what is contemplated by the statute as being included within its terms; namely, the differing costs in marketing or delivery of goods?

The Witness: Well, my reply was going to be that you can't answer that question until you know how the Act is interpreted.

Mr. Hanley: Exactly.

The Witness: In other words, the Courts or Federal Trade Commission might allow only certain costs which I thought are not adequate, so I don't believe that question could be answered until you know how the Commission and courts interpret the statute.

By Mr. Austin:

Q. That is a fair answer, Professor Clark. I wanted to know whether you had an opinion in that in your own mind, if you had made it up, as to what costs were covered there, you might be able to answer it.

1673 Q. Counsel for the Respondent asked you a few moments ago whether certain items, such as advertising, discounts, salaries, and depreciation, and so forth, were proper in whole, or in part, to be allocated to wholesale operations, and I believe you said they were?

A. Right.

Q. Was that in any way intended to be a complete statement?

A. How is that?

Q. Was that in any way intended by you to be a complete statement of the items which go into wholesale costs?

Mr. Hanley: Just a minute. May I have that question please?

(The record was read by the Reporter.)

Mr. Hanley: That is objected to as entirely adverse to the testimony which the witness has given. He has listed a great number of items which go into the cost.

Mr. Austin: Of course, that is what I am referring to. Whether the items which were enumerated were a complete list.

Trial Examiner Ballinger: Well, the witness enumerated many other items.

Mr. Austin: Yes. I am referring to the entire list.

A. Well, I wouldn't say whether that would be an entire list or not. It is a very long list. I am not a cost accountant, and my reason for saying yes to those is because they obviously involve operations which are
1674 undertaken in this wholesaling or jobbing function,
and with the legitimate charges against that function, so long as they were undertaken in the performance of that function.

Q. Well, you have just stated that you are not a cost accountant, Professor Clark.

A. Right.

Q. Would you be able to state then how to separate or allocate those various items that you mentioned as between wholesale and retail business of a concern engaged in both functions?

A. Would I be willing to say how to do it?

Q. Yes.

A. Well, that is the job of a cost accountant.

Q. There ~~has~~ to be some allocation, has there not?

A. There should be.

Q. With many of those items?

A. Yes.

Trial Examiner Ballinger: I understood you to say that would be the job of a cost accountant?

The Witness: Yes. For somebody who knew cost accounting.

By Mr. Austin:

Q. Would it be possible for you to answer the question I asked you a moment ago about the cost proviso in the Robinson-Patman Act, if you accepted as a guide
1675 the statement that you made as to these various costs which in your opinion should be considered in determining the cost of operating the wholesale function?

Mr. Hanley: Just a moment, Professor.

When you stated that this list of items might be properly considered as jobber costs, did you mean by your testimony that there might not in many instances be other items that would constitute cost of the jobber function?

The Witness: No; I was asked to go over this specific list.

Mr. Hanley: Did you mean by your answer that these items as outlined were proper costs?

The Witness: That's right.

Mr. Hanley: Is it not true that there might be others in addition to these items?

The Witness: There might be, yes.

Mr. Hanley: The question is objected to on the ground that it now appears there is no adequate definition of what the costs are to which the question pertains.

Trial Examiner Ballinger: Let me have the question.

Mr. Austin: I withdraw the question, your Honor. I think to save time.

Trial Examiner Ballinger: The question is withdrawn.

Mr. Austin: I agree that it would be of little
1676 benefit to either side for the reason Judge Hanley stated, because we haven't got a complete definition of costs.

By Mr. Austin:

Q. Professor Clark, I believe that you were questioned somewhat as to the benefits of the jobber function to the economic structure, and you stated that the jobber's function and the exercise of it by jobbers, is of benefit both to retailers and to manufacturers?

A. That's right.

Q. Now, I believe that we have already reached the conclusion that a jobber, while he may be both a retailer and a jobber, becomes a retailer after the goods reach the place where they are sold at retail.

Mr. Hanley: That is objected to as a mis-statement of the witness' testimony, the witness having testified that the function may be different, but that a jobber was a jobber, irrespective of whether he operated at both retail or at wholesale or both.
